But this proposal—which requires far deeper cuts and gives the president the power to impose them if Congress does not—has ripped it. Rep. Ron Dellums (D-Calif.), one of those critics, charged that despite the support it drew from people such as Kennedy and Bumpers and Simon, "I see no guarantees (in the proposal) for the poor and powerless. The people that I represent who have been the most loyal supporters of the Democratic Party do not deserve to have their loyalty rewarded by abandonment."

Many white liberals, however, argue that the political imperative to "do something" about the deficit is irresistible, and they think Gramm-Rudman can be reshaped in conference to force Reagan to accept a choice between deep defense cuts and acquiescence in higher taxes.

They voted to go to conference on the measure despite deep misgivings about the proposal as it stands. Rep. John Dingell (D-Mich.) said his preliminary analysis suggests that the transfer of the power of the purse from Congress to the president is so great under the Senate-approved bill that "everything that's been gained (by legislatures in

democratic countries) since the field of Runnymede has been thrown away."

Rep. David Obey (D-Wis.), another liberal conferee, said his hope is that "we can keep all categories of spending on the table, and then the military will have to take a real hit if Reagan refuses to consider a tax increase." But he, too, conceded that "at this point, nobody knows what's in it and what it would really do."

Backstage there are Democratic strategists who don't really care what is in it, or what it does, so long as it is rewritten to take effect in 1986 and so long as the voters know it's basically a Republican design.

House Democratic campaign chief Coelho argued that "when the crunch comes, and programs people want are cut, they will remember who pushed it."

That hope of a public backlash is little consolation to those like Dellums who see Gramm-Rudman as the final step in Reagan's design to dismantle the welfare state. They see betrayal, not shrewdness, in the acquiescence of so many Democrats in that plot.

LUPUS AWARENESS WEEK IN WYOMING

HON. DICK CHENEY

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. CHENEY. Mr. Speaker, lupus erythemsatosus is a disease which strikes over 55,000 individuals each year. It victims are primarily young women between the age of 16 and 30. Next week is National Lupus Awareness Week and I would like to take the opportunity to commend the Wyoming Chapter of the American Lupus Society for its work to heighten public awareness of this disease. Following is a proclamation issued by Governor Ed Herschler proclaiming October 20 through October 26 Lupus Awareness Week in Wyoming.

PROCLAMATION: LUPUS AWARENESS WEEK

Whereas, there are approximately one million Americans who are victims of lupus and it is estimated that over 55,000 new cases are diagnosed each year. Although not well know, lupus is more prevalent than muscular dystrophy, cerebral palsy, multiple sclerosis, leukemia, cystic fibrosis and other highly visible and better known diseases. Ninety percent of lupus patients are women, with the average age of onset being 16 to 30. It affects all races and lupus strikes one woman in about every 400; and

Whereas, the cause of lupus is not known, and its initial diagnosis is difficult to make since there is no single set of symptoms or pattern to the disease. Lupus is not cancerous or infectious. Recent studies indicate distinct hereditary factors exist; and

Whereas, in recent years, the outlook for lupus patients has improved due to extensive and vigorous research and positive results have emerged from studies uncovering several diverse defects of the immune system and from research on genetic and environmental factors influencing the disease.

Therefore, I, Ed Herschler, Governor of Wyoming, in recognition of the need for greater public awareness of lupus, do hereby proclaim the week of October 20 through October 26, 1985, as "Lupus Awareness Week".

I call upon the people of the State of Wyoming to observe this week with appropriate ceremonies and activities.

In Witness Whereof, I have hereunto set my hand and caused the Great Seal of the State of Wyoming, to be affixed this 27th day of September, 1985.

ED HERSCHLER, *Governor.*

Attest: Thyra Thomson, Secretary of State.

A TRIBUTE TO SISTER MARY DEPAUL GLUNS

HON. ALAN WHEAT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. WHEAT. Mr. Speaker, for the past 20 years, Sister Mary DePaul Gluns has been a teacher, counselor, and friend to the students at St. Mary's, an Independence high school in my congressional district. On October 23, alumni, parents, friends, and students will say thanks to this remarkable woman at a program in her honor. It is with tremendous pleasure that I am able to add my voice to the chorus of gratitude expressed by her colleagues and many friends.

An outstanding educator, Sister Mary DePaul entered the convent at St. Agnes Academy in Kansas City, MO, in 1927. She has taught thousands of children in eight different schools over the years and her message has always been the same. Sister Mary DePaul instills in her students that regardless of scholastic ability, each student is special. She has the knack to make the less capable student feel as proud as the straight A pupil.

A foreign language specialist, Sister Mary DePaul taught several other classes besides German language and culture. She was at different times a mathematics, English, and social studies teacher. Her breadth of experience may explain why so many beginning teachers turned to her for advice and assistance. Her advice and assistance was especially sought and needed during a time of dramatic upheaval in education in the 1970's.

Mr. Speaker, it would be impossible to show the depth of our gratitude to Sister Mary DePaul on this one occasion. She has meant so much to so many people over the years. Her students have learned more than just words and mathematical equations from her. They have been taught the values espoused by a kind, sincere and devoted educator. Sister Mary DePaul will be missed, but she will not be forgotten. I join with her colleagues, friends, and the parents and students of St. Mary's in expressing our appreciation to Sister Mary DePaul Gluns.

COSTA RICA THANKS THE HOUSE FOR SUPPORTING COSTA RICAN NEUTRALITY

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. BARNES. Mr. Speaker, I have received a copy of a letter to you from President Luis Alberto Monge of Costa Rica, in which he thanks the House for passing House Concurrent Resolution 33 in support of Costa Rican neutrality. I was privileged to be the sponsor of the resolution.

Mr. Speaker, I would respectfully suggest that the House should have the benefit of seeing this expression of thanks from the President of Costa Rica, so I include the letter at this point for the information of our colleagues.

SAN JOSE,
September 27, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House, House of Representatives, Washington, DC.

DEAR SPEAKER O'NEILL: I would like to express my appreciation to the entire House of Representatives for its fine gesture in the passing of House Resolution 33 supporting Costa Rican Neutrality. Your action gives me much personal comfort as I try to maintain Costa Rica's traditional and rather unique role as an unarmed country dedicated to peace and democracy. It is our deep desire that when these fraticidal wars end, Costa Rica will be able to help heal the wounds of our neighbors. Our policy of permanent active and disarmed neutrality is very important if we are to have an opportunity to fulfill this goal.

Sincerely yours,

LUIS ALBERTO MONGE,
President, Republic of Costa Rica.

WASHINGTON EFFORT STARTED TO HELP VICTIMS OF DISASTER IN PUERTO RICO: WORST IN CENTURY

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. GARCIA. Mr. Speaker, the recent disastrous flooding and mud slides in Puerto Rico have claimed the lives of hundreds of our fellow U.S. citizens, and efforts are now underway to aid the victims of this tragic disaster which is the worst of this century to hit the island.

With the Presidential declaration that Puerto Rico is eligible for disaster assistance will come help for the massive effort to meet the housing needs of many who lost their residences, particularly in Ponce, PR. Although help is needed throughout the island in areas suffering severe flooding.

The response to this tragedy by the many Puerto Ricans living on the mainland has been overwhelming. In New York, concern for the victims has resulted in a numerous outpouring of offers to help.

Many Puerto Ricans also live and work in the Washington area, and here, I am gratified to note, all segments of the Puerto Rican community have banded together to set up an ad hoc committee to provide speedy relief and contributions to private, tax-exempt relief organizations set up in Puerto Rico by both the Commonwealth government acting in concert with private industry and also the city of Ponce.

Since the needs are so immense, this ad hoc committee is publicizing the effort throughout the Washington metropolitan area that check contributions can be sent made out to either Unidos de Puerto Rico or the Ponce emergency relief fund, both island-based organizations, and the groups will share equally in contributions. Checks or cash contributions can be sent to ISLA, P.O. Box 6557, Washington, DC 20035.

There are many Puerto Ricans here who work for the Federal Government, and Washington is also headquarters for such prominent and worthwhile groups as the National Puerto Rican Coalition, the National Puerto Rican Forum, and others who have always given so unsparingly of their time and expertise in helping mainland and island Puerto Ricans have a fair share of access to opportunity in our society.

The tragedy in Puerto Rico, its magnitude, and the loss of lives of so many Puerto Ricans, is one which surely merits our attention and help.

A press release issued by the Ad Hoc Washington Committee to Support Puerto Rico Relief Effort follows outlining the various efforts being coordinated to help the victims of the disaster.

WASHINGTON, DC—Puerto Rican individuals and groups in the Washington Metropolitan area and nearby Baltimore have launched a relief effort to help victims of the recent floods and mud slides in the Island which may have recently claimed more than 500 lives.

Members of the Puerto Rican community here have set up an informal ad hoc committee to expedite the collection of contributions to two Island-based non-profit, tax exempt funds established after the disaster in Puerto Rico.

The first, Unidos de Puerto Rico, was set up by the Commonwealth government working with private industry. The second, the Ponce Emergency Relief Fund, was organized by the City of Ponce, located on the south coast where the majority of the deaths occurred in an area called Barrio Mameyes.

The informal volunteer effort was organized last Wednesday and is seeking to publicize the fact that checks can be sent directly to a local box number, according to Puerto Rican lawyer, Ms. Emma Navajas. Checks made out to either Unidos de Puerto Rico or the Ponce Emergency Relief Funds can be sent c/o ISLA, P.O. Box 65557, Washington, D.C. 20035. Isla is a Washington consulting firm headed by Ms. Paquita Vivo.

A total of 26 individuals representing Puerto Rico's government agencies and civic groups met last Friday in order to mount an immediate joint effort to aid victims, primarily through a mainland effort in raising cash contributions.

Vicki Dapena, a resident of Bethesda, and sister of Ponce Mayor, Jose Dapena, spearheaded the group.

The AD Hoc Committee stressed that funds raised will be shared equally by both organizations. In addition, unidos de Puerto Rico has pledged that 25 percent of its funds being raised in Puerto Rico will be handed over to the Red Cross for the immediate emergency needs of the victims.

In addition to the fund raising effort, the Ad Hoc Committee announced that a memorial mass will be held this Sunday (October 20, 1985) at 2:00 p.m. at the National Shrine of the Immaculate Conception. It will be celebrated by His Excellency Alvaro Corrada del Rio who was recently installed as the first Hispanic Auxiliary Bishop in the Washington Roman Catholic Archdiocese. He is a Jesuit born in Puerto Rico.

Members of the Ad Hoc Committee emphasized the fact that cash and contributions in the form of checks is the easiest and most effective way to help in the massive relief effort now underway. Temporary housing and other emergency needs must be met quickly to aid in housing and resettling victims.

The response to help Puerto Rico in the Washington area and vicinity, the Ad Hoc Committee said, was overwhelming.

With more than 3.2 million American citizens, Puerto Rico was declared a Federal disaster area last Thursday, a decision which will help provide assistance to give direct aid to thousands of victims made homeless by the massive flooding and earthslides which made this Puerto Rico's worst disaster of the century.

The Ad Hoc Committee has solicited and received the support of the Resident Commissioner from Puerto Rico in Congress, Hon. Jaime B. Fuster, the Puerto Rico Federal Affairs Administration in Washington which represents the Governor of Puerto Rico here, the Washington Office of the City of San Juan, Puerto Rico, the Republican National Hispanic Assembly, the Hispanic branch of the Democratic National Committee, LULAC (League of United Latin American Citizens) and scores of individual Puerto Ricans living in the Washington area, many of them Federal employees who have pledged their support of the volunteer effort.

MICHIGAN MINORITY SMALL BUSINESS PERSON OF THE YEAR

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. WOLPE. Mr. Speaker, I would like to take this opportunity to congratulate Mr. Joseph Gibbons of Kalamazoo upon being named Michigan Minority Small Business Person of the Year.

Starting with an investment of only $5,000 in 1980, Joseph and Bridgette Gibbons have developed J & B Computer Product Center Inc. into an enterprise with sales of over $2.5 million in 1984.

Joe Gibbons laid the groundwork for success as an entrepreneur through an illustrious career with the IBM Corp. After his graduation from Calvin College and 2 years as a social worker in New York City, Joe joined IBM's Wall Street office in computer supplies and accessories. Joe moved from sales trainee in 1974 to president of the IBM 100 Percent Club receiving honors as the top salesman in the Nation in 1977. Joe continued along the fast track the following year by being promoted to product advisor and soon thereafter moving up to area manager for a six State region with revenue responsibility for $40 million in sales.

Joe's wife, Bridgette Gibbons, has played a major role in the success of J & B Computer Product Center Inc. As a graduate of Western Michigan University, Bridgette gained valuable business experience carrying responsibility in the purchasing department of Clark Equipment Co.

As the result of much hard work in the implementation of a carefully devised business plan, J & B Computer Product Center Inc. has received numerous accolades from the business community.

Mr. Speaker, I would draw the attention of my colleagues to the following Kalamazoo Gazette article that provides the recognition for hard work and success that Joe and Bridgette Gibbons so richly deserve.

GIBBONS WINS STATE HONOR

(By Kathy Jennings)

Joseph Gibbons, chief executive officer of J & B Computer Product Center Inc. in Kalamazoo, has been named Michigan Minority Small Business Person of the Year.

The U.S. Small Business Administration award is given as part of national Minority Enterprise Development Week, which takes place next week.

J & B Computer Product Center, 728 W. Michigan, started up five years ago with two employees and a $5,000 investment. It now has 19 employees and 1985-86 sales are expected to exceed $5 million, Gibbons said today.

"J & B Computer is an example of the minority-owned firms that have emerged as a dynamic force in the marketplace," said Raymond Harshman, Michigan district director of the SBA. "Joseph and his wife Bridgette's success shows how resourcefulness and perseverance can result in an outstanding business."

Joseph Gibbons is chief executive officer of the firm and Bridgette Gibbons is president. In 1982 they moved the company to Kalamazoo from Chicago. The company sells computers, software and accessories to both small businesses and large corporations such as the Kalamazoo-based Upjohn Co. and the Oldsmobile Division of General Motors Corp.

As winner of the Michigan award, Gibbons is eligible to compete with other state winners for the national SBA award.

Joseph Gibbons said today he is "thrilled" to be recognized by the SBA.

"We are just trying to do a good job," he said. "We try to take care of our business, control our growth and build customer loyalty. To be recognized for that—when you are just doing your job—that is an extra."

Factors considered by the SBA in granting the award include an evaluation of the firm's growth, net profit and sales. Product quality, management and the reputation of the firm also are evaluated by the SBA committee that selects the winner.

Nominations for the SBA award are made by companies and organizations throughout the state.

In granting the award, Harshman also cited Joseph Gibbons' involvement in community affairs and activities aiding in the advancement of minority businesses.

The SBA award will be presented at the Minority Enterprise Development Week awards banquet on Oct. 8 at Cobo Hall in Detroit.

Gibbons is president of the Southwest Michigan Minority Business Development Association. He also served on the state committee responsible for recommending changes in the Minority Business Enterprise Division of the Department of Commerce.

Earlier this year, Gibbons was named Minority Vendor of the Year by the Michigan Department of Commerce. The minority vendor award is given to a business based on an analysis of its strength, growth, quality of products or service and its performance.

WAR AGAINST DRUGS

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues an editorial printed in The Washington Times on October 9, 1985. The editorial describes several of the accomplishments made by U.S. Federal law enforcement agencies involved in the war against drugs in this country. I commend the editorial. We must use every weapon available in the fight against this dangerous threat to the very fabric of our society.

TIDE IS TURNING AGAINST DOPERS

Much has been written about how we're losing the war on drugs, so why not give up and legalize drugs? And I smile. I smile because I know better.

From 1977 to 1979 I was a federal prosecutor in the U.S. attorney's office in Miami, Fla. In those days, that office consisted of approximately 25 lawyers. Interagency cooperation was nonexistent, the cocaine barons were secure in Colombia, drug traffickers openly carried large amounts of cash to the banks in paper bags, and in the movies, "high" was in. The drug problem was out of control. It was war—the greatest attack on the fabric of the American social structure that ever has been seen—and we were losing.

Then, in 1981, reinforcements arrived. President Reagan declared we were fighting back: "We're taking down the surrender flag that has flown over so many drug efforts; we're running up a battle flag. We can fight the drug problem, and we can win."

The administration promoted legislation and increased resources to mount the counteroffensive on the two fronts that are turning the tide: destroying the drug traffickers' top organizers and wealth, and educating the American public about the dangers of drug abuse.

The U.S. attorney's office in Miami is now the fourth largest in the country, with approximately 94 assistant U.S. attorneys. Interagency cooperation is routine. FBI participation in drug enforcement has increased federal drug investigative resources by about 50 percent. The formation of 13 Organized Crime Drug Enforcement Task Forces in 1982 brought together the resources from nine federal agencies to fight drug trafficking, and state and local officers from more than 100 law enforcement agencies have participated in 44 percent of task force cases.

The extradition of major narcotic dealers from other countries is another sign that the tide has turned. For example, a treaty with Colombia now permits extradition of Colombian nationals to the United States for narcotics violations.

We also have mutual assistance treaties with numerous countries. The United States and the Cayman Islands recently negotiated an agreement that will allow access to Cayman banking information in certain criminal cases, particularly those involving narcotics. Italian and U.S. authorities have established a joint group to assist in narcotics organized crime investigations and prosecutions.

We're taking the profit out of drug trafficking. The Comprehensive Crime Control Act of 1984 allows seizure of all ill-gotten assets from drug smugglers including ranches, businesses, estates, works of art, and condominiums—not just boats, cars, and planes used to smuggle narcotics, as in the past.

First Lady Nancy Reagan also has been an invaluable help in the fight against drug abuse. She has given visibility to drug abuse awareness campaigns and been an eloquent champion in the effort to discredit the allure of drugs.

Not a day goes by without seeing in the newspapers a story about still another crackdown on major drug figures, or about marijuana plant eradiction. The attorney general, himself, recently supervised one such eradication mission.

There is still much to be done, drug abuse remains, widespread. Yet the tide has turned, and the momemtum is with us. The key is to keep the heat on.

Even the movies and televison shows reflect this turn of events: the dopers aren't laughing anymore, as they did in the Cheech and Chong movies. Drug smugglers are portrayed more realistically now as ruthless murderers in "Miami Vice"—and now they're singing "The Smugglers' Blues."

IMPROVING TECHNICAL EDUCATION

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. WALGREN. Mr. Speaker, I would like to share with my colleagues an article written by Dr. Dale Parnell, president of the American Association of Community and Junior Colleges, in which he argues for higher education reform targeted toward improving education in technological fields.

Dr. Parnell makes a compelling case for improving technical education—compelling for this country educationally and economically—which I believe argues for H.R. 2353, my bill to create in the National Science Foundation a program to assist community colleges for this very purpose. I commend his article to my colleagues in the House.

EDUCATING THE NEGLECTED MAJORITY

(By Dale Parnell)

Educational reform has been a hot issue in recent years. Teacher preparation, academic quality, the value of the humanities, and the quest to define an "educated person" have gained much national attention from educational and business leaders, the media, and elected officials—particularly our governors.

I believe we can sum up most of the reform reports with two words: substance and structure. More substance and more structure are required in the educational program, especially at the high school level. But this alone won't do it. Potluck in the schoolhouse is no longer sufficient for a quality education.

The recent educational reform reports and studies have overlooked one vital segment and one pressing problem in today's educational system—the middle 50 percent of our high school student body, a group I call "the neglected majority." These students often struggle to complete high school. They do not see much value or benefit in the high school diploma, and most of these students will not complete a baccalaureate degree. But they do need an excellent education.

The neglected majority represents a waste of our human resources, and our economic resources as well. These students could become the foundation of our technological work force, which is increasingly dependent on competent, liberally educated technicians.

Here are some startling facts that bring home the importance of addressing the needs of the neglected majority:

Eighty-three percent of the current adult population does not hold a baccalaureate degree. By 1990 that figure might decrease to 75 percent. But this still leaves three out of every four adult Americans without a baccalaureate degree.

Of 40 million elementary and secondary school students in this country today, 11 million will not complete high school.

Nearly two-thirds of all high school dropouts come from an unfocused general education program.

The 20 fastest-growing occupations in 1982–85 all indicated a preference for postsecondary education and/or training, but not necessarily a baccalaureate degree. The American Electronics Association reports a 60 percent increase in the need for technicians by 1987, or 115,000 new electronic technician jobs.

A recent Pennsylvania State University study found that 90 percent of the 1982 and 1983 entering college students expected a B average, while 61 percent estimated they would need to study less than 20 hours a week. Eighty percent said they knew little or nothing about their choice of major.

Three trends emerge in examining the issue of the neglected majority: the increasing need for competent and broadly educated technical workers; the wasted talent of our young people who do not complete high school or do not benefit much from high school; and the lack of continuity between high school and college curriculums.

I propose a new four-year "tech-prep" associate degree program that would parallel the college preparatory-baccalaureate degree track. We propose to make better use of the junior and senior years of high school in a coordinated, continuous four-year curriculum that would span grades 11 and 12

and two successive years in a technical, junior, or community college.

The program would combine a common core of learning and technical education and would rest on a foundation of basic proficiency in math, science, communications, and technology—all in an applied setting and measured by standards of excellence.

This tech-prep associate degree program would assure that the majority of our high school students who do not aspire to a baccalaureate degree receive a quality education. The program would also provide our economy and businesses with the trained and educated technicians they need.

Can high schools and colleges do something about the loss of continuity in learning? Can cooperative effort and cooperative programming help make winners out of ordinary students? Can the tech-prep associate degree program provide more structure and substance for students not on the college preparatory track?

The answer to all these questions is, and must be, yes. Either we will help our ordinary students develop the competencies to function as independent and productive citizens, or later we will pay the bills for not doing so. We will invest in developing our human resources now, or we will waste these precious resources and thereby diminish the capacity of individual lives and the strength and vitality of our nation.

THE 10TH ANNIVERSARY CELEBRATION OF THE EXECUTIVE ADMINISTRATION OF THE UNIVERSITY OF MARYLAND EASTERN SHORE'S CHANCELLOR, WILLIAM PERCY HYTCHE

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. DYSON. Mr. Speaker, I rise today to pay tribute to Dr. William Percy Hytche, chancellor of the University of Maryland Eastern Shore.

On October 19, Dr. Hytche will be honored in a special celebration commemorating his 10 years of dedicated and distinguished service to the University of Maryland Eastern Shore. Because of Dr. Hytche's sound judgement and creative vision, the university continues to grow and prosper.

Dr. Hytche, who was born and raised in the Porter, OK, area, earned his B.S. degree in mathematics at Langston University and his M.S. and Ed.D. degrees at Oklahoma State University. He has also studied at Oklahoma University, Oberlin College, University of Wisconsin and the University of Heidelberg in Heidelberg, West Germany.

After serving in roles as instructor, assistant professor, associate professor, professor, chairman of the department of mathematics and computer science, dean of student affairs, chairman of the division of liberal studies, and director of a major Federal program, Dr. Hytche was recognized for his administrative abilities by university officials and the board of regents and was appointed chancellor in 1975.

Dr. Hytche is a man who has done much to improve the quality of life in his community. For college students and colleagues alike, Dr. Hytche's wisdom, wit, and compassion is well known.

More than anything else, Dr. Hytche considers himself an educator. And nowhere has Dr. Hytche's commitment to excellence been more evident than in hs record as a teacher. While teaching in the Ponca City, OK, school system, Dr. Hytche received the Outstanding Teacher of the Year Award. In addition, he has been honored with the title, Most Outstanding Administrator while serving in the U.S Army Corp of Engineers, as well as Outstanding Faculty Member of the Year at the University of Maryland Eastern Shore in 1966.

Chancellor Hytche's enormous contribution to the State of Maryland is deeply appreciated. It is with a sense of great pride, Mr. Speaker, that I offer these few words of honor to such an outstanding individual.

ENDOWMENT FOR DEMOCRACY PRAISED BY AFL-CIO

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. COURTER. Mr. Speaker, when the executive council of the AFL-CIO met for several days in Pittsburgh in August, they released a statement expressing their view of the importance of the National Endowment for Democracy. They view the Endowment as I do—an exemplary wedding of private initiative and public moneys toward the end of fostering democracy and freedom abroad.

Please allow the RECORD for today to include the text of the AFL-CIO statement.

STATEMENT BY THE AFL-CIO EXECUTIVE COUNCIL ON NATIONAL ENDOWMENT FOR DEMOCRACY

In November 1983, Congress authorized funding for the National Endowment for Democracy, a private organization established to assist labor, business, the political parties, and other non-governmental agencies to help their counterparts in other countries to strengthen democratic institutions, promote human rights, and foster pluralism.

Having observed the work of comparable organizations in Europe, the AFL-CIO actively participated in the studies that led to the creation of the Endowment, and we strongly urged congressional support for it. We continue to believe that private-sector efforts on behalf of democratic institution-building abroad are vital to a foreign policy centered on human rights.

Our decades of work with trade unions abroad have convinced us that non-governmental institutions can be more effective in promoting freedom of association than governments, which may find it expedient to subordinate human rights concerns to other objectives.

The Soviet bloc allocates enormous funds and personnel to influencing the international labor movement and other private-sector institutions. While NED's resources are tiny compared to the funds expended by the totalitarians, they substantially enhance the ability of U.S. democratic forces to respond to this challenge.

Yet NED has encountered strong resistance from both ends of the political spectrum, where isolationism runs strong. Some on the Right oppose NED on budgetary grounds; some on the Left see aiding democratic institutions in other countries as a form of interventionism.

The AFL-CIO rejects both of these views. Our own democratic institutions cannot survive in isolation. Freedom of association cannot be secure here if it is snuffed out in the rest of the world. Nor can peace be assured in a world in which ordinary people lack the means of expression and organization to influence their leaders.

The AFL-CIO therefore reiterates its support for the National Endowment for Democracy and urges the Congress to provide funds commensurate with the urgency and scope of the Endowment's purposes.

FOURTH ANNIVERSARY OF THE SOUNDVIEW HEALTH CENTER

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. SCHEUER. Mr. Speaker, the Soundview Health Center, located in Bronx section of my district, will celebrate its fourth anniversary of operation at a dinner on Saturday, October 19, at Mauro's in the Bronx. This center has filled a critical health and social services void in the south-central Bronx. I would like to bring to the attention of my colleagues a few facts about the center's work in the hope that it may serve as a model for other community health centers throughout the Nation.

From its beginning in 1981, the Soundview Health Center's goals, objectives and philosophy have been determined by the specific needs of the community it serves. The center has established an outstanding reputation by providing first-rate, family oriented health care. Its unique clinical model, caring administration and dedicated board of directors have succeeded in making the center a shining example for health care institutions throughout New York City and our Nation.

The Soundview Health Center, which speaks to the need for cost-savings without compromising the quality of health care, has won recognition from organized labor unions such as District 37 of the American Federation of State, County and Municipal Employees, the New York State Department of Health, and the U.S. Department of Health and Human Services. Despite a general atmosphere of nonsupport for health and social programs of this type, Soundview Health Center has proved to be a worthy provider for Bronx residents.

I would like to take this opportunity to commend the individuals who have been the driving force behind this excellent institution: Edward Gibss is chairman of the board of directors, Pedro Espada serves as the center's executive director, Dr. Neil Calman is medical director, and Sandra Love is its community affairs director. These are the people who are responsible for the center's ability to provide dependa-

ble, low-cost and quality health care for the residents of the Bronx and I commend them for their dedication and hard work.

Under the able leadership of the Comprehensive Community Development Corporation, I am confident that the residents of the Bronx can look forward to even better care for human needs from the Soundview Health Center in the years ahead.

H.R. 1409, MILITARY CONSTRUCTION AUTHORIZATION BILL

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. BEDELL. Mr. Speaker, when the House considered the fiscal 1986 military construction authorization bill, H.R. 1409, yesterday, I did not offer two amendments I had proposed earlier. However, as one who has been and will remain active in seeking reforms of current procedures for Federal procurement of architectural and engineering [A/E] services, I believe two issues merit further investigation by Congress.

First, I remain opposed in principle to any ceilings on the size of A/E contracts that are set aside for small businesses. Rather, proper industry size standards set by the SBA are the best way to ensure that small businesses receive a fair share of contracts and dollars. There is overwhelming statistical evidence that the small business set-aside program for A/E military construction contracts is not helping small businesses the way Congress intended. The set-aside program has been gutted by a restriction that arbitrarily suspends the Small Business Act. This restriction is a ceiling of $85,000 on the size of individual A/E contracts that can be set aside for small businesses. Because of recent action by the SBA to lower the A/E size standard, and because I am hopeful that the DOD will propose raising the $85,000 ceiling, I did not offer my amendment to repeal the ceiling concept at this time.

Second, on a completely different issue, the Office of Federal Procurement Policy [OFPP] has recommended that Congress authorize a limited program to test alternatives to current Brooks Act A/E source selection procedures. The OFPP's recommended alternative is quite modest and deserves a try. Of all negotiated Federal procurement, procurement of A/E services is the only place where the Government gives so little consideration (and so late in the process) to the price of the services it is procuring. While I remain, as always, strongly opposed to any selection procedure based solely or primarily on price, I do think that we have a responsibility to the taxpayers to see that price receives some consideration. Because I am hopeful that further hearings will be held on this matter, I did not offer the amendment I had proposed that would have implemented the OFPP's recommendations.

Neither of these proposals is my idea, and neither of them is a new idea. Rather, they were recommended in reports to Congress by the Department of Defense and the Office of Federal Procurement Policy. These reports were required by legislation enacted by the Armed Services Committee and by the Government Operations Committee respectively. Both concepts were also supported by the comprehensive study by the Commission on Government Procurement.

SMALL BUSINESS SET-ASIDES

These are 15,250 firms in the general construction area of the A/E industry, which excludes naval A/E. According to the most recent Department of Defense (DOD) statistics, the very largest 1.5 percent of firms (i.e. 250 firms) in this industry are now receiving 18 percent of contract awards, and 31 percent of the contract dollars awarded. Due to a provision inserted by the Senate in the fiscal 1985 Military Construction Act (Public Law 98-407), the percentage of contracts and contract dollars that is set aside for competition among small businesses has been cut in half in the last year. Section 808 of that act provided that no A/E contract that is estimated to exceed $85,000 will be set aside for competition exclusively among small businesses. In practice, DOD does not set aside contracts over $55,000, for fear that they might exceed the threshold amount after later modifications.

Many of the largest firms in the A/E industry supported imposition of this $85,000 ceiling because they believed that the Small Business Administration was defining some rather large firms as "small." These firms were then eligible for small business set-asides. I and the House Small Business Committee have long shared the view that the size standard for a "small" A/E firm is far too high. In fact, the Small Business Committee held hearings recently on the failure of the SBA to set proper size standards in some industries. Those hearings focused on size standard reform legislation, H.R. 1178, introduced by Small Business Committee Chairman Parren Mitchell. Chairman Mitchell has indicated that the committee may mark up H.R. 1178 this fall, and I assure the House that the Small Business Committee will continue to act to achieve proper size standards in all industries.

Regarding the A/E size standard, I was pleased that the SBA proposed on September 16, 1985 that the size standards be lowered from $7.5 million and $3.5 million in average annual billings (for the engineering and architectural industries respectively) to $1.5 million. Although I think that the SBA has now proposed a standard that may be too low, I am pleased that the issue is finally being addressed.

It would now be appropriate to repeal the $85,000 ceiling on contract size. The section of law that imposed this threshold amount authorizes the Secretary of Defense to revise the threshold amount effective October 1 of this year in order to ensure that small businesses receive a fair share of A/E contracts. I am hopeful that DOD will propose a higher ceiling for fiscal year 1986, and I will not offer my amendment to repeal the threshold amount concept at this time. However, I remain opposed to this entire approach to small business set-asides. So does the Department of Defense. Public Law 98-115, the Military Construction Authorization Act, 1984, directed DOD to conduct a comprehensive review of its A/E procurement program in order to determine whether current law results in a fair distribution of contracts to firms of all sizes. In his report to Congress, Secretary Weinberger stated, "The establishment of a 'reasonable threshold amount' will not result, in our view, in 'reasonable share distribution.' We believe that an appropriate size standard will accomplish that objective."

THE BROOKS ACT

In 1967, the U.S General Accounting Office GAO ruled that the Government's traditional method of selecting A/E firms did not comply with the statutory mandate for "competitive negotiations" because price was not a factor. Enacted in response to this ruling and with the stated purpose of making A/E procurement more competitive, Public Law 92-582—the Brooks Act—essentially codified the traditional method of A/E selection. It prohibits the consideration of price until the Government has chosen the firm with which it will first negotiate. In 1972, the Commission on Government Procurement recommended that price be considered as a secondary factor in A/E source selection. In 1976, the GAO found that Public Law 92-582 had not made A/E procurement more competitive and recommended that the Government award A/E contracts on the basis of the best value in terms of design performance and life-cycle cost.

In January 1985, a report by OMB's Office of Federal Procurement Policy [OFPP] that was required by the Competition in Contracting Act recommended a very limited program to test alternative selection methods. The OFPP recommended that the three "most qualified" firms would be given a detailed briefing on the proposed project, and then invited to submit technical and price proposals simultaneously in separate envelopes. The technical proposals would be opened first and ranked on the basis of technical merit, then the cost proposals would be opened and matched with the technical proposals. The government could then select the technically top-ranked firm if it clearly represented the best value, or—failing successful negotiations with the top-ranked firm—could negotiate with the next-highest ranked firm. The Department of Defense has also indicated that a test program would be appropriate.

I would like to make it clear that I remain strongly opposed to any A/E selection procedure based solely or primarily on price. I believe that the OFPP proposal addresses the legitimate concern that engaging the services of an experienced design professional is very different from buying spare parts.

As former House Government Operations Committee Chairman Chet Holifield wrote in his dissent to the Brooks Act committee report in 1972, "Great fears have been ex-

pressed that, if competitive proposals are required for each project, then the competition will inevitably become one of price bidding; and that the Government, in consequence, will be driven to select the inferior firm with the lowest offer at great risk to the quality of performance. The argument frequently is cast in terms of advertising for sealed bids. In my opinion this is a complete bugaboo." No one is suggesting, "* * * that professional services of this kind be purchased through advertising and sealed bids. * * * The real point is that, unless the Government has an opportunity to receive and evaluate competing proposals for the best way to get a job done, it will not be able to assure itself that the public interest is fully served."

CUBA SAID TO JAIL ACADEMIC, UPSETTING THE FRENCH

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. YATRON. Mr. Speaker, I want to take this opportunity to discuss the human rights situation in Cuba. Despite all of Castro's proclamations regarding improved conditions in his country, the human rights of Cuban citizens are denied by his government. In addition, this Communist economy is probably as bad as ever. Communism has been an abysmal failure in Cuba, and this fact should serve to remind us how precious the freedoms and liberties we enjoy truly are.

The Cuban American National Fundation has done an outstanding job in keeping Members apprised of developments in Cuba. This organization recently provided me some articles discussing political prisoners in Cuba. I want to submit one of the articles for the benefit of all of our colleagues. As chairman of the Subcommittee on Human Rights and International Organizations, I will continue to actively promote respect for fundamental human rights in Cuba.

The article appears as follows:

[From the New York Times Sept. 29, 1983]

CUBA SAID TO JAIL ACADEMIC, UPSETTING THE FRENCH

(By John Vinocur)

PARIS, September 29.—Cuba has arrested the former vice rector of the University of Havana after promising France that he would be allowed to leave the country, French officials say.

The arrest last Saturday of Ricardo Bofill has caused considerable irritation and some embarrassment to the Socialist Government, which has sought to maintain good relations with the Castro regime. Three of President Francois Mitterrand's Cabinet ministers have traveled to Cuba in the past year, and the possibility of a visit to France by Fidel Castro has been a recurring theme in the French press.

The case involves an attempt by Mr. Bofill to seek refuge in the French Embassy in Havana on April 29. While pursuing an unusually successful academic career, Mr. Bofill became disillusioned with the Castro Government and was accused of belonging to an anti-Castro faction within the Communist Party. Since 1967 he has received two prison sentences and served more than seven years in jail.

According to his wife, who lives in Miami, Mr. Bofill went to the French Embassy because he had been threatened by telephone and his mail had been intercepted. Once he was there, she said in a telephone conversation today, the embassy was surrounded by security policemen.

Eventually, Mrs. Bofill said, the Ambassador, Pierre Decamps, spoke directly to Cuban Vice President, Carlos Rafael Rodriguez, who gave the Ambassador his "personal word of honor" that Mr. Bofill would be left alone and be allowed to leave the country quickly.

She said she knew nothing of his activities in the intervening period, but learned of his disappearance on Saturday and was told on Monday that he had been arrested.

NO CUBAN RESPONSE

On Tuesday Francois Gutmann, the second-ranking official at the Foreign Ministry here, summoned the Cuban Ambassador, Alberto Boza, to "request informaton in relation to the present rumors concerning Mr. Ricardo Bofill." The use of the word "rumors" was a diplomatic euphemism because French officials privately confirmed Mr. Bofill's arrest.

A spokesman for the ministry said today there had been no Cuban response to the request as yet.

French anger about the situation appeared linked to the fact that the Cubans had broken their word and apparently waited to arrest Mr. Bofill until Foreign Minister Claude Cheysson completed a planned visit to Havana in August. In addition to Mr. Cheysson, Transport Minister Charles Fiterman, a Communist, and Jack Lang, Minister Delegate for Cultural Affairs, have visited Cuba in the last 14 months.

The opposition press here has seized on the affair, and today Le Quotidien de Paris asked in a headline, "Did the French Embassy 'turn over' an anti-Castro opposition figure to the Cubans?" An earlier statement by the ministry of External Relations here said Mr. Bofill left the French Embassy of his own accord.

Last year the Socialist Government played an important role in obtaining the release from prison in Cuba of the anti-Castro poet Armando Valladares. This time, said Fernando Arrabal, the Spanish writer, who lives in Paris and has corresponded with Mrs. Bofill, the Government behaved with unusual naiveté.

A REPORT CARD IN REAGANOMICS AND AN ANALYSIS OF GRAMM/RUDMAN

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. LaFALCE. Mr. Speaker, this morning Walter Heller gave some excellent testimony at a hearing of my Subcommittee on Economic Stabilization. We had asked him to come in to share his views on issues of equity and growth for U.S. economic policy.

Professor Heller showed that since 1980 there has been a very substantial increase in the number of persons living in poverty and an unprecedented shift of income away from the poor toward higher income groups. He also documented how net investment by Americans is running at its lowest level since the 1930's and how the 1980 corporate tax cuts have not raised investment. Finally, he criticized the Gramm-Rudman proposal on grounds of economic soundness, defense preparedness, and equity. I would like to introduce his very eloquent statement into the RECORD.

TITLE: "A REPORT CARD ON REAGANOMICS"

Mr. Chairman, in inviting me to evaluate macro-economic policies in recent years in terms of equity, growth, and stability, you are in effect requesting a report card on Reaganomics. And while I cannot provide a comprehensive appraisal of President Reagan's macro-economic policies in the brief compass of this statement, I will try to highlight a few of the key impacts of the Reagan policies to date and the directions in which they are leading us.

EQUITY

Let me start with the question of equity and focus in particular on what is happening to the incidence of poverty and the distribution of income in the United States. The facts here are very clear, but unfortunately, Mr. Reagan labors under a misconception that is directly contrary to the facts.

Some time ago, he said "in the early '60s, we had fewer people living below the poverty line than we had in the later 1960s after the great war on poverty got under way. And there has been from that moment on a steady increase in the level of poverty . . ."

What are the established facts?: The percentage of the population in poverty in 1959 was 22 percent, but the combination of steady growth in the 1960s coupled with the War on Poverty cut this in half by 1969, to 11 percent of the population.

The poverty rate then rose modestly during the slow growth of the 1970's, reaching 12 percent in 1980.

From 1980 to 1983 it rose by over ¼, reaching 15.3 percent in 1983.

Under the impact of recovery, it declined to 14.4 percent in 1984. This translates into 33.7 million people living below the poverty line ($10,609 in annual cash income for a family of four). Leaving aside the Reagan years, this is the highest rate since 1966.

One should note in passing that the official poverty rates, which I have been quoting, do not include non-cash benefits such as Medicaid, Medicare, food stamps, subsidized housing, and school lunches. The Census Bureau estimates that if all these benefits were included, the poverty rate would be 9.7 percent in 1984 if the non-cash benefits are counted at market value or 12.2 percent if they are counted at less than market value because of the lack of freedom of choice.

Turning to the distribution of income, we find that the shares of total money income received by families at different income levels remained remarkably stable throughout the post-war period. For example, the 20 percent of families at the bottom of the income scale received about 4½ percent of total money income in 1947 and about 5 percent in 1980, while the top 20 percent received about 42 percent in both years. (The reduction in poverty was made possible by

economic growth, which lifted all the boats, and by government transfers.)

Since 1980, for the first time in the post-war period, the distribution of income has worsened. In 1984, the poorest 40 percent of all families got 15.7 percent of all income, the lowest share on record, while the share of the top fifth rose to nearly 43 percent, the highest share since 1948.

The severe recession and unemployment of the 1980's clearly had something to do with these numbers. But as the objective studies of the Congressional Budget Office, the Urban Institute, and other groups have shown, the combination of the Reagan budget cuts and tax cuts has cut the incomes of the poor and increased the incomes of the wealthy.

One hopes that Mr. Reagan will recognize these facts about poverty and income distribution. At stake is his low opinion, indeed, his ridicule of anti-poverty efforts by the government, and his evident willingness to train most of the fire power of his deficit-cutting efforts on social programs that particularly benefit lower income groups. This has been amply demonstrated by his recommended budget cuts so far and would be carried much farther under the Gramm-Rudman bill that he has enthusiastically endorsed.

At the same time, one should acknowledge that the Reagan tax reform proposals include a doubling of the personal exemption and increases in the standard deduction that would take almost all of the families now in poverty off of the income tax rolls. Whatever else is done or not done in the course of tax reform, one would surely hope that this move would survive. One should note in this connection that if the income tax exemption were converted from income into a credit against tax, the lowest income groups could be fully protected with a much smaller loss in revenue. The political problem is that in converting the exemption into a tax credit, even if the value were doubled for the lowest income brackets, upper middle and higher income groups would actually experience a reduction in the tax value of their exemption.

But beyond the adjustment of the income tax, if I perceive the thrust of the President's approach correctly, his answers to the damning numbers I've just reviewed would be, "Give us time. Our policies will boost savings and investment, thereby increase the supply capacity, productivity, and growth rate of the U.S. economy and generate jobs. All this will lift the poor out of poverty."

Clearly, in spite of last year's improvement, we have lost ground on poverty and income distribution in the 1980's. What about jobs? Unemployment, after rising to record post-war levels in 1982, dropped sharply in 1983-84. But it has been stuck at about 7¼ percent for a full year (sharply above the 5.8 percent rate in 1979, before the recession started). The modest rate of recovery in the past year has not only failed to reduce the official unemployment rate, but has led to an increase in the category of "discouraged workers" (now numbering 1,231,000) and made only a small dent in the number of part-time workers who would like full-time jobs (now numbering 5,551,000).

In response to these discouraging numbers, Reagan Administration supporters point out that 9 million new jobs have been created since 1981 and that the U.S. experience is in bright contrast with the experience in Western Europe, where unemployment averages near 11 percent of the labor force. But to put this 9 million gain in perspective, one should note that the Administration argued in 1981 that its programs would create 12 million new jobs by 1986, 3 million more than if nothing was done. In other words, employment growth is achieving only the base-line level that the Administration projected would exist in the absence of its programs. In short, we should not let the "9 million new jobs" argument blind us to the huge residue of unemployment we still suffer from nor to the fact that we are falling grievously short of the targets the Administration set for itself in 1981.

SAVINGS, INVESTMENT, AND GROWTH

That leads us into the even thornier thickets of the Reagan savings and investment policies. For presumably, if the tax and other policies of the 1980's were generating a strong surge of investment in plant and equipment, research and development, and technological advance, the payoff in more and better jobs and higher living standards would not be too far off.

Lamentably, the evidence gives no aid and comfort to this hopeful view. Yes, we had a big spurt of business-fixed investment in 1983 and 1984. But now, not only has that fizzled in 1985, but analysis shows that our savings and investment record of the 1980's has been the poorest in some 50 years. The tax stimulants to saving and investment have been simply overwhelmed by the ravenous appetite of the U.S. Treasury for over half of net domestic savings needed to finance its deficits, its dissaving.

(In the ensuing discussion of savings and investment, I base my comments on the excellent statement made by Barry Bosworth of the Brookings Institution before the Congressional Joint Economic Committee on September 17, 1985.)

It is true that the monstrous 1981 tax cut gave a powerful demand-side thrust to the economy that lifted us out of the 1980-82 recession. But as a stimulus to supply, it has thus far been a failure. Largely through the mountainous federal deficit, the Reagan program produced a pattern of national saving and investment that has undercut, reduced rather than increased, the long-term growth rate of the U.S. economy. Instead of an investment boom, we have been on a consumer binge financed by the liquidation of our assets abroad, by a skyrocketing import surplus, and by the lowest rate of national savings and investment since the 1930's.

If this sounds shocking and implausible, one needs only to look at the facts to substantiate the foregoing conclusion:

The tax cut did not budge the net long-run private savings rate of about 8-9 percent of GNP. That is individual plus business saving minus replacement investment.

The gargantuan government deficit, or public dissaving, offset half of that. That is, half of all private saving had to be used to finance the budget deficit, with the result that the national saving rate fell from 8 percent to just over 4 percent last year.

To be sure, net investment stayed at about 7 percent of GNP, but that was made possible only by sucking in huge amounts of foreign saving.

New investment by Americans is at its lowest ebb since the 1930's.

With respect to the inflows of capital from abroad, none of us can be certain that those flows will continue at a clip of $100 to $130 billion a year. If that stream were suddenly to dwindle, it would boost U.S. interest rates and severely impact capital formation and housing. But letting it go undiminished means that our external debt would reach $800 billion by 1990. At an average 10 percent rate of interest, that means an $80 billion annual bill for interest and dividend payments to foreigners, a bill that could only be paid by shipping out goods and services at the expense of the American standard of living.

But, critics may ask, what about that 1983-84 surge in investment spending? Doesn't that show that the tax cut worked and the investment picture is healthier than I have just implied? Taking a closer look at that boom, one finds that 93 percent of the increase in equipment spending since 1979 is accounted for by office equipment (mainly computers) and business purchases of autos, (including small trucks). It is interesting to note that neither of these categories enjoyed a net cut in tax rates under the 1981 and subsequent tax acts.

The related point is that investment in American industrial capital has been steadily declining as a share of GNP. The benign impact of tax incentives has been swamped by the malignant impact of sky-high real interest rates, which in turn, trace back in large part to the huge federal deficit.

Before turning to the deficit, perhaps we should ask: Won't tax reform restore the incentive for capital formation? Part of the answer is obvious: We don't know, since we at this point don't know either the ultimate fate or the contours of tax reform. But beyond this, I think economists should admit that the tax system is so complex and has such a multitude of special provisions for different types of saving and investment, that for most changes, economists can no longer tell you for use whether a particular tax provision will in fact promote or discourage capital formation. What an economist can tell you is that cutting the federal deficit will increase national saving and private investment. Even here, one has to add, "provided that the cut in the deficit does not result in slowing down the economy as a whole through a reduction in demand."

THE DEFICIT AND GRAMM-RUDMAN

From the foregoing analysis, one can see that the massive deficits created by the largest tax cut in history coupled with the biggest peace-time defense buildup in history are defeating the very essence of Reaganomics by curbing the saving flow and thwarting the President's investment and growth objectives. Both by undercutting the rate of capital formation and by building up a huge foreign debt, these policies are also leaving a lean and bitter legacy for future generations that will have to do with a smaller capital base and a large liability for overseas debt services. Rudy Penner, the highly respected head of the Congressional Budget Office, calls it fiscal child abuse.

In this light, it seems strange that Mr. Reagan is so adamant in barring tax increases as part of the deficit-reducing package. Perhaps one has to go beyond crass anti-tax politics and economic analysis to psychoanalysis to understand his position. Deep down, the President must be clinging to the conviction—contrary to virtually all the evidence—that holding firm on the tax front helps squeeze down government spending, especially on social programs, in response to the excruciating pressures of the deficits. Senator Durenberger of Minnesota last month said that he's about to subscribe to the theory that "there is some deliberate intention to use deficits . . . to get

us to denationalize the financing of public services."

Ironically, it turns out that the huge Reagan tax cut, coupled with the big military buildup, is itself the greatest single source of non-defense spending increases through its impact on the public debt and interest rates. Net interest on the public debt has zoomed from $43 billion in 1980 to a projected $138 billion in 1986 and, at the present rate of increase, would reach over $200 billion by 1991.

If Senator Durenberger is on the track in his assessment, it may explain why President Reagan has so enthusiastically embraced the Gramm-Rudman proposal for ending the deficit by a series of lock-step budget cuts. Since I testified on this proposal before the Joint Economic Committee last Friday and dealt with it in a commentary last evening on the Nightly Business Report on PBS, I would like, if I may, to offer these statements for the record. I will add only a few comments here.

The Gramm-Rudman formula is basically flawed in making no distinction between constructive deficits that can help the economy climb out of recession or overcome slow growth from destructive deficits that boost interest rates and undermine savings, investment, and growth. It fails to recognize the difference between the cyclical and structural components of deficits. Its weak-kneed provision for temporary suspension of its formula if a drop in GNP is forecast provides very little relief on this score.

Indeed, the Gramm-Rudman plan would send us on a mindless course (and also what even Senator Rudman has admitted is a gutless course) toward budget balance, no matter what economic, social, and military damage it might leave in its wake.

I yield to no one in my concern for bringing our monstrous budget deficit to bay. But unless the rigid and Draconian formula of Gramm-Rudman can somehow be transformed into a flexible but still Spartan plan to bring the deficit under control, I urge Congress not to fasten this ill-fitting straightjacket on itself.

ACCENTUATING THE POSITIVE

Let me now turn to a few more hopeful and even positive features of the macro-economic policy scene in Washington.

It is not too late to reverse course and exercise damage control with respect to the federal deficit. Its impacts are corrosive rather than explosive. It is not too late to shift or even reverse gears on curbing the deficit in a sensible way, coupling spending cuts with revenue increases and perhaps even removing the off-limits sign from social security. After all, a liberated David Stockman and an unrepentant Martin Feldstein, both ardent supporters of Mr. Reagan's, are urging him to open the doors to a tax increase. Indeed, Mr. Stockman said that what America needs is a good $100 billion tax increase and "that the spending-cut episode is over."

And the new Director of OMB, James C. Miller III, sounded admirably flexible in his confirmation hearing when he said that "nothing is off-base, nothing is sacrosanct", went on to say that "some restraint in entitlement programs might well be looked at by the President and Congress", and did not even rule out tax increases as part of a budget package. Hope springs eternal.

Beyond this, we should give credit where credit is due on some of the more recent policy initiatives of the Reagan Administration that are both courageous and right-headed. Let me identify and applaud these moves on several fronts and, as you might expect, let me also suggest some additional moves that would help achieve and consolidate the gains promised by these new approaches.

First, the Reagan administration under the leadership of the Baker Treasury, has at long last recognized that (1) in large part, our trade deficit and protectionist pressures trace to a sharply overvalued dollar and (2) that this country does not have to stand by like a helpless giant, granting what amounts to a subsidy to imports and imposing a penalty on exports. But the job is not yet done. The initial success of the Big Five intervention efforts should now be bulwarked by narrowing the wide gap between our unduly loose fiscal policy and huge deficits and the unduly tight fiscal policies of our trading partners.

Second, the combination of the Big Five initiative and selective White House concessions on trade has apparently blunted the most dangerous protectionist movement since the 1930's. Protectionist legislation will still emerge from Congress, yet President Reagan's moves have apparently gained enough backers in Congress to sustain his promised vetoes. But the job is not yet done. Now, to keep the protectionist forces at bay and make U.S. producers steadily more competitive, Washington policy makers need to join hands in raising revenues and cutting spending to shrink the deficit, boost savings, and lower interest rates.

Third, with the evident blessing of the President, the Federal Reserve has commendably been clearing the path to renewed expansion by running a monetary policy that facilitated a sizable drop in interest rates this year. But its job is not yet done. To keep expansion going, to bolster fragile financial markets here and abroad, and to facilitate the Big Five moves to realign the dollar, the Federal Reserve should maintain an easier money policy. Continued economic slack, low inflation, and the declining velocity of money provide a low-risk setting for such a policy.

Fourth, within the past year, bright hopes were kindled for tax reform to reduce the complexity and increase the fairness of the income tax and, above all, to enthrone market advantage rather than tax advantage as a guide to the flow of resources in the U.S. economy. Base-broadening and rate reduction were the watchwords. The promise was a bright one. But hopes for a tough and meaningful reform seem to be ebbing. So the job is far from done. Unless the reform process is revitalized, the mountain may labor and bring forth only a mouse.

Finally, even on the budget deficit, some progress has been made. Jousting with an adamant Congress that controls the Pentagon purse strings, the President has broken his lance. The pell-mell defense buildup is being brought within more reasonable bounds. And Congressional appropriations committees are hard at work trying to make a meaningful dent in the non-defense budget for fiscal 1986 and beyond. But to say that the job is not yet done is to put it very mildly.

JIM WILDING RECEIVES DEPARTMENT OF TRANSPORTATION'S GOLD MEDAL AWARD FOR OUTSTANDING ACHIEVEMENT

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. WOLF. Mr. Speaker, I am extremely pleased to share with my colleagues today good news about an outstanding Federal employee at the Department of Transportation.

Today, Secretary of Transportation Elizabeth H. Dole conferred the Department's Award for Outstanding Achievement—DOT's gold medal—upon James A. Wilding, Director of the Metropolitan Washington Airports. She couldn't have chosen a finer recipient for this honor.

As the Representative of the congressional district where the only two federally owned and operated airports are located, I have worked closely with Jim Wilding since coming to Congress in 1981. He has always been the consummate professional, always open and willing to work together to achieve the best possible operation of Washington National and Washington Dulles International Airports for both the passengers who use the facilities and the people of the 10th District who are the airports' neighbors.

I offer my congratulations to Jim Wilding on behalf of the people of the 10th District of Virginia for a job well done. At this point in the RECORD, Mr. Speaker, I would like to share the statement Secretary Dole made today in presenting the DOT award to Jim Wilding.

STATEMENT PREPARED FOR SECRETARY DOLE PRESENTING THE DOT GOLD AWARD, OCTOBER 17, 1985

The Department's Award for Outstanding Achievement—our gold medal—is the highest award we confer. It recognizes superior achievement and outstanding leadership—unique performance by a truly exceptional individual.

This year's recipient is Jim Wilding, Director of the FAA's Metropolitan Washington Airports. For the last 6 years, he has done an extraordinary job of managing National and Dulles Airports—the only two air carrier airports owned and operated by the federal government.

Jim has spent his entire career with the airports, beginning in 1959 as an engineer working on the planning, design, and construction of Dulles. He is now seeing those plans come to fruition—in no small part due to his own efforts over the years—as the number of carriers and traffic at Dulles is expanding at an historic rate.

In recent years, he has been in the middle of our efforts to develop a comprehensive operating policy for Dulles and National. More recently, he has provided invaluable counsel and enthusiastic support to our efforts to transfer the airports to an independent regional authority. He has shown particular concern for the future of his employees without whom the transfer will not succeed.

We are used to hearing about how much the government can learn from private industry. In Jim's case, it works the other way around. According to those that use Dulles and National, they are the most efficiently and competently run air carrier airports in the Nation. Under Jim's leadership the FAA employees at the Airports constitute the leanest, most efficient airport workforce in the Nation.

It's a great pleasure to present this year's Gold Award to Jim Wilding.

TRAGEDY ENGULFS PUERTO RICO

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. BARNES. Mr. Speaker, from October 3 to October 7, 1985, torrential rains associated with tropical storm Isabel fell on Puerto Rico causing enormous destruction and hundreds of deaths on the island. At least 33 towns were affected, and a landslide near the southern city of Ponce resulted in the complete destruction of hundreds of homes. Puerto Rican authorities are still trying to unearth the remains of some 500 inhabitants of the barrio Mameyes who are unaccounted for. This is one of the greatest tragedies ever to affect Puerto Rico and the most lethal landslide in the history of the United States.

I would like to express my personal sympathy to Gov. Hernandez Colon and to the people of Puerto Rico in this difficult moment. As a supporter of House Resolution 293, I was pleased to learn that President Reagan has declared certain towns in Puerto Rico a disaster area, which will enable Puerto Rico to receive emergency assistance. In this time of mourning, the American people are already expressing solidarity with our brothers and sisters in Puerto Rico by making donations of food and clothing. But much more needs to be done in order to help in the reconstruction of the affected areas. I look forward to working with Gov. Rafael Hernandez Colon and with Resident Commissioner Jaime Fuster to find other ways in which all of us in the Congress can express our support for Puerto Rico in this tragic moment.

I also want to take this opportunity to encourage my colleagues in the Congress to learn more about Puerto Rico, its people, and its unique relationship with the United States. I have had the pleasure of visiting the island several times, and I am convinced that Puerto Rico is one of the most beautiful islands in the Caribbean. It was described by a famous Puerto Rican poet as "Borinquen, the pearl of the ocean." Its hard working people are responsible for creating what is known as a "development miracle" in the Caribbean. The neighboring island states admire Puerto Rico as a unique example of democratic government and economic growth and development. Nevertheless, Puerto Rico is also facing severe economic difficulties, which will be aggravated by the effects of storm Isabel. Therefore, it is our responsibility here in the Congress not only to respond to this tragedy in the short term, but also to formulate long term strategies to help solve Puerto Rico's economic problems.

MAKING THE UNITED STATES THE WHIPPING BOY: A CLEVER SANDINISTA TRICK

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. BROOMFIELD. Mr. Speaker, the door is slowly closing on freedom for the people of Nicaragua. The Marxist-Leninist Sandinista Junta has just suspended more basic freedoms in that country. To justify these typically totalitarian decisions, Comandante Ortega blames the "devil up north," the United States of America. The Sandinistas are doing to the Nicaraguan people what all totalitarian governments do to their people. They are crushing the personal freedoms of those who want to live their lives as free human beings.

Just a few days ago, Daniel Ortega announced the suspension for 1 year of the following rights: to public assembly, to strike, to freedom of expression, to movement about the country, to organize into labor groups, to a speedy trial, to appeal convictions, to unwarranted detention, and to protection from unreasonable searches. These unfortunate actions are being justified as a response to Sandinista claims about sabotage by the United States, the activities of some political parties and the church which is allegedly allied with the United States.

The Sandinistas are building a police state and they cannot accept any form of dissent be it either from political parties or from the Catholic Church in that country. The Junta deals with dissent by tightening its control over the people by taking away the few basic human freedoms which still exist in that sad country. The truth behind this recent decision is that there is widespread disillusionment with the Sandinista regime by a large segment of the population. The Sandinista revolution has failed, and the people know it. The Sandinistas are growing fearful of their own people, and Uncle Sam is a convenient scapegoat.

Since coming to power in 1979, Comandante Ortega has both feared and opposed the church. On October 12, the Nicaraguan Government seized nearly all the copies of Iglesia, a new Catholic Church newspaper, along with the church's press and printing equipment. On October 15, the Sandinistas occupied the offices of the Catholic Church's social service agency, and refused to let the clergy enter. In late September, 11 seminarians were forced into military service despite their exemption from service in the armed forces. The Sandinistas fear the continuing support for the Nicaraguan church by the great majority of the Nicaraguan people who are fervent Catholics.

The Communist government there cleverly established a "Peoples' Church" which, I understand, teaches far more political ideology than theology. A well-armed guerrilla fighter has replaced the traditional Christ figure hanging from the cross in that new church.

I urge the administration to continue its efforts to tell the world the truth about the real Nicaragua. It is not a peoples' paradise. It is slowly becoming another sad, oppressive and backward police state. Surely, the long-suffering people of Nicaragua and future generations there deserve more than this. It is Comandante Ortega, not Ronald Reagan, who has made Nicaragua what it is today.

With these concerns in mind, I commend the following Washington Post article to my colleagues in the Congress.

[From the Washington Post, Oct. 16, 1985]

NICARAGUA SUSPENDS RIGHTS

MANAGUA, NICARAGUA, Oct. 15—The government today suspended a wide range of civil rights and broadened a national state of emergency to fight what it called "sabotage" by the U.S. government and its allies within the country.

President Daniel Ortega, announcing the measures on a nationally televised broadcast, accused "agents of imperialism . . . within certain political parties, and the press and religious institutions" of supporting U.S. "terrorist policies" against his government.

The rights that were suspended cover the right to public meetings, to strike, to freedom of expression, to move about freely within the country and to organize into labor groups.

Nicaragua's revolutionary government first imposed a state of emergency, limiting most of these rights, in March 1982, saying it was necessary to fight U.S.-backed rebels seeking to overthrow it.

But the ruling Sandinista National Liberation Front had eased many of the restrictions before last November's election in which Ortega was elected to a six-year term.

Legal experts said the measures announced today permit police or other authorities to raid and search homes. They also suspend protection against unwarranted detention, the right to a speedy trial and the right to appeal convictions.

Today's suspension of rights will last for one year, Ortega said.

"The government cannot permit an activity of sabotage and political destabilization directed by the U.S. government to continue to develop with impunity," Ortega said.

Earlier Tuesday, security agents seized control of the offices of the Roman Catholic Church's printing press to prevent the publication of a new magazine, a church spokesman said.

Diplomatic sources said editors of the magazine had refused to submit to censorship.

BRISTOL RETIRED SENIOR VOLUNTEER PROGRAM CITED

HON. NANCY L. JOHNSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mrs. JOHNSON. Mr. Speaker, I would like to take this opportunity to publicly

recognize and commend the Retired Senior Volunteer Program [RSVP], sponsored by the Bristol Community Organization in Bristol, CT. Their effectiveness and popularity is evidenced by the fact that, established in April 1984, the number of volunteers has soared from an original 150 to the present 250-member enrollment.

The Retired Senior Volunteer Program is a nationwide network made up of retired senior volunteers, over age 60. These individuals share a lifetime of skills and experience, contributing their time to their communities. Many of these volunteer activities include services for the elderly such as adult day centers, nursing homes, homes for the aged, and hospitals. RSVP volunteers also serve in community programs for children and families, in schools, libraries, museums, health care agencies, nutrition programs, and recreational groups.

Mr. Speaker, I am proud to represent such selfless volunteers who offer the benefit of their vast experience for the benefit of leaders of tomorrow.

THE 50TH ANNIVERSARY

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. CLINGER. Mr. Speaker, the Boalsburg Fire Co., located in Boalsburg, PA, is celebrating its 50th anniversary this year. The fire company was reorganized and chartered in 1935 and has been providing dedicated, professional, round-the-clock service to Harris Township, and at times, to surrounding communities. I know my colleagues join me in wishing the Boalsburg Fire Co. a happy 50th anniversary. Incidentally, two of the original charter members of the Boalsburg Fire Co., Montgomery Hubler and Frederick Lonberger, are still members of the company and at this time I want to say thank you to them for their many, many years of volunteer service to the community.

A TRIBUTE TO LOUIS A. RICCI, RETIRING BAND DIRECTOR OF ST. RITA HIGH SCHOOL

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. LIPINSKI. Mr. Speaker, I rise before my colleagues today to honor an outstanding resident of the Fifth Congressional District of Illinois, Mr. Louis A. Ricci. Mr. Ricci recently retired as director of the St. Rita High School Band in Chicago.

Mr. Ricci has been associated with St. Rita High School since 1954 and has served as band director since 1959. He is a 1953 graduate of St. Rita and received his bachelor of music degree from De Paul University. Under his direction, the Marching Mustang Band of St. Rita has risen to prominence throughout the Chicago area and the Midwest. His bands have become famous for their spirited presentations at football games half-time shows, dedications, corporate conventions, collegiate and professional sports shows, and indoor concerts.

The St. Rita High School Band was crowned "City of Chicago Champion and No. 1 Class A Band in the 1983 Music Bowl Competition." The band won the Midwest first place trophy in the Michigan City, IN, Summerfest on three occasions in the 1960's. In 1963, they served as President Kennedy's honor band. They were the official band for the Chicago Cardinals football team during the 1950's and have appeared at several half-time shows for the Chicago Bears.

Mr. Ricci's main thrust was that of a teacher first and band director second. His Christian-like professional manner set an inspirational example to his students. He felt a deep obligation to the development of genuine work habits on the part of his students. Through music, Mr. Ricci knew a youngster could learn the importance of teamwork and application to the job at hand and therefore, gain experience that would sustain him for life. He would always remind his students, "You're only as good as your last show."

Along with his wife, Mary Fran, Mr. Ricci resides in the Midway area of Chicago. The Riccis have been married 27 years and are parents of one daughter and three sons.

Mr. Speaker, it gives me great pleasure to salute Mr. Louis Ricci on the occasion of his retirement from St. Rita High School and I join the residents of the Fifth Congressional District in thanking him for his outstanding work on our behalf.

MORE TERROR—AT HOME AND ABROAD

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. GILMAN. Mr. Speaker, our satisfaction with the favorable turn of events as the President took decisive action to bring the Italian cruise ship pirates and murderers to justice is, as I said last week on this floor, mixed with continuing anger at continuing acts of terrorism here and abroad, which are so often unpunished.

Just last week, as the ship hijacking ended, two additional incidents of terrorism were brought to light.

In one incident, here in our own country, the offices of the National Association of Arab Americans was bombed, resulting in the tragic loss of one life and the wounding of several others. That bombing was outrageous and indefensible, coming as it does in our Nation, where free speech is treasured and respected above all other freedoms. As much as we may disagree with some of the statements of the NAAA, none of us may silence them by violence. Americans must use reasoned argumentation if they think they are wrong, not the bomb or the bullet.

In Barcelona, Spain, last week, the decomposing bodies of two Israeli merchant seamen were found where they had been murdered. A Palestinian group took credit for killing "Zionist sailors". Again, shocking violence takes innocent lives.

I am certain that both the authorities in California and those in Spain will bend every effort to bring the killers—both those actively involved, and those who planned and assisted them—to justice.

Freedom from terror is indivisible. We must all join in condemning, in the strongest possible terms, every example of terrorism.

CONGRESSIONAL SALUTE TO THE HONORABLE DANIEL F. MALATESTA, P.E.&L.S. OF PATERSON, NJ, ESTEEMED CITY ENGINEER, COMMUNITY LEADER AND GREAT AMERICAN

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. ROE. Mr. Speaker, on Sunday, October 27, the people of the city of Paterson, my congressional district and State of New Jersey will join together in testimony to an esteemed city engineer, outstanding community leader and good friend, the Honorable Daniel F. Malatesta, P.E.&L.S. of Paterson, NJ, who has announced his retirement as city engineer and director of public works of the city of Paterson to be effective November 1, 1985. I know that you and our colleagues here in the Congress will want to join with me in extending our deepest appreciation to Mr. Malatesta and share the pride of his good wife Elaine upon this milestone of achievement in their family endeavors.

Mr. Speaker, Dan's personal commitment to the ecomomic, social, and cultural enhancement of our community has been a way of life for him. We are proud to boast that he is a lifelong resident of the city of Paterson and is licensed by the State of New Jersey as a professional engineer and land surveyor. He attended local schools and is a graduate of Paterson's Central High School. Upon completing land surveying studies at Bergen Junior College, he attended Seton Hall University at Stevens Institute of Technology. He received an Associate of Science Degree in Civil Engineering from the Newark College of Engineering and completed further courses of study in bridge and bridge construction at Hostra University.

Dan is a veteran of World War II, honorably discharged with the rank of staff sergeant. He commenced his engineering career pursuits in April 1949 as an engineer aide in the department of public works engineering department of the city of Paterson and advanced through the ranks to become street commissioner and acting city

engineer in 1972. During the following year he was appointed city engineer and in 1982 achieved his current high office of public trust as city engineer and director of public works for the city of Paterson.

Mr. Speaker, Mr. Malatesta has attained the greatest respect and deepest appreciation from a grateful community for his untiring endeavors in service to his fellowman. Among his vast constructive achievements we particularly commend him for his outstanding public service in the vanguard of many community development and improvement programs for the city of Paterson including—to name but a few—the following major public works projects:

Passaic River Basin flood relief projects affecting the Hillcrest area, Lakeview area, and Sandy Hill area.

Providing a master plan for wastewater collection.

Coordinating Federal and State reimbursements during flood disasters.

Major road construction, such as the Route 80 highway through Paterson, loop roadway around Paterson's downtown area, and other reconstruction projects.

We are especially proud of his leadership efforts in 1965 as director-coordinator of the Anti-Poverty Program to cleanup the Passaic River. This project utilized Federal funds with municipal personnel to cleanup the Passaic River.

Mr. Speaker, all of us who have the good fortune to know Dan Malatesta are proud to have had him on the team. He has played an important role in the achievement of government in his chosen field of endeavor. Professionals like Dan serve as the bulwark of strength in the day-by-day challenges of government in meeting the needs of our people. For a job well done there is no doubt that he has truly enriched our community, State and Nation.

As we gather together in tribute to his over three-and-a-half decades of personal commitment, quality leadership, richness of expertise, warmth of friendship and sincerity of purpose as city engineer and public works director of the city of Paterson, we do indeed salute a good friend, distinguished citizen, and great American—the Honorable Daniel F. Malatesta, of Paterson, NJ.

THE DEPOSITORY INSTITUTIONS EXAMINATION IMPROVEMENT ACT OF 1985

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. WIRTH. Mr. Speaker, I want to commend the authors of the Bank Examination Improvement Act of 1985 for the excellent job they have done in crafting this necessary and timely piece of legislation. The issues with which this legislation deals are very important for maintaining the soundness and stability of the financial system and the public's confidence in our financial institutions.

Last June, Dr. Henry Kaufman told the Subcommittee on Telecommunications, Consumer Protection and Finance that: "We are drifting toward a financial system in which credit has no guardian." He said—and many members of our subcommittee would agree—"It is unfortunate that the emphasis on monetarism and deregulation relegated supervisory agencies to a second and third level of importance." He believes, with the authors and cosponsors of this bill, "that the best people must be attracted to supervisory agencies through higher compensation and standards," and that the "importance of these responsibilities should be made known."

Mr. Speaker, there is widespread recognition that the provisions in this bill are a necessary step toward maintaining confidence in the financial institutions that play so vital a role in our Nation's economic life. I am very pleased to be a cosponsor of this legislation and, again commend its authors for the excellence and timeliness of their efforts.

REDEDICATION OF HENRY CLAY STATUE

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. YATRON. Mr. Speaker, I would like to bring to the attention of my colleagues an important event occurring in Pottsville, PA, this Saturday, October 19, 1985. On this day, the elected officials and citizens of the city of Pottsville and the surrounding community will rededicate the statute of the great American statesman, Henry Clay. The statue was erected in 1855 and many people have contributed to its refurbishing.

The statue of Henry Clay has always been a source of community pride and a symbol of the respect, honor, and affection the people of Pottsville felt for its subject. How the statesman from Kentucky came to be a monument in Pottsville, PA, is an interesting story. History remembers Henry Clay for many extraordinary virtues of character and leadership. His oratory was renowned and he used it to great and memorable effect in the U.S. Congress in several terms as Speaker of the House and as a U.S. Senator.

In the early 19th century, the feeling of nationhood was still a new one for the American people and Clay's conception of the American system helped promote a sense of commonality and nationality. America's unity was tested more than once in Clay's lifetime. The fervor of his patriotism and nationalism and the great compromises he formulated contributed immensely to preserving the Union.

For Pottsville, however, it was Clay's efforts to protect American commerce and trade that are thought to be what made him most appreciated and esteemed. The importance of coal to Pottsville and the surrounding anthracite-rich region was paramount and Clay's dedication to the promotion of American industry certainly helped maintain the community's economic well-being.

As such, in 1855, 3 years after his death, the citizens of Pottsville erected the Nation's first monument to Henry Clay. The cast-iron statue is 15 feet high, weighs 7 tons, and stands on a 60-foot column which is itself mounted on a 12-foot base. The total height of the monument is 90 feet and it stands on a hillside in the city's southeastern sector.

Mr. Speaker, I would like to commend the citizens of Pottsville and Schuylkill County for their efforts to restore America's oldest and largest cast-iron monument and to preserve the history of their forefathers' admiration and affection for Henry Clay. Their 2-year long fundraising campaign is in itself a tribute to the city's sense of tradition and pride in its history and heritage. Congratulations to everyone involved and best wishes to the city for a wonderful parade and rededication ceremony on Saturday.

VICTORY OVER TERRORISM

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Ms. MIKULSKI. Mr. Speaker, a brutal act of terrorism has taken another innocent American life. Mr. Leon Klinghoffer, an elderly man; an innocent man, known for his friendly smile and good-natured spirit, was murdered in coldblood last week by terrorists aboard the cruise ship *Achille Lauro*. The fact that Mr. Klinghoffer was confined to a wheelchair only dramatizes the cowardly nature of the terrorists who committed this terrible crime.

The whole world was shocked to learn that these terrorists made a deal with Egypt to get away. While Egyptian President Mubarak provided the terrorists with a plane flight out of Egypt, the United States planned to act swiftly.

Every American can be proud of President Ronald Reagan's resolve to bring these terrorists to justice. Our military forces showed courage and determination in carrying out a very difficult mission to intercept the plane carrying the terrorists. Our country stands tall because of our commitment to ensure that terrorists will not go unpunished.

The United States owes no one an apology for its action. There is nothing shameful in protecting the rights of the innocent civilians in the world. Let terrorists be on notice. Although others may be frightened by terrorist threats, the United States has the will and determination to stand up to terrorism.

We must ensure that Leon Klinghoffer did not die in vain. His murder has demonstrated to the world the true nature of terrorists. They are cowards who strike at the helpless and punish the innocent. Their tac-

tics are intimidation, disguised by cheap slogans justifying their thirst for violence.

Let the message be clear. The United States will never rest in its efforts to fight terrorism in all of its forms. The recent action by the U.S. military is a true symbol of victory over terrorism. This symbol will remain clear and strong.

EAST-WEST CULTURAL GATHERING

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. BERMAN. Mr. Speaker, on Tuesday, October 15, the United States delegation to the Budapest Cultural Forum arrived in Hungary for the first East-West cultural gathering since the Helsinki Final Act was signed in 1975. I am honored to express my support for the goals of this forum and my hope for meaningful results.

As one in a series of experts' meetings mandated by the Madrid Review Conference of the Conference on Security and Cooperation in Europe, the Cultural Forum will bring together 35 participating states of East Europe, West Europe, and North America to discuss such issues as censorship, the sharing of creativity, persecution of cultural minorities, repression of religious groups, and the rights of journalists. A meaningful discussion of these issues will render a definition of culture among nations as well as within individual countries. Increased cultural exchange is a key element of the mutual understanding which is vital to the peace process.

The free exchange of ideas, however, cannot be realized as long as states continue to prohibit the language, religion, history, and literature of various ethnic groups. Despite constitutional guarantees of individual and cultural rights for all citizens in the Eastern bloc, the Soviet Union still rewrites the history of Russian and non-Russian peoples, restricts access to printed historical sources, and forces many non-Russian children into boarding schools where they will be separated from their parents and their culture. Soviet persecution of Jews and other religious minorities is a well documented horror. Czechoslovakia and Romania punish any display of ethnic diversity as an impediment to the desired national culture. In their constant effort to destroy cultural independence, Poland and the German Democratic Republic have attempted to overcome the power of the church. If these countries continue to ignore their own legal codes and blatently violate human rights, what guarantee does the United States have that an international agreement will be adhered to?

With the summit meeting between President Reagan and Soviet leader Mikhail Gorbachev only 1 month away, the importance of the Budapest Cultural Forum is heightened. Unfortunately there has already been some disappointment as the Hungarian Government has severly curtailed the activities of the International Helsinki Federation, a nongovernmental organization. This action demonstrates a clear lack of cooperation in an international effort specifically designed to combat such prohibitive practices. Moreover, it occurs at a time when a demonstration of respect for human rights would have a tremendously positive impact. Only through free interchange of ideas and unprohibited expression of culture can peace, cooperation, and security among states be realized.

JOANN PENA RECEIVES COMMISSIONER'S CITATION AWARD

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. LEHMAN of California. Mr. Speaker, I rise today to commend and recognize a very special honor being awarded to JoAnn Pena, a supervisor in the Fresno Social Security Office in my district. Today, JoAnn will receive one of the Social Security Administration's highest awards, the Commissioner's Citation. This award is reserved for those who perform outstanding service to the disabled and aged community. I am very proud of JoAnn's achievements since she joined the Fresno Social Security Office in 1973. We are all aware of the difficulties Social Security recipients can confront when dealing with an agency as large as the Social Security Administration. Complaints are sometimes registered about the cold nature of the bureaucracy and the unnecessary red tape, however, JoAnn somehow manages to cut through it all and provide that rare personal touch. She is well known for her ability in breaking bureaucratic logjams and injecting a warm sense of humanity into the system. It is only appropriate that her superb work is being recognized today.

I know that JoAnn is truly appreciated by her colleagues, myself, my staff—who wouldn't know what to do without her—and most importantly, the hundreds of Americans in whose behalf she selflessly and tirelessly works for every day. JoAnn has given a great deal to the Fresno community through her hard work and for this I wish to extend my special thanks and my congratulations for receiving the Commissioner's Citation.

CENTINELA CHILD GUIDANCE CLINIC CELEBRATES 30 YEARS OF SERVICE TO SOUTHERN CALIFORNIA

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. DYMALLY. Mr. Speaker, I am pleased to bring to the attention of my colleagues in the House of Representatives an accomplishment for which the people of my congressional district are deeply grateful. Today, the Centinela Child Guidance Clinic of Inglewood, CA, will celebrate its 30th year of service to our communities. I have served all my time in Congress during a period of great restraint, a period of cutback upon cutback for services to those in our society who are most in need. It is with special thanks, therefore, that I join all friends of the clinic to rejoice in the fact that despite the impediments placed in its way, Centinela Child Guidance Clinic has continued to serve the mental health needs of our young people.

The goal of our clinic is simple and direct. It is to help as many children who have mental health needs as possible. Services are offered without regard to age, ethnicity, or income. Our clinic works toward its goal by maintaining a close and strong working relationship with all school districts, public officials, and related service agencies in our area. Centinela makes every effort to expand its services as needs dictate. Centinela is an outpatient facility that makes use of the most up to date clinical methods and practices available.

There are many groups to thank for the longevity of the clinic. Among those groups are the agencies which over the years have contributed to the financial survival of the clinic. United Way has been a significant contributor as have State and county governments. A myriad of individuals and foundations have also contributed to the mosaic of support. But I want to single out for special recognition the clinic's own efforts to maintain itself through its thrift store. I point this effort out especially because it is staffed by volunteers, by people who do their good work for the best reason of all: They care personally for the children of our community.

The highly competent staff of the clinic is led by executive director James Strong and by a board of directors whose newest members will be installed today at the Hawthorne Memorial Center. To them and to the many, many people who each have contributed to the spectacular success of Centinela Child Guidance Clinic, I express the gratitude of our community. May your efforts grow and prosper in the next 30 years so that our children might develop to the fullest extent of their mental and physical capabilities.

THE 65TH ANNIVERSARY OF MONTEBELLO, CA

HON. MATTHEW G. MARTINEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. MARTINEZ. Mr. Speaker, I rise today to congratulate the citizens of Montebello, CA on their city's 65th anniversary. The city, named for it's "Beautiful Hills," was incorporated on October 16, 1920. To commemorate the event, a citywide celebration, "city day," is planned for Sunday, October 20, 1985.

Montebello was the site of the original San Gabriel Mission, founded in 1771 and

relocated in 1776. Its largely agricultural economy was significantly diversified by the discovery of oil in Montebello during World War I. This discovery helped stimulate a major growth in the city's population.

Named a bicentennial all-America city in 1976, Montebello is a unique and vital community. The city has maintained a balance of residential, commercial, and industrial development. Its diverse population consists of many of the groups who have come to southern California over the years seeking economic opportunities as well as political freedom. These groups have contributed tremendously in making Montebello a culturally rich community.

Montebello is a full-service city. It is one of the few communities in Los Angeles with it's own city bus lines. Montebello has long been a leader in providing services to older residents. Under the leadership of Mayor Art Payan and the Montebello City Council, many citizens participate in local government activities.

I salute the citizens of Montebello, the city of "Beautiful Hills," as they celebrate Montebello's 65th anniversary and look forward to a bright future. I am confident they will be even more successful meeting the challenges of the next 65 years.

THE CLARK FAMILY FARM SESQUICENTENNIAL

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. SCHUETTE. Mr. Speaker, the Clark family farm in Clinton County, MI recently celebrated its 150 years of production. I commend the Clark family for 150 years of hard work and dedication. Farming is not an easy way of life, and this family deserves special recognition for keeping the Clark farm in production for these 150 long years.

As the State of Michigan nears its 1987 celebration of statehood, this farm will be a reminder of the great agricultural heritage many Michigan residents share. We can look with pride at our hard-working forefathers who left the East to travel to the unknown farmlands and wilderness of Michigan.

Thank you, Clark family, for reminding our Nation of its great agricultural heritage.

JAPANESE AMERICAN NATIONAL MUSEUM

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. MATSUI. Mr. Speaker, I rise to call to the attention of the House of Representatives a gala dinner and inaugural fundraiser for the Japanese American National Museum. The event will take place in Los Angeles on the evening of October 18.

The Japanese American National Museum, in the words of its founders, has as its chief mission the documentation and preservation of artifacts which record the Japanese-American experience in America. The museum will create a greater understanding of the Japanese American social and cultural heritage, its contributions to and accomplishments as participants in the American historical experience.

The museum will accomplish its mission through programs of permanent and changing exhibitions, traveling exhibits, and educational activity based on its archival collections. Publications and multimedia events will comprise a continuing element of the museum's programs.

On September 24, SB 1452 of the California State Legislature was signed into law appropriating $750,000 from the special account for capital outlay to the department of parks and recreation for allocation to the city of Los Angeles for the Japanese American National Museum. The appropriation is contingent upon $1 million being raised from non-State funding sources. With the support of the community the inaugural fundraiser will be a major step forward toward that $1 million goal.

Mr. Speaker, I commend those whose efforts have made the inaugural fundraising evening for the Japanese American National Museum a reality.

SENATE—*Friday, October 18, 1985*

(Legislative day of Tuesday, October 15, 1985)

The Senate met at 8 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Create in me a clean heart, O Lord, and renew a right spirit within me.—Psalm 51:10.

Living Lord, revive the Senate. Infuse it with new life. Dissolve the disappointment, the frustration, the disenchantment, the tired, "old boy—know it all—been through the ropes" syndrome which corrodes the soul, short circuits determination and breeds cynicism. Fan the fire that burned in the Senators' hearts when first they convinced the people to send them here. Restore the faith, the purpose, the enthusiasm, the dream, the vision that drove them to seek this high office. Help them to be professional in their work and amateur in spirit.

As Thou dost know our hearts, God of light, help us to know them. Deliver us from the folly of deceiving only ourselves when we think we are fooling others or Thee. Expose us to our personal needs and renew us in Thy grace. Where there is fear, instill courage. Where there is lack of will, inspire purpose. Where there is egotism, grant humility. Where there is cynicism, imbue with hope.

Great God, the world waits for the Senate to be the powerful, intelligent, deliberative, legislative leaders so desperately needed today. Let it be true dear Lord. Let it be true. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished acting majority leader is recognized.

THE CHAPLAIN'S PRAYER

Mr. SIMPSON. Mr. President, the remarks of our Chaplain again cause us to pause and ponder. Those remarks are rather powerful and inspiring this morning. Indeed, we do labor and often come forth with very little. I believe there is some biblical reference to that in better terms than I express.

He does help us keep our eyes on our frailties, and we certainly have them. But I think of the fact that there are people who legislate with spirit in this place, and two of them are here. Our President pro tempore is one of the most vigorous and vital legislators I have ever known. He meets his schedule of the day with a generation of spirit and faith and joy that is an envy to us. My good colleague from Wisconsin has been here a good number of years himself and handles his duties with great cheer and spirit and enthusiasm. If I could learn from them, why, I will labor here in this vineyard for a year or two more.

It is not painful work and it is all indoors and there is very little heavy lifting. We do not do windows, however. Maybe we will get to that one day.

SCHEDULE

Mr. SIMPSON. Mr. President, today we have recognition of the two leaders under the standing order of 10 minutes each and then morning business not to extend beyond the hour of 8:30 a.m., with Senators permitted to speak therein for not more than 5 minutes each. Following morning business, the Senate will resume consideration of H.R. 3038. At that point. the Senator from Alaska [Mr. MURKOWSKI] will be recognized to offer an amendment on which there is a 30-minute time limitation. Therefore, rollcall votes will occur early this morning, possibly as early as 9 a.m.

Following the Murkowski amendment, a total of three additional amendments will be in order to the HUD bill. Therefore, a final passage vote will occur prior to the hour of 12 noon on the HUD appropriations bill.

Following the HUD bill, it will be the intention of the majority leader to turn to the Department of Transportation appropriations bill. Also, the Senate will go on to debate the reconciliation bill in the afternoon. Rollcall votes are to be expected throughout today's session and the time of that session will be later determined and shared with our colleagues by the majority leader.

With that, I reserve the balance of the leader's time and yield to the acting Democratic leader, the senior Senator from Wisconsin.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The distinguished acting Democratic leader is recognized.

Mr. PROXMIRE. Mr. President, I thank the assistant majority leader.

THE CHAPLAIN'S PRAYER

Mr. PROXMIRE. Mr. President, I, too, was impressed, as I always am, by the prayer by the Chaplain. I particularly was struck by his reference to the wish that we be professional in our work and amateur in our spirit. That is a wonderful thought. The trouble is we are amateur in our work and professional in our spirit, I am afraid.

But it is always a great, great pleasure to work with my good friend from Wyoming. What strikes me is, when I go home after this, I go to bed. The Senator from Wyoming does not; he goes out, as does the Presiding Officer. My wife said she saw both of them at a social function the other night and, as always, was impressed, entertained, and delighted. I do not know how they do it.

HOW TO KILL ARMS CONTROL

Mr. PROXMIRE. Mr. President, in his New York Times column on Monday, October 14, Anthony Lewis provides devastating documentation to the contention this Senator has recently made on the floor of the Senate that the Reagan administration's insistence on star wars or SDI will kill arms control.

Think of it—in just a few days President Reagan will go to the summit in Geneva on November 19 with Soviet Secretary Gorbachev. For arms control this will be the zero hour. This is the first time either of these superpower leaders has met with the adversary leader. Since the meeting between President Carter and Secretary Brezhnev in Vienna on June 19, 1979, there has been no attempt by the superpower leaders meeting together to limit the nuclear arms race. In fact, quite the opposite; the nuclear arms race has zoomed ahead full blast. Both countries have immensely increased the capability of their nuclear arsenal to reach and devastate potential targets in the other nation. Both the United States and the Soviet Union are right now pouring billions into devastating nuclear warheads and the missiles, bombers, and submarines that can carry them.

In the 5 years since the last summit at Vienna, the United States has spent more than $1 trillion in building up our military forces. Much of that massive sum has gone into our nuclear

arms buildup. An arms control treaty that could slow, if not stop, this madness would greatly serve the interests of our country at a time when the Federal budget deficit has so woefully distorted our economy. Far more important, of course, the arms race has not brought greater security. It has not diminished the prospect of nuclear war. It enhances that terrible prospect. Can anyone dispute the fact that both superpowers urgently need a respite from the economic drain of this mindless arms race? Would not the security of both nations sharply improve if the superpowers agreed to stop it? Then why cannot our President and the Soviet leader agree at Geneva on November 19 to the kind of comprehensive, mutual, verifiable end to nuclear weapon testing, production, and deployment that the overwhelming majority of Americans have repeatedly supported in virtually every referendum and poll?

In his New York Times column of October 14, Mr. Lewis provides the answer. The Reagan administration has asserted an absolute determination to proceed with an antiballistic missile system—popularly called star wars or SDI [strategic defense initiative]. What is star wars? It is an antimissile defense. Why does star wars gut any prospect of a significant arms control agreement? For two reasons. First, the SDI defense will make it impossible for the Soviets to agree to a significant cut in their offensive missiles. They know that the one way to make an American star wars defense work is for the Soviets to sharply reduce their offensive nuclear arsenal. By doing so their nuclear deterrent would lose its credibility, if the United States has a massive star wars defense in place. Star wars forces the Soviets not just to reject any ICBM cuts, but to build ICBM's more furiously than ever. Second, star wars would flatly and directly repudiate the ABM Treaty. That treaty had one purpose: To limit antimissile defense to a single system at a single location for each superpower, and after that, no more. Would star wars violate that treaty? Of course it would. As Mr. Lewis writes:

> Just last year the Reagan Administration said in a formal statement: "The ABM treaty prohibition on development, testing and deployment of space-based ABM systems or components for such systems applies to directed-energy technology or any other technology used for this purpose. Thus, when such directed energy programs enter the field-testing phase, they become constrained by these ABM treaty obligations."

Of course last week, Robert McFarlane gave a precisely opposite view. He claimed the ABM Treaty—"approved and authorized" development and testing of space-based ABM systems "involving new physical concepts" such as lasers or directed energy.

Was the administration right the first time when they said in effect that the treaty barred the field testing phase of ballistic missile defense or the second time when they said in effect forget it. We now change our minds.

For the answer consider the opinion of the chief negotiator of the ABM Treaty for the Nixon administration, Gerard Smith. Smith has said just in the last few days that the administration's position would make the ABM Treaty a "dead letter." Smith pointed out that if the President persists in pushing star wars, it will kill the ABM Treaty in a way that would cast doubt in the mind of any nation making an arms control treaty in the future with the United States.

I might add at this point, Mr. President, that just 3 days ago three former Defense Secretaries who served in Republican administrations made a statement enthusiastically supporting the ABM Treaty, and saying that we should do our best to preserve it.

So, Mr. President, if the Reagan administration insists on moving ahead with SDI or star wars, it will destroy any prospect of a meaningful arms control agreement emerging from the Geneva summit conference. It will destroy the ABM Treaty. That treaty was ratified by the Senate 88 to 2. Star wars will repudiate the solemn word of the United States affirmed by a permanent treaty and ratified overwhelmingly by this body. And it will make an arms control agreement—any kind of an arms control agreement by our country—very unlikely indeed. In accomplishing all this, star wars will also greatly stimulate the arms race as both superpowers pour hundreds of billions of dollars into developing ever more costly and deadly nuclear weapons. The defensive antimissile system or star wars will cost a trillion dollars or more. It will provoke—as such initiatives always do—a similar antiballistic missile defense by the Soviet Union. Then we and the Soviet Union will pour billions of dollars and much of our precious and limited scientific genius into developing the offensive nuclear weapons that will penetrate or underfly the trillion dollar antimissile defense.

With that kind of scenario there is no way the Gramm-Rudman-Hollings schedule of deficit reductions can achieve realization. Three, four, five trillion dollar national debt, here we come! The American taxpayer is going to yearn for the good old days when Federal taxes took only half his income. And inflation will soar into double digits and then some.

Mr. President, I ask unanimous consent that the article by Anthony Lewis in the October 14, 1985 issue of the New York Times be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Oct. 14, 1985]

SHADOW ON THE SUMMIT

(By Anthony Lewis)

BOSTON.—It is only a matter of words—a Washington word game, you might say. But the players are after very large stakes. If their gambit works, it will sabotage next month's Reagan-Gorbachev summit meeting. And they have an even more ambitious goal: to remove all constraints on the nuclear arms race.

The game, little noticed outside of Washington, is being played with the words of the 1972 Anti-Ballistic Missile Treaty between the United States and the Soviet Union. For 13 years the treaty has been universally understood to mean what it says: that any ABM system based in space is outlawed. Now the claim is that it means the opposite. Out is in. Down is up.

This amazing proposition was first publicly advanced on television last week by President Reagan's national security adviser, Robert McFarlane. He said the 1972 treaty "approved and authorized" development and testing of space-based ABM systems "involving new physical concepts" such as lasers or directed energy.

In other words, President Reagan's Star Wars program can push ahead without any concern about the ABM treaty. But just last year the Reagan Administration said in a formal statement:

"The ABM treaty prohibition on development, testing and deployment of space-based ABM systems or components for such systems applies to directed-energy technology or any other technology used for this purpose. Thus, when such directed-energy programs enter the field-testing phase, they become constrained by these ABM treaty obligations."

How can that plain meaning have been transformed? By an "interpretation" that ought to embarrass the most brazen lawyer in town.

Article 3 of the 1972 treatry allowed a limited number of fixed, land-based ABM's. Article 5 banned the development, testing and deployment of "sea-based, air-based, space-based or mobile land-based" systems. Then, in "Agreed Statement D," the parties said they would discuss "specific limitations" on exotic new ABM systems if they were "created in the future."

The claim is that statement D permits new kinds of ABM systems unless the parties now agree to limit them. But the American diplomats who negotiated it say the purpose was the opposite. And statement D itself begins by saying that its purpose is "to insure fulfillment of the obligations not to deploy ABM systems and their components except as provided in Article 3."

An old national security hand, asked about the new "interpretation" of the treaty, said: "You've got to admire their brass. They have interpreted it 180 degrees from its intent. The idea is so preposterous that it would be amusing if it were not so serious."

The serious part is the consequences. The new reading would make the ABM treaty "a dead letter," as its chief negotiator, Gerard Smith, said last week. And it will have been killed in a way that casts doubt on the point of making any arms control agreements with the United States.

Treaties are meant to be serious undertakings. This one was negotiated for a purpose that all the world understood, to limit defensive systems. The United States Senate consented to the treaty by a vote of 88 to 2. Thirteen years later America would be telling the world: "The terms are inconvenient to us now, so on second thought they mean nothing."

The summit meeting would almost certainly be doomed to failure if President Reagan now adopts the new reading of the ABM treaty. The meeting is to focus on arms control, and what would be left to say if the United States had just in effect renounced the main existing arms agreement? Mr. Gorbachev would have a propaganda field day.

For all practical purposes, the whole idea of arms control would be dead. With the restraints on defensive systems gone, the Soviet Union would hardly proceed with its recent proposal to cut back on offensive weapons. The impulse would be to an all-out arms race, offensive and defensive.

With consequences so serious, for President Reagan personally and for international security, why would anyone in the Reagan Administration be pushing to read the ABM treaty out of existence? The answer is that the man who surely started this game of words wants the summit to fail and wants all arms control to end.

Richard Perle, Assistant Secretary of Defense, is the Administration's principal thinker on these issues—and is utterly opposed to arms control. The rereading of the ABM treaty has the stamp on it of his clever mind, and his ability to get ideas through the bureaucracy. But Secretary of State Shultz has not yet approved this idea, and there is still a chance that he will try to protect the President from this self-inflicted wound.

RUNAWAY INFLATION, HERE WE COME

Mr. PROXMIRE. Mr. President, all of us who follow economic developments closely understand how impossible it is to forecast the economy with any consistent success. But this Senator is going to take a shot at it anyway. This Senator will flatly predict that over the next year or two, our country will enjoy stable prices and only a little inflation. Inflation is likely to rise by only 2 percent to 5 percent, perhaps even less. But beginning in 1987, watch out. Then inflation is likely to come on like gangbusters with a whoop and holler. Inflation will rise to double-digit figures and keep on going.

What will cause that inflation? That inflation will have its genesis in the fiscal and monetary policies this country is following now and is very likely to pursue over the next decades.

Why is inflation likely to behave like a tame pussycat in the next few years? For the answer, just take a look at the current state of the elements that influence the level of prices. The prices that you and I pay as consumers begins with crude materials. The availability of crude materials, as contrasted with the demand for them, determines crude material prices. So what is the status of crude materials supply? Answer: An abundance of supply of virtually every crude material that has a significant effect on overall prices—oil, metals, coal. In all these areas, we have a glut; in foodstuffs, the biggest glut of all. In the past year, farmers have suffered a drop that exceeded 13 percent in the price of their feed and feedstuffs. That is right—a fat 13 percent drop.

Perhaps the major influence on price comes from the cost of labor. Wages and salaries constitute as much as 70 percent of the ultimate cost of what we buy. So what is the status of the supply of labor? Answer: We have a vast surplus of labor. More than 8 million Americans are looking for work. Millions more work only part time for economic reasons. That is another way of saying they want to work fulltime but cannot find full-time work. We have a near record number of discouraged workers. These are people who have no jobs. But they are not counted as unemployed because they have given up looking for work. If the demand for labor picks up, they will flock back to the job market. So, for the foreseeable future, labor will be abundant and wages will not significantly push up prices.

And then we have the availability of production facilities. As demand speeds up, American industry can only meet that demand beyond a certain point by moving to more expensive facilities or building more costly facilities. That means marginal costs rise. Prices rise. At what level of capacity is American industry operating today? How near are we to a level that is likely to exert significant inflationary pressure? The Federal Reserve Board industrial index for September was 80.2 percent. At 85 percent, inflationary pressure begins to show up in prices. So the economy still has substantial leeway with respect to available capacity.

Since all of these fundamental determinants of the price level are favorable, why the worry? Why does this Senator believe that the country may be headed for runaway inflation by the end of the decade? The answer, Mr. President, is that inflation is not simply a matter of the supply and demand for goods and services. Inflation is a monetary phenomenon.

An economy that enjoys an abundance of every element in production can swiftly suffer explosive inflation if the Government starts printing money faster than the economy produces. That inflation is not immediate. It takes time. There is a lag of about 24 months from the time monetary expansion begins until inflation begins to bite. This is why I predict price stability for the next year or so. The empirical evidence shows this overwhelmingly. In South America, in Europe, and in Asia, we have found many instances where labor supply is abundant, and the supply of commodities exceeds the effective demand and yet prices soar. Why does this happen? The answer is that in virtually every case where a government has let its spending outrun its revenues, and without exception in every case where a government has sharply and consistently increased its money supply, prices have soared out of control.

Does America face that kind of situation today? Well, judge for yourself. Our Federal Government is recklessly racing along with spending far exceeding revenues. How about the money supply? Is that not within the firm control of a Federal Reserve Board that has shown its determination to resist political efforts to loosen up credit by unjustified increases in the money supply? Until recently, Mr. President, this Senator would have said yes. We can rely on the Fed as a bulwark against any inflationary monetary policy. Now I am not sure, and within a month or so, I may be very unsure indeed. Why? Consider—for many months now, the Fed has been increasing the money supply at a steady rate far above their targets. What does this mean? This means that the Fed has been for at least 1 year following a policy of sharply increasing the money supply.

And it gets worse. The President has just nominated two new members of the Federal Reserve Board. These two new members will join two Reagan appointees already on the Board and give the administration a solid majority. Reagan appointees have consistently supported the administration, and the Treasury penchant for an easier, more inflationary, more expansive monetary policy. It is true that monetary policy is set by the Open Market Committee. That committee does indeed include five Federal Reserve Bank Presidents along with the seven members of the Board. It is possible Chairman Volker will be able to resist the easy money, expansionary pressure of the new members by consistently winning four of the five bank Presidents to his side. But first of course, the Chairman has to decide that he wants to slow down the racing locomotive of monetary expansion he has piloted for the past year. Why is it likely that the Federal Reserve Board under these conditions will continue to expand the money supply—or, in effect, to print money? The answer is that no one has repealed the business cycle. The economy is in the late stages of its recovery. With the stimulus of massive budget deficits from the Congress and big injections of easy credit by the Fed, it can continue and very probably will continue along for a year or so. But then it will slow down. As I said, no one has repeated the business cycle. When it does slow

down what will the Congress do about the deficits? That is easy. It will take off all restraints and really go into the spending business with a vengeance. And that is not all. It will do something else. It will cut taxes again to give the economy a lift. And what will the Federal Reserve Board with its new expansion-minded majority do as recession rears its ugly head? It will inject more money into the tired veins of the economy. The economy will rise to its bleary feet and stagger ahead for awhile. But, as in country, after country, that has tried this pathetic attempt at bootstrap hoisting, prices still leap ahead and economic activity will collapse.

Now, Mr. President, none of this dreary script is inevitable. We have a marvelous, resilient, powerful economy. It has generated immense strength in the past. But we are abusing it, and if we do not stop this out-of-control spending and this monetary stimulus, we are going to wreck it.

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, the myth of the day is that Wisconsin and the Great Lakes' region is an economically stagnant "Rust Belt" dominated by older declining manufacturing industries and is not very attractive to new businesses.

While that negative view had some validity 5 years ago and the region is still buffeted by unfair import competition, my State and region is changing rapidly and making a surprisingly strong recovery.

As stated in the most recent edition of General Manufacturing Climates:

> America's "Rust Belt" is making a comeback. Three years ago cars sported bumper stickers that read, "The last person out of Michigan please turn out the light." Today, the lights are going back on all over the region. While still tied to agriculture and smokestack industries, government officials and private industry leaders are going further and further afield to attract business relocations and discover new business possibilities with the goal of creating an environment conducive to new business growth in the region.

The survey showed that Wisconsin improved its State ranking for manufacturing climate by 11 places in a single year! This was by far and away the largest single advance in the Nation. The entire Great Lakes' area showed a significant improvement. In fact, every State except one increased its relative position.

Wisconsin's unemployment rate of 6.7 percent compares favorably with those among the so-called Sun Belt States of the South and Southwest.

While manufacturing still employs the largest group of workers in the Great Lakes' region, we have experienced rapid growth in service jobs. Many of these new jobs are in frontier, high-paying fields.

It is also interesting to note that the heaviest concentration of manufacturing workers is in North Carolina, followed by South Carolina and Rhode Island, and the first Great Lakes' State, Indiana, follows in fourth place. On a regional basis, New England has a slightly higher concentration of manufacturing jobs than does the Great Lakes' region. What is hidden in all those statistics on manufacturing jobs in both New England and the Great Lakes' regions is that we have been gaining new, high-technological manufacturing jobs as we have been losing the more traditional jobs in heavy manufacturing industries.

Clearly, Mr. President, the true picture of the dynamic and attractive economies of the Midwest is in sharp contrast to the misleading myth of a dormant and dying region of our Nation.

MORALITY IN INTERNATIONAL RELATIONS

Mr. PROXMIRE. Mr. President, John Eppstein, editor of the English edition of the Code of International Ethics, recently discussed his views and concerns about morality in international relations. I agree with his analysis and feel it is yet another reason why the Senate should ratify the Genocide Convention.

Eppstein states that all governments find it necessary to justify their foreign policies to their people and to the world. This he cites as proof of a sense of right and wrong in human nature. Peoples of all nations share the same human nature, want peace, and want to be free from brutality.

According to Eppstein, our common bond of humanity obliges us to look out for the welfare of all people. There are two sorts of injustice that may violate human rights. The first occurs when someone commits an act of brutality. An example of this on a grand scale is the Holocaust of the Hitler regime. The second injustice occurs when those who have the authority and power to prevent brutality and violations of human rights do not do everything in their power to prevent or stop them. Eppstein expresses this position by saying that:

> He who does not repel an injury done to his fellow, if able, is as much at fault as the one who commits the injury.

The Genocide Convention is one step toward the prevention of another Holocaust or other acts of genocide. Ratification of this treaty will show to all nations that we will do everything possible to prevent injury, brutality, and attempts to eliminate groups of people. It is a human rights treaty that will protect all people and their right to live.

There are 96 countries that have already signed the treaty. We too must ratify the treaty so that we can be prepared to take action, if deliberate persecution of groups of people occurs.

If we fail to show our support for this treaty and for what it represents, we will fail to condemn the crime of genocide. All our allies have signed the treaty and we must assure them that we uphold the values and beliefs that our country was founded upon. Ratification of the treaty will free us from the embarrassment of contributing to Eppstein's second injustice—inaction. We must ratify this moral document now.

ROUTINE MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond 8:30 a.m., in which Senators may speak for not to exceed 5 minutes each.

THE ROBERT E. "BOB" JONES BRIDGE

Mr. HELFLIN. Mr. President, on Friday, September 20, 1985, a dedication ceremony was held for a bridge near Scottsboro, AL. I am certain that, in our vast country, many similar dedication ceremonies were held that day, but the one to which I refer was, for many reasons, particularly significant.

The bridge, which spans the Tennessee River, is the "Robert E. Jones Bridge," named for Bob Jones, who served as a Congressman from Alabama for more than 30 years—the longest tenure ever by an Alabamian in the House of Representatives. Bob Jones had a remarkable career, and remains a remarkable man.

Born in Scottsboro in 1912, he has remained a citizen of Scottsboro his entire life. After earning a law degree at the University of Alabama, he returned to his hometown to practice law. The people of Scottsboro thought so highly of Bob Jones that, only 3 years later, he was elected the first judge of the Jackson County Court.

With the coming of World War II, Bob Jones left Scottsboro to serve in the U.S. Navy from 1943 to 1946, first as a gunnery officer and then as a member of the legal staff of Gen. Douglas MacArthur. Prior to his return at the end of the war, he was, in absentia, reelected county judge.

Just a few months after his return, John Sparkman, then the Congressman from north Alabama, was elected to fill a vacancy here in the Senate. In turn, Bob Jones was elected to fill the vacancy created by Senator Sparkman's resignation, and took office in January 1947. Thirty years later, Congressman Jones retired, as the 16th most senior Member of the House of Representatives.

During his service here in Washington, Congressman Jones became one of only two Alabamians ever to serve as chairman of a full House committee. This came about when he ascended to the chairmanship of the Committee on Public Works and Transportation in 1975. He had joined that committee upon his first election to Congress, and remained a member for his entire career, serving at one time or another as a member or chairman of every one of its subcommittees.

During his service in the House, Bob Jones was known for his concern about the restoration and preservation of our water resources, the problems of urban and rural transportation, and the need for economic development in underdeveloped areas. He was a major force in the creation of the Interstate Highway System, and sponsored legislation to provide financial aid to education, to improve farm programs, to seek new sources of electric power, to provide park and recreational facilities, and to expand aid to our veterans. He left his influence behind in his district through his work with TVA, and here in Washington by his sponsorship of the Public Building Act of 1959, which served as the basic authority for most Federal building projects, including the new buildings of the Smithsonian Institution and the Kennedy Center.

Mr. President, clearly Representative Bob Jones was an outstanding public servant. In fact, he was held in such high esteem by his colleagues that, following consideration of the Water Quality Act of 1972, he was presented a plaque of appreciation by his fellow conferees for leading them to a successful compromise solution of differences that required many months and more than 40 conference sessions to resolve.

In addition, after he announced his intention to retire from the House, Bob Jones was referred to as "a prototype of congressional responsibility, because as a Member of the House he kept his head down, did his work, and knew his subject better than anyone else."

Mr. President, I am proud to know Bob Jones and to count him among my close friends. For years, he was my Congressman, and the people of our district always knew we had a special friend in Washington.

Throughout north Alabama, there are numerous landmarks of his long and dedicated service. This most recent one, however, is perhaps most fitting, for it stands next to the B.B. Comer Bridge, where, 56 years ago, a young man did construction work for 60 hours a week at 25 cents an hour. Today, Mr. President, that young man, Bob Jones, has left his imprint not only on the B.B. Comer Bridge, but on public works and improvements all across the Nation. Alabama, and America, are lucky to have such a public servant.

Mr. President, I ask unanimous consent to have printed in the RECORD two newspaper articles relating to the dedication of the Robert E. Jones Bridge.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

DEDICATED IN HONOR OF BOB JONES—LONG-AWAITED BRIDGE OPENS

(By Betty Schmidt)

The opening of a new span across the Tennessee River Friday represents "the opening of new opportunities for growth," according to retired Congressman Robert E. (Bob) Jones for whom the bridge was named.

Jones was the principal speaker at the event attended by a crowd of some 200 onlookers including area residents, state, county and city officials.

The new Robert E. Jones Bridge, which is part of a four-laning project for Highway 35, cost approximately $13 million and was under construction 27 months.

Jones praised the county, federal and state efforts which resulted in the new bridge, a symbol of the "determination" and "imagination" of the people of the area. "The bridge represents the stimulation of our efforts for growth and new ideas," he said.

The retired congressman recalled the days when he worked for 25 cents an hour as a laborer on the adjoining B.B. Comer Bridge some 56 years ago. "I sense I created a great tribute to the Tennessee River . . . I sweated 10 gallons a day on the top of those piers," he said.

He concluded his remarks by voicing the hope that "the new bridge will relieve us of the separation of lowlands and highlands."

State Highway Director Ray D. Bass also spoke at the ceremonies and introduced the officials who lined the platform.

C.F. Camp, division engineer, was the master of ceremonies for the ribbon cutting and the Rev. Charlie Guinn gave the invocation.

Scottsboro police directed four-lane traffic across the double bridges shortly after the 10:30 a.m. ceremony. Among those witnessing the opening of the span was Police Chief Keith Smith who was happy his department would no longer be needed to escort wide loads across the narrow B.B. Comer Bridge.

"It will save a lot of our time and reduce traffic accidents," he predicted. In the past, the Scottsboro police had as many as eight escort details a day, the chief said.

[From The Huntsville (Ala.) Times, Sept. 21, 1985]

NEW BRIDGE DEDICATED TO EX-REPRESENTATIVE BOB JONES

(By John Peck)

SCOTTSBORO.—Bob Jones labored 10 hours a day, six days a week for 25 cents an hour while building the B.B. Comer Bridge in Scottsboro.

Today, 56 years later, the retired congressman can view the results of that effort from atop a new bridge—a structure bearing his name—the Robert E. "Bob" Jones Bridge.

"As I pass over this bridge now, I'll sense that I contributed to the Tennessee River by the 10 gallons I sweat each day on top of those piers," operating jackhammers on the river botton and finishing concrete from atop planks suspended from the bridge supports, Jones told an audience of several hundred who gathered here Friday for the ribbon-cutting ceremony.

On a more serious note, Jones called the bridge the "opening of new opportunities for our people" and said he felt "honored" for having a bridge named after him.

Among the dignitaries and guests on hand for the ceremony were State Highway Director Ray Bass, members of the Jackson County legislative delegation, Scottsboro Mayor Lonnie Crawford, Commission Chairman Houston Kennamer, and others.

Bass told The Huntsville Times the opening of the 4,342-foot bridge will enable highway officials to proceed with efforts to four-lane Alabama 35 to U.S. 72, which he said will take a couple of years.

Jones, 73, was elected to the U.S. House of Representatives in 1946 and served as chairman of the House Public Works and Transportation Committee. He served 15 consecutive terms in office—a tenure spanning 30 years and six presidents.

While in office, Jones was a strong leader in getting the Interstate Act and the Appalachian Act pushed through Congress.

The Comer Bridge, built in 1928 by the Kansas City Bridge Co., was constructed at a cost of just over $500,000. The price tag for the new bridge was nearly $13 million.

Jones said he landed the construction job the summer after he graduated from Jackson County High School in 1929. The year before, he had worked on a survey crew involved in the construction of Alabama 35 up Sand Mountain.

While working on the bridge, Jones said he operated a jackhammer below the surface of the water in an area protected by caissons.

Working conditions were hot and wet and the job was made more intolerable by pressure differences, Jones said. One laborer died because of the pressure differences, Jones recalled.

A native of Scottsboro, Jones said he hitchhiked or walked to work each day from his downtown home and managed to save $105 that summer. His good friend and coworker, the late Houston Davis, encouraged Jones to apply the money toward college because, the former congressman said, "there would still be plenty of bridges left to build" after college.

While at the University of Alabama, Jones said he worked at "Pugs" Restaurant and also worked in the school's athletic department publishing football programs. He also was business manager of the Corolla—Alabama's yearbook.

Jones and his wife, Christine, presently reside in Scottsboro.

FARM CREDIT SYSTEM HEARINGS

Mr. HELMS. Mr. President, I read with great interest the remarks this past Wednesday of the distinguished Senator from Oklahoma [Mr. BOREN] concerning the postponement of hearings on the difficulties confronting the Farm Credit System.

No one is more concerned about the current situation of the System or more eager to tackle this problem than this Senator. I agree wholeheartedly with Senator BOREN that this matter needs and deserves the atten-

tion of Congress at the earliest appropriate date. I have relayed to members of my committee, on more than one occasion, my strong intention to hold comprehensive hearings as soon as possible.

Mr. President, I agreed only with great reluctance to accommodate the requests of the administration, the Farm Credit Administration and the leadership of the Farm Credit System to postpone temporarily our hearings. Furthermore, as my committee knows, I attempted to schedule hearings in late September, but was asked by the System to wait until this week so they could be fully prepared to present testimony on their current financial situation and offer specific legislative proposals.

Mr. President, my decision to delay, for a short time, the commencement of our hearings was made only after being convinced that to have proceeded this week would not only have been unproductive, but could possibly lead to the deterioration of the System's ability to raise badly needed capital, at affordable cost, in the bond market. I hasten to emphasize that this is not because I expect to hear testimony that the collapse of the System is imminent, but rather because a premature hearing would produce negligible results and signal greater uncertainty to Farm Credit bond investors.

I might add that the chairman of the House Subcommittee on Agricultural Credit also recognized the necessity to postpone hearings and immediately accommodated the requests to do so. I trust no one would imply that the very able and respected Chairman ED JONES would do so for any other reason than great concern and sensitivity to the complex issues involved. I understand that it has been Mr. JONES' intention from the beginning to separate the farm bill from the Farm Credit System issues and I commend him for it.

Indeed, I agree with Senator BOREN that the problems facing the System are serious. But for that very reason we must proceed with thoughtful consideration to ensure that we not take precipitous action that would be detrimental to farmers who depend upon the System for a dependable line of credit. We must not ignore the obvious fact that even slight increases in the cost of Farm Credit bonds are soon reflected in higher interest costs to the very farm borrowers we are trying to assist.

Mr. President, I say without hesitation that while the problems facing the System are difficult, they are manageable. I fully anticipate that we will have viable options to consider in my committee in the very near future and I intend to expedite our reporting a bill to the full Senate.

With all respect, I must take exception with those who believe it is essential that we have a comprehensive solution to our agricultural credit problems before completing action on the farm bill. In fact, quite the opposite is true. Farmers must know what price they can expect from their crops before a thorough understanding of the credit situation can be achieved. To delay action on the farm bill will in no way further our efforts in reaching a sound, fiscally responsible solution to the farm credit problems.

Again, let me say that it is unfortunate that hearings on the Farm Credit System had to be again delayed. However, I assure all Senators that this is an issue of top priority with me and the Agriculture Committee. We will proceed with the consideration of it at the earliest appropriate date.

Mr. President, I ask unanimous consent that the text of letters from Under Secretary Frank Naylor, Gov. Donald E. Wilkinson, and Mr. Delmar Banner requesting postponement of our hearings be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
Washington, DC, October 15, 1985.

Hon. JESSE HELMS,
Chairman, Committee on Agriculture, Nutrition, and Forestry, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: I am writing to request your consideration in rescheduling this week's Agricultural Committee hearings concerning the operational status of the Farm Credit System.

On Friday, October 11, Secretary of Treasury James Baker, OMB Director James Miller, and I met with representatives of the operating leadership of the Farm Credit System and the Governor and Senior Deputy Governor of the Farm Credit Administration. The meeting was held to demonstrate the Administration's concern with the condition of the Farm Credit System's operating system.

On Friday, October 11, Secretary of Treasury James Baker, OMB Director James Miller, and I met with representatives of the operating leadership of the Farm Credit System and the Governor and Senior Deputy Governor of the Farm Credit Administration. The meeting was held to demonstrate the Administration's concern with the condition of the Farm Credit System's operating system.

During the course of the meeting, Secretary Baker indicated that the Administration was prepared to support a legislative package to deal with the organizational and regulatory reforms needed by the Farm Credit Administration and to improve the system's ability to pool its own resources to assist in managing its current problems.

The operating system reported to Secretary Baker that independent audit data would not become available until October 23 at which time operating results through the third quarter would be available for evaluation. This and other sources of financial information are vitally important in providing the Administration, the Congress and the Farm Credit Administration with a more complete and accurate picture of the system's current and future operating conditions. It is the Administration's view that this data and an independent analysis of all available financial information are necessary to assess what additional measures, if any, may be appropriate.

Indicative of the Administration's concern, Secretary Baker has asked the Farm Credit Administration and the Farm Credit System to meet with an Administration working group to discuss further each of these issues and to develop the soundest possible assessment of current operating conditions.

Secretary Block and Secretary Baker are very much aware of your concern and commend you on your leadership in scheduling hearings to evaluate the Farm Credit System's status. The Administration believes that it is important to provide Congress with the soundest analysis that can be developed to assist you and the Congress in its oversight of the current operating problems of the Farm Credit System.

The Administration will appreciate your favorable consideration of this request and stands ready to work closely with you on this matter.

Sincerely,

FRANK W. NAYLOR, Jr.,
Under Secretary for Small Community and Rural Development.

FARM CREDIT ADMINISTRATION,
McLean, VA, October 16, 1985.

Hon. JESSE HELMS,
Chairman, Committee on Agriculture, Nutrition, and Forestry, United States Senate, Washington, DC.

DEAR MR. CHAIRMAN: We request that the hearing scheduled for October 17 be postponed.

Secretary James Baker met last Friday with Farm Credit System representatives and with the Farm Credit Administration as regulator of the System. He asked that the Administration be provided more complete information prior to any hearings so that it may develop more fully its position on the key issues likely to arise.

We appreciate your assistance in this matter.

Sincerely,

DONALD E. WILKINSON,
Governor.

THE FARM CREDIT COUNCIL,
Washington, DC, October 16, 1985.

Hon. JESSE HELMS,
Chairman, U.S. Senate Committee on Agriculture, Nutrition and Forestry, Russell Senate Office Building, Washington, DC.

DEAR MR. CHAIRMAN: We thank you for agreeing to hold hearings so expeditiously on problems of the Farm Credit System. Since the hearing date was announced, the Administration has asked for a delay in order to review Farm Credit third quarter financial figures, which will be available by October 23. While the situation is extremely urgent, to postpone the hearing for a short time in order to have the most current numbers available for consideration is a reasonable and sound request, and one with which we concur.

We look forward to hearing from your staff on this and if we can be of any assistance in the meantime, please advise us.

Again, we thank you for your consideration.

Most sincerely,

DELMAR K. BANNER.

CALL TO CONSCIENCE

Mr. PRESSLER. Mr. President, as a participant in the 1985 Congressional Call to Conscience, I have the honor of calling attention to the tragic heroism of Iosif Radomiselsky. Iosif, like many other Soviet Jews, has worked hard to perpetuate Jewish culture and traditions through the teaching of the Hebrew language. His Hebrew instruction to young Jews at Leningrad and his protest over arrests and imprisonments of fellow Hebrew instructors have brought grave consequences on his family.

Iosif first applied for permission to emigrate to Israel in 1979. Upon this request, he was immediately fired from his job as a computer engineer and denied emigration at regular intervals. The termination of his job has resulted in great economic hardship for Iosif and his family. He is now forced to work as a hospital orderly and at part-time odd jobs for extremely low wages. Iosif's parents are also refuseniks who wish to emigrate to Israel, but they also have been denied. They share their meager pensions with Iosif and his wife, Inna. His mother, who first suffered a severe heart attack in April 1982, and spent several weeks in the hospital, has had similar attacks since then which require immediate medical attention. The frequent, unexplained disconnection of their telephone places her life in great peril.

In December 1982, Iosif was issued a final refusal by the Leningrad OVIR which prohibits him from reapplying for an exit visa. He and thousands of other Soviet Jews are being held prisoners in their own country, unable to escape the heavy burden of oppression that has been placed disproportionately upon the 1.81 million Jews in the Soviet state. Soviet Jews are mysteriously fired from their jobs, they are humiliated and harassed by the KGB, and they are denied the emigration right that would unite them with family and friends and give them the opportunity to enjoy the basic human rights we often take for granted.

Iosif continues to instruct Jewish children in the Hebrew language despite the substantial risk to himself and his family. As is the case in most religions, training of children is very important, and knowledge of the Hebrew language is an essential part of the practice of Judaism. Officially approved instruction of Hebrew has been made virtually inaccessible to Soviet Jews, and it is the only language so stringently restricted in the Soviet Union.

Other blatant anti-Semitic measures also threaten the survival of the Jewish culture and religion in the Soviet Union. Only 57 synagogues remain in the Soviet Union, which equates to 1 synagogue per 31,770 Jews. Moreover, most of these synagogues are disproportionately located in the least populated Jewish areas. Worship services, called minyanim, are held in private homes only by special permission. In the past few years, a mere three Soviet Jewish students selected by the Soviet authorities have been approved for rabbinical training at the seminary in Budapest.

It has been 9 months since we began the 1985 Congressional Call to Conscience on Soviet Jewry, but the denial of fundamental freedoms for Soviet Jews has occurred for many years. Our moral and ethical outrage should not diminish as long as these people are denied free practice of their religion and the right to emigrate. Just as refuseniks such as Iosif Radomiselsky courageously struggle to maintain their cultural and religious identity, we must not waiver in our persistent denunciation of the human rights violations occurring in the Soviet Union.

YEAGER AIRPORT

Mr. BYRD. Mr. President, Brig. Gen. Charles E. Yeager, retired, was the first man in history to fly faster than the speed of sound. As a test pilot, General Yeager made significant contributions to the progress of aeronautics and contributed as well to America's space effort. In his recent best-selling autobiography, General Yeager relates details of his career and other interesting antidotes and insights from an exciting and often unconventional life. Certainly, Chuck Yeager has enjoyed one of the more eventful personal histories of contemporary times.

General Yeager was born and reared in West Virginia, and as one of our own, West Virginians take pride in the success and fame that he has won for himself and brought to our State. Reflecting that pride, the decision was made recently to rename the Kanawha County Airport near Charleston, WV, in honor of Chuck Yeager.

On Monday, former Senator Jennings Randolph and I were privileged to take part in the renaming ceremonies for the Yeager Airport. I ask unanimous consent that the remarks that Senator Randolph and I delivered on that occasion be included in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF JENNINGS RANDOLPH AT THE NAMING OF THE KANAWHA AIRPORT IN HONOR OF CHARLES E. YEAGER

"I dipt into the future far as human eye could see; saw a vision of the world, all the wonder that would be saw the heavens fill with commerce, argosies of magic sails; pilots of the purple twilight, dropping down with costly bales."

This prophecy, written by Lord Tennyson in 1842, has come to fulfillment in large measure because of the pioneering accomplishments of the man we honor today.

On this date, thirty-eight years ago, Captain Charles E. Yeager, a young Air Force test pilot, climbed into an experimental flying ship at Muroc Dry Lake, California, and made aerospace history. Captain Yeager, after distinguishing himself in aerial combat over France and Germany in World War II, flew a small rocket-powered aircraft, the Bell X-1, named "Glamorous Glennis" after his lovely wife, through the sound barrier.

Charles Yeager became the first man to fly at the velocity of Mach I, faster than the speed of sound. His historic flight, following many months of tests and evaluation of the unknown, opened a new era in world aviation. Today, supersonic speeds are commonplace. But on that crucial date there were many scientific authorities who remained convinced that man could never hope to achieve or survive supersonic speeds.

He established another speed record on December 12, 1953, by flying over two times the speed of sound in a Bell X-1A.

Charles Yeager crossed uncharted boundaries. He enabled others to follow and expand the limits of man's opportunities. He revolutionized the field of aviation, opening the door to more rapid space exploration programs.

I had the privilege of insuring that Chuck Yeager's accomplishments could be appropriately recognized. On June 20, 1975, the 112th anniversary of West Virginia's statehood, my alma mater, Salem College, presented Chuck with it's "Mr. West Virginia" award and conferred on him an honorary degree of aeronautical science.

In late 1974 and early 1975, I introduced in the Senate bills to authorize the President of the United States to present to Brigadier General Yeager a Medal of Honor. The Congress enacted—and the President signed into law on December 23, 1975—a bill authorizing the awarding of a Silver Medal, described as the "equivalent to a noncombat medal of honor."

It was gratifying to have had these opportunities to participate in recognizing the achievements of Charles Yeager. Now, I am especially privileged to be a part of this program which will result in a lasting memorial to him through the naming of our capital city's airport in his honor. I commend the Central West Virginia Regional Airport Authority for taking this initiative.

Our honoree epitomizes the spirit of service, sacrifice, courage and purposeful venture for which West Virginians are deservedly known.

Brigadier General Yeager is one of those fortunate men who—"has slipped the surly bonds of Earth and danced the skies on laughter silvered wings;

"Topped the windswept heights with easy grace, where never lark or eagle flew * * *

"And trod the high untrespassed sanctity of space, put out his hand and touched the face of God." [1]

Brigadier General Charles Yeager—combat hero, patriot, aviation pioneer, sturdy mountaineer—we salute you; we honor you; and we thank you for being the man that you are. No person shall pass through the portals of this important aviation complex—Yeager Airport without gaining inspirations from your life.

[1] "High Flight" John Gillespice Magee, Jr.

REDEDICATION—KANAWHA AIRPORT IN HONOR OF CHUCK YEAGER

(Remarks by U.S. Senator Robert C. Byrd)

In his best-selling autobiography, General Chuck Yeager describes luck as, "the most precious commodity a pilot carries. Luck, pure and simple."

As a combat pilot and as a test pilot, Chuck Yeager may have had luck. But luck alone does not explain his achievements, or the length and success of his career. General Yeager also possesses character—and integrity and sturdiness of ideals that allowed him to achieve deeds that are not legendary.

Here in West Virginia, we are proud of what General Yeager has done—his renowned accomplishments. We are also proud of General Yeager himself. People recognize qualities in Chuck Yeager to which most West Virginians aspire. Like other noted West Virginians of the past, Chuck Yeager will be remembered as an embodiment of what is best in our West Virginia heritage.

I congratulate General Yeager on the honor and pride he has brought to our State and on the singular honor being paid him here today. I wish him a continued exciting and fruitful life in the years ahead. May he ever stand as a great example to the people of West Virginia, and to Americans everywhere.

NATIONAL SCHOOL LUNCH WEEK

Mr. DOLE. Mr. President, as chairman of the Subcommittee on Nutrition, the Senator from Kansas has been actively involved in the development of the National School Lunch Program. This program is the oldest Federal nutrition program, founded in 1946, in response to the military draft situation during World War II when potential draftees were turned down due to malnutrition.

Since that time, the National School Lunch Program has been providing nutrition input to children in participating schools throughout the country. It is in the developmental stages of infancy and childhood that good nutrition can have a major impact on a child's potential as an adult.

CURRENT SCHOOL LUNCH PROGRAM

The National School Lunch Program subsidizes the lunches of some 24 million children in over 85,000 schools throughout the country. Federal cash and commodity reimbursements are provided for lunches which meet Federal nutritional and other requirements. For fiscal year 1985, this amounted to about $3.2 billion. Federal cash expenditures for the School Lunch Program were about $2.7 billion in fiscal year 1985. Most of the cash assistance for this program—$2.43 billion—is provided for lunches served free, or at reduced price to children who meet low-income eligibility guidelines. These children currently account for about 52 percent or 12.4 million of all school lunch participants. The remaining schoolchildren, some 11.6 million, receive so-called paid lunches which are subsidized at a Federal cost of about $242 million—approximately 9 percent of the total Federal cash expenditures for the program.

CURRENT ISSUES RELATING TO NSLP

Current policy with regard to the School Lunch Program establishes some Federal responsibility for the nutritional well-being of all children, regardless of their income. In 1981, bipartisan congressional proposals were enacted into law that achieved $1.3 billion in savings for child nutrition programs in fiscal year 1982—a 21 percent reduction. These program changes actually strengthened the School Lunch Program, improved targeting and implemented many program reforms.

There is no question but that all American children should have access to proper nutrition. The real issue is who should pay for school lunches when children are not from low-income families. Many families can afford to make more of a contribution to their children's lunches.

DEDICATION OF SCHOOL LUNCH PERSONNEL

Mr. President, regardless of policy differences that may exist, those individuals who run these programs throughout the country should be commended on their dedication and commitment to the well-being of the children in their school districts. School lunch directors, and the personnel who actually prepare the food in kitchens, really do a commendable job in providing cost-effective, healthy lunches. These people are often mothers themselves, who are willing to participate personally in a program that is responsible for feeding their children—they want to make certain that the food these children eat is well-prepared and nutritious.

CONCLUDING REMARKS

The National School Lunch Program is a vital segment of the school systems in our country. If a child is hungry, or sent off to school without an adequate breakfast, that child will have difficulty learning in the classroom. Quite often, the school lunch and breakfast programs substitute attention that should be provided in the home. In addition, the nutrition education and training program helps children learn about good nutritional habits—an influence that will benefit them for life.

The National School Lunch Program is important in providing good nutrition to school-age children throughout the country. The long-range benefits from this program can only really be seen when the child has grown into an adult. Nutrition programs can be very cost-effective in providing preventive intervention that results in improved health status and saves potential medical costs. School lunches provide food to children that may not receive any other kind of nutritional input. This program should be recognized for the kind of contribution it makes to our children, who are our future generations. We should all take time to appreciate this program and the dedicated people who work with it.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. LUGAR). Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. GARN. Mr. President, we have now been in session for 1 hour. We had a unanimous-consent agreement on amendments. There are three amendments to be offered.

I suggest if Senator BIDEN or the other Senators are not here within 5 minutes to offer an amendment of some kind, I think we should go to third reading, and I will ask for third reading and final passage of the bill, unless someone is willing to offer the amendment.

I get tired of the game we play in this body of coming in early—we have done it most of this week—with very little action. If Senators want to offer their amendments, I suggest they be here to offer them or we will go to third reading.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. GARN. Mr. President, I withhold that request.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

HUD APPROPRIATIONS, 1986

The PRESIDING OFFICER. The clerk will state the pending business.

The assistant legislative clerk read as follows:

A bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes.

The Senate resumed consideration of the bill (H.R. 3038).

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GARN. Mr. President, it is my understanding that an amendment was to be called up at 8:30 a.m. with 15 minutes on each side in accordance with the unanimous-consent agreement. Is that correct?

Mr. DECONCINI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Utah has the floor, and the Chair is in the process of responding to the parliamentary inquiry.

Mr. DECONCINI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Utah has the floor. Does he yield for the purpose of the Senator from Arizona suggesting the absence of a quorum?

Mr. GARN. I have not yielded. I propounded parliamentary inquiry and I wish to have the answer from the Chair.

The PRESIDING OFFICER. The order was for the Senator from Alaska [Mr. MURKOWSKI] to be recognized to offer an amendment on which there shall be 30 minutes equally divided and controlled of debate when the Senate returns to the pending business.

Mr. GARN. We are on the pending business. That is the regular order.

Mr. DECONCINI. Mr. President, I suggest the absence of a quorum. There is not a working quorum here.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. DECONCINI. Mr. President, I thank the Chair for calling the roll.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 808

(Purpose: To maintain the level of funds restored to the Veterans' Administration medical care account)

Mr. MURKOWSKI. Mr. President, on behalf of myself, Senator CRANSTON, Senator DECONCINI, and others, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Alaska [Mr. MURKOWSKI], for himself, Mr. CRANSTON, Mr. DECONCINI, Mr. DENTON, Mr. BYRD, Mr. THURMOND, and Mr. ABDNOR proposes and amendment numbered 808.

At the end of the bill, add the following section:

SEC. . Notwithstanding any other provision of this Act (including any provision reducing certain dollar amounts by a specified percentage), the appropriation made by this Act for the Veterans' Administration for "Medical care" shall be $9,228,694,000.

Mr. MURKOWSKI. Mr. President, yesterday, Senator CRANSTON—who, regrettably, cannot be with us today, but who is represented by a principal cosponsor, Senator DECONCINI—and I reached an agreement with the distinguished chairman of the Appropriations Subcommittee, Senator GARN, to restore $100 million VA medical care account level beyond the level in the amendment to H.R. 3038 that has been proposed by Senator GARN. My amendment was adopted by the Senate. The net result of this agreement was a reduction from H.R. 3038, as reported, of $196 million in budget authority for VA medical care. This modification was accepted by Senator GARN and adopted later by the Senate.

After agreeing to this reduction of $196 million for the VA, it is unthinkable now to revisit this issue as to the VA in the form presented to the Senate by the 1.1-percent across-the-board amendment proposed by my distinguished colleague and chairman of the Budget Committee, Senator DOMENICI, and adopted earlier. An additional 1.1-percent cut in VA medical are would have an adverse impact on the VA's health care delivery system. I am advised, by the VA's Chief Medical Director, that such a cut would result in a reduction in substantial medical care employees and a concomitant reduction in the number of veterans who will receive health care.

Yesterday, Senator CRANSTON spoke about the Chief Medical Director's projections in this regard, and I do not believe those statistics need repeating today.

Senator DOMENICI's amendment is born out a great deal of frustration in this body. I understand and support the efforts of my esteemed colleague to restrain spending and have appropriations be consistent with the levels adopted in the budget resolution. I support appropriations for the VA that reflect the spending levels agreed to in the budget resolution. But, in an effort to accommodate Senator GARN's intent to keep the HUD bill within the limits of the budget resolution, I agreed reluctantly in my amendment to a VA medical care appropriation that would be below the ceiling agreed to for the VA function 700 in the budget resolution. I want to emphasize—the net result of my earlier amendment is that the VA is already below the function 700 levels agreed to in the budget resolution.

This further, across-the-board reduction of 1.1 percent will result in an additional cut of slightly over $100 million in medical care. In fact, this amendment leaves us $700,000 poorer than we were yesterday morning.

Mr. President, I believe that veterans should share equally in dificit reduction efforts. But to require such additional deep cuts in VA medical care would go way beyond equity. And let there be no mistake about it—veterans have received their share of the cuts this year and in previous years as well. Two very significant policy changes were made by my committee to meet our reconciliation instructions. The implementation of a means test and third party reimbursement will achieve in excess of $1.15 billion in savings over the next 3 years and help keep VA health costs down. These were major and most significant steps. The vast majority of service organizations have graciously accepted these policy reforms in recognition of the need to do their part to reduce the deficit.

Therefore, Mr. President, I am forced to offer an amendment with Senator CRANSTON, Senator DECONCINI, and others to modify Senator DOMENICI's across-the-board reduction to restore sufficient funds to VA medical care in order to reflect the funding level of $9,228,694,000 agreed to by the Senate in our amendment this morning. My amendment would only restore funds for VA medical care. Other VA discretionary programs, such as construction, would be subject to the 1.1 percent across-the-board reduction. I urge my colleagues to join me in adopting the amendment.

I yield to my colleague, Senator DECONCINI, at this time, a principal cosponsor of the amendment.

Mr. DECONCINI. Mr. President, I thank the distinguished chairman of the Veterans' Committee.

Mr. President, this amendment would simply restore to the Veterans' Administration medical care account the net level of funding which the Senate agreed to yesterday morning when it adopted the modified amendment of the chairman, Mr. MURKOWSKI, and the ranking minority member, Mr. CRANSTON, of the Veterans' Affairs Committee. I was pleased to cosponsor that amendment and the modification to it and was also pleased that the distinguished chairman of the Appropriations Subcommittee on HUD-Independent Agencies, Mr. GARN, and its ranking minority member, Mr. LEAHY agreed to it.

Unfortunately, however, that amendment, which the floor managers agreed to and which was adopted without opposition, has now been vitiated by the across-the-board amendment cutting 1.1 percent from each of the discretionary accounts in the HUD bill, including the VA's medical care account. That took away $100.7 million from the VA medical care account which amount, when added to the

$196-million cut we agreed to yesterday morning as a fair share of necessary reductions, means that as of now veterans medical care has been reduced from the committee-reported level by $297 million. That's too much, too deep of a cut.

Mr. President, the debate this morning on the Murkowski-Cranston amendment made clear the great importance of retaining the amount—$9,162,694,000—to which the medical care account was then restored. That is the absolute bare minimum which could possibly enable the VA to maintain the health-care staffing level—193,941 FTEE's—for which Congress appropriated funds in fiscal year 1985 and which the House of Representatives and the Senate Committee on Appropriations in the bill as originally reported intended under this bill.

That amount—which our amendment would maintain—is also the absolute bare minimum which could possibly enable the VA to maintain the quality of staff it needs and to achieve the patient-care workloads that it projects for fiscal year 1986.

Thus, Mr. President, it is essential for my colleagues to be aware that the reduced funding level brought about by the 1.1 percent across-the-board cut will result in sharp cutbacks in VA programs. It would force the VA to cut thousands of employees from its health-care staff, provide care to tens of thousands fewer veterans, and, possibly, delay the activation of facilities scheduled to be brought on line in fiscal year 1986 and fiscal year 1987. As was pointed out yesterday morning by Senator CRANSTON, according to information provided by the VA Chief Director's Office, cutting the VA medical care account to where it was before the adoption of the Murkowski-Cranston amendment, would compel the VA to make a personnel cutback of about 1,900 full-time-employee equivalents—FTEE's—in fiscal year 1986. This would result in reductions of 16,000 episodes of hospital care and 72,500 outpatient visits for veteran-patients. Also, according to the Chief Medical Director's Office, that appropriations level would force an $82.5-million cut—almost 50 percent of the $170 million provided in the total bill for this purpose—in equipment which is scheduled to be purchased in fiscal year 1986 to activate facilities in fiscal years 1986 and 1987. There are 95 such projects in 33 States.

Alternatively, if the VA were to decide not to delay these activation-related purchases, it would have to reduce its health-care staff by an additional 2,000 FTEE's and its patient-care workload by an additional 17,700 episodes of hospital care and 80,000 outpatient visits.

That would be a total staffing reduction of nearly 4,000 and cuts of more than 33,000 episodes of hospital care and 152,000 outpatient visits.

Mr. President, I strongly reject both of these alternatives—and yesterday morning the Senate rejected them also. We did the right thing by our Nation's sick and disabled veterans earlier today, and we should now do so once again.

In closing, Mr. President, I want to emphasize that this amendment is a very prudent one. It would restore the VA medical care account to a level which is $166 million below the amount originally proposed by the Appropriations Committee and which had strong bipartisan support this morning. It still deserves that support. Therefore, I urge all of my colleagues to vote for this amendment.

Mr. President, we are faced with a dilemma today, because the distinguished chairman of the Veterans' Committee, Mr. MURKOWSKI, and Senator CRANSTON worked out an arrangement yesterday add $100 million to the VA medical care. That was agreed to by the distinguished chairman of the subcommittee and the Senate adopted it by voice vote.

Now, we are faced with a cut of $100 million. The Senator from Alaska deserves the heartfelt thanks of not only the veterans of this country but of every Member of this Senate in adding back to this bill the absolute minimum amount of dollars that are necessary to maintain the veteran health care system.

The Senator from California cannot be here today, but he is the one, along with the Senator from Alaska, who has insisted that we end up with a net of $100 million in the VA health care account.

The reason this particular amendment has the figure that it has in it is that the only way to get the $100 million net is to add $166 million in at this time in anticipation of an across-the-board cut if the amendment is adopted. So I am hopeful that those who might be listening and those who come over realize that we are not busting the budget. We are providing the minimum, bare minimum dollars for, health care for the veterans of this country. And if you vote this down, they are going to suffer. I do not think that it is the intent of any Member in this body to take away the dollars necessary to provide that health care to the veterans of this country.

Mr. MURKOWSKI. I thank my colleague from Arizona. I think some explanation is probably in order to again run through just what occurred yesterday. In the original plan there was a cut of $296 million in veterans' appropriations. The amendment which I introduced yesterday put back $100 million, so the net cut to veterans was $196 million. And then there was a proposed 1.1 percent across-the-board cut, which was an additional $101 million. Therefore, the veterans' cut was roughly $290 million.

What we are proposing this morning is to re-establish the previous level by adding $166 million to the Veterans' Administration health medical care area. We have talked to the VA this morning and asked if they had any flexibility within their programming for veterans' health care. There is some flexibility, but the flexibility is in other areas, and they have a great concern about taking a cut as proposed if indeed there is likely to be another across-the-board cut as there was yesterday by Senator DOMENICI, which he felt was necessary to achieve the appropriate budget levels. And what that would do, obviously, would cut back further veterans' care medical care accounts.

And the significance of what the obligation is to our veterans in that area needs no repeating from this Senator. So what we are faced with is a rather unusual dilemma of estimating what across-the-board percentile cut might be indicated by the chairman of the Budget Committee and anticipating that it might be a half of 1 percent on $9 billion in VA medical care. We have arbitrarily added in $66 million in anticipation of such an amendment. The chairman of the Budget Committee is not in the Chamber at this time. As a consequence, we have no definitive knowledge of what that across-the-board percentile cut might be.

So this was submitted in anticipation. I want to make sure my colleagues understand that the increase this morning was originally $100 million, and then anticipating the half of 1 percent cut $66 million additional was added on. As chairman of the Veterans' Affairs Committee—and I am sure my colleague, Senator DECONCINI would agree—if that figure is reduced to less than half of 1 percent, we would modify our amendment and reduce it accordingly. Or if the chairman should choose to exempt veterans' medical care, of course we would not put in that amount.

I yield to the floor manager, Mr. President, at this time, or my colleague, the Senator from Arizona.

Mr. GARN addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah.

Mr. GARN. I know I am going to be very repetitious because the argument has not changed on this bill for weeks. But I will state them one more time. We received a budget ceiling as a result of this body and the House of Representatives passing a budget resolution. Therefore, through the appropriations process we established ceilings for each subcommittee. The subcommittee chairman and ranking minority member, Mr. LEAHY, and I felt very strongly that we should meet those targets as voted by the whole

body of the Senate. We did that. It was a painful process. But it was a carefully thought-out process recognizing that we have not just HUD and independent agencies—those independent agencies represent a lot of different types of interests: the National Science Foundation, science education, the Environmental Protection Agency, Superfund, National Aeronautics and Space Administration, VA medical care, revenue sharing, a broad diversity of interests, all of them very important programs, and most of them dealing directly with people, their health, and their safety. So there are difficult choices to be made.

In order to meet that budget ceiling we tried, rather than just saying, OK, let us take percentages to work with the agencies to try to find out where the most equitable ways are to cut. That does not mean that is an exact percentage out of each one. Some of them have different priorities.

We worked very hard at that, recognizing that not one single agency would like any cuts but if we were to meet these budget totals we had to do it. We took $81 million out of Indian housing; $42 million out of HUD rehabilitation, rental rehabilitation, $50 million.

I will not take the time to go back through the whole list.

These are people programs. We are talking about putting people in low-income housing. We are talking about cleaning up hazardous waste sites around this country. Many of these programs do not spend out very fast. Though in a particular year you can cut a lot of budget authority, and not get much savings. But we had to get savings of $800 million that started last October, October 1, 2 weeks ago until next September 30.

The two that spend out the fastest happen to be VA medical care and general revenue sharing. We chose in the committee more than half of those cuts out of general revenue sharing, not because we liked it but because the program is discontinued in a year anyway. And in relation to priorities, when you are looking at general revenue sharing versus VA medical care, versus EPA, versus research and development, science education for teachers and young people in this country, math, chemistry, and important things like that we felt we could scale 12.5 percent back, one-eighth—one-eighth—of revenue sharing, and they could take their share along with all of these other agencies that we took money out of.

But the Senate yesterday, because the mayors were so effective in their lobby over the weekend, decided not to do that. We would not be here today—I made a compromise with the veterans to put back in $100 million which I was very happy to do. I had no objection to that. I could accept that offer easily and quickly. It took me about 30 seconds to make that decision yesterday. But some of the very people today who are so concerned about veterans' care and will vote to put this money back in were the same ones who would not recognize yesterday that it created a problem for veterans if we would not touch general revenue sharing. I outlined exactly what would happen all day long—that, if we defeated or passed the Durenberger amendment, this is what would happen. The Budget Committee would come back with unfair across-the-board cuts. Nobody listened. Nobody listened.

But that is the substance of the argument today from my friend and colleague from Alaska. It is unfair to cut this additional amount of money out of veterans. He is right. But where were those people yesterday when it was unfair to take it out of mayors. If this amendment passes today, yesterday it was general revenue sharing that cannot be cut, and that impinges on veterans. Now if we put the money back in for veterans, where is that money going to come from? It is not additional money. We are going to meet the budget targets. But $166 million is going to come out of Indian housing, modern rehab, HODAG, rental rehabilitation. If we put it back in for veterans, why should not every one of these people, EPA research and development, abatement control and compliance, Superfund, disaster relief and FEMA—do not worry about the people with floods and so on. We are going to take it out of them. We are going to apportion this $166 million out of all of those other agencies, say the hell with them, we are not concerned about you, and we are more concerned about veterans. I am concerned about veterans, too. I am a card-carrying member of the VFW and the American Legion. I spent 24 years in the military. I am not going to take a back seat to anybody in my support of veterans.

But let us not vote for budget resolutions, say we are going to meet budget targets, and then not have the courage to vote for those individual appropriations. Let us quit having it both ways. I suggest the voters of America ought to start checking on how we vote, not just on the big votes but see whether we vote the way we vote, but to see whether we vote on individual spending totals the way we do on an overall ceiling. They are going to find out there is a lot of demagoguery in this body, and they ought to. They are not easy choices. If anybody thinks I like to be standing up here talking about veterans health care, oh, boy, I really looked forward to that last night. I thought about how fun it would be to come to the Senate this morning and talk against health care for veterans.

As chairman of this subcommittee I have some responsibility to those that need cleanup under Superfund. I have some responsibility for science and education for young people in this country. I have some responsibility to Indians that need housing in this country on some of the reservations. Talk about bad housing. The Senator from Arizona knows all about it. We share some Indian tribes over the Utah and Arizona border. You think we have problems of housing in the cities. Look at some of the reservations in this country, and rental rehabilitation for some of the rundown housing in the poor cities of this country.

I want my colleagues to know that is the kind of choice we are making. If that is what you want to do, if you want to say we have decided veterans are more important than all of these other people in this budget, fine, so be it.

That is where we are. That is where we were yesterday. That is where we were in the committee, in the subcommittee. That is where we have been for 3 or 4 months—making some tough choices.

Yesterday nobody even wanted a rollcall vote on this cut. They voted to make this cut in veterans along with everybody else. Let us see how they act on it individually.

I am sorry we are in this position. I am sorry Congress has been irresponsibly spending for 35 years. I am sorry we have a $2 trillion debt. I am sorry we spent $142 billion on debt service on the national debt. I am sorry the budget has gone from $300 billion when I first got here just 10 years ago to a trillion.

But if anybody is kidding themselves, that is why we are here today having these kinds of difficult choices because we have not been willing to make them in the 10 years I have been here, never looking beyond the current election cycle, never looking beyond today's press release, never looking beyond yesterday's lobbyists out there in the hall, thinking some of these problems will go away.

But they do not go away. That $2 trillion debt has been building up for 30 years. Unless we start making some of these tough choices and not yielding to each one of the lobbying groups that come in, what will we have, $4 trillion in the next 5 years? It will double again. We will sit here and wonder why and give speeches on reduced deficits.

I would like everybody to be chairman and ranking minority member of this committee for a while and see whether they are able to come up with any more fair recommendations and some difficult choices.

Well, I have spoken far too long again, but I just want this body to know that these are the kind of

choices we are making. If you want to choose the veterans over all these other very worthwhile programs, do it. But do it with the knowledge of what your vote is about. I feel that if this one is agreed to today, then I ought to go out and delay the final passage of this bill and stir up a lobbying effort for every one of these because they are just as deserving. We should not be robbing Peter to pay Paul. We would not be in here saying this one is more important than the other areas and we do not care where it comes from.

Well, I care where it comes from.

The Senator from Vermont has been concerned about EPA in his entire two terms in this Senate. I am sure it is a difficult choice for him. He would like to see more money for EPA. They are talking about people's health there, too. A lot of veterans maybe live near Superfund sites that need to be cleaned up.

I hope we will reject this amendment, not because I like it, not because I want to take it away from veterans. I wish the additional $100 million was in there. It should have come out of revenue sharing. If someone wants to offer an amendment today that he will take $100 million out of revenue sharing for veterans' health care, I will be on their side. I will be up there speaking for that. I have tried to do that for several weeks. If the Senator from Alaska wants to offer that amendment, I will not be opposing him. A straight trade, $100 million out of revenue sharing for veterans' health care and he will have me for a cosponsor.

Mr. LEAHY. Will the Senator yield?

Mr. GARN. I yield.

Mr. LEAHY. Mr. President, I have listened carefully to what the Senator from Utah has said here today. I do not yield to anybody in this body in my support of veterans or veterans' programs. I have worked very closely with our VA hospital in Vermont, one of the best in the East. I know how important it is to our State and how important its services are to our veterans. I have worked to bring money for medical research there so we could attract the best doctors. I have enjoyed the support that I received from veterans in Vermont over the years.

I know that there will be those who will be happy to use a vote against this amendment in political campaigns, whether against the chairman of this committee or myself as showing somehow we are antiveterans. That is wrong.

When we considered the first budget resolution, I voted to expand funding for veterans programs, and especially medical care. I regret that that amendment failed. However, because that amendment failed, the level of funds available for veterans programs are just not as high as they should be.

In spite of that vote, once we accepted the budget resolution, I believe we must play by the rules.

I think what Senator GARN and I are saying is we have to have some fiscal sanity in this bill.

Both the Chairman and I have gone down through these programs. I can make a list of programs near and dear to the heart of the Senator from Utah and programs that are near and dear to my heart. Many would be the same programs. We each looked at the whole picture. If there were no restrictions whatsoever, we could put money into them. The Senator from Utah mentioned EPA. I can think of some extra money I would like to have for EPA. I can think of some money I would like to add for some housing programs that I support. I can think of some money for veterans' affairs that I would like to add. This is the third largest budget in the Appropriations Committee.

I have some matters that would be of great political benefit to me in Vermont if they were added, but we did not add them because we have to keep within a budget limit.

We can talk about where we are going to balance the budget or how we are going to bring down the deficits and give great speeches. I think our speeches would almost be interchangeable, whether Republican or Democrat or what part of the country we are from. But ultimately you have to stand up and make the tough choices. This is going to be one of them.

I will join with the Senator from Utah in opposing this amendment. We do not oppose veterans. We do not oppose veterans programs. We do not oppose EPA or EPA programs, NASA or NASA programs, or HUD or HUD programs.

We favor a great number of these programs. All these programs that we support we have cut. Veterans programs are no different. We have not cut veterans programs because we oppose them. We just must live within fiscal limits to which the Congress has agreed in the budget resolution.

The PRESIDING OFFICER. All time has expired.

Mr. LEAHY. Mr. President, I did not realize there was a time limit. If I have taken time unnecessarily, I apologize.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I did not know about the time limit. I ask unanimous consent that I may proceed for not more than 2 minutes.

Mr. MURKOWSKI. How much time remains on my side, Mr. President?

The PRESIDING OFFICER. Four minutes.

Mr. MURKOWSKI. I will yield 1 minute.

Mr. EXON. I do not happen to be on the side of the issue of the Senator from Alaska. I want to make that point clear. That is why I asked for 2 minutes to proceed.

The PRESIDING OFFICER. Is there objection to the request for 2 minutes? Without objection, it is so ordered.

Mr. EXON. I thank the Chair.

Mr. President, the politically popular thing to do, I advise my colleagues, is to vote for the measure before us. I think we all have known, to paraphrase an old political idiom, little care what we do here, but many care how we vote here.

Votes are good political fodder for those who want to fatten their own demagoguery back home.

Like my friends, I salute the managers of this bill for their courage in standing up now. I would simply say that those of us who did not vote for Gramm-Rudman, that famed amendment, could easily support the amendment before us and not be hypercritical. Those who voted for Gramm-Rudman had better start biting the bullet now.

I would think that a little careful thought would be—and playing second fiddle to no one with regard to my respect for veterans because I am one myself—the cut, if it is a cut that we are making in this bill, after rescinding the recommendations that were made to cut from the revenue-sharing funds, is a painful part that we are going through.

I simply say you cannot have it both ways. You are either going to cut the budget or you are not going to cut the budget. I suspect in the end that if we make the minor reduction which has been suggested in cutting veterans on a motion that passed by voice vote, Mr. President, because many did not have the courage to cast an open vote last night, if we rescind that we are back in the soup, Mr. President. I say that in the end if we make this minor reduction in veterans, it will pay off in the future. I can assure you, Mr. President, many more cuts are coming. If we make a minor cut in veterans' affairs now, it could spare major cuts later. Therefore, I hope that the amendment fails.

Mr. DECONCINI. Mr. President, I ask the Senator from Alaska to yield 2 minutes.

Mr. MURKOWSKI. Mr. President, how much time remains?

The PRESIDING OFFICER. One minute remains.

Mr. MURKOWSKI. I yield 1 minute to the Senator.

Mr. DECONCINI. Mr. President, I thank the Senator.

I want to respond to the Senator from Nebraska. He calls this demagoguery. I disagree with that. I want the Senator from Nebraska to know, as well as other Members here, that this committee has already taken a

$297 million cut in health care benefits for veterans. If he thinks that is fair, if that is what the Gramm-Rudman-Hollings amendment was—and I voted for it—I do not think so. I think it is up to this body to make a determination. When we have hit the veterans already with a $297 million cut, I do not think it is demagoguery; I think it is standing up for what is correct about this body and what the Senator from Nebraska and others have constantly stood for.

I ask the Senator from Alaska if he will clarify a couple of points: Is it not correct that the Appropriations Committee reduction was $296 million below the reported amount?

Mr. MURKOWSKI. The Senator from Arizona is correct.

Mr. DECONCINI. Then, is it not correct that $100 million of that was added back with the acquiescence and support of the distinguished chairman and the ranking member of the subcommittee, yesterday?

Mr. MURKOWSKI. That is correct. My amendment put back $100 million.

Mr. DECONCINI. Then, is it not correct that, yesterday, when the Domenici-Chiles amendment passed with a 1.1-percent reduction, the Senate once again reduced it?

Mr. MURKOWSKI. The Senator is correct.

Mr. DECONCINI. I think we have a case here that stands on the merits; that we are not busting the budget, we are putting it back to where the arrangement was yesterday. Senator CRANSTON of California and Senator MURKOWSKI of Alaska very diligently worked out the minimum amount necessary for veterans in this appropriations bill.

I suggest to my colleagues that we pass this modest amount of money. We are not busting the budget. We are only leveling out what the Senate did yesterday. I hope my colleagues will support the amendment of the Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I thank my friend from Arizona. As chairman of the Senate Veterans' Affairs Committee, I share in the remarks regarding committee responsibility as indicated by my friend from Utah. I, too, of course, have an obligation as chairman of this committee to represent the veterans of this country as a primary responsibility of my committee chairmanship.

I would like to make it very clear that the increase of $66 million is added only in anticipation of an additional amendment that would reduce the $100 million by $66 million. The purpose of my amendment is simply to have a net addition of $100 million to VA medical care.

The $66 million is in anticipation of an across-the-board cut which we anticipate the Budget Committee chairman will probably institute.

Mr. President, as my colleagues reflect on just where the priorities are, all I can do is appeal to them individually to examine the various areas where cuts are going to have to be taken. I urge the passage of the amendment as proposed in keeping with the responsibility which we have to meet our obligation to the veterans of the country.

RESTORATION OF VA MEDICAL ACCOUNT FUNDS

Mr. DENTON. Mr. President, I rise as a cosponsor of Senator MURKOWSKI's amendment to restore to the veterans medical care account the discretionary funds that were deleted by the Domenici-Chiles 1.1-percent across-the-board reduction amendment which was approved by voice vote.

During the budget reduction frenzy, it is essential that we keep firmly in mind the priorities that the Congress has honored for decades. Honoring the commitment to the veterans of our country is one of those priorities.

All too often we get caught up in deleting funds for the necessary, the fruitful, and the worthwhile, when we should be taking the scalpel to the extraneous, the frivolous, and the wasteful.

Veterans are being punished as a result of the negligence of the U.S. Senate. The money that this amendment will restore will go to the essential medical services such as physicians and medical supplies.

The Veterans' Affairs Committee has conducted hearings throughout the year in its effort to produce a fair and equitable VA budget. During those hearings, the committee received testimony from the Veterans' Administration, veterans service organizations, the OMB, and the CBO. We were forced to make hard choices on funding levels for programs, and our choices reflected hours of painstaking deliberation and research.

The across-the-board cut will affect the day-to-day operation of the VA. Admittedly, that aspect is not as glamorous a part of the Veterans' Administration as new hospitals are, but it effects the quality of care that our veterans receive.

The veterans of our country, especially those who are combat and service disabled, deserve every benefit and service that they receive from the Federal Government. A massive cut in the veterans medical account would be an unwarranted slap at our veterans, particularly in view of the programs that the Congress has supported for veterans over the years.

Clearly, the Veterans' Administration is already bearing at least its fair share of the burden of reducing the deficit. I agree that the deficit is enormous, and I do not believe that there is a Senator in this Chamber who wants to reduce the deficit more than I do, but it would be a grave mistake to reduce the deficit at the cost of essential services to our veterans and make them absorb a disproportionate share of cuts. We should not penalize those who have done so much to preserve the peace that we now enjoy.

I urge my colleagues to support the amendment.

Mr. BYRD. Mr. President, the HUD appropriation bill approved by the Senate Appropriations Committee on July 30, 1985, included two proposals relating to VA medical care which I sponsored and which would affect West Virginia's four Veterans' Administration medical centers. My first request restored 5 percent to the VA budget for the Nation's medical centers, including West Virginia facilities in Clarksburg, Martinsburg, Beckley, and Huntington. This action was taken to reverse the administration's budget proposal earlier this year to cut funding for all VA medical facilities by 5 percent.

A second proposal which I sponsored and which the committee approved, provided language in the committee report to correct a staffing deficiency at Huntington's VA medical center, which, according to a recent VA report undertaken at my request, is suffering a 23.7-percent staffing deficiency.

I am pleased that the VA Administrator, Mr. Harry Walters, at my request, sent a task force to the Huntington VA Medical Center to verify the magnitude of the staffing problem. I am also pleased that the committee report has urged the VA to expedite the resolution of this inequity and report back on the remedial action which the VA will take, along with any significant milestones by which to measure the progress.

In a subsequent meeting of the Senate Appropriations Committee, a reduction in the funds for VA medical care was adopted. I opposed this reduction, and yesterday I cosponsored an amendment proposed by the distinguished chairman [Mr. MURKOWSKI], and ranking minority member [Mr. CRANSTON], of the Veterans' Affairs Committee to restore $100 million for VA medical care. This amendment was adopted by voice vote.

Subsequently, the Senate adopted a 1.1-percent across-the-board cutback provision to bring the total amount in the bill into conformity with the budget ceiling. Unfortunately, the across-the-board reduction had the effect of eliminating the $100 million for VA medical care which was adopted earlier.

Today, I am cosponsoring another VA medical care amendment. This amendment is designed to add $166 million to the VA medical care budget.

In summary, Mr. President, our veterans have served their country and expect that we will provide adequate funding for the provisions of VA medical care. I intend to do everything I

can to ensure that funds are provided and I am proud to cosponsor the amendment to restore the funds. I urge my colleagues to support this amendment to restore $166 million to the VA medical care budget.

The PRESIDING OFFICER. All time has expired.

Mr. GARN. Mr. President, I move to lay the amendment on the table and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Utah to lay on the table the amendment of the Senator from Alaska. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Arizona [Mr. GOLDWATER], the Senator from Utah [Mr. HATCH], the Senator from Nevada [Mr. LAXALT], and the Senator from Maryland [Mr. MATHIAS] are necessarily absent.

Mr. BYRD. I announce that the Senator from California [Mr. CRANSTON], the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

I also announce that the Senator from Michigan [Mr. LEVIN] is absent because of death in the family.

I further announce that if present and voting the Senator from California (Mr. CRANSTON) and the Senator from West Virginia (Mr. ROCKEFELLER) would each vote nay.

The PRESIDING OFFICER. (Mr. BOSCHWITZ). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 36, nays 56—as follows:

[Rollcall Vote No. 232 Leg.]

YEAS—36

Armstrong	Exon	Lugar
Bentsen	Garn	McClure
Boschwitz	Gorton	Moynihan
Chiles	Gramm	Packwood
Cochran	Hatfield	Proxmire
Danforth	Hecht	Quayle
Dodd	Helms	Roth
Dole	Humphrey	Rudman
Domenici	Johnston	Stafford
Durenberger	Kassebaum	Symms
East	Leahy	Wallop
Evans	Long	Weicker

NAYS—56

Abdnor	Dixon	Kerry
Andrews	Eagleton	Lautenberg
Baucus	Ford	Matsunaga
Biden	Glenn	Mattingly
Bingaman	Gore	McConnell
Boren	Grassley	Melcher
Bradley	Harkin	Metzenbaum
Bumpers	Hart	Mitchell
Burdick	Hawkins	Murkowski
Byrd	Heflin	Nickles
Chafee	Heinz	Nunn
Cohen	Hollings	Pell
D'Amato	Inouye	Pressler
DeConcini	Kasten	Pryor
Denton	Kennedy	Riegle
Sarbanes	Specter	Warner
Sasser	Stevens	Wilson
Simon	Thurmond	Zorinsky
Simpson	Trible	

NOT VOTING—8

Cranston	Laxalt	Rockefeller
Goldwater	Levin	Stennis
Hatch	Mathias	

So the motion to lay on the table was rejected.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the motion to lay on the table was rejected.

Mr. MURKOWSKI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, we are now faced with the situation of once again being $166 million over, which is not acceptable to be over those budget targets, and we are at the present time having some discussions and some negotiations to see what type of additional amendment we could——

The PRESIDING OFFICER. If the Senator will suspend, a vote at this time recurs on the amendment which must occur without debate.

Mr. GARN. Mr. President, I ask unanimous consent that we have 5 minutes to discuss the issue.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, as I was saying, we have been discussing the supporters of the amendment, and we do need a little additional time. They are agreeable to that, while we discuss it, to postpone the vote on passage, which I would let go by voice vote.

So, I yield the floor at this time.

The PRESIDING OFFICER. The distinguished majority leader is recognized.

Mr. DOLE. Mr. President, let me indicate to my colleagues what we wish to do the remainder of the day. We wish to dispose of this bill, move to DOT appropriations bill, and then move to reconciliation.

We wish to be on reconciliation by 12:30 p.m. or 1 p.m. and then see how that develops into the midafternoon, and that will be it for today. But we wish to complete action on this bill and the DOT appropriations bill, which I understand will not take more than a couple hours, and then reconciliation will take more than today. I do not know how far we can go today on reconciliation, but I was advised by both Senators DOMENICI and CHILES last evening it will probably be next week before we get into serious voting on that particular measure.

Mr. BIDEN. Mr. President, the chairman of the committee indicated a moment ago that he was interested in knowing who else might have amendments and in light of what the majority leader just said, I wish to inform him that I have two amendments—one of which will be accepted, I am told, which will literally take little more than 30 seconds, and another one that I would hope could be accepted, but we have not been able to work it out. I wish to begin on it, and I will not take more than 10 minutes to make the case for the amendment. If we cannot accept it at that point then I will ask for a rollcall vote.

With that, Mr. President, I send an amendment to the desk and ask for its immediate consideration.

Mr. DECONCINI. Mr. President, will the Senator from Delaware yield?

The PRESIDING OFFICER. If the Senator from Delaware will withhold, the question recurs on the amendment of the Senator from Alaska.

The amendment (No. 808) was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BIDEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 809

(Purpose: To provide funds to reduce lead-based paint hazards)

Mr. BIDEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Delaware [Mr. BIDEN] proposes an amendment numbered 809.

Mr. BIDEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Co-sponsors: SARBANES, BRADLEY, SIMON, KERRY, HEINZ.

On page 2, line 25, before the semicolon, insert the following: ", except that $50,000,000 of such funds shall be available only for purposes of assisting public housing agencies in reducing the hazards of lead-based paint in public housing in accordance with the lead-based paint poisoning prevention procedures established by the Secretary under section 302 of the Lead-Based Paint Poisoning Prevention Act".

AN INCENTIVE FOR HUD

Mr. BIDEN. Mr. President, this amendment represents a continuation of the sense of Congress reflected in the Lead-Based Paint Poisoning Prevention Act of 1971. Lead paint was a problem then and it continues to place at risk the mental development of more than 1 million children in the United States—by exposing those children to one of the leading preventable pediatric public health problems in our country—lead paint—we risk the future outlay of millions of dollars and perhaps more in lawsuits and in public assistance programs to aid disabled persons.

Lead paint absorption in children is not an easily eradicated problem. In a study of 20 children who had mild evidence of lead poisoning, 19 showed some specific defects in mental development 3 to 9 years later.

In fiscal year 1982, the Lead-Based Paint Poisoning Prevention Act was folded into the maternal and child health block grant. As a result, States no longer provide the Center for Disease Control with statistics on information regarding lead poisoning and screening results are not required to give it funding priority. However, the Association of State and Territorial Health Officials Foundation began, on a volunteer basis, to collect data on childhood lead poisoning from State health agencies. The most recent statistics from ASTHO are alarming. Lead paint still remains the major source of lead exposure in children and is found in more than 37 million homes. Public housing units are in the high risk neighborhoods.

Though lead paint poisoning in children is an extremely complex and multifaceted health problem, it is preventable as long as we view it as a priority.

HUD has provided no funds for lead paint abatement in the last 2 years and HUD is taking no action despite court findings that HUD's present lead paint implementing regulations are deficient. Housing authorities across the country are being sued by tenants and the tenants are winning. They won in Delaware—and the taxpayers paid for the legal battle.

The plaintiffs in the Washington, DC, case have commented on HUD's lead-based paint policy. They said:

HUD's representations as to the time required to take necessary steps to eliminate the hazards of lead-based paint would be comic commentary on the lethargy of the Federal bureaucracy were it not for the grave consequences of HUD's continued inertia. Children who were born on the date of the D.C. court order in 1982 will have crawled, walked, and teethed on lead-based paint by the time HUD even begins to require the removal of that toxic paint from their homes in 1987. Their older brothers and sisters, born when Congress directed HUD to eliminate the hazards in 1973, will be in high school, if they are not retarded by elevated blood lead levels, when HUD finally moves.

Mr. President, regardless of the issues surrounding specific cases, we in this Chamber cannot contribute to the overall problems of the lead paint issue by our failure to act.

Several years ago HUD made available over $30 million for lead-based paint removal through the Comprehensive Improvement Program and the moneys were immediately oversubscribed. In essence, the program worked so well that HUD hasn't done it since.

Mr. President, my amendment will give HUD a little more incentive. It will earmark $50 million for lead-based paint abatement from existing authorizations for the Comprehensive Improvement Assistance Program.

Mr. President, in this century, public health programs have been immensely successful with childhood diseases such as polio, smallpox, measles, and diphtheria. With determination and concerted effort, childhood lead poisoning can soon be added to that list.

Mr. President, I shall try to be as brief as possible.

Mr. President, let me tell you all what this is about. It is about lead paint. I have been concerned about lead paint since 1974 when Senator Randolph appointed me to chair a panel studying lead paint and its effect on society.

We have had since that time clear and convincing evidence that lead paint does in fact have a serious effect on inner-city-dwelling children, who live in low-income dilapidated housing units. This problem is particulary acute among minorities.

The fact of the matter is that lead paint—to refresh my colleagues' recollection—literally keeps peeling off walls, ceilings, and woodworks. Children eat it, and they end up with brain damage which is with them for the remainder of their lives.

In addition to that, there is a very practical problem in these days of budget consciousness, and that is that lead-based paint removal costs the Government a great deal of money. That is the least of the damage. But in fact it is something that is a factor.

This amendment will please my colleague from Wisconsin and my colleague from Nebraska, and others, because it costs no money. What we are attempting to do here is to force HUD to do in fact what they should be doing anyway and that is moving expeditiously to clean up this lead paint problem.

Now, the counterargument to this amendment is that it would be better to have the moneys that are presently allocated by HUD for rehabilitating housing should be used for just that and that the long-term and overall effects of rehabilitating housing will have a long-term more beneficial, health effect on the population at large than moving on lead paint removal immediately.

As my grandmother Finnegan used to say in the long term we will all be dead.

And in the long term there are going to be thousands of children who will be permanently damaged because we waited, as we say in this body—to impact on the macroeffects of health needs in this country.

We have an immediate serious existing problem.

My amendment earmarks $50 million to do what HUD is supposed to do anyway.

I remind my colleagues, that since it is Friday morning most of them are not focusing on this particular amendment. There has not been much publicity about it. If the staffs are listening on the squawk box—this amendment makes a difference between whether or not there are children who will be victims of lead poisoning and those who will not. It costs no more money.

It is a fight over priorities within the allocation of the moneys that we have already agreed we are going to spend. That is the point I wish to make.

I have much more to say, but in the interest of time and in the faith that my colleagues have the good judgment to move on this amendment and the continuing hope that the leader of the committee will in fact accept the amendment, I yield the floor.

Mr. GARN. Mr. President, if the Senator talked 2 minutes longer I would not have accepted the amendment. He showed the good judgment to stop speaking in favor of this amendment. I will reluctantly accept it.

Mr. BIDEN. I thank the Senator very much.

Mr. LEAHY. Mr. President, that is well enough for the Senator from Utah to say, but in the good camaraderie of the morning, I will accept it also.

Mr. BIDEN. Mr. President, I am delighted to hear that. Even though as close as I am to the Senator from Vermont and as much as I respect him, in this case I am glad the chairman is there first.

The PRESIDING OFFICER (Mr. DURENBERGER). The question is on agreeing to the amendment of the Senator from Delaware.

The amendment (No. 809) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 810

(Purpose: To require an environmental impact statement prior to issuing a permit for ocean incineration)

Mr. BIDEN. Mr. President, I have a second amendment that I believe will be accepted.

Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Delaware [Mr. BIDEN], for himself, Mr. ROTH, Mr. CRANSTON, Mr. LAUTENBERG, and Mr. BRADLEY, proposes an amendment numbered 810.

Mr. BIDEN. Mr. President, I ask unanimous consent that further read-

ing of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 54, between lines 12 and 13, insert the following:

Notwithstanding any other provision of the law, none of the funds appropriated in this Act or any previous Acts shall be used to issue any permit not intended for limited-duration research purposes for the ocean incineration of hazardous wastes, unless the Administrator of the Environmental Protection Agency prepares an environmental impact statement (as described in clause (i) et seq. of section 102(2)(C) of the National Environmental Policy Act of 1969) with respect to the loading, transportation, and incineration of such wastes which will be involved under the terms of the permit.

Mr. BIDEN. Mr. President, I ask unanimous consent that Senators CRANSTON and LAUTENBERG be added as original cosponsors of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BIDEN. Mr. President, the amendment I am offering today is very simple—it calls for the Environmental Protection Agency [EPA] to conduct an Environmental Impact Statement [EIS] on the transportation routes for commercial ocean incineration operations if it proposes to allow these to occur in the next year. This amendment does not place any new responsibilities on the EPA that it has not already agreed to. The amendment only writes into law the EPA's agreement to perform an EIS on ocean incineration prior to the issuance of an operation permit.

The reason I have offered this amendment, Mr. President, is that I want to make absolutely sure that the EPA follows through with its commitment to study the effects of ocean incineration before giving it the green light for commercial operations.

I took part in an Environmental Pollution Subcommittee hearing on this issue in July, and one point that I noticed was that there was some confusion as to which agency would undertake the EIS. The EPA representative looked at the Coast Guard representative and informed him that the Coast Guard would be responsible for studying the transportation route aspect of the operation. The Coast Guard representative found this news to be very interesting because that agency apparently did not plan to undertake such a study.

Mr. President, my concern is that as the time for possible approval of operation permits approaches, these two agencies, and others that might be called on to take part in an EIS, would continue to look at each other and issue a collective "I thought you were going to do it." A review of the environmental effects and risks of ocean incineration is too important an aspect of the whole operation to let fall through the cracks.

Mr. President, let me illustrate one reason for my concern that this impact statement be done prior to issuance of operation permits. Just a few weeks ago, an oil tanker, the *Grand Eagle*, ran aground while hauling a shipment of oil on the Delaware River. The rupture of the *Golden Eagle's* hull allowed 10,000 barrels of oil to be spilled into the Delaware River between Philadelphia and Wilmington.

The oil that was released from that spill flowed down the Delaware River past the city of Wilmington and there was great concern over its possible impact on some of Delaware's most fragile and beautiful wetland areas. Luckily, Wilmington's water supply does not come from the Delaware River, and was not threatened. Similarly, the wildlife refuges have been spared extensive damage because the spill took place far enough up river that the effects of the oil had largely dissipated before it reached those areas.

However, even now, 18 days after the spill, the Coast Guard is still trying to clean up the oil. Over 2 weeks, Mr. President, and the oil is still on the river and on the adjacent land.

I believe the Coast Guard and other Federal, State, and local agencies have given their utmost to control the spill and minimize its effects. However, I would like to point out that the oil that was spilled is relatively easy to clean up in comparison with some of the highly toxic substances that incineration vessels are expected to carry. The oil-based hazardous substances that the ocean incineration vessels will carry will react much like the *Grand Eagle's* cargo, only I fear they will be much more difficult to control.

The liquids an ocean incineration vessel will carry will be of varying densities which means some might sink to the river bottom, some might float, and some could end up in between. The oil recovery ships in use in the *Grand Eagle* spill can skim the surface to collect floating oil, but are not nearly as effective on liquids below the surface or on the river bottom. I believe this is an area the EPA has overlooked in its push for commercial ocean incineration operations, but one that is vital to take into consideration.

Mr. President, let me raise another aspect of the *Grand Eagle* spill that indicates the need for EPA review of the loading and transportation apsects of ocean incineration. As you can expect, the oil has not cooperated to the fullest extent with the cleanup operations and, for the most part, has gone wherever it felt like going. This includes wooden piers on the river and marshlands along its banks.

I bring this up because it is impossible to get the oil out of the wood or grass once it has soaked in. The Coast Guard's recommendation to people who have found some of their grasslands soaked by oil is simply to burn the grass. That may not be much of an environmental problem when it is just oil that has soaked the grasses, but imagine if the oil released contained PCB's or dioxins on their way to high-temperature incineration. The grasses could not simply be burned. The temperature of incineration from just plain sticking a match to the grasses is not high enough to safely destroy the contaminants in the oil.

I do not know how this problem could be quickly and effectively resolved, but I doubt the EPA or the Coast Guard do, either. This is the aspect the amendment I am offering is trying to address. I am not just making up hypothetic situations and looking for responses. I am looking at what happened to the spilled cargo of the *Grand Eagle*, and what would be the effects of a similar ocean incineration vessel spill.

The outlook is not good, and I strongly believe the EPA should take a closer look at this aspect prior to allowing incinerator vessels to sail on a regular schedule. I also believe the EPA needs to give similar consideration to spills that could possibly result from the loading operations that would have to take place in port facilities. I do not know what a review of the risks inherent in the loading and transport aspects will show, but ignoring them is no way to move forward on the ocean incineration process.

I have spent most of my time talking about the transportation aspect of the operation. That is because it is an area that I believe must be brought to the attention of the EPA in an unmistakable and clear manner as worthy and deserving of review. I also have an equal concern about the lack of a study of the loading facilities because I do not believe the towns downstream from the loading port would care whether the contaminated substances floating past their windows came from a ruptured hull on a ship on the river or a ruptured pipe at a port. And I certainly do not want to minimize the EPA's need to review the incineration operation itself, but I believe the agency is already aware of that particular part.

One final point I would like to make is that the EIS needs to be port-specific. The EPA prepared an assessment of ocean incineration earlier this year which looked at the risks of environmental damage to the port of Mobile, AL, if an ocean incineration operation was based there. However, the EPA noted that its analysis was applicable to the specific ocean-based cases examined. A quick look at a map clearly shows that the physical characteristics

of the Delaware River and Bay are greatly different from those of Mobile Harbor and Bay. A review of the amount of activity that each area sees also supports the idea that a general study of one port is not acceptable as a substitute for a review of another port.

Again, Mr. President, let me emphasize that this amendment does not require the EPA to do anything that it has not already agreed to do. I just want to make absolutely sure that a few months from now, the verbal promise to perform the study is not forgotten or casually dispensed with as no longer the policy of the agency.

Mr. President, although I would rather see a long-term requirement that the EPA must conduct an EIS prior to commercial operations, it is my understanding that the Environment and Public Works Committee intends to hold additional hearings on this subject during this Congress. I believe this amendment will serve notice to the EPA that it must take more than just the burning operation itself into consideration when looking at the pluses and minuses of ocean incineration as part of our national hazardous waste management plan.

Mr. ROTH. Mr. President, I am pleased to cosponsor the amendment offered by my distinguished friend and colleague from Delaware, Senator BIDEN.

In the past I have taken an active part in ensuring that commercial ocean incineration activities do not pose any environmental hazards to the wetlands of Delaware and the entire ocean environment.

Of immediate concern to me, my fellow colleague from Delaware, and the citizens of Delaware are the problems and potential hazards posed by the transportation routes of the proposed operations. It is imperative that these concerns are properly addressed through an environmental impact statement [EIS], and that this EIS is conducted by the experts of the Environmental Protection Agency [EPA]. The risks inherent in an incinerator vessel's transit through our waters must be properly identified and scientifically evaluated before we consider whether to proceed with the commercial incineration of hazardous liquid wastes.

Mr. President, I have great concern and interest in the subject of ocean incineration, primarily because of its potential for both damage and benefit to the environment, and the economy and lives of the people of this Nation. However, we must ensure that adequate protection is afforded to the citizens of this Nation and in particular the citizens of Delaware.

Any activity that unreasonably threatens the safety, health, and economic well-being of the population of this Nation is unacceptable to me. We must be concerned with the health and safety of our citizens.

In addition, easy access is afforded to the proposed North Atlantic burn site, through the Delaware River and Bay. The people of Delaware could thus be subjected to the risks associated with loading of the incinerator vessel, at the Port of Wilimington, the transport of the wastes to the burn site and the incineration itself. As a matter of fact, two firms have already openly stated that they wish to use the facilities at the Philadelphia Port, while another firm wishes to use the facilities at the Port of Wilmington, for these purposes.

In the past the public and people of Delaware have accepted tremendous amounts of environmental risk. We now have greater knowledge and understanding of the possible consequences of accepting such a risk, and are reluctant to do so.

Finally, I am concerned about the intrusion of the contaminants of other States into Delaware's territory and the possible impact these might have on Delaware's valuable coastal resources. Delaware's coastal area is closely tied to the economic well-being of many people. Contamination, or even that threat of contamination would be disastrous to Delaware's fishing and tourism industries.

Mr. President, I support the amendment of my colleague from Delaware, and hope that this amendment will serve notice to the EPA that we must have adequate and proper regard for all aspects of commercial ocean incineration. Because without these considerations we may create life-threatening damage to our health, country, and environment.

Mr. BIDEN. Mr. President, I believe there is an agreement worked out by all concerned on the issue of whether or not there should be a study of the potential dangers of the transportation of toxic waste to burn sites off shore. I believe we have worked it out.

I yield to the chairman and ranking member of the committee.

Mr. GARN. Mr. President, the amendment is acceptable.

Mr. LEAHY. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Delaware [Mr. BIDEN].

The amendment (No. 810) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, I would inform the Senate at this time that we are in the process, or should I say the Senator from New Mexico is in the process, of drafting another amendment under the unanimous-consent agreement from yesterday allowing that privilege if the Murkowski amendment passed. So we will have a few minutes prior to the completion of that amendment.

I would outline to the Senate once again, however, that we are $166 million over. I think that it is unfortunate that the Senate is always willing to pass things by voice vote. I suppose I made a mistake last night on the across-the-board cuts of not getting the whole Senate on the record. I will not make that mistake in the future, to let them off the hook to vote to cut veterans but then, when it is specific the next day, they will not. So you learn, even after you have been here 11 years. We will make sure that people get on the record.

I cannot in good conscience, vote for this bill at this time. The Senator from Vermont and I have tried for months to come in with a bill that met the budget target. We have failed here on the floor of the Senate. What we have accomplished in the committee, we have lost here. So there will be an additional amendment.

I will let my colleagues know at this time the general substance of what is going to take place. I do not know exactly how long it will be. It is being drafted at the present time.

The sponsors of the veterans' amendment, Senator MURKOWSKI, Senator DECONCINI, and Senator CRANSTON, are willing to go back to the agreement that I made with them yesterday that $100 million was sufficient. I was happy to make that agreement with them yesterday and I am happy to do it again today.

But I must have some source of that revenue, and I have two choices. I can either go back to Indian housing, research and development at EPA, abatement control and compliance, Superfund, disaster relief at FEMA, research and development at NASA, and science education, but I am not willing to do that. Those agencies took sizable cuts prior to coming to the floor. They took an additional $200 million cut in the across-the-board yesterday.

So we had the choice of putting money back in for veterans and, once again, going back to the well to those agencies that have been cut, not just twice, but many times since the original budget submission.

Mr. LEAHY. Will the Senator yield?

Mr. GARN. I am happy to yield.

Mr. LEAHY. Mr. President, I believe our colleagues should know that the Senator from Utah and I have gone back over and over again and scrubbed this bill over and over again. If we were able to vote just our philosophies or predilections, even our own regional

interests, this bill would be considerably larger than it is now. If there were no budget constraints, if Senator GARN and I could simply fund everything we feel are good programs, are beneficial programs, we would be way over this limit.

But the fact is that we have had to sit down and time after time go through the bill and make tough decisions. We cut again and again, programs that both of us fully support. These are the budget realities.

It was once said being on the Appropriations Committee is both good news and bad news. The good news is that you are on the Appropriations Committee. The bad news is that you are on the Appropriations Committee.

It looks like a place where you can go in with a printing press and pour out anything you want. But also being there entails a sense of responsibility, as does being on the Budget Committee, to restrict spending and limit it.

These are not happy votes. I know, in my own instance, that all of these votes to cut will come back to haunt me. Every single special interest group, including alot that I happen to like and support, will come in and say, "You voted wrong. You voted wrong. You voted to cut."

Mr. President, I submit, in the long run, though, if you are consistent, you will have voted right because you are bringing some kind of fiscal sanity back into a deficit-ridden budget.

So I stand united with the Senator from Utah. I will state, as the ranking member of this committee, if the final bill is over our budget limit and targets, I, too, will join with him and vote against it. I will do it with great sadness and regret, because the two of us spent a great deal of time getting this bill where it is today.

Mr. GARN. I thank the Senator from Vermont, not only for his statement today but for his continuing support in trying to solve this problem all year.

I was just going to say that I was not willing to go back to the well again on agencies' funds, like Superfund, which have taken a $100 million cut, and an additional 1.1 percent yesterday. I do not like any of these choices. As a former mayor, I do not like to pick on revenue sharing.

But with the next vote, we are going to give the Senate an up or down choice on revenue sharing versus veterans' medical care. The amendment will be in the form of taking $100 million out of revenue sharing to put it into VA medical care. The Senate can work its will. I do not intend to debate it any longer, just a brief statement when the amendment is actually introduced by the Senator from New Mexico.

If that fails, then I simply intend to vote against the bill because it is over the budget.

Mr. FORD. Mr. President, will the Senator yield for a question?

Mr. GARN. I am happy to yield the floor.

Mr. FORD. I would like to ask the Senator a question, or maybe the Senator from New Mexico, who is here.

I have heard a rumor—and that is all I have is a rumor—that, ultimately, the total package in our budget reconciliation will be about $2.8 billion under the budgeted goal. Is there any truth to that? Maybe the Senator from New Mexico could enlighten me on that.

Mr. DOMENICI. Is the Senator asking whether the reconciliation bill, as reported by the committees, and which is pending, has met the total goal?

Mr. FORD. That is correct; and with some surplus.

Mr. DOMENICI. The total 3-year goal is exceeded by a substantial amount. Using our baseline and CBO assumptions, the reconciliation bill exceeds the target by approximately $8 to $10 billion over a 3-year period. However, I do not think that the reconciliation figure has anything to do with the issue before us, if that is what the Senator is asking about.

Mr. FORD. Everything is predicated on 3 years. Everything I hear is that over the 3 years it is this, this, and this.

I say to the distinguished Senator, I know we get the emotional pitch, "I don't want to cut veterans any more," and I do not, either, and I voted no. And we do not want to cut these emotional programs any more. I understand that. But over the 3-year period we cut $9 billion out of the cities—$9 billion of revenue sharing.

The Senator last night—at least I heard last night, and not the Senator particularly, but I think maybe the distinguished Senator from New Mexico—was talking about revenue sharing should take its share. We are talking about 3 years. Now we are talking about the $9 billion. Where did the Senator get the extra money, or some of the extra money to budget for some of these other ongoing reoccurring programs? So now we keep nibbling away at revenue sharing. It becomes very difficult for me to understand that we are now saying we stay under these goals. What if we come out at the end of this period with having enough money? We could have taken care of revenue sharing and the veterans as such or maybe some other programs. This Senate voted not to start the cuts this year. It has already voted not to do it this year. We voted to start next year. Now we are trying to go into training now.

It is something that is very discouraging to this Senator to see how we are being pushed on some things and not on others. Yet they are in different categories.

Mr. GARN. I say to the Senator from Kentucky, a former Governor of Kentucky, as a former mayor of Salt Lake City I do not disagree with a word the Senator has said. All I can tell my colleague because I originally came to the floor a couple of weeks ago without any of these proposed cuts in at all, and it was sent back to the subcommittee to take out an additional $800 million. There are some other committees of the Appropriations Committee which have not met targets, and that I think have not done the proper job in cutting that they should have. There ought to be some transfers. But short of being able to accomplish that by the whole Appropriations Committee and the Budget Committee—how those targets ought to be, my subcommittee ought to have more and another less—I am faced with the reality of meeting a Budget Committee figure that Senator LEAHY and I did not like. We both explained how long we worked on this bill. I do not want to take any more out of science, education, or out of the Superfund. We have twice.

The second part of the problem, is that the reason revenue sharing and veterans' health care are picked on is because our overage was in outlays. They spend out almost the total amount of budget authority in 1 year.

Mr. FORD. Mr. President, will the Senator explain outlays to me? Is that outyears?

Mr. GARN. We were told we were $800 million over for 1986. That is where we had to reduce in outlays—actual spending of money, actual money spent during the period October 1 to next September 30.

So we can take a very large cut. As an example, Senator PROXMIRE's amendment yesterday to cut over $9 billion in budget authority—amazing chunk of money—but you know in outlay savings it is practically nothing. I looked at another cut of nearly $300 million that would have saved only $9 million in actual spending because it is spent over 30 or 35 years in those types of programs. Many of the programs that have been in my subcommittee are that way. You can cut massive amounts of budget authority, which helps 10 or 15 years down the road. It is worth doing. Nevertheless, you do not get the savings that I am commanded to get during the next fiscal year.

Revenue sharing is immediate outlays to be spent. And veterans—that was the problem I was pushed into not through my choice, or that Senator LEAHY and I liked. As I said before, I really enjoyed sitting at home last night thinking about how I had to get up and argue against veterans today being a veteran. So the whole process forced us into a corner. It will continue to do so.

Mr. DOMENICI. Mr. President, will the Senator yield?

Mr. FORD. I do not have the floor.

Mr. GARN. I yield the floor.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, let me ask the distinguished manager of the bill. Senator CHILES and I are in conference on the Gramm-Rudman-Hollings bill. I understand it will be 15 minutes before the Domenici-Chiles amendment is ready. I think that Senator CHILES and I should go to the Gramm-Rudman-Hollings conference and return here when our amendment is ready. As I understand the unanimous-consent request, Senator CHILES and I will have the opportunity to offer the amendment.

Will the distinguished manager and chairman offer it in our behalf?

Mr. GARN. I will be happy to do that.

Mr. DOMENICI. We have negotiated it with the Senator. It will be as the Senator stated.

Mr. DECONCINI. Mr. President, will the Senator yield for a question?

Mr. DOMENICI. Yes.

Mr. DECONCINI. Will the Senator inform us of what this amendment being drafted calls for? Is it a unanimous-consent agreement or is it something else?

Mr. DOMENICI. We reserved the right in the unanimous-consent request last night to offer an amendment to bring outlays for this bill back into compliance with the budget resolution. We have just added $166 million to veterans medical care. Since the veterans amendment puts the HUD bill over the budget resolution assumptions, our right to offer to an amendment is triggered.

Mr. DECONCINI. Will the Senator yield for a further question? Am I not correct that the unanimous consent last night reserves the right of the Senator from Florida and the Senator from New Mexico to offer an across-the-board cut amendment?

Mr. DOMENICI. I do not recall whether it was an across-the-board amendment. We intend to offer an amendment.

Mr. MURKOWSKI. Mr. President, if the Senator will yield, I believe it was across the board.

Mr. DECONCINI. If the Senator from New Mexico will yield, on page 13485 CONGRESSIONAL RECORD, Oct. 17, 1985 as I read it, Mr. CHILES had the floor at the time and he said:

> On behalf of myself and I hope the Senator from New Mexico, we will see if amendments are adopted tomorrow to change this, and, if so, we will have to come back with another across-the-board amendment and there will be a vote if we do that. People will get a chance to record themselves.

Mr. DOMENICI. I say to my friend from Arizona that there was a great deal of discussion under reservation. But on page 13485 CONGRESSIONAL RECORD, Oct. 17, 1985, Mr. DOLE said the following:

> Mr. President, I would make one additional unanimous-consent request, that in the event the amendment of Senators Murkowski and DeConcini is adopted, an amendment would be in order to be offered by Senators Chiles and Domenici.

Mr. DECONCINI. Further, on page 13485 CONGRESSIONAL RECORD Oct. 17, 1985, in the left-hand column, it refers to that amendment I believe. I am just trying to get a clarification. It quotes the Senator from New Mexico saying after Senator CHILES reserves the right to offer an across-the-board amendment that "So the leader will protect us in a unanimous-consent agreement for an amendment that the Senator from Florida has described." So there is no question, is there, in the mind of the Senator from New Mexico that the reference that he just read goes back to the amendment described by the Senator from Florida which says an across-the-board amendment?

Mr. DOMENICI. Mr. President, I was not the one engaged in the dialog. But, clearly, I take the position that the amendment that the distinguished Senator from Florida and the Senator from New Mexico intend to offer will reinstate $100 million to the veterans medical care account. This restoration will be to the spending level for veterans medical care that we had prior to the Murkowski amendment. The $100 million add back to veterans would be offset by a savings of $100 million from the general revenue-sharing program. I am of the opinion that this amendment is in order. If we care to, we could put a parliamentary inquiry to the Chair.

Mr. DECONCINI. Before asking that, I want the Senator from New Mexico to know that I am not objecting to that at this moment. What I am trying to do is clarify if it was the intent last night that an across-the-board amendment be in order. The Senator can certainly express his opinion now and move to by unanimous consent change that. I am not prepared to object to it. But I do want to be clear what we are talking about.

Mr. DOMENICI. Let me ask the Chair a parliamentary inquiry. Would it be in order for Senator CHILES and DOMENICI under the unanimous-consent request—Mr. President, I do not believe we are ready to offer the amendment so I will not inquire at this point. Let me say to my friend from Arizona that we will offer an amendment. Anyone who wants to raise a point of order is free to. We will then inquire of the Chair. The amendment, however, will not be an across-the-board reduction but it will be just as I described.

Mr. MURKOWSKI. If the chairman of the committee can clarify a point raised by the Senator from Utah, that is, the cut comes out of the revenue sharing or some other method? I was under the impression that the proposed cut by the Budget Committee would come out of revenue sharing, or some other category. I would like a clarification on this. What is the intent?

Mr. DOMENICI. I am offering this amendment. As Budget Committee chairman, and as a member of the Appropriations Committee. The amendment is simple in that it will restore $100 million to veterans' medical care after striking the amendment offered by the Senator from Alaska. The Domenici-Chiles amendment will add $100 million to veterans medical care and will reduce revenue sharing by the same amount.

Mr. MURKOWSKI. So if that fails, the $166 million presently in the veterans' medical care account is no longer in that category?

Mr. DOMENICI. If this fails, we are back to the bill at the desk as amended by Murkowski-DeConcini.

Mr. MURKOWSKI. So it is still in?

Mr. DOMENICI. We could not take it out unless our amendment succeeds.

Mr. DECONCINI. Mr. President, will the Parliamentarian advise as to the meaning of the unanimous-consent request which appears in the RECORD at page 13485?

The PRESIDING OFFICER. Not while the present occupant of the chair occupies the chair will a ruling be made.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MURKOWSKI). Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. Pursuant to the unanimous-consent request of last night, will an amendment offered by the distinguished Senator from Florida [Senator CHILES] and this Senator from New Mexico, which would strike the Murkowski-DeConcini amendment and substitute in lieu thereof a $100 million add on for veterans and a $100 million reduction from revenue sharing for the current year, be in order?

The PRESIDING OFFICER. The agreement does not put a limitation on the amendment to be offered. A properly drafted amendment that had that effect would be in order.

Mr. DOMENICI. I thank the Chair.

I suggest the absence of a quorum.

Mr. FORD. Will the Senator withhold?

Mr. DOMENICI. I withhold.

Mr. FORD. How soon will the Senator offer that amendment?

Mr. DOMENICI. As soon as it is drafted.

Mr. FORD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DURENBERGER). Without objection, it is so ordered.

Mr. FORD. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. FORD. Under the procedures, will there be an amendment in the second degree allowed as relates to the amendment of the Senator from New Mexico?

The PRESIDING OFFICER. That amendment would not be allowed.

Mr. FORD. Mr. President, I ask unanimous consent that the second-degree amendment be allowed.

Mr. GARN. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. FORD. Another parliamentary inquiry. Is there a time limit on the amendment?

The PRESIDING OFFICER. There is no time limitation.

Mr. FORD. I think we ought to have the opportunity to go and find money somewhere else without going to veterans, without going to research and development. There is a question as to what money can be found. We voted on those yesterday. Now we are precluded from the opportunity to move to those areas to find other money. We are being very selective. Therefore, I object to any time limitation on the amendment.

Mr. GARN. Mr. President, I understand what the Senator from Kentucky is saying, but there is simply no way to take money out of other subcommittees. I have already explained that situation. The Senate should be aware that we have just been threatened with a filibuster and we are prepared that this bill will not be finished for some time, maybe not today and maybe not Monday.

The PRESIDING OFFICER. Who seeks recognition?

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 811

Mr. GARN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the consideration of the amendment? Without objection, it is so ordered. The clerk will report.

The bill clerk read as follows:

The Senator from Utah [Mr. GARN] proposes an amendment numbered 811.

Mr. GARN. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 54, line 12, strike all through the end of the bill and insert the following: "than 2.1 per centum.

"SEC. 417. Except as otherwise provided in this section, each dollar amount contained in this Act, as amended, which is provided for non-defense discretionary programs and activities is hereby reduced 1.1 per centum provided that this section shall not apply to the amount on page 2, line 16;

"Provided further, that, notwithstanding the provisions of 31 U.S.C. 6701-6724, payments to local governments are hereby reduced by 8.3 per centum; provided further, that, notwithstanding the provisions of 31 U.S.C. 6701-6724, in the fiscal year ending September 30, 1986, persons charged with administration of any provision of 31 U.S.C. 6701-6724, shall limit the value of any payments conferred by 31 U.S.C. 6701-6724 to amounts not in excess of the amount provided in this annual appropriation act, as amended by this section, and if the requirements of 31 U.S.C. 6701-6724 exceed the amount so provided, the payments shall be reduced to the extent necessary to stay within the amount provided in this annual appropriation act, as amended by this section."

SEC. 417. Any funds previously appropriated for the purposes of construction grants under title II of the Clean Water Act shall be available for all projects for which such funding was initially available when such appropriations were made and not be limited to phases or segments of previously funded projects.

TITLE V—SHELTER PROGRAM: GENERAL PROVISIONS

SHORT TITLE

SEC. 501. The following titles may be cited as the "Homeless Housing Assistance Act of 1985".

DEFINITIONS

SEC. 502. For the purpose of this Act—

(1) the term "emergency shelter", as used in section 608(b) of this Act, means an entire facility, or that part of a facility, which is used or designed to be used to provide temporary housing to not fewer than twenty individuals;

(2) the term "homeless" means individuals who are poor and who have no access tc either traditional or permanent housing;

(3) the term "local government" means a unit of general purpose local government;

(4) the term "locally" means the geographical area within the jurisdiction of a local government;

(5) the term "operating costs" means expenses incurred by State, local governments, and private nonprofit organizations operating transitional housing for the homeless under title VII of this Act with respect to—

(A) the administration, maintenance, minor repairs, and security of such housing;

(B) utilities, fuel, furnishings, and equipment for such housing;

(C) the conducting of the assessment required in section 705(a)(2) of this Act; and

(D) the provision of supportive services to the residents of such housing;

(6) the term "private nonprofit organization" means a secular or religious organization described in section 501(c) of the Internal Revenue Code of 1954 which is exempt from taxation under subtitle A of such Code, and which has an accounting system and a voluntary board, and practices nondiscrimination in the provision of assistance;

(7) the term "Secretary" means the Secretary of Housing and Urban Development;

(8) the term "shelter", as used in title II of this Act, means broadly the provision of protection from the elements for homeless individuals;

(9) the term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, or any territory or possession of the United States;

(10) the term "supportive services" means assistance to the residents of transitional housing in obtaining permanent housing, medical and psychological counseling and supervision, employment counseling, referral to job training, nutritional counseling, and such other services essential for establishing independent living as the Secretary determines to be appropriate. Such term includes the provision of assistance to the residents of transitional housing in obtaining other Federal, State, and local government assistance available for such persons, including mental health benefits, employment counseling, referral to job training programs, and medical assistance; and

(11) the term "transitional housing" means a single- or multi-family structure suitable for the provision of housing and supportive services for not more than 15 homeless persons, who cannot presently live independently without supportive services in a supervised residential setting but who are believed capable of transition to independent living with 6 months of assistance in a stable environment.

TITLE VI—EMERGENCY FOOD AND SHELTER PROGRAM

EMERGENCY FOOD AND SHELTER PROGRAM NATIONAL BOARD

SEC. 601. (a) The Director of the Federal Emergency Management Agency shall, as soon as practicable after September 30, 1985, constitute a national board for the purpose of carrying out an emergency food and shelter program.

(b) The national board shall consist of seven members. The United Way of America, the Salvation Army, the National Council of Churches of Christ in the United States of America, the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., the American Red Cross, and the Federal Emergency Management Agency shall each designate a representative to sit on the national board.

(c) The representative of the Federal Emergency Management Agency shall chair the national board.

NATIONAL BOARD TRANSITION

SEC. 602. (a) The national board constituted by the Director of the Federal Emergency Management Agency, pursuant to section 601, shall continue to be authorized until March 30, 1986, and on such date, the personnel, property, records, and undistributed program funds of such national board shall be transferred to the national board under subsection (b).

(b) On or before March 30, 1986, the Secretary of Housing and Urban Development shall constitute a national board for the purpose of carrying out an emergency food and shelter program. This national board shall consist of the same representatives, or their successors, of the same organizations as the national board constituted pursuant to section 601(b), except that the Secretary of Housing and Urban Development shall designate a representative to replace the Federal Emergency Management Agency representative. Such national board shall assume authority on March 10, 1986.

(c) The representative designated by the Secretary of Housing and Urban Development shall chair the national board constituted pursuant to subsection (b).

DISTRIBUTION OF PROGRAM FUNDS

SEC. 603. The national boards constituted pursuant to sections 601 and 602(b) shall determine how program funds are to be distributed to individual localities. The national boards shall identify localities having the highest need for emergency food and shelter assistance, based on unemployment and poverty rates and such other need-related data as the national boards deem appropriate, determine the amount and distribution of funds to these localities, and ensure that funds are properly accounted for.

AGENCY RESPONSIBILITIES

SEC. 604. (a) The Director of the Federal Emergency Management Agency shall award a grant for such amount as Congress appropriates for this program to the national board constituted pursuant to section 601 within 30 days after the beginning of fiscal year 1986, for the purpose of providing emergency food and shelter to needy individuals through private nonprofit organizations and through units of local government.

(b) The Director of the Federal Emergency Management Agency, or his representative, shall have the following responsibilities: provision of guidance, coordination, and staff assistance to the national board in carrying out the program; and cooperation and coordination with the Secretary of Housing and Urban Development in the conducting of an audit of program funds awarded to the national board constituted pursuant to section 601 or transferred to the national board constituted pursuant to section 602(b). The responsibilities of the Director of the Federal Emergency Management Agency with respect to this program shall end with the completion of the audit for program funds distributed during fiscal year 1986.

(c) The Secretary of Housing and Urban Development shall award a grant for such amount as Congress appropriates for this program to the national board constituted pursuant to section 602(b) within 30 days after the beginning of fiscal years 1987 and 1988, for the purpose of providing emergency food and shelter to needy individuals through private nonprofit organizations and through units of local government.

(d) The Secretary of Housing and Urban Development shall have the following responsibilities: provision of guidance, coordination, and staff assistance to the national board in carrying out the program; and the conducting of an audit of program funds awarded to and transferred to the national boards constituted pursuant to sections 601 and 602(b).

(e)(1) In carrying out the responsibilities under subsection (d), the Secretary shall coordinate activities with the Federal Interagency Task Force on Food and Shelter, chaired by the Secretary of Health and Human Services, to identify vacant and surplus Federal facilities which could be renovated or converted for use as emergency shelter facilities for the homeless.

(2) Not later than 3 months after the end of fiscal year 1986, the Secretary shall submit to the Congress a report on obstacles, if any, including agency rules or procedures, to the availability of vacant and surplus Federal facilities for renovation or conversion to use as emergency shelter facilities for the homeless, with recommendations for legislative or administrative changes to overcome such obstacles.

LOCAL BOARDS

SEC. 605. (a) Each locality designated by the national boards constituted pursuant to sections 601 and 602(b) shall constitute a local board for the purpose of determining how program funds allotted to the locality will be distributed. The local board shall consist, to the extent practicable, of representatives of the same organizations as the national boards, except that the mayor or other appropriate heads of government will replace the Federal Emergency Management Agency or Department of Housing and Urban Development member. The chair of the local board shall be elected by a majority of the members of the local board. Local boards are encouraged to expand participation of other private nonprofit organizations on the local board.

(b) Local boards shall have the following responsibilities: determining which private nonprofit organizations or public organizations of the local government in the individual locality shall receive grants to act as service providers; monitoring recipient service providers for program compliance; reallocation of funds among service providers; ensuring proper reporting; and coordinating with other Federal, State, and local government assistance programs available in the locality.

(c) Prior to March 30, 1986, local boards constituted pursuant to subsection (a) shall be accountable to the national board constituted pursuant to section 601. On and after March 30, 1986, local boards constituted pursuant to subsection (a) shall be accountable to the national board consituted pursuant to section 602(b).

LOCAL HOMELESS ASSISTANCE PLAN

SEC. 606. (a) At the end of each fiscal year, each local board shall submit to the national board constituted pursuant to section 602(b), a plan describing programs, goals, and objectives for providing assistance to the homeless in that locality. The plan shall be developed in cooperation with the local government head represented on the local board.

(b) The local plan shall address the following subjects: description of existing shelter, mass feeding, and food bank activities in that locality, including activities not receiving assistance under this title; use and availability of all public and private resources in the locality to assist the homeless; coordination of all public and private services and resources in that locality to assist the homeless; coordination among all shelter providers in the locality to use all available shelter space for the homeless; and preservation of low-income housing in the locality.

(c) the local plan shall be placed on file in the office of the local government head represented on the local board and shall be made available to the public. The local plan shall be forwarded to that individual locality's representatives in Congress. The national board shall maintain files of local plans and make them available upon request to other localities.

(d) The preparation and submission of the local plan shall be regarded as the legal duty of the local board, but failure to do so shall not be grounds for the withholding of funds appropriated under this title from that locality. Any citizen residing in the locality in which such local board is constituted shall have standing in the Federal district court of jurisdiction to seek an order compelling the preparation and submission of the local plan as required by this section. The substance and contents of the local plan shall be within the sole discretion of the local board and shall not be subject to administrative or judicial review.

SERVICE PROVIDERS

SEC. 607. Designation by the local board of a service provider to receive program funds should be based upon a private nonprofit organization's or unit of local government's ability to deliver emergency food and shelter to needy individuals and such other factors as are deemed appropriate to program objectives by the local board.

USE OF FUNDS

SEC. 608. (a) The national boards constituted by sections 601 and 602(b) may authorize the following use of funds to address the emergency food and shelter needs of needy individuals:

(1) Expenditures necessary to purchase emergency food and shelter for needy individuals, to supplement and extend currently available resources and not to substitute or reimburse ongoing programs and services; and

(2) Expenditures necessary to conduct minimum rehabilitation of existing mass shelter or mass feeding facilities to make facilities safe, sanitary, and bring them into compliance with local building codes.

(b)(1) Local boards are authorized to expend up to 25 percent of the funds allotted to that locality for substantial renovation or conversion, but not acquisition or new construction, of buildings for use as emergency shelter facilities to provide additional shelter space. Such expenditures shall be made in the form of noninterest bearing advances, repayment of which shall be waived if—

(A) the applicant utilizes the building as an emergency shelter facility for not less than the 10-year period following the completion of such renovation or conversion, or

(B) the Secretary determines that such facility is no longer needed to provide shelter to the homeless and approves use of the building for another charitable purpose for the remainder of such 10-year period. If the recipient of such advance fails to comply with the conditions for such a waiver, the recipient shall repay to the Secretary in cash the full amount of the advance received on such terms as the Secretary shall

require. It shall be the responsibility of the local board to obtain documentation, signed by the responsible official, showing that the recipient of such advance is aware of and agrees to the conditions of its receipt.

(2) Local boards are encouraged to provide, to the neighborhood in which a new emergency shelter facility is to be located, adequate notice and an opportunity to comment. Local boards are also encouraged to achieve the widest possible distribution of emergency shelters throughout the locality to avoid a disproportionate burden on any one section or neighborhood of the locality.

LIMITATION ON CERTAIN COSTS

SEC. 609. Not more than 3 percent of the total appropriation for this program each year may be expanded for the costs of administration.

PROGRAM GUIDELINES

SEC. 610. (a) The national boards constituted pursuant to sections 601 and 602(b) shall establish written guidelines for carrying out this program, including methods for identifying localities with the highest need for emergency food and shelter assistance; methods for determining amount and distribution to these localities; eligible program costs, with the aim of providing emergency essential services based on currently existing needs; and responsibilities and reporting requirements of the national boards, local boards, and service providers.

(b) These guidelines shall be published annually, and whenever modified, in the Federal Register. The national boards shall not be subject to the procedural rulemaking requirements of subchapter II of chapter 5 of title 5, United States Code.

(c) Guidelines established by the national board constituted pursuant to section 601 shall continue in effect until modified or revoked by that board or by the national board constituted pursuant to section 602(b).

PROGRAM AUTHORIZED

SEC. 611. (a) To carry out this title, there are authorized to be appropriated $70,000,000 in fiscal year 1986, $88,000,000 in fiscal year 1987, and $91,000,000 in fiscal year 1988.

(b) Any appropriated funds not obligated in a fiscal year shall remain available for obligation during the following fiscal year.

SURPLUS FOOD DISTRIBUTION

SEC. 612. The Commodity Credit Corporation shall process and distribute surplus commodities acquired by the Corporation for the purpose of carrying out the food distribution and emergency shelter program in cooperation with the national boards constituted pursuant to sections 601 and 602(b).

TITLE VII—TRANSITION TO INDEPENDENCE DEMONSTRATION PROJECT

AUTHORITY TO MAKE GRANTS

SEC. 701. (a) The Secretary of Housing and Urban Development shall make grants to States, local governments, or private nonprofit organizations for the operation of demonstration projects to develop and apply innovative approaches in providing transitional housing and supportive services to the homeless to assist them in the transition to independent living.

(b) Grants under subsection (a) may be made in the form of:

(1) annual payments for operating expenses of transitional housing, not to exceed 75 percent of the annual operating expenses of such housing;

(2) technical assistance in establishing and operating transitional housing and providing supportive services to the residents of such housing to assist them in the transition to independent living; and

(3) one-time only non-interest bearing advance, not to exceed $100,000 for the purposes of acquiring, rehabilitating, or acquiring and rehabilitating an existing structure for use in providing transitional housing, if the applicant agrees to utilize such structure as transitional housing for not less than 5 years. Repayment of such advance shall be waived if the applicant utilizes the structure as transitional housing for not less than the 10-year period following the initiation of operation of such transitional housing facility, or if the Secretary determines that such structure is no longer needed for use as transitional housing and approves the use of such structure for another charitable purpose for the remainder of such 10-year period. If the applicant fails to comply with the conditions for waiver of repayment, the applicant shall repay to the Secretary in cash the full amount of the advance received on such terms as the Secretary shall require.

(c) Grants made under this section are to be used to supplement and extend currently available resources and not to substitute or reimburse ongoing programs and services.

APPLICANTS FOR GRANTS

SEC. 702. Each application for a grant submitted by a State, local government, or private nonprofit organization shall contain—

(1) documentary material demonstrating that such applicant has the ability and resources necessary to operate transitional housing;

(2) documentary material describing the program and supportive services intended to be provided in such transitional housing, including the innovative quality of the proposed program;

(3) documentary material demonstrating that the State, local government, or private nonprofit organization involved has provided the emergency food and shelter program local board, constituted pursuant to section 605 of this Act, if such local board has been constituted in the locality where the proposed transitional housing will be located, an opportunity to comment with respect to this application, and a statement as to whether the local board approves or disapproves of such application and its reasons for any disapproval; and

(4) such other information or material as the Secretary shall establish.

ALLOCATION OF GRANTS

SEC. 703. In selecting States, local governments, or private nonprofit organizations for assistance in providing transitional housing under this title, the Secretary shall consider—

(1) the innovative quality of the proposal to provide transitional housing and supportive services to the homeless to assist them in the transition to independent living;

(2) the ability of the State, local government, or private nonprofit organization to develop and operate transitional housing for homeless persons and to provide supportive services to the residents of such housing;

(3) the need for such transitional housing and supportive services in the locality to be served; and

(4) such other factors as the Secretary determines to be appropriate for purposes of carrying out the demonstration project established in this Act in an effective and efficient manner.

DISTRIBUTION OF GRANTS

SEC. 704. (a)(1) Not later than 120 days after the beginning of each fiscal year for which Congress makes appropriation to carry out this title, the Secretary shall make grants under section 701.

(2) If the aggregate amount of funds requested in applications submitted and approved, during the 120-day period referred to in paragraph (1), is less than the amount of such appropriation available to make such grants, then the Secretary shall publish in the Federal Register a notice that additional funds are available for distribution under this title.

(b) The aggregate amount of all appropriations made to carry out this title shall be used to make grants under section 701 unless the sum of the administrative costs incurred by the Secretary to carry out this title and the aggregate amount of funds requested in applications approved under this title is less than the aggregate amount of such appropriation.

PROGRAM REQUIREMENTS

SEC. 705. (a) Each State, local government, or private nonprofit organization receiving assistance under this title shall agree—

(1) to operate transitional housing assisting residents in the transition to independent living and limiting the stay of individual residents to not more than 6 months;

(2) to conduct an assessment of the supportive services required by the residents of such transitional housing to assist them in the transition to independent living;

(3) to employ a full-time residential supervisor with sufficient expertise to provide, or supervise the provision of, supportive services to the residents of such housing;

(4) to keep and make available to the Secretary such records of the expenditure of funds as the Secretary may require by rule; and

(5) to comply with such other terms and conditions as the Secretary may establish for purposes of carrying out the demonstration project established by this title in an effective and efficient manner.

(b) Each homeless individual residing in transitional housing assisted under this title shall pay as rent an amount determined in accordance with the provisions of section 3(a) of the United States Housing Act of 1937.

REGULATIONS

SEC. 706. Not later than 120 days following the date of enactment of this Act, the Secretary shall issue such regulations as may be necessary to carry out the provisions of this title.

REPORTS TO CONGRESS

SEC. 707. (a) The Secretary shall submit to Congress—

(1) not later than 3 months after the end of each of the fiscal years 1986 and 1987, an interim report summarizing the activities carried out under this title during such fiscal year and setting forth any preliminary findings, conclusions, or recommendations of the Secretary as a result of such activities; and

(2) not later than 6 months after the end of fiscal year 1988, a final report summarizing all activities carried out under this title and setting forth any findings, conclusions, or recommendations of the Secretary as a result of such activities.

(b) Such interim and final reports shall address—

(1) the cost of operating transitional housing and providing supportive services to the

homeless to assist them in the transition to independent living;

(2) the various types of transitional housing assisted under this title, including innovative approaches to assisting the homeless in the transition to independent living;

(3) the social, financial, and other advantages and disadvantages of transitional housing and supportive services as a means of assisting the homeless;

(4) the success of transitional housing programs assisted under this title, as measured in terms of placement of homeless individuals in permanent housing, placement in employment, and reductions in welfare dependency; and

(5) such other findings, conclusions, and recommendations as the Secretary deems appropriate with regard to assisting the homeless in the transition to independent living.

PROGRAM AUTHORIZED

SEC. 708. To carry out this title, there are authorized to be appropriated $5,000,000 in fiscal year 1986, and there are authorized to be appropriated $15,000,000 in each of the fiscal years 1987 and 1988.

At the end of the bill, add the following section:

SEC. . Notwithstanding any other provision of this Act (including any provision reducing certain dollar amounts by a specified percentage), the appropriation made by this Act for the Veterans' Administration for "Medical care" shall be $9,162,694,000.

Notwithstanding any other provision of the law, none of the funds appropriated in this Act or any previous Acts shall be used to issue any permit not intended for limited-duration research purposes for the ocean incineration of hazardous wastes, unless the Administrator of the Environmental Protection Agency prepares an environmental impact statement (as described in clause (i) et seq. of section 102(2)(C) of the National Environmental Policy Act of 1969) with respect to the loading, transportation, and incineration of such wastes which will be involved under the terms of the permit.

Mr. GARN. Mr. President, I offer this amendment on behalf of the distinguished chairman of the Budget Committee, Senator DOMENICI, and ranking minority member, Senator CHILES. They were called away to a conference and will return to speak for their amendment. We will notify them. They asked to be notified when the amendment was before the Senate, so I would suggest the absence of a quorum.

Mr. FORD. Will the Senator withhold?

Mr. GARN. I will be happy to withhold.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Mr. President, I did not object to bringing up—does the majority leader wish the floor? I will be glad to yield.

Mr. DOLE. No, go ahead.

Mr. FORD. I did not object to bringing up this amendment because I understand the box in which the distinguished chairman and ranking member of the subcommittee are placed, but there is something very wrong here. We have been talking about a 3-year budget and about revenue sharing being cut additionally. They have already given up $9 billion to help with the 3-year budget and we are also going with an appropriations bill under a budget resolution that we have not reconciled.

We have not had reconciliation yet. We really have the cart before the horse, and we are being forced into a decision not knowing what the ultimate outcome will be.

We find ourselves with the information that we are probably close to $3 billion over when we reconcile the budget. That is the figure I have been given. We really have no idea what we are doing today based on reconciliation. So we do have the cart before the horse, and it puts many of us in a bad situation.

I am very much for the veterans. I do not think they have enough. I also think that the revenue-sharing portion of this legislation has gone too far and that the money that is being used now for these recurring programs is coming out of the hide of the communities.

Mr. President, I do not know how long it will be before the two ranking Members will be back to discuss this amendment, but I am going to continue to try to find some method.

I just want to tell my colleagues that we do have the cart before the horse as it relates to appropriations bills, trying to hold it under the budget, and we have not reconciled it yet. It puts us in an untenable position. Maybe it is the strategy to try to hold things down, but it develops problems for many of us who would like to help certain programs, would like to be helpful in useful amendments, but we are almost precluded from doing that.

Mr. President, I yield the floor.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER (Mr. MCCONNELL). The majority leader.

Mr. DOLE. Mr. President, I hope the chairman and the ranking minority member of the Budget Committee can be here quickly to debate this amendment. If there is some way to resolve it, we would like to do so.

We still plan to move to the DOT, the transportation bill and complete action on that today and get some time on reconciliation.

Obviously, this is a matter of some concern. We are talking about a $55 billion bill, and right now we are arguing about $146 million. Yesterday, we spent 2 hours arguing about $7 million.

I hope we can summon the authors of the amendment and have them here quickly and complete action on this bill. If we cannot resolve it, we will set it aside and move to something else.

There will be a number of rollcall votes this afternoon.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, as I understand it, the distinguished chairman of the subcommittee and manager of the bill sent an amendment to the desk. That amendment is a simple amendment and I am not going to take an awful lot of time. I understand that this is a very contentious issue. Let me start by saying——

Mr. DECONCINI. Mr. President, will the Senator let me interrupt for just a question?

Mr. DOMENICI. I am pleased to.

Mr. DECONCINI. Does the Senator have the amendment? We have yet to see it. I wonder if the Senator has seen it, does he have it before him, or we could get it, please.

Mr. DOMENICI. Mr. President, we will get a copy of it for the Senator.

Mr. DECONCINI. I thank the Senator.

Mr. DOMENICI. I can explain to the Senator what it does. However, we will give it to him as soon as we get it copied.

Basically, let me just take a couple of minutes and review the evolution of this bill. After this bill was first reported to the Senate, the full Appropriations Committee went back into session to look at their suballocations, and in particular to look at outlays. In that process, it was determined that this bill, in outlays—and I remind everyone that outlays are what determine deficits—was $800 million in outlays over the allocated amount and as assumed in the budget resolution.

The distinguished manager of the bill and his ranking minority member in full committee made a presentation saying that they did not want to come to the floor with that outlay average. They made a decision to go back through all of the accounts, within their jurisdiction and, as the distinguished manager and the chairman of the subcommittee has said, reduce these various accounts substantially.

When they finished reducing these accounts, they decided they need to reduce revenue sharing for fiscal year 1986 by 12.5 percent. In order to achieve a total outlay reduction of $800 million.

They offered that amendment in committee and it was adopted. The distinguished chairman's goal was complied with and the bill was now consistent with the budget resolution adhered to.

An amendment has now come along that added back the committee's 12.5-

percent reduction to revenue sharing. That put us——

Mr. DURENBERGER. Mr. President, will the Senator yield?

Mr. DOMENICI. I yield.

Mr. DURENBERGER. Do I understand him to say that $800 million was picked up by the 12.5 percent?

Mr. DOMENICI. No I merely said that the long list of reductions that the subcommittee made, and that they have put in the RECORD—reducing veterans some, EPA, Superfund, National Science Foundation—when combined with the 12.5 percent revenue-sharing reduction equaled the $800 million.

Mr. DURENBERGER. I thank the Senator for the clarification.

Mr. DOMENICI. To be more clear there, a couple of amendments that have been offered—one by Senator PROXMIRE, one by Senator ARMSTRONG. These amendments would have reduced the overall outlay some, but not substantially because these are very slow spend-out programs. But in any event, we found ourselves last night in a position where we were once again over the committee's suballocation. We were over because general revenue sharing had been returned to its prior level funding for fiscal year 1986.

Last night, on the floor of the Senate, the Senator from New Mexico and the Senator from Florida, with some cosponsors, offered an amendment. The amendment basically said we will take a 1.1-percent reduction from all the appropriated programs in this bill, except subsidized housing. We will then cut revenue by 6.1 percent. That amendment passed by voice vote and that had effectively brought us back within the suballocation. Veterans, the account that we are now here arguing over, had also been reduced by 1.1 percent, just as all the other accounts from the committee amendment had been.

Now, a while ago the Senate, in an amendment offered by the distinguished Senator from Alaska, Senator MURKOWSKI, and Senator DECONCINI, put $166 million back in the veterans' medical care account. Effectively, the overall amendment that we adopted last night has now been amended to say it is the will of the Senate that we give preferential treatment to the veterans. What the distinguished Senators did then was to say we are going to put $166 million into veterans' medical care because we don't want this account cut by 1.1. percent like all the other accounts.

Frankly, we do not want to keep the Senate here and debate forever over this issue. I can say to the Senate that the distinguished managers and the Senate, in this Senator's opinion, have done some tremendous work. We went through an $800 million overage to within the suballocation.

I do not think we have accomplished that very often here in the Senate in the past, and I compliment everyone, in particular the managers of the bill, but those also who last night voted for the Domenici-Chiles amendment, supported by the chairman and the ranking minority member, to apply a 1.1-percent across-the-board cut, and a 6.1-percent cut to revenue sharing.

Then we said that since the Senate obviously wants something like this, where do we go to offset the $166 million increase in veterans' medical care? We went to the revenue-sharing account and said we will pick up $100 million there and bring the veterans' medical increase down to $100 million. That is the amendment. It effectively makes an 8.3-percent cut to revenue sharing.

I understand the distinguished sponsor on the majority side, Senator MURKOWSKI, in terms of the Veterans Committee position, thinks this is reasonably fair and intends to support it. Perhaps he will come to the floor shortly and tell us about that. But I understand he will support it.

Now we have the problem that those who did not want revenue sharing cut will object to increasing the 6.1-percent reduction to 8.3 percent. We have taken another $100 million out of revenue sharing. So in its simplest form, since yesterday's reductions, we have added $100 million to the veterans account, and we have subtracted $100 million from the revenue-sharing account. That is all this amendment does. It will make it as consistent with the suballocation as we were last night.

Mr. DECONCINI. Mr. President, will the Senator yield?

Mr. DOMENICI. I am pleased to yield.

Mr. DECONCINI. Can the Senator from New Mexico advise this Senator if this amendment had been an across-the-board amendment to pick up $166 million that the Senate added on, what percentage would that have to be? Is there an estimate the Senator can give us?

Mr. DOMENICI. I am told we would need between a 1- and 2-percent across-the-board reduction, if we include veterans medical care, in order to achieve savings of $166 million.

Mr. DECONCINI. That is 1.6 percent to 1.7 percent.

Mr. DOMENICI. Everything would have to be cut between 1 and 2 percent, including revenue sharing and veterans medical care, in order to preserve the veterans account as it is resulting from the Murkowski-DeConcini amendment.

Mr. DECONCINI. Wait a minute. If the Senator would just clarify that for me. Does the Senator mean getting it at the $100 million, it would take a 1.6 across the board?

Mr. DOMENICI. No. I did not do that because the Senator asked me to put it back where it was. It would be a 1.1-percent across-the-board reduction.

Mr. DECONCINI. One point six across the board to get the veterans to $100 million?

Mr. DOMENICI. It would get them the whole amount that the Senator reinstated.

Mr. DECONCINI. The $166 million?

Mr. DOMENICI. The Senator is correct.

Mr. DECONCINI. I thank the Senator.

Mr. DOMENICI. I think there is only one question—obviously, the Senate has to work its will. Does the Senate want to balance this bill or not? Does the Senate want to do it this way—not taking much out of veterans but taking a 2-percent reduction out of general revenue sharing?

There is also one additional question: Why not go back through the bill and, instead of taking a 2-percent cut from general revenue sharing, take an across-the-board cut from all programs within the jurisdiction of the subcommittee? I will tell you that an across-the-board cut is clearly an option. I am not going to do it. I do not intend to do it at this point. I may, but I do not intend to do it now.

I have talked with the chairman of the subcommittee. He has gone through the accounts and programs in this bill and has already reduced them substantially. We then took an additional 1.1 percent across-the-board reduction from these programs. The distinguished subcommittee chairman graciously supported that reduction. I am convinced that it would not be in the best interests of all of these terribly important programs—EPA, Superfund, National Science Foundation, and disaster relief to name but a few. I am convinced by the manager that it would be better to let you have your choice—supporting veterans a little bit more, and taking more reductions from revenue sharing.

I think this is a very well understood vote. Senators can make their choice whether or not they want this bill to be consistent with the budget resolution. From my standpoint, I believe that we have done a good job. But I do not think that we should be here forever. If the Domenici-Chiles amendment fails, I will vote against this bill and I will urge the conferees to bring it on target. If they did not, I would hope pressure would be put on them to do so.

Mr. FORD. Will the Senator yield for a question?

Mr. DOMENICI. I am pleased to yield.

Mr. FORD. The distinguished Senator from New Mexico made a statement that this was his proposal and others may have some other proposals. I asked a parliamentary inquiry a few minutes ago, when the Senator was off

the floor and called to another conference, and I and others are precluded from an amendment in the second degree under the unanimous-consent agreement. But if we were able to come in with some other alternative, something that would still arrive at the same amount, would the Senator be amenable to allowing an amendment in the second degree or modifying his amendment that was presented by the distinguished Senator from Utah?

Mr. DOMENICI. Well, let me just say to my good friend that I did not produce this amendment in a vacuum, as he well knows. I did it with negotiations with the distinguished Senator from Alaska, the floor manager, and Senator CHILES. I do not believe I can answer that question. I am willing to look at it.

Mr. FORD. If the Senator would look at it, would he consider that? I understand the situation and I am going to take a little while trying to find some alternative, because, as the Senator knows, we have not gotten to reconciliation yet. That reconciliation may leave us some surplus.

If we could get to reconciliation, then we would really know what we are doing here today and what the bottom line would be, even though we have a Senate budget level.

Mr. DOMENICI. Clearly, I say to the Senator, I am one who will look at anything that makes sense, and I assume he would be proposing something that makes sense. But, frankly, if the option is predicated upon what we might do in reconciliation, I would not do that.

Mr. FORD. No; I understand that. I am just making the point that we basically have the cart before the horse here and the final judgment has not been made and we will not get to even consider that final judgment until later this afternoon.

I thank the Senator.

Mr. EXON. Will the Senator yield?

Mr. GARN. Mr. President, I will yield in just a moment, after I further answer the question of the Senator from Kentucky.

I wish to say to the Senator from Kentucky—as I answered him privately a few minutes ago, I will answer him for the record—I would not consider granting a unanimous-consent agreement for the opportunity of an amendment until we had an opportunity to discuss the amendment. But, certainly, any alternatives he could come up with, I would be happy to look at them. If they are acceptable, something that would be reasonable, then I, obviously, for myself, would not object to a unanimous-consent agreement for a second-degree amendment. So when the Senator gets to the point that he has something to talk about, I am available.

Mr. FORD. Mr. President, I say to the distinguished Senator from Utah that the amendments to change the figures have never come from him. They have always come from the distinguished Senator from New Mexico. I thought he was the overriding authority here. Therefore, I was asking him for his decision. If I made a mistake, I apologize to the distinguished Senator from Utah.

Mr. GARN. No, the Senator from New Mexico is the sponsor of the amendment, but all of us have the right to object. So the Senator did not do it out of line.

Mr. President, I yield for a question or I will yield the floor.

Mr. EXON. Mr. President, I am wondering if the distinguished chairman of the Budget Committee would try to answer a question for me. I have been listening with great interest to the presentation made by the distinguished chairman of the Budget Committee, on which I am pleased to serve.

Is the chairman of the Budget Committee trying to tell the Senate that, if we are going to put more money in veterans' affairs, we are going to have to make some cuts someplace else to get that job done?

Mr. DOMENICI. The Senator has boiled it right down to its essence. If you want to bring the bill back to where we were last night when we adopted the amendment the Senator from Nebraska cosponsored, we have to find savings. We chose to find it in revenue sharing.

Mr. EXON. Mr. President, a follow-up question. Have the proponents of the amendment, either adding money back into revenue sharing or adding money back into veterans' affairs, proposed offsetting reductions in expenditures, either from other programs or across the board?

Mr. DOMENICI. No; they have not.

Mr. EXON. Was it not one of the great tenets of Gramm-Rudman, one of its principal parts—whether you might term that the spirit or whether you might term that the ghost of Gramm-Rudman—was not one of the tenets expressed therein that it would be a good idea that those who proposed increases would have to propose simultaneously an offset?

I recognize that Gramm-Rudman, unfortunately, has not been triggered at this time. But was that not one of the basic tenets of Gramm-Rudman?

Mr. DOMENICI. The Senator is correct. In terms of Gramm-Rudman, as it left the U.S. Senate floor, it is eminently clear that it is one of those so-called zero, no add-on bills. If you cause the deficit to go up you must find offsetting savings.

Mr. EXON. One last question. And I thank my friend for answering these questions and trying to clarify this for the Senator from Nebraska. Given that Gramm-Rudman is not now in effect, is it the feeling of the chairman of the Budget Committee that it would be inconsistent for those who supported Gramm-Rudman to fall out of its spirit at this juncture?

Mr. DOMENICI. I believe that is a fair statement. I will say that an interesting part of Gramm-Rudman-Hollings is that it would permit both institutions of the Congress, and the President, to look at their activities and priorities in terms of what it does to the Federal deficit. The pressure would be to cut each spending bill that is not in compliance with the spending targets established by the budget resolution. Each inaction and each action, each passage of a new entitlement, would be looked at against the targets we have established. If a Senator wanted to increase spending for his program, they would be imposing on the rest of the programs of the country. They would be saying, "To the extent that you are subscribing to an increase here, you are also subscribing to get an across-the-board reduction." I do not think anyone likes that.

Mr. EXON. I thank my friend from New Mexico for his answers to my questions.

Just maybe this colloquy will put a little heat on, that we had better start shaping up now if we are going to do what those proponents of Gramm-Rudman indicated with their vote last week.

I thank my friend from New Mexico.

Mr. DOMENICI. I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. Mr. President, I think the dilemma we are in this morning and last night really shows some of the tough decisions that Congress is forced to make anytime that you say you are going to abide by some kind of a ceiling. In this instance, we are talking about the allocation set by the Appropriations Committee from the figures that this body and the House voted on in the budget resolution.

Just a little of how the budget resolution works so people understand it—the budget resolution sets basically an overall number for outlays and for budget authority. Those are the only numbers that are binding on the Appropriations Committee. The Budget Committee makes some assumptions of how they reach those numbers. Those assumptions are given to the Appropriations Committee not as anything binding on the Appropriations

Committee, but just to show them how we arrived at our numbers.

I point out that those numbers are not binding on the Appropriations Committee. The Appropriations Committee can change the numbers within the different functions. If they think that more should be put in defense, and less should be put in highways or education, they have the authority to do that. Ultimately there has to be what we call a crosswalk in which the Appropriations Committee takes the money allocated by the Budget Committee, that budget authority number and that outlay number, budget authority being the authorization for programs and outlays being the actual spendout.

We know that these numbers can be different because when you authorize programs, the budget authority may spend out the same year, or it may not spend out for many years, as is the case for some of our housing programs. Then the Appropriation Committee has to take this allocation, and come up with a crosswalk.

They did it to this subcommittee chaired by the distinguished Senator from Utah, Senator GARN, and ranking member Senator LEAHY, and this allocation put them in a squeeze to start with, as we found in some of the other subcommittees we had.

The reason for that again, Mr. President, is that we made some savings in the discretionary programs. We go back to our budget. We did not get all we wanted. We did not do anything, of course, in providing the kind of revenue we needed but we did hit the discretionary programs pretty hard. This has made it tough on the Appropriations Committee. It certainly was very tough on this subcommittee to try to meet its numbers.

That is what the distinguished chairman and ranking member have tried to do. There was no formula that they could come up with which did not cause some pain. Even when the HUD Subcommittee finished all of their cuts, they still found they were out of balance by almost $800 million. They had to do something further. That was when the Appropriations Committee decided to reduce general revenue sharing this year.

This was not something, I know, that the Appropriations Committee wanted to do. It is not something that any of us want to do. But at some stage, and I think this series of votes is documenting this, there is no way that you can manufacture this money. If you do not take it from one place, you have to take it from another.

We had an across-the-board cut last night. That was taken on a voice vote. I think in hindsight—and hindsight is always better than vision—it would have been better for the Senate had we had a rollcall vote last night, because what the Senate was willing to do last night, it seems unwilling to do this morning.

Anytime we address the deficit, this body does not have any difficulty in voting for a low overall number. We pass the budget resolution and we pass an overall number. It even seems that this body can pass an overall percentage cut. Then you come down and address a specific program and that is when none of us want to vote that way. Who wants to vote against veterans?

Finally, Mr. President, I think you do reach a point, especially if you try to wear a budget hat, that you have to be willing to put it on. You have to be willing to say that if you are going to sort of talk that way and wring your hands and cry about these deficits, you have to be willing to try to make some of those cuts.

This next amendment that we are getting ready to vote on is not one that I would choose. I would do it a different way. I would have done it earlier in Appropriations Committee, a different way. But, Mr. President, now we have little choice and I am going to vote for the amendment. I urge the Senate to vote for it. I think the Senate has spoken, that they do not want to make further cuts in the veterans' medical care area, I certainly do not want to see cuts there, either. If we do not, then we have to be willing to take them in some other area. I believe every opportunity that comes before us to reduce the deficit within reason, we have to be willing to consider.

This is not going to be easy for our cities and counties, but it will not be easy anywhere we cut. If you look and see what the subcommittee has done, and review the cuts that they have already made to the existing programs, then it is very hard to keep going back, and now it will be for the third time we will be cutting a number of these other programs.

Based on the votes we have already taken, I feel this is an amendment that the Senate should be willing to vote for. We have already said no, we are not going to cut the veterans' programs.

A lot of us want to keep looking for another way. But this is simply a rehearsal of what we are getting ready to do when we get into Gramm-Rudman. Because we are talking about custs that are going to be even tougher, considerably tougher, and there is not going to be any running room because there is not going to be any place to run to to find free money. I think that will be a sorry situation.

Mr. FORD. Will the distinguished Senator yield for a question?

Mr. CHILES. I am happy to yield for a question.

Mr. FORD. Would my friend explain to me what position we are in now, legislatively, as it relates to spending, and the reconciliation that will be taken up this afternoon and that relationship to spending as it relates to the overall budgetary process?

Mr. CHILES. I will try to.

Part of the reconciliation process was that we were to order certain legislative changes to be made by the authorizing committees so as to effect some savings.

We also ordered certain savings to be made by the Appropriations Committee, and that is part of the dilemma we are in now.

We are going to take up this afternoon a bill that contains $85.6 billion over 3 years of deficit reduction or legislative changes that will bring us about $86 billion over the next 3 years. As part of the deficit reduction effort, the Appropriations Committee was supposed to cut $8.5 billion.

Mr. FORD. We are in the budget process now that was approved by conference. Now we are going into reconciliation in addition to that.

Mr. CHILES. Yes.

Mr. FORD. Is reconciliation the final stage and once that has been passed, that is the end of it?

Mr. CHILES. Well, that is the end of it, except, I would point out to my friend, if you do not get the savings from the $8.5 billion that we expect to get from the Appropriations Committee, all those bills will take even longer to pass. If we pass the reconciliation bill without major amendments, we will have invoked the changes in law that would provide 86 billion dollars worth of deficit reduction over 3 years. But the process will follow the appropriations bills through the entire cycle, including conference.

We have several Appropriations bills. This is not the only one that is over. The next one we will take up, the Transportation bill, is also over. There will be amendments to be offered on that bill. There is a problem with the Interior bill.

So we do have some problems coming along.

Mr. FORD. I understand that, but it is my understanding that once we get through with this procedure, we could very well be confronted with a cut under reconciliation in the same areas. Is that true?

Mr. CHILES. As the distinguished Senator from Kentucky knows, the reconciliation bill does not provide for the continuation of revenue sharing in the year 1987.

Mr. FORD. I understand that. I am trying to get away from this revenue sharing. It is interesting to talk about revenue sharing and the savings of $8.5 to $9 billion. You have not done very much if you have eliminated over the next 3 years $9 billion in revenue sharing. You have taken it basically all from one place. Everyone is trying

to spread around that $9 billion savings.

Mr. CHILES. But we have taken $86 billion over 3 years out of the entire framework of the programs.

Mr. FORD. But those programs are recurring and revenue sharing does not recur after October 1, 1986.

Mr. CHILES. Most of the terminations that the White House proposed have not been made. We did terminate several small programs, but in the main, we did not terminate most of the programs.

Mr. FORD. So the hurt here, as it relates to the communities, is terminal. We are looking at the Senate voting to reinstate it. It is true we did not put a provision in there as to where the offsetting would come from. In the veterans' vote this morning, there was not any offset there. It absolutely looks at the only place you can get money. Because you are in a hurry, you do not have an opportunity to think about it. We just proposed to take it out of revenue sharing because there is an immediate expenditure.

I am convinced that if revenue sharing takes a little bit, say half of what they are proposing, and three-tenths of 1 percent out of the rest of them would make everyone share the hurt equally; except several programs would share that three-tenths of 1 percent and revenue sharing would take half of the $100 million now going to veterans.

We talk about everybody sharing the hurt. Not only have you damaged revenue sharing in the future and none of the other programs, but you are also taking over $500 million out of revenue sharing this year.

The Senate, in its judgment, voted to delay all of this. But we here invoked Gramm-Rudman to go ahead and start it now and get in training. The training, I thought, had already started when they eliminated revenue sharing. I am just trying to protect some of those out there who have been depending on revenue sharing. Five months ago, we made a decision and that decision has been factored into budgeting at a local level. Now we are going to say to them, no, you are going to have to take less.

I see all the papers that are being shoved around—numbers, budget authority, budget outlay. We are approving programs today for 35 years under this bill—for 35 years we are approving them—there is not much outlay next year, practically none—but for the next 35 years, while we are building homes and then paying in this bill for the interest and carrying charges for the next 30 years.

If the house costs $80,000, we are adding another $80,000 to pay the interest and carrying charges so that one, single-family home costs $160,000. Yet we are saying to our communities, we are going to cut out revenue sharing from here on, after this fiscal year. Then we are going to cut you some more now.

There are some things we have not had an opportunity to argue. There is no way under our process to get back to it and we are locked in. I do not mind being locked in, but I want to know what kind of cage we are going to be put in. It seems unfair to me.

I am not opposed to veterans. I voted for it and will continue to vote for veterans and will not back off one minute. I know what will happen if we come after Superfund. But I guarantee that after this fiscal year, they will have money left over that we have appropriated for that they do not spend, because there is not any inclination in this administration to spend that money. Yet we are damaging other programs.

Mr. CHILES. Mr. President, the Senator from Kentucky makes an eloquent argument. He has been a champion of revenue sharing, having served as Governor and holding other offices in his State. I think he is very much in touch with counties and cities and what revenue sharing has done and the fact that it is a program that has not had the kind of redtape that we have in many of the other programs. It is a program where there have been more dollars actually available to States and it has allowed some flexibility, and many of our counties and cities have used that program very well.

It is a program that I wish we were not terminating, period. But we have decided that we were just lending our printing press to the cities and counties and that, overall, at some stages we could not say that we were doing the cities and counties or the people a favor when we are invoking these huge deficits.

I find myself in a dilemma because I, in effect, told a lot of our State people, "You have a year in which to get ready."

Mr. FORD. We broke our word.

Mr. CHILES. Except for the fact that you again come back to this ceiling and this is not the only program that we are cutting. If you do look at the list, I think you will find that there have been two rounds of cuts: One done by the chairman and ranking member in the subcommittee, another done here on the floor to the housing programs, to the Superfund programs, to EPA research and development programs, and to NASA. And these decisions are tough. Many of these programs affect my constituents, too. I have tried very hard in my lifetime here to protect NASA and many of these programs.

I remember when we almost lost the space shuttle by one or two votes because our good friend from Wisconsin said more money should go into inner cities, and we should not have an exotic program like that. I think there have been a lot of returns from the space shuttle program. But we have to make difficult choices there. But it is a tough time when we are facing these kinds of deficits.

Only, I think, if we can put our fiscal house in order can we set these priorities. I think that the Senator from Kentucky does realize, and he has already pointed out, that with the choices we are making now, this is the same kind of exercise we would face under Gramm-Rudman. Whether we put it off a year or not or even if it does not ultimately pass, if we are going to deal with deficits of $150 billion or $200 billion, we are not going to be able to do it and protect the kind of programs the Senator from Kentucky would like to protect and I would like to protect. We are going to face a lot more of these tough votes.

As he said, he voted for veterans because he wanted to. I had to make the difficult choice and vote to reduce the deficit. I wish I didn't have to make this vote. I wanted to do it another way. There are a lot of veterans in my State, but I found I could not speak out of one side of my month to them and out of the other side on the budget deficit. That is the kind of quandary it places me in, as this amendment does. I can think of a lot of ways that I would rather do this than to put this cut here.

I am sorry that the Committee on Appropriations did not look at a couple of these programs and say, "Hey, these are real tough areas and for the cuts we are going to have to make, we need some shifts in some programs and cuts from others." But there is a constituency for each one of the programs on the Appropriations Committee and each one of the other committees and everybody is there trying to say, "Hey, wait a minute, don't take anything out of our program and put it over there, let us divide up these things." That is the kind of position we are placed in.

Mr. FORD addressed the Chair.

The PRESIDING OFFICER (Mr. WILSON). The Senator from Texas.

Mr. FORD. Mr. President, let me take another minute or two. We are sort of groping and trying to come up with something to offset and I am not going to try to damage what the veterans have had done here. I am going to see if they can keep the amount we agreed to. I am trying to find some other method. Let me see if I can.

Mr. President, we are talking about getting our house in order, the fiscal problem that we have, the deficits that we have. We have told our communities throughout this great Nation that, beginning October 1, 1986, "Revenue sharing is gone. There will not be any more; we are giving you a year to get your house in order." Then we

turn right around and say, "In addition to that, we are going to cut another $500 to $600 million out. You are going to have to work a little harder to get your house in order."

Five months ago, we told them what they would receive and they have been working on that assumption.

That means, then, that we have broken our word. The only thing I am trying to do is figure out some way that we might be able to help those communities keep their house in order to work out their fiscal problems. I guarantee you that 30 percent of the counties in my State will be in a dilemma after October 1, 1986, because they do not have the taxable base in order to keep up some of the programs that are necessary in those poorer counties.

Mr. President, I am not here trying to argue against the veterans. I am not in a position and will not take a position to take any of that money away from them. I want them to keep exactly what they have. I voted for it; I think it is proper. But I think three-tenths of 1 percent coming out of some of these other programs will not hurt them one iota. It will probably help them from the standpoint of making their programs more efficient and getting more for their administrative dollar.

Mr. President, I am going, I hope, to have something to present to our ranking member and chairman shortly. I know I have taken longer than most people want me to, but this is a position that I think is a right position for me to take. As we talk about getting our house in order and we damage all the communities and counties across the State, I think we have real problems.

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that further proceedings under the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FERC NOMINATIONS

Mr. McCLURE. Mr. President, we have from the Energy and Natural Resources Committee reported the nominations of two persons to be members of the Federal Energy Regulatory Commission. The first was reported first in July and was not acted upon by the Senate in July. The nomination was resubmitted upon our return at the end of the August recess. The committee again reported that nomination but it has not yet been acted on by the Senate.

The second nomination is the reappointment of Mr. Anthony Sousa, and I take this time to urge that Members of the Senate move expeditiously to approve those nominations and particularly that of the reappointment of Mr. Sousa.

Section 401(e) of the Department of Energy Organization Act of 1977 provides that a quorum for the transaction of business shall consist of at least three members present at the Federal Energy Regulatory Commission. FERC currently has three sitting Commissioners: Chairman Raymond J. O'Connor, Commissioner Charles Stalon, and Commissioner Anthony Sousa, the latter being the one who has been renominated and whose nomination is pending before the Senate. Commissioner Sousa's term runs out at midnight Sunday, October 20, 1985, and since two seats are vacant the termination of his term will mean that the Commission will lose a quorum at midnight on Sunday night. They will then be unable to act on electric natural gas, hydroelectric, and oil pipeline rate matters pending before it.

FERC's next regularly scheduled meeting is Wednesday, October 23, 1985, and over 100 items are listed on the public agenda for the meeting. These agenda items include:

Sixteen gas pipeline rate suspension orders. Under the Natural Gas Act, if the Commission fails to act to suspend a gas pipeline rate filing within 30 days of the filing, the rate becomes effective by operation of law without Commission approval. These 16 gas pipeline rate filings will automatically become effective if the Commission does not act to suspend them by specified dates between October 23 and November 1, 1985. They include rate filings by United Gas Pipeline Co., Northern Natural, Great Lakes Gas Transmission Co., Northern Border Pipeline, and Northwest Pipeline Co. They also include "purchased gas adjustment" clause filings [PGA's] filed on a semiannual basis by ANR Pipeline Co., Transcontinental Gas Pipeline Co., El Paso Natural Gas, and Kentucky-West Virginia Gas Co., among others. If these PGA's are not suspended, the PGA's will go into effect for the next 6 months, the winter months, without Commission review of the gas purchasing practices of the pipeline involved.

There are six electric rate filings which will be effective unless suspended by Commission order by specific deadlines between October 29 and November 4, 1985. These electric rate filings include a $13.7 million rate increase by Connecticut Light & Power Co. and a $1.669 million rate increase by Pacific Gas & Electric for the Port of Oakland.

On October 15, 1985, Tennessee Gas Pipeline filed an out-of-cycle PGA under which Tennessee proposes to absorb up to $35 million of the $141 million in deferred costs it is entitled to recover from ratepayers due to undercollections in previous rates. The $35 million in savings to Tennessee's customers under the out-of-cycle PGA is contingent on immediate Commission approval, and at least $3 million in savings would be offset by the current higher rates for every week the PGA remains pending without action before the Commission.

SHORT-TERM ADVERSE CONSEQUENCES OF LOSS OF FERC QUORUM

If the Commission loses its quorum, it will be unable to approve a proposal by Tennessee Gas Pipeline Co. to reduce a surcharge currently being imposed on Tennessee's customers. The amount of the reduction is $500,000 per day. Thus, if the Commission were unable to act for 1 week, then Tennessee's customers would be compelled to pay an additional $3,500,000 in gas costs. This amount would be unrefundable, and it would be paid only because the Commission lacked a quorum and could not approve Tennessee's proposal.

In addition, if the Commission is compelled to cancel its scheduled meeting on October 23, then during the next 2 weeks six electric utilities would be permitted to begin collecting from their customers a total of $17 million in higher electric rates. These increased rates would be charged only because the Commission lacked a quorum and could not issue routine rate suspension orders prior to the suspension deadline for each rate increase request.

Mr. President, I take the time of the Senate at this time to make this statement only because I think it is important that those members who may have the opportunity to grant or withhold their comments, or those who desire to make some kind of debating points with respect to FERC practices, should be advised that indeed there are consequences to the failure to act.

As I said earlier, the nomination of one Commissioner was reported by the committee in July, and we did not act before the August recess. That nomination has been reported to the Senate again, early in September, and we have not acted.

We now have pending the nomination of the second of those commissioners, and it is important that Mr. Sousa's nomination be cleared, because there are only three sitting commission members; and under Commission practice and under the rule of courts, it is of doubtful legality for a commissioner to act who did not sit during the pendency of the hearings.

So, with respect to actions that would be taken even if Mr. Trabandt's nomination were cleared and Mr. Sousa's was not, there would be a problem with respect to Mr. Trabandt's functioning immediately upon being seated, because he was not

present at the time of the hearings with respect to these matters.

Mr. President, it is important that every Member of the Senate understand that there are consequences to the failure to act. I hope all Members are aware of this. As do those Members who are not present, I hope someone will get to them, as I have attempted to get to everyone, and inform them of those consequences.

In addition, Mr. President, Congress passed several bills in recent years that call for co-generation licenses and small hydroelectric projects. Those cogeneration and small hydroelectric projects amount to several thousand applications. FERC tried to exempt some of those thousands by issuing an exemption rule which would exempt the very small ones from the full licensing requirement. The courts were asked to overturn that decision and did overturn that decision, which means that every one of the nearly 5,000 license applications must go through full license review and process before FERC.

With a constrained membership of three commissioners over the last several months, let alone the lack of a quorum at the next meeting, starting next week, it is very difficult for them to handle that workload on any kind of reasonable time schedule.

It is not giant corporations involved in these licenses. It is oftentimes a very small project with local financing from members of the community who have decided to invest in a local project. A few thousand dollars to a few hundred dollars are involved in the amount of money they have put up. Many of those are time limited. They are time limited because they have negotiated contracts with the utility companies that would purchase the power. Those contracts oftentimes have a deadline: You must have the power to us by a certain date.

Many of them are getting dangerously constrained because of the time lines that are involved.

There are hundreds of investors in small projects who are in danger of losing their money—not because they are not right, not because they do not have a good project, but because the Federal bureaucracy has been unable to act on their applications. That is unfair—unfair to small investors across this land who acted in good faith, under laws passed by Congress and signed by the President.

So there is reason for us to be acting with some sense of urgency with respect to both these nominations.

There is a third nomination pending. We have just received those papers from the administration on Wednesday evening. The nomination is that of Mr. Naeve, from the State of Texas—a Democrat, well known to Members on the other side of the aisle, as well as to some on this side of the aisle, a man of exceptional talent and capability. I do not anticipate any difficulty in getting that nomination cleared very quickly in the committee and reported to the Senate for confirmation.

I mention that only because I am trying to indicate that the administration has submitted the nominations and the committee has acted expeditiously. It is this body that holds the responsibility for holding up these nominations, and again, Mr. President, there are consequences to that delay.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

HUD APPROPRIATIONS, 1986

The Senate continued with the consideration of the bill (H.R. 3038).

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WARNER). Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, we are waiting for clearance on the other side, on the unanimous consent request that either I would make or Senator GARN would make to permit me, for myself, Senator CHILES, Senator GARN, and Senator LEAHY, to submit a modification to the amendment that is pending. We have not received clearance on that yet. So I will not seek the consent, but I will quickly try to explain what I am trying to do on behalf of those four Senators. I would like to add that Senator DURENBERGER, who has had a genuine interest in the revenue sharing issue, has worked with us on this modification. In essence, this modification would do the following:

It would pick up $50 million of the necessary savings from general revenue sharing as opposed to the original proposal of $100 million. Thus, the percent reduction for revenue sharing would be 7.2 percent. We will get $50 million of savings from revenue sharing, as I described, and then at the direction and with the suggestions of the distinguished manager, we will take $50 million out of various management and administration programs. These include HUD management and administration, EPA salary and expenses, FEMA salary and expenses, NASA's research and program management, VA medical administration and miscellaneous operating expenses, and VA general operating expenses. These reductions will add up to $50 million and are itemized in the amendment. Everything else is intact.

When I have clearance, I will ask unanimous consent that I be permitted to so modify the pending amendment, I understand from the managers that the modification would be generally acceptable to those who have been on the floor. I understand we will then go to final passage and have a final vote.

Mr. DECONCINI. Mr. President, will the Senator from New Mexico yield?

Mr. DOMENICI. I am pleased to yield.

Mr. DECONCINI. I think I heard the Senator correctly. If this amendment were modified and passed, under the request the Senator may make shortly, this would leave $100 million net in the VA medical health care area pursuant to the original intent of the Senator from Alaska.

Mr. DOMENICI. Net add-back.

Mr. DECONCINI. Net add-back.

Mr. DOMENICI. The Senator is correct.

Mr. DECONCINI. I thank the Senator.

Mr. President, will the Senator yield the floor?

Mr. DOMENICI. I yield the floor.

Mr. DECONCINI. Mr. President, I am not going to object to whatever modification that the Senator from New Mexico makes. I do so reluctantly because the additional reductions that are here are in the veterans areas of some $18 million in administrative areas, but reluctantly we have at least been able to succeed in and retain the $100 million that the Senator from California and the Senator from Alaska originally got the subcommittee chairman to approve. So this Senator is not going to object, although we are not wild about taking $18 million out of this area of administrative expenses.

But we will let it go to conference and hopefully be able to work it out. The distinguished chairman of the committee has been a strong supporter of Veterans' Administration administrative expenses and realizes the importance of those. I will leave it in his able hands and those of the ranking minority member who are both committed to this agency to be sure that adequate funds and sums are available so those agencies are not crippled.

Mr. GARN. Mr. President, let me assure my colleague from Arizona and also from Alaska that there are cuts through all of the agencies in these categories, administrative expenses and personnel.

But we are more than $2 million in budget authority under the House of Representatives and we are several hundred million dollars under the budget outlays.

I have been around this body long enough to know that I do not always get the Senate position. So I would alleviate some of the Senator's concern by expecting that the House of Representatives would insist on some of these cuts being restored and they would not remain at these levels.

This is going to be a difficult conference. There is going to have to be a lot of horse trading to get a bill put together. So I would expect some cuts to remain in these areas as much as I can keep, but I would also expect the House of Representatives to expect some of them restored because they are so much higher in many areas than we are.

Mr. DECONCINI. I thank the chairman.

Mr. MURKOWSKI. Mr. President, in the spirit of accord I certainly want to indicate that I do appreciate very much the understanding of my colleague from Utah in trying to reach a resolve.

I would like to particularly note in the area of budget authority the $18 million that has been reduced in the administration area and the management area of veterans, known as GOE and MAMOE, which equates to $14 million in outlays, while a difficulty, represents, I think, a spirit of compromise in relationship to the necessity of the overall cuts that have to be made.

I do want to note for the record, however, Mr. President, that the VA medical care account remains intact, the $100 million, as indicated by the chairman of the Budget Committee. In the medical account, the figure would be $9,162,694,000, which I think supports the continued commitment by the Congress, and the Senate particularly, to ensure that VA medical care is fully funded.

Mr. President, I am pleased that we finally have an agreement with the chairmen of the Budget Committee and Appropriations Subcommittee, regarding the appropriations level for VA medical care.

This has been a long and arduous process but one which has come a long way toward alleviating my concerns that the VA had been subjected to a disproportionate share of funding reductions.

Throughout this entire process I have attempted to strike a balance between adequate funding for VA medical care and the need to control spending in an effort to come to grips with a spiraling Federal deficit. I believe this objective has been accomplished.

I wish to thank my colleague from Arizona, Senator DECONCINI, and my absent colleague from the minority side on the Veterans' Committee, Senator CRANSTON, who cannot be here today.

I yield the floor.

Mr. DURENBERGER. Mr. President, I will be brief. I wish to acknowledge my support of the compromise agreement worked out in the amended amendment by the chairman of the Budget Committee. As I understand the net effect, then, of what we have accomplished at the expense of some small reduction in various other programs in this area, we have reduced general revenue sharing for fiscal 1986 by $328 million, in effect having restored $242 million that was deleted by the committee from this account.

Before I leave the subject, however, I would just remind my colleagues that their votes yesterday indicated opposition to taking any money out of general revenue sharing for this year, because this body had decided to take $8.8 billion away from State and local governments in this country starting at the end of this coming year. It is a little hard, when I go back to those small towns and I watch property taxes going up in response to the fact that we are just dumping responsibility back on those people hand over foot, to have people stand here and say, "Well, we have saved some money for this agency and we have saved some money for that agency and we didn't get rid of the bureaucrats in the Veterans Administration. Hip, hip, hooray."

I just want them, as they go back to these communities, to remember that they have saved another nonneeds tested, nonmeans tested program for a group of people to whom we have a moral commitment but at the expense of a deficit that is making it difficult for all of us to handle the real needs of people in this country.

So I expect for the next couple of years we will be down here talking about saving agencies, playing with numbers, and forgetting about talking about people. There just has not been any talk, in the 24 hours I have been on this amendment, about people, about Americans and about our role in responding to their needs. I suspect this is just the beginning of many years of doing this sort of thing.

But, in this particular case, Mr. President, I believe that those responsible Senators in the appropriations process and in the budget process have discharged their responsibilities well and that the outcome that is being presented to us now is the best outcome that this body could come up with, even though it has taken some time to accomplish it.

Mr. MURKOWSKI. Will the Senator yield?

Mr. DURENBERGER. Yes, I will yield.

Mr. MURKOWSKI. I would just like to call attention to the reference of sacrifices of people here. I would like to point out that the veterans have indicated support, at least on the Senate side, for the means test and third-party reimbursements. These two proposals are a significant step toward reducing overall costs, and have been instituted in the Senate reconciliation proposal. I think this represents a responsible effort, if you will, to address the needs of the people by the people helping themselves.

Mr. DURENBERGER. And in helping us with the deficit. I regret that I did not acknowledge the efforts of the Senator from Alaska and others—not everybody in this place—a few people who have tried to make sure that those resources that are available to us are used more efficiently.

Mr. FORD. Mr. President, first let me thank all of my colleagues for working so diligently to arrive at this point of apparent agreement. This has been a tough choice. We all understand that. But we have all kept our good humor. We have made every effort to work it out. It is a continuation of reduction, and pressure on the chairman and ranking member of the Appropriations Subcommittee. Everybody here has worked diligently.

I compliment my colleague, Senator DURENBERGER, from Minnesota, for his effort in this respect. I think he has worked hard. Senator MURKOWSKI, from Alaska, has been more than helpful in working out our situation, along with Senator GARN, Senator LEAHY, Senator DOMENICI, and Senator CHILES. This is, I believe, symbolic of the future and this is symbolic of what we are going to find ourselves in. So I just want to compliment them. I am glad that, hopefully, we are at the point of accepting this amendment.

I yield the floor.

Mr. DOMENICI. Mr. President, I put a unanimous-consent request to the Chair that the modification which I described, and had sent to the desk on behalf of the manager and ranking member, Senator CHILES and myself, be in order. I understand now there is no objection to that. I restate my unanimous-consent request that I be permitted to so modify the amendment.

The PRESIDING OFFICER. The Chair is advised that the amendment has just reached the desk.

Mr. DOMENICI. The Chair is correct.

The PRESIDING OFFICER. Without objection, the pending amendment is so modified.

The modification to amendment No. 811 reads as follows:

On the second page of the pending amendment, strike out "8.3 per centum" and insert in lieu thereof "7.2 per centum".

At the end of page 2 of the pending amendment add the following:

Notwithstanding the provisions of titles I and II of this Act, the following accounts are reduced in budget authority by the following amounts:

Management and administration (HUD) $10,000,000; salaries and expenses (EPA) $10,000,000; salaries and expenses (FEMA) $10,000,000; research and program management (NASA) $15,000,000; medical administration and miscellaneous operating expenses (VA) $3,000,000; and general operating expenses (VA) $15,000,000.

The PRESIDING OFFICER. The Chair now turns to the unanimous-consent request. Is there objection?

Mr. EXON. Reserving the right to object, and I proably will not object. If

I understand the unanimous-consent request by the distinguished chairman of the Budget Committee, it would be that we would have a vote on the amendment that is before us now, as amended, and then move immediately to final passage of the bill, is that correct?

Mr. DOMENICI. The distinguished Senator from Nebraska is not correct. I did not feel it was my prerogative to do that. I merely sent the modification to the desk. I understand the floor manager is going to ask for final passage at a given time.

Mr. EXON. I have no objection to the request by the Senator from New Mexico.

The PRESIDING OFFICER. The question is on the pending unanimous-consent request. Is there objection? Without objection, it is so ordered.

Mr. GARN. Mr. President, I ask for the yeas and nays on the modified Domenici amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GARN. Mr. President, I ask unanimous consent, upon the the disposition of the Domenici amendment, that it be immediately followed by rollcall vote on final passage, and I ask for the yeas and nays.

The PRESIDING OFFICER. The Chair wishes to consult with the Parliamentarian.

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, I ask unanimous consent that upon the disposition of the Domenici amendment a vote occur on final passage without any intervening debate.

The PRESIDING OFFICER. Is there objection? Hearing no objection, it is so ordered.

Mr. GARN. Mr. President, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, I ask unanimous consent that all Senators be allowed to put statements in the RECORD prior to the final vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EXON. Mr. President, I am very pleased with the compromise that has been worked out by the distinguished manager of this bill, the Senator from Kentucky, Senator DECONCINI, the chairman of the Budget Committee, and others. I think it is a responsible move, and what the Senators have been trying to do for the last 2 days in the U.S. Senate is simply say let us have some recorded votes on how the people stand on some of these issues. I believe the compromise that has been worked out is a good one. It does not do great harm, in my opinion, to the matter of revenue sharing. It also establishes some needed additional funds for the veterans' facilities. I think there might not be amendments that everyone can agree to, but I think it is a step in the right direction as far as responsibility in this body is concerned. I thank those who put it together. I intend to support it.

(The name of Mr. THURMOND was added as a cosponsor of amendment No. 811, as modified.)

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah, as modified. On this question, the yeas and nays have been answered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Arizona [Mr. GOLDWATER], the Senator from Texas [Mr. GRAMM], the Senator from Utah [Mr. HATCH], the Senator from Nevada [Mr. LAXALT], the Senator from Maryland [Mr. MATHIAS], and the Senator from Connecticut [Mr. WEICKER] are necessarily absent.

Mr. BYRD. I announce that the Senator from Texas [Mr. BENTSEN], the Senator from California [Mr. CRANSTON], the Senator from Illinois [Mr. DIXON], the Senator from Colorado [Mr. HART], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Rhode Island [Mr. PELL], the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

I also announce that the Senator from Michigan [Mr. LEVIN] is absent because of death in the family.

I further announce that if present and voting, the Senator from Rhode Island [Mr. PELL] would vote "yea."

The PRESIDING OFFICER (Mr. EVANS). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 82, nays 3, as follows:

[Rollcall Vote No. 233 Leg.]

YEAS—82

Abdnor	Byrd	Durenberger
Andrews	Chafee	Eagleton
Armstrong	Chiles	East
Baucus	Cochran	Evans
Biden	Cohen	Exon
Bingaman	D'Amato	Ford
Boren	Danforth	Garn
Boschwitz	Denton	Glenn
Bradley	Dodd	Gore
Bumpers	Dole	Gorton
Burdick	Domenici	Grassley
Harkin	Mattingly	Rudman
Hatfield	McClure	Sarbanes
Hawkins	McConnell	Sasser
Hecht	Melcher	Simon
Heflin	Metzenbaum	Simpson
Heinz	Mitchell	Specter
Helms	Moynihan	Stafford
Hollings	Murkowski	Stevens
Humphrey	Nickles	Symms
Inouye	Nunn	Thurmond
Johnston	Packwood	Trible
Kassebaum	Pressler	Wallop
Kerry	Proxmire	Warner
Lautenberg	Pryor	Wilson
Leahy	Quayle	Zorinsky
Lugar	Kiegle	
Matsunaga	Roth	

NAYS—3

DeConcini	Kasten	Long

NOT VOTING—15

Bentsen	Hart	Mathias
Cranston	Hatch	Pell
Dixon	Kennedy	Rockefeller
Goldwater	Laxalt	Stennis
Gramm	Levin	Weicker

So the amendment (No. 811), as modified, was agreed to.

Mr. GARN. I move to reconsider the vote by which the amendment was agreed to.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Mr. President, I thank the Chair. May we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. BYRD. Mr. President, I thought this would be a particularly good time to hear from the majority leader as to the program he anticipates for the rest of the day, rollcall votes, and also what we might expect for Monday.

Mr. DOLE. Mr. President, if the distinguished minority leader will yield, we have one more vote that will follow immediately on passage of this appropriations bill. Then it was my hope that we could turn to the Department of Transportation appropriations bill and dispose of that this afternoon, then move on to reconciliation and get a couple of hours sliced off of that time.

Then, on Monday, at 10 o'clock, we will take up the Labor-HHS appropriation; after Labor-HHS, resume the reconciliation bill; on Tuesday morning, the Interior appropriations and State-Justice-Commerce appropriations, and reconciliation, and hopefully, on Wednesday, turn either to the textile bill—I guess we would turn to the textile bill, because I indicated if we finished reconciliation we would do that—and the farm bill. But I know what is happening here this afternoon. I understand now that those who wanted to manage the DOT appropriations bill feel it is going to take much more time than they thought. So if we could work out some arrange-

ment to get some credit on the statutory time on reconciliation, what we might be willing to do is have this vote, more to reconciliation, and not bring up the DOT appropriations bill.

Mr. BYRD. Mr. President, may I say to the distinguished majority leader that the taking up of the transportation appropriations bill has been cleared on this side of the aisle. There are several Senators—I anticipate this is the case on both sides of the aisle—who are scheduled to catch planes out of Washington this afternoon. I hope that we would be able to accommodate them.

There will be a rollcall vote on passage, I take it. Then, as I say, there would be no objection to the majority leader's proceeding either to the reconciliation measure or to the transportation appropriations bill.

If it will help the majority leader, I should be glad to counsel with Mr. CHILES on this side of the aisle. There might not be any objection to charging some reasonable amount of time against the reconcilation measure so that the majority leader could let Senators leave, or stay if they want.

Mr. DOLE. Let me advise my colleagues, I know there are several under pressure because of other commitments that there will be no votes after this one, but we will turn to reconciliation.

Mr. McCLURE. Will the majority leader yield?

Mr. DOLE. Yes, Mr. President.

Mr. McCLURE. I still hope that it would be possible for us to move to the Executive Calendar on the nomination of Mr. Sousa to the Federal Energy Regulatory Commission. As I said earlier today, his term expires on Sunday and the board will be without a quorum. They have a regularly scheduled business meeting on next Wednesday, with over 100 items on that business meeting agenda. It is important to keep that Commission in business if we can to deal with matters that have a great deal of importance to a great number of consumers in this country, as well as business entities.

Mr. BYRD. If the distinguished Senator will allow me to interrupt him, we have no objection to calling it up this afternoon. We had our problem in the main resolved when the White House saw we meant business about these recess appointments. So there is no problem with that.

Mr. McCLURE. I thank the minority leader very much.

Mr. DOLE. Mr. President, let me indicate to our colleagues that there will be this vote, then we will move to reconciliation, stay on that 2 or 3 hours unless we can work out some accommodation. There will be no more votes this afternoon other than this final vote on HUD appropriations.

Mr. BYRD. Mr. President, how early will rollcall votes begin on Monday, in the opinion of the distinguished majority leader?

Mr. DOLE. I would rather not say, because if I say it out loud, nobody will show up.

Mr. BYRD. Just tell me.

Mr. DOLE. I will tell the minority leader and he can notify those who have critical problems.

Mr. HARKIN. Mr. President, will the distinguished majority leader yield for a question?

Mr. DOLE. Yes, I yield for a question.

Mr. HARKIN. The majority leader said something about the farm bill, and I am trying to get an idea. Did he say that it was his intention to bring up the trade bill prior to the farm bill or the farm bill prior to the trade bill?

Mr. DOLE. I made a commitment to both Senators from South Carolina that when we completed reconciliation we would go back to the Micronesia bill, which has the textile bill attached, or is sought to be attached. I would hope, if we could reach that point, we could double-track that and still do the farm bill in the afternoon and the other in the morning. So hopefully by next week, but I cannot guarantee we would be on the farm bill, which is of critical importance to the Senator from Iowa, the Senator from Kansas, and many others.

Mr. HARKIN. Will the majority leader yield for another question?

I have heard some rumblings about maybe an attempt to put the farm bill on reconciliation. I wonder whether the distinguished majority leader has contemplated that.

Mr. DOLE. We contemplated it, but I think we decided it would not be a very good idea. I have not spoken to the chairman of the Agriculture Committee, but I think there has been some general agreement to bring it up and work it out on a bipartisan basis.

Mr. DODD. Will the majority leader yield?

I was present yesterday when the Senator gave what I thought was a very excellent speech at the groundbreaking ceremony of the Holocaust Memorial Museum and announced at that particular point that the Genocide Convention would be a matter that this body would consider and hopefully ratify. Is there any timetable the majority leader has for the consideration of that matter?

Mr. DOLE. We would be happy to try to work that out with the Senator from Connecticut. I know of his interest in that. But let us go ahead with the vote and maybe we can talk about it during the vote.

Mr. LEAHY. Mr. President, it has been a pleasure to work with the gentleman from Utah. We have worked hand in hand to produce a fiscally responsible bill. We have had to make hard decisions. Many of the cuts made in this bill I would have avoided. I would rather have taken excessive spending out of foreign aid and defense accounts, rather than make some of the cuts made in this bill.

Unfortunately, our congressional process will not permit this action on this bill. To comply with our budget process we have to make the difficult cuts we have made. I look forward to the conference where I expect a number of these accounts will be adjusted.

Finally, I want to express my personal thanks to the staff of the Senate Appropriations Committee, especially Stephen Kohashi, Marty Reiss, Cynthia Davis, Dorothy Douglas, and Jim Cuhie of the minority staff.

They have done an excellent job. I urge the adoption of the bill.

Mr. SPECTER. Mr. President, the Senate has made some hard choices in coming up with today's bill. I heartily commend them for their efforts to reconcile the urgent necessity of reducing the budget deficit with the equally pressing need to provide adequately for this country's requirements in the areas of housing, the environment, veterans' programs, and others.

For a Senator from Pennsylvania, the vote on this bill is particularly difficult. The series of cuts proposed by the committee strikes at programs extremely important to my State, large portions of which remain in severe economic distress. At a time when the effects of recession are lingering in some places, or growing worse, the bill makes cuts in such vital programs as community development block grants and public housing operating subsidies. Communities with declining tax bases because of dying industries, where unemployment is high and income notoriously low, can ill afford these further cuts in their lifelines.

There are other cuts in this bill that equally concern me. At the same time that it is fighting a tendency to become poorer in jobs, Pennsylvania is unfortunately rich in toxic waste sites. Pennsylvanians will find it extremely difficult to understand what set of priorities could lead to a $100 million cut in budget authority for Superfund, and a $35 million cut in outlays, when the need for cleanup is so urgent. Similarly, in a year when Pennsylvania has suffered tornadoes, floods, and hurricanes, the idea of reducing FEMA disaster relief will strike most Pennsylvanians as perverse.

Equally high on my list of concerns are proposed cuts in funds for VA medical care. As I have stated many times, I consider veterans' benefits not as gifts or grants, but as debts or contractual obligations that the U.S. Government owes to the former members of its military service and that we are not free to abrogate at our convenience. This position has consistently been reflected in my votes on the

Senate floor and as a member of the Veterans' Affairs Committee.

The priorities expected in this bill do not satisfy the need of Pennsylvania, but I acknowledge that if it is the best that can be done given budget constraints and so many important programs competing for so few dollars.

Despite these concerns, it is my conclusion that a vote against final passage of this bill would be an empty gesture. The business of Government must go on in an orderly manner, and the passage of Appropriations bills is important for that reason.

I will reluctantly vote for this bill, but I will continue to fight to gain adequate appropriations for the programs that are most important to Pennsylvania.

A WORTHY PROGRAM WHICH SHOULD BE CONTINUED—THE HUD NEIGHBORHOOD DEVELOPMENT DEMONSTRATION PROGRAM

Mr. DIXON. Mr. President, yesterday the Senate agreed to an amendment to H.R. 3038, which was offered by Senator HEINZ for himself, this Senator, and others, to appropriate $2 million to continue the Neighborhood Development Demonstration Program [NDP]. I had intended to speak in support of the amendment but was detained from the Senate floor during the time that the amendment was offered.

I am pleased that the Senate in its wisdom agreed to the amendment.

I support NDP because it is a worthy program whose activities include the creation of permanent neighborhood jobs, the establishment or expansion of businesses within the neighborhood, and the development, rehabilitation, or management of neighborhood housing stock.

Neighborhood development organizations participating in this program are selected by the Secretary of HUD through a competitive selection process.

Mr. President, I am pleased to state that three neighborhood development organizations in the city of Chicago were selected for grants awards. Uptown Chicago Commission was awarded $40,000, and the 18th Street Development Corp. was awarded $50,000, and Northwest Neighborhood Federation was awarded $49,900.

This is a program that should be continued and I am pleased that my colleagues have agreed.

Mr. MOYNIHAN. Mr. President, last week, a majority of Democratic Senators, 27 in all, voted for the Gramm-Rudman amendment to force a balanced budget by a sequence of obligatory cuts in spending.

This week, we have had the opportunity to test this conviction.

There have been three specific votes to the HUD appropriations bills which in effect increased spending: 23 of the 26 Democrats who voted for Gramm-Rudman also voted to increase revenue sharing; 17 of 26 voted against a cut in housing programs; 23 of 26 voted against the elimination of urban development action grants.

For some time, the Republican Members of the Senate have been feeling the edges of the box they are in.

I fear this is now happening to Democrats as well. we know very well that most of us believe in these programs. Why have we done this to ourselves?

Mr. DURENBERGER. Mr. President, yesterday, we decided—by a vote of 57 to 39—to restore not partial but full funding to the General Revenue Sharing Program. We did that not once, but twice. Each time by the same unequivocal margin of 18 votes.

We did that because the General Revenue Sharing Program is the single most efficient and effective way we have of aiding needy local governments. Each one of us—all 57—knew that our votes were not votes to put money in the hands of mayors and councils for themselves—it was a vote to fund the poor people of this Nation's poor communities. It was a vote for basic public services.

We voted for GRS because we refused to break faith with over 30,000 local governments we count on to provide these services and who are now counting on us to live up to the promise we made in the first budget resolution.

The budget resolution guaranteed full funding in what we all know is the last year of the best and most efficient Federal aid program we have.

In the Finance Committee we made that promise when we decided to fully fund GRS for this fiscal year and we affirmed that decision on the floor when we passed the budget resolution.

Last night I showed myself to be a reasonable man. In the name of reducing the deficit I agreed—reluctantly—to a 6.1-percent cut in the program. The same program to which, just yesterday morning, we voted to restore funds. But, in the name of reasonableness, I agreed to the compromise despite the overwhelming support of 57 Senators for full funding.

Now, I am asked to vote to take $50 million more out of GRS to restore VA programs.

In the name of fairness to the 30,000 governments that are counting on us, I must register my dismay at the latest assault. I am sorry that it had to come to this.

While I strongly resent being forced to compare VA programs to revenue sharing, that is exactly the position I have been put in by this amendment. It is a quirk of this budget process which forces us to find cuts for the current fiscal year from those programs that do spend down efficiently without regard for the merits of the programs. It is this logic that saves UDAG—a program that goes to what 60 or at most 100 cities, is not needs tested—and cuts general revenue sharing—a program going to 30,000 communities whose formula for distribution most strongly reflects the fiscal capacity of these communities.

And what of such a comparison. I do not find GRS coming up short on such a comparison.

GENERAL REVENUE SHARING FACTS

GRS is virtually the only program that seeks to lessen fiscal disparities among States. Its goal is to strengthen our Federal system by strengthening those governments that have the greatest need but fewest resources.

GRS is the only program that goes to practically every local government in the country, including more than 30,000 local governments which receive no other form of Federal aid.

Nationwide, GRS is equal to about 8 percent of local tax revenues, although the real value of payments has declined to about 63 percent of the 1977 value.

GRS moneys are distributed in a targeted manner. The most generous per capita payments are made to poor rural communities and financially troubled major cities. Per capita payments ranged from almost $30 in the poorest communities to less than $5 in the Nation's wealthier jurisdictions.

GRS minimizes redtape and burdensome requirements. A local government is only required to submit two simple forms to receive its payments.

GRS maximizes flexibility and local decisionmaking. Local governments use GRS funds for a variety of needs and capital improvements. However, because the distribution formula includes a measure of tax effort, there is a strong incentive for local governments to rely more heavily on their own resources.

GRS funds are used to maintain roads, highways, and bridges and to build jails and sewage and water treatment facilities. Increasingly, local governments use their allocation for unfunded mandates imposed by other Federal programs, such as environmental regulations and handicapped access requirements. GRS dollars are also used for service to the poor and elderly, such as Meals on Wheels, indigent health care, and nursing homes.

And what about VA medical programs. I could argue that VA medical programs are not means tested—any vet can use them. We may not be able to afford that luxury any longer.

I could argue that while VA hospitals have 85 percent of their beds filled most of the time, those beds are often filled by people who stay longer than they need to. They stay in the hospital when they ought to be at home.

I could argue that we are building VA hospitals when we can't fill the ones we have.

I could argue that the VA has a bloated bureaucracy. I could argue all of these things. But, the comparison is almost aside the discussion these days when numbers are all we talk about and the quirks of budgets drive the choices we make about important programs, pitting one unfortunate program against another.

And what about GRS? GRS is directed toward the poorest communities in each of your States. Now a cut in VA medical care will not require a veteran to be turned away at the door. It's tough, I know, but he won't be turned away. A cut in general revenue sharing will close down public services in the poorest communities across this country. Yesterday, my colleague from Pennsylvania described the situation in small communities in his State. I can tell you on my visits in outstate Minnesota that the rural economy and the small towns are dying. GRS shores them up for a little while at least.

In Minnesota in a little town called Winnebago, population 1,800; much of the population is aging and everyone is feeling the effects of a weak farm economy. Winnebago needs many things. Today, it needs a new ambulance—an ambulance the town had planned to buy with funds from general revenue sharing. If we pass this amendment. Winnebago will be unable to buy its ambulance.

That's the choice we face. While I may have to vote for this amendment, I realize what it means. I hope we all realize it.

Mr. KERRY. Mr. President, I rise today to express my opposition to proposed cuts in funding for the General Revenue Sharing Program.

General revenue sharing has long been regarded as an important tool in the fiscal and economic planning of our local governments. As several of my colleagues have pointed out during discussions over the last 2 days, this body made a commitment to our cities and towns with the passage of the budget resolution. That commitment was for a full funding level of $4.6 billion for general revenue sharing. Our local governments relied on that commitment in putting together their budgets for fiscal year 1986. Today, we turn around and ask them to disregard our prior commitment, to alter budget plans already in place, and at a moment's notice, to find additional sources of revenues.

The reductions being deliberated by this body today will mean a loss of some $328 million in general revenue sharing funds, funds that go toward providing a variety of services to more than 39,000 local communities; services such as fire and police protection, education, health and sanitation. These services in turn result in positive commercial development, meaningful job training and creation, as well as critically necessary human services. In my home State of Massachusetts, a reduction in general revenue sharing funds will amount to a $9.2 million loss to local governments in 1986. More than half of these funds, roughly 60 percent, go toward police and fire protection.

In Massachusetts, the loss of general revenue sharing funds will be particularly hard felt due to the existence of proposition 2½. This law constrains local communities in their ability to set new tax rates and thereby offset the losses that will ensue in the absence of general revenue sharing funds.

Mr. President, I am fully aware of the urgent need to reduce our enormous deficit and to begin to control Federal spending. I do not, however, feel that it is either fair or wise to ask our local governments to shoulder such a burden when they have relied on the projections made by this body months ago. Moreover, we should bear in mind that our cities and towns are already faced with reduced funding in other local development programs such as the Community Development Block Grant Program [CDBG] and the Urban Development Block Grant Program [UDBG]. We have an obligation to send clear signals to our local governments. Proposed reductions in general revenue sharing, a program scheduled to terminate at the end of next year, does not meet this obligation and I once again voice my opposition.

AMENDMENT TO EXEMPT VA MEDICAL CARE FROM 1.1 PERCENT ACROSS THE BOARD CUT

Mr. THURMOND. Mr. President I am pleased to join Senator MURKOWSKI and others once again in sponsoring an amendment to H.R. 3038 which would ensure that funding for the Veterans' Administration health care system is maintained at the proper level. We cannot continue to provide our Nation's veterans with the medical care they need and deserve if further cuts in spending are allowed to occur.

Yesterday morning the Senate adopted an amendment, which I cosponsored, that would restore $100 million of the $296 million cut from the VA health care by the Appropriations Committee. After having restored that money, the Senate adopted an amendment to reduce the level of funding for HUD and independent agencies by 1.1 percent across the board. The effect of that amendment was to once again cut needed funds from VA medical care. The amendment we have before us now would once again restore the funding for VA medical care to a more appropriate level.

Mr. President, as I have said many times before, I understand the need for reductions in Federal spending. I understand that we must make difficult decisions in order to meet those reductions. I do not feel, however, that the decision to further reduce the level of funding for veterans' health care is a proper one.

I hope my colleagues will agree with me and I urge them to support this amendment.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

Mr. GARN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Arizona [Mr. GOLDWATER], the Senator from Texas [Mr. GRAMM], the Senator from Utah [Mr. HATCH], the Senator from Nevada [Mr. LAXALT], the Senator from Maryland [Mr. MATHIAS], and the Senator from Connecticut [Mr. WEICKER] are necessarily absent.

I further announce that, if present and voting, the Senator from Utah [Mr. HATCH] would vote "yea."

Mr. BYRD. I announce that the Senator from Texas [Mr. BENTSEN], the Senator from California [Mr. CRANSTON], the Senator from Illinois [Mr. DIXON], the Senator from Colorado [Mr. HART], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Rhode Island [Mr. PELL], the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

I also announce that the Senator from Michigan [Mr. LEVIN] is absent because of death in the family.

I further announce that, if present and voting, the Senator from Illinois [Mr. DIXON], the Senator from Rhode Island [Mr. PELL,] and the Senator from West Virginia [Mr. ROCKEFELLER] would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 76, nays 9, as follows:

[Rollcall Vote No. 234 Leg.]

YEAS—76

Abdnor	Burdick	Denton
Andrews	Byrd	Dodd
Baucus	Chafee	Dole
Biden	Chiles	Domenici
Bingaman	Cochran	Durenberger
Boren	Cohen	Eagleton
Boschwitz	D'Amato	East
Bradley	Danforth	Evans
Bumpers	DeConcini	Ford

Garn	Leahy	Quayle
Glenn	Long	Riegle
Gore	Lugar	Rudman
Gorton	Matsunaga	Sarbanes
Grassley	Mattingly	Sasser
Harkin	McClure	Simon
Hatfield	McConnell	Simpson
Hawkins	Melcher	Specter
Hecht	Metzenbaum	Stafford
Heinz	Mitchell	Stevens
Hollings	Moynihan	Thurmond
Inouye	Murkowski	Trible
Johnston	Nickles	Wallop
Kassebaum	Nunn	Warner
Kasten	Packwood	Wilson
Kerry	Pressler	
Lautenberg	Pryor	

NAYS—9

Armstrong	Helms	Roth
Exon	Humphrey	Symms
Heflin	Proxmire	Zorinsky

NOT VOTING—15

Bentsen	Hart	Mathias
Cranston	Hatch	Pell
Dixon	Kennedy	Rockefeller
Goldwater	Laxalt	Stennis
Gramm	Levin	Weicker

So the bill (H.R. 3038), as amended, was passed.

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. DOLE. Mr. President. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, I move that the Senate insist on its amendments and request a conference with the House of Representatives on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer [Mr. EVANS] appointed Mr. GARN, Mr. WEICKER, Mr. LAXALT, Mr. D'AMATO, Mr. ABDNOR, Mr. DOMENICI, Mr. HATFIELD, Mr. LEAHY, Mr. STENNIS, Mr. PROXMIRE, Mr. JOHNSTON, and Mr. LAUTENBERG conferees on the part of the Senate.

Mr. GARN. Mr. President, let me just briefly thank everyone who was involved in this bill. It was a very difficult process over a long period of time.

Certainly, Senator LEAHY from Vermont, my ranking minority member, put in hours and hours of time over many months.

Also, I wish to thank the distinguished chairman of the Budget Committee, Senator DOMENICI, and Senator CHILES, the ranking minority member, for their help on this bill, and Senator FORD for his help in the compromise that was reached today.

But the people who do the really hard work are the staff. My staff director, Stephen Kohashi, Jim Cubic, Dorothy Douglas, Marty Reiss, Cynthia Davis, and Cathy Gosweiller all spent far more time than we, the principals did, and should be commended for their work on this bill.

I thank the Chair and yield the floor.

Mr. DOLE. Mr. President, let me add my thanks to the distinguished chairman of the committee, Senator GARN, and the ranking minority member, Senator LEAHY, for their patience and understanding. It did not go as quickly as they wanted but it is finished, and I think it is within the budget, and I see no reason why, it cannot, if it stays in this condition, be finally approved.

Mr. President, I thank my colleagues. We have consumed 15 hours of debate, had 8 rollcall votes, considered 26 amendments, agreed to 24 amendments, rejected 1 amendment, and tabled 1 amendment. So, that is not a bad record.

I thank the distinguished chairman of the committee.

CONSUMPTION OF TIME—S. 1730

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate recesses today 2½ additional hours be considered as having been used on S. 1730, the reconciliation bill, that those 2½ hours be equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. Mr. President, let me indicate again for my colleagues that we did not move to the DOT bill because there were a number of amendments. We hope there might be a possibility of getting a unanimous consent agreement on that bill and when it is considered only certain amendments be in order. We are working on that at the present time.

On Monday, we will come in at 9 a.m. By 10 a.m. we will be on the Labor-HHS appropriation bill.

I am advised by the chairman, the distinguished Senator from Connecticut [Mr. WEICKER] that he should be able to complete action on that bill in 3 or 4 hours and hopefully Members who have amendments will be apprised as of now, if not earlier, that we expect those with amendments to come to the floor, because I know Senator WEICKER would want to accommodate all of the colleagues, all the amendments he can, and we could have final passage hopefully not later than 1 p.m., maybe 2 p.m.

I know my colleagues, Senators DOMENICI and CHILES, are anxious to begin serious work on the reconciliation measure and following disposition of the Labor-HHS bill, if we do not run into some complication on the Labor-HHS bill, it is my hope that we could spend several hours on reconciliation on Monday.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, appoints Senators ROTH, ZORINSKY, COHEN, and PRESSLER, as Senate delegates, to attend the NATO meeting in San Francisco per 22 U.S.C. 1928(a)(d), on October 11-15, 1985.

ORDERS FOR MONDAY, OCTOBER 21, 1985

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate convenes on Monday, October 21, 1985, the reading of the Journal be dispensed with, no resolutions come over under the rule, the call of the calendar be dispensed with, and following the recognition of the two leaders under the standing order, there be special orders in favor of the Senator from Wisconsin [Mr. PROXMIRE] and the Senator from California [Mr. CRANSTON] for not to exceed 15 minutes each, to be followed by a period for the transaction of routine morning business not to extend beyond the hour of 10 a.m., with Senators permitted to speak therein for not more than 5 minutes each and, provided further, that the morning hour be deemed to have expired.

The PRESIDING OFFICER. Without objection, it is so ordered.

REFERRAL TO THE COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. DOLE. Mr. President, I ask unanimous consent that legislation relating to section 801, of the FDC Act, concerning the export-related provisions of the Food, Drug, and Cosmetic Act, or relating to conditions to be placed on such exports by the Food and Drug Administration, be referred to the Committee on Labor and Human Resources during this session.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL TEMPORARY SERVICES WEEK

Mr. DOLE. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of Senate Joint Resolution 195, a joint resolution designating October 20-26 as "National Temporary Services Week," and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 195) to designate the week of October 20, 1985, to October 26, 1985, as "National Temporary Services Week."

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas?

There being no objection, the Senate proceeded to consider the joint resolution.

NATIONAL TEMPORARY SERVICES WEEK 1985

Mr. KASTEN. Mr. President, I am pleased that we can now bring Senate Joint Resolution 195, the resolution designating October 20-26, 1985, as "National Temporary Services Week," to the Senate for approval. This legislation offers us a unique opportunity to recognize the contributions of temporary service companies and employees to our Nation's economy.

Temporary help has come to serve a crucial role in the smooth functioning of American business. During robust economic times, temporary workers supplement the work force by boosting productivity. Temporaries are also invaluable to businesses that need help while they are in the process of finding permanent employees. In turn, the availability of temporary jobs brings many individuals who might not otherwise be employed into the work force. Since most temporary jobs are nonmanufacturing ones, temporary industry employment is relatively stable during growth and recessionary periods.

The growing importance of temporary help in today's business market has spawned incredible growth in the temporary services industry. For example, in 1970, the industry supplied roughly 180,000 jobs and generated $547 million in salaries. Last year, temporary services were responsible for 600,000 jobs and $5.6 billion in payroll. In the past 15 months, temporary service companies have outperformed Standard & Poor's 500 by a whopping 5 to 1 margin. The industry's incredible growth rate has even outstripped the booming computer industry, ranking it third nationwide in terms of job growth.

Given the impressive statistics the industry has produced, it is difficult to ignore its significance contributions to a strong economy. I hope my colleagues will share my gratitude to America's temporary service companies and their 5 million employees by voting in favor of Senate Joint Resolution 195.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution (S.J. Res. 195) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 195

Whereas the temporary services industry is the second fastest growing business sector in terms of job creation in the United States;

Whereas the temporary services industry employed over five million people at various times in 1984;

Whereas the temporary services industry payroll has increased between 1970 and 1984 from $547,000,000 to $6,000,000,000;

Whereas one out of every two hundred nonagricultural jobs in the United States was provided through temporary services in 1984; and

Whereas the temporary services industry provides flexibility for employers to meet short-term labor needs: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 20, 1985, through October 26, 1985, is designated as "National Temporary Services Week" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the week with appropriate conferences, programs, ceremonies, and activities.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL CHILDREN'S WEEK

Mr. DOLE. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of House Joint Resolution 79, a joint resolution to designate the week of October 26 as "National Children's Week," and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 79) to designate the week beginning October 6, 1985 as "National Children's Week."

The Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. If there be no amendment to be proposed, the question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 79) was ordered to a third reading, was read the third time, and passed.

The preamble was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER TO PLACE HOUSE JOINT RESOLUTION 407 ON THE CALENDAR

Mr. DOLE. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of House Joint Resolution 407, a joint resolution to designate the 12-month period ending October 28, 1986, as the "Centennial Year of Liberty in the United States," and I ask it be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO HOLD HOUSE CONCURRENT RESOLUTION 207 AT THE DESK

Mr. DOLE. Mr. President, I ask unanimous consent that, once the Senate receives from the House, House Concurrent Resolution 207, a concurrent resolution to recognize the 20th anniversary of the Higher Education Act of 1965, and to reaffirm its purpose, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

HEALTH RESEARCH EXTENSION ACT—CONFERENCE REPORT

Mr. DOLE. Mr. President, there is a conference report at the desk on H.R. 2409, a bill to amend the Public Service Act, and to revise and extend the authorities under that act relating to the National Institutes of Health, and National Research Institutes, and for other purposes, I ask that the Senate turn to its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2409) to amend the Public Health Service Act to revise and extend the authorities under that Act relating to the National Institutes of Health and National Research Institutes, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 11, 1985.)

Mr. KENNEDY. Mr. President, I am pleased to join with my colleague, Senator HATCH, in proposing passage of the conference report reauthorizing the National Institutes of Health. This bill contains specific 3-year authorizations for the National Cancer Institute and the National Heart, Lung, Blood Institute. It creates a new Institute, the National Institute for Arthritis, Musculoskeletal and Skin Diseases, and establishes important mechanisms for integrating the participation of nurse-researchers into the activities of all the Institutes. It accomplishes a long overdue recodification of the law regarding NIH. And the legislation includes a provision of which I am particularly proud—the creation of a Con-

gressional Office of Biomedical Ethics patterned after the Office of Technology Assessment.

This has been a trying year for our Nation's biomedical researchers. Reauthorizing legislation introduced by us last year that was similar to the bill we are introducing today was vetoed by the President. That veto, coupled with an attack on the NIH budget by the Office of Management and Budget, has created considerable alarm among researchers throughout the country.

After the 1985 appropriations bill for the NIH was passed by Congress and signed by the President, the Office of Management and Budget took the unprecedented action of impounding a portion of the funds and holding them aside to spend in future years. The number of new and competing grants that could be awarded in 1985 decreased by 1,500 grants from 6,500, the number intended by Congress, to 5,000.

Not only was this action illegal and contrary to the intent of Congress, it was also based on ignorance of the scientific funding process. When this action was taken, the first of three cycles of funding was complete. Many scientists had received their priority scores for the year. Some had begun to hire new colleagues based on expectations of funding. The reduction of the budget meant that priority scores high enough to win funding in the first cycle could not win funding in the second. A fair and predictable process had been transformed into a lottery.

The negative reaction from the scientific community was marked. Many scientists took time out from their busy schedules to visit Washington. Hearings were held. There were disturbing revelations including instances where Nobel Prize winning scientists were denied funding because of the damaged funding process.

Together with my colleague, Senator WEICKER, I introduced Senate Joint Resolution 89 to restore funding for the full 6,500 grants appropriated by Congress. A similar resolution was introduced in the House of Representatives. These resolutions and the pressure brought to bear by the scientific community led to a compromise.

The reauthorization levels in the bill we are introducing today are based on the budget already adopted this year by the Senate. They allow for the award of 6,000 new and competing grants for each year from 1986–88. While this is somewhat less than last year's target, it will be the largest number of new grants ever awarded by the Institutes. I am particularly pleased to point out that this legislation also creates a new Institute which will focus on one of our country's more common disabling afflictions—arthritis.

There are a number of different kinds of arthritis. To this date, research on these conditions and many related disorders, has been carried out under the auspices of the National Institutes of Arthritis, Diabetes, Digestive, and Kidney Disorders. The creation of a separate Institute for Arthritis will signify a special emphasis to be placed on finding a cure for this condition which contributes disproportionately to pain and suffering and days lost from work.

Another important aspect of this bill is its emphasis on stimulating nursing research. Although it does not establish a new Nursing Institute, which was a provision of last year's vetoed bill, there are many features which will stimulate the participation of nurses in the research conducted at the Institutes.

It is with special pleasure that I mention another feature of this reauthorizing legislation, the creation of a Congressional Office of Biomedical Ethics patterned after OTA. There are no more difficult sets of questions that daily confront medical practitioners, patients, families, researchers, and public policy makers than the ethical issues arising around medical practice and biomedical research. The President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research showed that an independent panel to think through these issues could provide invaluable guidance to those who must take responsibility for hard decisions in this area. It is essential that this type of assistance be available on a continuing basis.

Finally, let me say that this has been a particularly successful year for our Nation's biomedical researchers. I would like to mention one accomplishment which, in many ways, symbolizes the tremendous progress of the last decade. Without the progress in virology, gene cloning, genetic engineering, and monoclonal antibodies of recent years, it would not have been possible to identify the virus which causes the acquired immune deficiency syndrome [AIDS] and develop a test to protect the Nation's blood supply.

There can be no better evidence of the wisdom of Government than the resources it has invested in this preeminent research institution. Surely, there can be no better answer for those naysayers who endlessly berate the accomplishments of Government programs than to point to the National Institutes which were established by the Federal Government and run exclusively on public moneys. There can be no more valuable commitment to our Nation's future than the reauthorization of the National Institutes of Health.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

INTERVENTION IN BANKRUPTCY JUDGESHIP CASE

Mr. DOLE. Mr. President, on behalf of myself and the distinguished minority leader, Mr. BYRD, I send to the desk a resolution relating to the authority of the Senate Legal Counsel and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows: A resolution (S. Res. 240) to authorize the Senate Legal Counsel to intervene in the case of In the Matter of Louis R. Koerner, Jr.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas?

There being no objection, the Senate proceeded to consider the resolution.

Mr. DOLE. Mr. President, the Bankruptcy Amendments and Federal Judgeship Act of 1984, Public Law No. 98–353, provided for limited extensions of the terms of bankruptcy judges who had been appointed prior to its enactment. Focusing on the brief gap between June 27, 1984, when the terms of the bankruptcy judges arguably lapsed, and July 10, 1984, when the President signed the 1984 act, however, a number of private litigants and the Department of Justice have been contending that Congress violated the appointments clause of the Constitution by so retroactively extending the terms of those judges.

Senate Resolutions 444 and 471 of the 98th Congress and Senate Resolution 136 of the 99th Congress directed the Senate Legal Counsel to intervene in several cases in the name of the Senate to defend the act. The resolution being offered today would similarly call for our intervention in yet another case, this time in the U.S. Court of Appeals for the Fifth Circuit, "In the Matter of Louis R. Koerner, Jr."—an appeal in which neither the Department nor the Senate or House had appeared at the district level.

As I previously related to the Senate in connection with Senate Resolution 136, the district courts have unanimously upheld the 1984 act by concluding either that the holdover provisions of earlier bankruptcy legislation kept bankruptcy judges in office throughout the purported gap, or that the Constitution does not prohibit the brief retroactive extension of the terms of sitting bankruptcy judges. Such conclusions have thus been consistent with the objective of the Congress to avoid disruptions in the bankruptcy system during its transition under the 1984 act without abridging the appointing power of either the executive or the judiciary through the selection of individual bankruptcy judges.

In those cases in which the Senate Legal Counsel has intervened in the district courts, there is no need for further authorization to defend the favorable judgments on appeal. The appeal in one of these cases, "In re Benny," was argued on July 10, 1985, before the U.S. Court of Appeals for the Ninth Circuit. Within the past several days, the Department of Justice has moved to intervene in a new appeal from the U.S. District Court for the Eastern District of Louisiana, which is the subject of this resolution.

When this case was in that court, the Department of Justice, instead of intervening, agreed with Senate Legal Counsel and counsel for the House to simply make available to the court their respective briefs in another case concerning the 1984 act. The district court then ruled as other district courts have done and sustained the statute. Now that the Department of Justice has decided to intervene on appeal to actively oppose provisions of the act, it is advisable that the Senate intervene to defend it.

Mr. President, I move adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 240) was agreed to.

The preamble was agreed to.

The resolution with its preamble, reads as follows:

S. RES. 240

Whereas, in the case of In the Matter of Louis R. Koerner, Jr., pending in the United States Court of Appeals for the Fifth Circuit, the constitutionality of sections 106 and 121 of the Bankruptcy Amendments and Federal Judgeship Act of 1984, Public Law No. 98-353, has been placed in issue;

Whereas, the Department of Justice, on behalf of the executive branch, has moved to intervene in the case to assert that those sections of the Act which provided for the limited extension of the terms of bankruptcy judges appointed prior to its enactment violate the Appointments Clause, Article II, Section 2, Clause 2 of the Constitution;

Whereas, pursuant to sections 703(c), 706(a), and 713(a) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(c), 288e(a), and 288*l*(a) (1982), the Senate may direct its Counsel to intervene in the name of the Senate in any legal action in which the powers and responsibilities of Congress under the Constitution are placed in issue: Now, therefore be it

Resolved, That the Senate Legal Counsel is directed to intervene in the name of the Senate in the case of In the Matter of Louis R. Koerner, Jr.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

HOBBS ACT AMENDMENTS

Mr. DOLE. Mr. President, I send a bill to the desk on behalf of Senator GRASSLEY and others, and ask for its first reading.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1774) to amend section 1951 of title 18 of the United States Code, and for other purposes.

Mr. DOLE. Mr. President, I ask for second reading.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. GRASSLEY. Mr. President, today I am introducing, along with 19 other Senators, a bill to amend the Hobbs Act to make labor-related violence subject to the penalties of the Federal extortion law.

Recently I read a speech delivered by E. Morgan Massey, president of A.T. Massey Coal of Richmond, VA, before the 1985 annual meeting of the American Coke and Coal Chemicals Institute. Mr. Massey describes the need for this legislation as eloquently as anyone can.

I ask unanimous consent that excerpts from this speech be printed in the RECORD, along with the text of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1774

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph (2) of subsection (b) of section 1951 ot title 18, United States Code, is amended to read as follows:

"(2) The term 'extortion' means the obtaining of property from another, with his or her consent, induced by use of actual or threatened force, violence, or fear thereof, or wrongful use of fear not involving force or violence, or under color of official right.".

(b) Subsection (c) of such section is amended to read as follows:

"(c) Nothing in this section shall be construed as indicating an intent on the part of the Congress—

"(1) to repeal, modify, or affect section 17 of title 15, the Act of March 23, 1932, popularly known as the Norris-La Guardia Act (47 Stat. 70; 29 U.S.C. 52, 101, 115, 151-166), or the Railway Labor Act (45 U.S.C. 151-188);

"(2) to exclude Federal jurisdiction over the offenses defined in this section on the ground that the conduct is also a violation of State or local law, or that the conduct, if it involves forces, violence or fear of force or violence, takes place in the course of a legitimate business or labor dispute or in pursuit of a legitimate business or labor objective; or

"(3) to chill legitimate labor activity by authorizing Federal prosecution for offenses occurring during a labor dispute which do not involve extortion. This intent would preclude prosecution, under this section, of conduct which is incidental to peaceful picketing in the course of a legitimate labor dispute, as defined in section 2(9) of the National Labor Relations Act (29 U.S.C. 152(9)), and consists solely of minor bodily injury, or minor damage to property, or a threat of such minor injury or damage, and is not intended to obtain property. Such excluded offenses shall continue to be subject to prosecution by State and local authorities having jurisdiction over them.".

(c) Section 1951 is amended by adding at the end thereof the following:

"(d) It is a bar to a prosecution under this section that the conduct of the defendant—

"(1) was incidental to peaceful picketing in the course of a legitimate labor dispute, as defined in section 2(9) of the National Labor Relations Act, as amended (29 U.S.C. 152(9));

"(2) consisted solely of minor bodily injury, or minor damage to property not exceeding a value of $2,500, or a threat of such minor injury or damage; and

"(3) was not intended to obtain property.".

TWISTED LOGIC

(By E. Morgan Massey, President, A.T. Massey Coal Co., Inc.)

What I want to discuss today is the very serious problem of the use of violence against companies involved in labor disputes.

I have entitled this talk "Twisted Logic."

The reign of terror directed against subsidiaries of A.T. Massey Coal Company began on April 7, 1980 when massive picketing of the Elk Run Mine in Boone County, West Virginia and the first beatings took place. Employees were hospitalized and trucks were destroyed during the six week period that followed.

On June 23, 1980, Dennis Petry, an unarmed watchman, was shot in the back allegedly by Union Local 1582 Vice President Jerry Kerns. Although an accomplice testified to the shooting by him as an eyewitness, a Boone County court found Kerns innocent because in the twisted logic of the defense, the shooting was justified. The guard was there protecting a non-union mine.

On May 14, 1981, Cecil Roberts, now International Vice President, led a march of 300 Union fanatics armed with guns and gas cans to burn out the Elk Run Mine buildings and hospitalized two more Elk Run employees.

In a speech to the Pittsburgh Convention of the United Mine Workers, Rich Trumka asked for a massive strike fund for the purpose of enabling him to "get A.T. Massey Coal Company."

On June 15, 1984, when seven of the Massey subsidiaries dropped out of BCOA and asked the Union for separate bargaining, this gave Trumka the opening that he was looking for to implement the newly created strategy of the selective strike. Even though many of these companies offered agreements equal or better than the BCOA, the Union refused to negotiate.

On December 28, 1984, the office of Don Blankenship, President of Rawl Sales and Processing Company, was riddled by gunfire.

On the early a.m. of January 10, 1985, Thomas Marcum, President of Sidney Coal Company, his wife and children, was accosted by rifle fire. Jimmy David Smith, President of Local 1532, District 30 has been charged with felonious shooting in the incident.

On February 11, 1985, Trumka gave a speech at Charleston where he called on his membership to escalate the action against A.T. Massey companies. The next day, the road leading to the Mingo County, West Virginia mining operations of Rawl Sales & Processing was blocked by hundreds of masked picketers. Jim Slater, President of Sprouse Creek Processing Company was dragged from his vehicle after leaving a restaurant at Matewan, West Virginia and severely beaten with his ankle broken by a baseball bat. Buddy McCoy, another Supervisor still recovering from open heart surgery, was severely beaten with a blackjack made from a length of miner cable. Five other personnel were beaten; vehicles were overturned and destroyed.

In March, 1985, Bobby Bell, an Elk Run employee, was blinded by a shot from a pellet gun from a group of UMWA pickets which included, another ranking international officer. Larry McKinney, another Elk Run employee, was critically disabled with a fractured skull and a blood clot on the brain.

On March 11, 1985, Trumka made another speech in Charleston following which Cecil Roberts issued orders to stop the trucks at Rawl in Mingo County.

On May 20, 1985, Steven Kinser, a truck driver at Rawl, was ambushed and shot twice through the lower part of his body. Miraculously, his life was saved by a team of surgeons at Lexington Kentucky Hospital.

On May 29, 1985, Hayes West, a trucker for Samoyed Energy was murdered from ambush with 27 high powered rifle shots fired through the cab of his truck. Samoyed Energy Company is not connected with any Massey Company. But, three other truckers for our companies were injured by gunfire in this same organized attack on truckers that day.

On August 5, 1985, George Dunham, President of PG&H Coal Company, a metallurgical coal mine in Kanawha County not affiliated with A.T. Massey Coal Company, was shot in the leg in the parking lot of a Dairy Queen. A rash of shootings mainly directed at coal trucks on Cabin Creek occurred on that same day.

This is but a partial chronology of the acts of terrorism directed against subsidiaries of A.T. Massey Coal Company and other companies to carry out Rich Trumka's promise to his membership. Over 745 windshields have been broken, 1677 truck tires have been destroyed, 178 coal trucks and company vehicles have been burned or destroyed. 4 dynamitings destroyed tipple and power equipment. Over 27 homes have been shot up or damaged. Over 75 employees have been injured, 11 persons hospitalized, 1 permanently disabled and 1 death at a nonrelated company.

A life is priceless. But, the greatest tragedy of Hayes West's death is the twisted logic held by Union leaders that beatings, shootings and finally murder are the justified end for those who disagree with Union demands. At the same time, Trumka charges that the Massey companies are responsible for the tragedies in the coalfields because they fail to submit to the Union contract demands. Just another twisted statement when the facts show that the Union refused to bargain with those individual companies with whom the UMWA has had a previous longstanding of honorable contract relations.

If the name of the organization directing such acts of violence were the Ku Klux Klan or the A.T. Massey Coal Company, the leaders would long before now be lodged in the federal penitentiary. But, since the name is the United Mine Workers, these criminal acts are sanctified under the twisted logic that they are justified to protect jobs of Union members.

By now, you are saying to yourself—this guy is nuts—these kinds of violence and terrorism could not possibly be tolerated in the United States in 1985. What has become of our law enforcement authorities.

In 1946, the Hobbs Act was passed by Congress specifically to protect people involved in interstate commerce from violence, robbery and extortion making this a Federal crime. This was an acknowledgment on the part of Congress that States and localities were unable to control labor violence during a strike. The Hobbs Act was passed after 3 attempts to amend it with an exemption clause for Unions.

However, in 1973, the U.S. Supreme Court, in *Emmons vs. U.S.* ruled in a 5-4 decision that the Hobbs Act was not violated where Union members used violence and extortion to achieve legitimate Union objectives. Federal labor law regressed 40 years with this decision.

The expectation was that state and local officials would deal with criminal acts in the local courts.

The "State and local laws are adequate" argument is another case of twisted logic which yields to a simple common sense test. Local authorities frequently lack the resources necessary to deal with massive acts of Union violence. Furthermore, as is the case in West Virginia, they are unwilling to act when to do so would force them to take a position against one or more competing local interests.

Also in the coalfields of Kentucky and West Virginia, local law enforcement people are elected. The Sheriff is elected, the judges are elected, the prosecuting attorneys are elected. The Union in these mining areas have the special privilege of levying funds for election contributions against the company payroll. With this cash, the UMWA exerts extraordinary influence over the political process.

Resultingly, even though A.T. Massey subsidiaries have been able to obtain 23 Federal and State injunctions citing the United Mine Workers for numerous incidences of violence and naming ranking officials for specific acts of extortion, destruction of property and personal injury, not one Union member has been found guilty or fined for his actions. No more than a handful have been brought forward for prosecution.

This is not simply the judgment of a coal company president who has been targeted by the United Mine Workers for a selective strike. Consider, for example, the 540 page study published in 1984 by the University of Pennsylvania's Wharton School entitled "Union Violence" which concluded the following:

The UMWA still relies on bloodshed, dynamite and intimidation to coerce acceptance of the Union's demands.

After the *Enmons* decision exempting Union violence from Federal control, there were at least 4,350 acts of violence committed by Union members from 1975 to 1984.

The UMWA is the most violent Union in the United States being 6.2 times more violent than the average Union.

An effective Hobbs Act is necessary to insure a reliable mechanism for dealing with large scale industrial violence.

The argument raised by the unions against this legislation is the twisted logic that the bill would penalize one side and not the other in a labor management dispute. It would be unfair to labor to make minor picket line altercations a federal crime.

There are two big holes in this argument:

Hole number one is the feeble defense that such acts of violence are minor picket line scuffles.

Murder, beatings, arson and dynamiting are not minor scuffles—not when they are planned, directed and paid for by union leaders as in the case with the examples that I have described to you today.

The second hole in this twisted logic is the argument that the interest of labor is served by giving the working person an advantage in an economic decision allocating returns between capital and labor.

Adversarial confrontation in the form of strikes and restrictive work rules simply destroys that productivity created by teamwork. The loser is the employee.

Thus the twisted logic that the means justifies the ends or that violence helps achieve collective bargaining goals falls completely apart in todays world marketplace. Take away violence as a bargaining chip and the parties are left with only the tools of economic reality and rational facts. The result of an agreement, achieved under *these* conditions, is terms of employment that allows both the company and its employees to survive in the marketplace. How well they prosper depends upon how well they work as a team, not returns extracted from one at the expense of the other.

The proposed amendment to the Hobbs Act would, in the final analysis, improve the well being of all employees by bridging the gap of trust between employees and their companies. The resulting productivity gains would result in greater long run economic returns available for distribution to the employee sector.●

SEQUENTIAL REFERRAL OF S. 1687—FUEL CELL TECHNOLOGY

Mr. DOLE. Mr. President, I ask unanimous consent that S. 1687, dealing with the fuel cell technology, be referred to the Committee on Energy and Natural Resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I further ask unanimous consent that once the Energy Department reports S. 1687 to the Senate, it be sequentially referred to the Environment and Public Works Committee for 30 calendar days for the purpose of considering the provision, section 5, of the bill addressing EPA guidelines for use of fuel cell technology.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, finally, I ask unanimous consent that if the Environment and Public Works Committee has not reported S. 1687 after 30 calendar days, it be automatically discharged from consideration of the bill, and the bill be placed on the calender.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the following nominations on the Executive Calendar: Calendar No. 439, Calendar No. 465, Calendar No. 466, Calendar No. 467, and all nominations placed on the Secretary's desk.

There being no objection, the Senate proceeded to the consideration of executive business.

Mr. BYRD. Mr. President, may I state for the record that there are additional nominees who have been cleared on this side of the aisle beyond those that the distinguished majority leader has requested action on. On this side, it may help the distinguished majority leader when he plans his schedule later today or Monday to know that Calendar Order No. 394, Calendar Order No. 395, Calendar Order No. 420—especially, I want the White House notified; not so much the majority leader, but the White House in particular—Calendar Order No. 436, Calendar Order No. 467, and Mr. THURMOND, I believe, was interested in Calendar Order No. 467. The majority leader indicated that he would like to provide some action on that.

Also, the Senator from Idaho [Mr. MCCLURE] indicated earlier that he would like action on Mr. Anthony G. Sousa.

Those that have been enumerated by the distinguished majority leader are cleared on this side as follows: Calendar Order No. 439, Calendar Order No. 465, Calendar Order No. 466, and as I have already indicated, Calendar Order No. 467 and all nominations placed on the Secretary's desk in the Air Force.

Mr. DOLE. Mr. President, I thank the distinguished minority leader. It is my hope that those nominations that have not been cleared can be cleared early next week. If not, we would hope to take up a couple of nominations that are being held and have a vote. It seems to me that the nominees deserve disposition one way or the other.

Mr. President, I ask unanimous consent that the calendar items just identified be considered en bloc, and confirmed en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

SPECIAL PANEL ON APPEALS

Barbara Jean Mahone, of Ohio, to be chairman of the Special Panel on Appeals for a term of 6 years, new position—Public Law 95-454 of October 13, 1978.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. John H. Moellering, 308-38-5095, U.S. Army.

DEPARTMENT OF ENERGY

Anthony G. Sousa, of Hawaii, to be a member of the Federal Energy Regulatory Commission for a term expiring October 20, 1988, reappointment.

DEPARTMENT OF JUSTICE

Stephen J. Markman, of Virginia, to be an Assistant Attorney General, vice Harold J. Lezar, Jr., resigned.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE

Air Force nominations beginning John R. Sharp, and ending Michael L. Smith, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 4, 1985.

Air Force nominations beginning Maj. Mitchell J. Catoe, and ending Maj. Buford O. Gilbert, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 4, 1985.

Air Force nominations beginning Armin B. Olsen, and ending Walter T. Hatcher III, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 4, 1985.

Air Force nominations beginning John C. Aarni, Jr., and ending Michael A. Wansky, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 8, 1985.

Air Force nominations beginning Francis G. Andrews, and ending Dian J. Davis, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 8, 1985.

Air Force nominations beginning Willie W. Gray, Jr., and ending Susan Parker-Hotchkiss, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 8, 1985.

Air Force nomination of Susan Parker-Hotchkiss, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of October 8, 1985.

Air Force nomination of Robert A. Ferguson, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of October 8, 1985.

Air Force nominations beginning Paul E. Abt, and ending Walter R. Woodruff, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 8, 1985.

NOMINATION OF ANTHONY G. SOUSA

Mr. MCCLURE. Mr. President, on October 17 the Committee on Energy and Natural Resources, by a vote of 15 to 1, reported the nomination of Anthony G. Sousa to be a member of the Federal Energy Regulatory Commission for a term expiring October 20, 1988. Mr. Sousa's nomination hearing was held on October 3. He has fully complied with the committee's rules requiring submittal of a financial disclosure report and a detailed information statement.

Mr. Sousa has served on the Commission for the past 4 years, since September 1981. During that time, in addition to his regular duties, he has assumed the responsibility of serving as the lead commissioner on two major issues: Reform of hydroelectric licensing procedure and rate treatment of natural gas imported from Canada. Prior to his appointment, from 1973 to 1981, Mr. Sousa was vice president and general counsel of the Hawaiian Telephone Co. He was previously employed as a rate analyst, counsel, and administrative law judge with the California Public Utilities Commission. He is a graduate of the University of San Francisco Law School, and holds a master of laws degree in public utility regulation and antitrust law.

The Federal Energy Regulatory Commission has a somewhat unique status as an independent regulatory agency. Although the Commission has been a part of the Department of Energy since enactment of the DOE Organization Act in 1977, it has retained its regulatory independence. However, there are limits on that independence. They are derived from the fact that the Commission's regulatory authority has ben delegated by the Congress. In carrying out its regulatory activities, the Commission may not exceed the statutory authority granted by the Congress.

This limitation was noted by Mr. Sousa in his testimony before the committee. He stated:

> I am more convinced than ever that regulators are not legislators and should guard against usurping the powers of legislators. Legislators enact the laws and regulators administer those laws.

The Commission is responsible for administering a number of laws that impose regulatory requirements on electric utilities and natural gas companies. Of particular importance are the Federal Power Act, the Natural Gas Act, and the Natural Gas Policy Act of 1978. Pursuant to the authority conferred by these statutes, the Commission conducts a wide range of regulatory activities, including setting wholesale prices for natural gas and electric energy. Another major Commission responsibility is ensuring the adequacy of our Nation's supplies of natural gas and electric energy.

Mr. President, it is extremely important that the Senate act immediately on Mr. Sousa's nomination. Unless the Senate approves the nomination before Monday, October 21, the Commission will be deprived of a quorum for the transaction of business. The Commission currently has only three sitting commissioners, because the two remaining seats on the Commission are vacant. One of the sitting commissioners is Mr. Sousa. At least three commissioners are required for a quorum. Although the Commission presently has a quorum, it will lose its quorum if Commissioner Sousa's nomination is not approved before this term expires. Sunday, October 20 is the expiration date.

If the Commission should lose its quorum, it will be unable to act on the electric, natural gas, hydroelectric, and oil pipeline rate matters currently

pending on its agenda. Over 100 items are listed on the Commission's agenda for its next meeting, which is scheduled for Wednesday, October 23.

If the Commission is unable to act on these pending matters, consumers of natural gas and electricity will be adversely affected. There is no question about that. There are currently 16 natural gas pipeline rate suspension orders pending before the Commission. They will automatically become effective if the Commission does not act to suspend them by specified dates between October 23 and November 1, 1985. Also pending are six electric rate filings which will become effective, unless suspended by Commission order, on specific dates between October 29 and November 4, 1985. It is quite evident that in many areas of the country, within 2 weeks, consumers would begin paying higher rates for natural gas or electricity if the Commission fails to meet next week and suspend the pending rate increase requests.

Mr. President, on behalf of the Committee on Energy and Natural Resources, I recommend Senate approval of Commissioner Sousa's nomination. For the reasons I have outlined, I emphasize again the urgency of prompt action on this nomination.

Mr. BUMPERS. Mr. President, I am opposed to the nomination of Anthony Sousa to a second term as a member of the Federal Energy Regulatory Commission. I want to make the record clear, however, that my opposition does not in any way relate to Mr. Sousa's integrity or capabilities. I am sure that he is a fine and capable man. My opposition relates to the way in which he has interpreted the Federal Power Act in a case that, if not reversed by the courts, will have a devastating impact on my State.

I thought I would take this opportunity to again remind my colleagues of my great interest in this matter, which has come to be known as the Grand Gulf debacle.

The Middle South Utilities, Inc. [MSU], is a public utility holding company whose four operating companies serve Arkansas, Mississippi, Louisiana, and part of Missouri. In the early 1970's, MSU decided to build a large two unit nuclear power plant known as the Grand Gulf Nuclear Power Station, and created a new subsidiary company, Middle South Energy Inc. [MSE], to finance and construct the facility. It was ultimately agreed by the operating companies that three of them would purchase fixed percentages of the power generated by the plant, but that the fourth company, Arkansas Power & Light Co. [AR&L], would take no power from the plant. The agreement reflecting the percentage allocations of Grand Gulf Power was then filed with the FERC.

To make a long story short, very recently FERC has set aside this agreement and ordered AP&L to purchase 36 percent of the power generated by Grand Gulf, even though AP&L and the other operating companies of the MSU system had agreed that AP&L would not be responsible for purchasing even 1 kilowatt, and even though AP&L doesn't want and doesn't need the power. Mr. Sousa was a member of FERC during the pendency of this case. Thus, he participated in this decision and added his name to it.

Because MSU intentionally constructed this expensive nuclear plant in a manner that would avoid virtually all State regulation, the Arkansas State utility commission was blocked from having any say so whatsoever in whether the plant would be built and whether Arkansas ratepayers would have to pay for it. The people of Arkansas are violently opposed to this result, which will rather dramatically increase their electric bills.

The debacle of Grand Gulf raises fundamental questions about the manner in which electricity rates are regulated in this country. I am convinced that FERC misinterpreted the facts and misapplied the law—FERC in my judgment vastly exceeded the scope of its delegated authority in ordering a utility against its will to purchase power—but in order to make the applicable law absolutely clear the situation cries out for a legislative solution as well.

During a recent Energy Committee hearing on the nomination of Anthony Sousa for a second term on the Federal Energy Regulatory Commission, I asked Mr. Sousa some questions about the scope of FERC's authority in cases involving public utility holding companies. I was pleasantly surprised by the frankness of Mr. Sousa's admission that utilities are attempting to structure their transactions and corporate relationships in ways that will ensure FERC jurisdiction and avoid review by State commissions. In particular, the following exchanges occurred:

Mr. BUMPERS. * * * So in the future, any holding company who wants to build generating capacity under that system can circumvent all State regulatory authority, and the ratepayers of those States are left helpless and at the mercy of FERC. Is that not true?

Mr. SOUSA. I am aware, Senator, of that trend where corporations have sought to circumvent local regulation by trying to come under the jurisdiction of the FERC. And *perhaps that is an area where Congress should be enacting some laws to avoid that kind of circumvention.* * * * I'm also aware of *advise being given by so-called consultants to circumvent or avoid local regulation* by coming under the umbrella of Federal regulation.

* * * * *

Mr. BUMPERS. You see, the point I'm making, Commissioner, is it deals with holding companies. This sort of situation just lends itself to abuse by holding companies. If it is a solely-owned utility operating within a State, this can't happen. They can't buy power or sell power without the State regulatory authority.

But here, where you have a parent company that's telling its four subsidiaries what to do in order to avoid State regulatory authority, that is an entirely different case.

Mr. SOUSA. That's part of the *strategy that these people have used to go to the holding company situation,* to get into that situation where they can avoid state regulation and get Federal regulation. (Emphasis added.)

The problem is exacerbated by the so-called Narragansett doctrine, which holds that once FERC sets a rate for wholesale sales of power, the State regulatory body is almost constitutionally bound to pass the rate through to retail consumers.

Mr. President, I must reemphasize the importance of this issue to the four States—Arkansas, Mississippi, Louisiana, and Missouri—served by MSU subsidiaries, and without question it will become important over time to all 24 States served by public utilities holding companies. The Federal Power Act was intended to complement State jurisdiction, not to usurp it, yet holding companies are able to avoid virtually all State regulation if they are clever about how they structure their generating and transmission arrangements.

I have introduced a bill, S. 1149, in an effort to deal with part of the problem. My bill restores to State utility commissions the authority to determine whether ratepayers should have to pay for expensive powerplants constructed in other States. I am completely convinced that some change in the law is necessary to avoid the continuing problem of holding companies structuring their operations in ways that avoid virtually all State regulation. Utility customers are taking it on the chin.

Mr. President, with regard to Mr. Sousa, although I appreciated his candor and frankness in responding to my questions during his confirmation hearing, I voted against him in committee. I simply cannot bring myself to vote for someone who was a party to a decision by FERC that forces my State to pay for 36-percent of a $3.5 billion nuclear powerplant which my State does not want, does not need, and cannot possibly use. I simply wanted to bring this to the attention of my colleagues, and make the record clear as to my reasons for opposing the nomination of Mr. Sousa.

Mr. PRYOR. Mr. President, I oppose the nomination of Anthony Sousa to be reappointed to the Federal Energy Regulatory Commission [FERC]. I do not intend to delay the work of the Senate, but I did want to express my opposition to his reappointment.

Mr. President, it is my understanding that his reappointment was ap-

proved yesterday by the Senate Committee on Energy and Natural Resources. The only dissenting vote was cast by my colleague from Arkansas, Mr. BUMPERS.

The primary reason I cannot support Mr. Sousa is that he was on the FERC and supported that panel's decision in the Grand Gulf case, which involved an allocation to Arkansan Power & Light, and the ratepayers of the State of Arkansas, a 36-percent share of this nuclear facility in Mississippi. This is a facility which no one in Arkansas needs and we will not use any of the power produced. Yet, due to the FERC's decision, Arkansas ratepayers will be forced into this position. I remain convinced, Mr. President, that the decision of the Commission is wrong, and I hope it will be reversed in the courts. It is now on appeal.

The decision of the Commission not only is wrong on the merits, but I also believe the Commission lacked jurisdiction to hear the case. In fact, it is my understanding that during the confirmation hearing for Mr. Sousa, in response to a question from Senator BUMPERS, he stated that there were serious loopholes in existing law which allow companies to avoid State utility regulations and come directly to the FERC. After the Grand Gulf decision, it is no wonder why companies would prefer the FERC. The panel has essentially ordered the ratepayers of the State of Arkansas to pay for 36 percent of the cost of a $3.6 billion facility they don't need and will not use. Yet, the Arkansas Public Service Commission had no opportunity to review this matter.

I continue to hope, Mr. President, that this decision will be reserved. Further, I will continue to work with my colleague, Mr. BUMPERS, in seeking the enactment of S. 1149, the Ratepayers Protection Act.

For all of these reasons, I oppose the reappointment of Mr. Anthony Sousa to the Federal Energy Regulatory Commission.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, not to extend beyond the hour of 3:45 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

MEASURE PLACED ON THE CALENDAR

The Committee on the Judiciary was discharged from the further consideration of the following joint resolution, which was read the first and second times by unanimous consent, and placed on the calendar:

H.J. Res. 407. Joint resolution designating the 12-month period ending on October 28, 1986, as the "Centennial Year of Liberty in the United States."

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. LEAHY (for himself and Mr. COHEN):

S. 1773. A bill to express the policy of the Congress on the number of members of the Soviet mission at the United Nations headquarters; to the Committee on Foreign Relations.

By Mr. DOLE (for Mr. GRASSLEY (for himself, Mr. THURMOND, Mr. LAXALT, Mr. SIMPSON, Mr. EAST, Mr. DENTON, Mr. DOLE, Mr. ABDNOR, Mr. GOLDWATER, Mr. GRAMM, Mr. HECHT, Mr. HELMS, Mr. HUMPHREY, Mrs. KASSEBAUM, Mr. NICKLES, Mr. SYMMS, Mr. TRIBLE, Mr. WALLOP, Mr. WARNER, and Mr. WILSON)):

S. 1774. A bill to amend section 1951 of title 18 of the United States Code, and for other purposes.

By Mr. DODD (for himself, Mr. D'AMATO and Mr. RIEGLE):

S. 1775. A bill to authorize a multifamily housing preservation loan program; to the Committee on Banking, Housing, and Urban Affairs.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DOLE:

S. Res. 240. Resolution to direct the Senate Legal Counsel to intervene in "In the Matter of Louis R. Koerner, Jr.;" considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. LEAHY (for himself and Mr. COHEN):

S. 1773. A bill to express the policy of the Congress on the number of members of the Soviet mission at the U.N. headquarters; to the Committee on Foreign Relations.

REDUCING THE SIZE OF THE SOVIET MISSION TO THE UNITED NATIONS

Mr. LEAHY. Mr. President, I rise to join with my distinguished colleague and friend, the senior Senator from Maine [Mr. COHEN] in offering a bill aimed at curbing the excessive size of the Soviet mission to the United Nations in New York. Our bill is a logical successor to the Leahy-Cohen amendment to the State Department authorization, recently signed into law by the President. That amendment established a policy requiring substantial equivalence between the number of United States and Soviet diplomatic and consular officials in each other's country. This new bill, which I will describe in detail later in my statement, would extend the same principle of substantial equivalence to the sizes of the Soviet and United States missions to the United Nations. Specifically, our bill would require that the Soviet U.N. mission, presently about 290 officials, be reduced to equivalence with that of the United States, about 130 personnel.

Very briefly, Mr. President, the reason for this new bill, as with our earlier amendment, is to reduce the huge Soviet intelligence presence in the United States. Major damage is being done to United States national security by the operations of Soviet intelligence, and it is long past time to stop the free ride the Soviet diplomatic, United Nations and other official missions are getting.

Senator COHEN and I realize very well that the legal and foreign policy implications of a bill dealing with the Soviet mission in New York are extremely complicated. Therefore, our present intent is that it be fully considered in committee hearings and that the administration have ample opportunity to present its views. It may be that this bill will stimulate the executive branch to prepare its own plan to deal with the intelligence threat posed by the Soviet mission to the United Nations.

Nevertheless, if we find the executive branch is dragging its feet, or attempting to kill the bill without serious consideration, we may decide to introduce it as an amendment even before the end of this year.

Mr. President, given the importance and complexity of this issue, I would like to outline the extent of the problem Senator COHEN and I are attempting to deal with. To put the bill in context, I shall also review some of the legislative history of congressional actions aimed at the hostile foreign intelligence presence in the United States. Finally, I would like to describe our new bill and respond to what we anticipate will be the primary arguments against it.

THE ESPIONAGE THREAT

Mr. President, a wave of recent spy cases has made Americans more aware of the threat to national security posed by the intelligence operations of the Soviet Union and other Eastern bloc countries. These cases have involved the U.S. military, the defense contracting community and even U.S. intelligence agencies. They indicate how widespread the hostile intelligence presence is and how serious the damage that is being done.

Much of the hostile intelligence effect against U.S. interests goes on overseas. Perhaps the best window into the activities of the Soviets and their surrogates are the numerous expulsions of Soviet officials in Western Europe and other places for espionage. But by far the gravest espionage threat to United States national security is the extensive presence of Soviet intelligence officers in our own country. As a recent unclassified Defense Department report makes clear, the Soviets have amassed a huge amount of material concerning United States military technology and programs and other national security-related information through their systematic intelligence-gathering efforts.

Most of the intelligence collected by the Soviets and their surrogates in the United States would appear to derive from the activities of their diplomats and other official representatives. More than 2,500 Soviet and East bloc officials and quasi-official representatives—such as press correspondents and commercial officers—are present in the United States at any one time. The Soviets alone have about 1,400 official personnel of one type or another in the United States. The FBI has estimated that between one-third and 40 percent of all Soviet and Eastern bloc personnel in the United States are professional intelligence officers. Most of the rest must be presumed to be coopted by the KGB, GRU—Soviet military intelligence organization—or other East bloc intelligence services for a variety of espionage activities, including collecting information, spotting and recruiting Americans and others, serving as couriers, and other tasks.

All in all, Soviet and East bloc intelligence gathering in the United States causes untold damage to our national security. The United States technological lead in certain defense-related areas has been eroded by Soviet successes in obtaining classified scientific and technical information. The security of our military operations has been compromised by Soviet agents within the military. Soviet spying has cost us billions of dollars in stolen technology and military secrets.

PREVIOUS ACTIONS TO COUNTER THE ESPIONAGE THREAT

There are several aspects to the problem of countering the threat posed by hostile intelligence activities in the United States. First and most important is the need to reduce and control the presence of Soviet and East bloc officials and representatives in our country. Second is to increase the resources for counterintelligence activities, especially by the FBI within the United States. Third is to adopt better security programs for the people and information that are potential targets of intelligence operations. And fourth are measures to limit the travel and other activities of hostile foreign officials in the United States.

LIMITING THE HOSTILE INTELLIGENCE PRESENCE IN THE UNITED STATES

Mr. President, for several years I have worked to limit the numbers in the United States of representatives from the Eastern bloc and other countries whose official roles provide them cover for hostile intelligence activities. Most recently, Congress passed and the President signed as part of the Department of State Authorization Act for fiscal year 1986 an amendment offered by Senator COHEN and me concerning the number of Soviet diplomats allowed in the United States.

Under the Leahy-Cohen amendment, Congress declared it to be the policy of the United States that the number of Soviet diplomatic and consular personnel in the United States should not substantially exceed the equivalent number of Americans serving in the Soviet Union. The Soviets have some 320 diplomats and consular personnel at their Embassy in Washington and Consulate in San Francisco, while we have only 200 American officials located in the Soviet Union. Furthermore, in our Embassy in Moscow and Consulate in Leningrad, the United States employs some 240 Soviets to perform administrative and support services; the Soviets meanwhile employ virtually no Americans and those who are retained on contract are not allowed access to the Soviet chancery building. The Leahy-Cohen amendment requires the Secretary of State and Attorney General to prepare a report within 6 months detailing how the new policy will be implemented. This report is to contain a plan for reducing the number of Soviets' diplomatic and consular personnel in the United States and for increasing the level of American officials in the United States Embassy and Consulate in the Soviet Union. It is due in Congress in February.

Mr. President, Senator COHEN and I hear of strong resistance from within the bureaucracy at the State Department to full implementation of our amendment, despite the fact that President Reagan himself supported it. In my judgment, our amendment should be implemented through a combination of cutting down the number of Soviets employed at our Embassy in Moscow and replacing them on a one-for-two basis with Americans—that is, letting go at least 100 Soviet employees and replacing them with about 50 Americans—and then limiting the Soviet diplomatic presence in the United States through attrition so that both countries would be left with about 250 diplomatic and consular personnel. I ask that a recent newspaper article by Senator COHEN and me on this subject be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. The Leahy-Cohen amendment was preceded by two other measures I sponsored in previous years. In 1984, Congress adopted and the President signed into law the Leahy-Huddleston amendment to the Intelligence Authorization Act for fiscal year 1985. That amendment expressed the sense of Congress that the numbers and conditions of officials from countries which practice intelligence activities against the United States should be substantially equivalent to the numbers and conditions of U.S. officials assigned to those countries. This amendment was intended to see to it that in implementing the Foreign Missions Act the Department of State paid special attention to restricting the activities of officials from countries which engage in hostile intelligence activities in the United States. Under the Leahy-Huddleston amendment, the President was requested to report to the Foreign Relations and Intelligence Committees of the Congress on the respective diplomatic representation between the United States and those countries.

Prior to adoption of the Leahy-Huddleston amendment in 1984 Intelligence Authorization Act, I cosponsored a similar measure in 1983 in the State Department bill. While this provision was not adopted as such, the House and Senate conferees did require the Secretary of State to submit a report to both the Foreign Relations and Intelligence Committees of Congress on this problem and means to address it.

OTHER MEASURES TO CONTROL HOSTILE INTELLIGENCE ACTIVITIES

Congress has recently taken action on several other proposals to limit hostile intelligence activities against the United States both at home and abroad. Congress passed a provision in the State Department authorization making it clear that the authority granted to the State Department under the Foreign Missions Act covers foreign nationals employed in the U.N. Secretariat. That provision directs the Secretary of State to apply the same limitations on travel and other prerogatives to these individuals as to corre-

sponding officials in their national missions.

Also as part of the fiscal year 1986 State Department Act, Congress adopted a provision that to the maximum extent practicable citizens of the Soviet Union should not continue to be employed at United States diplomatic and consular facilities in the Soviet Union after September 30, 1986. The President also is required to report to Congress in the event this policy cannot practicably be implemented.

Congress recently enacted as part of the fiscal year 1985 supplemental appropriations an amendment sponsored by Senator DURENBERGER, the chairman of the Select Committee on Intelligence, and me which provides $35 million to the Director of Central Intelligence for the purpose of enhancing security at U.S. facilities overseas through improving technical countermeasures capabilities. The Director was instructed to cooperate with the State Department and other agencies, including the FBI and National Security Agency, in designing and implementing a plan for expenditure of these funds.

Finally, Mr. President, I would like to say that the Congress under the leadership of the Select Committee on Intelligence has consistently provided more support even than was requested for the counterintelligence program of the FBI. The details of this program, as well as the national intelligence budget of which it is a part, are classified and I cannot comment on them here. I can say, however, that the FBI's counterintelligence program has been one of the best-supported and fastest-growing programs in our yearly intelligence budget. As vice chairman of the Intelligence Committee, this is a source of pride to me.

THE SOVIET MISSION TO THE UNITED NATIONS IN NEW YORK

A key part of the Soviet official presence in the United States is the large staff of the Soviet mission to the United Nations [SMUN] in New York City. The SMUN has a staff of some 295, about 260 of which are assigned to the primary Soviet mission and the others to the missions of the so-called Ukrainian and Byelorussian Soviet Socialist Republics. This is in addition to the more than 300 Soviet citizens who work for the U.N. Secretariat in New York. Combined with other categories of Soviet representatives—press correspondents, commercial representatives, exchange scholars and the like—this adds up to well over 600 Soviets currently assigned to the New York area, in addition to their families.

Counterintelligence specialists, especially in the FBI, say that the SMUN in New York City is one of the chief havens for Soviet spies in the United States. With its large staff, the SMUN provides a major operational center for the KGB and GRU in their activities throughout the United States.

The Soviet mission greatly exceeds the size of other delegations to the United Nations. The next largest is the U.S. mission with a staff of about 130. China is third with a total of 125. All other missions to the United Nations—including many countries with extensive activities there—are well below this.

Not only does the size of the Soviet mission greatly exceed the others, but its structure differs as well. The SMUN has a bloated "support" staff of 120, many of whom do not have duties directly related to the United Nations. In fact, the United States Government has little information on the nature of the activities pursued by the Soviets at their mission to the United Nations. The Soviets provide only the sketchiest information about the identities of personnel being sent to the SMUN, their position in the mission, and their duties with respect to the United Nations.

The FBI believes that as with other Soviet organizations in the United States, more than one-third of the Soviet personnel at their U.N. mission—at least 100 people—are professional intelligence officers. The chief damage of this large intelligence component is espionage and other clandestine collection by the Soviets of defense, science and technology, and national security information within the United States. Their large presence at the United Nations also provides the Soviets a great opportunity to attempt to recruit foreign officials at the United Nations as their agents.

It is extremely difficult for the FBI to cope with the large number of Soviet officials and their family members in New York City—over 800 people. Operational conditions for the FBI in New York are poor. The FBI has difficulty getting its best agents to work in New York due to the high cost of living in the area. As a result, there is just no way that the FBI can effectively monitor the activities of all the Soviet officials stationed in New York in one capacity or another. If Soviet espionage is to be controlled, there must be substantial reduction in the size of the Soviet U.N. mission.

REDUCING THE SIZE OF THE SOVIET MISSION TO THE UNITED NATION

Mr. President, the most effective way to address the serious counterintelligence and security problems of the United States is through a series of coordinated measures. The Leahy-Cohen amendment on diplomatic equivalence with the Soviet Union provides a basis for controlling that source of espionage. The next local step is to address the Soviet presence in New York. In these two companion measures we will deal a major blow to the operations of Soviet intelligence agents in our country. Stanislav Levchenko, a former high level officer in the KGB who defected several years ago, stated recently to the press (Washington Times, Oct. 1, 1985):

> The most practical means of disrupting KGB operations in America is to require parity in the number of Soviet Diplomats in the United States and American diplomats in the Soviet Union, and to limit drastically the size and operations of the huge Soviet mission to the United Nations.
>
> If such steps lead to a reduction of 100 or more Soviet officials, KGB activities in the United States would be seriously damaged. The KGB would lose many officers who otherwise would be handling active cases. But Moscow still would need to maintain contact with various offices of the U.S. government. So more of the remaining officials would be occupied with legitimate diplomatic activities, rather than with espionage.

Mr. President, I ask that the entire article from which this excerpt was drawn be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, the bill my distinguished colleague on the Intelligence Committee, Senator COHEN and I are submitting at this time would declare the policy of the Congress that the size of the Soviet mission to the United Nation should be substantially equivalent to the size of the United States mission there. The President could continue to admit more Soviets to work at the SMUN if he determined that it were necessary, but the State Department would be required to report to Congress every 6 months on the numbers and duties of the Soviets at the SMUN. In addition, the Secretary of State and the Attorney General would be required to present to Congress within 6 months a plan for reducing the size of the SMUN in accordance with the policy we are proposing.

POLICY AND LEGAL CONSIDERATIONS

Senator COHEN and I have decided to introduce this proposal as a separate bill rather than offering it as an amendment to some other vehicle. This is because we feel that legislation in an area as complex as this, and with such difficult legal and foreign policy considerations requires the most careful review by the appropriate committees, Congress as a whole, and the executive branch.

Indeed, Mr. President, had it not been for our difficult experience with certain parts of the executive branch in connection with the diplomatic equivalence amendment, we might have been willing to wait for the State Department to come forward with its own plan for controlling the foreign presence in the United States. There have been some encouraging hints that even State itself may come around to supporting this idea in response to pressure to do something against spying. But the Department's

opposition to other necessary measures in this area causes us concern that its bureaucracy will resist this as well.

Opponents may argue that enactment of our bill would damage our relations with the Soviet Union and expose the United States to a suit by the United Nations in the World Court. They will undoubtedly claim that the United States does not have the legal authority to limit the size of the Soviet U.N. mission because of our agreements with the United Nations.

Mr. President, I frankly believe that the Soviets cannot understand why their intelligence presence is getting a free ride in New York. They would certainly refuse to tolerate a massive hostile intelligence presence in their own country. In my opinion, the Soviets respect a tough-minded insistence on equality and will recognize quite well—however much they might protest publicly—that the United States has the right to protect its security by requiring a reduction in the size of their U.N. mission to equality with its own. But whatever their reaction, the bottom line is that the SMUN greatly exceeds what is reasonable and it has to be cut.

THE LEGAL SITUATION

Mr. President, I wish to discuss in some detail this issue of whether the United States Government has the legal authority, under international law, to restrict the size of the Soviet mission to the United Nations. This is the key issue in determining whether it is possible to carry out the policy our bill would establish.

The basic principles governing the obligations of the United States toward the United Nations and national missions to the organization are the general Convention on the Privileges and Immunities of the United Nations—the general convention—adopted in 1946 but not ratified by the United States until 1970, and the agreement between the United Nations and the United States of America Regarding the Headquarters of the United Nations—the headquarters agreement—adopted by joint resolution of the Senate and the House of Representatives in 1947.

Neither of these agreements contain provisions permitting the United States to restrict the activities of the U.N. organization or the national missions to the United Nations based on national security grounds. But Congress, in approving the agreements, enacted legally binding reservations to both the general convention and the headquarters agreement preserving U.S. rights to protect its security. Section 6 of Public Law 80-357 which adopted the headquarters agreement, states:

Nothing in this agreement shall be construed as in any way diminishing, abridging, or weakening the right of the United States to safeguard its own security . . .

The U.S. Government has also specifically insisted, both in principle and in its actions, that section 6 permits the U.S. Government to control the entry of foreign nationals into the United States in connection with the United Nations, including not only national missions to the United Nations but also employees and invitees of the United Nations itself. A valuable collection of materials on the development of U.S. policy in this regard is contained on pages 195-312 of the State Department publication, "Foreign Relations of the United States 1952-1954," volume III, United Nations Affairs (1979).

Mr. President, the bill Senator COHEN and I are introducing today is a workable mechanism to reduce the Soviet mission to the United Nations to the size of our own mission there. We are prepared to work with the appropriate committees and with the executive branch on it. We are flexible, but we are also determined that there will be meaningful action.

Mr. President, I ask unanimous consent to print in the RECORD a memorandum prepared by my staff reviewing the legal situation with respect to controlling the size of national missions to the United Nations. This memorandum includes many quotations from relevant sections of official documents interpreting the powers of the U.S. Government in this area. Many of these documents were prepared in the 1952-53 period when this issue was being actively discussed both within the U.S. Government and with officials at the United Nations. The outcome of these discussions was the so-called modus vivendi of 1953. The U.N. Secretary-General explicitly agreed that there were certain situations in which the United States could rely upon national security grounds to exclude foreign nationals from admission to the United States in connection with activities of the United Nations. He indicated there would be other circumstances in which the United States might wish to invoke national security considerations, requiring further consultations. (The text of the Secretary-General's statement and related documentation is contained in the material appended below.)

The key issue is the principle of reasonableness in interpreting the responsibilities of the U.S. Government under the general convention and the headquarters agreement. The agreements simply cannot be read to prevent the United States from taking reasonable measures to protect its national security by refusing to tolerate an abnormally large mission serving as a base for highly damaging espionage. If the Soviet Union asked for permission to send 300 young, close-cropped, trim, and uniformed personnel on an Aeroflot aircraft supposedly to work at the United Nations, no one would expect the United States Government to grant routine approval. We may not have 300 Soviet marines at the SMUN but there are an extraordinary number of Soviet officials there—many of whom appear rather overqualified for their official work as janitors, groundkeepers, and the like. The United States clearly has the right under our agreements concerning the United Nations to take an overall look at this situation and put restraints on the size of the SMUN that would ensure that it remains reasonable in light of its structure and legitimate activities at the United Nations.

Mr. President, like Leahy-Cohen, I submit this today so that it can be open for discussion, so that hearings can be held on it. I will not make an attempt to call this up as an amendment to any bills going through, at least not initially and at least not for a reasonable period of time so there can be the kind of discussion necessary so the lengthy materials that we have can be printed in the RECORD, so that our colleagues can look at it, interested parties throughout the country can look at it, the State Department, and others.

I would note, though, Mr. President, that both Senator COHEN and I are very serious about it and we will certainly listen to any suggestions, constructive or otherwise. I am sure we will get them constructively or otherwise.

I advise my colleagues—and probably more importantly, the State Department—that we are very serious about it. We assume there will be adequate hearings this fall, and that we would have a bill on the floor for all of us to vote on. If not, or if we run into the kind of stonewalling and really unfortunate tactics used by the State Department on the Leahy-Cohen, we will simply raise it as an amendment to a necessary piece of legislation.

So, Mr. President, I ask unanimous consent that my statement, the statement of Mr. COHEN, the bill, memoranda, and a number of other things pertaining to this bill, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1773

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a)(1) it is the policy of the Congress that the number of nationals of the Soviet Union admitted to the United States to serve as members of the Soviet mission at the United Nations headquarters shall not exceed the number of United States nationals who serve as members of the United States mission at the United Nations headquarters, unless—

(A) the excess number of such members is the result of the routine replacement of personnel and is not more than 5 percent of the number of United States nationals who serve as members of the United States mission at the United Nations headquarters; or

(B) the President determines that the admission to the United States of additional Soviet nationals to serve as members of the Soviet mission at the United Nations headquarters would be in the interests of the United States.

(2) Beginning six months after the date of enactment of this Act, and every six months thereafter, the Secretary of State shall prepare and transmit to the Committee on Foreign Relations and the Select Committee on Intelligence of the Senate and to the Committee on Foreign Affairs and the Permanent Select Committee on Intelligence of the House of Representatives a report setting forth the number of Soviet nationals admitted during the preceding six-month period to the United States pursuant to a determination of the President under paragraph (1)(B) and their duties with the Soviet mission at the United Nations headquarters.

(3) Nothing in this subsection may be construed as including any dependent or spouse who is not a member of a mission at the United Nations headquarters in the calculation of the number of members of a mission at the United Nations headquarters.

(b) It is the sense of the Congress that the Secretary of State and the Attorney General should, not later than six months after the date of enactment of this Act, prepare and transmit to the Committee on Foreign Relations and the Select Committee on Intelligence of the Senate and to the Committee on Foreign Affairs and the Permanent Select Committee on Intelligence of the House of Representatives a report setting forth a plan for ensuring that the number of Soviet nationals described in subsection (a)(1) does not exceed the limitation described in that subsection.

(c) For purposes of this Act—

(1) the terms "members of the Soviet mission" and "members of the United States mission" are used within the meaning of the term "members of the mission", as defined by Article 1(b) of the Vienna Convention on Diplomatic Relations, done April 18, 1961; and

(2) the term "mission at the United Nations headquarters" means a mission to the United Nations in New York City and includes missions in New York City to specialized agencies of the United Nations, as defined in Article 57 of the Charter of the United Nations.

[From the Washington Post, Sept. 26, 1985]

A COUNTERINTELLIGENCE POLICY

(By Patrick J. Leahy and William S. Cohen)

After years of complacency, the executive branch and Congress are trying to bring the threat of Soviet espionage under tighter control. The White House and Congress are both now intensively reviewing U.S. counterintelligence and security capabilities.

Many counterintelligence improvements will be directed more at ensuring the reliability of Americans with access to secrets than at making life more difficult for Soviet KGB officers posing as diplomats. Yet the spy problem leads back to the horde of hostile intelligence agents operating out of foreign embassies, consulates, U.N. missions, "trade" organizations and "press" offices. A counterintelligence policy with teeth must include a cutback in foreign intelligence agents here, as well as needed improvements in U.S. personnel and information security practices.

To begin restricting the hostile intelligence presence, we drafted a bill aimed at eliminating the long-standing advantage the Soviets enjoy in the level of their diplomatic and consular officials in the United States as compared to the number of American officials in Moscow. The Leahy-Cohen bill, which requires numeric equality, was recently signed into law by President Reagan.

With some 320 diplomats and consular officials in the United States (not counting their bloated presence at the United Nations in New York), the Soviets overwhelm the FBI by sheer numbers. Between 30 and 40 percent of Soviet officials in the United States are thought to be professional intelligence officers. Evading surveillance, they travel around freely, meet whomever they please and carry on their work of trying to blackmail or pay Americans to become traitors.

By contrast, the United States has fewer than 200 officials in the Soviet Union. Our personnel live under the constant eye of the KGB, are sprinkled with "spy dust" and irradiated by microwaves, and are subject to innumerable petty harassments that limit their effectiveness as well as comfort.

It was the president's endorsement of the Leahy-Cohen approach in a radio broadcast that finally overcame the resistance of the foreign affairs bureaucracy to effectively combating the problem. The professional establishment regarded what we wanted to do as interference in their "right" to manage U.S. diplomatic relations.

In offering the bill, we pointed out that there are two approaches to attaining parity in diplomatic representation. One way would be to increase the number of Americans serving in Moscow. Because of the miserable conditions, however, there are practical limits on how many could be sent. Alternatively, we could lower the ceiling on Soviet diplomats allowed in Washington. To be realistic, however this could lead to a series of expulsions and counterexpulsions of diplomats from the United States, the Soviet Union and even other countries.

We intend and expect that the Soviet edge will be eliminated by a combination of these two avenues. This dual track would simultaneously lessen the two key security problems in this area:

Replacing some of the more than 200 Soviet nationals employed in our Moscow embassy (many of whom are KGB spies) with Americans would give us more presence in the Soviet Union while reducing the Soviet access to our embassy building.

A phased drawdown in the total of Soviet diplomatic and consular officials in the United States would ease the surveillance burden on the FBI and other counterintelligence agencies. This could be accomplished by declining to issue visas for full replacement as Soviet officials are transferred; no provocative expulsions would be needed.

There are about 120 more Soviet diplomatic and consular officials in the United States than we have in the Soviet Union. We feel that a reasonable package designed to implement numeric equality would result in at least 50 more Americans in Moscow to replace double that number of Soviets. A 1-for-2 replacement ratio should be about right, since the Americans would be working full-time for the embassy while the Soviets have been spending at least half-time on their "extracurricular duties." This should be accompanied by a phased reduction of about 70 or 80 in the ceiling on Soviet diplomats granted visas to enter the United States.

Regrettably, some in the State Department, the lead agency for implementing Leahy-Cohen, prefer to raise the number of Americans in the Soviet Union somewhat but refuse to cut back the number of Soviets in the United States at all. The State Department opposes our efforts for two reasons. First, it believes it must have Soviet employees in our Moscow embassy to "interface" with the Soviet bureaucracy. Second, it fears the Soviets might retaliate by expelling some American officials.

Should the executive branch decide that it does not want to offend the Ministry of Foreign Affairs in Moscow by lowering the ceiling on Soviet diplomats here in the United States to equal the number of Americans there, we will be forced back to the legislative drawing board. Congress is determined to reduce the Soviet espionage threat.

[From the Washington Times, Oct. 1, 1985]

INSIDE ADVICE ON DISRUPTING THE KGB

(By Stanislav Levchenko, a KGB major who defected in 1979 while operating under cover as a Russian journalist in Japan)

As a result of recent U.S. and West German espionage cases, many people now ask themselves a quite logical question: what can be done to disrupt the activities of Soviet intelligence in this country? Are there efficient ways to enhance the security of the United States, to prevent leakage of political, military, and economic secrets to the Soviet Union?

In my opinion, the most effective tool against the KGB in this country is public awareness of its methods of operation, especially the recruitment techniques it uses, its aims, and its targets.

The role of the media in a free society is of enormous importance in revealing KGB methods and operations. Success in combating the KGB depends in large part upon whether the media do their job effectively. The CIA and FBI reveal very little about KGB activities, so the role of the free press is that much more important.

The main thrust of KGB recruitment is aimed at Americans residing abroad, where the KGB operates in more relaxed circumstances than in the United States and has the time and manpower to study the vulnerabilities of potential recruits thoroughly. Americans recruited by the Soviets are encouraged to return to the United States, where they are controlled by experienced case officers, often Soviet officials or "journalists." Some American agents for the KGB are recruited in the United States, but recruiting is easier and more common abroad.

The KGB uses many different covers to conceal its intelligence activities. There are no "clean" Soviets in this country—whether they are stationed here for years or just visiting for a short time. The KGB is one of the major power centers of the Soviet dictatorship, which makes it easy for the KGB to require every Soviet citizen visiting the United States to collect intelligence information.

The most practical means of disrupting KGB operations in America is to require parity in the number of Soviet diplomats in the United States and American diplomats in the Soviet Union, and to limit drastically the size and operations of the huge Soviet mission to the United Nations.

If such steps lead to a reduction of 100 or more Soviet officials, KGB activities in the United States would be seriously disrupted. The KGB would lose many officers who otherwise would be handling active cases. But Moscow still would need to maintain contact with various offices of the U.S. government. So more of the remaining officials would be occupied with legitimate diplomatic activities, rather than with espionage.

Some Americans fear that the Soviets would take reprisals if the United States insisted on parity of official personnel. There are no grounds for such concerns. The only reprisal is likely to be the usual propaganda and demagoguery, which would last for a few weeks or months and then die out.

Another matter is the large number of Soviet employees working in the U.S. Embassy in Moscow. All of them, without exception, are KGB informants. They collect information, study American members of the embassy staff for possible operations against them, and install eavesdropping devices. Having Soviet employees there is like giving the KGB a floor in the embassy. Most, if not all, should be fired.

These measures would not stop KGB operations against this country, but would make them more controllable.

STAFF MEMORANDUM: THE LEGAL SITUATION REGARDING REDUCING THE SIZE OF THE SOVIET MISSION TO THE UNITED NATIONS

The basic law regarding the responsibilities of the United States government as the host government of the United Nations Headquarters and for other United Nations functions is set down in the general Convention on the Privileges and Immunities of the United Nations ("the General Convention")[1] and the Agreement Between the United Nations and the United States of America Regarding the Headquarters of the United Nations ("the Headquarters Agreement").[2] Neither of these agreements refers in its text to the power of the host government to limit the activities of representatives of member governments to the organization, and indeed both generally exempt such representatives from such interference.

For example, relevant sections of Article IV of the Convention, dealing with the Representatives of Members, provide:

"Section 11. Representatives of Members to the principal and subsidiary organs of the United Nations and to conferences convened by the United Nations, (sic) shall, while exercising their functions and during their journey to and from the place of meeting, enjoy the following privileges and immunities:

* * * * *

(d) exemption in respect of themselves and their spouses from immigration restrictions (and) alien registration in the state they are visiting or through which they are passing in the exercise of their functions;

* * * * *

(g) such other privileges, immunities and facilities not inconsistent with the foregoing as diplomatic envoys enjoy . . .

* * * * *

"Section 16. In this article the expression 'representatives' shall be deemed to include all delegates, deputy delegates, advisers, technical experts and secretaries of delegations."

There are similar provisions in the Headquarters Agreement:

"Section 11. The federal, state or local authorities of the United States shall not impose any impediments to transit to or from the headquarters district of . . . representatives of Members . . . , or the families of such representatives . . .

"Section 13. (a) Laws and regulations in force in the United States regarding the entry of aliens shall not be applied in such manner as to interfere with the privileges referred to in Section 11. When visas are required for persons referred to in that Section, they shall be granted without charge and as promptly as possible.

(b) Laws and regulations in force in the United States regarding the residence of aliens shall not be applied in such manner as to interfere with the privileges referred to in Section 11, and, specifically, shall not be applied in such manner as to require any such person to leave the United States on account of any activities performed by him in his official capacity. In case of abuse of such privileges of residence by any such person in activities in the United States outside his official capacity, it is understood that the privileges referred to in Section 11 shall not be construed to grant him exemption from the laws and regulations of the United States regarding the continued residence of aliens, provided that:

(1) No proceedings shall be instituted under such laws or regulations to require any such person to leave the United States except with the prior approval of the Secretary of State of the United States. Such approval shall be given only after consultation with the appropriate Member in the case of a representative of a Member (or a member of his family) or with the Secretary-General or the principal executive officer of the appropriate specialized agency in the case of any other person referred to in Section 11;

(2) A representative of the Member concerned, the Secretary-General, or the principal executive officer of the appropriate specialized agency, as the case may be, shall have the right to appear in any such proceedings on behalf of the person against whom they are instituted;

(3) Persons who are entitled to diplomatic privileges and immunities under Section 15 or under the General Convention shall not be required to leave the United States otherwise than in accordance with the customary procedure applicable to diplomatic envoys accredited to the United States.

(c) This section does not prevent the requirement of reasonable evidence to establish that persons claiming the rights granted by Section 11 come within the classes described in that section, or the reasonable application of quarantine and health regulations.

(d) Except as provided above in this section and in the General Convention, the United States retains full control and authority over the entry of persons or property into the territory of the United States and the conditions under which persons may remain or reside there.

(e) The Secretary-General shall, at the request of the appropriate American authorities, enter into discussions with such authorities, with a view to making arrangements for registering the arrival and departure of persons who have been granted visas, valid only for transit to and from the headquarters district and sojourn therein and in its immediate vicinity.

The United States government entered significant reservations concerning national security and the permissible conduct of members of national missions to the United Nations to both the General Convention and the Headquarters Agreement. With respect to the Convention, President Nixon's note declaring the ratification of the convention and transmitting it to the U.N. stated:

"By its resolution of March 19, 1970, the Senate of the United States of America, two-thirds of the Senators present concurring, gave its advice and consent to the ratification of the Convention subject to the following reservations:

* * * * *

(2) Nothing in Article IV, regarding the privileges and immunities of representatives of Members, in Article V, regarding the privileges and immunities of United Nations officials, or in Article VI regarding the privileges and immunities of experts on missions for the United Nations, shall be construed to grant any person who has abused his privileges of residence by activities in the United States outside his official capacity exemption from the laws and regulations of the United States regarding the continued residence of aliens . . ."[3]

The U.S. reservation to the Headquarters Agreement is found in Section 6 of the law that brought the agreement into force for the United States, Pub. L. No. 80-356 (1947):[4]

"Nothing in the agreement shall be construed as in any way diminishing, abridging, or weakening the right of the United States to safeguard its own security and completely to control the entrance of aliens into any territory of the United States other than the headquarters district and its immediate vicinity . . ., and such areas as it is reasonably necessary to traverse in transit between the same and foreign countries. . . ."[5]

---

[1] Done February 13, 1946, in force for the United States April 29, 1970, 21 U.S.T. 1418, TIAS No. 6900, 1 U.N.T.S. 16.

[2] Done June 26, 1947, approved August 4, 1947, 61 Stat. 3416, TIAS No. 1676, 12 Bevans (U.S.T.) 956, 11 U.N.T.S. 11.

[3] 21 U.S.T. 1442. Exercise of this power by government instrumentalities in the United States was made subject to certain procedures, viz.:

"(a) No proceedings shall be instituted under such laws or regulations to require any such person to leave the United States except with the prior approval of the Secretary of State of the United States. Such approval shall be given only after consultation with the appropriate Member in the case of a representative of a Member (or a member of his family) or with the Secretary-General in the case of any person referred to in Articles V and VI;

(b) A representative of the Member concerned or the Secretary-General, as the case may be, shall have the right to appear in any such proceedings on behalf of the person against whom they are instituted;

(c) Persons who are entitled to diplomatic privileges and immunities under the Convention shall not be required to leave the United States otherwise than in accordance with the customary procedure applicable to members of diplomatic missions accredited or notified to the United States."

These procedures are the same contained in Section 13 of the Headquarters Agreement, supra.

The note also explicitly recited that, "The Convention was duly ratified by the President of the United States of America, subject to the said reservations . . ." Ibid.

[4] 61 Stat. 756.

[5] 61 Stat. 767-768. "Pursuant to the resolution (of the General Assembly) and Section 28 of the Agreement (providing for an exchange of notes effectuating the Headquarters Agreement), I have the honor to propose that the present note and your note of this day be considered as bringing the Headquarters Agreement into effect under date hereof."

The note to the U.N. Secretary-General, Trygve Lie from the U.S. representative to the U.N. which transmitted the U.S. acceptance of the Headquarters Agreement specifically cited the provisions, such as that cited immediately above, attached pursuant to the U.S. statute which adopted it:

"Pursuant to instructions from my Government, I (W.R. Austin) have the honour to inform you that the Government of the United States of America is prepared to apply the above-mentioned Headquarters Agreement subject to the provisions of Public Law 80-356.

I have been instructed by my Government to propose that the present note and your note of this date be considered as bringing the Headquarters Agreement into effect on the date hereof (November 21, 1947)."

The corresponding note by Mr. Lie did not specifically mention the reservation in Section 6 of Public Law No. 80-356 but did make clear that the exchange of notes of November 21, 1947 should be deemed as bringing the Agreement into effect.

Three basic legal questions arise out of this underlying situation with respect to the General Convention and the Headquarters Agreement:

(1) Is the reservation contained in Section 6 of Public Law No. 80-356 valid and does it provide rights to the U.S. government to limit certain activities of foreign nationals admitted or proposed to be admitted to the U.S. in connection with the activities of the U.N.?

(2) Do the provisions contained in Section 6 of Public Law No. 80-356 and the subsequent reservation by the U.S. to the General Convention justify action by the U.S. government with respect to particular foreign nationals who are either proposed for admission to the U.S. or already admitted to the U.S. in connection with the activities of the U.N.?

And,

(3) Do the reservations of the U.S. to the Headquarters Agreement and General Convention permit the U.S. government to limit the size of national missions to the U.N.?

The remainder of this memorandum contains legal and descriptive materials related to each of these points. (The legal materials quoted are drawn from the State Department publication, "Foreign Relations of the United States 1952-1954," Volume III, United Nations Affairs (1979).

1. *The Effect of Section 6 of Public Law No. 80-356*

It has been the firm position of the U.S. government since the early 1950's that the reservation to the Headquarters Agreement contained in Section 6 of Public Law No. 80-356, *supra,* is both valid and provides rights to the U.S. government to limit certain activities of foreign nationals admitted or proposed to be admitted to the U.S. in connection with the activities of the U.N. While the U.N. has not specifically recognized the applicability of Section 6 as such, the U.N. Secretary-General (Mr. Hammarskjold) explicitly referred in 1953 to national security as the basis for certain actions by the U.S. government to limit the admission of foreign nationals to the U.S. in connection with the activities of the organization. Documentation in support of these conclusions follows:

Attachment to Memorandum by the Assistant Secretary of State for United Nations Affairs (Hickerson) to the Secretary of State, Washington, February 6, 1952.

REGULATIONS OF MOVEMENT OF PERSONS HAVING STATUS UNDER THE HEADQUARTERS AGREEMENT

Sec. 11 of the Headquarters Agreement provides that "the federal, state or local authorities of the United States shall not impose any impediments to transit to or from the headquarters district . . ." of representatives of Members of the UN and specialized agencies, Secretariat employees of the UN and specialized agencies, experts performing missions for the UN or specialized agencies, representatives of the press and other information agencies accredited by the UN or by a specialized agency, representatives of NGO's recognized in accordance with the UN Charter and persons invited to the headquarters by the UN or specialized agencies on official business.

Sec. 13 (*d*) provides that:

"Except as provided above in this section and in the General Convention, the United States retains full control and authority over the entry of persons or property into the territory of the United States and the conditions under which persons may remain or reside there."

* * * * *

It would appear that Sec. 11 read in conjunction with the pertinent paragraphs of Sec. 13 would be sufficient to negate any United States obligation to permit access to the United States at large.

The UN Secretariat has, however, in the past contended that the United States does not have the right to restrict delegations of members and Secretariat employees. The contention is based upon provisions of the General Convention on Privileges and Immunities which grant to representatives of members and to officials of the Secretariat "freedom from immigration restrictions." This contention is dependent upon a construction of the words "freedom from immigration restrictions" in which the United States does not concur. It also appears to ignore the fact that the United States has not acceded to the General Convention or views that Convention as creating obligations which the United States does not recognize. Furthermore this contention is dependent upon the fact that the UN in construing the obligations of the United States with respect to the admission and residence of aliens has never recognized Sec. 6 of the Headquarters Agreement.

Sec. 6 of P.L. 357, 80th Congress, which authorized the President to accept the Headquarters Agreement, provides:

"Nothing in the agreement shall be construed as in any way diminishing, abridging, or weakening the right of the United States to safeguard its own security and completely to control the entrance of aliens into any territory of the United States other than the headquarters district and its immediate vicinity, as to be defined and fixed in a supplementary agreement between the Government of the United States and the United Nations in pursuance of section 13(3) (*e*) [*sic*] of the agreement, and such areas as it is reasonably necessary to traverse in transit between the same and foreign countries . . ."

The legislative history of Sec. 6 indicates that the first sentence is to be read disjunctively, i.e., that it reserves to the U.S. the right to do two things:

(1) to safeguard its security and

(2) completely to control the entrance of aliens into any territory of the U.S. other than the headquarters district and its immediate vicinity.

This construction means that:

(1) the U.S. may deny access to the headquarters to aliens for security reasons, and

(2) the U.S. controls the entrance of aliens into the U.S. at large *"completely"*, i.e., the U.S. may act in its own discretion in denying to aliens the right to enter the U.S. outside the headquarters district and its immediate vicinity.

The UN Secretariat would not concur in the foregoing. While Sec. 11 and 13 of the Agreement clearly contemplate the right of the U.S. to control the entry of aliens into the U.S. at large, at least in some cases, the UN has contended that the U.S. does not have such a right in all cases. The UN has always avoided giving any recognition, whether express or implied, to Sec. 6.

The Headquarters Agreement was brought into effect by an exchange of notes of November 21, 1947. The U.S. note states:

"Pursuant to instructions from my Government, I have the honor to inform you that the Government of the United States of America is prepared to apply the above mentioned Headquarters Agreement subject to the provisions of Public Law 357."

The U.S. position is that the Agreement is to be read togehter with Sec. 6. In view of the language of the U.S. notes, it is difficult to see how the UN position that Sec. 6 does not have legal effect could prevail if a case were taken to arbitration in accordance with Sec. 21 of the Agreement.

* * * * *

The provisions of the Headquarters Agreement are the same in the case of Secretariat employees, representatives of non-governmental organizations and persons invited by the UN to the headquarters on official business as in the case of delegation members.

Memorandum of Conversation, by Albert F. Bender, Jr., of the Mission at the United Nations

NEW YORK, May 16, 1952

CONFIDENTIAL

Subject: Visa Application by Jiri Stary, Representative of Czechosolvakia to ECOSOC.

Participants: Mr. A. H. Feller, UN Legal Department USUN—Albert F. Bender, Jr.

* * * * *

Feller said that he hoped that if the U.S. found it necessary to deny the visa, it would not find it necessary to invoke the Section 6 reservation of the Headquarters agreement. He said that he hoped that the Department realized that such an action would cause real difficulty for the UN. He said that he believed that the Secretariat would eventually be compelled to contest the U.S. position and request arbitration. In such an arbitration proceeding he believed it most unlikely that the State Department interpretation of the Section 6 reservation would be upheld, that is, he did not believe that the reservation would be read as entitling the U.S. to bar persons covered by Section 11 of the Agreement from the Headquarters District on the basis that such action was necessary to safeguard the national security. He said that if the reservation were interpreted in line with State Department views, it would vitiate the entire Headquarters Agreement.

We then discussed the possibility of justifying the denial of Stary's visa on the basis of the principle of Section 13 of the Agreement dealing with the deportation of persons covered by Section 11 who abuse their privileges of residence. Feller said that he thought that such a course of action would make it much more easy for the Secretariat

to go along with us. He said that it was clear that there was a gap in the Agreement, and that the framers thereof had not envisaged a case such as Stary's. He said that while the decision would be a close one, he did not think he could take the position that Stary, if he had abused his privileges of residence while here previously, was entitled to a "second bite" at the host country. He felt that if we did base our action on Section 13 we should follow by analogy the procedures set forth in that Section with reference to deportation proceedings.

The Secretary-General of the United Nations (Lie) to the Acting United States Representative at the United Nations (Gross)

NEW YORK, June 16, 1952.

No.: LEG 240/2/01(1)

The Secretary-General of the United Nations presents his compliments to the Acting Representative of the United States of America to the United Nations and has the honour to acknowledge the receipt of his note UN-2002/133 of 10 June 1952, concerning the application by Mr. Jiri Stary for a visa to proceed to the Headquarters of the United Nations as a member of the Czechoslovakian Delegation to the fourteenth session of the Economic and Social Council.

The Secretary-General takes note of the opinion of the Secretary of State that, had Mr. Stary not left his prior post on the permanent staff of the Czechoslovakian Representative to the United Nations and departed from the United States on 31 October 1951, it would now have been necessary to require, in accordance with the provisions of Section 13 of the Headquarters Agreement, that he depart from the United States. The Secretary-General is unable to take any position as to the applicability of Section 13 of the Headquarters Agreement in the present case, since he is in receipt of no official information from the Government concerned.

It is noted that the Secretary of State also considers that, in refusing a visa to Mr. Stary, the United States is acting within the authority which it reserved to itself by the provisions of the United States Representative's note of 21 November 1947, making the United States acceptance of the Headquarters Agreement subject to Section 6 of Public Law 357 to the effect that nothing in the Agreement shall be construed as in any way diminishing, abridging, or weakening the right of the United States to safeguard its own security and completely to control the entrance of aliens into any territory of the United States other than the headquarters district and its immediate vicinity. In this connection, however, the Secretary-General notes that, in the event that this provision had been intended to constitute a reservation, it was never considered by the General Assembly nor accepted by it. Accordingly, whether or not it has the effect of conditioning obligations under the Headquarters Agreement is a question for the General Assembly, which adopted the Agreement and authorized the Secretary-General to bring it into force.

Memorandum by Albert F. Bender, Jr., of the Mission at the United Nations

[NEW YORK, July 1, 1952.]

Subject: Jiri Stary Case—Effect of Section 6 Reservation to Headquarters Agreement

Problem:

USUN and the Department presently face the problem of what action, if any, is to be taken in view of the exchange of notes, dated respectively June 10, 1952 and June 16, 1952 between USUN and the SYG UN, concerning the denial of a visa to Jiri Stary, a Czech representative to ECOSOC. USUN's note, based upon the Department's instructions, advised the SYG UN that in denying the visa, the U.S. acted within the authority reserved to it by the provisions of USUN's note to the SYG UN of November 21, 1947, making the U.S. acceptance of the Headquarters Agreement subject to Section 6 of PL 357-80th Congress. The SYG UN's reply noted that, if Section 6 had been intended as a reservation to the Headquarters Agreement, it had never been considered by the GA nor accepted by it and accordingly, whether or not it conditioned U.S. obligations under the Headquarters Agreement was a question for the GA.

* * * * *

Discussion:

The recent exchange of communications between USUN and the SYG UN, dated respectively June 10 and June 16, 1952, re the application of the Section 6 reservation to the Headquarters Agreement to the case of Jiri Stary, a Czech representative to ECOSOC, raises a serious problem.

USUN's note, charging that Stary had engaged in espionage activities when previously in the U.S. as a member of the Czech Permanent Delegation to UN, stated in accordance with the Department's instructions: "The Secretary of State also considers that in refusing a visa to Mr. Stary, the U.S. is acting within the authority which it reserved to itself by the provisions of the U.S. Representative's note of November 21, 1947, making the U.S. acceptance of the Headquarters Agreement subject to Section 6 of PL 357-80th Congress." The note earlier stated "Section 6 of PL 357-80th Congress provided in substance that nothing in the Headquarters Agreement shall abridge, diminish or weaken the right of the U.S. to safeguard its security."

* * * * *

* * * The Department has taken the position with the Congress that Section 6 is effective as a reservation and does condition U.S. obligations under Sections 11 and 13 of the Agreement. In my opinion, the Department would be subject to Congressional criticism at a later date if it did not pursue the matter further after having received the SYG UN's note. In any case, clearly the matter at issue is so important that an attempt ought to be made in the near future to resolve it with the SYG UN, by negotiation if possible, or failing that, by arbitration.

To understand the matter at issue between the U.S. and the SYG UN, it is necessary to review the history of the negotiation of the Headquarters Agreement.

* * * * *

* * * It is the Department's position as I understand it that the Headquarters Agreement is in effect and the obligations of the U.S. contained in Sections 11 and 13 of the Agreement (not to impose impediments to transit to or from the Headquarters District of certain categories of aliens regardless of laws and regulations of the U.S. relating to the entry of aliens) are conditioned by the provisions of Section 6 of PL 357. This position is based upon the Department's belief that the legislative history of Section 6 indicates a Congressional intent to condition U.S. obligation under Sections 11 and 13 of the Agreement, upon the fact that the provisions of Section 6 were specifically called by the SYG to the attention of the GA which approved the Agreement, and the fact that Ambassador Austin's note of November 21, 1947 specifically stated that the U.S. was prepared to apply the Headquarters Agreement "subject to the provisions of PL 357".

* * * * *

If the U.S. insists that its interpretation of Section 6 was made clear to the GA when the Agreement was approved and to the SYG UN when notes were exchanged bringing the Agreement into effect, and if the SYG UN maintains his position that this interpretation was not understood by the GA or himself, then it can be argued that there never was a meeting of minds and that the Agreement has never become effective. This is clearly a position which neither the SYG nor the Department would want to have established.

The SYG UN's note of June 16, 1952 appears to be incorrect in stating that whether or not Section 6 had the effect of conditioning the obligations of the U.S. under Sections 11 and 13 of the Agreement is a question for the GA. Presumably, if the SYG UN cannot be convinced by consultation of the soundness of the U.S. position, there should then be sought a decision by an appropriate tribunal with respect to the combined legal effect of the enactment of PL 357, the approval of the Agreement by the GA and of the exchange of notes purporting to bring the Agreement into effect. Such a legal determination could be had under the arbitration provisions of Section 21 of the Agreement. Although Section 6 is not a part of the Agreement as signed, nevertheless its invocation by the U.S. has now given rise to a "dispute between the UN and the U.S. concerning the interpretation or application of this Agreement" within the meaning of Section 21. This Section, of course, provides for arbitration only where such a dispute "is not settled by negotiation or other agreed mode of settlement".

Text of United Nations (ECOSOC) Doc. E/2397, April 10, 1953

ADMISSION OF REPRESENTATIVES OF NON-GOVERNMENTAL ORGANIZATIONS ENJOYING CONSULTATIVE STATUS

MEMORANDUM BY THE LEGAL DEPARTMENT

1. This memorandum is transmitted in compliance with the request, made on 9 April 1953 at the 679th plenary meeting of the Economic and Social Council, for a legal opinion on the extent to which the denial by the United States of the applications by two representatives of non-governmental organizations for transit to the Headquarters District is consistent with the terms of the Agreement between the United Nations and the United States of America regarding the Headquarters of the United Nations.

A. *Summary of Facts*

2. In accordance with resolution 288(X) concerning consultative arrangements with non-government organizations, adopted by the Economic and Social Council under the authority of Article 71 of the Charter, the Women's International Democratic Federation, a non-governmental organization in consultative relationship with the Council in Category B, designated Mrs. Margarette Rae Luckock as its representative to attend the seventh session of the Commission on the Status of Women, which adjourned on 3 April 1953, and thereafter to attend the current session of the Economic and Social Council. The World Federation of Trade Unions, a non-governmental organization in consultative relationship with the Council in Category A, designated Mr. Jan Dessau as

its representative to attend the current session of the Council. Both representatives made application for a visa at appropriate United States Consulates and the Secretariat of the Economic and Social Council made notification to the United States Mission to the United Nations to these applications, in accordance with established procedures.

3. The representative of the United States reported to the Economic and Social Council at its 679th plenary meeting on 9 April 1953 that his Government had found it impossible to grant these applications. He explained the position of his Government as follows:

"In denying these applications, my Government has found it necessary to invoke the right to safeguard its security which it reserved to itself in Section 6 of the Joint Resolution (Public Law 357) of the 80th Congress, which authorized the United States to enter into the Headquarters Agreement, and in the note of its Representative, dated November 21, 1947, bringing the Headquarters Agreement into effect."

B. *Provisions of the Headquarters Agreement*

4. Section 11(4) of the Headquarters Agreement provides:

"The federal, state or local authorities of the United States shall not impose any impediments to transit to or from the headquarters district of . . . (4) representatives of non-governmental organizations recognized by the United Nations for the purpose of consultation under Article 71 of the Charter . . . ".

5. Section 13(a) of the Headquarters Agreement reads as follows:

"(a) Laws and regulations in force in the United States regarding the entry of aliens shall not be applied in such manner as to interfere with the privileges referred to in Section 11. When visas are required for persons referred to in that Section, they shall be granted without charge and as promptly as possible."

6. These are the only provisions in the Headquarters Agreement bearing upon the right of transit to the Headquarters District on the part of properly designated representatives of non-governmental organizations. Nothing in the text of the Headquarters Agreement reserves to the United States the authority to deny a visa to any of the classes of persons specified in Section 11. Indeed, Section 13(*d*) specifies that, *except* as provided above, ". . . the United States retains full control and authority over the entry of persons or property into the territory of the United States . . .".

C. *Joint Resolution of the 80th Congress*

7. By Joint Resolution (Public Law 357-80th Congress) the Senate and House of Representatives of the United States Congress authorized the President of the United States to bring the Headquarters Agreement into effect on the part of the United States.

8. Section 6 of the Joint Resolution stated that nothing in the Agreement should be construed as in any way diminishing, abridging or weakening the right of the United States to safeguard its own security and completely to control the entry of aliens into any territory of the United States other than the Headquarters District and its immediate vicinity, and such areas as it was reasonably necessary to traverse in transit between the same and foreign countries.

9. The Secretary-General of the United Nations was authorized to bring the Headquarters Agreement into force by the General Assembly, which approved the text of the Agreement in its resolution 169(II). But in the event that the provision in section 6 of the Joint Resolution had been intended by the United States to constitute a reservation, it was never made known to the General Assembly as such, and it was never considered by the General Assembly nor accepted by it.

10. It is an established principle of international law that a reservation to a bilateral treaty or agreement is in effect a proposal to amend the text of the agreement and must therefore be accepted by the other party if it is to have any effect. David Hunter Miller, for example, in his well-known work on "Reservations to Treaties", after reviewing the history of qualfying declarations in United States treaty practice, states (p. 76), "One conclusion supported by *all* of the foregoing precedents is that the declaration, whether in the nature of an explanation, an understanding, an interpretation, or reservation of any kind, *must be agreed to by the other Party to the treaty* . . . Accordingly, in a treaty between two Powers only, the difference between a reservation of any nature and an amendment, is purely one of form." (Author's emphasis.)

11. Pursuant to its section 28, the Headquarters Agreement was brought into force by an exchange of notes between the Secretary-General and the representative of the United States. The United States note, dated 21 November 1947, added:

"Pursuant to instruction from my Government, I have the honor to inform you that the Government of the United States of America is prepared to apply the abovementioned Headquarters Agreement subject to the provisions of Public Law 357."

This observation is in general terms and did not make reference to any reservation. It was made subsequent to the final adoption of the Agreement by the General Assembly. For these reasons, and because it appeared in a formal note of entry into force, it did not give notice to the Secretary-General that the United States might claim the authority to restrict transit to and from the Headquarters District.

12. Finally, even if the United States had intended to formulate a reservation, it would not appear from a reading of section 6 of the Joint Resolution that it could have application to the present cases. It refers to control by the United States of the entrance of aliens into any territory of the United States *other than* the Headquarters District, its immediate vicinity, and the necessary area of transit.

D. *Conclusion*

13. It appears from the foregoing that persons falling within the classes referred to in section 11 of the Headquarters Agreement are entitled to transit to and from the Headquarters District, and that this right of transit has not been made the subject of any reservation.

14. Should the United States adhere to its position, it is clear that there would then exist a dispute between the United Nations and the United States concerning the interpretation or application of the Headquarters Agreement. The Council will note that section 21 of the Headquarters Agreement establishes the procedures for handling any such dispute. If the dispute is not settled by negotiation or other agreed mode of settlement, it "shall be referred for final decision to a tribunal of three arbitrators, one to be named by the Secretary-General, one to be named by the Secretary of State of the United States, and the third to be chosen by the two, or, if they should fail to agree upon a third, then by the President of the International Court of Justice."

[Telegram]

The United States Representative at the United Nations (Lodge) to the Department of State

NEW YORK, April 14, 1953—5 p.m.

* * * * *

Proposed US statements as follows:

"The items before us deal with the inability of certain individuals to obtain visas in order to gain entrance to this country for the stated purpose of attending meetings of this council or its commissions as representatives of their respective NGOS. In a larger sense however, it deals with a disagreement between the Legal Department of the Secretariat and the US Government as to the nature and extent of the obligations undertaken by my government in entering into the Headquarters Agreement. In the opinion of my del, Mr. President, little can be gained by a debate in this body concerning this disagreement. The problem here is essentially juridical in nature and I submit that in section 21 of the Headquarters Agreement there exists clear and adequate machinery for the settlement of disputes between the UN and the host country concerning the interpretation and application of the agreement. My government has no intention of contravening any part of this agreement and will continue to recognize the validity of its provisions, including the reservation expressed by the 80th Congress in PL 357. Accordingly my government is prepared to enter into conferences and negotiations with the SYG concerning this matter and, should such negotiations fail to achieve agreement, is prepared to cooperate in the next step, that of arbitration.

Memorandum Prepared in the Office of the Assistant Legal Adviser for United Nations Affairs (Meeker): Part I

[WASHINGTON,] April 15, 1953.

I. *The Secretariat's Legal Contentions*

On April 10, 1953 the Secretariat issued a memorandum (E/2397), prepared by its Legal Department, upon the legality of the United States action in refusing to grant visas to two NGO representatives under Section 11(4) of the Headquarters Agreement. The memorandum was drawn up at the request of ECOSOC in connection with the applications for admission to the United States of Mrs. Luckock and Mr. Dessau. The memorandum makes two main submissions: that the reservation to the original Agreement made in Public Law 357, 80th Congress, was never made effective and that, in any event, it would not be applicable to the cases at hand.

In regard to the first point, paragraph 9 of the Secretariat memorandum states:

"But in the event that the provision in Section 6 of the Joint Resolution had been intended by the United States to constitute a reservation, it was never made known to the General Assembly as such, and it was never considered by the General Assembly not accepted by it."

The referenced Joint Resolution is S.J. Res. 144, 80th Congress, which was enacted as Public Law 357, 80th Congress. It is difficult to see how a contention can be made that the reservation was never made known to, considered by, nor accepted by the General Assembly.

The complete text of Public Law 357, 80th Congress, was published in the official records of the Second Session of the General Assembly, 6th Committee, as Appendix I to Annex 11 (pp. 333 *et seq.*). Appendices II and III to the same Annex consist of an exchange of letters between the Legal Adviser to the State Department and the Assistant Secretary-General in charge of the Legal Department of the United Nations. Both of these letters make specific reference to Public Law 357. In addition, the report by the Secretary-General to the Assembly on the proposed Agreement (A/371), the document which formed the basis of study by Subcommittee 1 of Committee 6, contains this passage:

"As a result of the President's approval on 4 August, this Joint Resolution became Public Law 357 (Appendix 1). Both the joint resolution and Public Law 357 refer to the interpretation placed on the Agreement by Congress, in particular to the right of the United States to control the entry of aliens into the territory of the United States. In this connection it would appear desirable to draw the General Assembly's attention to section 6 of Public Law 357."

Subcommittee 1 of Committee 6 was not only well aware of the reservations, but devoted a great deal of serious debate to them. Mr. Fahy, the United States representative on the Subcommittee, reiterated time and again in the most unequivocal terms that the President was empowered to sign the Agreement on behalf of the United States only subject to the reservations specified in Public Law 357. Certain members of the Subcommittee had doubts whether the General Assembly should authorize the Secretary-General to effectuate an agreement containing these reservations. Paragraph 4 of the interim report of the Subcommittee, as drafted by Mr. Beckett of the United Kingdom (Doc. A/C.6/SC.4/W.12), contained the statement that:

". . . it was neither necessary nor appropriate for the United Nations to take official cognizance of this Resolution of Congress on the ground that the Agreement alone contained the obligations between the parties and that the actual contents of the Resolution of Congress was a 'domestic' matter for the United States."

This point was consistently refuted by Mr. Fahy, and after much debate the statement as drafted by Mr. Beckett was deleted from the Subcommittee's report, and nothing to this effect was contained therein or in the full Committee's report to the Assembly (A/427).

In addition, paragraph 9(*g*) of the interim report of the Subcommittee stated that the exchange of notes "should not contain any other matter having any effect by way of interpretation or otherwise on the provisions of the Headquarters Agreement." This was obviously unacceptable to the United States, and at its Tenth Meeting, at the suggestion of the Canadian representative, the Subcommittee decided to delete this language from its report (see UN Press Release GA/L/79 of 16 Oct. 1947).

As the Secretariat memorandum points out in paragraph 11, the Headquarters Agreement was brought into force by an exchange of notes. The United States note, dated November 21, 1947, stated that "the Government of the United States of America is prepared to apply the above mentioned Headquarters Agreement subject to the provisions of Public Law 357." The records of the Department show that there had been discussion with the Secretary-General over the proposed use of the terms "in accordance with" and "subject to". The United States had insisted upon the words "subject to" as having a more precise legal meaning. The Secretary-General acquiesced on this point.

Paragraph 10 of the Secretariat memorandum states that a reservation must be accepted by the other party if it is to have any effect. It quotes David Hunter Miller to this effect. There would seem to be no question as to the truth of this axiom. However, the real question at issue is not that one, but the question of whether, in this particular case, the United Nations did accept the reservation. In other words, the question is one not of the necessity of acceptance but of the fact of acceptance.

Acceptance of a reservation can be made in a number of different ways and can be evidenced by several different types of action. Characterizing the "subject to" clause in the United States note of November 21, 1947 as an "observation", the Secretariat memorandum states:

". . . This observation is in general terms and did not make reference to any reservation. For these reasons, and because it appeared in a formal note of entry into force, it did not give notice to the Secretary-General that the United States might claim the authority to restrict transit to and from the Headquarters District."

There is nothing general about the proviso clause of the United States note. It specifically refers to "the provisions of Public Law 357". Both the Secretary-General and the General Assembly were fully and offically cognizant of the exact provisions of that Law. Also, the section 6 reservation was not adopted by Congress "subsequent to the final adoption of the Agreement by the General Assembly." It was approved by Congress on August 4, 1947. As the exchange of letters between Mr. Fahy and Mr. Kerno shows, the Secretariat was formally and effectively notified of the exact nature of the Congressional action in August of 1947. The Secretary-General called the specific attention of the Assembly to the reservations in his Report to the Assembly on the proposed Agreement (A/371, 3 Sept. 1947). The reservations were fully considered by the Subcommittee of Committee 6 *before* either the Sixth Committee recommended or the General Assembly adopted the Agreement. The United States representative on the Subcommittee repeatedly stressed that the President was authorized to sign the Agreement only subject to the reservation. Considering that this knowledge was made known to the Subcommittee, the Committee and the Assembly, and in view of the fact that the Secretary-General was authorized to sign on behalf of the United Nations without further negotiations with the United States, it is difficult to see how a contention can be made that the Assembly was not aware of and did not accept the reservation. Having been made perfectly aware of the reservation, if the Assembly did not wish to accept it, the Assembly would have instructed the Secretary-General not to sign the Agreement but to negotiate further with the United States. However, this is not what it did, and the Secretary-General accepted the United States note of November 21, 1947 including the proviso clause. The reservation was incorporated by reference into, to use the Secretariat's language, "a formal note of entering into force". It is hard to conceive of a more effective way of accepting a reservation.

Even if one were to make the argument that as of the date of the entry into force of the Agreement the United Nations had not accepted the reservation which had been added by the United States, the application of the Agreement for a period of more than five years would certainly constitute an acceptance. In this respect the law of treaties is very similar to the law of contracts: acceptance can be evidenced by practice as well as by formal agreement. *In any event, if the practice over the last five years does not constitute acceptance, the only conclusion possible is that there is no agreement between the United States and the United Nations regarding the headquarters. If the United Nations has not in fact accepted the reservations of the United States, there has been no meeting of the minds of the two parties and no agreement exists today.*

In this connection it is interesting to note the comment upon this subject which was made by David Hunter Miller, who was quoted in paragraph 10 of the Secretariat memorandum. His comment in fact is contained in the omitted portion of the paragraph quoted by the Secretariat and which is indicated by ". . . ". It reads: "In default of such acceptance, the treaty fails, as in the case of the Naturalization Treaty with Turkey of 1874 . . ." David Hunter Miller, *Reservations to Treaties*, p. 76.

Paragraph 12 of the Secretariat memorandum states that:

"Finally, even if the United States had intended to formulate a reservation, it would not appear from a reading of section 6 of the Joint Resolution that it could have application to the present cases. It refers to control by the United States of the entrance of aliens into any territory of the United States *other than* the Headquarters District, its immediate vicinity, and the necessary area of transit."

This would seem to ignore the previous part of section 6, which reads as follows:

"Nothing in the Agreement shall be construed as in any way diminishing, abridging or weakening the right of the United States *to safe-guard its own security and . . .*" (italic supplied).

It is necessary both to consider this part of the reservation and to assign it some meaning. To ascertain its meaning it is helpful to consider the legislative history of the reservation.

The second part of the reservation, which deals with the entrance of aliens into United States territory outside the Headquarters District, was added by the United States Senate. It is more in the nature of an understanding than a reservation, in that it merely restates the provisions already contained in Article 13(*d*) of the Agreement. It will be readily admitted that there is nothing in the Headquarters Agreement which obligates the United States to give free access to areas outside of the Headquarters District and its immediate vicinity, nor which prevents the United States from completely controlling the admission of aliens into the general territory of the United States. When the House of Representatives considered the Joint Resolution as approved by the Senate, it felt that a definite reservation was needed regarding the safeguarding of the national security of the United States. It was the opinion of the House that the United States must have at least some control over the entrance of aliens into the headquarters District and its immediate vicinity, this control to be limited by the strict requirements of national security. To

reiterate, this limited control extends to the Headquarters District as well as to the remainder of the United States from which we can exclude aliens for a number of reasons aside from requirements of national security.

* * * * *

Memorandum Prepared in the Office of the Assistant Legal Adviser for United Nations Affairs (Meeker): Part III

[WASHINGTON, April 15, 1953.]

III. *Operation of Section 11 of the Headquarters Agreement*

It is the United States position, as shown earlier [Part I], that provisions of the Section 6 reservation in Public Law 357 (80th Congress) qualify the obligations set forth in the Headquarters Agreement. As the result of Section 6, the United States is not obligated to admit to the United States (for transit to and from the Headquarters District and its immediate vicinity) all aliens covered by Section 11. There are exceptions. For example, an espionage agent would be excludable under Section 6. There are other types of cases which would be exceptions also.

The Immigration and Nationality Act, in Section 212(*a*), specifies a number of categories of persons who are ineligible to receive visas and excluded from admission into the United States. In the present context, categories 27, 28 and 29 of Section 212(*a*) are particularly relevant. It is to be noted that the Attorney General has discretion, under subsection 212(*d*)(3), to authorize the admission of aliens falling into category 28, as in the case of other inadmissible categories except categories 27 and 29. Where an alien covered by subsection 11(3), 11(4) or 11(5) of the Headquarters Agreement falls into category 28, the procedure is for the Secretary of State to request the Attorney General to exercise his authority under subsection 212(*d*)(3) of the Immigration and Nationality Act. Aliens covered by subsections 11(1) and 11(2) of the Headquarters Agreement, who come within the terms of subsection 101(*a*)(15)(G) of the Act, are not ineligible to receive visas and be admitted to this country because they come within the provisions of subsection 212(*a*)(28) of the Act. In this connection, subsections 102(2), 102(3) and 212(*d*)(2) of the Act are relevant.

When Congress enacted the Immigration and Nationality Act, it recognized that certain aliens who would be otherwise inadmissible to the United States, under the terms of subsection 212(*a*)(28), would be admitted on recommendation of the Secretary of State and decision of the Attorney General because such persons were seeking to come to the United Nations under the Headquarters Agreement. However, subsections 212(*a*)(27) and 212(*a*)(29) provide for the unconditional exclusion of certain categories of aliens. The fact that in these cases the Attorney General is without discretionary authority to admit an alien temporarily under subsection 212(*d*)(3) despite his inadmissibility indicates the gravity of the security considerations where these two provisions apply. It likewise indicates that these provisions cover very limited classes of aliens, with respect to whom there is very serious information of a security nature.

The United States believes that the Immigration and Nationality Act can and should be given effect consistently with the Headquarters Agreement. Congress has regarded the two as compatible, and not conflicting, instruments. Furthermore, in giving effect to the Immigration and Nationality Act, the United States will take into account the consideration that aliens covered by Section 11 are seeking to come to the United Nations and not to travel the United States at large, and the consideration that, where necessary, geographical and other conditions can be imposed on their entry.

There have been given above [Part II] [1] the facts underlying the United States Government's conclusion that the Luckock and Dessau cases came within the provisions of subsection 212(*a*)(29) of the Immigration and Nationality Act. It is important to emphasize that these cases do not represent a new departure in American policy. The reasons for their exclusion are personal to them, indicating that the individuals personally would be a threat to United States security if they were to come to this country. They are special cases, each resting on its particular facts.

The United States considers that an alien coming within subsection 212(*a*)(28) of the Immigration and Nationality Act, and not subsection 212(*a*)(27) or 212(*a*)(29), is to be admitted to the United States if his entry is covered by Section 11 of the Headquarters Agreement, and that the reservation contained in Section 6 of Public Law 357 does not afford a ground for excluding such an alien. Subsections 212(*a*)(27) and 212(*a*)(29) of the Immigration and Nationality Act cover cases of inadmissibility to the United States where very serious security considerations are present. In deciding whether a case comes within either category 27 or category 29, the United States will take most careful account that these categories cover only very limited types of cases and of the circumstances (length of stay, purpose, conditions on entry) of the applicant alien's intended trip to the United Nations. The United States considers that an alien ineligible to receive a visa and excluded from admission under subsection 212(*a*)(27) or 212(*a*)(29) of the Immigration and Nationality Act is an alien whom the United States is entitled to exclude under the Section 6 reservation to the Headquarters Agreement.

* * * * *

Memorandum Prepared Jointly by the Department of State and the Department of Justice

[WASHINGTON, May 4, 1953.]

POSITION PAPER

The Secretary of State refers to the action of the United States in withholding the issuance of visas to certain aliens seeking to enter the United States ostensibly for the purpose of acting as consultants on behalf of certain non-governmental organizations before the Economic and Social Council.

It is the position of the Government of the United States that the Headquarters Agreement between the United States and the United Nations was brought into force on November 21, 1947 by, and in accordance with the terms of, the notes exchanged on that date between the United State Representative and the Secretary General. As specifically stated in the note of the United States Representative, the Agreement was brought into effect subject to the provisions of the Joint Resolution of the Congress of the United States (Public Law 357, 80th Congress), by which the Government of the United States stated its understanding of, or its reservation to, the approval of the Agreement. The United States Representative had no authority to conclude the Agreement upon any other basis and in fact he did not do so, as he clearly specified in his note of November 21, 1947 that he was bringing the Agreement into effect subject to the provisions of Public Law 357.

Section 6 and other parts of the Joint Resolution of the Congress of the United States (Public Law 357) are therefore, so far as the Government of the United States is concerned, to be considered as integral parts of the Agreement, in so far as its meaning and application are concerned. On the other hand, if the contention of the Legal Staff of the United Nations should prevail, and it should therefore be concluded that the United Nations has never accepted the provisions of Section 6 of the Joint Resolution (Public Law 357), it would necessarily follow that there was never actually a meeting of the minds necessary to the conclusion of a valid contract or agreement and that no Headquarters Agreement actually exists in law or in fact.

Section 6 of the Joint Resolution constitutes an interpretation, an understanding, and a reservation on the part of the United States with respect to the whole Agreement and not to any one part thereof, in so far as the security of the United States is concerned. It applies, therefore, not only to the provisions of the Agreement relating to the issuance of visas and to the admission of aliens into the United States, but also to other provisions of the Agreement, including that part providing for the arbitration of disputes or differences arising under the Agreement, which affect the security of the United States, and there is no legal obligation whatever resting or imposed upon the United States under the Agreement to submit to arbitration any question affecting our security when determined in accordance with existing laws of the United States. Any other conclusion of the Agreement would disregard the plain language of the Congress of the United States in Section 6 of the Joint Resolution and would be tantamount to holding that the right of the United States to safeguard its own security has been weakened, abridged, or diminished notwithstanding the clear language of Section 6 to the contrary.

The Representative of the United States may assure the Secretary General that the Government of the United States has no desire or intention to exclude from its national territory any alien who is coming in transit to the Headquarters District of the United Nations in the United States exclusively on official business of, or before, the United Nations. Except for the provisions relating to the protection of our national security, the United States has exempted, and is prepared to continue to exempt, such aliens from the excluding provisions of our immigration laws. Mere membership in the Communist Party, for example, has never been considered by the United States to constitute a proper basis for the exclusion of an alien coming to the United Nations. The number of alien Communists who have been permitted to enter the United States for United Nations purposes, many of whom are still in the United States under the auspices of the United Nations, should constitute ample evidence of the views and practices of the United States with respect to its security in the light of the Headquarters Agreement, including Section 6 of the Joint Resolution. On the other hand, when there is in any alien's case clear and convincing evidence that the alien is coming to the United States for a purpose outside the scope of his proper activities within one of the five categories described in Section 11 of the Headquarters Agreement, and the com-

petent authorities of the Government of the United States are satisfied that the admission of the alien would be prejudicial to the national security, the Government of the United States must invoke its sovereign right to exclude such alien from the United States. If the United States were stopped from exercising such authority its right to safeguard its own security would be impaired and this would be contrary to the terms of the Joint Resolution of Congress by which the Government of the United States agreed that the Headquarters of the United Nations could be located in the United States.

The pertinent provisions of the domestic law of the United States relating to the exclusion of aliens on grounds affecting the national security may be found in Section 212(*a*) (27), (28), and (29) of the Immigration and Nationality Act. It is submitted that there is nothing in the Charter of the United Nations or in the Headquarters Agreement which could reasonably be construed as requiring the United States to admit an alien who falls within the provisions of Section 212(*a*) (27) or (29) of the Act, as the activities envisaged in these provisions of law are not within the scope of the legitimate activities of any alien who is seeking to enter the United States in transit to the Headquarters of the United Nations as provided in Section 11 of the Headquarters Agreement. So far as Section 212(*a*)(28) of the Act is concerned, those aliens who are covered by Section 11 (1) and (2) of the Agreement are exempt from exclusion, while those aliens who fall within the provisions of Section 11 (3), (4), and (5) of the Agreement can be admitted only within the discretion of the Attorney General of the United States and under such terms and conditions as he may deem to be necessary to safeguard the security of the United States. Each such case is carefully and meticulously considered and reviewed by the top-ranking officers of the Government of the United States. The conclusion that such an alien must be excluded from the United States is never lightly reached but is the result of the most earnest consideration by the competent high-level authorities in the Government of the United States.

The Government of the United States does not consider that it is under any legal obligation to submit to the United Nations, or to any other authority, the nature or source of information of a classified nature which forms the basis of its conclusions in an individual alien's case, as the submission of such classified information is not only prohibited by the laws of the United States but the submission of such information to any other authority for review and consideration would be derogatory to, and inconsistent with, the sovereign right of the United States to safeguard its own security. The extreme liberality of treatment accorded by the United States to the thousands of aliens who have come to the United States for purposes connected with the United Nations should constitute ample evidence that the United States, as host to the United Nations, does not desire to act arbitrarily or wrongfully in exercising its prerogatives.

While the Government of the United States does not recognize any obligation to submit the facts in the cases of aliens from whom visas were withheld the representatives of the United States may be prepared to discuss the methods and procedures by which the Government of the United States arrived at the decision to withhold the visas, in order that the representatives of the United Nations may be convinced that such action was not arbitrary or capricious but was determined to be required only from the standpoint of the security of the nation, which is consistent with one of the fundamental purposes for which the Government of the United States and other Members created the United Nations, namely, the promotion of national and international security and the peace of the world.

Memorandum by the United States Representative at the United Nations (Lodge)

[NEW YORK,] May 19, 1953.

Subject: Access by Aliens to the Headquarters of the United Nations—Related Problems—Working Paper for Discussion Purposes.

I carefully considered the helpful draft position paper dated May 4, 1953, prepared by the Departments of State and Justice, setting forth the basis for the withholding of visas from two aliens seeking access to the United Nations Headquarters District ostensibly on official United Nations business. Subsequently I discussed the problem with Secretary General Dag Hammarskjold.

The Secretary General's position as stated to me is as follows:

"It is my understanding that the principle which should govern all classes of persons coming into the Headquarters on United Nations business is that no solution will ever be practical and lasting if it does not take into account both the necessity of the right of access being free from determination by any single government and the necessity that the security of the country where the Headquarters is established should not be endanagered."

Mr. Hammarskjold is prepared to agree with the essential point in our position, viz., that the United States has the right to take the steps necessary to safeguard its security. He has at the same time, however, made it perfectly clear that he cannot accept the interpretation of Section 6 of the Joint Resolution (PL 357—80th Congress) set forth in the position paper. He relies heavily on the 1947 Senate and House reports concerning that Resolution to support his contention (a) that the Congress never intended that Section 6 have the meaning we presently attribute to it, and (b) that such an interpretation was never made known to the 1947 General Assembly. My own reading of these reports and of the General Assembly records leads me to the conclusion that, if this matter goes to the General Assembly as it will if we force this issue, a persuasive case can be made in support of the Secretary-General's position. I, therefore, recommend that we not force the issue, particularly in view of the extent to which Mr. Hammarskjold appears prepared to go along with us as a practical matter, apart from the legal interpretation of the Section 6 reservation.[3]

Since Mr. Hammarskjold, within the limitations indicated, is prepared to agree to practical steps aimed at protecting the security of the United States against persons seeking access to the Headquarters District ostensibly on official United Nations business, I recommend a policy along the lines indicated below. This policy, I believe, is basically consistent with the draft position paper.

* * * * *

(2) *Governmental Representatives.*

In cases of this type, the Secretary-General has made it clear that he does not wish to be placed in a position between the United States and the Government concerned. In such cases, I suggest that the United States deal directly with the Governments involved, just as has been done in the past, and simply notify the Secretary-General of such negotiations.

* * * * *

The Secretary-General of the United Nations (Hammarskjold) to the United States Representative at the United Nations (Lodge)

UNITED NATIONS, New York, June 22, 1953.

MY DEAR LODGE: I have now had an opportunity to consider in detail the position of the Secretry-General in case of a solution of the Headquarters Agreement along the lines of your draft of points which might be included in a statement to be made by me to the Economic and Social Council. I think we need not consider our positions very far apart, although, as I indicated in our conversation, there still remain a few points to be settled between us.

I should state at once, and I am sure you will agree, that in negotiating under the Headquarters Agreement I am necessarily bound by its terms, as I of course have no authority to reach an accord with you which would alter existing provisions of an Agreement to which the United Nations as an Organization is a party.

* * * * *

As both the text and the history of the Agreement convince me that I would not have the authority to negotiate under Section 21 a settlement which had the effect of amending Section 13 (i.e., which would substitute for the right of deportation a right of exclusion, and would also substitute a prediction of possible or probable abuse of privileges for proven "activities" in abuse of the privileges of residence), I feel that, on the basis of your suggestion, we should try and solve the problem by moving closer to the technical construction of the security safeguards in the Agreement. As you will remember, the Agreement is express (and Congress was no less express) in specifying that the United States is provided with two safeguards for its security: the right to restrict to the Headquarters District and its immediate vicinity the visas of persons entitled to access under the Agreement; and deportation in case any such persons abuse their privileges in activities outside their official capacity. Having this in mind, I offer by way of annex some adjustments to your draft which would serve to bring it into better conformity with the main requirements, while remaining true to the basic principles on which we are fully agreed.

Yours very sincerely,

DAG HAMMARSKJOLD.

The United States Representative at the United Nations (Lodge) to the Secretary-General of the United Nations (Hammarskjold)

NEW YORK, July 2, 1953.

MY DEAR HAMMARSKJOLD:

* * * * *

Upon further reflection I find that, while I do not agree in full with the statements in your letter of transmittal, I really cannot add anything to what I said when you first showed me the paper—that the clarification which you have added accurately depicts many of the procedures which are open to the United States and that, by virtue of this fact, the addition of your language is in the interests of clarity and completeness and actually improves the statement. I am glad,

therefore, to say that I see no objection to your making the statement as you are planning to do it.

With best wishes,

Sincerely yours,

HENRY CABOT LODGE, Jr.

The Secretary-General of the United Nations (Hammarskjold) to the United States Representative at the United Nations (Lodge)

UNITED NATIONS, New York, July 3, 1953.

MY DEAR LODGE: I thank you for your letter of 2 July 1953, in which you tell me that you see no objection to my making the statement to the Economic and Social Council in the form in which I sent it to you by my letter of 22 June.

In your letter you mention in passing that you do not agree in full with the statements in my letter of transmittal. You also say that you accept my addition to the text as setting out "many of the procedures which are open to the United States". There might possibly be other procedures open to the United States which would be consistent with the Headquarters Agreement. But these two passages in your letter might be read as implying some reservations regarding my basic position, as expressed in my letter and draft statement of 22 June. However, I presume that—as you have not found it called for to elaborate your views—you accept what is summarized in the last paragraph of my statement—that is, that the United States "will consult me and keep me as fully informed as possible to assure that the decision is made in accord with the rights of the United States Government to protect its own security under the (Headquarters) Agreement"—in the light of my interpretation of my authority under the Headquarters Agreement as stated in my letter of transmittal, especially in the last paragraph. The text of my statement as it now stands will undoubtedly give rise to many questions in the Economic and Social Council. An interpretation of the statement in accordance with this conviction of mine as to the limits of my rights, is, of course for me, the basis on which I shall have to defend my view that the matter has now been settled "in a manner which in practice should assure the mutual satisfaction of the parties concerned."

Yours sincerely,

DAG HAMMARSKJOLD.

[Telegram]

The United States Representative at the United Nations (Lodge) to the Department of State

NEW YORK, July 23, 1953—8 p.m.

CONFIDENTIAL

36. Regarding proposed statement by SYG to ECOSOC on Headquarters Agreement.

SYG and I agreed today on following text for his statement before ECOSOC. This agreement was reached subject to his assurance that if a proposal is made in Council for reference this question to GA, he will strongly oppose it and with understanding on my part that if question is raised with respect arbitration of disagreements under headquarters agreement that SYG is free to express his opinion that arbitration applies to all sections of the agreement.

I consider this is a satisfactory solution and strongly recommend that appropriate instructions be issued to our ECOSOC delegation to support SYG's statement before ECOSOC. I believe statement by SYG and his general intentions are such that position of US fully safeguarded and I believe further that agreement between SYG and myself is such that we should experience no further serious difficulties.

Progress report by the Secretary General to the Economic and Social Council on negotiations with the United States of America concerning the interpretation of the Headquarters Agreement:

"Although the negotiations with the United States on the interpretation and application of the Headquarters Agreement are not yet concluded, it is appropriate that a brief report be made on the matter to the Economic and Social Council.

It will be recalled that earlier this year the United States, invoking a reservation it claimed to have made in becoming party to the Headquarters Agreement, declined to grant visas for transit to United Nations headquarters to representatives of two nongovernmental organizations in consultative relations with the Economic and Social Council. On 9 April 1953, the Council requested a legal opinion on the matter. A memorandum by the legal department (E/2397), issued the next day, concluded that under section 11 of the Headquarters Agreement representatives of non-governmental organizations with consultative status were entitled to transit to and from the headquarters district, and that this right had not been made the subject of any reservation. The Council later included an item on the provisional agenda of its sixteenth session relating to a report on the result of my negotiations with the United States.

Since then, I and my representatives have been carrying on discussions of the problem with the permanent representative of the United States and his staff. It was recognized from the outset that the provisions of the Headquarters Agreement should not be permitted to serve as a cover to enable persons in the United States to engage in activities, outside the scope of their official functions, directed against the security of that country. It was also recognized that under the agreement, and subject to its purposes, the United States can protect its security by granting visas valid only for transit to and from the headquarters district and sojourn in its immediate vicinity, in accordance with section 13(*e*); the United States also has the authority to make any reasonable definition consistent with the purposes of the agreement of the 'immediate vicinity' of the headquarters district, of the necessary routes of transit, and of the time and manner of expiration of the visa following the completion of official functions. As provided in section 13(*b*), the United States can carry out deportation proceedings under its law and regulations against persons admitted under the Headquarters Agreement who abuse the privileges of residence in activities in the United States outside their official capacity.

In the case of aliens in transit to the headquarters district exclusively on official business of, or before the United Nations, the rights of the United States are limited by the Headquarters Agreement to those mentioned. However, other cases may arise, the treatment of which under the agreement will raise questions. I refer to cases in which there is clear and convincing evidence that a representative of a nongovernmental organization is coming to the United States purportedly for United Nations business but also, or primarily, for a purpose outside the scope of such activities, and where further the competent authorities of the Government of the United States are satisfied that the admission of that person would be prejudicial to the national security of the United States. In the opinion of the United States representatives, such cases are outside the scope of the Headquarters Agreement, and they therefore hold that in such cases the United States Government is entitled to refuse a visa.

The United States representatives have assured me that, if in the future there should arise any serious problem with respect to the application in special cases of provisions concerning access to the headquarters district or sojourn in its vicinity, the matter will receive the most prompt and careful consideration at the highest levels, that timely decisions will be made, and that the United States will consult me and keep me as fully informed as possible, in order to assure that the decision made is in accordance with the rights of the parties concerned.

Also from the United Nations point of view it should be recognized that a person should be excluded from the host country if there is clear and convincing evidence that he intends, in bad faith, to use his trip as a cover for activities against that country's security. This particular problem may well not have been studied and resolved when the headquarters agreement was drafted. However I would consider it proper for me to accept a method of application of the Headquarters Agreement which is in accordance with the interpretation put forward by the United States representatives only if such method of application had been explicitly authorized by the competent organ.

In giving this account of the negotiations to the Economic and Social Council, I have therefore to report that there is a measure of agreement which may help to remove difficulties over the matter in the future, and I venture to express the hope that any remaining questions will be resolved satisfactorily in the application of the Headquarters Agreement or in further negotiations with representatives of the United States."

LODGE.

2. Actions Against Particular Persons Accredited to the U.N.

From the beginning, the question arose under the Headquarters Agreement whether the U.S. could refuse to grant admission to the U.S. to particular persons accredited to the U.N. on national security grounds. The immigration laws, specifically 8 U.S.C. § 1182 (a), provide that the Attorney General shall exclude certain categories of aliens; the relevant paragraphs are as follows:

"(27) Aliens who the consular officer or the Attorney General knows or has reason to believe seek to enter the United States solely, principally, or incidentally to engage in activities which would be prejudicial to the public interest or endanger the welfare, safety, or security of the United States;

"(28) Aliens who are, or at any times have been, members of any of the following classes: (Anarchists, Communists, and other revolutionists);

"(29) Aliens with respect to whom the consular officer or the Attorney General knows or has reasonable ground to believe probably would, after entry, (A) engage in activities which would be prohibited by the laws of the United States relating to espionage, sabotage, public disorder, or in other activity subversive to the national security, (B) engage in any activity a purpose of which is the opposition to, or the control or overthrow of, the Government of the United States, by force, violence, or other

unconstitutional means, or (C) joining, affiliate with, or participate in the activities of any organization which is registered or required to be registered under . . . the Subversive Activities Control Act of 1950 . . ."

Shortly after adoption of the Headquarters Agreement, the U.S. government built a record demonstrating that it considers Section 6 of Public Law No. 80-356 to provide adequate grounds for permitting the application of U.S. immigration laws to prevent the admission of certain aliens in connection with the activities of the U.N. These actions were based primarily on 18 U.S.C. §§ 1182(a) (27) and (29) since it was recognized that the presence of U.N. Headquarters in New York would require admitting Communists and followers of other ideologies that might otherwise qualify for exclusion under § (a)(28).

Some of the relevant material from the period 1952-54 has been reproduced in the preceding section. Other significant materials on this point are reproduced below:

Memorandum by the Assistant Legal Adviser for United Nations Affairs (Meeker) to the Legal Adviser (Phleger)

[WASHINGTON,] March 26, 1953.

Subject: Headquarters Agreement with the United Nations

In the Headquarters Agreement with the United Nations, the United States has engaged to permit certain classes of individuals to come into the United States in order to go to the United Nations in New York. Section 11 of the Agreement defines these classes. The President was authorized to bring the Headquarters Agreement into effect by Public Law 357 of the 80th Congress. Section 6 of that public law provides, in part:

"Nothing in the Agreement shall be construed as in any way diminishing, abridging, or weakening the right of the United States to safeguard its own security and completely to control the entrance of aliens into any territory of the United States other than the headquarters district and its immediate vicinity, . . ."

Section 212(*a*) of the Immigration and Nationality Act sets forth 31 categories of inadmissible aliens. Three of these categories are based on security criteria: Section 212(*a*)(27), 212(*a*)(28), and 212(*a*)(29). Section 212(*d*)(3) of the Immigration and Nationality Act authorizes the Attorney General to waive the grounds of inadmissibility for nonimmigrant aliens other than the grounds set forth in subparagraphs (27) and (29).

In the past, a number of aliens entitled to enter the United States under Section 11 of the Headquarters Agreement have been inadmissible under Section 212(*a*)(28) of the Immigration and Nationality Act. In these cases, the Department of State has recommended that the Attorney General waive the inadmissibility, on the ground that such waiver in the particular case was in the national interest. Although at times there have been delays in securing a decision, the waivers have, in the end, been granted.

Two very recent cases, however, have been handled differently, raising problems. A Canadian national, Mrs. M. R. Luckock, sought to enter the United States to attend a meeting of the United Nations Commission on the Status of Women, under Section 11(4) of the Headquarters Agreement. She sought to come as a representative of the Women's International Democratic Federation, a Communist-dominated organization. She appeared to be inadmissible under Section 212(*a*)(28) of the Immigration and Nationality Act. This Department requested the Department of Justice to waive her inadmissibility. The Department of Justice, for the first time, denied the request, stating that the information forwarded to Washington by the consul showed that Mrs. Luckock fell within Section 212(*a*)(29) of the Immigration and Nationality Act. The information forwarded by the consul had covered two points: (1) Mrs. Luckock held hostile views toward the United States Government, and (2) at a public meeting in Canada, she sponsored a resolution criticizing the course of the Rosenberg spy case. Mr. Hickerson and Mrs. Hahn (our representative on the Status of Women Commission) talked by telephone with Mr. Rogers, the Deputy Attorney General, about the Luckock case, but apparently did not discuss the legal aspects under the Immigration and Nationality Act and the Headquarters Agreement.

A French national, Madame M.-C. Vaillant-Couturier, is now seeking to come to the United States for the April meeting of the United Nation's Economic and Social Council, again under Section 11(4) of the Headquarters Agreement. Like Mrs. Luckock, Madame Vaillant-Couturier would be a representative of the W.I.D.F. The Department's visa office has informed UNA of its determination that Madame Vaillant-Couturier falls within Section 212(*a*)(29) of the Immigration and Nationality Act, and of its decision not to request a waiver of inadmissibility by the Department of Justice. From the facts available to this Office, it is not clear whether the view of the visa office is based on Madame Vaillant-Couturier's status with the W.I.D.F., or on additional facts. Unless a recommendation is made to the Department of Justice, the applicant will not receive a visa and will not be admitted to the United States.

As you know, this type of problem under the Headquarters Agreement has given concern to Ambassadors Lodge and Wadsworth in New York. Attached to this memorandum is a telegram of yesterday from Ambassador Lodge.[1] There are difficult legal problems involved in individual cases, both under the headquarters Agreement with the United Nations and under the Immigration and Nationality Act. These problems need to be carefully considered in each case, in order that the United States make a disposition which would leave us in a strong position if the case were later to be taken to arbitration by the United Nations under Section 21 of the Headquarters Agreement.

I suggest that careful consideration needs to be given to this type of case at two stages: (1) when this Department is considering whether to recommend to the Attorney General that inadmissibility under Section 212(*a*)(28) be waived, and (2) in discussing the matter with the Department of Justice after the State Department has recommended a waiver of inadmissibility. In the first stage, it is not satisfactory for the visa office alone to make a determination; there needs to be consultation among the Departmental offices concerned, including the Office of the Legal Adviser. In the second stage, the Department of Justice should not be put in the position of having to make a decision on waiver without the benefit of discussion with officers of this Department, including officers in L. If you agree, we should suggest to the visa office and to UNA the holding of appropriate consultations at both stages. In this way, I believe, the best application of the Immigration and Nationality Act would be secured, and we would minimize the possibilities of future arbitral difficulty under the Headquarters Agreement.

LEONARD C. MEEKER.

* * * * *

Memorandum by the Administrator of Security and Consular Affairs (McLeod) to the Under Secretary of State for Administration (Lourie)

WASHINGTON, May 26, 1953.

Subject: Memorandum from Ambassador Lodge, accompanying his letter of May 21, 1953,[1] regarding otherwise excludable aliens coming to the United Nations.

The following comments are offered on the memorandum above mentioned:

1. The Government of the United States has no desire to exclude aliens coming to the headquarters district of the United Nations, except upon the security grounds specified in the Immigration and Nationality Act. That Act specifies thirty-one general classes, some of which are subdivisible into a number of subclasses, of aliens who are ineligible to receive visas and are excludable from the United States at our ports of entry. Only three of these classes are applicable to some of the cases of aliens coming to the United Nations. (See Sections 102 and 212(*a*) (27), (28), and (29) of the Act.) None of the other twenty-eight categories of excludable aliens are generally applicable to aliens coming to the United Nations. Congress has spelled out in the Act what it meant by the security reservation contained in Section 6 of the Joint Resolution of August 4, 1947 (Public Law 357) approving the Headquarters Agreement. (See Senate and House Reports on the Immigration and Nationality Act.)

2. On the question whether the standard of evidence should be "clear and convincing", as suggested in Ambassador Lodge's memorandum, it may be pointed out that the Immigration and Nationality Act and the previous law specifies that visas shall be withheld if the responsible consular officer "knows or has reason to believe" that a visa applicant is ineligible to receive the visa. This obviously does not envisage the necessity of any concurrence by the Secretary of State or the Secretary-General of the United Nations. However, the Secretary of State will exercise his general admininstrative supervision over all phases of the work of our consular officers to see that they do not act arbitrarily or otherwise abuse their authority.

Memorandum by the Under Secretary of State for Administration (Lourie) to the United States Representative at the United Nations (Lodge)

WASHINGTON, May 29, 1953.

Subject: Implementation of the Headquarters Agreement and Section 6 Reservation

The following brief statement, based on the very helpful analysis and suggestions contained in your memorandum of May 19, 1953, sets forth our understanding of procedures which can usefully be followed in dealing with the access provisions of the Headquarters Agreement where a security problem exists.

1. It is highly desirable for you to agree with Mr. Hammarskjold on a practical working solution of the question of access by aliens to the United Nations headquarters, rather than to dispute with the Secretary-General, and the Organization at large,

legal questions concerning the effect and scope of the Section 6 reservation.

2. In cases where an alien covered by Section 11 of the Headquarters Agreement applies for a visa and the consular officer considers that the alien is or may be excludable under subsections 212(*a*) (27), (28) or (29) of the Immigration and Nationality Act, the consular officer will refer the matter to the Department of State. No visa will be denied by a consular officer prior to such reference.

* * * * *

4. When it is determined that a visa will be denied on security grounds (for example, because the Department of State or the Department of Justice considers that the applicant alien is covered by subsection 212(*a*) (27) or (29) of the Immigration and Nationality Act), the Department will communicate to you the reasons for this action. You would then be authorized in your discretion to discuss the alien's case with the Secretary-General, making known to him the substance of the information on which this Government based its decision to deny a visa. The information so given to the Secretary-General would need to be limited in such a way as not to disclose the source of the information. The Department would send its communication to you as soon as possible after the decision to deny a visa, and in any event before the visa is denied by the consular officer. As stated in your memorandum of May 19, you would not discuss with the Secretary-General the cases of governmental representatives, but of other aliens covered by Section 11 of the Headquarters Agreement.

Memorandum by the Deputy United States Representative at the United Nations (Wadsworth) to the Under Secretary of State for Administration (Lourie)

[NEW YORK,] November 30, 1953.

Subject: Visa Application of Anwar Youseff Elmeshry, UN Secretariat Recruit.

* * * * *

The file indicates that the Cairo Consulate considers that there are reasonable grounds to believe that the subject is inadmissible to the U.S. under Section 212(a)(29) of the Immigration and Nationality Act, and that by OMV 4 of November 4th the Consulate has requested the Department's advisory opinion concerning the matter. This file also contains a memorandum dated November 19th from Maney (VO) to Ingram (OIA) and Chase (SCA)[2] stating that VO concurs in the Consulate's finding of inadmissibility and recommending that the UN Organization be requested to cancel the subject's appointment as a staff member. This recommendation appears, from Ingram's memorandum of November 25th [2] addressed to me, to be concurred in both by OIA and SCA. No clearance with the Legal Adviser's office or other office is indicated.

* * * * *

I am not in a position to pass on the merits of this case, but it does appear on one reading that it ought to be possible to obtain additional information concerning the subject's alleged Communist Party membership, if necessary going directly to the Egyptian Foreign Office on a confidential basis.

My only other suggestion with reference to the merits of the case is that it appears possible that the Cairo Consulate is equating Communist Party membership, which is dealt with by subparagraph (28) of section 212(a) of the Immigration and Nationality Act, with inadmissibility under subparagraph (29). It is my understanding that this is not the intention of the Act for, if it were, then no nationals of Communist Bloc Governments could be admitted to this country as Secretariat officials. I think it would be helpful to have the Legal Adviser take a look at this.

Finally, should it be decided that we ought to attempt to dissuade the Secretary General from this appointment, I trust that we will be furnished with information which we can submit to the Secretary General in support of our position.

* * * * *

The Under Secretary of State for Administration (Lourie) to the Attorney General of the United States (Brownell)

WASHINGTON, December 30, 1953.

MY DEAR MR. ATTORNEY GENERAL: I refer to a meeting which was held with Ambassador Lodge in your office on May 29, 1953 to consider procedures to be followed in dealing with the cases of aliens seeking admission to the United States in connection with the work of the United Nations. It was agreed at that time that close liaison should be maintained between the Department of State and Justice with respect to any cases where questions of the admissibility of an alien under United States law were presented. I am writing to you now about such a case in order to secure a concert of views between our two Departments.

* * * * *

Information available to the Department of State indicates: that Mr. El Meshry is a member of a Communist group in Egypt; that officials of the Egyptian Ministry of Interior had recommended his dismissal from a position with the Egyptian State Broadcasting because of this membership, but that no action was taken or is contemplated concerning the dismissal recommendation; that Mr. El Meshry has participated in four Communist-sponsored world-wide conferences; that he has written at least two anti-American articles appearing in an Egyptian newspaper.

On the basis of the above information, it is the view of this Department that Mr. El Meshry falls within the class of aliens defined in subsection 212(*a*)(28) of the Immigration and Nationality Act of 1952, but that he does not fall within the classes defined in subsection 212(*a*)(27) or subsection 212(*a*)(29) of the Act. It has been considered in the Department of State that, in the light of Section 102(3) of the Immigration and Nationality Act, it is necessary to interpret subsections 212(*a*)(27) and 212(*a*)(29) of the Act in relation to subsection 212(*a*)(28), and as defining classes of aliens with respect to whom there is more seriously derogatory information than that covered in subsection 212(*a*)(28). To construe subsection 212(*a*)(27) or subection 212(*a*)(29) as applying to aliens who were Communists and engaged in the regular activities of Communist Party members would bar completely from entry the members of Soviet-bloc delegations to the United Nations and many Soviet-bloc nationals employed by the Secretariat. It is not believed that the statute should be so interpreted, in view of its provisions such as those contained in subsection 101(A)(15). Subsections 212(*a*)(27) and 212(*a*)(29) are believed to apply to cases where more than Communist Party membership and the usual activities incident to such membership are involved. Espionage, sabotage, and conspiracy to bring about violent overthow of the Government are examples of the type of threat to the national security evidently covered by the two subsections in question.

I would appreciate hearing from you at your early convenience whether you agree with the above stated views concerning the case of Mr. El Meshry, so that we might know in advance whether the Department of Justice would take the same view as this Department of the facts now known concerning Mr. El Meshry, upon the latter's arrival at a port of entry in the event a visa is issued to him. This Department would be happy to make available to you any relevant file materials which would be of assistance in your consideration of the matter.

Sincerely yours,

DONOLD B. LOURIE.

3. Limitation of the Size of National Missions to the U.N.

For the most part, as can be seen from the reproduced legal materials, the question of the validity and scope of Section 6 of Public Law No. 80-356 has come up in connection with the proposed admission of particular foreign nationals in connection with activities at the U.N. Yet the official position of the U.S. government has been from the first that the national security reservation contained in Section 6 is very broad.

It would appear that it cannot be effectively argued that the U.S. government is wholly without power to regulate the size of national missions to the U.N. when their magnitude and the activities of their members raise national security concerns that are within the reservation contained in Section 6 of Publid Law No. 80-356. The questions are at what point this power can be exercised and how.

The Soviets have a very broad range of interests at the U.N., a great part of which is undoubtedly legitimate. But the Soviet Mission to the U.N. (SMUN) exceeds by more than twice the representation of any other nation, including our own. The U.S. government also has compelling reason to believe that the SMUN is a center of considerable espionage activities directed against the United States. It would certainly appear on these facts that the size of the SMUN cannot be viewed as reasonable in light of the national security reservation subscribed to by the U.S. in relation to the Headquarters Agreement.

Efforts by the U.S. government to reduce greatly the size of certain national missions to the U.N. could trigger diplomatic protests and other political actions. The specifically legal consequences, however, could include arbitration between the U.S. and the U.N. organization, or arbitration of judicial process in the World Court between the U.S. and the country or countries in question.

It is noteworthy in this connection that the U.S. may not be liable to arbitration with the U.N. under the Headquarters Agreement since if a dispute between the U.S. government and the U.N. over the Section 6 reservation were pushed far enough, the U.S. might claim (as the materials above indicate) that there has been no real agreement between it and the U.N. and therefore even the arbitration provisions of the Headquarters Agreement were not applicable. It is also noteworthy, in the case of the Soviet Union, that the U.S.S.R. specifically entered a reservation to the General Convention providing that it does not consider itself bound to the jurisdiction of the World

Court over disputes arising out of interpretation of the convention.[6]

Mr. COHEN. Mr. President, I am pleased to join today with Senator LEAHY in proposing legislation calling for a reduction in the size of the Soviet mission to the United Nations in New York. This measure is a logical followup and complement to our earlier legislation, now signed into law, mandating equivalence in the number of United States and Soviet diplomatic and consular personnel in each country.

Recent events dramatically demonstrate the clear need for prompt action to reduce the Soviet espionage threat to our Nation. In the past few months, we have learned of the compromise of some of our most sensitive military information by a nest of active and retired Navy personnel and of the apparent defection of a former CIA agent who may have carried with him information characterized in an October 17, Wall Street Journal article as relating to "critical U.S. human intelligence operations in Moscow."

In the first instance, the spy ring's head, retired Navy WO John Walker, was arrested while trying to pass information to a Soviet agent, who has since left this country, in rural Montgomery County, MD, outside Washington, DC. In the latter, information about Edward Howard was provided by a Soviet defector, Vitaly Yurchenko, who had served as deputy chief of the North American department of the KGB's First Chief Directorate and had been a spy in the Soviet Embassy in Washington from 1975 to 1980.

The Yurchenko revelations and the Walker arrest have confirmed what has been a recognized fact for years—the Soviets devote considerable energy and resources to espionage against the United States.

Earlier Soviet defectors Arkady Shevchenko and Stanislav Levchenko have told us of the pervasive effort made by the Soviets to conduct intelligence operations against the United States and to recruit Americans in the private sector, military, and government to further their interests. The revelations about Howard and the Walker gang starkly and tragically demonstrate just how accurate the Shevchenko and Levchenko warnings were and just how real the Soviet espionage threat is to American and free world interests.

The diplomatic equivalence legislation is an important step in dealing with this problem. President Reagan's endorsement of this measure, now signed into law, sends a clear signal of his resolve to bring an end to the severe imbalance in diplomatic personnel which has allowed the Soviets to engage heavily in espionage activities in this country.

At present, there are over 300 Soviet diplomatic personnel in the United States, compared to only 200 United States officials in the Soviet Union. In addition, the United States employs about 240 Soviets to perform a variety of administrative and support functions in our Moscow embassy and Leningrad consulate; the Soviets employ only a handful of Americans and deny them access to the Soviet chancery building. Bringing these numbers into closer balance is essential, and I look forward with anticipation to the report from the Secretary of State and Attorney General detailing how this new policy will be implemented.

This is, however, only a first step. The next one is to reduce the bloated Soviet presence at the United Nations. The Soviets now have 295 individuals assigned to their U.N. mission in New York. About 260 of them are with the primary Soviet mission and the others with the missions of the so-called Ukrainian and Byelorussian Soviet Socialist Republics. The United States, by contrast, has about 130 personnel.

It should be noted that an additional 300 Soviet citizens work for the United Nations Secretariat in New York. A recent Heritage Foundation report by Charles M. Lichenstein, who served as deputy to then Ambassador Jeane Kirkpatrick until leaving that post a couple of years ago, estimates that over 1,200 Soviet bloc and client-state nationals are on the staffs of their countries' missions to the United Nations or work for the United Nations

The Senate Select Committee on Intelligence, on which I serve, released a report in May detailing the Soviet presence at the United Nations and the threat it represents. The committee's estimate was that a quarter of Soviet officials in the U.N. Secretariat were involved in espionage activities.

We are not able to reduce the number of individuals working in the Secretariat, but we can do something about the Soviets working in their mission. This authority is clearly provided in Public Law 357, enacted in 1947. The law, clarifying the agreement governing the U.S.-U.N. host country relationship, states in section 6 that "nothing in the agreement shall be construed as in any way diminishing, abridging or weakening the right of the United States to safeguard its own security."

The bill we are introducing today has been drafted with a recognition of the complicated legal and foreign policy implications it carries with it. It is not our intent to move with haste on it. Rather, we will seek committee hearings and administration comments. The measure is intended as a vehicle for stimulating debate on what we believe is an essential, compelling issue. Our hope is that it will generate careful thought and subsequent action.

Specifically, the legislation would declare the policy of the Congress that the size of the Soviet mission to the U.N. should be substantially equivalent to the size of the U.S. mission there. The President could continue to allow more Soviets to work at the Soviet mission if he determined that it were necessary. The State Department would be required to report to Congress every 6 months on the numbers and duties of the Soviets at the mission. In addition, as with our diplomatic equivalence legislation, the Secretary of State and the Attorney General would be required to present to Congress within 6 months a plan for reducing the size of the Soviet mission in accordance with the policy we are proposing.

This approach is a necessary and a responsible one. With an estimate 30 to 40 percent of all Soviet and Soviet bloc officials in this country engaged in espionage activities, we can wait no longer in our search for solutions.

Perhaps no better description of the need for this approach has been made than by Levchenko, the former high level KGB officer who defected several years ago. He said in a recent Washington Times article:

> The most practical means of disrupting KGB operations in America is to require parity in the number of Soviet diplomats in the United States and American diplomats in the Soviet Union, and to limit drastically the size and operations of the huge Soviet mission to the United Nations. If such steps lead to a reduction of 100 or more Soviet officials, KGB activities in the United States would be seriously damaged. The KGB would lose many officers who otherwise would be handling active cases. But Moscow still would need to maintain contact with various offices of the U.S. government. So more of the remaining officials would be occupied with legitimate diplomatic activities, rather than with espionage.

Congress has taken some important actions to respond to the Soviet espionage threat. The Leahy-Cohen diplomatic equivalence legislation has been signed into law, as has Senator ROTH'S amendment restricting travel for Soviet United Nation personnel. Additional funds have been approved by the Senate for FBI counterintelligence operations. And a major review of counterintelligence operations and resources is now underway both by Congress and within the executive branch.

[6] The Soviet reservation reads as follows:

"The Soviet Union does not consider itself bound by the provision of Section 30 of the Convention which envisages the compulsory jurisdiction of the International Court and, in regard to the competence of the International Court in differences arising out of the interpretation and application of the Convention, the Soviet Union will, as hitherto, adhere to the provisions that, for the submission of a dispute for settlement by the International Court, the consent of all the parties to the dispute is required in every individual case. This reservation is equally applicable to the provision contained in the same section, whereby the advisory opinion of the International Court shall be accepted as determinative."

The legislation we are introducing today is an essential additional step if we are to come to grips with this problem. My strong hope is that a constructive debate will be stimulated and that positive action will result. My firm pledge is to pursue this effort, and other initiatives I may deem necessary, to reduce the danger to America, our ideals and democratic principles, which pervasive Soviet espionage activities represent.

At this point, I ask unanimous consent to insert into the RECORD Ambassador Lichenstein's report, "Soviet Espionage: Using the U.N. Against the U.S.," and portions of the Intelligence Committee's report, "Soviet Presence in the U.N. Secretariat." Both contain important information which will, I believe, be of great interest to my colleagues.

[From Backgrounder, the Heritage Foundation, Sept 9, 1985]

SOVIET ESPIONAGE: USING THE U.N. AGAINST THE U.S.

(By Charles M. Lichenstein, Senior Fellow)

INTRODUCTION

With mounting concern, the West is discovering an escalating threat to its security posed by Soviet espionage. The U.S. government is prosecuting the Walker family on charges of giving military secrets to Moscow, while the West German government reels from revelations that some of its top security officials secretly have been working for East Germany. Ripples of this West German spy scandal already have reached Britain and Switzerland.

Dwarfing these as spy threats is a Kremlin-directed espionage center thriving inside the United States. At risk are, among other things, the secrets of U.S. weapons, strategic military planning, high technology, advanced manufacturing processes, industrial innovation, and biotech and biogenetic research breakthroughs. Espionage against these targets weakens not only U.S. military defenses, but undermines U.S. worldwide economic competitiveness.

What makes the U.S. particularly vulnerable to this espionage are the convenient cover and access enjoyed by the spies. They are diplomats and bureaucrats with a status even more privileged than diplomats. Not only do they operate out of Soviet bloc and Soviet client-state embasies to the U.S., but more important—and much more valuable to the Kremlin—they use as a base the diplomatic mission, agencies and secretariats affiliated with the United Nations, in the heart of Manhattan.

Their numbers run into the hundreds. At least one in three of all Soviet, East bloc and client-state diplomats posted to the United States engages in espionage. This is the confident consensus of U.S. intelligence experts. The term espionage covers a multitude of abuses of diplomatic privilege: information collection (by open and covert means, including electronic intercepts), acquisition of military and industrial technology (some of it purchased off-the-shelf, some of it stolen), recruitment and supervision of agents (some but by no means all of whom are U.S. nationals), and an array of "active measures" that involve, among others, propaganda, spreading "disinformation" and using front groups.

The estimate of one in three, in fact, appears quite conservative. It is based, The Heritage Foundation has learned from official U.S. sources, on the actual record of confirmed case histories. It probably would be much more accurate to conclude that one in two Soviet bloc and client-state diplomats is involved in espionage, warn Soviet and East bloc defectors, many of whom were KGB (Soviet State Security), GRU (Soviet Military Intelligence) or East bloc counterparts. This is confirmed by Arkady Shevchenko, former U.N. Under-Secretary General for Political and Security Council Affairs, one of the highest ranking Soviet officials ever to defect to the West. Shevchenko writes in *Breaking With Moscow* (published this year) that, of 28 Soviet bloc "international civil servants" in his especially sensitive unit in the U.N. Secretariat, at least 21 spent some or all of their duty hours on intelligence assignments, in New York and elsewhere, under KGB control.

These numbers constitute a formidable challenge to U.S. counterintelligence forces. The danger to U.S. national security is beyond question.

THE UNIQUE VALUE OF THE U.N.

There are two distinct parts to the diplomat-espionage problem. The first is inherent in the normal, reciprocal exchange of diplomats capital-to-capital (such as betwen the consulates in Leningrad and San Francisco). The Soviets post several hundred diplomats to Washington; the U.S. posts a similar number to Moscow; each group is a mix, as both sides know perfectly well, of diplomats and intelligence agents. Even on this regular diplomatic level, however, the Soviets enjoy the advantage of supplementing their own staffs with East Germans, Bulgarians, Cubans, Afghans, and other Soviet bloc and client-state diplomats. Against key targets, they operate as a single, unified hierarchy, with the Soviet KGB at the top. By contrast, the U.S maintains only loose, informal ties with the intelligence services of its Western allies, Israel, and a few other countries.

To make matters worse, the U.S. suffers from self-inflicted wounds in this diplomatic tradeoff. The total American diplomat and non-diplomat complement in Moscow is substantially smaller than the Soviet Mission in Washington: 202 vs. 495 (with 79 more Soviets currently *en route*). The Soviets, moreover, hire almost no local, American employees for the non-professional positions at their Washington embassy, but bring to the U.S. Soviet citizens to serve as embassy caretakers, mechanics, drivers and the like. The U.S., distressingly, uses mostly Soviet nationals for these jobs in Moscow. The result: 224 Soviet citizens, under the direct control of their government, now work inside the U.S. Embassy in Moscow. It is no wonder that the KGB was able to dust U.S. Embassy telephones, chairs, auto seats and other objects with carcinogenic nitrophenylpentadienal powder to track the movements of U.S. diplomats in Moscow.

The second part of the diplomat-espionage problem is even more serious. It is the unique circumstance of the U.S. serving as host country to United Nations headquarters in New York City. Here, of course, there is no tradeoff or reciprocity. All the risk is borne by the U.S., for the U.S.S.R. hosts no United Nations—or other truly international—body. For the Soviet bloc and its clients, "diplomatic" presence at and because of the U.N. is pure espionage gravy.

At the U.N., there are official missions of the Soviet Union, its satellites and clients (plus the observer missions of such non-U.N. members as North Korea, the Palestine Liberation Organization and the South West Africa People's Organization). Alongside the official U.N. missions is the U.N. itself—the huge Secretariat, plus headquarters of the U.N. Development Program (UNDP) and UNICEF (the U.N. Children's Fund). Employment totals more than 15,000, of whom 371 are from the Soviet Union, plus another 225 from the East bloc and the client states. As with Soviet bloc diplomatic personnel, these U.N. employees are a mix of genuine benign bureaucrats and intelligence agents.

Taken together, these components define the parameters of the problem posed by the U.N. as a "sanctuary for spies" in the U.S. It is a problem that the U.S. imposes on itself, for no one forces it to play host to the United Nations.

THE NUMBERS

To present the situation in the most cautious way, the number of Soviet-related diplomat-spies is calculated to underestimate the magnitude of the problem. As such, Albania, the People's Republic of China and Democratic Kampuchea (Cambodia) are not counted. Albania maintains nearly complete isolation from the Soviets and the Soviet world generally; China cannot be considered part of any Soviet-led bloc (although its U.N. Mission and Secretariat personnel in New York may pose a security threat of another kind); and Democratic Kampuchea is still represented at the U.N. by a coalition of opposition forces, partly anti-Communist and wholly anti-Soviet. Iran also is excluded, even though its ties to the international terrorist network pose a clear security threat to the U.S.

Adding together all Soviet bloc and client-state nationals who are on the staffs of their countries' missions to the U.N. or who work for the U.N., the total comes to 1,204 potential agents of espionage in the U.S. because of the U.N. (see table).

SOVIET AND BLOC NATIONALS IN NEW YORK

	Diplomats	Support staff	U.N. Sec't.	UNDP	UNICEF
Afghanistan	4	6	16	5	1
Bulgaria	11	12	14	(1)	(2)
Cuba	35	21	26	1	2
Czechoslovakia	12	9	17	(1)	(2)
German Democratic Republic	13	13	13	(1)	(2)
Hungary	11	9	15	(1)	(2)
Libya [3]	10	16	9	0	0

Nicaragua	17	0	6	(1)	(2)
North Korea	0	20	0	0	0
PLO	0	7	25	0	0
Poland	10	9	40	(1)	(2)
Romania	7	5	10	(1)	(2)
U.S.S.R	117	178	331	1	1
Byelorussia	9	5	11	0	0
Ukraine	10	8	27	0	0
Vietnam	15	11	15	1	1
Total	286	330	575	8	5
Grand total			1,204		

[1] Approximate.

[2] No breakdown by agency is available for these countries. The total also has been adjusted for a few U.N. employees located other than in New York City.

[3] Libyan nationals in New York, uniquely, are restricted to the 5 boroughs of the city.

Sources: All data from lists maintained by the U.S. mission to the U.N. diplomatic and support lists as of June 30, 1985; U.N. data as of mid- to late-1984.

Still the total is too low. Most of these "diplomats" and "international civil servants" are accompanied by spouses and/or adult dependents. On the basis of confirmed case histories, U.S. intelligence experts believe that they too undertake espionage assignments of various kinds. Supporting this assessment are defector reports. Assuming

conservatively only one spouse or adult dependent for each mission official or U.N. employee, the total doubles to some 2,408 potential security threats to the U.S.

Using the one-in-three estimate, the number of actual agents that can be used by Moscow totals about 800. Using the one-in-two ration urged by Soviet defectors, the number of actual agents is about 1,200. Even those diplomats and U.N. bureaucrats who engage in no espionage cause problems for the U.S., for the very fact that they are on tap complicates the U.S. counterintelligence challenge greatly.

WHAT CAN BE DONE?

All of the experts consulted, from federal, state and local law enforcement agencies, agree that effective countermeasures against the enormous threat posed by 800 to 1,200 espionage operatives must proceed along two parallel and complementary tracks: (1) every reasonable means must be used to limit the numbers of potential Soviet-related espionage agents in the U.S. and to limit their freedom of operation; (2) U.S. counterintelligence resources must be enhanced substantially.

Limiting Soviet U.N.-related espionage

For almost 40 years, the U.S. Government has had all the authority it needs to crack down on the U.N.-related Soviet threat to national security. P.L. 357, enacted in 1947, clarified the Headquarters Agreement of November 21, 1947, which governs the U.S.-U.N. host country relationship. In section 6, this law states that "nothing in the Agreement shall be construed as in any way diminishing, abridging or weakening the right of the United States to safeguard its own security" and in particular "completely to control the entrance of aliens into any territory of the United States other than the (U.N.) headquarters district and its immediate vicinity."

Under this authority, the U.S. restricts the freedom of movement of Soviet and some bloc diplomats at U.N. missions to an area of 25 miles from the U.N.'s New York headquarters. To do the work that legitimately brings them to the U.S., this is all the freedom they need. In 1982, in the Foreign Missions Act, Congress set up administrative machinery within the State Department in an effort to make these travel restrictions tighter.

Although the 1947 Act makes absolutely no distinction between diplomats and any other class of "aliens," no restrictions ever have been imposed on U.N. bureaucrats. As a result, in this year's State Department Authorization Act, Congress made its intent clear beyond any doubt or administrative fudging. The Roth-Hyde Amendment, named for its principal co-sponsors, Senator William V. Roth, Jr. (R-Delaware) and Representative Henry J. Hyde (R-Illinois), extends to all foreign nationals at the U.N. the restrictions that now or may in the future apply to their countries' U.N. missions. There is to be no more free ride for those "international civil servants" who are known to report routinely to their U.N. missions, to receive orders from their governments, and even to kick back part of their U.N. paychecks.

The mandate of Congress is unequivocal. Effective follow-up action by the State Department and the U.S. Mission to the U.N.—even by the U.N. itself—is now called for, in the following directions:

(1) The Roth-Hyde Amendment went into effect last week; it should be vigorously enforced.—There is no law or international convention, nor any U.S. host country obligation, that allows U.S. "guests" to break American laws or threaten U.S. national security. The most effective enforcement of the Amendment would be to require prior notification by the U.N. Secretary General of all official U.N. travel (which would alert U.S. counterintelligence agencies to potential security threats and enable them to deny permission in some cases). Further, U.N. employees who are citizens of countries under restriction should be required to request permission for "private" travel. Such unofficial travel should almost always be denied.

(2) The list restricting travel should be expanded.—None of the East European Soviet satellites is now on the restricted list. Yet their diplomats and nationals at the U.N. pose an obvious and serious security threat to the U.S. The same is true for Nicaragua. The status of the People's Republic of China is ambiguous. Its New York-based diplomats already enjoy special privileges: they are free of all travel restrictions to 29 "open cities" embracing virtually every major metropolitan area in the U.S. This would not be curtailed by the Roth-Hyde Amendment. Although China is no Soviet satellite, official U.S. sources confide that Beijing's agents in the U.S. are deeply engaged in industrial espionage.

(3) The size of some U.N. missions should be reduced.—The Soviet Mission to the U.N. totals 295—when Byelorussia and the Ukraine are added, the total is 327. By contrast, the U.S. Mission to the U.N. gets by with about one-third this number. Surely, Moscow is taking advantage of the U.S. in its role as host country. Similarly, Cuba has a staff of 56 at its U.N. mission, about the same size as major West European nations whose involvement in U.N. official business is generally much heavier than Havana's. The matter has run out of control. The State Department immediately should define "reasonable ranges" for mission size, based on such generally accepted U.N. criteria as a country's population and wealth, and the scale of assessed contributions to the U.N. budget. This woud force a cut back mainly in Soviet bloc missions and thus reduce the number of potential spies.

(4) The U.S. should stop subsidizing espionage against the U.S.—The U.S. currently pays 25 percent of the salaries of U.N. employees. This includes, of course, those who receive and submit to instructions from their governments (including instructions to spy). This is in clear violation of Article 100 of the U.N. Charter. Another related Charter abuse that the U.S. tolerates is "secondment," by which the Soviets assign their nationals to the Secretariat on contract and replace them at will. This puts an effective lock on certain key positions—in personnel, public information and Political and Security Council Affairs, for example, whose chief always is a Soviet national—and enables the Soviets to establish permanent espionage outposts within the U.N. Secretariat. The U.S. should demand that the Secretary General put an end to these Charter violations. Failing prompt, effective action, the U.S. should withhold the appropriate portion of its annual assessment.

Increasing U.S. counterintelligence resources

Even without the U.N.-related security threat, strengthening U.S. counterintelligence capabilities is an urgent priority for the FBI, CIA and other law enforcement agencies. The espionage charges against the Walker family make this clear. U.S. counterintelligence must be rebuilt after its systematic destruction during the 1970s. It is a long and slow process. Of all intelligence specialties, none is more demanding or dependent on experience than counterintelligence. Since 1981, the U.S. has begun to rebuild; more must be done. Such as:

(1) FBI counterintelligence forces in New York should be increased substantially.—More FBI agents are urgently required in New York City to monitor potential espionage activities related to the U.N. The U.S. is now in the first year of a five-year FBI expansion program, which will increase the FBI counterintelligence force by about 50 percent nationwide. Exactly how many agents the FBI needs, and how many should be posted in New York, is classified information. The President, the Attorney General and the Congress—the two Intelligence Committees in particular—have the obligation to assure themselves and the American people that the U.S. is spending what it must to rebuild a counterintelligence capability fully in line with the Soviet threat, including the U.N.—related part of the threat—and on the fastest possible track.

(2) Adequate support staff and services should be provided.—More agents alone will not get the job done. Required, too, are telecommunications equipment, data banks, stenotypists, and surveillance and other specialists. The simple lack of an adequate motor pool, for example, can abort an entire U.S. counterintelligence operation. In addition, collaboration among all American law enforcement and intelligence agencies is essential. Currently in New York, cooperation is excellent among the FBI, U.S. Mission security staff and the superb New York City Police counterintelligence forces. The President and Congress must ensure the same high level of teamwork within the U.S. intelligence community, particularly between the CIA and the FBI. Almost by definition, Soviet-directed espionage at the U.N. is a cross-border matter, justifying CIA involvement.

(3) Counterintelligence laws and guidelines should be reviewed.—A key element of the systematic attack of the 1970s on U.S. intelligence capabilities was the Foreign Intelligence Surveillance Act of 1974 (FISA). This was supplemented by Department of Justice guidelines. Most U.S. law enforcement and intelligence officials say that neither FISA (which established a special U.S. court to pass on the legality of wiretaps) nor the Justice Department guidelines seriously inhibit effective counterintelligence operations. Yet outside experts and former counterintelligence agents insist that FISA and the guidelines have a "chilling effect." Among other things, they discourage agents from even requesting especially sensitive surveillance efforts. Thus, while the special court almost always says "yes" to requests, it does so in part because it never gets the really tough ones. The President, the Attorney General and Congress must review the law and guidelines for just such crippling defects.

(4) The U.S. presence within the U.N. Secretariat should be strengthened.—Increased presence within the U.N. Secretariat of tough-minded, fully qualified U.S. professionals could inhibit the activities of Soviet bloc spies. Americans inside the Secretariat, moreover, could monitor the situation better than any outside agents. They could spot suspicious behavior—sometimes nothing more than a Bulgarian or Russian who almost never turns up in the office. And they could report their observations to ap-

propriate U.S. officials without compromising their roles as legitimate international civil servants.

THE "UNIVERSAL" SOLUTION

Another way to bring potential Soviet agents at the U.N. under more effective control would be to break up the routine, predictable pattern of the U.N. operation. A useful first step would be to keep moving the annual three-month session of the U.N. General Assembly; one year it could convene in Moscow, the next in Geneva, following that in Nairobi, and so on. This was proposed in 1981 by former U.N. Ambassador Jeane Kirkpatrick and endorsed in principle by President Reagan. By rotating the U.N. venue, the bulk of the U.N. missions and the massive U.N. bureaucracy would be operating outside New York and the U.S. for at least three months annually. The U.N. sanctuary for espionage targeted against the U.S. would be severely disrupted.

If all else fails, then the U.S. must protect itself against U.N.-based espionage by pressing for the ultimate option: moving the U.N. out of the U.S. altogether and inviting the organization to find a new home elsewhere. From the perspective of U.S. national security, it makes a great deal of sense.

The State Department and its supportive "establishment" would, of course, argue that by such an act the U.S. would be turning its back on its worldwide responsibilties. In Moscow or Geneva or Nairobi, however, as in New York, the U.S. would be able to play whatever role it wished to play in the U.N., which might even become more serious and businesslike.

CONCLUSION

All of the above recommendations are mutually reinforcing. If all were pursued, the security threat posed by the privileged sanctuary for spies provided by the U.N. could be brought under effective control.

Restrictions on Soviet and bloc diplomats' freedom to move at will within the U.S., now extended by the Roth-Hyde Amendment to Soviet bloc U.N. bureaucrats, should be rigorously enforced; the list of countries under restriction should be expanded to include the entire East European bloc; suspiciously overstaffed U.N. missions should be cut back; and the U.S. should stop paying its 25 percent share of the salaries of U.N. employees who clearly are under the control of their governments. These actions would begin to reduce the number of potential spies to manageable proportions.

The problem can be managed, moreover, by increased U.S. counterintelligence resources, adequately supported by staff and services, further backed up by a strong U.S. presence inside the U.N. secretariat and rid of unnecessary restraints on their operational freedom.

If the U.S. is really serious about turning back the U.N.-related Soviet threat to its national security, an arsenal of varied and effective weapons is at hand.

SOVIET PRESENCE IN THE UN SECRETARIAT [1]

SUMMARY

The Soviet Union is effectively using the UN Secretariat in the conduct of its foreign relations, and the West is paying for most of it. The 800 Soviets assigned to the United Nations as international civil servants report directly to the Soviet missions and are part of an organization managed by the Soviet Foreign Ministry, intelligence services, and the Central Committee of the Communist Party. The Soviets have gained significant advantage over the West through their comprehensive approach to the strategy and tactics of personnel placement and their detailed plans for using the United Nations to achieve Soviet foreign policy and intelligence objectives.

Soviet and Eastern Bloc personnel use their positions to promote a broad range of foreign policy objectives in the United Nations and its specialized agencies. They gather information to provide early warning of possible UN actions and are involved in shaping conference papers controlling the flow of news to staff and delegations, influencing delegations seeking Secretariat advice, and aiding Soviet diplomats during conference and other deliberations. Western diplomats have protested specific instances of Soviet staff abuses, but no comprehensive effort has been undertaken by the United Nations to enforce UN Charter and Secretariat staff regulations that prohibit employees from acting on behalf of their government.

Soviet employees use the United Nations to support Soviet propaganda activities worldwide. Soviet Secretariat officials receive instructions directly from Moscow on propaganda placements for coverage in the Soviet media and to arrange for the UN Secretary General to make favorable reference to statements of Soviet leaders or announcements of the Central Committee. Documents supporting Soviet interests are entered into UN records and later presented as a UN document in Soviet propaganda placements.

Key Soviet personnel have been placed in UN offices responsible for UN relations with nongovernmental organizations and Soviet front groups. Nongovernmental organizations such as the World Peace Council participate in UN activities. Soviet interest in these groups stems from their ability to influence UN debate and the domestic political process in their own countries.

Approximately one-fourth of the Soviets in the UN Secretariat are intelligence officers and many more are co-opted by the KGB or GRU. All Soviets in the Secretariat must respond to KGB requests for assistance. The Soviet intelligence services use their UN assignments to collect information on UN activities; to spot, assess, and recruit agents; to support worldwide intelligence operations; and to collect scientific and technical information of value to the USSR.

Soviet subversion of UN programs have been prevented on occasion by strong US protests and action by UN officials. Secretary General Perez de Cuellar has thwarted some Soviet personnel moves, but he is dependent on Soviet support for UN diplomatic efforts. The Soviets will maintain a distinct advantage in the United Nations until their diplomatic and intelligence efforts are matched by systematic, long-term Western opposition.

Soviets in the United Nations and its specialized agencies, by organization in 1984

Organization	Number of Soviets
Total	773
United Nations, New York, Geneva, Vienna, Nairobi, etc.	469

World Tourism Organization [WTO], Madrid	6

SOVIET PRESENCE IN THE UN SECRETARIAT

The Soviet Union is effectively using the UN Secretariat in the conduct of its foreign relations, and the West is paying for most of it. In contrast with Western members whose citizens normally work as international civil servants, Soviets in the UN system are part of a large and complex system designed to:

Determine how to integrate UN activities with other foreign policy and intelligence efforts.

Identify the specific positions in the UN system that can contribute to those efforts.

Secure and keep targeted positions.

Manage the work of Soviet citizens holding UN jobs.

The lines of authority for this system begin in Moscow with the Politburo and run through the Foreign Ministry, the KGB, and GRU to the Soviet Missions in New York, Geneva, Paris, Vienna, and other cities with UN agency headquarters. The Soviet missions, in turn, directly control the 800 Soviet citizens employed by the United Nations and its specialized agencies. In addition, the Soviets have direct control over third-country agents recruited by the KGB and have influence over the 200 Eastern Bloc employees. Thus, Western delegations face not only the large Soviet delegations and the Third World majority in the United Nations but also an organization of 800 people within its bureaucracy who have been placed by, are managed by, and are responsible to the Soviets and their allies.[2]

[1] This report was prepared for the Select Committee on Intelligence by elements of the U.S. intelligence community.

[2] See appendix A for details of the organization that controls Soviet UN Secretariat employees.

The Soviets comprehensive approach to the strategy and tactics of personnel placement is unique in the UN system. Soviet personnel placements reflect overall Soviet objectives in propaganda, acquisition of Western technology, and intelligence activities. In the Security Council and the General Assembly, the Soviets seek positions from which they can protect or promote Moscow's broad political and intelligence objectives.

In addition to their comprehensive approach to placement, the Soviets maintain effective control over their citizens in the UN system. Most Western employees are career international civil servants on contract with the United Nations. Soviet citizens are first carefully selected for a specific function and often stay on that career track, rotating on short-term contracts among assignments in international organizations and related Soviet ministry slots. No Western state or group of states can match the combination of expertise and placement strategy of the Soviet Union and the Eastern Bloc in the UN system.

Ninety percent of the salaries for Soviet personnel in the UN Secretariat is paid by the contributions from other members states. Moreover, the Soviets also net an estimated $20 million in hard currency each year from kickbacks they require from their UN staff. These funds are used to finance other diplomatic, propaganda, and intelligence activities.

Soviet objectives [3]

Moscow has specific objectives and detailed plans concerning its participation in the UN system. The Soviets serving in the UN system have four basic objectives:

Promote Soviet and allied interests in the United Nations.

Spread Soviet propaganda.

Use status to influence individuals and groups within member states.

Undertake intelligence operations.

Geographical distribution of UN staff

In 1957 the admission of 20 new members to the United Nations prompted UN General Assembly consideration of the equitable distribution of positions in the UN Secretariat. The General Assembly recommended to the Secretary General that representation of new members be increased by giving preference in hiring to nationals of "underrepresented" countries and by increasing the number of fixed-term contracts, by which officials of governments are loaned or "seconded" to the United Nations for a fixed number of years.

The Secretary General responded by ordering publication of a report each year that shows the representation in the UN Secretariat by country and posts, including all political posts (P-1 and higher), and by developing a system of desirable ranges for specific countries and regions based on population, cultural tradition, political system, and UN contribution. From the beginning, the United States and Western Europe have been overrepresented, and the Third World and the Eastern Bloc have been underrepresented.

The trend of the last 20 years has been to increase the number and proportion of Third World and Eastern Bloc nationals. Since the UN Secretariat has increased in size, the number of Western Secretariat officials also has increased, but their proportion in the Secretariat and their dominance of the institution have decreased.

Promoting Soviet interests

Soviet and Eastern Bloc personnel in the UN Secretariat use their positions to promote Soviet and Eastern Bloc interests in all phases of UN action. Their efforts begin with gathering information to provide early warning of possible UN actions and do not end until the final report has been disseminated. Soviet and Eastern Bloc personnel are involved in shaping conference papers, controlling the flow of news to staff and delegations, influencing delegations seeking Secretariat advice, and aiding Soviet diplomats during conferences and other deliberations.

The kickback system

The Soviet Union receives about $20 million per year in salary kickbacks from Soviet employees in the United Nations and its specialized agencies. Although this sum does not cover the full cost of Soviet participation in the United Nations, it is a major subsidy for Soviet diplomatic and intelligence efforts.

The kickback system did not begin as a calculated scheme but rather as a Soviet Government response to the ruffled feathers of Soviet ambassadors jealous of the perquisites of their offices. In the early 1960s the Ambassador to Austria complained that young diplomats recently graduated from college and working for international organizations were getting three times his salary. Worse, the youngsters were buying Western cars. As a member of the Central Committee, the Ambassador got the support of his high-ranking colleagues, and the practice of salary kickbacks was begun.

An identical kickback system is at work throughout the United Nations. Each position in the UN Secretariat is assigned a rank and pay grade equivalent to that in the Soviet Mission, which is roughly comparable to an individual's diplomatic status. No matter his rank or grade, each Soviet employee is required to turn over his entire UN salary to a finance clerk in the Soviet Mission. The clerk then pays the Soviet Secretariat employee the standard hard currency salary paid to mission personnel of the same rank plus 10 percent. If the Soviet resides outside the Soviet compound, he also receives an apartment allotment. The payment usually does not meet the actual rental expenses. The hard currency contribution Soviets make to the UN pension fund is turned over to the Soviet mission when they leave the UN Secretariat.

Early Warning.—Each Soviet Secretariat employee has his UN work reviewed by the Soviet mission for analysis and comment. In addition, the KGB has access to some UN code cables, some of which are copied and sent to Moscow. Through these efforts, the Soviet mission is aware of the initiation of Secretariat actions and is able to intervene early on when the substance of the recommendations are more easily influenced. Early warning also gives Soviet diplomats longer leadtimes to prepare for a meeting.

Conference Preparation.—Groundwork for major UN conferences begins years in advance with the Secretariat's preparation of the basic documents for discussion. Soviet and Eastern Bloc personnel are in a position to shape these documents to favor their governments' positions. Soviet employees directly influenced key conference documents for the UN Special Sessions on Disarmament in New York and the UN Conference on Trade and Development (UNCTAD) in Belgrade in 1983. The UNCTAD document was such an egregious distortion of Soviet-versus-Western aid efforts that it drew a sharp US protest.

News Service.—The Soviets have tried to gain control of the Political Information and News Services (PINS) established by the United Nations to provide Secretariat staff and member states with synopses of media reports. Supervision of PINS was assigned to the office of UN Secretariat Under Secretary General Viacheslav Ustinov, who delegated the editorial responsibilities to his special assistant, Viktor Andreyev.

Control of PINS gives the Soviets an opportunity to select and edit press items. Review of PINS products indicates an anti-US bias and an absence of unfavorable coverage of the Soviet Union. For example, during the US election in the fall of 1984, PINS used selective coverage from US newspapers to support the Soviet position that President Reagan's arms control proposals were motivated by campaign politics.

History of Soviet presence in the UN Secretariat

Soviet activities since the founding of the United Nations in 1945 indicate that USSR participation has evolved through three phases:

From 1945 to 1954. Moscow sent few of its people to serve in the Secretariat, and those sent tended to be senior officials responsible for monitoring UN activities.

From 1954 to 1970. The Soviets established themselves in key Secretariat positions and developed tactics to shape Secretariat activities to meet their needs.

From 1970 to the present. Moscow refined its system of personnel placement and control so that Soviets in the Secretariat function reasonably well as adjuncts of the Soviet Foreign Ministry and intelligence services.

Before 1954 the Soviet Government considered the United Nations a pro-US organization and was unwilling to commit resources to it. The government also feared that giving Soviet citizens the status of international civil servants would lead to defections. Consequently, only a few well-screened Soviet officials were employed in the UN Secretariat, and only a handful of KGB officers were under UN cover.

In 1955 Nikita Khrushchev recognized that the trend toward decolonization would mean the admission of a large number of newly independent states to the United Nations, which would transform the character of the organization. The Soviet Foreign Ministry responded with new interest to the United Nations by enlarging its Department of International Organizations and creating new sectors to deal with disarmament and international economic organizations. A Khrushchev demand for a more equal representation in the Secretariat caused a push for UN positions, which initially were staffed by poorly qualified individuals.

As the Soviets gained more UN posts, the pool of qualified people with UN experience increased. More acceptable candidates were provided for vacancies, and the KGB became increasingly subtle in seeking advantageous positions for its officers. The 800 Soviets currently employed in the United Nations reflect this focus on increasing the quality and influence of Soviet placements.

Influence on Other Delegations.—Secretariat staff officials are often asked for advice and assistance, particularly by Third World delegations. Such exchanges allow the Sovi-

[3] See appendix B for details on Soviet interest in UN components.

ets in the Secretariat to influence the presentation of positions of friendly Third World delegations. Soviets in the Secretariat also use third-country nationals to sound out Third World or Western countries on proposals the USSR wants to introduce. By taking these soundings through third-country nationals and then having a client sponsor the initiative, the Soviets avoid some of the disadvantages of Soviet sponsorship.

Support for Meetings.—Soviet and Eastern Bloc personnel also use their positions to assist their delegations attending UN meetings. These efforts provide small but significant advantages. For example, the Soviet-dominated Office of Conference Services gives Soviet diplomats the advance copy of speeches that are prepared for the interpreters. The Soviets also receive advance copies of documents prepared for the official record of UN meetings, which facilitates their preparations.

Soviet Secretariat staff members do not hesitate to manipulate UN procedures to favor the Soviets and their allies. During the 1968 UN General Assembly (UNGA) debate on China's representation in the United Nations, Viktor Lesiovskiy, who was serving as a special assistant to Secretary General U Thant, drew a formal protest from the US Mission when he put the United States in a disadvantageous position on the speakers list.

Decorum does not preclude Soviet UN officials from providing advice to Soviet delegates during UN proceedings. At the January 1962 debate on the Congo issue, the Soviet Under Secretary General passed five penciled notes to Soviet representative Valerian Zorin, drawing complaints from non-Communist delegates that the action was highly improper.

Soviets in the Secretariat provide internal UN budget information directly to the Soviet representative on the UNGA's Fifth Committee, which is responsible for the budget. In technical conferences, Soviet Secretariat officials have been assigned directly to the Soviet delegation.

Obtaining UN Resources. Soviets in the UN Secretariat are instructed to get back as much as possible of the USSR's contribution to the United Nations. Some of the activities include getting the United Nations to sponsor conferences in the USSR and to publish Russian UN documents. In the UN Educational, Scientific, and Cultural Organization (UNESCO), Soviets are diverting programs to the USSR intended for underdeveloped countries.

Soviet tactics for securing UN jobs

The Soviet Government accomplishes its personnel objectives in the United Nations through a combination of long-range planning and dogged persistence. The Soviets usually begin their efforts to secure slots through the formal UN personnel systems, but they also use a variety of other tactics to gain their ends. One ploy is to remain geographically underrepresented in the Secretariat to improve their chances of securing desired posts. If the Soviets are particularly interested in a specific position, they will present a well-credentialed, outstanding candidate for the post. This method was used in securing the directorship of the Dag Hammerskjold Library at UN headquarters in New York. When a qualified person is not available, a resume is falsified. Political pressure also is used to gain personnel concessions. For example, the USSR has blocked the transition of the UN Industrial Development Organization into a specialized agency to make sure a deputy director general position is reserved for the Eastern Bloc countries.

That Soviets also achieve their objectives by ignoring or manipulating the UN vacancy notice system. As Director of Personnel in Geneva, Gely Dneprovsky used his authority to hire locally on temporary contract without approval from New York. He moved Soviets or their allies into key positions as temporary appointees so that they could subsequently apply as internal candidates. The Soviets have also used friendly third-country nationals to protect their slots. For example, when a KGB agent who was filling a senior political officer slot returned to the USSR on leave for a year, a Spanish national working under Soviet supervision as a manual laborer was shifted to fill the slot ad interim. The Soviets have also been known to exclude highly qualified third-country candidates from consideration to make their own nationals look better and have intervened at the highest levels to protect incompetent Soviet officials.

Propaganda placement

The Soviets use the United Nations to support Soviet propaganda activities worldwide. Secretariat officials receive instructions directly from Moscow on placing materials or staging propaganda events for coverage in the Soviet media. Communist Party groups in the secretariats of international organizations concentrate on the use of UN posts for Soviet propaganda.

Soviets in the Secretariat are instructed to arrange for the UN Secretary General to make favorable reference to the statements of Soviet leaders or announcements of the Central Committee. The Soviets circulate these statements and a wide variety of decisions and announcements of the Soviet Government as UN documents, which are then reported in Soviet media as having been acknowledged by the United Nations. As a matter of practice, the United Nations allows documents of any delegation to be entered in the record and circulated as official UN documents. The fact that the documents have been circulated in the United Nations is used by the Soviet press and other media in a way that gives the Soviet propaganda placement more credibility.

The Soviet delegation exploits UNESCO for propagandizing Soviet achievement in agriculture, science, culture, and education and the advantages of the Soviet way of life. The Soviets use the organization's programs, international forums, information and publication activities, and its audiovisual services.

The party committees in the Soviet communities in New York, Geneva, Paris, and Vienna are actively involved in Soviet propaganda activities. The party structure is made up of the Soviets in the embassy, consulate, the trade mission, and groups from the secretariats of each international organization. Each group has a propaganda committee that meets to discuss practical steps for attaining Soviet propaganda objectives. One or more representatives of each committee attends the main propaganda committee meeting once a month. The main committee meeting is chaired by the Ambassador, who is assisted by the Party Secretary, whose instructions come from the Central Committee.

The Ambassador holds periodic meetings to review the progress of the propaganda program and to discuss plans for increasing the effort. Occasionally, an official of the Cadres Abroad Department of the Central Committee visits the UN representing himself as a member of a delegation to an international organization or conference, but actually his mission is to discuss propaganda activities conducted within the secretariats of international organizations.

Support of Soviet interests outside the United Nations

Soviet Secretariat employees use their positions to influence not only the diplomatic activity within the United Nations but also the groups and individuals within member states. To accomplish this objective, they are focusing particularly on nongovernmental organizations (NGOs) associated with the United Nations and Soviet front groups.

NGOs.—Groups such as the World Peace Council participate in a wide variety of UN activities to bring nonofficial views and information to member states. NGO representatives may attend conferences as observers; submit papers, which become part of the official record; and at times speak at meetings. The NGOs are targets because of their potential to influence UN debate and because of their interaction in the political processes of their countries.

International Year of Peace

Preparations under way for the 1986 International Year of Peace (IYP) are an example of the ability of the Soviets in the Secretariat to influence organizations outside the UN system. The UNGA proclaimed 1986 as International Year of Peace and invited member states to participate in its observance. Soviet Under Secretary General Ustinov was assigned responsibility for the project. His UN staff is soliciting funds for the project and organizing regional meetings of nongovernmental organizations. In this way, individuals and groups will participate in a UN project without suspecting that the effort is managed by a Soviet.

The Soviets have key personnel in offices responsible for UN Secretariat relations with nongovernmental organizations. In New York, Anatoly Mkrtchyan heads the External Relations Division of the Department of Public Information. At UNESCO, Assistant Director General Sema Tanguiane personally approves the list of invitees to UNESCO nongovernmental meetings. In Geneva, Political Officer Vladimir Soloviev is in charge of seminars and relations with NGOs in the Information Service.

Front Groups.—The KGB and the Central Committee actively promote the connection between UN and Soviet front organizations such as the World Peace Council (WPC). Soviet Secretariat employees also attempt to get high-level UN representation at meetings and conferences sponsored by front organizations. When WPC President Romesh Chandra visits the United Nations, Soviet personnel in the Secretariat are instructed from Moscow to coordinate the visit and arrange meetings with the UN Secretary General and the presidents of the Security Council and the General Assembly.

The Soviets use the UN imprimatur and funds to lend credibility and prestige to Soviet front organizations involved in Moscow's peace offensive in the Third World and Western Europe. The front organizations participate in the meetings of major UN committees, subordinate organizations, regional commissions, and specialized agencies. They are in contact with the Secretary General and departments of the Secretariat.

Intelligence operations

Approximately one-fourth of the Soviets in the UN Secretariat are intelligence officers. Moreover, many other Soviets are coopted by the KGB and GRU. All Soviets in

the UN system must respond to KGB requests for assistance.

In the early years of Soviet participation in the United Nations, Moscow placed a few intelligence officers in New York, but they were not very successful in collecting information. The KGB and GRU initially used UN positions only as a cover for intelligence activities. Over time, Soviet intelligence services have become experienced in the use of the UN system and its personnel and program resources to support their efforts. They now use their UN assignments and the organization itself to collect information on UN activities; to spot, assess, and recruit agents; to support worldwide intelligence operations; and to collect scientific and technical information of value to the Soviet Union.

No kid stuff

The Youth Forum, sponsored by the National Swiss Commission for UNESCO, is a tradition. Since 1953, 500 schoolchildren from the four corners of Switzerland and bordering French regions have assembled in Geneva once a year to "play" United Nations. As in the General Assembly, the young people are grouped by the countries represented in the United Nations and debate a specific topic for three days.

For 25 years, the Forum was held in the Palace of Nations, an official UN building, which gave the event an added sense of authenticity. But since 1978, following an interesting and revealing incident, the forum has been held at the International Conference Center, which belongs to the city of Geneva.

The topic of the Forum that year was "The Charter of the United Nations and the Human Rights Declaration." On the afternoon of the first day, a young boy "representing" the United Arab Emirates motioned for the elimination of the two seats occupied by the Ukrainian and Byelorussian Soviet Socialist Republics, which are an integral part of the USSR. He considered it unfair that the Soviets had three votes in the General Assembly—which has been the case since the United Nations was established in 1945—when they are the greatest violators of human and civil rights. The motion was adopted.

This nonconsequential play acting sparked a high-level Soviet response. A Soviet official of the UN press service happened to see the proceedings and reported them to the Soviet Ambassador. The next morning, Ambassador Zoya Mironova woke the director of the Palace of Nations and demanded that he terminate the Forum. The director, Luigi Cottafavi, explained that the assembly entailed no commitment for the United Nations, but, when the young people arrived at the Palace about 9 a.m., they found the doors locked. The decision has been made by the official in charge of conference services, Vladimir Lobachev, a Soviet, without consulting the director of the Palace. The young people had lost. They left the Palace and never returned to disturb the peace and quiet of the diplomats.

Cover.—UN staff assignments are used as cover for operations directed at the host country and third countries. UN Secretariat status provides intelligence officers with the opportunity to travel unencumbered by restrictions imposed on Soviet diplomats. Furthermore, UN identification does not disclose nationality, which allows Soviet UN employees to attend professional, academic, or political meetings and to develop contacts without revealing their nationality.

One example of Soviet use of UN cover involves Anatoliy Andreyev, an intelligence officer who worked as a UN librarian. In 1973 Andreyev met a civilian employee of the US military at a librarians conference on Long Island. After a year of exchanging unclassified documents, Andreyev offered to help the military employee financially in exchange for specific classified documents. Andreyev left the United States after a quiet protest from the UN mission.

Another GRU officer, Kirill Chekotillo, worked in the UN Office of Political and Security Council Affairs for the Soviet Under Secretary General. During that time, Chekotillo also traveled around the United States visiting various research institutes. Using the coverage of a German working for the United Nations on Law of the Sea negotiations, he was able to gather information on the status of US oceanographic research. When the United States pointed out these clandestine activities to the Secretary General, Chekotillo resigned and returned to Moscow.

Recruitment.—The prestige and importance of a UN post for European and Third World diplomats provide an excellent opportunity for the Soviets to meet and develop long-term intelligence sources and agents of influence. In New York, Geneva, and Vienna extended contact with Africans and Asians does not arouse the suspicion it would in the diplomats' home capitals, where Soviet officers may be under heavy surveillance.

The United Nations is fertile ground for Soviet recruitment efforts. Soviets working in the UN personnel system use their access to personnel records for spotting and assessing possible recruits. UNESCO, the International Atomic Energy Agency (IAEA), UNCTAD, and other UN agencies sponsor seminars and conferences in the Soviet Union, and the Soviets in the secretariats control or monitor the invitations to these events. In the Soviet Union, the attendees are targets for Soviet intelligence officers.

Soviets in the UN personnel system also help their agents get UN jobs. These posts may be used to enhance the political or diplomatic career prospects of an agent of influence or UN employee as an enticement or reward for service. The Soviets can be as effective in a negative way; they prevent promotions and make working conditions unpleasant for uncooperative UN employees.

Third-Country Operations.—Soviet intelligence officers use the headquarters of UN international organizations to support their third-country operations. Meetings are planned for New York, Geneva, Vienna, or Paris, although the agent's travel and business have nothing to do with the United Nations. UN conferences held in these cosmopolitan cities allow Soviets extended contact with agents with whom it would be difficult to meet in their home countries. A recent case involved Arne Treholt, a prominent member of Norway's UN delegation from 1980 to 1982. The Norwegian State's attorney accused Treholt of obtaining NATO classified information and passing it to the Soviets. He met his KGB case officer at the UN Library in New York.

Scientific and Technical Collection.—The USSR also takes advantage of its positions in international organizations to acquire scientific and technical information and equipment. A large portion of the individuals who come to the UN Secretariat from the State Committee for Science and Technology and related academic institutions are KGB or GRU personnel, or have been co-opted by the intelligence services. Soviet tactics vary from simply taking hardware and shipping it to Moscow to arranging for international organizations to conduct or support research that fills gaps in Soviet technological knowledge.

The Soviets use the UN copying facilities and have shipped boxes of technical literature back to the USSR at no cost to the Soviet Government. As the Soviets have assumed more responsible positions as directors of research programs, they have been able to establish data bases of specific interest to the Soviet Union, again at UN expense.

The Soviets began using the UN in their scientific and technical collection effort at the International Atomic Energy Agency in the late 1950s. Positions acquired in IAEA libraries and research offices gave them legitimate access to Western equipment and publications, computer systems, software, and data bases.

Chernenko the UN delegate

In 1974 Konstantin Chernenko, then Chief of the CPSU Central Committee's General Department, visited the United States as a member of the Soviet delegation to the UN Special Session on Raw Materials. He was interested in how the UN Secretariat worked and what kind of technical services were provided. He also was interested in familiarizing himself with US automated data-processing systems.

Chernenko's trip to Washington included a tour of the US Government computer center. In the briefing, he was introduced to The New York Times Data Bank system. The system was queried for information on Chernenko, and to his surprise and amusement two separate press items came up. The news items were printed and given to the visitor. The next week the wife of the KGB Resident assigned to the New York Soviet Mission to the United Nations began using the UN computerized Data Bank Service to tap into The New York Times Data Bank.

APPENDIX A

Soviet organization in the United Nations

Soviet ability to use the UN Secretariat as an instrument of its foreign policy depends on a large organizational structure capable of managing the 800 Soviet and the Eastern Bloc citizens working in the United Nations and its specialized agencies. The process begins with the selection of personnel. The Foreign Ministry, the KGB, other ministries, and the party Central Committee apparatus all are involved in the process. The Soviet missions to the various UN organizations are the focal points for managing and evaluating the Soviet employes in the UN system. Finally, the specific plans and instructions for actions in the United Nations are formulated and approved in Moscow by the Foreign Ministry, the KGB, and the Central Committee.

The personnel selection process

Soviets do not apply directly to the United Nations for employment. They are nominated by Moscow and "seconded" or loaned to the United Nations as Soviet Government employees. The Office of Personnel Administration in the Foreign Ministry has an International Organization Section that acts as the clearinghouse for appointments to the UN Secretariat. The UN Information Office in Moscow does the paperwork for the application. Although the office is a formal part of the UN Secretariat, it is staffed and controlled by the KGB.

The Office of Personnel Administration of the Foreign Ministry manages a pool of ministry professional and clerical employees whose specialty is international organizations, and receives nominations for other ministries and institutions in the Soviet Union. This office maintains contact with the UN Office of Personnel and the permanent missions of the USSR to the various UN institutions. The Foreign Ministry notifies the other ministries of anticipated UN openings and prepares the formal nominations for the Central Committee. Over the years a quota system has emerged, and various ministries have come to regard particular jobs in the United Nations as their property.

The Foreign Ministry provides the largest number of employees for UN assignments. Foreign Ministry candidates for UN posts are drawn from three main sources: the substantive offices that deal with the United Nations, foreign service officers on rotational tours, and schools sponsored by the Foreign Ministry, such as the Institute of International Relations.

The KGB and GRU provide the second group of candidates. The Office of Personnel Administration is in constant touch with the KGB. The paperwork is done by the Foreign Ministry. The forms, which are submitted to the Cadres Abroad Department of the Central Committee, provide the fictitious backgrounds developed by the KGB for its personnel.

Other ministries, state committees, and academic institutions also provide candidates to the UN system according to their functions. For example, the State Committee for Science and Technology contributes scientists to carry out its role in acquiring Western technology, and the Health Ministry provides doctors to the World Health Organization.

The Communist Party Central Committee apparatus from time to time provides personnel for particular UN jobs. The key offices are the International Department, headed by Boris Ponomarev, and the International Information Department, headed by Leonid Zamyatin. Stanislav Menshikov of the International Department served in the Economic and Social Department of the UN Secretariat in New York in the 1970s.

In addition to the formal procedures for personnel selection, an extensive network of personal contacts influences the process. The Permanent Representatives in New York, Geneva, and Vienna have considerable influence in nominating proteges for key posts. Prominent party and Foreign Ministry officials find jobs in the United Nations for their relatives and friends. In 1983 three children of high-level Foreign Ministry officials worked in the UN Secretariat in New York.

Bureaucratic contests also become a factor in the process if a UN job attracts the attention of more than one ministry. When KGB officer Viktor Lesiovskiy was invited by Secretary General U Thant to be his assistant, the KGB was given the right to nominate his successor over the objections of the Foreign Ministry. Disputes of this sort are resolved at the highest level of the respective ministries. Sometimes the Politburo has been required to resolve conflicts between the KGB and the Foreign Ministry.

The Central Committee approves all candidates for UN jobs. Once the nominations are made and the KGB has done a background investigation, the credentials are submitted by the Foreign Ministry to the Central Committee's Cadres Abroad Department for further screening. The nomination for UN Under Secretary General, the senior Soviet position in the United Nations, is submitted to the Politburo.

Role of the mission

When a Soviet citizen reports for work at a UN office in New York, Geneva, Vienna, or elsewhere, he has already checked in with his boss in the Soviet mission to the UN organization. The Soviet mission instructs him, supervises his work, evaluates his performance, monitors his loyalty, and reports his activities to Moscow. The Soviet mission is the link between the Soviet citizen and the Communist Party and Soviet Government.

The USSR ambassador to a UN organization is the formal head of the Soviet organization and is responsible for the overall operations of the mission. He reports through diplomatic channels to the Foreign Ministry. The regular diplomatic work of the mission is organized by divisions and sectors that parallel the UN committees and Secretariat offices. The key managers for diplomatic activity are called issue referents. They usually are foreign service officers and handle all the mission activity related to substantive issues, such as disarmament, or to functional specialties, such as personnel. KGB and GRU officers from the mission and Secretariat are also assigned to these sectors for cover purposes and are theoretically required to spend one-third of their time on diplomatic work.

The Communist Party organization constitutes the second major control mechanism. Each Soviet in the UN Secretariat belongs to a party group. The party secretary ensures that all decisions of the Central Committee are brought to the attention of the Soviet community abroad. He also is responsible for assuring that the Soviets in the UN Secretariat use their UN jobs to promote current propaganda and front activities directed by the Central Committee.

The third mechanism for controlling Soviets in the Secretariat is the mission Security Officer, who is a member of the KGB. His job is basically counterintelligence. Assisted by other KGB officers and informants in the various offices, he monitors the activities of all Soviets in the mission and the Secretariat.

The fourth set of links to Soviets in the Secretariat involves the individual's home organization, ministry, state committee, or component. The lines of communication of ministeries, which only occasionally send people to international organizations, are generally weak and informal, but control mechanisms can be extremely strong, as in the case of the KGB.

The KGB has a separate chain of command and communications outside the mission referent system that links directly to Moscow. The standard Soviet practice is to place a KGB officer as the second senior Soviet official in a Secretariat office. He is then in a position to free other KGB and GRU officers under his supervision in the United Nations for their intelligence activities. Individuals are managed by the Resident through the KGB structure. Other Soviets, including their Soviet non-KGB supervisors, have little knowledge of the activities of these officials and exert no authority over them.

KGB use of Soviet Secretariat employees is managed directly by the KGB officers in the Secretariat or from the mission. In the majority of cases, the KGB simply asks the Soviet for information concerning specific intelligence requirements on the political or economic conditions in countries of UN diplomats or third-country Secretariat employees. Sometimes the Soviet is required to initiate contact and report the information. The KGB also directs Soviet Secretariat officials to obtain employment in the United Nations for individuals recruited by the KGB.

Soviets in the Secretariat also use the Secretariat employees from Eastern Bloc countries and client states. Eastern Bloc employees routinely check with Soviet supervisors when they are unsure of the Soviet line and need guidance on how to handle their UN work. When an Eastern Bloc employee is favorably placed to accomplish a Soviet objective, he is given direct instruction from Soviet supervisors in the Secretariat.

Reporting and work for the mission

The divisions and sectors within the mission parcel out their work to the Soviets in the Secretariat. Using Secretariat research and library facilities, the Secretariat employees draft contributions to mission cables. Soviets in supervisory positions in the United Nations use their non-Soviet employees to support their mission-related projects.

The Soviet Secretariat employees form an integral part of Soviet mission operations. On each issue or project, the potential Secretariat contribution is considered at the outset. Soviets in the Secretariat sometimes take the initiative in suggesting strategy and tactics for the use of Secretariat resources and the UN mantle of legitimacy in support of Soviet objectives.

Each Soviet in the Secretariat has reporting requirements beyond the scope of his response to specific KGB requests or his regular input through the mission sector. The Soviets in the United Nations must report every contact with foreigners including work-related meetings and social occasions. To avoid being seen and having to complete a report, the Soviets make a point of not meeting Western friends in the restaurants or coffee shops in UN buildings.

Evaluation

The Soviets in the UN Secretariat are within the personnel evaluation system of the Soviet Government. The mission and local party committee provide the standard personnel evaluation reports on Soviet Secretariat personnel. The KGB and GRU prepare a separate evaluation report to which the Soviet supervisors in the United Nations or the mission make pro forma contributions. The mission's evaluation includes several parts, including a description of the job and an evaluation of performance. The substantive part is provided by the sector or division chief in the mission. The party secretary and KGB security officer in the mission also add comments, and the Soviet supervisors in the Secretariat report on the employee's work in the United Nations.

In addition, each Soviet employee is required to complete an annual report of his activities within the Secretariat. The report contains an estimate of the value of the particular UN slot to the Soviet operation and of the strengths and weaknesses of the organizational setup and provides suggestions for improvements. The senior Soviets report on the overall operations of their offices, or, in the case of the Under Secretary General, on the whole Soviet operation in the UN Secretariat. The analysis of these reports by the Personnel and Finance Sector in the Department of International Organizations in the Foreign Ministry provides the basis for

the long-range plans for allocation of Soviet personnel in the UN Secretariat.

Instructions from Moscow

Soviet Secretariat employees regularly visit the mission to get instruction from their supervisors. As a general rule, the Foreign Ministry instructions to the Soviet mission are sufficient to guide the conduct of Secretariat employees. The Foreign Ministry usually assumes that these instructions will also initiate specific action by Soviets in the Secretariat. Foreign Ministry personnel in the Secretariat occasionally receive specific instructions requiring them to contact particular foreign diplomats with whom they have close relationships to gather information or lobby on a specific issue. The Foreign Ministry and KGB communication systems are used by the International Department of the Central Committee, headed by Boris Ponomarev, to send instructions by special cable to Soviets in the Secretariat concerning UN support for Soviet-controlled front organizations.

Leonid Zamyatin of the Central Committee's International Information Department is concerned with propaganda, and the Cadres Abroad Department manages the party mechanism within the Soviet delegations abroad. Both of these Central Committee offices use the Foreign Ministry and KGB communications systems and sometimes send cables to the exclusive attention of particular Soviets in the UN Secretariat.

The KGB and GRU maintain a communications system separate from Foreign Ministry channels. KGB headquarters instructs the Resident, who deals directly with KGB officers in the UN Secretariat.

APPENDIX B

Soviet interest in UN components

Over the past 20 years, the Soviets have developed a strategic approach to the placement of their personnel within the UN system. Analysis of the functions of UN offices and evidence of Soviet interests by the placement of personnel reveal the following motives and interest in particular UN offices.

The UN Secretariat in New York

The Executive Office of the Secretary General provides staff support to the Secretary General, manages his personal activities, and has direct access to any office in the UN system in the Secretary General's name. This has been a KGB slot since Viktor Lesiovskiy became an assistant to U Thant. Today, Guennadi Yevstaf'iev monitors these activities and has access to all personnel records and applications for UN employment.

The Department of Political and Security Council Affairs is responsible for assisting the Secretary General in his relations with the Security Council and has a broad mandate to deal with political issues. According to Trgyve Lie, in 1946 the Big Five powers agreed that the top post would be held by a Soviet national. The Under Secretary General in charge of that department has always been a Soviet. Under Secretary General Ustinov first served in the United Nations in the late 1950s. The department has 15 Soviets and has been the primary focus of political influence and intelligence operations in the Secretariat in New York.

The Department of Conferences Services contains the largest contingent of Soviets in New York. A high proportion of KGB and GRU officers serve in this department. The Soviet translators are together in one Russian-language section, where the Soviet supervisors can free the KGB officers to do their "other work," as it is called in the United Nations. The Soviets are also interested in the Dag Hammerskjold Library because it provides an opportunity to acquire US technical publications and lets KGB and GRU officers travel throughout the United States to meet people with access to vast collections of technical literature.

The KGB is vitally interested in the Office of Personnel for access to personnel files and applications for UN employment. This gives the Soviets considerable leverage over applicants and provides information on possible character weaknesses and financial difficulties of current employees. The office also maintains information on personnel disputes within the Secretariat and deals with digruntled employees.

The Financial Services Office helps the extremely cost-conscious Soviets to keep UN expenses and contributions under control. The Ministry of Finance puts experts on budget planning and accounting in this office to aid Soviet delegates on the UN budget committee. The KGB is interested in monitoring how the Soviets in the Secretariat spend their money to assure that the USSR gets every penny of hard currency kickback from its UN employees.

Soviet participation in the Department of Legal Affairs is designed to control from within the Secretariat attempts to expand the UN mandate. A Soviet has held the Directorship of the Codification Division since 1965; particular interests are the Law of the Sea negotiations and the review of the Antarctic Treaty. A defector reports that the office also deals with legal questions pertaining to employment regulations and procedures for promotions and has information on private monetary, marital, and employment difficulties of UN employees, which are of interest to the KGB.

The Department of Public Information is a focal point for propaganda and intelligence efforts. Anatoly Mkrtchyan is Director of External Relations Division and handles relations with nongovermental organizations and the program that brings graduate students from all over the world for a UN work-study program. These activities are important to the KGB and the Central Committee for recruitment and for supporting their front organizations. The department as a whole has relatively few Soviets at present but it is a high priority for future Soviet placements because it manages the UN information offices worldwide, maintains contacts with journalists and the media, and publishes much of the UN promotional literature.

Geneva, Vienna, Paris, and Nairobi

Soviet activities in the New York component are only part of the overall effort in the United Nations and its specialized agencies. Since the 1920s the Soviets have been active in technical and scientific organizations. In 1956, when they joined the International Atomic Energy Agency, the Soviets began their concerted effort to provide staff to international organizations with access to Western technology.

Geneva.—The Geneva office of the United Nations is the center for research and discussion of North-South issues and is the site of more than a dozen specialized UN agencies and affiliated bodies in which the Soviets disseminate propaganda and collect technical information.

A Soviet national, Gely Dneprovsky, was particularly successful in placing personnel in the UN Geneva office. In spite of press publicity regarding his alleged KGB connections, Dneprovsky was appointed chief of personnel in 1978. By the end of his tenure in 1983, he had worked effectively behind the scenes to oust Westerners and to put UN personnel functions in Geneva in the hands of the Soviets and their allies. Disregarding UN personnel rules, he gave the largest division—Conference Services—to a Soviet.

Soviet staff members try to discredit Western aid programs, promote Soviet ideological doctrine on economic issues, and present the Soviet domestic economy in a favorable light, while protecting the USSR from Third World criticism and demands for aid. This has been accomplished through prepublication censorship of offical UN documents, alteration of statistics, and pressure on Western or Third World UN employees to follow the Soviet line. The Soviets also take advantage of the vast array of technical information in the technical libraries of the United Nations and its specialized agencies. Soviet employees routinely photocopy documents on behalf of the Soviet Mission.

Vienna.—The Soviet union and the Western nations have shared a mutual interest in nonproliferation issues. International Atomic Energy Agency participation gives the Soviets a chance to monitor some aspects of nuclear programs in the West and developing countries as well as to try to acquire Western technology. The Soviets have high-level posts staffed by people technically and politically qualified to exploit the information available in the institution.

The Soviets use the UN Industrial Development Organization (UNIDO) not only to acquire technology through participation in the work of the organization but also to try to circumvent US and COCOM controls on technology transfer to the Soviet Union. The Soviets attempt to get UNIDO to sponsor development projects in client states that use advanced computers and industrial processes. The purchase of the equipment through UNIDO and shipment to Eastern Europe allow the Soviets to obtain US technology and get the United Nations to pay for it.

Paris.—Moscow has effectively and consistently exploited UNESCO programs in education, science, and communications. UNESCO is tailor-made for Soviet initiatives designed to influence media content, particularly in the Third World, to establish contact with influential persons in UNESCO-interested fields, and to gain specific technical information. The Soviets have developed contacts with Secretariat officials responsible for publication and broadcasting and have targeted UNESCO information services as a vehicle for disseminating Soviet propaganda.

The senior Soviet in the Secretariat, Assistant Director General Sema Tanguiane, is a tough bureaucrat in his third tour in UNESCO. Tanguiane has great influence over the employment process in the Education Sector and approves lists of individuals invited by UNESCO to represent nongovernmental organizations at all UNESCO meetings.

Nairobi.—The UN office provides staff for the UN Environment Program and the UN Center for Human Settlements. The Soviets have the largest delegations to the UN institutions, and their presence contains a high proportion of KGB officers. The Soviets take frequent trips to other African countries.

The senior Soviet in the UN Center for Human Settlements, Sergei Stepanov, sees his real job as initiating and developing UN

projects for "like-minded socialist countries."

By Mr. DODD (for himself, Mr. D'AMATO, and Mr. RIEGLE);

S. 1775. A bill to authorize a multifamily housing preservation loan program; to the Committee on Banking, Housing, and Urban Affairs.

MULTIFAMILY HOUSING PRESERVATION LOAN ACT

● Mr. DODD. Mr. President, I am introducing today along with my distinguished colleagues, the Senator from New York [Mr. D'AMATO] and the Senator from Michigan [Mr. RIEGLE] legislation to authorize capital improvement loans for the preservation of subsidized multifamily housing. Identical legislation has been introduced in the House of Representatives by Congressman BARNEY FRANK of Massachusetts. This bill will provide reduced interest loans to owners of certain subsidized housing projects in return for a commitment to extend the low- and moderate-income character of this housing.

We are all well aware of the dwindling resources available for housing programs. With the reduced HUD budget in recent years, there has been a commensurate decline in new subsidized units. The future for new units looks equally disturbing. It is therefore imperative for us to examine ways in which we might preserve the existing stock of subsidized housing. The safe and sanitary conditions of these units must be maintained if they are to serve their purpose as decent living environments for low- and moderate-income families and senior citizens.

The bulk of the units eligible under this proposal were built in the late 1960's or early 1970's. Real estate management experts tell us that after 15 years a building begins to need major capital improvements. Industry data shows that after 15 years, almost every building needs heating/air-conditioning, plumbing/electrical, or roofing capital improvements.

This bill is designed to utilize existing HUD resources to their fullest potential. If we cannot plan major increases in new subsidized housing units, we must seek ways to maximize the lifetime of such existing housing for the intended beneficiaries. Any funds appropriated under this bill will be used for loans, not outright grants. The repayment of these loans will replenish the fund set up by this bill, making it self-sustaining and requiring only monitoring and administration by HUD.

Along with the capital improvement needs, this legislation touches a second, equally important concern. These buildings were originally mortgaged with an agreement from the owners to maintain the low- and moderate-income character of the units for a period of 20 years. As that deadline approaches and owners are in need of funds for capital improvements, we have an excellent opportunity through this bill to provide them with an incentive to retain the low- and moderate-income character of these units. Without such a carrot in the form of a reduced interest rate partial Federal loan, there is a very real possibility that many units will be lost to the subsidized housing inventory. Our efforts to provide decent housing for low- and moderate-income families and senior citizens would then be undone. I do not think I or any of my colleagues wish to face such a prospect.

This bill is a way of staving off a disastrous end to America's subsidized multifamily housing programs. It need not make any increase in our budget. It is a responsible attempt to put HUD's existing subsidized housing programs in better order.

I ask unanimous consent that the text of the Multifamily Housing Preservation Act be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1775

Be it enacted by the Senate and House of Representatives of the United State of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Multifamily Housing Preservation Loan Act".

SEC. 2. PURPOSE.

The purpose of this Act is to provide loans to the owners of certain multifamily housing projects assisted by the Secretary of Housing and Urban Development to permit such owners to make capital improvements required to maintain such projects as decent, safe, and sanitary housing and to maintain the low- and moderate-income character of such projects.

SEC. 3. DEFINITIONS.

For purposes of this Act:

(1) The term "capital improvement" means any major repair or replacement of a capital item in a multifamily housing project, including any such repair or replacement required as a result of deferred or inadequate maintenance. Such term does not include maintenance of any such item.

(2) The term "Fund" means the Multifamily Housing Preservation Fund established in section 7.

(3) The term "lower income families" has the meaning given such term in section 3(b)(2) of the United States Housing Act of 1937.

(4) The term "low- and moderate-income character" means the character of a multifamily housing project with respect to tenant admission and rental charges that have been agreed to by the owner of such project and the Secretary in connection with assistance or insurance provided by the Secretary.

(5) The term "Secretary" means the Secretary of Housing and Urban Development.

SEC. 4. AUTHORITY TO PROVIDE LOANS.

(2) IN GENERAL.—The Secretary may provide and, to the extent approved in appropriation Acts, contract to provide loans to owners of rental or cooperative housing projects meeting the requirements of this Act for purposes of assisting such owners to make capital improvements required to maintain such projects as decent, safe, and sanitary housing and to maintain the low- and moderate-income character of such projects.

(b) APPLICATIONS.—Applications for loans under this Act shall be made in such form, and in accordance with such procedures, as the Secretary may prescribe.

SEC. 5. ELIGIBILITY FOR LOANS.

(a) PROJECT REQUIREMENTS.—The owner of any rental or cooperative housing project shall be eligible for a loan under this Act only if such project—

(1)(A) is assisted under section 236 of the National Housing Act, the proviso of section 221(d)(5) of the National Housing Act, or section 101 of the Housing and Urban Development Act of 1965, without regard to whether such project is insured under the National Housing Act;

(B) is assisted under section 8 of the United States Housing Act of 1937 following conversion to such assistance from assistance under section 236(f)(2) of the National Housing Act or section 101 of the Housing and Urban Development Act of 1965;

(C) is assisted under section 23 of the United States Housing Act of 1937, as in effect before January 1, 1975; or

(D) was a project described in subparagraph (A) before the acquisition of such project by the Secretary, and has been sold by the Secretary subject to an agreement that provides that the low- and moderate-income character of such project will be maintained; and

(2) meets such other requirements consistent with the purposes of this Act as the Secretary may prescribe.

(b) Loan and Borrower Requirements.—No loan may be provided under this Act to the owner of any rental or cooperative housing project unless the Secretary determines that—

(1) such loan, when considered with other resources available to and financially feasible for such project, is necessary for such owner to make capital improvements with respect to capital items that have failed, or are likely to seriously deteriorate or fail in the near future, in such project;

(2) the owner of such project agrees to contribute assistance to such project in such amounts, from such sources, and in such manner as the Secretary determines to be appropriate, except that—

(A) such contribution shall not be less than 20 percent of the total estimated cost of the capital improvements involved, unless the Secretary upon application of the owner, determines that such contribution is financially infeasible and waives or reduces such contribution to the extent necessary;

(B) the Secretary may not require an amount to be contributed, from the reserve funds established by the owner of such project for the purpose of making capital improvements, in excess of 50 percent of the amount of such reserve funds on the date of such loan; and

(C) the Secretary shall waive the requirements of this paragraph if such owner is a private nonprofit corporation or association;

(3) the owner of such project agrees to maintain the low- and moderate-income character of such project for a period of not less than the remaining term of the project mortgage;

(4) the management of such project is conducted by persons who meet levels of competency and experience prescribed by

the Secretary and are approved by the Secretary;

(5) such project is structurally sound, or will be made structurally sound as a result of the capital improvements involved, as determined on the basis of information obtained as a result of an onsite inspection of such project;

(6) such loan, when considered with other resources available to and financially feasible for such project, will maintain the financial soundness of such project;

(7) such project is operated and managed in accordance with a management improvement and operating plan that has been determined to be necessary and approved by the Secretary and that includes the following:

(A) a detailed maintenance schedule;

(B) a schedule for correcting past deficiencies in maintenance, repairs, and replacements;

(C) a plan to upgrade the capital items being improved, and any other capital items determined by the Secretary to be associated with such capital items being improved and to require upgrading, to meet cost-effective energy efficiency standards prescribed by the Secretary;

(D) a plan to improve or maintain financial and management control systems;

(E) a detailed annual operating budget taking into account such standards for operating costs in the area as may be determined by the Secretary to be appropriated; and

(F) such other items as the Secretary may determine to be appropriate;

(8) the reserve funds established by the owner of such project for the purpose of making capital improvements are insufficient to finance both the capital improvements for which such loan is requested and other capital improvements that are reasonably expected to be required in the near future, and such insufficiency is not the result of the failure of such owner to comply with any standard established by the Secretary for management of such reserve funds; and

(9) such loan will be less costly to the Federal Government than other reasonable alternatives available to the Secretary for maintaining the low- and moderate-income character of such project.

(c) PRIORITIES IN PROVIDING LOANS.—In providing, and contracting to provide, loans under this Act, the Secretary shall give priority to—

(1) the extent to which the capital improvements for which such loans are requested are immediately required;

(2) the extent to which the projects for which such loans are requested serve as the residences of lower income families, and the extent to which other suitable housing is unavailable for such families in the areas in which such projects are located;

(3) the extent to which the capital improvements for which such loans are requested involve the life, safety, or health of the residents of the projects or involve major capital improvements in the projects; and

(4) projects that demonstrate the greatest financial distress, while continuing to meet the requirements of subsection (b)(6).

SEC. 6. AMOUNT AND CONDITIONS OF LOANS.

(a) PRINCIPAL AMOUNT OF LOANS.—Subject to section 5(b)(2), the principal amount of any loan provided under this Act to the owner of any project shall not exceed 80 percent of the sum of—

(1) the amount determined by the Secretary to be necessary for such owner to make capital improvements with respect to capital items that have failed, or are likely to seriously deteriorate or fail in the near future, in such project;

(2) the amount determined by the Secretary to be necessary to carry out a plan to upgrade the capital items being improved, and any other capital items determined by the Secretary to be associated with such capital items being improved and to require upgrading, to meet cost-effective energy efficiency standards prescribed by the Secretary; and

(3) the amount determined by the Secretary to be necessary to comply with the requirements of section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794).

(b) CONDITIONS OF LOANS.—

(1) The term of any loan provided under this Act shall not exceed the remaining term of the mortgage on the project with respect to which such loan is provided, except that such term may be extended beyond the remaining term of the mortgage under such terms and conditions as the Secretary may prescribe.

(2) Subject to subsection (c), each loan provided under the Act shall bear interest at a rate determined by the Secretary to be appropriate, except that such rate shall not be less than 6 percent or more than the rate determined under section 221(d)(5)(B) of the National Housing Act.

(3) Each loan provided under this Act shall be considered to be a liability of the project involved, and shall not be dischargeable in any bankruptcy proceeding under sections 727, 1141, or 1328(b) of title 11, United States Code.

(4) The Secretary may establish such additional conditions on loans provided under this Act as the Secretary determines to be appropriate.

(5) The Secretary may provide more than one loan to any project under this Act, if each such loan complies with the provisions of this Act.

(c) MINIMIZATION OF RENT INCREASES.—In order to minimize any increases in rental payments that may occur as a result of the debt service and other expenses of a loan provided under this Act, and that would be incurred by residents of the project involved whose rental payments are, or would as a result of such expenses be, in excess of the amount allowable if section 3(a) of the United States Housing Act of 1937 were applicable to such residents, the Secretary may take any or all of the following actions:

(1) Provide assistance with respect to such project under section 8(b)(1) of the United States Housing Act of 1937, to the extent amounts are available for such assistance and without regard to section 16 of such Act.

(2) Reduce the rate of interest charged on such loan to a rate of not less than 1 percent.

(3) Increase the term of such loan to a term that does not exceed the remaining term of the mortgage on such project, except that such term may be extended beyond the remaining term of the mortgage under such terms and conditions as the Secretary may prescribe.

(4) Increase the amount of assistance to be provided by the owner of such project under section 5(b)(2), if applicable, to an amount not to exceed 30 percent of the total estimated cost of the capital improvements involved.

SEC. 7. MULTIFAMILY HOUSING PRESERVATION FUND.

(a) ESTABLISHMENT OF FUND.—For purposes of carrying out the provisions of this Act, there hereby is established in the Treasury of the United States a revolving fund, to be known as the Multifamily Housing Preservation Fund. The Fund shall, to the extent approved in appropriation Acts, be available to the Secretary for purposes of carrying out the provisions of this Act.

(b) ASSETS OF FUND.—The Fund shall consist of (1) any amount appropriated under section 9; (2) any amount repaid on a loan provided under this Act; and (3) any other amount received by the Secretary under this Act.

(c) MANAGEMENT FUND. Any amounts in the fund determined by the Secretary to be in excess of the amounts currently required to carry out the provisions of this Act shall be invested by the Secretary in obligations of, or obligations guaranteed as to both principal and interest by, the United States or any agency of the United States.

SEC. 8. REGULATIONS.

The Secretary shall, not later than the expiration of the 180-day period following the date of enactment of this Act, issue such regulations as may be necessary to carry out the provisions of this Act.

SEC. 9. AUTHORIZATION OF APPROPRIATIONS.

There is authorized to be appropriated to carry out the provisions of this Act such sums as may be necessary for fiscal years 1986 and 1987. Any amount appropriated under this section shall be deposited in the Fund and shall remain available until expended.●

● Mr. D'AMATO. Mr. President, I rise today to join my distinguished colleague from Connecticut, Senator DODD, in introducing the Multifamily Housing Preservation Loan Act. This bill authorizes the Multifamily Housing Preservation Loan Program so that the U.S. Department of Housing and Urban Development [HUD] can provide direct loans to owners of certain HUD-assisted multifamily housing projects to permit them to make badly needed capital improvements.

Target projects include those built under several HUD programs, mostly in the late 1960's and early 1970's. Nationwide, there are approximately 700,000 eligible subsidized units. Owners of these projects often do not have sufficient disposable income to qualify for commercial loans, nor are other forms of financing available from HUD. Most of this stock is approaching the age at which capital improvements are now, or will shortly be, necessary. HUD's industry survey estimates a capital repair need between $800 and $3,000 per unit, but replacement reserves for these projects are inadequate, only 14 percent of the necessary amount remains in the average project.

Most of these projects have regulatory agreements providing, in essence, that the lower income use of the housing can be changed at any time after its 20th anniversary by prepaying the HUD-subsidized mortgage. This bill will offer project owners the opportu-

nity to maintain the project's physical integrity via a below-market-rate loan in exchange for an agreement to extend the lower income use of the property through the full life of the underlying mortgage. Thus this bill is an effective method to address the twin preservation concerns of both physical condition and tenant characteristics of these projects.

The program provides that the loans shall bear interest at a rate of at least 6 percent. Loan repayments would be directed to a revolving fund, hopefully providing self-sufficiency for the program in years ahead.

The term "capital improvements," as provided in the bill, is designed to make sense in the business community. For example, those items of repair/replacement which would normally and properly be charged as a capital item are included.

The loan/borrower eligibility includes several points I would like to emphasize. First, the loan must be necessary; in times of fiscal restraint, the Secretary must be careful to determine that items have failed, will fail, or will seriously deteriorate in the near future. Therefore, common sense business-like decisions should prevail and priorities are provided to the Secretary.

Second, except for nonprofit owners, the owner's contribution is expected to be not less than 20 percent of the cost of capital improvements. In the event that the Secretary makes certain determinations about financial feasibility with respect to that contribution, the Secretary may waive or reduce this requirement. I expect that this waiver will not be a common occurrence, but I believe that some limited flexibility is needed to deal with changing environments or unusual situations. The contribution requirement is waived for nonprofit owners, although such owners are by no means precluded from making contributions.

This bill provides priority to projects having the greatest financial distress, while continuing to meet the bill's other requirements of being financially sound.

The Secretary is directed to add the cost of three necessary items in computing overall amounts of loans: Capital improvements, improvements necessary to meet cost-effective energy standards, and improvements necessary to comply with section 504 of the Rehabilitation Act of 1973.

Mr. President, I am sensitive to concerns about minimizing the rental impact on tenants of loan carrying charges so as not to cause displacement of existing residents. Therefore, the Secretary has several mechanisms to deal with this matter. These include the ability to reduce the rate of interest and to increase the term of a loan. If necessary, I would expect the Secretary to defer payment of interest and principal for up to 10 years.

This legislation is needed because bank loans for these projects are rarely available and project replacement services are inadequate. In short, there is no assistance to fund major preventive repair measures.

Of the 700,000 units nationwide, approximately 100,000 are in the State of New York. These units simply do not have adequate reserves or other sources of funds to make immediate repair or replacement of major systems. In light of funding restraints for new housing stock, it is vital to have this necessary assistance if we are to continue to preserve critical housing stock.

Mr. President, I would like to reiterate that this is not a grant program, but a loan program. Funds under this program will be used only for loans. Therefore, the payback of this program may make it self-sustaining. I trust that my colleagues will join us and support this very important and highly needed program that will allow us to preserve our existing investment in subsidized housing.●

ADDITIONAL COSPONSORS

S. 402

At the request of Mr. PRESSLER, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of S. 402, a bill to amend the Communications Act of 1934 to provide for specialized equipment for telephone service to certain disabled persons.

S. 452

At the request of Mr. BRADLEY, the names of the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from Illinois [Mr. SIMON] were added as cosponsors of S. 452, a bill to enact the Gifted and Talented Children's Education Act.

S. 558

At the request of Mr. MOYNIHAN, the name of the Senator from Indiana [Mr. LUGAR] was added as a cosponsor of S. 558, a bill to amend the Internal Revenue Code of 1954 to permanently exclude educational assistance programs from gross income, and for other purposes.

S. 1181

At the request of Mr. HATCH, the names of the Senator from Connecticut [Mr. WEICKER], the Senator from Wyoming [Mr. WALLOP], the Senator from Iowa [Mr. GRASSLEY], the Senator from Ohio [Mr. METZENBAUM], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Illinois [Mr. SIMON], and the Senator from Rhode Island [Mr. PELL] were added as cosponsors of S. 1181, a bill to establish a program for the provision of home and community based services to elderly individuals.

S. 1209

At the request of Mr. CHILES, the name of the Senator from Arkansas [Mr. PRYOR] was added as a cosponsor of S. 1209, a bill to establish the National Commission to Prevent Infant Mortality

S. 1288

At the request of Mr. DANFORTH, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 1288, a bill to amend the Tariff Schedules of the United States regarding the classification of television apparatus and parts thereof.

S. 1305

At the request of Mr. TRIBLE, the name of the Senator from South Dakota [Mr. ABDNOR] was added as a cosponsor of S. 1305, a bill to amend title 18, United States Code, to establish criminal penalties for the transmission by computer of obscene matter, or by computer or other means, of matter pertaining to the sexual exploitation of children, and for other purposes.

S. 1470

At the request of Mr. HUMPHREY, the name of the Senator from Colorado [Mr. ARMSTRONG] was added as a cosponsor of S. 1470, a bill to require the Secretary of Health and Human Services to establish the National Adoption Information Clearinghouse.

S. 1540

At the request of Mr. DODD, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of S. 1540, a bill providing a statutory basis for a budget that requires that any increases in outlays be financed by an equivalent increase in revenues, and for other purposes.

S. 1680

At the request of Mr. QUAYLE, the name of the Senator from Indiana [Mr. LUGAR] was added as a cosponsor of S. 1680, a bill to phase out the honey price support program.

S. 1710

At the request of Mr. HOLLINGS, the name of the Senator from Arkansas [Mr. PRYOR] was added as a cosponsor of S. 1710, a bill to establish a motor carrier administration in the Department of Transportation, and for other purposes.

SENATE JOINT RESOLUTION 193

At the request of Mr. SYMMS, the name of the Senator from Georgia [Mr. NUNN] was added as a cosponsor of Senate Joint Resolution 193, a joint resolution to authorize the President to issue a proclamation designating the week beginning October 20, 1985, as "The Lessons of Grenada Week."

SENATE JOINT RESOLUTION 199

At the request of Mr. MURKOWSKI, the name of the Senator from Kansas [Mr. DOLE] was added as a cosponsor of Senate Joint Resolution 199, a joint

resolution to designate the month of November 1985 as "National Elks Veterans Remembrance Month."

SENATE JOINT RESOLUTION 202

At the request of Mr. HATCH, the names of the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Michigan [Mr. LEVIN], and the Senator from Connecticut [Mr. WEICKER] were added as cosponsors of Senate Joint Resolution 202, a joint resolution designating November 1985 as "American Liver Foundation National Liver Awareness Month."

SENATE JOINT RESOLUTION 209

At the request of Mr. D'AMATO, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of Senate Joint Resolution 209, a joint resolution to designate the period from October 28, 1985, through October 28, 1986, as the Centennial Year of Liberty in the United States.

SENATE CONCURRENT RESOLUTION 58

At the request of Mr. PROXMIRE, the names of the Senator from Ohio [Mr. GLENN], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Oklahoma [Mr. NICKLES], the Senator from Tennessee [Mr. SASSER], the Senator from North Dakota [Mr. ANDREWS] and the Senator from Louisiana [Mr. JOHNSTON] were added as cosponsors of Senate Concurrent Resolution 58, a concurrent resolution expressing the sense of the Congress that Medicare patients are entitled to accurate and timely information regarding their Medicare benefits.

SENATE CONCURRENT RESOLUTION 59

At the request of Mr. TRIBLE, the names of the Senator from North Dakota [Mr. BURDICK], and the Senator from Arizona [Mr. DECONCINI] were added as cosponsors of Senate Concurrent Resolution 59, a concurrent resolution expressing the sense of the Congress that food producers who permit gleaning of their fields and nonprofit organizations which glean fields and distribute the resulting harvest to help alleviate hunger should be commended for their efforts, and for other purposes.

SENATE CONCURRENT RESOLUTION 78

At the request of Mr. BRADLEY, the names of the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Vermont [Mr. LEAHY], and the Senator from Washington [Mr. GORTON] were added as cosponsors of Senate Concurrent Resolution 78, a concurrent resolution in support of universal access to immunization by 1990 and accelerated efforts to eradicate childhood diseases.

SENATE RESOLUTION 240—AUTHORIZING INTERVENTION BY THE SENATE LEGAL COUNSEL

Mr. DOLE (for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to:

S. RES. 240

Whereas, in the case of *In the Matter of Louis R. Koerner, Jr.*, pending in the United States Court of Appeals for the Fifth Circuit, the constitutionality of sections 106 and 121 of the Bankruptcy Amendments and Federal Judgeship Act of 1984, Public Law No. 98-353, has been placed in issue;

Whereas, the Department of Justice, on behalf of the executive branch, has moved to intervene in the case to assert that those sections of the Act which provided for the limited extension of the terms of bankruptcy judges appointed prior to its enactment violate the Appointments Clause, Article II, Section 2, Clause 2 of the Constitution;

Whereas, pursuant to sections 703(c), 706(a), and 713(a) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(c), 288e(a), and 288l(a) (1982), the Senate may direct its Counsel to intervene in the name of the Senate in any legal action in which the powers and responsibilities of Congress under the Constitution are placed in issue: Now, therefore be it

Resolved, That the Senate Legal Counsel is directed to intervene in the name of the Senate in the case of *In the Matter of Louis R. Koerner, Jr.*

AMENDMENTS SUBMITTED

HOUSING AND URBAN DEVELOPMENT AND INDEPENDENT AGENCIES APPROPRIATIONS ACT, 1986

MURKOWSKI (AND OTHERS) AMENDMENT NO. 808

Mr. MURKOWSKI (for himself, Mr. CRANSTON, Mr. DECONCINI, Mr. DENTON, Mr. BYRD, Mr. THURMOND, and Mr. ABDNOR) proposed an amendment to the bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes; as follows:

At the end of the bill, add the following section:

SEC. . Notwithstanding any other provision of this Act (including any provision reducing certain dollar amounts by a specified percentage), the appropriation made by this Act for the Veterans' Administration for "Medical care" shall be $9,228,694,000.

BIDEN AMENDMENT NO. 809

Mr. BIDEN proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 2, line 25 before the semicolon, insert the following: ", except that $50,000,000 of such funds shall be available only for purposes of assisting public housing agencies in reducing the hazards of lead-based paint in public housing in accordance with the lead-based paint poisoning prevention procedures established by the Secretary under section 302 of the Lead-Based Paint Poisoning Prevention Act".

BIDEN (AND OTHERS) AMENDMENT NO. 810

Mr. BIDEN (for himself, Mr. ROTH, Mr. CRANSTON, Mr. LAUTENBERG, and Mr. BRADLEY) proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 54, between lines 12 and 13, insert the following: "Notwithstanding any other provision of the law, none of the funds appropriated in this Act or any previous Acts shall be used to issue any permit not intended for limited-duration research purposes for the ocean incineration of hazardous wastes, unless the Administrator of the Environmental Protection Agency prepares an environmental impact statement (as described in clause (i) et seq. of section 102(2)(C) of the National Environmental Policy Act of 1969) with respect to the loading, transportation, and incineration of such wastes which will be involved under the terms of the permit.".

DOMENICI (AND OTHERS) AMENDMENT NO. 811

Mr. GARN (for Mr. DOMENICI, for himself, Mr. CHILES, and Mr. THURMOND) proposed an amendment, which was subsequently modified, to the bill H.R. 3038, supra; as follows:

Beginning on page 54, line 12, strike all through the end of the bill and insert the following: "than 2.1 per centum.

"SEC. 417. Except as otherwise provided in this section, each dollar amount contained in this Act, as amended, which is provided for non-defense discretionary programs and activities is hereby reduced 1.1 per centum provided that this section shall not apply to the amount on page 2, line 16;

"Provided further, that, notwithstanding the provisions of 31 U.S.C. 6701-6724, payments to local governments are hereby reduced by 7.2 per centum; provided further, that, notwithstanding the provisions of 31 U.S.C. 6701-6724, in the fiscal year ending September 30, 1986, persons charged with administration of any provision of 31 U.S.C. 6701-6724, shall limit the value of any payments conferred by 31 U.S.C. 6701-6724 to amounts not in excess of the amount provided in this annual appropriation act, as amended by this section, and if the requirements of 31 U.S.C. 6701-6724 exceed the amount so provided, the payments shall be reduced to the extent necessary to stay within the amount provided in this annual appropriation act, as amended by this section."

"Notwithstanding the provisions of title I and II of this Act, the following accounts are reduced in budget authority by the following amounts. Management and Administration (HUD) $10,000,000; Salaries and Expenses (EPA) $10,000,000; Salaries and Expenses (FEMA) $10,000,000; Research and Program Management (NASA) $15,000,000; Medical Administration and Miscellaneous operating expenses (VA) $3,000,000; and General Operating Expenses (VA) $15,000,000.

SEC. 417. Any funds previously appropriated for the purposes of construction grants under title II of the Clean Water Act shall be available for all projects for which such funding was initially available when such appropriations were made and not be limited to phases or segments of previously funded projects.

TITLE V—SHELTER PROGRAM: GENERAL PROVISIONS

SHORT TITLE

SEC. 501. The following titles may be cited as the "Homeless Housing Assistance Act of 1985".

DEFINITIONS

SEC. 502. For the purpose of this Act—

(1) the term "emergency shelter", as used in section 608(b) of this Act, means an entire facility, or that part of a facility, which is used or designed to be used to provide temporary housing to not fewer than twenty individuals;

(2) the term "homeless" means individuals who are poor and who have no access to either traditional or permanent housing;

(3) the term "local government" means a unit of general purpose local government;

(4) the term "locally" means the geographical area within the jurisdiction of a local government;

(5) the term "operating costs" means expenses incurred by State, local governments, and private nonprofit organizations operating transitional housing for the homeless under title VII of this Act with respect to—

(A) the administration, maintenance, minor repairs, and security of such housing;

(B) utilities, fuel, furnishings, and equipment for such housing;

(C) the conducting of the assessment required in section 705(a)(2) of this Act; and

(D) the provision of supportive services to the residents of such housing;

(6) the term "private nonprofit organization" means a secular or religious organization described in section 501(c) of the Internal Revenue Code of 1954 which is exempt from taxation under subtitle A of such Code, and which has an accounting system and a voluntary board, and practices nondiscrimination in the provision of assistance;

(7) the term "Secretary" means the Secretary of Housing and Urban Development;

(8) the term "shelter", as used in title II of this Act, means broadly the provision of protection from the elements for homeless individuals;

(9) the term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, or any territory or possession of the United States;

(10) the term "supportive services" means assistance to the residents of transitional housing in obtaining permanent housing, medical and psychological counseling and supervision, employment counseling, refer ral to job training, nutritional counseling, and such other services essential for establishing independent living as the Secretary determines to be appropriate. Such term includes the provision of assistance to the residents of transitional housing in obtaining other Federal, State, and local government assistance available for such persons, including mental health benefits, employment counseling, referral to job training programs, and medical assistance; and

(11) the term "transitional housing" means a single- or multi-family structure suitable for the provision of housing and supportive services for not more than 15 homeless persons, who cannot presently live independently without supportive services in a supervised residential setting but who are believed capable of transition to independent living with 6 months of assistance in a stable environment.

TITLE VI—EMERGENCY FOOD AND SHELTER PROGRAM

EMERGENCY FOOD AND SHELTER PROGRAM NATIONAL BOARD

SEC. 601. (a) The Director of the Federal Emergency Management Agency shall, as soon as practicable after September 30, 1985, constitute a national board for the purpose of carrying out an emergency food and shelter program.

(b) The national board shall consist of seven members. The United Way of America, the Salvation Army, the National Council of Churches of Christ in the United States of America, the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., the American Red Cross, and the Federal Emergency Management Agency shall each designate a representative to sit on the national board.

(c) The representative of the Federal Emergency Management Agency shall chair the national board.

NATIONAL BOARD TRANSITION

SEC. 602. (a) The national board constituted by the Director of the Federal Emergency Management Agency, pursuant to section 601, shall continue to be authorized until March 30, 1986, and on such date, the personnel, property, records, and undistributed program funds of such national board shall be transferred to the national board under subsection (b).

(b) On or before March 30, 1986, the Secretary of Housing and Urban Development shall constitute a national board for the purpose of carrying out an emergency food and shelter program. This national board shall consist of the same representatives, or their successors, of the same organizations as the national board constituted pursuant to section 601(b), except that the Secretary of Housing and Urban Development shall designate a representative to replace the Federal Emergency Management Agency representative. Such national board shall assume authority on March 10, 1986.

(c) The representative designated by the Secretary of Housing and Urban Development shall chair the national board constituted pursuant to subsection (b).

DISTRIBUTION OF PROGRAM FUNDS

SEC. 603. The national boards constituted pursuant to sections 601 and 602(b) shall determine how program funds are to be distributed to individual localities. The national boards shall identify localities having the highest need for emergency food and shelter assistance, based on unemployment and poverty rates and such other need-related data as the national boards deem appropriate, determine the amount and distribution of funds to these localities, and ensure that funds are properly accounted for.

AGENCY RESPONSIBILITIES

SEC. 604. (a) The Director of the Federal Emergency Management Agency shall award a grant for such amount as Congress appropriates for this program to the national board constituted pursuant to section 601 within 30 days after the beginning of fiscal year 1986, for the purpose of providing emergency food and shelter to needy individuals through private nonprofit organizations and through units of local government.

(b) The Director of the Federal Emergency Management Agency, or his representative, shall have the following responsibilities: provision of guidance, coordination, and staff assistance to the national board in carrying out the program; and cooperation and coordination with the Secretary of Housing and Urban Development in the conducting of an audit of program funds awarded to the national board constituted pursuant to section 601 or transferred to the national board constituted pursuant to section 602(b). The responsibilities of the Director of the Federal Emergency Management Agency with respect to this program shall end with the completion of the audit for program funds distributed during fiscal year 1986.

(c) The Secretary of Housing and Urban Development shall award a grant for such amount as Congress appropriates for this program to the national board constituted pursuant to section 602(b) within 30 days after the beginning of fiscal years 1987 and 1988, for the purpose of providing emergency food and shelter to needy individuals through private nonprofit organizations and through units of local government.

(d) The Secretary of Housing and Urban Development shall have the following responsibilities: provision of guidance, coordination, and staff assistance to the national board in carrying out the program; and the conducting of an audit of program funds awarded to and transferred to the national boards constituted pursuant to sections 601 and 602(b).

(e)(1) In carrying out the responsibilities under subsection (d), the Secretary shall coordinate activities with the Federal Interagency Task Force on Food and Shelter, chaired by the Secretary of Health and Human Services, to identify vacant and surplus Federal facilities which could be renovated or converted for use as emergency shelter facilities for the homeless.

(2) Not later than 3 months after the end of fiscal year 1986, the Secretary shall submit to the Congress a report on obstacles, if any, including agency rules or procedures, to the availability of vacant and surplus Federal facilities for renovation or conversion to use as emergency shelter facilities for the homeless, with recommendations for legislative or administrative changes to overcome such obstacles.

LOCAL BOARDS

SEC. 605. (a) Each locality designated by the national boards constituted pursuant to sections 601 and 602(b) shall constitute a local board for the purpose of determining how program funds allotted to the locality will be distributed. The local board shall consist, to the extent practicable, of representatives of the same organizations as the national boards, except that the mayor or other appropriate heads of government will replace the Federal Emergency Management Agency or Department of Housing and Urban Development member. The chair of the local board shall be elected by a majority of the members of the local board. Local boards are encouraged to expand participation of other private nonprofit organizations on the local board.

(b) Local boards shall have the following responsibilities: determining which private nonprofit organizations or public organizations of the local government in the individual locality shall receive grants to act as service providers; monitoring recipient service providers for program compliance; reallocation of funds among service providers; ensuring proper reporting; and coordinating with other Federal, State, and local government assistance programs available in the locality.

(c) Prior to March 30, 1986, local boards constituted pursuant to subsection (a) shall

be accountable to the national board constituted pursuant to section 601. On and after March 30, 1986, local boards constituted pursuant to subsection (a) shall be accountable to the national board consituted pursuant to section 602(b).

LOCAL HOMELESS ASSISTANCE PLAN

SEC. 606. (a) At the end of each fiscal year, each local board shall submit to the national board constituted pursuant to section 602(b), a plan describing programs, goals, and objectives for providing assistance to the homeless in that locality. The plan shall be developed in cooperation with the local government head represented on the local board.

(b) The local plan shall address the following subjects: description of existing shelter, mass feeding, and food bank activities in that locality, including activities not receiving assistance under this title; use and availability of all public and private resources in the locality to assist the homeless; coordination of all public and private services and resources in that locality to assist the homeless; coordination among all shelter providers in the locality to use all available shelter space for the homeless; and preservation of low-income housing in the locality.

(c) the local plan shall be placed on file in the office of the local government head represented on the local board and shall be made available to the public. The local plan shall be forwarded to that individual locality's representatives in Congress. The national board shall maintain files of local plans and make them available upon request to other localities.

(d) The preparation and submission of the local plan shall be regarded as the legal duty of the local board, but failure to do so shall not be grounds for the withholding of funds appropriated under this title from that locality. Any citizen residing in the locality in which such local board is constituted shall have standing in the Federal district court of jurisdiction to seek an order compelling the preparation and submission of the local plan as required by this section. The substance and contents of the local plan shall be within the sole discretion of the local board and shall not be subject to administrative or judicial review.

SERVICE PROVIDERS

SEC. 607. Designation by the local board of a service provider to receive program funds should be based upon a private nonprofit organization's or unit of local government's ability to deliver emergency food and shelter to needy individuals and such other factors as are deemed appropriate to program objectives by the local board.

USE OF FUNDS

SEC. 608. (a) The national boards constituted by sections 601 and 602(b) may authorize the following use of funds to address the emergency food and shelter needs of needy individuals:

(1) Expenditures necessary to purchase emergency food and shelter for needy individuals, to supplement and extend currently available resources and not to substitute or reimburse ongoing programs and services; and

(2) Expenditures necessary to conduct minimum rehabilitation of existing mass shelter or mass feeding facilities to make facilities safe, sanitary, and bring them into compliance with local building codes.

(b)(1) Local boards are authorized to expend up to 25 percent of the funds allotted to that locality for substantial renovation or conversion, but not acquisition or new construction, of buildings for use as emergency shelter facilities to provide additional shelter space. Such expenditures shall be made in the form of noninterest bearing advances, repayment of which shall be waived if—

(A) the applicant utilizes the building as an emergency shelter facility for not less than the 10-year period following the completion of such renovation or conversion, or

(B) the Secretary determines that such facility is no longer needed to provide shelter to the homeless and approves use of the building for another charitable purpose for the remainder of such 10-year period. If the recipient of such advance fails to comply with the conditions for such a waiver, the recipient shall repay to the Secretary in cash the full amount of the advance received on such terms as the Secretary shall require. It shall be the responsibility of the local board to obtain documentation, signed by the responsible official, showing that the recipient of such advance is aware of and agrees to the conditions of its receipt.

(2) Local boards are encouraged to provide, to the neighborhood in which a new emergency shelter facility is to be located, adequate notice and an opportunity to comment. Local boards are also encouraged to achieve the widest possible distribution of emergency shelters throughout the locality to avoid a disproportionate burden on any one section or neighborhood of the locality.

LIMITATION ON CERTAIN COSTS

SEC. 609. Not more than 3 percent of the total appropriation for this program each year may be expanded for the costs of administration.

PROGRAM GUIDELINES

SEC. 610. (a) The national boards constituted pursuant to sections 601 and 602(b) shall establish written guidelines for carrying out this program, including methods for identifying localities with the highest need for emergency food and shelter assistance; methods for determining amount and distribution to these localities; eligible program costs, with the aim of providing emergency essential services based on currently existing needs; and responsibilities and reporting requirements of the national boards, local boards, and service providers.

(b) These guidelines shall be published annually, and whenever modified, in the Federal Register. The national boards shall not be subject to the procedural rulemaking requirements of subchapter II of chapter 5 of title 5, United States Code.

(c) Guidelines established by the national board constituted pursuant to section 601 shall continue in effect until modified or revoked by that board or by the national board constituted pursuant to section 602(b).

PROGRAM AUTHORIZED

SEC. 611. (a) To carry out this title, there are authorized to be appropriated $70,000,000 in fiscal year 1986, $88,000,000 in fiscal year 1987, and $91,000,000 in fiscal year 1988.

(b) Any appropriated funds not obligated in a fiscal year shall remain available for obligation during the following fiscal year.

SURPLUS FOOD DISTRIBUTION

SEC. 612. The Commodity Credit Corporation shall process and distribute surplus commodities acquired by the Corporation for the purpose of carrying out the food distribution and emergency shelter program in cooperation with the national boards constituted pursuant to sections 601 and 602(b).

TITLE VII—TRANSITION TO INDEPENDENCE DEMONSTRATION PROJECT

AUTHORITY TO MAKE GRANTS

SEC. 701. (a) The Secretary of Housing and Urban Development shall make grants to States, local governments, or private nonprofit organizations for the operation of demonstration projects to develop and apply innovative approaches in providing transitional housing and supportive services to the homeless to assist them in the transition to independent living.

(b) Grants under subsection (a) may be made in the form of:

(1) annual payments for operating expenses of transitional housing, not to exceed 75 percent of the annual operating expenses of such housing;

(2) technical assistance in establishing and operating transitional housing and providing supportive services to the residents of such housing to assist them in the transition to independent living; and

(3) one-time only non-interest bearing advance, not to exceed $100,000 for the purposes of acquiring, rehabilitating, or acquiring and rehabilitating an existing structure for use in providing transitional housing, if the applicant agrees to utilize such structure as transitional housing for not less than 5 years. Repayment of such advance shall be waived if the applicant utilizes the structure as transitional housing for not less than the 10-year period following the initiation of operation of such transitional housing facility, or if the Secretary determines that such structure is no longer needed for use as transitional housing and approves the use of such structure for another charitable purpose for the remainder of such 10-year period. If the applicant fails to comply with the conditions for waiver of repayment, the applicant shall repay to the Secretary in cash the full amount of the advance received on such terms as the Secretary shall require.

(c) Grants made under this section are to be used to supplement and extend currently available resources and not to substitute or reimburse ongoing programs and services.

APPLICANTS FOR GRANTS

SEC. 702. Each application for a grant submitted by a State, local government, or private nonprofit organization shall contain—

(1) documentary material demonstrating that such applicant has the ability and resources necessary to operate transitional housing;

(2) documentary material describing the program and supportive services intended to be provided in such transitional housing, including the innovative quality of the proposed program;

(3) documentary material demonstrating that the State, local government, or private nonprofit organization involved has provided the emergency food and shelter program local board, constituted pursuant to section 605 of this Act, if such local board has been constituted in the locality where the proposed transitional housing will be located, an opportunity to comment with respect to this application, and a statement as to whether the local board approves or disapproves of such application and its reasons for any disapproval; and

(4) such other information or material as the Secretary shall establish.

ALLOCATION OF GRANTS

SEC. 703. In selecting States, local governments, or private nonprofit organizations

for assistance in providing transitional housing under this title, the Secretary shall consider—

(1) the innovative quality of the proposal to provide transitional housing and supportive services to the homeless to assist them in the transition to independent living;

(2) the ability of the State, local government, or private nonprofit organization to develop and operate transitional housing for homeless persons and to provide supportive services to the residents of such housing;

(3) the need for such transitional housing and supportive services in the locality to be served; and

(4) such other factors as the Secretary determines to be appropriate for purposes of carrying out the demonstration project established in this Act in an effective and efficient manner.

DISTRIBUTION OF GRANTS

SEC. 704. (a)(1) Not later than 120 days after the beginning of each fiscal year for which Congress makes appropriation to carry out this title, the Secretary shall make grants under section 701.

(2) If the aggregate amount of funds requested in applications submitted and approved, during the 120-day period referred to in paragraph (1), is less than the amount of such appropriation available to make such grants, then the Secretary shall publish in the Federal Register a notice that additional funds are available for distribution under this title.

(b) The aggregate amount of all appropriations made to carry out this title shall be used to make grants under section 701 unless the sum of the administrative costs incurred by the Secretary to carry out this title and the aggregate amount of funds requested in applications approved under this title is less than the aggregate amount of such appropriation.

PROGRAM REQUIREMENTS

SEC. 705. (a) Each State, local government, or private nonprofit organization receiving assistance under this title shall agree—

(1) to operate transitional housing assisting residents in the transition to independent living and limiting the stay of individual residents to not more than 6 months;

(2) to conduct an assessment of the supportive services required by the residents of such transitional housing to assist them in the transition to independent living;

(3) to employ a full-time residential supervisor with sufficient expertise to provide, or supervise the provision of, supportive services to the residents of such housing;

(4) to keep and make available to the Secretary such records of the expenditure of funds as the Secretary may require by rule; and

(5) to comply with such other terms and conditions as the Secretary may establish for purposes of carrying out the demonstration project established by this title in an effective and efficient manner.

(b) Each homeless individual residing in transitional housing assisted under this title shall pay as rent an amount determined in accordance with the provisions of section 3(a) of the United States Housing Act of 1937.

REGULATIONS

SEC. 706. Not later than 120 days following the date of enactment of this Act, the Secretary shall issue such regulations as may be necessary to carry out the provisions of this title.

REPORTS TO CONGRESS

SEC. 707. (a) The Secretary shall submit to Congress—

(1) not later than 3 months after the end of each of the fiscal years 1986 and 1987, an interim report summarizing the activities carried out under this title during such fiscal year and setting forth any preliminary findings, conclusions, or recommendations of the Secretary as a result of such activities; and

(2) not later than 6 months after the end of fiscal year 1988, a final report summarizing all activities carried out under this title and setting forth any findings, conclusions, or recommendations of the Secretary as a result of such activities.

(b) Such interim and final reports shall address—

(1) the cost of operating transitional housing and providing supportive services to the homeless to assist them in the transition to independent living;

(2) the various types of transitional housing assisted under this title, including innovative approaches to assisting the homeless in the transition to independent living;

(3) the social, financial, and other advantages and disadvantages of transitional housing and supportive services as a means of assisting the homeless;

(4) the success of transitional housing programs assisted under this title, as measured in terms of placement of homeless individuals in permanent housing, placement in employment, and reductions in welfare dependency; and

(5) such other findings, conclusions, and recommendations as the Secretary deems appropriate with regard to assisting the homeless in the transition to independent living.

PROGRAM AUTHORIZED

SEC. 708. To carry out this title, there are authorized to be appropriated $5,000,000 in fiscal year 1986, and there are authorized to be appropriated $15,000,000 in each of the fiscal years 1987 and 1988.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS ACT, 1986

GORTON AMENDMENT NO. 812

(Ordered to lie on the table.)

Mr. GORTON submitted an amendment intended to be proposed by him to the bill (H.R. 3244) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1986, and for other purposes; as follows:

At the end of the bill, add the following section:

SEC. . Notwithstanding any other provision of this Act (including any provision reducing certain dollar amounts by a specified percentage), the appropriation made by this Act for the Veterans' Administration for "Medical care" shall be $9,162,694,000.

Notwithstanding any other provision of the law, none of the funds appropriated in this Act or any previous Acts shall be used to issue any permit not intended for limited-duration research purposes for the ocean incineration of hazardous wastes, unless the Administrator of the Environmental Protection Agency prepares an environmental impact statement (as described in clause (i) et seq. of section 102(2)(C) of the National Environmental Policy Act of 1969) with respect to the loading, transportation, and incineration of such wastes which will be involved under the terms of the permit.

On page 54, insert between lines 8 and 9 the following new section:

SEC. 326. No later than April 1, 1986, the Interstate Commerce Commission, in cooperation with the Department of Transportation shall—

(1) conduct a study of—

(A) the regulation of United States motor carriers operating in Canada, by the provincial and federal governments of Canada;

(B) the regulation of Canadian motor carriers operating in the United States, by the Interstate Commerce Commission;

(C) the degree of reciprocity in treatment of foreign motor carriers by the regulatory authorities of each such nation;

(D) any other factors leading to disparate treatment of United States and Canadian motor carriers, including but not limited to, taxes, fees, and border delays; and

(E) the competitive economic disadvantages of United States motor carriers in comparison to Canadian motor carriers caused by nonreciprocal treatment of United States motor carriers by Canadian regulatory authorities; and

(2) report to Congress the results of such study, including recommendations for legislative action to provide for reciprocity of regulation of such motor carriers by each nation.

LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION APPROPRIATIONS

HEINZ AMENDMENT NO. 813

(Ordered to lie on the table.)

Mr. HEINZ submitted an amendment intended to be proposed by him to the bill (H.R. 3424) making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1986, and for other purposes; as follows:

On page 50, after line 25, add the following:

For carrying out the provisions of title VI of the Education for Economic Security Act, $2,500,000 to remain available until expended.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON ENERGY REGULATION AND CONSERVATION

Mr. GARN. Mr. President, I ask unanimous consent that the Subcommittee on Energy Regulation and Conservation of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Friday, October 18, to hold an oversight hearing on innovative approaches in industrial energy efficiency.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

DR. BUTZ COMMENTS ON THE FARM BILL

● Mr. QUAYLE. Mr. President, for several years, my colleagues and I have enjoyed, and this country has prospered by the perceptive and knowledgeable counsel of Dr. Earl L. Butz, dean emeritus of agriculture at Purdue University, and former Secretary of Agriculture. I have appreciated the help of Dr. Butz in attempting to deal with the difficult problems confronting U.S. agriculture, and welcome his continued interest and involvement in the development of farm policy.

Dr. Butz, who makes his home in West Lafayette, IN, maintains a busy schedule of travel, and often writes to share his perspective on agricultural economics. The Wall Street Journal recently published an article by Dr. Butz, called "Selling a Farm Bill of Goods," in which he very accurately and eloquently lays forth a blueprint for design of the 1985 farm bill. I agree with much of his approach, and today would like to share it with other Members of this body.

Mr. President, at this time, I ask that a copy of the article be printed in the RECORD.

The article follows:

[From the Wall Street Journal, Sept. 12, 1985]

SELLING A FARM BILL OF GOODS

(By Earl L. Butz)

Any believer in the market system who has been watching the debate over the 1985 farm bill has to be extremely disappointed. Both houses of Congress are turning out versions with loan payments and target prices for subsidized crops that are too high, backed by the same mentality that put American agriculture in its current mess.

The Reagan administration made pious sounds early on about reorienting farm policy to the marketplace. But somewhere between the Agriculture Department's offices and Capitol Hill, the principles they said they were fighting for have all but dissolved. They appear to be acquiescing to a farm-bill framework that can be made truly market-oriented only at an unacceptable budget cost by dropping loan rates, maintaining high target prices and dipping into the Treasury for direct payments to cover the difference.

Current U.S. agricultural policy is costly, controversial and counterproductive. Federal income transfer payments to farmers are at near-record levels. The congressional budget resolution calls for $34.8 billion more in farm subsidies for the fiscal years 1986–88. The bill passed by the House Agriculture Committee yesterday carries a price tag of $42.8 billion over that three-year period—an average of $14.2 billion a year. That compares with the $600 million spent for such subsidies in 1975, and the $3.5 billion spent as recently as 1981.

BUTZ' LAW OF AGRICULTURE

Despite this outflow of dollars, there are more and more reports of farm failures, foreclosures, pressures on agribusiness firms and general rural distress. Commodity groups are set against one another as grain producers seek higher prices for their crops and livestock producers grapple with feed costs that are artificially hiked by higher crop prices. Our grain and cotton producers are geared to produce for the export market, but they are tied to governmental price and production programs designed primarily for the domestic market. Too often, their first market is not overseas but a U.S. government bin or warehouse.

American agriculture is on the road to economic suicide under existing policies, which have priced farm products out of the world market and have encouraged expanded production abroad. Butz' Law of Agriculture is: The higher the degree of governmental involvement in pricing and marketing, the deeper the economic pit in which agriculture wallows.

The great irony in all of this is that Congress and the administration are both buckling under farm pressures so readily that the farm bill emerging from the legislative sausage-grinder looks a lot like a simple extension of the 1981 Farm Bill. That's the very thing that has put us in the mess we are in today.

The two major mechanisms of current farm policy are target prices and the loan rate. Let's use wheat to illustrate the bind they have put American agriculture into.

The target price of wheat is $4.38 a bushel. That's set by Congress and bears no relation to the farm price of $2.50 a bushel. Originally designed as a safety net in case of a steep drop in the market, target prices are now much higher than the prices farmers get for their crops. Taxpayers have been making up the difference between the target price and the loan rate in the form of billions of dollars in "deficiency payments"

The loan rate is $3.30 a bushel. This is also set by Congress, although the Secretary of Agriculture can make modest adjustments in relation to supply. The "loan" is a non-recourse loan, meaning that if the market price of wheat falls below the loan rate, the farmer simply surrenders the wheat to the government and forgets about paying back the loan.

The current approximately $2.50 farm price of wheat is 80 cents below the loan rate, but the farmer has already received $3.30 a bushel when he obtains his loan. So the government acquires title to wheat at a cost of 80 cents a bushel above current market value, plus about 20 cents of interest forgiven on the loan.

However, no administration can stay tied to this kind of open-ended raid on the Treasury. This administration will be forced to either 1) not lower the loan rate so as to minimize the amount of deficiency payments or, 2) idle massive amounts of farm land to bolster the market price and hence minimize losses on defaulted loans. It is most likely to do both.

Whatever action is taken will redound to the benefit of foreign producers, expand production abroad and will lead to a shrinking U.S. export market.

Through the Payment in Kind program, 78 million acres of farm land were idled in 1983. As the U.S. curtails output we are encouraging more uneconomic and high-cost agricultural production in other countries. We are effectively raising the real cost of feeding the world's people because we've drifted away from the sound principle of producing commodities where their competitive advantage is greatest and then trading them back and forth between nations.

In each of the last three quadrennial farms bills (in 1973, 1977 and 1981), Congress enacted mandatory annual escalations of loan rates and target prices. They took the guesswork out of it for the ensuing four years. But now that the present system has failed and the heat is up, it's no time to flee the kitchen. Congress should mandate de-escalation, and not pass the buck to the secretary of agriculture by "providing discretion to lower the loan rate"—an always politically difficult feat.

Solutions to current farm problems that balance the concerns of farmers, taxpayers, agribusiness *and* consumers can be developed if only we follow a few simple guidelines.

The agenda is simple and politically responsible, and has been set down recently in a joint statement that I and three other former secretaries of agriculture released. Two of us are Democrats and two are Republicans. (The others are Orville Freeman, 1961–69, Clifford Hardin, 1969–71 and Bob Bergland, 1977–81.)

Among our recommendations:

(1) Non-recourse loans have worked well as a safety net if loan levels are set at or below market-clearing levels. We suggested they be set at the season average of market prices. In that way, loans would protect farmers against short-term price declines but not interfere unduly with the marketplace.

(2) Farmers need income protection to help them adjust to changes in farm programs. A target-price program makes a buildup of surpluses less likely and discourages competing countries from expanding their production. Since small farmers are in the greatest difficulties, a ceiling should be set on total payments per operator.

(3) Expanding demand should be the primary thrust of U.S. farm policy. Acreage-reduction programs for the purpose of raising prices are exercises in futility because competing countries can watch what we do and then expand their own production.

(4) Commodity reserves under loan to farmers should be used only for food security reasons and not to support market prices.

(5) For future generations, a conservation program for fragile land is essential. Farmers should be prohibited from receiving program payments on erosive land.

Many farm-state legislators fear so simple an approach will alienate their farm voters. My visits to farm communities convince me that the vast majority of commercial producers want this kind of farm policy. Their farm and commodity organizations are not reflecting their interests. Rather, they are responding to the loudest squeaks with their one great strength—their ability to resist change.

America's taxpayers are neither able nor willing to provide greater and greater farm subsidies. Turning to the market is the kind of policy that will put U.S. agriculture back on its feet again. But it won't happen unless everyone who hopes for it starts demanding it in face-to-face meetings with his or her elected officials.

There is a discipline in the marketplace that works. Let's give it a try before more of American agriculture goes down the drain.●

GRAMM-RUDMAN: WHEN THEY READ IT, THEY KNEW IT WAS WRONG

● Mr. HART. Mr. President, during the debate on the Gramm-Rudman

amendment, the distinguished majority leader encouraged the Senate to pass the proposal promptly, arguing "the longer something hangs around here, it gets stale. People start reading it."

I joined a number of our colleagues in an extended discussion of this amendment. It was not our purpose to delay a vote. Instead, we recognized that this was a radical proposal to alter fundamentally our budget priorities and the relationship between the executive and legislative branches. Reflecting a more conservative approach to legislating, we were saying, "Wait a minute. Wait a minute. Let's understand what we're doing before we pass this measure."

We asked searching questions about the Gramm-Rudman amendment, Mr. President, but we received mostly unsatisfactory answers. Even going into the House-Senate conference on the bill, the sponsors of the amendment are unable to agree what programs would be cut, and by how much. We warned the Senate, but the Senate didn't listen.

The majority leader was proven right in one respect; people have begun to read the Gramm-Rudman proposal. In the last week, a number of thoughtful comments have appeared—in papers whose editorial philosophies cover the political spectrum—which echo many of the concerns we raised in debate.

I have selected a dozen of these commentaries which our colleagues should read. The temporary debt limit extension is expiring. We are going to be voting on a conference agreement based on Gramm-Rudman. We've leapt once, without looking. Consequently, as we move another vote on Gramm-Rudman, I agree with Business Week which urges: "Congress Should Look Before It Leaps"—again.

Mr. President, I ask that the articles be printed in the RECORD.

The articles follow:

[From the Kansas City Times, Oct. 14, 1985]

SPUTTERING ABOUT FEDERAL DEBT

There is something about the federal debt that makes normally image-conscious politicians behave like buffoons. But in the last few days Washington has carried the act too far with phony accusations and ludicrous posturing. The public scare tactics would be cruel if anyone took them seriously.

Everyone knows, however, where this debate will end: Once Congress and the President stop their indignant sputtering, they will acknowledge the government has accumulated a debt approaching $2 trillion. The only real question concerning the debate is exactly how much damage it will do to the dignity of the U.S. government.

Early last month the administration asked Congress to raise the limit above $2 trillion. Since the government was on the verge of surpassing the current limit of more than $1.8 trillion, action to raise the debt ceiling should have been a formality.

But the $2 trillion figure sent everyone running for cover. They found in it a shoddy attempt to ram through an unstudied proposal promising to balance the budget through annual deficit reductions and solve everything by 1991, maybe. This proposal was hitched to the debt ceiling, delaying action on it and producing those now-familiar predictions that the government would run out of money.

Ronald Reagan, overseer of a federal debt that dwarfs its predecessors, had the gall to resurrect his 1980 campaign rhetoric denouncing the Democrats for decades of federal red ink. He threw his support behind the 1991 measure, "an historic proposal that I think is worth fighting for." Yet he and lawmakers in both parties apparently didn't consider it worth talking about. They hadn't talked about it before, and they said there was no time to talk about it now because the government was about to start bouncing checks.

The arguments in favor of the 1991 proposal don't sound convincing. A sample: "The process will force something to happen so if we don't do our job our job will be done for us." That's Sen. Pete V. Domenici, chairman of the budget committee, talking about his view of public service.

The proposal's opponents said it would put heavy burdens on domestic programs that already have suffered. They warned the measure delegates too much budget authority to the president.

One voice of reason was Republican Sen. Lowell Weicker's. He described the 1991 proposal as "more political than it is real; it's an effort on the part of the various parties, especially in this instance the Republicans, to save face on a discredited economic policy."

But others called the situation an emergency. On Wednesday the Senate overwhelmingly approved the proposal. The House has not acted on it yet although a lop-sided vote Friday indicated that most House members look kindly on the idea.

There was no emergency; Congress could have voted and Mr. Reagan could have approved an extension of the ceiling immediately. Then everyone could have turned their attention to a serious discussion of the budget. But that's something Washington has been avoiding for a long time.

[From Business Week, Oct. 21, 1985]

THE BALANCED-BUDGET BILL: CONGRESS SHOULD LOOK BEFORE IT LEAPS

If an act done in haste has calamitous results, you'd think those responsible would learn one simple lesson: Think first. Yet Congress, in its panic to be seen as doing something about the budget deficit, may once again ignore that axiom. The result could be a law that not only avoids the real problem but also undercuts one of the basic roles of government: choosing wisely among a host of competing demands for federal spending.

The proposal in question is a plan that would "guarantee" a balanced budget by 1991. Under the latest version, the President would be required to offer budgets that reduce the deficit to zero in equal steps from fiscal 1987 to 1991—the fiscal 1986 budget being too far along for such drastic revision. If Congress failed to meet the goal, the President would propose across-the-board cuts in spending, with only Social Security exempt. If Congress did not act on the President's recommendations, they would become law.

In a matter of weeks, the scheme has gone from a gleam in the eyes of Senators Phil Gramm (R-Tex.) and Warren Rudman (R-N.H.) to legislation that passed the Senate on Oct. 9 and will be seriously considered in the House. The lawmakers' sudden infatuation with it reflects their exasperation with seeing the deficit remain in the $200 billion range, despite four years of politically painful program cuts. But the speed with which the idea gained currency mirrors the process that got the government in this mess to begin with. In 1981, Congress ignored all warnings that the President's tax and budget proposals were fraught with fiscal risk. This time around, Gramm-Rudman has moved close to passage without committee hearings or any of the other scrutiny that would reveal why it is hopelessly impractical and violates the spirit, if not the letter, of the Constitution.

AUTOMATIC PILOT

The fundamental problem with Gramm-Rudman is that it represents a congressional sidestepping of the Constitution's requirement that "no money shall be drawn from the Treasury but in consequence of appropriations made by law." The government spends about $3 billion a day for a panoply of purposes. It is Congress' duty to set priorities for this spending. But if recent history is any guide, Congress will be unable to meet its annual budget targets, and the budget, in effect, will go on automatic pilot without a single affirmative vote being taken.

Moreover, Gramm-Rudman would make a hash of congressional budget and appropriations processes—which if arcane, are fundamentally important. It would result in a tremendous shift of power to the House and Senate Budget Committees and away from committees with policy expertise. It would hugely inflate the importance of the Office of Management and Budget and the Congressional Budget Office, the unelected agencies responsible for the deficit estimates that triggered the bill in the first place. If, for example, the CBO-OMB real economic growth estimate were a point low, it could force a $17 billion cut in spending that might be neither prudent nor necessary.

POLITICAL PANIC

Although Gramm-Rudman seems to enhance the power of the White House at Congress' expense, it holds serious risks for the President as well. Any President should think twice about legislation that dictates the size of the budget he will propose—not just for next year, but for the next five. Moreover, it could sharply reduce his own flexibility in deciding how the government's finite resources are allocated. Reagan, in endorsing the plan, blithely said he expects Congress will continue to increase defense spending. But in all likelihood, passage of Gramm-Rudman would make that impossible. The scheme could also increase the chances of Congress forcing through just the sort of massive tax increases the President vows to oppose. The prospect of massive, automatic spending cuts could spawn a political panic that even a President as popular as Reagan could not withstand.

Thinking twice, however, is not the order of the day. In response to pleas from congressional Democrats for more time to consider the budget scheme, Senate Majority Leader BOB DOLE (R-Kan.) said: "The longer something sits around here, the staler it gets. People start reading it." No superficially attractive scheme will force Congress or

the Administration to clean up the budget mess. Gramm-Rudman could do with a great deal more reading before it becomes law.

[From the New York Times, Oct. 16, 1985]

THE BALANCED BUDGET RISKS

(By Leonard Silk)

The low-water mark of United States fiscal policy undoubtedly came during the first four years of the Great Depression. With national income dropping and unemployment climbing, the Hoover Administration put through a huge tax rise in a desperate attempt to balance the budget.

The Federal Revenue Act of 1932, sponsored by the Republicans, nearly doubled tax rates. Indeed, the top-bracket rate was raised to 63 percent from 24 percent, while other rates were increased somewhat less sharply. This enormous tax increase added additional burdens to the economy, restricted private spending further, worsened unemployment and aggravated the deflation that was a reality at the time, not the inflation that was assumed to be a threat.

But the near-doubling of tax rates in 1932 did next to nothing to raise revenues or close the budget deficit. All it did was worsen the Depression.

In 1933, Franklin D. Roosevelt took over the White House. He had campaigned on a platform of balancing the budget, and at first he tried. In his first year in office, he trimmed Federal spending by 1.3 percent. But despite the cuts and further tax increases, the budget deficit in 1933 held at $2.6 billion, down only slightly from $2.7 billion of 1932. And unemployment rose to a record 24.9 percent in 1933 from 23.6 percent in 1932.

Is the United States about to adopt a fiscal policy like that which prevailed during the worst part of the Depression? The Balanced Budget and Emergency Deficit Control Act of 1985, sponsored by Senators Phil Gramm, Republican of Texas, Warren Rudman, Republican of New Hampshire, and Ernest F. Hollings, Democrat of South Carolina, proposes to balance the budget by 1991. It would get there by setting maximum allowable deficits of $180 billion in the fiscal year 1986, $144 billion in 1987, $108 billion in 1988, $72 billion in 1989, $36 billion in 1990 and zero in 1991.

Would this plan, already approved by a 75-to-24 vote in the Senate, with strong Democratic support, risk aggravating a recession? Its sponsors have tried to deal with that problem by authorizing the President to delay action to cut the deficit for 30 days in any year when there is a recession or one is expected.

If the Office of Management and Budget and the Congressional Budget Office jointly forecast a recession, defined as two quarters of decline in real gross national product, the President would have the extra time to send up an alternative plan.

But is this provision enough to deal with the recession problem? Many economists think not. For one thing, they say, recessions usually begin long before an actual decline in real G.N.P. is registered. The economy might be rising at so slow a rate that unemployment would already be increasing, as happens when the rate of growth is less than 3 percent. But the downward pressure exerted by big cuts in spending might insure a recession.

A second problem is the uncertainty of economic forecasts. The forecasts produced by the Office of Management and Budget and the Congressional Budget Office, whenever they differed, would be put together, with a midpoint for the assumed level of the deficit before the President proposed action to cut the deficit. The normal difficulty of making accurate forecasts might be complicated further by considerations of the Administration or Congress of what level of spending they wished to make.

But the danger that Gramm-Rudman-Hollings would guarantee repetition of the worst fiscal blunders of the Depression are lessened by permitting the President, during a recession, to suspend all or part of the requirements of the bill. That any President would do so is made more probable by the widespread recognition of the risk of aggravating a slump by cutting outlays or raising taxes in the midst of recession.

Many would also argue that there is another safeguard today—one that was dimly understood during the Depression: how to use monetary policy to keep a recession from degenerating into a depression. During the Depression, fear of inflation, in a time of falling prices and employment, greatly restricted the efforts of the Federal Reserve to make more money and credit available. Today's monetarists call for keeping the money supply constantly growing. And the nonmonetarists would call for an increase in money and credit, and lower interest rates, to offset recessionary forces.

Nevertheless, many economists think Gramm-Rudman-Hollings still is too risky and could be improved. One way of doing this, offered by James Duesenberry of Harvard and Charles L. Schultze of Brookings, would be to establish an objective of declining Government expenditures rather than declining deficits. The advantage would be that if, as a result of slow or negative growth, there were shortfalls of revenues, it would not be necessary to increase spending cuts even further.

Another way of reducing risks would be to set "structural" deficit targets—that is, targets based on what the deficit or surplus in the budget would be at a high-employment level of output, thereby avoiding the distortions resulting from swings in the business cycle.

Gramm-Rudman-Hollings's effect on recessions is only the beginning, however, of economists' worries about the bill. We shall take up these concerns in a future column.

THE FIRST BOUNCE

While Congress sweats out its debt-limit extension and dire warnings about Uncle Sam's checks bouncing at the banks, let us discuss further the issue of federal budgeting.

Our editorial yesterday, "Nixon Was Right," opined that the Gramm-Rudman amendment to the Senate's debt-limit extension bill was flawed because it was keyed to the size of the federal deficit rather than to total federal spending. It looked like a pressure vessel for brewing tax increases.

Sen. Gramm called to say that he is not a tax booster and he doesn't think tax increases are inevitable from the mandatory limits he and Sen. Rudman want for bringing the deficit down to zero by 1991. Rather, he thinks spending cuts, including vetoes of some appropriations bills this year, are more likely. If deficit-panic politics continues along its present course, there'll probably be a tax increase anyway. And finally, since Congress simply is not willing to surrender the power it assumed a decade ago, his measure would compromise by having the president and Congress share the task of cutting the deficit $36 billion over the next five years.

Those are good practical arguments for coping with the likes of Tip O'Neill, whose great generosity with taxpayer money had much to do with creating today's budgetary chaos. Speaker O'Neill nonetheless declared yesterday that he opposes Gramm-Rudman, specifically because it returns some power to the president.

If federal budgeting is ever to be reordered, however, there is no choice but to return power to the executive. Congress has assumed executive responsibility—but with 535 members each trying to direct spending or a portion thereof. Committee and subcommittee staffs second-guess every executive decision, restoring excised spending and feeding it into a logrolling machine.

This is economically damaging not only because it perpetuates federal deficits, but because it makes grossly inefficient use of nearly one-quarter of the nation's economic resources. Were it not for that big Beltway-enclosed beehive of economic maladministration, the U.S. economy would be far more efficient, far better able to create real jobs, far better able to compete in world markets, and far better able to offer useful assistance to those many countries that have mismanaged their use of resources even more grievously.

The farm bill, for example, is not only far over budget but will continue to undermine a once efficient farm economy. The urban-mass-transit bill not only involves a lot of money but funnels it into questionable projects that no city would dare try to finance on its own. The huge toxic-waste bill shovels federal money out to be spent on who knows what; the only certainty is that contracts will be let. Defense spending, as Sens. Nunn and Goldwater have just pointed out, has been buying a lot less defense than such a huge amount should buy, in large part because congressional management is not designed for efficiency but for giving each district a piece of the action.

Old-style politicians think that all this doesn't matter. The purpose of government spending isn't to accomplish public purposes but to generate "jobs." This kind of thinking is an invitation to economic decline. Indeed, the U.S. flirted with decline, induced in exactly this way, during the 1970s.

The struggle between President Reagan and Congress in the 1980s has been over how the federal share of economic resources will be managed. Mr. Reagan's fiscal 1986 budget earmarked a substantial list of specific programs for termination or sharp cutback. The 535 micromanagers of the Congress, their thousands of staffers, and thousands of lobbyists undertook once more to overrule those decisions.

Sen. Gramm, an economist who is well aware of the costs of resource misallocation, is trying to work within the congressional process to alter that dreary annual process. If he fails, Congress will continue to fumble along in view of an increasingly impatient electorate. The pressure from outside will continue to build, either through state-level initiatives calling for a balanced-budget amendment to the Constitution or through presidential vetoes. The simplest solution for Congress would be to give the president line-item veto power, which would fall far short of surrender but would move toward making someone accountable for the budgetary result. The federal government may well be the only organization in this country, and possibly the world, where no one can be held accountable for how much is

spent. Such a state of affairs is neither viable nor sustainable.

[From the Christian Science Monitor, Oct. 8, 1985]

SOUND DEFICIT REDUCTION

Americans can welcome the sudden eagerness in official Washington to reduce the federal deficit. But that is not to say that they should welcome the balanced-budget measure now before Congress.

The legislation—the so-called Gramm-Rudman measure, named after Republican Sens. Phil Gramm of Texas and Warren B. Rudman of New Hampshire—would supposedly eliminate the deficit to zero by set amounts on an annual basis, achieving a balanced budget by Oct. 1, 1990. If the deficit exceeded target levels, the President would be ordered to make across-the-board reductions in spending, with social security exempt.

The sudden zeal of this 11th-hour attack on deficits is disconcerting, given the political timing: Lawmakers are now having to raise the national debt ceiling to above $2 trillion—illustrating the inadequacy of their efforts to date.

Even giving the Congress and the White House the benefit of the doubt at the moment, the Gramm-Rudman measure, however, is troubling. By giving the President added authority, it would alter the constitutional relationship between the White House and Congress, wherein Congress is given the lead in tax and fiscal matters. The tight deficit-reduction schedule built into the proposal may not provide the flexibility needed by Washington is dealing with changing economic circumstances. And the proposal exempts one of the biggest areas of federal outlays—social security.

Washington knows how the deficit can be reduced: by enacting tax increases, or cutting spending, or a combination of the two. The administration now has a new budget chief, James C. Miller III. The budget process should be the starting place for the administration as it goes about its search for lower deficits. That would mean the White House should introduce a meaningful budget in January for fiscal 1987 that will be taken seriously by both lawmakers and outside economists.

Making the current budget process work makes better sense than racing to adopt a rigid new formula that creates more constitutional problems than it resolves.

THE BALANCED BALONEY ACT OF 1985

Frustrated by the failure to reduce the breathtaking Federal deficit, Congress and the President are ready to fasten onto a fantasy. Dreamed up by Senators Rudman of New Hampshire and Gramm of Texas, both Republicans, it promises to balance the budget by 1991. The idea is appealing but this approach is perilously unbalanced.

Congress' frustration is easy to understand. This year, again, it has struggled to cut one program after another only to wind up with yet another huge deficit. The plan responds handsomely to the prevailing mood of desperation.

Here is how it's supposed to work: The deficit for fiscal 1986 is assumed to be $180 billion. Deficits in following years would be reduced to zero in equal yearly steps. If the President and Congress failed to agree on how to achieve the goals, the bill would require across-the-board spending cuts—with important exceptions.

The first flaw is the starting point. The official estimate for this year's deficit is low, maybe $20 billion too low. Second, aiming at zero is arbitrary, perhaps dangerously so. Big cuts in the deficit are essential. But perfect balance isn't necessary by a given date. Forcing its achievement could, depending on economic conditions, start a recession or stifle a healthy recovery.

Third, the approach is unbalanced and unfair. The trigger mechanism would affect only spending, and not all of that. It would not cut interest on the debt or Social Security and would leave vague leeway for increases in other "uncontrollable" costs. No tax increases are involved and no controls would apply to rising "tax expenditures"—revenues lost to deductions and exemptions that add to deficits just as spending does.

The final flaw concerns credibility. Congress may solemnly demonstrate its firm resolve with legislation—but everyone knows Congress can act even faster in the opposite direction. The 95th Congress passed a law requiring a balanced budget by 1981. The 96th repealed it.

Senators Rudman and Gramm, now joined by Senator Hollings, give their scheme the title "Balanced Budget and Emergency Deficit Control Act of 1985." Beware. The only way to balance the budget and control the deficit is to cut spending equitably, which neither the President nor Congress seems able to do; or raise taxes, which the president refuses to do; or both. No wonder everyone's rushing to embrace this choice bit of balanced baloney.

[From the Rocky Mountain News, Oct. 14, 1985]

SENATE GRASPS AT BRASS RING MADE OF SMOKE AND MIRRORS

At last Congress is doing what it is really good at: staging a great political show to make people think it is alarmed by $200 billion budget deficits and will do something to reduce them.

By an overwhelming vote of 75 to 24 Wednesday, the Senate commanded Congress and the White House to cut the deficit $36 billion a year until the budget is balanced in 1991. If you believe that will happen, we have a bridge to sell you. It's in Brooklyn.

As originally introduced by Sens. Phil Gramm, R-Texas, Warren Rudman, R-N.H., and Ernest Hollings, D-S.C., the measure made some sense. It provided that if Congress and the president failed to meet its deficit targets, the president could cut spending across the board.

In effect, the bill would have restored to the White House some of the power to impound over-budget spending that President Nixon, crippled by Watergate, lost to Congress in 1974. Unsurprisingly, the federal deficit binge can be traced to that "reform."

Unfortunately, to get Gramm-Rudman-Hollings passed, its sponsors had to retreat time and again. Social Security, most of the defense budget, interest on the debt and all programs with outstanding contracts were exempt from cuts.

This means having to remove $36 million annually from only one-quarter of the budget. It is possible—if one is willing to take food stamps away from the hungry, remove rich farmers from the dole, stop building dams in key lawmakers's districts, close the FBI and leave the Marine Corps with no bullets.

In other words, the deficit reduction goals are not meant to be met, and every senator knows it.

The hyprocrisy, however, did not stop there. Liberal Democrats tried to filibuster the bill to death. Failing that, they flip-flopped and voted for it—a case of cover-your-behind politics. You can just hear them intoning: "How dare my opponent call me fiscally irresponsible. Why, I voted for the Budget Balancing Act of 1985."

Next, the Senate's weak measure goes to the House, where it will get mugged by Tip O'Neill and his merry crew.

So what began as a sincere, necessary move to lower the deficit before it undermines the economy will either be emasculated in the House or killed in conference. The authors of such farces take the voters for fools—and may be right. We put up with their posturing, and pay them for it.

[From the Baltimore Sun, Oct. 8, 1985]

BUDGET BALANCING ACT

As the fiscal new year begins under the gun of an inescapable need to raise the national debt limit past the $2 *trillion* mark, Congress and the Reagan White House are in a state of contrived political panic and in search of a panacea.

The panacea of the moment—a proposal to mandate a balancing of the federal budget by fiscal 1991—has been described by Senator J. Bennett Johnston of Louisiana as a "legislative Armageddon." Norman J. Ornstein, a political scientist at the American Enterprise Institute, says it would have Congress concede a substantial share of its power to the presidency and alter the relationship between the branches of government.

Yet Congress is so transfixed by fear of the voters' wrath that it is rushing to do just what President Reagan wants, even though Mr. Reagan bears great responsibility for sky-high deficits. If the plan is passed in anything near its present form, Senator Johnston thinks it would give the president "total power over appropriations"—what gets funded and what does not. He doubts it could pass constitutional muster. So do we.

The budget-balancing plan sponsored by Senators Phil Gramm, Warren Rudman and Ernest Hollings supposedly would have federal budget ceilings set on a declining line to reach zero by fiscal 1991. The president and Congress would be expected to stay under these ceilings. But if Congress fails to do so, the president could "sequester" funds and cut spending "across the board." If, for example, Medicare has to be reduced 7 percent, a president presumably would have the power to say which parts of Medicare would be cut and if any specific programs are to be terminated.

Then there is the problem of exemptions. Payments on the national debt are excluded, as they must be. But so is Social Security, even though rising cost-of-living adjustments are bleeding the Treasury. Draconian cuts would have to be made in the remaining 60 percent of the budget.

Another troubling feature is the authority that would be conferred on the Office of Management and Budget, a creature of the White House. It could go high or low, depending on which economists it chooses to listen to, and therefore could position a president to work his will on Congress.

It is easy for politicians who have had a hand in doubling the national debt to give lip service to the idea of a balanced budget. It is quite another thing for them to inflict pain by raising taxes or crunching federal activities. There is just no assurance that a bid to solve these sensitive political problems by a mechanical formula will work.

The budget process is in such a mess, at both ends of Pennsylvania Avenue, that attention to the deficit is an appropriate start for the new fiscal year. Congress ought to know what it is doing, however, before it cedes to the executive branch its constitutional power of the purse.

GRAMM-RUDMAN: BUDGETARY BUNGLE?

(By Edwin M. Yoder, Jr.)

The Gramm-Rudman-Hollings plan to cure the deficit by statutory means confounds all folk wisdom. Having watched one statutory process—the so-called "budget process" of the 1974 Budget Act—fail to overcome political pressures making for excess, Congress may enact yet another. The cat, badly burned, is poised to jump back on the same stove.

But panic has set in. The government is almost out of cash and to borrow more, Congress must boost the debt limit to just over $2 trillion, a figure of symbolic significance. It marks a near doubling of the national debt under Ronald Reagan, and another milestone on the dismal road once known (even to Reagan) as "mortgaging our grandchildren's futures."

To take the curse off this transition, Sen. Phil Gramm and several cosponsors have sprung a dandy plan on Congress. Whatever befalls it, it marks another fascinating episode in the bizarre chronicle of Congress' effort to boost itself, by statutory bootstraps, into fiscal self-discipline.

Gramm's bill is complex, but the aim is simple. It would "mandate" a scheduled reduction of the federal deficit, in $36 billion annual decrements, from some $200 billion this year to zero by 1991.

But in view of the well-known frailty of congressional will power, the plan would authorize the president, when Congress exceeds its own limits, to cut spending "across the board" (Social Security excepted).

What is remarkable is that in its embarrassment, Congress is disposed to cancel, at one hasty stroke, the Budget and Impoundment Act of 1974. That act aimed to retrieve usurped spending authority from the Nixon White House, yet now the Gramm-Rudman plan would give Ronald Reagan (and his 1989 successor) an unexampled one-man budgetary discretion—possibly the most unbridled of its sort in any English-speaking legislative tradition since King Charles I lost his head.

In 1974, Congress had been battling Richard Nixon's abuses of "impoundment," executive withholding of appropriated funds, and the Budget Act of that year was intended to clean up congressional bookkeeping and reassert congressional dominance over the spending power.

The 1974 Budget Act and its "budget process" are now widely perceived as failures, and the judgment is hard to deny. The Budget Act halted impoundment abuses. But the "budget process" it instituted, despite a valiant try by people such as Ed Muskie, Pete Domenici and Jim Jones, proved powerless to curb overspending at a time of explosive inflation—especially after the Reagan tax cuts lowered the revenue base. Legislative good intentions were not enough.

But what is the real lesson of this failure?

If the wreckage of the 1974 Budget Act suggests the intrinsic weakness of a statutory process in the face of overwhelming political and economic pressures, how can Gramm and his cosponsors contend with a straight face that still another, if different statutory process will solve the deficit dilemma?

To be sure, if the country enjoys six years of cloudless economic sailing between now and 1991, the plan could work as intended.

In the unwelcome but highly probable event of recession, and the budget pinch it would bring, what then?

The Gramm-Rudman plan has an interesting escape clause. In the event of war or recession, the president may, at his discretion, waive the mandatory deficit reduction.

But putting a president in nearly total charge of the response to economic emergency not only repudiates the 1974 Budget Act; it may repudiate constitutional checks and balances as well.

How, then, would you bet in such an eventuality, in view of the history of such congressional self-denying ordinances? That Congress would swallow institutional pride, and ride out the politically chafing consequences of its abdication of power? Or (as it has done behind the facade of the "budget process") find sly ways to repudiate the deficit-reduction plan?

And another question: The rap against Richard Nixon, 15 years ago, was that he was impounding (we now call it "sequestrating") funds for political, not economic ends—using a discretionary power to destroy or cripple social programs Congress wanted to continue.

Would Ronald Reagan, made sovereign arbiter in an economic pinch, resist the temptation to use his extraordinary discretion under Gramm-Rudman to shape budget policy to suit his well-known fancies?

That is the most political, though not necessarily the most serious, of the many issues raised by the latest panacea for Congressional indiscipline.

[From the Los Angeles Times, Oct. 13, 1985]

A BRAND-NEW WAY TO BRAKE THE BUDGET

(By Richard E. Cohen)

The way business is done in the Capitol may never be the same. Last week Congress seemed finally to have decided to get serious about the budget deficit. Or the contrary, according to some Democratic warnings. The Senate-approved plan to force a balanced budget in five years may prove to have been a grand illusion and the ultimate in political expediency. Take your pick.

The correct answer may not be known for some time. Yet there is little question that the nation's lawmakers set out to change the rules for how they and the President handle the budget.

No actual spending cuts have been made nor will any major action be required before next year. But Republican leaders have won Senate approval of procedures they hope will force the hard choices that members of both parties have been largely unwilling to make. Not incidentally, proponents worried about the politics of the budget deficit hope to convince an increasingly skeptical public that they mean what they say.

Major questions remain, including whether the Democratic-controlled House will demand much change in the proposal during discussions in the coming days and how much cooperation President Reagan will offer if approval of the proposal forces him to turn rhetoric into action. And even supporters of the scheme concede that they do not fully agree about how it would operate.

If nothing else, the latest debate showed that, much as it has tried, Congress has been unable to lose its deficit albatross. Issues like tax reform, trade protectionism and South African sanctions come and go but Congress has had little escape from federal budget deficits that have been close to $200 billion annually since 1983. Barring radical changes in presidential and congressional behavior, or the unlikely prospect of constitutional change, it has become apparent that deficits will stay close to that level for several more years.

The paralysis led freshman Sen. Phil Gramm (R-Tex.), its chief sponsor, to offer the budget plan. Gramm initially gained wide attention as the leading House Democratic supporter of Reagan's 1981 spending cuts, and then switched parties in 1983, after furious Democratic leaders stripped him of committee assignments. His 1985 opportunity came when government borrowing demands forced Congress to increase the public debt limit to $2 trillion, more than twice the amount Reagan inherited when he took office. (Several congressional insiders speculated that former budget director David A. Stockman, renowned for creative ways to deal with the deficit, helped Gramm draft his plan but those rumors were denied by Stockman cohorts.)

The basic outlines of the plan are relatively simple. Starting with a $180-billion deficit ceiling for fiscal 1986—which began Oct. 1—it requires incremental deficit cuts of $36 billion each year, until balance comes in 1991. Both the President, in his annual January budget recommendations, and Congress, in its subsequent actions, must fall below the lid.

If executive and congressional budget experts determine at the start of the fiscal year that the ceiling will be raised more than 5%, then the President would be forced to respect the deficit ceiling by "sequestering" money across-the-board in most federal programs—Social Security benefits would be the major exception. Congress could override the President but only if its alternative plan met the ceiling and won his approval—or could override his veto.

This extraordinary grant of presidential authority, which sponsors claim is critical to the plan's success, generated heated controversy during the Senate debate. Critics said it would encourage Reagan to veto earlier congressional actions so that he could eventually get his way. Others claimed he would find a way to place most of the burden on already depleted social programs and make few cuts from his hefty defense budget.

Sen. George J. Mitchell (D-Me.) also lambasted the "outrageous" handling of the proposal. Senate Majority Leader Bob Dole (R-Kan.) worked with Gramm to "circumvent" the routine legislative process, Mitchell said, and tried to force it through the Senate before it could receive careful study. Mitchell also criticized "woefully inadequate" press coverage of the revolutionary proposal.

Other Democrats welcomed the proposal and joined in the Senate's 75-24 vote to approve it. This broad support offers dramatic evidence that lawmakers feel strong public pressure to address the deficit; frustration has made them willing to try steps that not long ago would have been considered radical.

Until Senate and House conferees agree on the final package, it will remain unclear how much change it will cause in the handling of the budget. Many in the House want to assure, for example, that Reagan could not use the new procedures to disrupt the budget process by vetoing routine measures and leaving himself the power to impose his priorities in the end. They also

have discussed steps to permit automatic tax increases, in addition to spending cuts, if the target is not met.

In a sense, approval of the plan is a political bonanza for Reagan, despite fears among some of his advisers that the automatic spending cuts could reduce Pentagon outlays. The five-year schedule for balancing the budget calls for initial steps that are reasonably attainable; the most painful budget choices would await Reagan's successor. In exchange for his early steps, Reagan can claim that the deficit problem has been resolved.

Even an arguably ironclad proposal will probably leave loopholes. Given its constitutional responsibility to write the budget, any Congress will be reluctant to sacrifice to any President its prerogative to write the federal budget.

But the significance of last week's debate is that the deficit has caused both Congress and the President to conclude that the old system no longer works and that new methods must be found.

[From the Chicago Tribune, Oct. 15, 1985]

BALANCED-BUDGET BILL IS PERILOUSLY TILTED

(By George F. Will)

Bob Dole, illustrating the axion that wit is educated insolence, says the Senate should pass the radical budget-balancing bill without hearings because, "The longer something hangs around here, it gets stale. People start reading it." Heaven forfend.

The proposal, an action-forcing device, would require five annual cuts of equal size ($36 billion) bringing the deficit to zero in 1991. The President would be required to submit a budget with sufficient spending cuts or tax increase to cut $36 billion from the deficit. If—if!—Congress did not ratify his blend of pains and did not devise its own blend, the failure would trigger a presidential duty to cut spending, across the board, by whatever fixed percentage is required.

Note that congressional failure to make hard choices would not invest the President with broad power to exercise rational discretion in shaping the budget.

Defenders—yes, defenders—of the proposal stress that it makes the President an automation. The proposal minimizes choice (thought) in budget-making. This evasion of governance might, for example, require the President to cut equally, thereby assigning the same social value to Amtrak subsidies and programs for spina-bifida babies.

This proposal is historic in its potential consequences and stunning in its symbolism, especially as it reveals a transformation of conservatism. In its potential for large consequences, it ranks a cut below repeal of the Missouri Compromise. It will not ignite civil war, quite. However, as an allocator of effective power within the central government, the proposal is as significant as the establishment of the Federal Reserve System.

Considering its source, the conservative party, the proposal is as startling as the Giles Enforcement Act of 1809, which suspended parts of the Bill of Rights in order to enforce compliance with Jefferson's embargo against Britain and France. Sen. William B. Giles, the author of this concentration of irresistible power in the central government, was a Virginia Jeffersonian, at least rhetorically.

Today's conservative proposal for shrinking deficits mocks some conservative rhetoric. It would involve an enlargement of executive-branch power without parallel in peacetime. Modern conservatism defined itself in opposition first to F.D.R. and then to L.B.J. Hence conservatism had celebrated congressional prerogatives against "presidential government." But conservatives supporting this deficit-cutting proposal favor a form of executive power far beyond the dreams of liberal political avarice.

We few who are "strong-government conservatives"—we Hamiltonians—believe, as our hero did, that "energy in the executive is a leading character in the definition of good government." But minimizing the element of mind in governance is a high price to pay for instilling energy in the executive.

The proposal illuminates the real, as distinct from the rhetorical, nature of contemporary conservatism. Social Security would be completely exempt from cuts. Social Security and interest payments, which are necessarily exempt, comprise one-third of the budget. All other entitlement programs would suffer only cuts from annual cost-of-living increases. Thus the controllable portion of the defense budget, especially pay, maintenance and operations, would bear a heavy burden of the cuts. So conservatives supporting the proposal are siding with the middle-class, social-insurance side of the central government against the defense priority.

The proposal is as American as, well, Prohibition. It expresses a deep desire to tame turbulent social forces with institutional cleverness and words on parchment.

It is axiomatic: In politics, the perfect is the enemy of the good. That is, pursuit of perfection impedes achievement of the merely adequate. Perhaps today's proposal is the closest that self-government can come to self-restraint. But as Dole said to a supporter of the proposal, "Don't get up and explain it again. Some of us are for it."

Congressional pleas for the proposal sound like the notes that a homicidal maniac sends to the police: "Stop me before I kill (spend) again!" Sen. Warren Rudman (R-N.H.), an author of the proposal, was an amateur boxer. He combines charming feistiness with disarming candor. He does not cavil about a description of the proposal as a straitjacket for the government to jump into in a fleeting moment of lucidity. But the words of Sen. Bill Bradley (D-N.J.), a critic of the proposal, can be quoted by proponents for the proposal. Bradley says that Congress does not need new procedures, it just lacks political will. Just? The brain surgeon just lacked steady hands?

The proposal calls to mind an acid cartoon from the late 1940's showing a German general saying "I was only obeying orders I gave to myself." The proposal would hand a meat cleaver to the executive branch and force the use of it. Then a congressman or senator confronted by angry constituents could point to the executive branch and say: "Don't blame me. The, er, government did it."

[From the Washington Post, Oct. 9, 1985]

THE DEFICIT AMENDMENT

Its sponsors and the president keep chipping at the deficit-reduction amendment on the Senate floor to take important shares of the pain out of it. The more they rework it, the more it comes to resemble either 1) a showy effort on the part of those who brought us the deficit to demonstrate now how much they deplore it, and/or 2) a selective effort not so much to reduce the deficit as to use it as a lever to attain assorted lesser policy objectives.

The difficulty for the last five years has been that the deficit has been a residual element in policy-making. The President and the parties in Congress have had various programmatic or distributional goals—cut taxes, increase defense spending, show themselves to be the stoutest possible protectors of the seventh of the population that receives Social Security benefits. The choice, particularly as framed by the president, has come down to letting the deficit rise or cutting an enormous swath through all other domestic programs. Not even the president has been able or willing to propose the requisite cuts, and the deficit has risen.

The amendment in the Senate was meant to reenergize this stale debate by requiring that deficit-reduction come first and by confronting the president and Congress with a much more difficult set of choices. In its original form it set deficit targets declining to zero over the next five years and decreed that if Congress failed to hit a target, the president would have to make spending cuts, in defense and Social Security as well as the domestic remainder of the government. It made no mention of tax increases, but the idea was that, rather than cut defense and Social Security, the president would likely agree to one. There was a hammer at everyone's head.

But the terms keep changing. To pick up support on the floor, the sponsors agreed that none of the burden would fall on Social Security; it would be exempt. Partly to ease the pressure on defense and partly to avoid deep spending cuts just before next year's elections, they have also stretched out the deficit-reduction schedule; the amendment now would probably have no effect for a year. Meanwhile, the president, in professing "enthusiastic support" for "what might well become historic legislation," has served oblique notice that he would not expect it to affect defense. In a "personal caveat" in his radio speech on Saturday he reminded listeners that Congress has already agreed (in this year's budget resolution) to defense spending increases of 3 percent per year after inflation over the next several years. "And next year I will propose those amounts aready accepted as necessary for keeping the peace," he said.

The sponsors say that defense remains subject to the terms of the amendment, but that is clearly not the way the president understands or intends it. The stakes are too high not to have agreement on the rules. The amendment would have some seriously uneven effects within the Defense Department. The theory is that, to avoid these, the president would agree to a more rational budget. But to the extent that defense become exempt along with Social Security, there would be no pressure on him to agree to anything. The amendment would then only seriously affect the domestic programs that have been in the balance against the deficit all along. It would be a stronger license to dismantle them. It sounded a week ago like a good idea. It begins to sound increasingly like a bad one.●

FOSTER GRANDPARENTS

● Mrs. HAWKINS. Mr. President, since the Foster Grandparent Program celebrates its 20th anniversary today, I would like to take this opportunity to commend Foster Grandparents nationwide and most especially the nearly 1,000 Grandparents of Florida.

Florida has one of the largest groups of Foster Grandparents in the country. The volunteers work in a variety of settings, addressing all types of special needs. In Jacksonville, a group of Foster Grandparents provides services to disadvantaged newborn infants in the neonatal unit of Jacksonville's University Hospital. The elderly volunteers perform an important function by showering lots of love and attention on the infants during the first few days of their lives. Other volunteers in Jacksonville work at youth institutions, where they help abused children, pregnant adolescents, and young runaways.

In southwest Florida, Grandparents are assigned to unmarried teenage mothers in a special program that allows the mothers to bring their babies with them to class while they complete their high school education. The volunteers become role models to the young mothers. They show them the best methods of caring for their children.

Still other volunteers serve at a Half-Way House for boys, aged 12 to 18, who have committed sometimes serious crimes. The Grandparents provide emotional support to these troubled young men.

Daisy Martin, the 68-year-old Foster Grandparent from Fort Lauderdale who will represent Florida's Foster Grandparents at the White House celebration today, works in still another area of need.

Assigned to the Walker Elementary School in Centeral Fort Lauderdale, Mrs. Martin assists slow learners. She helps them with reading, writing, and math so that in a short time they're able to catch up with their fellow classmates. "I'm learning a lot myself," she says. "In my day, we never learned how to print, but I know how to do it now! And, guess what! I'm also learning how to shoot basketball!"

Mrs. Martin's presence in the classroom is invaluable, says Walker School Principal Ben Williams. "The students love her. Her being there means they have day-to-day contact with an older person. The stories she tells and the experiences she relates, no doubt, will have a lasting impression on them for the rest of their lives."

Adds Mrs. Martin: "After my husband died I decided I wouldn't just sit and grow old! This work keeps me youthful. The greatest compliment is when I hear a young one say to another, 'When I grown up, I want to be just like Mrs. Martin!' "

To Mrs. Martin, to Florida's Foster Grandparents, to the 19,000 Foster Grandparents around this country, thank you for what you do. Our children are so very much the better for it!●

THE NOVEMBER SUMMIT

● Mr. SIMON. Mr. President, the upcoming meeting between the leaders of the world's two superpowers gives Ronald Reagan and Mikhail Gorbachev a golden opportunity to reduce tensions in this high-stakes game of nuclear one upmanship. Whether they grab that opportunity remains to be seen. But people in both countries are looking to the summit with a mixture of optimism and hope. Those hopes are tempered, I'm afraid, with a strong dose of realism. In a column I write for newspapers in my State, I've previewed what we might expect from that historic meeting. I ask to have it reprinted in the RECORD.

The column follows:

THE NOVEMBER SUMMIT: A PREVIEW

(By Senator Paul Simon)

The November summit meeting in Geneva between President Reagan and Soviet Mikhail Gorbachev is causing some speculation about what will happen. Here are some questions I've heard, and my answers:

What can we expect from the summit meeting?

Perhaps most important, the two leaders will get together and get to know one another. That does not result in anything immediately concrete but if it goes well it can be the base for progress.

In a way of specific results, there probably will be some small steps forward in cultural and student exchanges, new consulates, trade, and perhaps some broad outlines of arms control agreements to be negotiated.

But we should not expect too much.

Is the President serious about this?

While the meeting has been delayed too many years, everything I hear indicates the President now is taking it seriously. He's doing his homework.

Can we trust the Soviets?

No. We should not enter an arms control agreement based on simple trust, any more than they would enter an agreement based on trust of us. They fear us; we fear them. Any agreement should be something both sides can varify.

But what can we verify?

Through our satellite cameras we can verify a great deal, but not everything. Our cameras can tell whether a man crossing the street in Russia has a mustache. We can read the license plate numbers on a car. The detail is incredible. And through those cameras we know how many tanks they have, where their missiles are based, and when they test them. But cameras cannot tell us what goes on in buildings. That's why an agreement on chemical warfare without some type of on-site inspection has little meaning. It cannot be verified by either side.

Through more traditional intelligence sources we do have a great deal of additional information about what is going on in the Soviet Union, but not with the precision and certainty of a camera.

Why would they honor an arms control agreement if they don't honor the Helsinki Accords?

The Helsinki agreement was not a formal treaty. Also, the Soviet leaders know that if they were to honor it to the letter it would drastically change the Soviet system. Obviously, they don't want that. They do not see living up to human rights statements, for example, as in their best interests. But the yearning for peace in the Soviet Union is as real as in our country. The fear of world destruction is also real, as is ours. It makes sense for both sides to stop the arms race.

Will negotiating with the Soviets be easy?

It never is. We have to be patient. We have also learned through hard experience that in an arms control agreement with them we have to dot every "i" and cross every "t" in great detail. Informal understandings about meanings do not work. But if we are patient and persistent both countries should benefit.

Are there practical things that could be negotiated quickly?

Yes. We could quickly agree to stop all testing of nuclear warheads. All but the very smallest can be verified. The Soviets say they are willing to install sensors in their country to detect the tiny tests if we will install them. We should do it. Sen. Sam Nunn, a Democrat of Georgia, and Sen. John Warner, a Republican of Virginia and a former Secretary of the Navy, have suggested we should have a Nuclear Risk Reduction Center at which U.S. and Soviet military personnel would jointly work to monitor nuclear activity and prevent an accidental war. The Soviets have indicated some interest in the idea. It is worth exploring.

Are there those who do not want the summit meeting to succeed?

Yes. There are some in and out of the Administration opposed to the idea of the two leaders meeting. I agree with former President Nixon the two leaders should meet at least once a year. Most people on the Washington scene welcome the summit but caution we should not expect too much.

If the summit succeeds, will that be the end of tensions between the U.S. and the U.S.S.R.?

We're a long way from that. Tensions will continue, but they can lessen. And as tensions lessen it becomes less likely that we will blow up the world.●

THE KILLING FIELDS OF ETHIOPIA

● Mr. LUGAR. Mr. President, every so often an article appears of such compelling content that it merits the special attention of Members. Such an article recently appeared in the European edition of the Wall Street Journal.

The article is titled "Ethiopia: Africa's Killing Fields" and it describes the results of a survey of refugees who recently fled from Ethiopia to Sudan. The conclusion drawn from these interviews suggests that the Ethiopian Government's program of forced resettlement of the population of Tigre and Wollo Provinces may be resulting in thousands of deaths. Although the survey conducted by the Boston based group Cultural Survival was small, the stories all had a chilling consistency.

According to escapee reports, Ethiopian soldiers forced residents of Tigre and Wollo at gunpoint to special transfer centers. Denied food for several days in an apparent attempt to weaken them, the refugees were packed like animals into helicopters for the journey to their new homes in southern Ethiopia. Nearly every escapee reported witnessing deaths en route

to the resettlement areas. Once having arrived, their new homes resembled nothing so much as concentration camps. With the political cadres of the Mengistu regime acting as camp overseers, escapees report being forced to work 11 hours a day, 6½ days a week with woefully inadequate food rations. The Marxist cadres and local militias abuse camp residents in what can only be called conditions of near slavery. Beatings were frequent; those who attempted escape were shot. The death rates in the camps—and these are deaths of the able-bodied—exceed the death rates at the height of last year's famine.

The testimony of survivors of the resettlement program is shocking but not unfamiliar. The reports of brutality in the resettlement camps recall the forced evacuation of Phnom Penh and the resulting holocaust in Cambodia under Pol Pot. The logic of totalitarian regimes consolidating their power always presents the possibility that mass murder will be employed to solve inconvenient political problems.

We must be especially vigilant in monitoring the human rights situation in countries like Ethiopia. Ethiopia has muted criticism of itself by exploiting the humanitarian concern of other nations. By treating Ethiopia softly, it is argued, donor nations will have a better chance of getting relief supplies to the starving. The Mengistu regime has succeeded remarkably in getting other nations to impose a form of diplomatic selfcensorship. But indications of Pol Pot style resettlement camps clash with our humanitarian limits.

What we now need, obviously, is more information. I have, therefore, written Secretary of State Shultz requesting a report on the allegations. The survey by Cultural Survival was small, and more systematic debriefings of refugees and international relief workers are urgently needed. In the long history of 20th century mass murder, the world community has invariably ignored early warnings of ensuing disaster. The tragedies which already have befallen Ethiopia from the ravages of its government could, unbelievably, grow worse. I ask that the article be printed in the RECORD.

The article follows:

[From the Wall Street Journal, Oct. 1, 1985]

ETHIOPIA: AFRICA'S KILLING FIELDS

(By Robert D. Kaplan)

The Marxist regime in Ethiopia is in the process of moving 1.5 million peasants in the drought-affected north of the country to resettlement camps farther south. The plan has stirred much controversy, and there is deep concern in the West over the fate of the 400,000 who have already been "resettled." But restrictions on the movements of diplomats, journalists, and relief workers in Ethiopia have made it difficult to find out just what is happening.

Cultural Survival Inc., an independent, Harvard-based human-rights organization staffed mostly by Harvard professors, has just completed a study on Ethiopian resettlement. It is based on 82 separate interviews conducted at a refugee camp in the Damazin area of Eastern Sudan. Those interviewed represent various ethnic groups from the Ethiopian provinces of Tigre and Wollo, who after being "resettled" in the Asosa region of Western Ethiopia escaped by foot across the border.

Lest anyone doubt its credentials, Cultural Survival has conducted similar studies on endangered peoples in Asia, Latin America and elsewhere in Africa, and its reports have criticized left-wing and right-wing governments alike. A measure of its objectivity is that in another section of this study, the Tigrean rebels—who in fact want to topple the Marxist government—come in for serious criticism. Therefore, close attention should be paid to what the Harvard based group has to say about resettlement.

"DEVASTATING" FINDINGS

The director of research for Cultural Survival, Jason W. Clay, calls the soon-to-be-published document "devastating." The worst fears concerning resettlement are justified, as the document makes it difficult to avoid a comparison with Cambodia in the mid-1970s, when the Khmer Rouge "resettled" an entire nation. The inescapable conclusion, though not stated, is that Ethiopian ruler Mengistu Haile Mariam is an African equivalent of Pol Pot.

In the words of the draft version, "if even the most conservative estimates of the death rate are true, then 50,000 to 100,000 of those resettled in this massive program may already be dead." The death rates consistently reported by the escapees, of between 33 and 270 per 10,000 each day, are actually higher than those at the Sudanese camps at the height of the famine emergency early last winter. What makes these figures even more shocking is that most of those dying in Sudan last winter were children and old people—of which there are almost none in the resettlement program.

The Marxist regime has claimed that resettlement is voluntary, yet according to the report, "all those interviewed insisted that they had been captured by government troops and forced to resettle . . . 10% of all those interviewed reported that they witnessed people being killed who tried to escape." Some 86.9% said they had been separated from some, if not all, their family members.

According to the report, resettlement often occurred in the process of fighting between the regime and the Tigre Peoples Liberation Front. The army would surround a village, burn the crops, steal the animals and round people up. "Many of those captured for resettlement said they were held in regular prisons with common criminals or in military barracks until transport could be arranged. . . . people reported that as many as 20% of those captured at the same time from their village died in the holding camps even before beginning the trip." Relatives trying to bring food to those in holding areas were reportedly denied entry and beaten by soldiers.

Some of those destined for resettlement were held in proper feeding camps, accessible to Western journalists. But "only the meek, quiet people were allowed to see the journalists." Group leaders and known resisters were moved out of camp areas where journalists were permitted to roam. In one case an Ethiopian government official reportedly announed that "white guests are coming. . . . whether you speak positively or negatively we will translate positively to the journalists."

The Western press has already written about refugees bound for resettlement, being transported in the unpressurized cargo bays of Soviet Antonovs. The report makes no mention of the pressurization facilities. It does say that the Antonovs, "designed to carry 18 fully equipped paratroopers each," were packed with 340 people per trip. "Some interviewed even reported a white man [presumably a Russian] sitting above the door of the plane who used a prod to force more people on." Everyone interviewed insisted that people has died en route; 60% said they actually saw people die.

The end of the journey was one of 40 resettlement ambas ("areas") in the Asosa region, near the Sudanese border west of the capital of Addis Ababa. Those interviewed had experience in about 12 of these ambas. "Asosa was like being thrown into hell," said one escapee.

As the escapees related their stories, each amba contains about 7,000 people ruled by 14 "political cadres" and about 70 militia troops, all armed with either pistols, rifles or machine guns. The cadres are young people aspiring to membership in the Workers Party of Ethiopia, while the militia is composed of trusted settlers from previous periods. The cadres control the militia, who control everyone else.

The report states that "newly arrived colonists had to build huts for the cadre and militia: huts that were made of corrugated iron, not grass and bamboo like the huts for everyone else; the cadre and militia have their food provided from the nearest towns, and the settlers must carry water for them."

The militia apparently live in fear of the Marxist cadre. "In some cases, militia were beaten in front of the camp residents. . . . one escapee reported that three militia in his site had been accused of letting colonists escape. They were summarily hanged and then shot in the head. The militia took the examples to heart. As one escapee reported, the main job of the militia is to kick us. . . . beatings occurred, reportedly, when people urinated without permission or . . . if they slowed the rate of work in the fields."

People are expected to labor 11 hours per day for six-and-a-half days per week, according to the study. "Most of those interviewed complained about the food that they were given. Their typical comment was that the amount of corn or wheat that each person was given for a month was in fact only enough for five days or a week." Needless to say, housing, clothes and farming tools were said to be scarce and inadequate.

The escapees claimed that previous settlers were forced to give their entire harvest to the government, receiving only a small amount of maize in return. "Perhaps the government sees the crop as payment for the costs of transporting the colonists . . . from the colonists point of view, however, they simply work for free, as slaves."

Transport for resettlement is being provided by the Soviet Union and other Eastern bloc states. The utensils, oxen and some of the food on site is coming from indigenous inhabitants, whom the regime has forced to give up all they had. Food has also come from the World Food Program, though escapees claimed to have seen grain bags from Canada, the United Kingdom and West Germany.

THE KILLING FIELDS

On account of the most savage fighting in years in Northern Ethiopia, there are now

more candidates than ever for resettlement. Though the American press has ignored it, Col. Mengistu and his Soviet advisers have spent the past six months directing a major offsensive in Tigre and responding to a rebel offense in Eritrea. Two Ethiopian divisions were redeployed from the Ogaden desert, forcing rebels to evacuate the towns of Tessenei and Barentu in Eritrea, and Adi Abi in Tigre. Refugees from these regions have been streaming into Sudan to avoid being "resettled."

Though the regime's resettlement efforts have been slowed by the rainy season, dry weather now approaching means the process will start again in earnest. "The Killing Fields" is not just a movie about Cambodia—in Ethiopia it's a fact of life.●

COLORADO HIGHWAY C-470

● Mr. HART. Mr. President, on Thursday, September 26, my colleagues on the Senate Appropriations Subcommittee on Transportation, in a display of bipartisan cooperation, and with a recognition of the increased transportational needs of communities in the West, approved $25.5 million in Interstate Highway Transfer Program funds for Colorado Highway 470.

C-470 is the product of an effort that began nearly a generation ago, when the people of Denver and the surrounding area began to think creatively about the inevitable expansion of population and commercial activity in the southern Denver metropolitan area. Recognizing this area would soon become a major population center in the West, Government officials, business people and concerned citizens began to plan for the future transportation demands of the area. They conceived the C-470 project: Located in the southwestern corner of the Denver metropolitan area, to link Interstates 25 and 70, two of the West's most important transportational veins. The project was designed to improve and facilitate the movement of people and goods along Colorado's front range. A fully funded C-470 will, therefore, be an invaluable addition to the transportation system that serves one of our Nation's fastest growing regions.

Mr. President, it has been projected that the Metropolitan Denver area, an area that currently numbers nearly 1.3 million residents, will double in population and experience a dramatic increase in employed persons within the next 20 years. Development and traffic pressures in the southern and western portions of the metropolitan area have increased the need for a bypass parkway to reduce the pressure on the central Denver area. By making southwest Denver more accessible, C-470 will benefit commuters, tourists, and merchants throughout the Rocky Mountain West.

Mr. President, I wish to thank Senator ANDREWS, Senator CHILES, and all the members of the Subcommittee on Transportation Appropriations for their bipartisan recognition of the regional and national significance of Colorado's C-470 project. I think I speak for the entire Colorado congressional delegation, in thanking you for your efforts.

I also wish to recognize the leadership efforts of Gov. Richard D. Lamm, Mr. Joseph Dolan, executive director of the Colorado Department of Highways, and the personnel within the department who helped make the project a reality. In addition to the efforts of Members of Congress and State government, special thanks should also go to the local leadership of Denver, Jefferson, Arapahoe, and Douglas Counties. Finally, I wish to make special mention of the outstanding leadership by members of the C-470 Task Force, a bipartisan group of community and business leaders, who have conclusively demonstrated that cooperation between government and the private sector can lead to progress.

In conclusion, I urge the Senate Appropriations Committee and the full membership of the Senate to follow the lead of our colleagues on the Transportation Subcommittee and the House Appropriations Committee, in approving this very important project.●

ALOPECIA AREATA

● Mr. D'AMATO. Mr. President, I rise today in support of Senate Joint Resolution 208. This legislation, which I have cosponsored, recognizes one of the most tragic diseases of our time, alopecia areata.

Most individuals are unaware of the nature and effects of this mysterious disease. Hereditary factors play a role in the transmission of the disease, but it is not known if the disease has genetic origins. The most recent research links alopecia areata with the immunological system. Alopecia areata appears to be an autoimmune disorder, one in which the body mistakenly forms antibodies against some part of the hair follicle.

Consequently, victims of alopecia areata suffer significant loss of hair. Sometimes hair loss is total, yet loss of patches of hair on the scalp is also common. Younger individuals are most often affected by the disease.

The hair loss and growth cycle of an alopecia areata victim can continue for years. For a mild case of the disease, current treatments—such as cortisone injections or anthralin applications—cannot entirely stop hair loss. Instead, treatments tend to prod the hair follicle to produce normal hair again. Treatment has to be continued over a significant period of time until the condition stops. This can take months or even years.

Treatment of severe alopecia areata is much more difficult. Many victims opt to wear wigs, as treatment is often unreliable.

Experimentation with a new drug that stimulates hair growth, minoxidil, is taking place. If continued studies show that this treatment is safe and effective, minoxidil will provide an additional treatment choice for victims of this disease.

I am hopeful progress with the treatment of alopecia areata will bring beneficial and quick results. The victims of this disease experience significant emotional and physical stress, as do their families. This stress is especially disconcerting given that many of the victims are young children.

I commend my colleague, Senator COCHRAN, on bringing this disease to our attention. It is my hope that a broader awareness of alopecia areata will allow the citizens of this country to better deal with and address the concerns which surround this tragic disease.

Thank you, Mr. President.●

SCHOOL PRAYER

● Mr. SIMON. Mr. President, the Chicago Tribune is a newspaper whose politics sometimes is more conservative than mine, but it takes the Constitution of this country seriously.

Recently, they had an editorial which pointed out that it would be a mistake for this country to adopt a school prayer amendment to the Constitution.

I am inserting that editiorial in the RECORD, and I urge my colleagues to read their advice carefully. We should not be tinkering with the Constitution needlessly.

I ask that the Tribune editorial be inserted.

The editorial follows:

A SOFT-SPOKEN AMENDMENT

The Senate Judiciary Committee has approved, 12 to 6, a proposed school prayer amendment that is notable for its roominess; it is designed to accommodate absolutely everybody, regardless of religious belief or lack of it. The proposed amendment reads:

"Nothing in this Constitution shall be construed to prohibit individual or group silent prayer or reflection in public schools. Neither the United States nor any state shall require any person to participate in such prayer reflection, nor shall they encourage any particular form of prayer or reflection."

The proponents' goal is to neutralize the Supreme Court ruling last June that struck down, not prayer in school, but moments of silence that would encourage prayer. The constitutional change must be approved by two-thirds of both houses, then ratified by 38 states; the 2-to-1 margin in Judiciary indicates it will have a strong appeal.

The strength of this proposed amendment is that it looks so harmless. It does not urge or condemn and can offend no one. It is a shell of words surrounding a near-vacuum, and those who see dangers in it may not sound convincing.

Yet it is a turn away from the ideal, which is that government should have nothing to say on the subject of prayer or religion. To

take any official stand whatever on these matters is to single out some view about them as endorsed or preferred—the one with government's seal of approval. As Sen. Paul Simon observed, this amendment has no secular purpose; its aim is to safeguard one form of religious practice—in effect to promote religion. But has anyone shown that religion needs government support, or would benefit from it?

One distinction should be kept clear: Any member of government, from president to court clerk, has the unequestioned right to state his own religious views as often and loudly as he likes. It is only when religious views take on official status and sanction that they become worrisome—and that is not becaue they are religious, but because they are starting to look governmental.

Congress should resist the appeal of this softspoken amendment.●

DAVID HENRY ISOM, LIFELONG HOOSIER MARKS 100TH BIRTHDAY

● Mr. LUGAR. Mr. President, I would like to recognize Mr. David Henry Isom, a native Hoosier from the city of Washington, IN, who will celebrate his 100th birthday on October 29, 1985.

David Henry Isom was born in 1885, the son of Ervin and Melinda Isom in Spice Valley Township, Lawrence County, IN. His father, Ervin Isom was a proud farmer in Lawrence County and he contributed greatly to the burgeoning railroad industry by spending a major portion of his time cutting and providing firewood to fuel the engines of the Baltimore & Ohio Railroad. At an early age, David Henry learned the importance of the railroad by the example set by his father's actions.

David Henry Isom moved to Davies County, IN, in 1915, and a year later married the former Laura Edna Nichols who remained his wife, friend, and partner in life until her untimely passing in 1966. Mr. Isom worked proudly for the Baltimore & Ohio Railroad until his retirement after 45 years of employment. Demonstrating a tradition consistent with Indiana's Hoosier heritage, Mr. Isom provided an honest day's work for an honest day's pay working his way up from the wages of that day of 35½ cents per hour to $2.16 per hour in 1966.

David Henry Isom is a bright, intelligent, and loyal Indiana citizen who proudly exemplifies our State's character and personality. He spends his spare time enjoying his favorite sport of fishing and with the aid of a cane purchased at the 1934 World's Fair maintains regular weekly attendance at the Second Baptist Church of Washington, IN, where he serves as both a deacon and trustee.

I am sure that I speak for the rest of my colleagues in the 99th Congress of the United States in wishing Mr. Isom a warm congratulations as he celebrates this significant milestone of his 100th birthday and joins an elite group of our Nation's citizens.●

ON NOBEL LAUREATE FRANCO MODIGLIANI

● Mr. MOYNIHAN. Mr. President, for the 13th time in 17 years, an American has won or shared the Nobel Prize in Economics. This year's distinguished recipient is Franco Modigliani, a professor at the Massachusetts Institute of Technology.

The winning of a Nobel Prize by an American is always a welcome occasion, and Professor Modigliani's honor is to be cheered. However, even at this happy time, this revered academic has used an euphoria occasion to send a sobering economic messsage that we ignore at peril.

This morning's Toronto Globe and Mail carries a story by the Reuter news agency in which Professor Modigliani says that our Federal budget deficits have created:

• • • A tragedy much greater than I had expected. The longer this lasts, the poorer the future generations will be. The Government deficit is a disastrous policy which is going to be very costly—not to me because I am old, but to you who are very, very young.

Mr. President, our newest Nobel laureate has spoken wisely of the need to cut these ruinous budget deficits. Will he be heeded? I ask that articles about Professor Modigliani's well-deserved award be included in the RECORD. The material follows:

[From the Toronto Globe & Mail, Oct. 16, 1985]

DUBS DEFICIT "A TRAGEDY"—NOBEL LAUREATE CRITICIZES REAGAN

CAMBRIDGE, MASS.—The winner of the 1985 Nobel Prize for Economics criticized President Ronald Reagan's economic policies sharply yesterday and said massive federal budget deficits mean disaster for future generations.

Economist Franco Modigliani, a professor at the Massachusetts Institute of Technology, called the U.S. deficit and its impact on the world "a tragedy much greater than I had expected.

"The longer this lasts, the poorer the future generations will be," he told a press conference. "The Government deficit is a disastrous policy which is going to be very costly—not to me because I am old, but to you who are very, very young."

The spry, 67-year-old professor, who was born in Italy and became a U.S. citizen in 1939, leavened his somber remarks with humor, joking and laughing with reporters and obviously enjoying the spotlight.

He was joined at the press conference by economist Paul Samuelson, another MIT professor and Nobel economics laureate. The two drank a champagne toast.

Prof. Modigliani said he was awakened at 7 a.m. yesterday by a telephone call from the Royal Swedish Academy of Sciences informing him of his selection by the Nobel Committee. "The best alarm clock I've had in a long time," he said.

He said that in his own household, his wife Serena makes all the major financial decisions.

"Frequently she lets me make my own, and I often wish she had made mine, too," he said.

Prof. Modigliani said he was puzzled that Mr. Reagan originally campaigned for the U.S. presidency on the platform of a balanced budget but once elected, failed to come to grips with the deficit problem.

He said that, in the interests of a balanced budget, the U.S. Administration could cut military spending and "some fat" from other budget areas. "If there is nothing you can cut, then you must raise taxes," he added.

The Administration "stumbled into" a solution to the recently ended recession by employing Keynesian, rather than supply-side economic policies, he said.

Prof. Modigliani is known for two economic theorems: one concerns individuals' and nations' habits in putting money into savings; the other deals with corporate financing.

Prof. Modigliani is a consultant to the U.S. Treasury, the Federal Reserve Board, the Bank of Italy and the Bank of Spain; honorary president of the International Economic Association; and a member of the American Academy of Arts and Sciences and the National Academy of Sciences.

[From the New York Times, Oct. 16, 1985]

A PROFESSOR AT M.I.T. WINS NOBEL IN ECONOMICS FOR WORK ON SAVING

(By Steve Lohr)

STOCKHOLM.—Franco Modigliani, a 67-year-old professor at the Massachusetts Institute of Technology, today won the Nobel Memorial Prize in Economic Science for his pioneering work in analyzing the behavior of household savers and the functioning of financial markets.

The five-member selection committee drew particular attention to the practical applications of Mr. Modigliani's work. His analysis of savings, they said, has been "extremely important" in determining the effect of different types of national pension programs. Moreover, Mr. Modigliani's work in the area of financial markets, they noted, has helped lay the foundation for the entire field of corporate finance.

13TH AMERICAN TO WIN HONOR

Mr. Modigliani was born in Rome in 1918. He earned a doctorate in law at the University of Rome in 1939. The next year he and his wife moved to the United States to escape the Mussolini regime. Mr. Modigliani added a doctorate in social science at the New School for Social Research in New York City in 1944. He is now an American citizen.

The selection of Mr. Modigliani is the 13th time since the Nobel economics prize was awarded in 1969 that an American has won or shared it. He is also the second M.I.T. economics professor to be chosen; Paul A. Samuelson won the prize in 1970. The prize carries a cash award of 1.8 million Swedish kronor, worth about $225,000.

In his work with financial markets, Mr. Modigliani analyzed the effect of any company's financial structure on the stock market's view of its value. He and an associate, Merton Miller, concluded that the market value of a company had no genuine relationship to the size and structure of its debt. Instead, they found, stock market values are determined mainly by what enterprises are expected to earn in the future.

Today the notion that investors focus on the future and that profitability is a paramount consideration, with less attention paid to the kind of financing required to achieve high profits, is conventional wisdom in business schools, corporate board rooms and on Wall Street. But that was not the

case in 1958, when the Modigliani-Miller findings were presented.

At first, the theory was considered to be somehow mistaken, said Assar Lindbeck, a professor at the University of Stockholm and a member of the Nobel selection committee. As years of accumulating evidence in the marketplace supported the theory, however, it became regarded as self-evident.

"That is the true test of a brilliant theory," Mr. Lindbeck said. "What first is thought to be wrong is later shown to be obvious."

Furthermore, the methods employed by Mr. Modigliani in the late 1950's for determining corporate values are, in refined form, used commonly today in business by everyone from executives plotting long-range strategy to corporate raiders looking for acquisition candidates. A key technique in Mr. Modigliani's 1958 analysis—a technique routinely used today—was figuring the value of expected future earnings.

"His work in the late 50's provided the basis for modern corporate finance," said Karl-Goran Maler, a professor at the Stockholm School of Economics and another member of the selection committee.

Mr. Modigliani's basic research in savings, called the life-cycle theory, was published in 1954. Like his work in financial markets, the savings theory was built on previous research but differed in significant ways. Mr. Modigliani was helped in his savings research by Richard Brumberg, a student of his who died several years later.

The life-cycle theory explains household savings by linking it to individual behavior economic growth and demography. The theory holds that people save for their retirement—but only for their own old age and not for their descendants.

BUILDING UP WEALTH IN YOUTH

Accordingly, people and societies tend to build up a stock of wealth in youth that is consumed during old age. This helps explain why younger populations with a relatively long life expectancy generally have higher rates of saving than older populations. Accordingly to the life-cycle theory, an increase in the rate of economic growth entails a redistribution of income in favor of younger generations.

Mr. Modigliani's life-cycle work amplified research on savings done by the economists John Maynard Keynes, Simon Kuznets and Milton Friedman.

The Modigliani theory that people save only for their own retirement, Professor Lindbeck said, seems to be confirmed by a trend in Sweden. Over the last few decades, Sweden has established a comprehensive pension program financed by the Government. And since the 1960's the household savings rate in Sweden, as a percentage of disposable income, has gone from 7 percent to zero, according to Mr. Lindbeck. When Swedes no longer had to save for their old age, they no longer saved at all.

POLICY LEFT TO GOVERNMENTS

Mr. Modigliani's theory does not deal with the larger question of whether societies are better served if the state taxes individuals and provides them with pensions or if individuals save for their own retirement.

"It is a theory, so it does not tell you what to do," said Ragnar Bentzel, a professor at Sweden's University of Uppsala and a member of the Nobel selection committee. "Policy is up to the governments to decide."

The economics prize was established in 1968 as a memorial to Alfred Nobel, the Swede who invented dynamite, by the Swedish central bank to mark its 300th birthday, and was first awarded the following year.

Mr. Modigliani will receive a diploma and medal, along with the cash award, which is financed by the central bank. The Nobel prizes in physics, chemistry, medicine, literature and peace were established under the terms of Mr. Nobel's will and are financed from his legacy.

[From the New York Times, Oct. 16, 1985]

TRAILBLAZER AND TEAM PLAYER—FRANCO MODIGLIANI

(By Eric N. Berg)

The choice of Franco Modigliani as winner of the Nobel Memorial Prize in Economic Science is a popular one among economists, a tribe often given to highly refined and sometimes vocal dispute. Yesterday congratulatory telephone calls and laudatory telegrams poured into his office at the Massachusetts Institute of Technology.

"Economists all over the world are students, admirers and friends of Franco Modigliani," said Paul A. Samuelson of M.I.T., himself a Nobel laureate.

Like previous winners of the award, Professor Modigliani (pronounced "mo-deel YAH nee") is considered a consummate academic and an intellectual pathfinder. But unlike some others, whose work was either obscure or accessible only to specialists, his ideas have shaped generations of students.

"If you took finance at business school, if you studied economics, or if you studied corporations in law school, chances are you will have heard of Franco's propositions," said Eugene Flood, professor of finance at the Stanford Business School. He studied in graduate school under Professor Modigliani.

"His instincts are good, and he just throws off ideas," said Robert M. Solow, another economics colleague at M.I.T. "He is also happy to work with students."

Professor Modigliani is part of a small group of economists and finance professors at M.I.T. who together have contributed vital research over the last 20 years. Others in the group include Professor Solow, a specialist in macroeconomics, and Charles P. Kindleberger, a professor emeritus whose expertise is in international economics.

Professors Modigliani and Kindleberger are on the faculty of the Alfred P. Sloan School of Management at M.I.T.

The new Nobel laureate, a small, bouncy man with silver hair, fulfills the popular image of a professor. "His hair is usually in disarry, and his clothes are always out of control," an acquaintance said. "He is forgetful, and his office is stacked with books, articles and journals."

Associates describe Professor Modigliani as a man who quickly grasps complex issues and cuts to their core, pinpointing the assumptions upon which an academic argument is made. Professor Flood tells how, as one of Professor Modigliani's doctoral students in 1980, he visited his office to have a paper critiqued, one that had been submitted earlier to other scholars. "Right off the top of his head, Franco came up with such intricate and interesting and insightful comments," Professor Flood said. "They were a level above what other people had offered."

VIEWPOINT OF COLLEAGUES

For all that, his colleagues describe Professor Modigliani as a team player, someone who shows no hesitation about working in a group or sharing research ideas.

"There is something about him that lowers the feeling of anxiety," commented Robert L. Heilbroner, the economic historian.

Although Professor Modigliani won the 1985 Nobel award alone, his theory that individuals save heavily when their income is highest so as to smooth consumption throughout life was co-authored with a student, Richard Brumberg, who has since died. Similarly, the Modigliani theory on corporate finance, which stated that a company could not affect its market value by altering the percentage of shares or bonds in its balance sheet, was written with Merton Miller of the University of Chicago.

Franco Modigliani (he has no middle name) was born June 18, 1918, in Rome. His father was a physician, and his mother was a volunteer in social service organizations.

As a young man, he was urged to study medicine, but instead he chose law. Entering a nationwide essay contest on the topic of price controls, he won first prize and was urged by the judges to consider a career in economics. He began studying economics on his own.

Mr. Modigliani, a Jew, fled Italy and its Fascist regime at the outset of World War II. Arriving in New York City with his wife, Serena, they settled in an apartment on Central Park West. Two sons were born to them in this country—Andre, now a professor of social psychology at the University of Michigan, and Sergio, an architect in Brookline, Mass.

Soon after arriving here in 1940, Mr. Modigliani enrolled at the New School for Social Research in Manhattan, then a mecca for refugee intellectuals from Europe.

At the New School, he met Jacob Marschak, a leading macroeconomist. He studied under Professor Marschak. To this day, Professor Modigliani calls Professor Marschak one of the most important influences in his intellectual development.

"I recognized him as my most important teacher," Professor Modigliani said in a recent interview for a book on economists. "We were warm friends, and I loved him very dearly."

It was Professor Marschak, in fact, who got Professor Modigliani his first teaching job after receiving his Ph.D. from the New School. The job was at the New Jersey College for Women.

After one year of teaching there, Professor Modigliani spent three years on the facility of Bard College of Columbia University.

AT M.I.T. FOR PAST 23 YEARS

He then returned to the New School, where he taught six years, spent one year each at the University of Chicago and the University of Illinois and eight years at the Carnegie-Mellon University in Pittsburgh.

In 1962 he joined M.I.T. where he has been ever since. He now holds joint appointments to the departments of finance and economics and holds the title of institute professor at M.I.T.

WINNERS OF THE NOBEL MEMORIAL PRIZE FOR ECONOMICS IN THE 1980'S

1985: Franco Modigliani (United States), for his analysis of the behavior of household savers and for his work on the relationship of a company's financial structure to the value placed on its stock by investors.

1984: Sir Richard Stone (Britain), for his work in developing an accounting system that is used to monitor national economies, track trends in national development and compare one nation's economic workings with another's.

1983: Gerard Debreu (United States), for his mathematical analysis of supply and demand, showing how prices operate to balance what producers supply with what buyers want.

1982: George J. Stigler (United States), for his studies of industrial structures, the functioning of markets, and the effects of public regulation on economic activity.

1981: James Tobin (United States), for his work on the analysis of financial markets and their effect on how businesses and individuals spend and save their money.

1980: Lawrence W. Klein (United States), for his work on econometric models and the application of those models to the analysis of economic policies and fluctuations in the business cycle.

MIT'S MODIGLIANI WINS NOBEL

(By John M. Berry)

Franco Modigliani, an ebullient professor at the Massachusetts Institute of Technology, yesterday was awarded the Nobel Prize in economics for work on how people save and consume over their lifetimes and on how corporate assets should be valued.

Modigliani is among the most highly respected economists in the United States, both because of the seminal nature of his research and its extraordinarily wide scope. In addition to the work cited by the Nobel Committee, he is well known for his analysis of the role of money in the economy and as one of the creators of the short-term mathematical model used by the Federal Reserve for forecasting and analyzing the economy.

"I'm very, very pleased . . . that my work has been recognized. This is a nice way to crown my career," Modigliani said. "I will use [the prize money] in accordance with my own theories of how people behave—namely, distribute it over the rest of my life. I'm not going to go on a binge. I will use it gradually. That's what my theory says people do."

Modigliani, 67, was born in Rome and became a U.S. citizen in 1946. He still has close ties with Italy, and many of his articles have been written in Italian. Some of his research has focused on the Italian economy as well.

Some other prominent economists praised the Royal Swedish Academy's selection. James Tobin of Yale, one of the dozen American Nobel laureates in economics chosen since the award was begun in 1969, reacted with "jubilation. I am only wondering why it took them so long," Tobin declared.

Tobin described Modigliani as "a very versatile guy" whose work stretches back to the World War II period, when he wrote the first formal theoretical analysis that incorporated monetary factors into the theories of Lord Maynard Keynes on which so much of modern economic analysis has been based.

In the 1950s, Modigliani turned his attention to the issues of saving and consumption because, he said yesterday, "saving plays a very important role in economic life because it is what permits investment and capital formation, which is in turn what is behind growth and well-being.

"I have been studying why people accumulate or don't, and I have a view that is quite different from what used to be believed before," Modigliani said. "It is related to the notion that the major reason why people save is for retirement or for major expenditure."

The so-called life-cycle hypothesis, developed with the assistance of a student, the late Richard Brumberg, holds that individuals accumulate savings primarily in anticipation of retirement needs. Since its publication in 1954, the theory has been used as the theoretical basis for the study of pension and retirement systems, the Royal Swedish Academy said.

"In particular, it has proved an ideal tool for analyses of the effects of different pension systems," the academy said, "Most of these analyses have indicated that the introduction of a general pension system leads to a decline in private saving."

The validity of the life-cycle theory has been challenged in recent years by economists such as Lawrence Summers of Harvard, partly on the difficult analytical issue of bequests of wealth not consumed during an individual's lifetime. Nevertheless, said Tobin, Modigliani's theoretical and empirical work on the subject has served as a point of departure for a great deal of additional research. "There has been a lot of discussion, but Franco is coming out pretty well," Tobin said.

Modigliani's other work for which he was honored was published in 1958 with Merton Miller of the University of Chicago. Together they proved what is known as the Modigliani-Miller theorem, which states that the value of a corporation is not dependent on the relative amounts of debt and equity used to finance it. Instead, it is the value of the underlying assets themselves, as shown by the market value of the company's shares.

Prior to that work, "people had used crude measures" that produced erroneous results in looking at how corporate assets should be valued, said Allan H. Meltzer of Carnegie-Mellon University, where Modigliani was teaching when the theorem's proof was published. Meltzer called the theorem "one of two main forces in the modern theory of finance," at least from the point of view of economics. The work in asset-price theory for which Tobin received his prize is the other, Meltzer said.

Modigliani's work "explains what we see and helps us understand the world," Prof. Assar Lindbeck, a member of the prize committee, said after the award was announced.

The Modigliani-Miller theorem has had important implications for the theory of investment decisions, the academy said, and represents "a decisive breakthrough for the theory of corporate finance."

The announcement marked the 13th time in 17 years that an American has won or shared the prize, known as the Alfred Nobel Memorial Prize in Economics. It was established in 1969 by Sweden's central bank, the Riksbank. The other Nobel prizes were begun in 1895 under terms of the will of Nobel, the inventor of dynamite.

Among other American winners was Milton Friedman, widely known for his work linking changes in the money supply to changes in the economy. Friedman was honored for his "permanent-income" hypothesis, which holds that consumption in an economy does not respond completely to short-term fluctuations in income. In many ways, Friedman's permanent income hypothesis represents a sort of averaging across an entire economy of the individual life-cycle behavior described by Modigliani.

Modigliani was born in Rome in 1918. He received a doctorate in jurisprudence from the University of Rome in 1939 and a doctorate in social science from the New School for Social Research in New York in 1944, and holds a half-dozen honorary degrees. He came to the United States in 1939 with his wife after fleeing the fascist regime of Benito Mussolini.

All the awards, including the memorial economics prize, carry a cash award this year set at 1.8 million Swedish kronor, about $225,000. It currently is tax free, but the Reagan administration's tax reform plan would make such awards taxable beginning next year.●

UNITED STATES LAWYERS IN JAPAN

● Mr. INOUYE. Mr. President, the recent visit of the Japanese Liberal Democratic Party delegation has brought to mind an issue which should be raised in conjunction with other important trade policy goals of the United States—gaining access for American lawyers in Japan. Currently, manufacturing and service industries attempting to penetrate Japanese markets must rely heavily on seven American attorneys resident in Japan for advice on legal procedures and administrative practices concerning market penetration. This is hardly an adequate number, and unless additional American lawyers are allowed to practice in Japan, vital legal assistance to American marketing efforts will cease.

Primary service industries, such as commercial banking, investment banking, and insurance, rely heavily on secondary service industries such as law services, accounting services, and consulting. Without a sufficient base of secondary support services, Japan cannot become an international financial center. In New York and London, law services are available in the form of 1,000 to 2,000 practitioners well versed in international financial documentation. The above 7 American lawyers and some 200 Japanese practioners of varying skills—who are heavily dependent on their American trainees—are not a legal population adequate to permit creation of a Tokyo financial center, an important policy goal of the United States Government.

The broader policy aspects of this issue are background to existing discrimination against American attorneys in violation of Japanese treaty obligations. First, in the absence of clear Japanese legal authority for United States lawyers and United States law firms to render legal services regarding non-Japanese matters, it is not possible for either individual practitioners or law firms to hold themselves out to the public in their own names—either individual or firm—as qualified consultants on foreign legal matters. Rather, United States attorneys may only become trainees subject to the supervision of Japanese law firms. This limitation to trainee status has had the commercial result of substantially inhibiting the capacity of United States lawyers to

advise United States and other non-Japanese corporations regarding incoming investments and trade in Japan or to advise Japanese companies on outgoing investments and trade.

This limitation has also contributed to a lack of experienced legal expertise in Tokyo necessary to document transactions leading to the internationalization of the yen.

If Americans are permitted to serve as market access facilitators in the role of foreign legal consultants, they will not be invading the traditional or legitimate prerogatives of Japanese lawyers, or Bengoshi. It will not be necessary for Americans to be permitted as individuals, to appear in Japanese courts. It will not be necessary for American lawyers to appear in Japanese courts, or advise on Japanese law.

It will, on the other hand, require American lawyers to be permitted, as firms, to appear in Japanese courts in the person of their locally qualified Japanese partners and employees. It will require Americans to be permitted as firms, to advise on Japanese law through their locally qualified Japanese partners and employees. It will require Americans to be permitted, as individuals, to represent their client in routine appearances before Japanese Government agencies with the exception of certain formal administrative appeal proceedings which are reserved to Japanese Bengoshi.

Mr. President, the current restrictions against American attorneys wishing to gain access to Japan have been imposed by the Japanese Bar Association ("Nichibenren") based on that organization's narrow and presumably self-interested interpretation of the current law governing Japanese lawyers. These inhibitions have been imposed through the rules of practice created by Nichibenren and tacitly approved by the Ministry of Justice.

The history of Nichibenren's behavior strongly suggests that it is only by placing foreign lawyers under the jurisdiction and supervision of the appropriate government agency—the Ministry of Justice—rather than Nichibenren that foreign lawyers will have an opportunity to take advantage of the rights given to them through amendment of the Bengoshi law.

The Nichibenren has not merely opposed liberalization, but has actively harassed all of the foreign law firms that have attempted to establish presences in Tokyo through cooperative arrangements with Japanese law firms. Now that the Japanese Government has made it clear that some sort of liberalization will have to take place to satisfy American and other foreign pressure, Nichibenren is insisting that it should be permitted to draft the liberalization plan, even though it is precisely the group that has opposed all attempts at liberalization in the past.

Thus far, the Japanese Government has apparently acquiesced since there has been no indication that it is drafting a liberalization plan on its own. The Japan Times of August 29, 1985 reports that Nichibenren will finalize its proposed "liberalization" plan by October 22 and present it to the Diet to be convened in December.

Clarification of the status of United States lawyers in Japan must include the right to United States lawyers and Japanese lawyers to associate; that is, practice together. Such associations, offering both Japanese and non-Japanese legal assistance under one roof or, in this case, in one office, is the most likely combination of legal services which will facilitate expanded investment and other forms of doing business in Japan by non-Japanese corporations.

If the Japanese Government is sincere about its desire for the expansion of such business activity, GOJ support for such association may be one of the most significant steps which the government can take to achieve that end. Substantial precedent already exists because Japanese Bengoshi can and do associate with non-Bengoshi who are specialists in such areas as tax law and patent law.

The need for the Japanese Government to take an active role in this issue is further illustrated by the fact that the Nichibenren proposal would make it impossible for United States law firms to use their own name—a rather blatant form of shortsighted discrimination.

The only explanation can be the desire of some in the Nichibenren to prevent the availability and expertise of foreign law consultants from becoming known and respected in the Japanese business community.

Finally, the Nichibenren proposal would make the opportunity for United States lawyers to practice in Japan as foreign legal consultants conditional on reciprocity in the United States. The latest Japanese proposal defines reciprocity as the enactment of foreign law statutes in a "considerable number of the main States" of the United States. This is no more than an excuse for delay. New York, where most of the Japanese lawyers in the United States are already located has in place a foreign legal consultant statute. Other significant commercial States are now considering similar statutes.

The Nichibenren proposal would codify the jurisdiction of Nichibenren over foreign lawyers. This is unacceptable for the reasons previously described. The Ministry of Justice or some other objective government body must have responsibility in this area.

Introduction of the law clarifying the status of foreign lawyers in the manner described above must be done through the introduction in the Diet of a government-sponsored bill to amend the Bengoshi law. In the Japanese system, the percentage of government-sponsored bills approved by the Diet is much higher than the percentage of private-sponsored bills. Nichibenren now plans on introduction of an amendment by a "private member." If the Japanese Government means to take command of this issue as it should do, it will so indicate by introducing the appropriate legislation itself.●

NATIONAL TEMPORARY SERVICES WEEK

● Mr. D'AMATO. Mr. President, I am pleased to rise today as a cosponsor of a resolution introduced by my distinguished colleague from Wisconsin to designate October 20, 1985, through October 26, 1985, as "National Temporary Services Week."

The temporary help services industry has added a significant dimension to our economy. It has provided important job opportunities for senior citizens, the handicapped, housewives, and students. In 1984, more than 5 million workers earned 6 billion payroll dollars working in an average of 600,000 temporary jobs each week. In my own State of New York, there are approximately 500 businesses that provide temporary employee services.

Temporary services is one of the fastest growing industries in the United States and provides a valuable service to both the small entrepreneur and the multinational corporation.

Mr. President, I urge speedy adoption of this resolution.●

TIME TO FORGIVE AIR CONTROLLERS

● Mr. SIMON. Mr. President, Transportation Secretary Elizabeth Dole has indicated the Federal Aviation Administration will soon hire approximately 1,000 air traffic controllers. This decision likely was prompted—at least in part—by increased public concern about air traffic safety and the recent rash of accidents and near misses. While no one can fault the dedication and professionalism of the many air traffic controllers who have continued to provide as safe an air transportation system as possible since the 1981 strike, it is clear we face a challenge to make flying even safer. In a column I write for newspapers in my State, I suggest the answer lies with many of the qualified controllers fired by President Reagan. I ask that it be printed in the RECORD.

The column follows:

TIME TO FORGIVE AIR CONTROLLERS

(By Senator Paul Simon)

About a dozen members of the United States Senate were on a plane flying to St.

Louis for a dinner honoring the retiring Missouri senator, Tom Eagleton.

Those aboard included Senator Paul Laxalt of Nevada, Republican national chairman; Ted Stevens, one of the Republican Senate leaders; and Democratic Senators Bill Bradley, Dale Bumpers, Alan Dixon and myself.

As our plane approached the runway in St. Louis, another plane pulled in ahead of us and our plane was forced to suddenly switch from a near-ground descent to climbing back into the air.

Someone made a mistake that easily could have led to disaster.

Who made the mistake I do not know.

But it underscores a question that many have been asking as a result of a number of airline diasters and near-disasters recently: Do we have enough experienced, well-trained controllers on the job?

That question is being asked not only by those who travel the airlines regularly, it is being asked by airline officials and people high in the current administration.

The air safety chairman for the Air Line Pilots Association said on October 1: "The system has some 5,000 fewer fully qualified controllers than before the strike and the experience level is lower * * * this obviously increases the margin for error and reduces the level of safety."

On August 3, 1981, President Reagan announced the striking air controllers would be fired. While more could have been done to acknowledge and address the controllers' valid concerns about working conditions, once the strike took place the President made the right decision to fire them. We cannot tolerate strikes against the federal government.

But now four years have passed. The fired air controllers have lost a great deal in pay and retirement benefits. If there is a real need, and if they were to be rehired, no one would get the idea that you could go on strike against the federal government and it would go unpunished.

No one can believe that losing four years of pay and substantial retirement benefits is a small punishment.

Is there precedent for this?

Not exactly because we have never faced precisely this type of situation before.

But after a period of years, we have forgiven those who evaded the draft. What the air controllers did was a violation of the law, but they have paid more heavily than if the maximum possible fine had been levied against them.

If we can save lives and make air travel safer by taking back some of the experienced air controllers—after careful screening—wouldn't it make sense to do that?

THEIR IDEALISM UNDIMINISHED, STUDENTS WAIT FOR THE CALL

● Mr. HART. Mr. President, there are growing signs across this country that student activism and idealism remain undiminished. In sharp contrast to the belief this generation has lost its commitment or compassion, students are working on campuses and in their communities as volunteers. They understand that the opportunity of being an American also carries obligations. They are fulfilling these responsibilities distributing food to the hungry, helping elderly citizens and the homeless, and sharing their time with children in neighborhoods where there is need.

Although this resurgence in voluntary action by students is unrecognized in Washington, 75 college presidents have formed a coalition to cultivate and organize their disparate efforts. They have established a network to match students seeking volunteer work with agencies that need help. In an article published in the New York Times, Fox Butterfield chronicles the development of what could be called "grassroots national service."

These efforts are totally consistent with the values of idealism and service Americans have always held. Many in my generation committed our lives to public service and public office. Why? It was not because of a President who said government cannot do anything right. It wasn't because an ethos prevailed telling us to get ours while the getting was good. It was because of a President who told us what we could do for our country. That call was patriotic; it was idealistic, and it was right.

We must encourage this spirit of voluntarism by moving toward a system of national service. Congressman ROBERT TORRICELLI and I have introduced legislation to create a "Select Commission on National Service Opportunities." The legislation is designed to focus attention on programs like that started by the college presidents and recommend ways to institute a national service system to tap the idealism of America's young people. As the Times article demonstrates, the young people of this country have not rejected the call to service; the call has not been sounded.

I ask that the article be printed in the RECORD.

The article follows:

[From the New York Times, Oct. 17, 1985]

UNIVERSITIES TAKE LEAD IN NEW VOLUNTEER EFFORTS

(By Fox Butterfield)

CAMBRIDGE, MASS., Oct. 16.—Amid signs that a growing number of college students are quietly volunteering for public service jobs, a group of 75 university presidents today announced the creation of a major program to support student participation in community activities.

The project, co-sponsored by the presidents of Brown, Georgetown and Stanford Universities, will establish a campus network to match students seeking volunteer work with agencies that need help.

College officials and faculty around the country say they have noted a surge in student interest in volunteering, although educators at some large state and city colleges caution that many of their students must work to help pay for their schooling and have little time for volunteer service.

HARVARD CHARTS A RISE

There are no national statistics available. At Harvard, however, since school administrators began to chart the trend three years ago, the number of graduating seniors who have devoted time to community service has risen from 35 percent to 51 percent of the class.

Vanderbilt University in Nashville has recently developed two programs in which students assist in providing physical checkups an do environmental health studies for poor communities in Appalachia. At the University of California at Berkeley, a group of 9 sororities and 27 fraternities recently enrolled 1,000 members to spend at least one hour a week tutoring children or supervising afterhours activities in Berkeley's public schools.

"I could have stood on the steps of Sproul Hall a few years ago shouting into a microphone and nobody would have listened," said Martha Jones, a Berkeley graduate who started the program. "But these students are so enthusiastic. Who's projecting that these kids are selfish?"

In a statement about the new project announced today, the Project for Public and Community Service, the 75 college presidents acknowledged: "Over the last decade the interest of college students in their obligations to society appears to have diminished. More and more of them have become preoccupied with personal goals and career aspirations.'"

Schools that "overstress vocationalism and understress the responsibilities of citizenship" have reinforced these attitudes, the presidents said.

But Howard Swearer, the president of Brown, where the new project will have its headquarters, added, "There have been recent signs that there are more students willing to take advantage of public service opportunities if they are presented with opportunities to do so."

That perception has been challenged by some educators. David Burns, an assistant vice president at Rutgers University, said he was skeptical about whether there was a real rise in student community activity. "I think things tend to increase when you pay attention to them," he said, citing increased concern about alcoholism and sexual harassment on campus.

But Robert Coles, a professor of psychiatry at Harvard who is known for his work with the poor, says, "I think we've bottomed out of that period of narcissism and indifference to moral issues."

REACTION TO THE TIMES

Mr. Coles attributed the new interest in public service in part to a reaction by naturally idealistic young people against the "getting-rich-is-good ethos of the Reagan Administration."

At Columbia University, the Rev. William Starr, the Episcopal chaplain, said that in contrast to the student political activism of the 1960's, which sought radical change, "students today are working within the system" as part of "a people-to-people approach to human needs."

But Mr. Starr, who worked with the movement opposing the Vietnam War, has doubts about how effective the new activism might be. "I don't have much optimism right now," he said. "The Government uses volunteerism as an excuse to substitute volunteers for resources. I think of it as a little like charity.

"I think students are learning a lot as volunteers, but there's frustration in the soup kitchens," he added. "Volunteerism doesn't address why so many people are hungry."

The trend coincides with the efforts by educators and politicians to introduce a national program of public service or find other ways of encouraging volunteerism. Last month testimony by Mayor Koch and

Senator Gary Hart, Democrat of Colorado, was submitted to a subcommittee of the House Education and Labor Committee on two bills that would study and finance a national service program.

Last year, Mr. Koch established a New York City Volunteer Corps in which about 50 teen-agers were paid small stipends to work for a year at such tasks as distributing food to the homebound, helping the elderly and staffing shelters for the homeless.

The City of Atlanta last year started a more far-reaching program in which all high school students are required to do 75 hours of volunteer service before graduation, working in places like day care centers or the parks department.

In September a report by the Carnegie Foundation for the Advancement of Teaching suggested creating a new Federal aid program under which students would receive scholarships in return for community service.

The author of the report, Frank Newman, president of the Education Commission of the States, said such a program would better prepare students for civic responsibility and lessen the growing burden of student loans, which has driven many undergraduates to choose careers on the basis of money. The commission will help run the new project outlined today.

In a recent interview, Mr. Newman said he was particularly struck that, unlike the 1960's, when President Kennedy's appeals to American idealism led many young people to enroll in programs like the Peace Corps, the recent revival of interest in public service has come without "any call at all."

But Mr. Newman said that support by some college administrators had been an important catalyst.

OUTREACH PROGRAM AT BROWN

For example, Mr. Swearer of Brown University, obtained a $2 million endowment for fellowships to undergraduates who spend a year away from school in public service. Mr. Swearer, who headed an early Peace Corps training program, has also provided an office and telephone for the Brown Community Outreach Program, the student public service organization, which has become the largest undergraduate group, with 1,000 members.

At Connecticut College, officials recently gave the school's public service program, the Office of Volunteers for Community Service, a new office in the college chapel and hired a professional director for it. Herbert Atherton, dean of the college, said he expected the program to grow over the next five years, but he cautioned that many students suffered from "career anxiety" and were not as "high-minded" as those of the late 1960's.

At Harvard, Derek Bok, the university's president, used $1 million from a special fund to finance a program that pairs each of Harvard's residential houses with a Cambridge neighborhood for volunteer work.

Although the university has organized some volunteer programs, Mr. Bok stresses, "The real initiative and most imagination come from the students."

He cited Wayne Meisel, who graduated from Harvard in 1982 and has become a kind of Johnny Appleseed of the movement, once walking for five months from Colby College in Waterville, Me., to Washington , visiting 70 colleges along the way, to proselytize his gospel of public service.

It was Mr. Meisel who started the program linking residential houses to Cambridge neighborhoods after he was cut from the college soccer team and found that Cambridge had no youth soccer league in which he might coach. In hopes of finding 30 other students to help him coach and referee, he sat in front of his dining hall for a day to enlist them and was overwhelmed by the response: 150 volunteers.

"Until then I had believed in the image that young people didn't care," Mr. Meisel recalled. "What I found was that students hadn't lost their idealism but had gotten caught up in what's around them, the fast-track environment of making money. What they needed was some leadership to draw them out of their apathy."

BRING "WITH REAL PEOPLE"

Mr. Meisel has now enbarked on a more ambitious quest: to establish a nationwide group of public service organizations, the Campus Outreach Opportunity League.

Valerie Barton, student president of Phillips Brooks House at Harvard, offers a more personal reason students are drawn to public service. Miss Barton, a senior who grew up in a housing project in Harlem, said: "I found I couldn't be happy just going to class. The students around here are too competitive and money conscious."

After she began working as a youth counselor in a housing project in Roxbury, a predominantly black section of Boston, she said, "It enabled me to be with real people, with kids and mothers who called me up to talk about their problems."

At Columbia University, work in a free lunch program in the basement of a Presbyterian has helped Michael Skrebutenas channel his idealism. "I came from a small town in Connecticut, out in the woods, and never confronted poverty," he said.

"I was paying $14,000 a year," he said of his tuition, "and someone was starving outside the campus gate."

"Unfortunately, when people think of volunteers, they think of goody-two-shoes," Mr. Skrebutenas, a senior, went on. "It sounds like Miss America pageant stuff. But it's the best kind of activism, oftentimes more productive" than direct political action.

He referred to taking part in a blockade to protest Columbia University's investment in companies doing business in South Africa.

"I'm able to see production at the kitchen," he said. "With a blockade, it's more difficult."●

THE NAVY'S 210TH BIRTHDAY

● Mr. MOYNIHAN. Mr. President, 210 years ago the Second Continental Congress while meeting in Philadelphia agreed to outfit a vessel "for intercepting such transports as may be laden with warlike stores and other supplies for our enemies, and for such other purposes as the Congress shall direct." By the end of October 1776 the Congress had authorized a total of 4 vessels, not quite the fleet of 10 ships Silas Deans of Connecticut imagined but nevertheless a far cry from Josiah Quincy's July proposal to build a fleet of row galleys—imagine John Paul Jones engaging the *Serapis* from the decks of an 18th century trireme.

Mr. President, Monday, October 13, marked the 210th birthday of the U.S. Navy, and so I rise today to salute those who have gone before, those who have yet to serve, and particularly those fine men and women who serve in the Navy today. At times they may think their task is a thankless one, but it is appreciated, even here in Washington where talk of budget deficits and appropriations seem to overshadow the efforts of Navy submariners, surface combatants, and medical corpsmen. The recent interception and capture of the *Achille Lauro* terrorists illustrates just how professional today's Navy is.

As the senior Senator from the State of New York, and a former gunnery officer on the U.S.S. *Quirinus* I bring a certain reverence to the subject of naval history. New York was home for Theodore Roosevelt whose energies embarked America on the tide of naval power, and sent the Great White Fleet steaming around the world in 1980. Alfred Thayer Mahan, the father of American naval strategy, was a New Yorker and, so too, Franklin Delano Roosevelt, who served as an Assistant Secretary of the Navy under President Wilson.

I am pleased to report, Mr. President, that after 210 years New York State continues to maintain a strong naval tradition. The Navy plans to locate a surface action Group—a squadron of five ships—in New York Harbor in 1987. A Department of the Navy environmental impact statement estimate anticipates that this will result in a net annual fiscal gain of $3 million for the city and the State of New York. More importantly, New York continues to support the Navy and contribute to national defense, and I am proud of that.

Anchors away.●

THE 20TH ANNIVERSARY OF FOSTER GRANDPARENTS

● Mr. RIEGLE. Mr. President, I would like to take this time to remind my distinguished colleagues that the 20th anniversary of the Foster Grandparent Program is being celebrated today, October 18, 1985.

The Foster Grandparent Program began to serve communities throughout the United States in 1965. This Government program offers older men and women the opportunities for a close personal relationship with children who have special or exceptional needs. It provides an opportunity for older Americans to continue serving their communities and themselves in an active and meaningful capacity.

Foster grandparents are at least 60 years of age and come from various backgrounds. They receive both preservice orientation and inservice instruction. These volunteers serve in schools and hospitals for retarded, disturbed, and handicapped children; in care centers, city hospital wards, and correctional institutions; in homes for

the disadvantaged, dependent, or neglected children; and other settings within the community. An increased percentage of foster grandparents are becoming involved in areas dealing with drug abuse, runaway youth, and illiteracy among our youth.

The main purpose of the Foster Grandparent Program is to help provide the emotional, mental, and physical well-being children by offering them a personal relationship with an adult. Foster grandparents provide love and intimacy which is often missing in institutional environments. They may assist in a variety of activities from reading and playing games to speech and physical therapy. These care-giving activities help to maximize the capabilities of these children.

It is a privilege for me to bring to my colleagues' attention the 20th anniversary of this worthy program.●

THE GOVERNMENT'S NEED FOR SCIENTIFIC AND TECHNICAL PERSONNEL

● Mr. GORE. Mr. President, I have joined my colleague Senator BINGAMAN in cosponsoring S. 1727, a bill that would provide the Federal Government with the flexibility necessary to attract and retain quality scientific and technical personnel.

The urgent need for such legislation has been confirmed by the findings and recommendations of several groups—the panel chaired by Mr. David Packard, the Grace Commission, the Department of Defense, the Office of Science and Technology Policy and others. The Federal Government is losing far too many talented scientists and technicians to private industry.

Since 1980, the Department of the Navy has been testing an alternative personnel system at facilities in San Diego and China Lake, CA. This demonstration project has proved extremely effective in retaining and motivating quality personnel.

S. 1727 incorporates the best elements of the Navy's alternative personnel system, including the creation of general classification levels to replace General Schedule grades, the use of broad pay bands within those classification levels, and the application of performance standards. This system has not only helped the Navy to retain talented personnel at China Lake and San Diego; it has tangibly improved the relationships between supervisors and employees.

Because of the savings which are derived through anticipated attrition, S. 1727 does not mandate an increase in the Federal budget. The most significant change would be within the pay schedules. Broader ranges would replace the narrow, inflexible General Schedule limitations. This would give supervisors at Federal laboratories the flexibility to pay quality scientists and technical personnel more competitive salaries.

The bill, then, will not increase the budgets of Federal laboratories but will give them the means to attract talented individuals and hang onto their best people. The ideas behind the bill have been proven effective in 5 years. S. 1727 will correct a serious problem that threatens our Government's ability to advance in scientific and technical fields. I urge my colleagues to examine S. 1727 carefully and lend it their full support.●

EXPANDED CAPITAL OWNERSHIP AND THE IDEOLOGICAL HIGH GROUND

● Mr. LUGAR. Mr. President, today I am introducing the first of four statements on expanded capital ownership to complete the series started on June 4 by Congressman PHILIP M. CRANE. This series has been designed to provide background materials for the Presidential Task Force on Project Economic Justice, chaired by Ambassador J. William Middendorf II.

This task force, a nonpartisan effort combining representatives of business and labor and other private sector leaders, was established by Congress on July 29 under section 713 of the International Security and Economic Cooperation Act of 1985.

The fundamental premise of the task force is a growing awareness that both peace and freedom result from justice, and that a just free-enterprise system is the only effective answer to the false allures of communism.

The task force will examine and recommend corporate financing techniques for use in Central America and the Caribbean to broaden private ownership of enterprises. The task force will focus especially on the opportunities and obstacles for broadening ownership among employees as a means to privatize state-owned enterprises, which are the major source of government deficits and international debt problems.

During the past decade in the United States more than 10 million workers in some 7,000 successful corporations have become worker-owners. Several successful models are also operating in Central America and the Caribbean.

A principal objective of expanding capital ownership is to develop in the region a broadened political constituency among workers in support of private enterprise as the best means to accelerate economic development and political self-determination. Ambassador Middendorf believes that popular political support for free, private enterprise is essential not only to secure political stability and democratic processes, but to increase economic productivity and local capital formation. These economic accomplishments are the only long-range solution to the problems of international debt and imbalance of trade.

Today's insertion is the first portion of a paper prepared by Norman Kurland entitled "Project Economic Justice, a Revolutionary Free Enterprise Challenge to Marxism." I ask that it be printed in the RECORD.

The paper follows:

PROJECT ECONOMIC JUSTICE: THE IDEOLOGICAL FRAMEWORK FOR EXPANDED CAPITAL OWNERSHIP

(By Norman G. Kurland)

In the 66 years since the ideas of Marx and Lenin came to dominate life in their first country, totalitarian communist regimes have taken millions of human lives. According to estimates in an article published in the French magazine, Le Figaro, communist governments have eliminated at least 150 million of their own people. Such genocide was carried out under the guise of bringing "economic and social justice for all."

Soviet-armed revolutionaries have already taken over some countries in the Western Hemisphere and have killed thousands of more people to achieve a Marxist-Leninist "paradise." Any military response we make to counter these threats to our own peace and security is at best a holding action. More decisive is whether America is now prepared to launch a Second American Revolution, a bloodless, free enterprise version of "economic and social justice for all."

In a landmark speech delivered on Washington's Birthday 1983, President Reagan repeated his call for a Caribbean Basin Initiative as part of "a fundamentally new direction in American foreign policy." This new thrust would help create "a peaceful, prosperous and humane international order" by focusing on "the minds, hearts, sympathies, fears, hopes and aspirations, not of governments, but of people." The President recognized that "to be an effective force for peace, America [must] work for constructive change, not simply to try to preserve the status quo." While deploring the patronizing, ineffectual, and counterproductive manner in which America's foreign aid programs have operated in the past, President Reagan suggested that future economic assistance "must be carefully targeted, and must make maximum use of the energy and efforts of the private sector." The Reagan Plan promised to mobilize a balanced combination of "trade, aid and incentives for investment," all aimed at encouraging "self-help for the people of the Caribbean."

Embedded in the President's speech was an ideological bombshell. Its significance was missed by most of the media. After pointing out that economic freedom is the world's mightiest engine for abundance and social justice," President Reagan encouraged developing countries to "experiment with the growing variety of arrangements for profitsharing and expanded capital ownership." This seemingly casual remark signals the official unveiling of a new generation of weapons for a long-awaited American ideological counter-offensive directed at the philosophical heart of Marxism.

Unlike many cities of Marxism and most geopolitical strategists, President Reagan is highly sensitive to the following comment:

"The theory of the Communists may be summed up in a single sentence: Abolition

of private property" [in the means of production].

This declaration by Karl Marx and Frederick Engels in The Communist Manifesto, remains at the conceptual heart of the long-range global strategy of the Soviet Union. It is central to the value systems and theories of economic justice underlying all forms of modern collectivisim, socialism, Kibbutzism, syndicalism, etc. It suggests why all fundamental human rights are vulnerable in collectivist societies.

Making capital ownership illegal explains why collectivism inevitably leads to totalitarianism. Why is that? Because, in the words of Daniel Webster, "power naturally and necessarily follows property." And no worse monopoly of economic power is conceivable than when the institution of private property is weakened or made inaccessible by law. Such laws destroy the "social bundle of rights and powers" which enables a person to participate, either alone or jointly with others, in the ownership and control of farms, industrial enterprises, or other wealth-producing tools. Without property rights in his means of earning a living, an individual human being is left economically powerless before those who control his subsistence.

The institution of private property becomes even more relevant with respect to high-technology, mass production vehicles like modern corporations, whose marketing reach already transcends the boundaries of the modern State. Decentralizing ownership and control over modern technology and businesses is not only an effective check on private monopolies. It is the ultimate check against the potential abuses of the natural monopoly of power of the State. Where the State "nationalizes" its farms and corporate enterprises, the State gains monopoly power over the entire economy. The net result is that a small political elite who control all the coercive instruments of State power also gain a monopolistic power over everyone's stomach. Everyone's income then depends on this "new class" who in the name of "society" own and control all the means of production. Every person must either work for the "new class" or commit the crime of "parasitism."

In a 1975 radio commentary after he left office as Governor of California, President Reagan advocated an "Industrial Homestead Act," a comprehensive strategy for making every worker an owner through the Employee Stock Ownership Plan or "ESOP." He pointed out why:

"Could there be a better answer to the stupidity of Karl Marx than millions of workers individually sharing in the ownership of the means of production?"

During his Presidential campaign, in an unpublished October 1980 letter to the New Orleans Times Picayune, President Reagan again presented the ideological case for expanded capital ownership:

"Our Founding Fathers well understood that concentrated power is the enemy of liberty and the rights of man. They knew that the American experiment in individual liberty, free enterprise and republican self-government could succeed only if power were widely distributed. And since in any society social and political power flow from economic power, they saw that wealth and property would have to be widely distributed among the people of the country.

"The truth of this insight is immediately apparent.

"Could there be anything resembling a free enterprise economy, if wealth and property were concentrated in the hands of a few, while the great majority owned little more than the shirts on their backs?

"Could there be anything but widespread misery, where a priviliged few controlled a nation's wealth, while millions labored for a pittance, and millions more were desperate for want of employment?

"It should be clear to everyone that the nation's steadfast policy should afford every American of working age a realistic opportunity to acquire the ownership and control of some meaningful form of property in a growing national economy.

"This is not to say that the government should confiscate from the 'haves' and bestow upon the 'have-nots,' beyond the requirements of a compassionate welfare program to provide for those who cannot provide for themselves. Far from it. But it is to say that our duty is to foster a strong, vibrant wealth-producing economy which operates in such a way that new additions to wealth accrue to those who presently have little or no ownership stake in their country."

After his election victory President Reagan did not forget his commitment to help every American share in future ownership opportunities. On June 22, 1981, he congratulated Governor Pierre S. duPont IV for signing a bill making expanded capital ownership the official policy of the state of Delaware:

"[W]e must work to create the conditions for expanding the ownership of the nation's wealth, so that all Americans can have their fair chance to become proprietors of their country. . . . [This Delaware initiative] will help awake the people of the other states to the importance of this issue."

But President Reagan is far from alone in his commitment to "expanded capital ownership."

As early as 1891, in addressing the rising conflict between workers and capital in his prophetic encyclical, On the Condition of Workers, Pope Leo XIII was one of the first moral leaders to spotlight the fallacy of Marx and Engels:

"[It must be] assumed and established as principle, that the right of private property must be regarded as sacred. . . . The law ought to favor this right and, so far as it can, see that the largest possible number among the masses of the population prefer to own property."

The moral basis of widespread access to private property in the means of production, of course, has many ancient roots in Judaism. (See quoted sources in The Way of the Upright: A Jewish View of Economic Justice by Rabbi Richard Hirsch, Union of American Hebrew Congregations, 1973, pages 8-19. 106-107.)

And Muhammad Ibn Khaldun, a 14th Century Arab jurist, historian, statesman and general, pinpointed why collectivism is morally unjust:

"When incentive to acquire property is gone, people no longer make efforts to acquire any. . . . Those who infringe upon property rights commit an injustice. . . . This leads to destruction and ruin of civilization." (Mukaddimah, English translation by Franz Rosenthal, Vol. 2, pages 103-109, 1967.)

And finally, the moral dimension of President Reagan's call for "expanded capital ownership" was reinforced by Pope John Paul II in his 1981 encyclical On Human Work:

"The Church's teaching on ownership diverges radically from collectivism as proclaimed by Marxism . . . and "rigid" capitalism. . . . The primacy of the person over things [can be restored through] joint ownership of the means of work."

For at least a century, millions have suffered from the errors of Marxism, an incredibly bad idea. Marxism supposedly deals with the real social and economic injustices people face in a rapidly industrializing world. But in its attack on injustice, Marxism is not guided by any positive theory or set of principles as to what constitutes "justice." Marxism grows out of an even older set of ideas called "collectivism," a primitive system of thought where "society," not flesh-and-blood human beings, are all that matter. And equal sharing of poverty and misery—not equality of opportunity to excel and enjoy abundance—is the credo of collectivism. Free markets and individual incentives to produce and earn profits violate collectivist principles. In practice, the ideas of Marx are called "Leninism," "Maoism," or "communism." In communist societies a person is an instrument belonging to the ultimate secular collective, the State. A person's life is not his or her own. Any person declared an "enemy of the State" can be put to death, imprisoned, or placed in a mental institution for opposing those in power.

Marxist collectivism is totally opposite to the central idea that gave birth to America: that the ultimate sovereignty of God, all sovereignty on Earth must start with the individual person. This idea may be called "personalism." Americans believe that each person has the inalienable right to live the life given by the Creator of all life. And Americans do not believe that the State should be worshipped as some sort of modern Golden Calf. In fact, we believe that the State, while important, is a potentially dangerous tool of any civilized society. That is why America's founders designed a State with specifically limited powers. To keep government under control and to insure that it would serve the people, not vice versa, America's founders tried to decentralize social and economic power. And we certainly do not permit those we select to administer State power, as under communism, to take the lives of those who disagree with them. To us, the life of every person is sacred.

Starting from diametrically opposed views about the importance of each person and how each of us relates to God and the State, the forces of Marxist collectivism and the forces of personalism have been on a collision course for over a century. The inevitable confrontation has been emerging at two levels: the military and the ideological.

In the past most of America's responses against Marxist aggressions have been defensive, our military actions in response to their military initiatives, our nuclear build-up in response to theirs. On the ideological level, calling our strategy defensive would be a compliment. Vietnam was a good example where we failed to put or best foot—the untapped ideological potential of the American free enterprise system—ahead of our military foot. We never aggressively engaged communism on the battlefield of economic justice. We never developed a comprehensive private sector strategy aimed at uniting the rich and the poor of Vietnam, with practical initiatives for helping the Vietnamese restructure their social and economic order along lines consistent with the original American revolution.

Calling for "Freedom and Democracy" without building structures for "Economic Justice" is naive. There is no meat on the

message. We should not repeat this disastrous error in the future.

Our Foreign Assistance Act of 1963 stated the overall objective of American foreign aid: "To create conditions in the world under which free societies can survive and prosper." Twenty years and billions of dollars later our foreign aid programs, as executed, have not impeded Marxism's global reach.

Indeed, American foreign aid may have helped to pave the way for many of the Marxist revolutions and expropriations of privately owned enterprises that have occurred throughout Asia, Africa, and Latin America since World War II. Handouts by themselves do not deliver justice or help create a more just social order. They often widen the gap between the rich and the poor. They alienate the people we should be helping. They magnify the obvious difference between the rich and the poor: the rich derive their incomes from the ownership of capital and the poor lack effective access to capital ownership. Thus, handouts create breeding grounds for Marxist-Leninism. Like military aid, they are at best temporary expedients, useful for buying time to attack the social and economic causes that lead to revolution. By not providing the poor in developing countries with the means to become partners in free enterprise growth, we have wasted resources and lives to revolutions that could have been avoided. In the words of President Kennedy:

"By making peaceful revolution impossible, we make violent revolution inevitable."

Farmers, workers, technicians, and businessmen in the developing countries now need more direct access to the finest talent and the most advanced technology, ideas, and institutional structures developed within the American free enterprise system. With access to the best tools and talent of our private sector, for mutual profit, the people of developing countries can create for themselves a freer and more just economic future. We can prove to the world that maximum justice and maximum profits can go hand-in-hand.

The time is now ripe for America to reach out to be broadened global constituency, the poor and oppressed of the many countries from which our ancestors fled. By taking the ideological high road against Marxist collectivism, we can not beat the Soviet Union, not with empty words or deadly weapons but with bold private-sector initiatives that all Americans could support. Through a radical extension of the American free enterprise system, economic justice can be brought to the poorest of the poor in developing countries. In a sense it would be a Space-Age version of the original American Revolution.

WIDESPREAD AMERICAN SUPPORT FOR EXPANDED CAPITAL OWNERSHIP

Broadened equity ownership was included in the 1938 Republican Party Platform. It wa also called for in the 1976 and 1980 conventions of the Republican Party. Within the last 8 years Congress has passed 15 laws encouraging employee stock ownership plans (ESOPs) and over 5,000 companies are gradually spreading equity ownership among their several workers. In 1976 the Joint Economic Committee of Congress declared broadened ownership of new capital as a major priority of American economic policy. While some academics and labor spokesmen have voiced skepticism and concern, citing a few cases where ESOPs were abused, even this resistence is diminishing. Several books and hundreds of articles have appeared in recent years favoring expanded ownership policies.

A labor statesman who recognized that the twin problems of productivity decline and cost-push inflation were unsolvable through the traditional wage system was Walter Reuther, the late head of the United Automobile Workers. Speaking before the Joint Economic Committee of Congress in 1967, he stated:

"Profit sharing in the form of stock distributions to workers would help to democratize the ownership of America's vast corporate wealth. If workers had a definite assurance of equitable shares in the profits, they would see less need to seek . . . increases in basic wages."

Even John D. Rockefeller III called for such a plan in his book, The Second American Revolution (1973).

In a letter to The Washington Post not long before his death, Senator Hubert Humphrey explained why he supported broadened capital ownership:

"[C]apital, and the question of who owns it and therefore reaps the benefit of its productiveness, is an extremely important issue that is complementary to the issue of full employment. . . . I see these as twin pillars of our economy: Full employment of our labor resources and widespread ownership of our capital resources. Such twin pillars would go a long way in providing a firm underlying support for future economic growth that would be equitably shared."

The expanded ownership concept, purely on its merits, enjoys broad bipartisan support on Capitol Hill. The first to publicly support the concept was populist Senator Fred Harris in 1972. The first to introduce ESOP legislation aimed at comprehensive reform of the U.S. tax system was conservative Senator Paul Fannin in early 1973. The main champion of employee stock ownership in Congress is Senator Russell Long, who first learned of the ESOP as a result of Senator Mark Hatfield's initiative to convert the Conrail system into a 100% employee-owned railroad. Other sponsors of ESOP legislation have covered the ideological waterfront, from Robert Byrd and Alan Cranston to John Towers and Mac Mathias, from Jesse Helms and William Roth to Gary Hart and Paul Tsongas, from Phil Crane, Jack Kemp and Bill Frenzel to Parren Mitchell, Don Edwards and Ron Dellums.

Rep. Michael Barnes, Chairman of the House Foreign Affairs Subcommittee on Inter-American Affairs, reacted to a proposed expanded ownership initiative for El Salvador, by recalling the words of former Salvadoran President Duarte:

"If my people believed that tomorrow would be better than today, that their children would have a better life than they have had, then the communist could ship in all the guns they want. There won't be anyone to pick them up and use them."

Rep. Barnes added his own footnote:

"There's more wisdom in that single statement than in everything our government has had to say on the issue in the past two years."●

THE PRESIDENT'S DECISION TO RENOUNCE U.S. ADHERENCE TO THE JURISDICTION OF THE WORLD COURT

● Mr. DODD. Mr. President, this week the President informed the world that the United States will no longer recognize the full jurisdiction of the International Court of Justice. The President and the State Department have stated their reasons, but their argument is not persuasive. This regrettable decision has damaged our credibility internationally, and, worse, it has created the impression that the United States is willing to obey only those laws and regulations that favor our interests. It implys we are unwilling to submit ourselves to judicial scrutiny and that we care nothing for the opinion of our allies and friends.

My colleagues surely will remember the genesis of this dispute. It goes back to the decision by the CIA to mine the harbors of Nicaragua. The Nicaraguan Government sued the United States in the World Court, claiming that mining those harbors and funding the Contras was a violation of Nicaragua's sovereignty. The administration refused to stand and argue its case on the merits. The issue is no longer about U.S. policy in Central America. Now the issue is much more fundamental. Now the issue is United States respect for the rule of law.

Before we consider the administration's reasons for this shortsighted action, let us think back to August 1946, when the Senate passed by a two-thirds majority Senate Joint Resolution 196, accepting the compulsory jurisdiction of the International Court of Justice. I was only 2 years old, then; and my father would soon be prosecuting Nazi war criminals at Nuremburg. The world's wounds from war were very fresh. We had witnessed the breakdown of international law. We knew with compelling immediacy the results of failing to hold nations accountable to the rule of law. We knew that the unspeakable was possible. In response to what we had seen, we helped to create the United Nations and, as part of that effort, the International Court of Justice was born. We joined the United Nations and the World Court not only because we needed to steady the gyroscope of international relations but also because we, as Americans, genuinely believe in the rule of law.

The statute of the International Court of Justice leaves it to the discretion of each nation to determine its relationship to the World Court. For the United States that framework was established by the declaration on the World Court contained in Senate Joint Resolution 196, approved by a two-thirds vote in the Senate August 3, 1946 and signed into law by President Truman on August 14 of that year.

The declaration provides an escape clause from the Court's jurisdiction. That escape clause imposes a 6-month waiting period after notification to the U.N. Secretary General of our intention to pull out of the Court. The Foreign Relations Committee report

which accompanied the resolution explained this clause in the following terms:

> The provision for 6 months notice of termination has the effect of a renunciation of any intention to withdraw our obligation in the face of a threatened legal proceeding.

In short, we did not wish to create the impression of ducking an issue by withdrawing from the Court, but that is precisely what has now happened. The administration, in the face of a legal challenge from Nicaragua, which it found embarrassing and disagreeable, decided to take the extraordinary step of claiming that the United States would exempt itself from any decisions regarding Central America. Now the administration wishes to go even further. Now they say they wish to avoid all decisions of a political nature.

Let us inquire why. Why would the administration wish to avoid all cases of a political nature before the World Court? Why would they wish to create the inevitable impression that we are afraid of the judgment of a Court which includes judges from our own country and our closest allies? Why does the administration wish to create the impression that we are willing to accept only those judgments that go our way?

The administration replies that other countries have never accepted the compulsory jurisdiction of the Court. They say that the Nicaraguans are trying to turn the Court into a propaganda vehicle. Both of those arguments have some truth in them, but what do they reveal? Are those sufficient reasons to walk away from one of the world's principal symbols of peace and reason and legality? Because we might lose a case, or because others have also hidden from the Court, or because one of our challengers has taken advantage of us?

It is not only unbecoming for a super power to act so petulant, it is also damaging to the fabric of international law.

There will come a day, perhaps soon, when we will want to use the World Court for our own good purposes. We should remember that we went there to sue Iran during the hostage crisis and the Court ruled in our favor. We were pleased then to have a forum, however limited and unbinding, to air our grievances. But when that day comes, and we plead for the world to listen, there may be derisive laughter instead.●

NOBEL PRIZE WINNERS IN CHEMISTRY

● Mr. MOYNIHAN. Mr. President, each year, winners of the Nobel Prize capture our attention, fascinate us, and inspire us. This unique recognition of their extraordinary achievements is a grand and important tradition.

New Yorkers have an especial reason for pride this year: Two of our own became Nobel laureates. Dr. Herbert A. Hauptman and Dr. Jerome Karle were awarded the Nobel Prize in chemistry. It is a happy fact that both of these distinguished men are graduates of the City College of New York, class of 1937. What a class. Dr. Arthur Kornberg, who won the Nobel in medicine in 1959, graduated with Drs. Hauptman and Karle that same year. As a sometime undergraduate at City College before entering the Navy in 1944, I share the pride felt at CCNY today. That great New York school has now produced more Nobel Prize winners—seven—than any other public institution.

Through his skill and learned achievements, Dr. Hauptman has brought attention to the small but highly accomplished Medical Foundation of Buffalo, the research laboratory he directs. The foundation's unique work has brought it international acclaim and recognition.

The pioneering research conducted by Dr. Hauptman there, in conjunction with Dr. Karle, has led to significant advances in the field of x-ray crystallography. These techniques have potential applications in the treatment of cancer and in uses of pain-controlling drugs, and are already used throughout the world to study the mysteries of the three-dimensional structures of complex molecules.

Mr. President, I salute these men for their accomplishments, and greatly congratulate them on winning the Nobel Prize. I ask that accounts of this most well-deserved award from the Buffalo News and the New York Times be printed in the RECORD.

The material follows:

[From the Buffalo News, Oct. 16, 1985]

CHEMISTRY PANEL HAILS WORK ON CRYSTAL STRUCTURE

(By Arthur Page)

Dr. Herbert A. Hauptman of the Medical Foundation of Buffalo Research Laboratories is the co-winner of the 1985 Nobel Prize in Chemstry, it was announced today in Stockholm, Sweden.

Hauptman, 68 executive vice president and research director of the foundation at 72 High St., will share the prize with Dr. Jerome Karle, 67, of the Naval Research Laboratory in Washington, D.C., for work they did there in the 1950s to develop a mathematical approach to solving the structure of crystals.

The technique, called "direct methods," originally caused heated debates and was looked down upon by crystallographers, but in recent years it has been used to determine the structures of the more than 45,000 small molecules—such as hormones, vitamins and antibiotics—that are known to science.

Knowledge gained using the technique forms the experimental base of modern structural chemistry.

As an article in the foundation's newsletter noted, "Time and time again, they were told that their new methods could not possibly work." International conferences sponsored by the Medical Foundation of Buffalo, a non-profit independent bio-medical research institute, have helped establish the merit of the method and established Buffalo as a world-recognized center of crystallographic research.

News of the award, conveyed in a telephone call from a colleague at the foundation, capped off Hauptman's daily swim at the Northeast Family Branch YMCA in Snyder. Before heading for work, Hauptman called his wife, Edith, a first-grade teacher at Holmes Elementary School in the Town of Tonawanda, to share the news with her.

"She was so excited she hung up on me," he said with a laugh.

Arriving at the medical foundation, he was besieged by reporters and television cameras at an impromptu press conference and toasted with champagne by his coworkers.

Asked to describe how he felt, he added: "it's hopeless. I'm still in a state of excitement."

A resident of Eggertsville, Hauptman is a research professor of biophysical sciences at the State University of Buffalo. He and his wife have two daughters, Barbara of Buffalo, and Carol of Washington, D.C.

He came to Buffalo in 1970 after 30 years in government service, 23 of them with the Naval Research Laboratory. He joined the Medical Foundation of Buffalo as head of its mathematical biophysics laboratory.

Hauptman and Karle, who have been nominated for a Nobel Prize previously, last year received the Patterson Award from the American Crystallographic Association for their work in the 1950s.

Referring to the technique, which is used to program computers to solve crystal structures at the molecular level, Hauptman said that originally "there was a lot of resistence to it, mostly because it wasn't understood. It was highly mathematical, and crystallographers don't have the background to use it. It wasn't accepted until 10 to 15 years later."

Wide acceptance of the technique, he added, was facilitated by the development beginning in the 1960s of "sufficiently powerful computers."

Hauptman explained that the method developed by him and Karle is used in conjunction with X-ray defraction of materials that have been crystallized.

Being able to apply it in the study of such materials, he added, "permits us to better understand why they do what they do."

Nothing that it is used to study the structure of drugs, he added: "We hope that by understanding better the structure of drugs we can understand their biological activity and biological processes better."

By studying natural substances, such as hormones and insulin, the technique also assists scientists in development of new drugs.

"Their work is not within chemistry but is important for chemistry," said Professor Ingvar Lingvists, a member of the Nobel chemistry committee. "It is not possible to name fields in chemistry where the method is not used."

Hauptman, author of the book "Crystal Structure Determination: The Role of the Cosine Semivariants," received his degrees in mathematics from the University of Maryland. He is former president of the Philosophical Society of Washington, D.C.

He has lectured throughout the world, and the Weizman Institute in Israel has named a chair in physical chemistry for him and Karle.

He once told a reporter that he was "lucky" to be able to see the "usefulness" of his work in mathematics.

He added: "I have tried—in my own small way—to develop a system to use mathematics in an attempt to solve one very small problem. There are still many, many more things to do."

[From the New York Times, Oct. 17, 1985]

TWO AMERICANS SHARE NOBEL IN CHEMISTRY

(By Harold M. Schmeck Jr.)

Two Americans, one from a small research center in Buffalo and the other from the Naval Research Laboratory in Washington, were awarded the Nobel Prize in chemistry yesterday for developing revolutionary techniques used to determine the structures of molecules vital to life.

The prize in physics went to a West German computer expert, Dr. Klaus von Klitzing, 42 years old, for developing an exact way of measuring electrical conductivity, which has become important to the computer and electronics industry. [Page B12.]

The chemistry prize was awarded to Dr. Herbert A. Hauptman, 68, director of the Medical Foundation of Buffalo, and Dr. Jerome Karle of the Naval Research Laboratory. Together, they developed mathematical techniques through which X-ray crystallography can be used directly to deduce the three-dimensional structure of natural substances vital to the internal chemistry of the human body and of drugs that can be used to treat various human ailments.

YEARS OF COLLABORATION

Both scientists are natives of New York City, attended City College together in the class of 1937 and then collaborated for years at the Naval Laboratory.

In recent years artificial counterparts of steroid hormones useful in treating breast cancer have been developed with the aid of the techniques for determining three-dimensional structures. The same techniques have also been used in studying antibiotic drugs. Three-dimensional structure of brain chemicals such as the enkephalins have been determined in the same way. The enkephalins are thought to be natural pain-control substances produced by the human brain. Knowledge of the three-dimensional structure of the enkephalin molecule has been used in research toward the development of new pain-killing drugs.

Much current research is devoted to studies of the structures of hormones and many other biological molecules because structure often gives valuable clues to a substance's actions within the human body.

Thousands of such three-dimensional structures of small biological molecules have been worked out through use of the scientists' methods, producing a wealth of valuable new information for understanding the most detailed chemistry of life in health and disease.

The methods developed by the two Americans have been particularly useful in determining the structures of hormones, vitamins and antibiotics, but cannot yet be used alone to determine the structures of the molecules of large proteins. Many scientists, including the two Nobel Prize-winners, are now working to apply the techniques to solution of the three-dimensional structures of large molecules.

While both research institutions are recognized in the international community of science, the foundation in Buffalo is relatively little known in its own community. The foundation, with a total staff of about 50, specializes in the study of the human endocrine system.

The mathematical techniques developed by Dr. Hauptman and Dr. Karle were controversial for years, but are now used by scientists throughout the world. The two scientists will share the $225,000 award.

CHEERS ABOARD PLANE

When the announcement was made yesterday, Dr. Hauptman was in a swimming pool at the local Y.M.C.A. and Dr. Karle was on an airliner traveling to the United States from Europe. Dr. Karle learned that he was a Nobel Prize winner when the pilot of the Boeing 747 announced the award over the public address system late in the flight. The 280 passengers and crew members burst into applause and later toasted the scientist with champagne.

In announcing the chemistry prize award, the Royal Swedish Academy of Sciences cited the two American scientists "for their outstanding achievements in the development of direct methods for the determination of crystal structures." Scientists use X-ray studies of substances in crystal form to determine their three-dimensional structures.

In the past, other Nobel Prizes have been awarded for achievements in crystallography, but these have usually been for success in determining the structures of important individual substances. This year's prize is for the development of key methods that have helped the whole field to flower. One specialist said tens of thousands of structures had been determined in recent years using the techniques developed by Dr. Karle and Dr. Hauptman.

Twenty years ago, said Dr. William Duax, a colleague of Dr. Hauptman at the foundation in Buffalo, it took two years to work out the structure of a simple antibiotic molecule that had only 15 atoms. Today, he said, it is possible to determine the structure of a 50-atom molecule in two days.

X-ray crystallography has been used for many years to determine the three-dimensional structure of molecules that can be purified so completely that they form crystals. The X-rays reflected from these crystals form pictures that appear as arrays of thousands of spots of variable brightness. Until the work of Dr. Hauptman and Dr. Karle, the pictures were used indirectly to guess at possible structures. Only through further research was it possible to prove whether a guess was correct.

The new methods for direct determination of three-dimensional structures were developed by the two scientists when they worked together in Washington in the 1950's and 1960's. They developed ways of calculating structure by analyzing the intensity of the points visible as dots in the X-ray pictures and calculating the "phase" of atoms in the structures. In this context, phase is an angular measurement that can vary from zero to 360 degrees. The advent of powerful modern computers has made it possible to use the two scientists' mathematical formulations on intensity and phase to determine quickly the three-dimensional structure of a molecule under study.

The seminal work done 30 years ago remained unaccepted and controversial for at least 15 years.

"In 1954, despite five years of work and 13 scientific papers on molecular structure determination, Herbert Hauptman had received virtually no support for his ideas from established X-ray crystallographers, some of whom were openly hostile," said a recent biological sketch of the scientist prepared by his foundation.

Today he and his colleague are considered the founders of a new era in research on molecular structure.

[From the New York Times, Oct. 18, 1985]

ONE CLASS, THREE NOBEL WINNERS, AT CITY COLLEGE

(By Sara Rimer)

City College has produced seven Nobel Prize winners, more than any other public institution. And now, after the announcement of this year's laureates in chemistry, the college is celebrating an even more extraordinary record—three winners from the same class, the class of 1937.

"It's unbelievable," said Frank Brescia, a professor emeritus who was just starting out as an instructor in the chemistry department back in 1937, the year that the recipients of this year's chemistry prize, Dr. Herbert A. Hauptman and Dr. Jerome Karle, graduated.

"It's never happened before, certainly not at Harvard or Princeton. They may have more Nobel Prize winners on their staff than us. But we're the college that produces them."

The third member of the class of 1937 to have received the prize is Dr. Arthur Kornberg, who was awarded it for medicine in 1969. Even a scientist of Professor Brescia's caliber and long experience was hard put to explain how there could be three winners from one class.

THE GLORY YEARS

"Maybe there was a conjunction of the stars or the planets," suggested one of the winners, Dr. Hauptman, the director of the Medical Foundation of Buffalo.

But he and Dr. Karle and Professor Brescia did remember the Depression era as glory years at City College, when the striving sons of immigrants achieved academic excellence on the road to future success. They were members of an elite group, selected from candidates all over the city.

"The competition was extreme," said Dr. Hauptman, whose Austrian immigrant father, Israel Hauptman, had attended City College before him but had to drop out in order to support his family as a printer. "Only the very best got in, and only the very best survived it."

Dr. Hauptman gained an edge by attending Townsend Harris High School, with a rigorous three-year preparatory program that guaranteed entrance into City College—if you could get through Townsend Harris.

50 CENTS A SEMESTER

"If you weren't rich, City College was the university," said Dr. Karle, a chief scientist at the Naval Research Laboratory in Washington. "It meant two things: The first was the high standards of scholarship. The second was that it cost 50 cents a semester to go. That was for a library card, which you had to purchase."

Dr. Karle, the son of a Polish immigrant who made money—and then lost it—in real estate, graduated from Abraham Lincoln High School along with Dr. Kornberg.

A natural-sciences major, Dr. Karle spent three hours on the subway each day, traveling between his home in Coney Island and his classes on the campus at 138th Street

and Convent Avenue. "I learned how to study under very odd circumstances," he said.

Dr. Hauptman, a math major, commuted from his family's apartment in the Bronx. "City College was the perfect place for a person like me," he said "I was a bookish kind of kid who loved to read a lot, especially math."

The basement lunchroom was particularly exciting, a place to exchange ideas and engage in spirited debate. "In order to conserve space, we ate standing up," he said "There was always a lot of discussion going on."

AFFECTION FOR PROFESSORS

Dr. Hauptman remembers several of his professors with admiring affection, but in particular the late Emil Post. "Oh, he was fantastic" Dr. Hauptman said. "He taught me numbers theory. He was very strict and tolerated no nonsense whatever."

Dr. Hauptman and Dr. Karle, who did not meet each other while at City College, both took the top academic prize in their departments. And on Wednesday, they together were awarded the Nobel Prize for developing revolutionary techniques used to determine the structures of molecules vital to the chemistry of the human body and of drugs that can be used to treat various aliments. They collaborated on this work at the Naval Laboratory.

While Professor Brescia and others in the chemistry department hailed the class of 1937 for its high achievers, they also said that while the students have changed in some ways over the years, the glory days at City College are far from over. Proof could be found yesterday in Professor Charlotte Russell's chemistry lab, where two students, John Manlutac and Abha Malik, rejoiced over the Nobel Prize winners and talked intently of their own dreams.

"This is a poor man's college, they say," said Mr. Manlutac, the son of a farmer, who emigrated here from the Philippines three years ago. " I don't have the money to go to an Ivy League School. But this is just as good as going to Harvard."●

U.S. CONTRIBUTION TO THE DEVELOPMENT OF PRIMARY CARE LEADERSHIP IN THE WESTERN HEMISPHERE

● Mr. D'AMATO. Mr. President, I bring to the attention of my colleagues a situation which has been somewhat overlooked, but is one which is vital to the interests of this Nation and to the Western Hemisphere—primary health care leadership.

The Western Hemisphere has traditionally prided itself on providing the highest quality of health care in the world. However, this scenario is changing. Access to U.S. medical training opportunities has gradually become more difficult in the past few years, and the Soviet Union and some East European countries have accelerated their recruitment of medical students from countries in our hemisphere. While the U.S. medical-educational complex has much to offer, it is clear that it is not in the best interest of the United States or the developing countries to ignore the steady flow of medical manpower away from underserved populations. Certainly, this medical manpower drain has significant domestic and international implications to the United States.

Our medical and health maintenance system simply can't absorb an unabated flow of physicians. The developing countries of the world can likewise ill-afford to export their medical talent to the United States.

Recently, the U.S. Agency for International Development signed a Cooperative Agreement with the Inter-American College of Physicians and Surgeons [ICPS] to implement a Physician Exchange Program which I believe will provide the United States with an alternative to the negative consequences of limiting access to medical training. ICPS is a unique organization which represents some 24,000 Spanish-speaking physicians practicing medicine in the United States.

The ICPS Primary Care Physician Exchange Program will seek to accelerate the development of primary care leadership in the hemisphere by promoting a medical technology and information exchange between U.S. Spanish-speaking practitioners and physicians from Central and Latin America.

I would like to share with the Senate a description of the USAID/LAC Bureau funded project. I ask that it be printed in the RECORD in its entirety at the conclusion of my remarks.

The material follows:

BUILDING AN INTERAMERICAN COMMUNITY OF PHYSICIANS

The Interamerican College of Physicians and Surgeons has recently secured the support of the Latin America Bureau of the Agency for International Development in its efforts to build a bridge of technical knowledge and human understanding on a physician to physician basis throughout the Interamerican community.

The objective of the ICPS/USAID Cooperative Agreement is to design and implement a medical technology exchange program between members of ICPS practicing primary care medicine in the U.S. and physicians in Latin America, Central American and the Caribbean.

ICPS is uniquely prepared to facilitate technical training exchanges both in the U.S. and in Latin America because its membership is characterized by bilingual communication skills and cultural awareness of the customs and behavior of the inhabitants of the hemisphere.

Many ICPS members are directly involved in the training of medical students and the delivery of primary care services to underserved populations in the U.S.

ICPS publishes a medical magazine, MEDICO, Interamericano which is published on a monthly basis and distributed to members in the U.S. and abroad.

The ICPS-AID Cooperative Agreement will involve the following activities:

Placement of LAC/Physicians with Spanish-speaking primary care practitioners for 6 months in rural and urban underserved areas to observe and participate where possible in the delivery of medical services.

The design and conduct of informal/formal structured training programs to be supervised by ICPS physician preceptors. Both clinical and non-clinical skills will be incorporated in the preceptorship program which will include: pediatrics, obstetrics and gynecology, family practice, emergency medical services, ophthalmology, rehabilitation medicine, hospital administrative and public health.

Placement in innovative service delivery environments will be emphasized where possible.

The provision of short-term technical assistance by Spanish-speaking ICPS physicians in LAC/Country settings.

The establishment of a clearinghouse function for the selection and placement of clinical training candidates in short and long term academic training programs in the U.S.

ICPS will respond to US/AID Mission requests for information and guidance on clinical training in the U.S.

The ICPS Physician Exchange Program will emphasize rural and community health care. Each exchange participant will be assigned to a practicing bilingual physician preceptor who will function as a sponsor, mentor and advisor while in the U.S.

Prominent medical scholars and primary care specialists will be identified to provide technical seminars and demonstrations both in the U.S. and the LAC Region.

ICPS views the Physician Exchange program as a means of developing health care leadership in the U.S. and in LAC/countries as a hemispheric resource.

Your support is needed and sought in demonstrating the value of Apreton De Manos Curativas—Building an Interamerican Community of Physicians.●

PROGRAM

Mr. DOLE. Mr. President, on Monday, the Senate will convene at 9 a.m. Under the standing order, the two leaders will be recognized for 10 minutes each. There are special orders in favor of Senators PROXMIRE and CRANSTON for not to exceed 15 minutes each.

Following the execution of the special orders, there will be a period for the transaction of routine morning business not to extend beyond the hour of 10 a.m., with statements limited therein to 5 minutes each.

Following routine morning business, at 10 a.m., it will be the intention of the majority leader to turn to the consideration of the Labor, HHS appropriations bill, H.R. 3424. Votes can be expected during Monday's session. I apologize for not being able to announce precisely when, but it would be my hope if those who have amendments can come to the floor Monday morning and offer their amendments, I would certainly be willing to work out some accommodations with the distinguished minority leader to protect all of our colleagues.

Mr. BYRD. Mr. President, I want to be as helpful to the distinguished majority leader as I can be. On Monday, we will be addressing that point. I

hope we can move forward with our business.

Mr. DOLE. Mr. President, I ask unanimous consent that after the completion of the statement by the distinguished minority leader, that the Senate stand in adjournment until 9 a.m. Monday morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I thank the distinguished minority leader. I will be brief.

THE ARMS SALE TO JORDAN

Mr. BYRD. Mr. President, I have reviewed carefully the administration's position in respect to the transfer of American arms to Jordan at this time. I have concluded that I cannot support that position. I believe the basic test of this proposed arms sale is whether it will enhance the process of creating a lasting peace in the Middle East. I am not yet convinced that it satisfies that test.

My opposition to this proposed sale which we have been reading about should not be interpreted to reflect adversely on King Hussein. I have considerable respect for King Hussein. I was encouraged by remarks he made when he visited Washington recently, and I believe, he is serious in his quest for a peaceful settlement of the issues which must be resolved with Israel. While there are some parts of his proposal for progress in the peacemaking process with Israel which I cannot support, in particular the aspect of it which deals with an international conference including the Soviet Union, it is very significant that he wishes to enter into a substantive dialog aimed at resolving regional differences. I commend the King for his initiative, and for his courage and good faith, and I take his statements to reflect a deep-seated intention to involve Jordan in creative solutions.

The recent incidents of terrorist activities in the Middle East have increased tensions and apprehension about the prospects for successful dialog on the King's peace initiative. Precisely because of this increased tension, the United States needs to redouble its efforts to resolve the regional stalemate and achieve a lasting solution that assures stability and fair resolutions of the outstanding issues separating Israel and her neighbors.

I am convinced that American policy in the Middle East must be guided by the need to build on the success of the Camp David process, and the hope it offers of comprehensive solutions in the region. The arms sale that this administration has been promoting for several years is not a policy which can be productive to this process. It is just an example of arms sales driving foreign policy, an approach lacking in fundamental wisdom. It is unrealistic to attach much significance to the contribution arms sales can make to the positive development of the underlying relationship between two nations. Such sales show no history of promoting American policy interests or of creating lasting security relationships when the basic elements of a solid relationship have not otherwise been established. This holds for United States-Jordanian relations and it holds equally well for United States-Israeli relations and certainly for Israeli-Jordanian relations.

I say again, I applaud King Hussein's recent statements that Jordan is now prepared to negotiate with the Government of Israel. My support for $250 million in economic aid to Jordan last June reflects my confidence in the King's intentions. I am not unmindful of the security concerns of the State of Jordan. Those concerns, however, will be more realistically met through the negotiated creation of a framework of peace with Israel. It would be foolish to think that the provision of new arms will have an even marginal positive impact on Jordan's security. Instead, such a sale is more likely to present an unwanted obstacle to the development of a framework of peace which every Member of this body hopes for.

There are those who argue that Jordan needs arms because of the threat of radical Arab forces bent on destroying the peace process. I think it is becoming clear that much of the Arab world is tiring of the policy of terrorism which drives various radical factions in the Middle East. The solution to terrorism lies not in more arms, but in the advancement of peaceful solutions by men of good will—including King Hussein.

Mr. President, I thank the Chair for his indulgence. I yield the floor.

ADJOURNMENT UNTIL MONDAY, OCTOBER 21, 1985

The PRESIDING OFFICER. Under the previous order, the Senate stands adjourned.

Thereupon, at 3:20 p.m., the Senate adjourned until Monday, October 21, 1985, at 9 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate October 18, 1985:

SPECIAL PANEL ON APPEALS

Barbara Jean Mahone, of Ohio, to be chairman of the Special Panel on Appeals for a term of 6 years.

DEPARTMENT OF ENERGY

Anthony G. Sousa, of Hawaii, to be a member of the Federal Energy Regulatory Commission for a term expiring October 20, 1988.

DEPARTMENT OF JUSTICE

Stephen J. Markman, of Virginia, to be an Assistant Attorney General.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. John H. Moellering, [redacted], U.S. Army.

IN THE AIR FORCE

Air Force nominations beginning John R. Sharp, and ending Michael L. Smith, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 4, 1985.

Air Force nominations beginning Maj. Mitchell J. Catoe, and ending Maj. Buford O. Gilbert, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 4, 1985.

Air Force nominations beginning Armin B. Olsen, and ending Walter T. Hatcher III, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 4, 1985.

Air Force nominations beginning John C. Aarni, Jr., and ending Michael A. Wansky, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 8, 1985.

Air Force nominations beginning Francis G. Andrews, and ending Dian J. Davis, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 8, 1985.

Air Force nominations beginning Willie W. Gray, Jr., and ending Susan Parker-Hotchkiss, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 8, 1985.

Air Force nomination of Susan Parker-Hotchkiss, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of October 8, 1985.

Air Force nomination of Robert A. Ferguson, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of October 8, 1985.

Air Force nomination of Robert A. Ferguson, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of October 8, 1985.

Air Force nominations beginning Paul E. Abt, and ending Walter R. Woodruff, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 8, 1985.

HOUSE OF REPRESENTATIVES—*Monday, October 21, 1985*

The House met at 12 o'clock noon and was called to order by the Speaker pro tempore [Mr. WRIGHT].

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
October 17, 1985.

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on Monday, October 21, 1985.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Gracious God, we are a people of many backgrounds, a nation of diversity. Enable us to honor our differences and to offer respect to those whose way of expressing their faith is alien to our expression. Help us to make judgments in the spirit of understanding, attempting always to remember that we share a common creation and destiny. In Your holy name we pray. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 79. Joint resolution to designate the week beginning October 6, 1985, as "National Children's Week."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2409) "An act to amend the Public Health Service Act to revise and extend the authorities under that act relating to the National Institutes of Health and National Research Institutes, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2959) "An act making appropriations for energy and water development for the fiscal year ending September 30, 1986, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate numbered 22, 32, 34, and 46 to the above-entitled bill.

The message also announced that pursuant to the provisions of sections 1928a-1928d of title 22, United States Code, the Vice President appoints Mr. ROTH, Mr. ZORINSKY, Mr. COHEN, and Mr. PRESSLER as delegates, on the part of the Senate, to the North Atlantic Treaty Organization meeting in San Francisco, CA, on October 11-15, 1985.

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 195. Joint resolution to designate the week of October 20, 1985, through October 26, 1985, as "National Temporary Services Week."

ERROR AND TRAGEDY CONTINUE TO COMPOUND EACH OTHER IN NICARAGUA

(Mr. FRANK asked and was given permission to address the House for 1 minute.)

Mr. FRANK. Mr. Speaker, error and tragedy continue to compound each other in Nicaragua. Added to what seems to me a terribly mistaken American policy supporting war against that Government, we now have that Government engaging in activities against its own people which are short-sighted and wrong.

The fact that one is being attacked from the outside is no justification whatever for suppressing basic liberties. A free press is a strength for a society, not a weakness.

Mr. Speaker, I very much regret, as one who has opposed American policy making war on the Nicaraguan Government, the refusal of the Nicaraguan Government to behave in a way that respects the importance of basic liberties.

We have to reject the notion that democracy, freedom, and civil liberties weaken a society; they strengthen it, and the Nicaraguan Government's recent actions cutting back in these areas is wrong.

MARK NASHPITZ FLIES TO FREEDOM

(Mr. GILMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GILMAN. Mr. Speaker, I am extremely pleased and gratified to share with my colleagues the news that Mark Nashpitz of Moscow, a former Soviet Jewish prisoner of conscience and long-term refusenik whom I adopted when I first arrived in Congress many years ago, arrived in Vienna yesterday along with his wife and son and has today been reunited with his aging parents in Israel.

Mark's 15-year odyssey for an exit visa was a particularly difficult, uphill battle, since his father had defected from the Soviet Union some 30 years ago, when Mark was just a small boy. Branded the son of a traitor, Mark's life as a student and later as a dentist was accentuated by harassment, interrogation, arrest, and two terms of internal exile—a total exile of 6 years. Once freed, Mark was only allowed to work in a morgue. He said to me in January, during our recent congressional delegation visit to Moscow, "As a dentist I was trained to help the living, but now they only let me work on the dead."

Mr. Speaker, a new life of freedom now awaits Mark and his family. The Iron Curtain has parted for a brief moment, for which we say a prayer of thanksgiving on Mark's behalf, and our hopes and prayers that this signifies some progress in Soviet emigration policies.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 2526

Mr. MARTINEZ. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of the bill, H.R. 2526.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

TRIBUTE TO J.J. AND ANDREA RODRIGUEZ ON THEIR 50TH WEDDING ANNIVERSARY

(Mr. MARTINEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARTINEZ. Mr. Speaker, I wish today to congratulate two of my constitutents, J.J. and Andrea Rodri-

guez, who will be celebrating their 50th wedding anniversary on October 20, 1985. This Monterey Park, CA, couple have long both made major contributions to the labor union movement and to their community and country.

J.J. Rodriguez is one of the first Hispanics to have graduated from Huntington Beach High School. He later attended the University of Southern California. Mr. Rodriguez, currently president of the Los Angeles County Federation of Labor, was chief executive officer of the United Food and Commercial Workers Union, Local 563, for more than 20 years. President Lyndon B. Johnson appointed him to the Equal Employment Opportunity Commission. Mr. Rodriguez also served as chairman of the California Industrial Relations Committee. He is one of the founders of the Labor Council for Latin American Advancement, as well as a founding member and former president of the Los Angeles Community Service Organization. J.J. Rodriguez also served recently on the executive board of the Los Angeles Olympics Committee.

Andrea Rodriguez has worked closely with her husband in his public activities, as well as helping him raise four children. Their sons, Jim and Edmund Rodriguez, and their daughters, Helen Holguin and the late Josephine Hughes, have all carried on their parents' work in the labor movement.

J.J. and Andrea Rodriguez have distinguished themselves through their contributions to their brothers and sisters in the labor movement and to Los Angeles and the Nation. I congratulate them on the occasion of their 50th wedding anniversary, and send my best wishes to the entire Rodriguez family.

THERE BEATS A NEW HEART, THE PENN STATE HEART

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker, in Hershey, PA, today there beats a new heart, the Penn State heart, a new temporary implant that has given life and hope to an individual whose own heart has been ravaged by disease.

Mr. Speaker, this development is one not only geared to the individual whose life is at stake, but it gives hope to the entire medical community, and, really, to the world at large, that nothing can stop medical progress, to a point where every citizen of the world will some day have the hopes that his or her life will be prolonged and the security of life will be made more secure.

Mr. Speaker, with that, we congratulate the medical team at Hershey Medical Center and invite the Members of the House to inquire further of what developments this means for the medical community at large.

I thank the Speaker.

UNITED STATES DEPENDENCE ON SOUTH AFRICAN MINERALS

(Mr. REID asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REID. Mr. Speaker, South Africa possesses substantial reserves of several strategic minerals on which the United States and our allies are import dependent. We import the vast majority of our consumption of chromium, manganese, platinum, and cobalt, and over half of these imports come from South Africa. Further, South African railways transport strategic minerals from bordering southern African states, from whom we also import substantial quantities of critical metals.

The only comparable source for these critical materials is the Soviet Union—on whom we obviously do not want to depend for our national security. Given the instability in South Africa, the United States must reduce its vulnerability to supply disruptions. A logical first step is to maintain, if not build up, our strategic stockpiles. A longer term approach calls for developing a broader supply base, both domestic and foreign. And we must develop recycling technologies to reduce demand for new materials, find more efficient manufacturing processes, and create material substitutes. New technologies, however, will take at least 10 years to develop and implement.

In the meantime, the U.S. Government must pursue a policy toward the region which guarantees an uninterrupted supply of critical materials. Social tensions in South Africa threaten our access to critical resources. Sanctions passed by Congress—most of which were approved by the President—serve two purposes: They keep us true to our democratic ideals, but they also secure the flow of critical metals by pushing South Africa to end apartheid, thereby defusing revolutionary pressures.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on the motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall vote, if postponed, will be taken on tomorrow, Tuesday, October 22, 1985.

NATIONAL TOPSOIL PRESERVATION ACT OF 1985

Mr. UDALL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 463), to require the Secretary of the Interior to establish a program to ensure the stockpiling and replacement of topsoil on public lands and other lands which are moved or covered by surface mining projects, reclamation projects, and other Federal and federally assisted projects, and for other purposes, as amended.

The Clerk read as follows:

H.R. 463

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Topsoil Preservation Act of 1985".

SEC. 2. The Congress finds and declares that—

(1) topsoil is a valuable, unique, and peculiar natural resource upon which future generations will be dependent and that while ownership of land in the United States, both privately and under the control of government agencies, provides those in control with certain rights, it also carries with it a responsibility not to destroy the topsoil or so intermingle or bury it that it will not be easily and economically accessible for use at a later date;

(2) in order to promote the general welfare and to protect the natural resources of the Nation for both present and future generations, it is necessary in the use and management of the Nation's land resources to provide minimum standards which incorporate environmental, ecological, social, esthetic, economic, conservation, and other factors and prevent the destruction of topsoil and unnecessary interruption of plant reproduction and soil-building processes; and

(3) failure to establish minimum standards for the use of land which will protect against the loss of topsoil in and of itself causes those using inadequate standards to move to areas where destructive practices are permitted and therefore such failure to establish such minimum standards affect and is a burden upon commerce among the States.

SEC. 3. Each project or activity which is carried out on Federal land (including lands under the jurisdiction of the Secretary of the Interior), for which any direct or indirect Federal assistance is provided, or which is carried out by the Secretary of the Interior or any other agency or instrumentality of the United States, and which involves the moving or covering of topsoil in changing an area of land from its natural state shall be subject to this Act. Such projects and activities shall hereinafter in this Act be referred to as "projects".

SEC. 4. (a) There is hereby established a National Land Resources Protection Commission, hereinafter in this Act referred to as "the Commission," which shall be composed of the Secretary of the Interior and four other members. The President shall designate the Secretary of the Interior as Chairman of the Commission.

(b) Members of the Commission shall be appointed by the President, by and with the advice and consent of the Senate, for terms of four years beginning July 1 of the year following each Presidential election. Vacancies on the Commission shall be filled in the

same manner as original appointments but only for the unexpired term and any member of the Commission may be removed by the President at any time. Each member shall receive compensation at the rate of $47,500 per annum.

(c) The Commission is authorized, subject to the civil service and classification laws, to select, appoint, employ, and fix the compensation of such officers and employees as are necessary to carry out the provisions of this Act and to prescribe their authority and duties.

(d) The Commission shall hold such meetings, conduct such hearings, and establish such rules and regulations in accordance with chapter 5, title 5, United States Code, relating to administrative procedure, as may be reasonably necessary to enable it to carry out the provisions of this Act.

(e) The Commission may delegate responsibilities hereunder within any particular State to a commission or commissions within that State under terms and conditions assuring that at least the Federal minimum standards established under the provisions of this Act will be adhered to in such State. In each State where responsibilities have been delegated hereunder, the Commission shall exercise a continuing oversight to assure that the purposes of this Act are being constantly carried out and the Commission is also authorized to cancel such delegation of authority at any time.

(f) The Commission or any member may administer oaths or affirmations or take evidence; and may by a majority vote subpena and compel the attendance of witnesses or the production of materials.

SEC. 5. (a) The Commission shall establish minimum standards for all projects which assure that a minimum of twelve inches of topsoil or such lesser amount of topsoil as may exist shall be stockpiled from those areas of each project where the shape or contour of the land is changed or where the land is covered. Such topsoil shall not be intermingled with other materials or buried so that it will not be easily and economically accessible for use at a later date; and, to the extent it is sufficient or adequate to do so, such topsoil shall be used to form a top layer of uniform depth and a minimum of twelve inches deep on all areas of the completed project where soil will be exposed to natural elements. Any excess topsoil from such stockpile which is not so used or needed to cover such exposed areas to a depth of twelve inches or more shall be stockpiled permanently in a place where it will improve plant production or be easily and economically accessible for use at a later date.

(b) Where sufficient subsoil which is nontoxic to plantlife will not otherwise by available on the exposed areas of a completed project and to the extent available from the project, the Commission shall require the separate stockpiling and replacement in a sublayer of sufficient quantities of appropriate soil to provide such a nontoxic layer of subsoil as if necessary for the production of such plantlife as is normally considered environmentally, ecologically, esthetically, and economically acceptable to the area.

(c) The overriding objective of this section is to require that the areas of a completed project where the earth is normally exposed shall be left in at least substantially as good a condition to sustain vegetation as existed prior to the beginning of the project and to protect against the destruction of the productive capacity of existing topsoil which has currently been exposed to the elements or used to sustain plantlife; and the Commission shall establish rules and regulations and provide interpretations consistent with such objective.

(d) For the purposes of this Act, the term "topsoil" shall mean the surface layer of soil, commonly known as the A-horizon, which contains organic and mineral matter in such quantities as are needed to provide the fertility necessary for the production of vegetation.

SEC. 6. The Commission shall establish minimum standards to assure that projects covered by this Act will not cause pollution of existing streams, land slides, flooding or substantially change the volume of water to be carried by natural waterways on land adjoining the immediate construction area except where such change is consistent with an approved State or Federal water resource policy or law.

SEC. 7. No soil shall be moved on any project where the moving or covering of topsoil covers an area in excess of one hundred thousand square feet until a license or letter of approval to do so has been issued by the Commission or by a commission to whom authority has been delegated under section 4(e) of this Act. A letter of approval from the director of the appropriate State soil conservation service shall be deemed sufficient for purposes of the preceding sentence with regard to any agricultural lands being restructured for the purpose of increased productivity, soil conservancy, water conservancy, or reduction of air or water pollution.

SEC. 8. On all projects where the Commission deems it necessary to assure the fulfillment of the purposes of this Act, the Commission may require prior to the beginning of any moving of earth, the submission of a plan prepared by a professional engineer or surveyor. Where appropriate, aerial photographs showing details in sufficient contour to the satisfaction of the Commission or a United States Department of the Interior Geological Survey topographic map may be substituted to show the area in its current state. Such plan may require the showing of boundaries of the area of land affected and the elevation involved, drainage plans below, above, and away from the area of land affected both before and after construction, the topography of the land involved and its relationship to adjoining property, the direct flow of the water and its relationship to natural waterways, a definite and detailed plan in accordance with section 5 herein for removing and stockpiling and replacing the soil from the land in separate layers and a segregated state so as to assure that it will be kept and replaced in a usable condition for sustaining vegetation, and such other information as the Commission deems necessary to assure that the particular project will not violate the minimum standards established under this Act. The Commission may also require the posting of such bond or deposit of cash or securities as it deems necessary to assure that such standards will be met prior to completion of the project and within a reasonable time during the completion of various stages of the project.

SEC. 9. The Commission shall submit a report to the Congress by July 31 of each year setting forth the activities of the Commission and shall also submit to the Congress such other reports as may be requested by committees of the Congress established by either the United States Senate or the United States House of Representatives.

SEC. 10. There is authorized to be appropriated not more than $6,000,000 annually for the administration of this Act for each fiscal year commencing after September 30, 1986.

COMPLIANCE WITH BUDGET ACT

SEC. 11. No authority under this Act to enter into contracts or to make payments shall be effective except to the extent and in such amounts as provided in advance in appropriations Acts. Any provision of this Act which, directly or indirectly, authorizes the enactment of new budget authority shall be effective only for fiscal years beginning after September 30, 1986.

The SPEAKER pro tempore (Mr. FRANK). Is a second demanded?

Mr. BARTON of Texas. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Arizona [Mr. UDALL] will be recognized for 20 minutes and the gentleman from Texas [Mr. BARTON] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Arizona [Mr. UDALL].

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous matter on the bill presently being considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. UDALL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today I am bringing before the House H.R. 463, the National Topsoil Preservation Act. This bill was considered in the Committee on Interior and Insular Affairs and approved by a voice vote.

The intention of myself and the principal author of this legislation, Representative NEAL SMITH, is relatively simple. The Nation is losing topsoil at an alarming rate. The trend is intolerable and must be reversed. Topsoil is utterly essential not only to our economy and the health of our environment, but ultimately to life itself. Once it is gone it cannot be replaced.

We are fully aware that much has been done to try to curb this trend. We are very pleased by recent efforts to discourage agricultural practices that stimulate farming of highly erodible lands, for example. But it is apparent to us that there are gaps in our national topsoil conservation policy that deserve to be addressed.

H.R. 463 states that certain kinds of projects must plan for the conservation and stockpiling of topsoil. These projects are those which are carried out on the public lands, for which

direct or indirect Federal assistance is provided, or which is carried out directly by an agency of the United States and which involve the moving or covering of topsoil. All such projects would be subject to review by a five-member National Land Resources Protection Commission, established by the law and chaired by the Secretary of the Interior. The Commission would be empowered to delegate its authority to a competent State agency, and it would be my hope that this would be the general case because State soil conservation agencies generally would be the most efficient and direct mechanisms for carrying out the purposes of the law. The State agencies would be responsible for setting and administering topsoil conservation standards within their own jurisdictions, as long as those standards met the minimum national standard established by the National Land Resources Commission.

Mr. Speaker, this model has worked with considerable success already in the area of the strip mining of coal. There, we have seen that sensible land reclamation and conservation practices can efficiently be made a part of normal mining practices. I anticipate that this would be the case with the kind of Federal construction projects contemplated by H.R. 463 and I recommend its approval by the House.

I include with my remarks a letter from the Honorable KIKA DE LA GARZA, chairman of the House Committee on Agriculture, concerning this bill:

COMMITTEE ON AGRICULTURE,
Washington, DC, October 21, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House,
House of Representatives, Washington, DC.

DEAR MR. SPEAKER: I am writing concerning H.R. 463, a bill to require the Secretary of the Interior to establish a program to ensure the stockpiling and replacement of topsoil on public lands and other lands which are moved or covered by surface mining projects, reclamation projects, and other Federal and federally assisted projects, and for other purposes. The bill has been referred jointly to this Committee and to the Committee on Interior and Insular Affairs. The bill has not been acted upon by our Committee. The Committee on Interior and Insular Affairs wishes to take the bill up this week under suspension of the Rules.

In order to expedite consideration of this bill, I would not object if it is taken up on the floor of the House without action by the Committee on Agriculture. This action is taken without in any respect waiving jurisdiction with regard to the subject matter addressed in this bill or in similar bills. Further, if the bill should become an issue with the Senate, I intend to request that this Committee be represented in any conference that may be held.

Your consideration in these matters is greatly appreciated.

With best wishes,

Sincerely,

E. (KIKA) DE LA GARZA,
Chairman.

Mr. Speaker, I reserve the balance of my time.

□ 1215

Mr. BARTON of Texas. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to say that I have nothing but the utmost admiration for my distinguished colleague from Arizona. The gentleman is the chairman of the committee that I have the honor to serve on, the Interior and Insular Affairs Committee. I totally agree with him and his objectives in trying to pass this legislation.

However, I must reluctantly oppose the legislation. There are a number of reasons that I do this. First and foremost is that the Department of the Interior has informed me that they oppose it for several reasons.

I think that H.R. 463 needs a more thorough consideration before it passes the House. It would establish another layer of bureaucracy by creating a commission which would set standards to ensure the stockpiling and replacement of topsoil on public lands and other lands disturbed by federally associated projects.

We all agree that preservation of topsoil is a very necessary responsibility of all land managers, Federal, State, and private, if we are to give our future generations a basis on which to provide food and fiber. Presently, however, the Soil Conservation Service already provides the technical assistance for soil surveys, mine restoration, and other activities relating to topsoil protection, and under existing law, each agency that manages Federal lands or conducts activities on other lands is responsible to replace topsoil which it disturbs.

Mr. Speaker, if topsoil is not protected now under the various laws which are presently on the books, we need to use our oversight authority to ensure that topsoil is protected. In these times of mounting deficits, we do not need more commissions and more laws which cost more money to do what is already required.

Mr. Speaker, there are several questions raised by the Department of Agriculture and the Department of the Interior which have not yet been satisfactorily answered. For instance, section 5 of the bill requires the removed topsoil not to be intermingled with other materials. In the mountains and in the semiarid areas of the United States, topsoil is so thin that it is impossible not to intermingle topsoil with other material, especially on steep slopes.

Section 5 also requires the stockpiling of topsoil from projects where the shape or contour of the land is changed or where the land is covered.

What does "cover" mean? Would "cover" mean federally funded water reservoirs? These and other questions must not be answered before H.R. 463 is passed. No hearings in this session of Congress make it necessary to return H.R. 463 for hearings before at least the Agriculture Committee.

For these reasons, I urge my colleagues to oppose H.R. 463.

Mr. UDALL. Mr. Speaker, one of the most able and distinguished and visionary Members of this House is the gentleman from Iowa [Mr. SMITH] who has fought the fight for several years to do something about the erosion of our topsoil, and I yield to the gentleman such time as he may consume.

Mr. SMITH of Iowa. I thank the gentleman for yielding time to me.

Mr. Speaker, topsoil is life itself. Topsoil is the accumulation of residue of thousands of years of plant, human, and animal life and one of the most valuable resources on Earth. Both public and private owners of the land enjoy certain rights while it is under their control, but they cannot take the land with them when they leave the Earth. Destruction of topsoil, during their tenure and use of the land, represents a loss to dozens of future generations.

The preservation of the Nation's topsoil is an issue that has confronted this country for years. Most efforts have been concentrated mainly on halting erosion, the loss of soil through wind and water. Some of the topsoil moved from one place to another by wind and water erosion is not permanently lost; but merely moved to a new location which is less advantageous for this generation. That kind of wind and soil erosion continues to represent a loss to several generations, but there are other sources of soil loss which are even more permanent. H.R. 463 is designed to reduce the permanent loss from two of these other sources, namely, losses on construction projects and Federal land. To take a critical look at the loss of topsoil on construction projects in no way downgrades the importance of continuing efforts to combat erosion with existing programs.

While there may be less topsoil destroyed or lost through mixing it with toxic subsoil or inseparable rubble on mining or construction projects, it represents a more permanent loss and is even less necessary. Those who belittle preventing a loss of topsoil on mining and public construction projects because they represent less acreage of land than erosion on farmland are not only ignoring the more serious nature of the loss but also display a lack of full commitment to long-term soil conservation. I remember that some people for years also said losses through strip mining were not important because greater losses were occurring from water erosion, but in fact, losses of topsoil from every cause is

important and especially those which are irreversible, such as strip mining and construction procedures. If we only dealt with the greatest offense in passing criminal laws, the only crime in the United States would be murder. If we only protected the trees which are being eliminated in the greatest quantity, we would not protect the California redwoods because there are not many of them compared to the giant Alaskan pines and cedars. We should take steps provided in the bill to protect against the permanent loss of topsoil on Federal land and on construction projects.

It takes thousands of years to create topsoil which can be destroyed in construction, but in most cases, with a little management, it can be stockpiled or placed where it would continue to be used to support vegetation. Some people want to prohibit construction or other temporary uses productive land but they too are not looking at the most important consideration, namely, whether the temporary use is done in a way which destroys the topsoil. Temporary use of productive land for buildings when done in a way which does not destroy topsoil does not represent as much of a permanent loss as where topsoil is destroyed whether on prime farmland or less than prime farmland.

It is surely time to pass the bill to prohibit destruction of topsoil on public works projects and Federal land. I am proud to cosponsor with the chairman of the Interior Committee, Mr. UDALL, this legislation which would provide that those responsible for such projects, including highway projects, would be required to keep the topsoil separate instead of mixing it with subsoil or material toxic to plant life. They could either use the soil to cover exposed areas or they could stockpile it were it would be easily and economically accessible for use at a later date. Unlike most soil conservation programs it does not require a Federal spending program or a large staff. It is largely self-policing and only requires changing methods of handling soil on those projects.

The bill provides for a five-member commission to carry out the purposes of the act and it sets minimum standards for topsoil preservation. The commission is empowered to delegate authority for enforcement to State agencies but would maintain oversight and would make sure that spot checks are made to guarantee compliance. Considerable variations now exist among the States of the Nation on the degree of concern over the preservation of topsoil. This bill adopts the approach of setting a uniform minimum standard, but each could establish a State standard for each different major soil type, as long as it meets the minimum standards. I would hope that this bill will give them the incentive to do so. The major concern should be that acceptable standards are set and adhered to in all of the Nation. The five-member commission for administration of the program is empowered to appoint an executive director or to organize it as they deem appropriate, however, since the Secretary of Interior is the chairman of the commission, I would expect that most of the work can be preformed with present employees who have the qualifications and are presently assigned other duties in a related field.

I am pleased that this topsoil bill, H.R. 463, is finally being passed by the House and I am especially pleased that the chairman of the Interior Committee, the gentleman from Arizona, Mr. UDALL, has joined as cosponsor. I urge passage of the bill.

Mr. BARTON of Texas. Mr. Speaker, I yield such time as he may consume to my distinguished colleague, the gentleman from Pennsylvania [Mr. GEKAS].

Mr. GEKAS. I thank the gentleman for yielding.

Mr. Speaker, one of the cardinal sins committed year-in and year-out in the Congress of the United States is duplication of programs. The public is sick and tired of it, and we Members who have to struggle with these deficits year after year, and not just the deficits, but the backlog of problems with which we have to deal, are also sick and tired of duplicating programs and overlapping them time after time.

This is not to denigrate the importance of the preservation of topsoil. But it is impossible to believe that we do not have ongoing programs and ongoing agencies within the Federal establishment to take care of the subject matter of this legislation and its routine business. We have conservation programs and we have agricultural programs into which we pour millions of dollars that I believe can construct within its own borders a program to make sure that our topsoil is preserved.

Now, if that is not enough, if it is not duplication of Federal programs, I can bet you whatever amount of money you are willing to bet that it does duplicate and overlap and tramp upon some State programs throughout the 50 States. There is not one State in the Union, as far as I know, that does not have some kind of a program or bureaucracy set up for the topsoil problems within its jurisdiction.

So it seems to me that we ought to be taking a very strong look at this and other similar legislation when there already exists the mechanisms and the structure to pursue the problems inherent in the issue.

That is why I am so disturbed about the helter-skelter approach. I am not saying that this was not well thought-out, but I am talking about the Congress as a whole, in having a helter-skelter overlapping, increasing bureaucracy, duplicating process that is making everybody weary of what we do around here.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. GEKAS. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. The gentleman says the States could do what the bill requires. There is no doubt about it that they could. But the fact is some do not. That is the reason, when I drove through Pennsylvania on new Highway 80, I saw bleeding banks along the highway. There is no excuse for that. Topsoil had been buried and it had not been put back over the bleeding banks. it had not been preserved.

The gentleman's own State of Pennsylvania is not doing it. The highway commission up there is not doing it. They could have done it without any extra expense if they had been required to, and this will raise their consciousness so that they will do that kind of thing.

Mr. GEKAS. If the gentleman will allow me to reclaim my time, I will ask the gentleman to join with me, and we will travel up to Harrisburg, PA, and visit the capital there, the transportation department and the conservation department, the department of environmental resources, and together we will put pressure on them to do what they are already authorized to do in order to raise the consciousness of the Pennsylvanians who may not have seen the problem that the gentleman has so readily seen.

Mr. SMITH of Iowa. This bill will send a message to all 50 States. It will not be necessary for you to travel around like that, and it need not cost money, because the responsibility could be added to the commission which now handles surface mining responsibility and it would cost little or nothing.

Mr. GEKAS. We really do not need it.

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. GEKAS. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Speaker, the gentleman's State of Pennsylvania has been the, or one of the, national leaders in this whole business of restoring the land after strip-mining coal, as I have many times pointed out in my visits to the gentleman's State. But you can do it, as the gentleman from Iowa said, without any extra expense. They have developed the technique in the strip-mining business, so you take the topsoil off and then you go to the next layer and then you go to the next layer, and then you put them back, down the road a ways, in the order you took them off, and you end up with the topsoil back covering up the land.

You can do it in strip mining. It has been proven in the gentleman's own State that it can be done. I think you can do it for other kinds of land.

Mr. GEKAS. I do not doubt that at all. I thank the gentleman for pointing that out. I am simply saying that we can do all that you want to do and raise the consciousness of the American people and all those people who are charged with the responsibility of preserving our topsoil without passing this legislation. That is my point.

Mr. UDALL. If the gentleman will yield further, the proof of the pudding is in the eating. The gentleman from Iowa for 8 or 10 years has been introducing this bill. He and I have been introducing it together for 6 years. And every day the Sun comes up and every day the highway builders and the dam builders and other people who move topsoil go to work, and today, tomorrow, next week, next month, more topsoil will be gone. Why has not the coordination occurred that the gentleman suggests?

Mr. GEKAS. If the gentleman will permit me to reclaim my time, I am saying to the gentleman that I believe in the last 10 years, while my distinguished colleagues have been pursuing this, there has been improvement in it. Perhaps you can point out an area where they are backsliding on the preservation of topsoil or the care and feeding of topsoil. But there are other areas who have discharged their responsibilities and who will continue to do so whether we ever discuss this or pass this legislation. That is the point. The point is that this is already in the structure. All we have to do, as responsible State citizens, is to make sure that our own agencies in the State take care of the problem.

The Soil Conservation Service, the agricultural programs and conservation programs already embedded in the Federal process, can also be vehicles, without this extra layer of bureaucracy, as the gentleman from Texas has so well pointed out.

Mr. UDALL. Mr. Speaker, I have no further requests for time.

Mr. BARTON of Texas. Mr. Speaker, I yield myself such time as I may consume, and I would like to ask the distinguished gentleman from Arizona a question.

I would like to ask the distinguished chairman of the Committee on Interior and Insular Affairs how he would answer the administration's supposition that this would create an unnecessary layer of bureaucracy. To be quite honest, I have read the bill, and I do not see that it would. I would just like to have the chairman's comments on that particular argument.

Mr. UDALL. Mr. Speaker, there is no contemplation of a large additional bureaucracy. We are talking about a commission, a small commission, chaired by the Secretary of the Interior, who already gets paid and has an office and staff. As the gentleman from Iowa [Mr. SMITH] pointed out, all you have to do is to say to the State highway department of Texas, Arizona, or Iowa, "Here are some standards, here are some Federal standards that have been produced. When you are building a highway or a reclamation dam or some other Federal structure, do it this way, according to these standards."

The bill provides that if that is done, then the State would do the work. I think it could very well happen that way.

Mr. BARTON of Texas. But the gentleman does not foresee a separate bureau created, with people running all over the country? There would be a five-member commission, who would set standards, meet two or three times a year.

Mr. UDALL. Not at all. Nothing very extensive at all. I do not think you would see a new bureaucracy needed to put this program into effect.

Mr. BARTON of Texas. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona [Mr. UDALL] that the House suspend the rules and pass the bill, H.R. 463, as amended.

The question was taken.

Mr. BARTON of Texas. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings of this motion will be postponed until tomorrow.

□ 1230

INTRODUCTION OF PROPOSAL FOR GOVERNMENT OF THE NORTHERN MARIANA ISLANDS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona [Mr. UDALL] is recognized for 5 minutes.

Mr. UDALL. Mr. Speaker, when the Northern Mariana Islands became the newest member of the American political family in 1976, a financial relationship between the Federal and insular governments was specified in the covenant to establish the Commonwealth.

This relationship provided for the operation of government in these western Pacific islands; development of essential infrastructure; and private sector growth. It was to last through the 7 fiscal years following the approval of the covenant.

Public Law 94-241 also required representatives of the President and the Governor to recommend how these Federal and Commonwealth responsibilities should be met in multiyear periods after this initial period. Negotiations over the past year have led to a recommendation for a proposed new relationship for the 7 fiscal years which began October 1.

The administration has requested congressional consideration and approval of the proposed new financial relationship between the Federal and Commonwealth governments. I introduced their proposal today to permit the consideration that the administration and the government of the Northern Mariana Islands seeks. Joining me in doing so were the ranking Republican of the Committee on Interior and Insular Affairs, our colleague from Alaska; and the committee's most active majority and minority members on insular matters, the gentlemen from the Virgin Islands and California [Mr. LAGOMARSINO].

Introducing the proposal for consideration, of course, should not be misunderstood as an indication of an intent to approve it. Further, even if it merits approval, amendments might very well be necessary.

It is my intent, however, as chairman of the Committee on Interior and Insular Affairs, to have this legislation considered expeditiously with a hearing on the proposal later this month. If the proposal does indeed merit enactment, I will seek approval by the House, with any necessary amendments, during the remainder of this session.

It is my understanding that the chairman of the committee of the other body which has jurisdiction over insular areas matters has a similar intention. I suspect that he joins me in considering congressional action on the recommendation a fundamental obligation assumed by Congress when it approved the covenant.

The chairman of the Senate committee may also join me in regretting that consideration could not take place prior to the beginning of the current fiscal year when the new relationship was to take effect. Unfortunately, the administration did not submit its proposal in adequate time for that.

Fortunately, there is no gap between authorizations for the initial and the proposed financial relationships. The law approving the covenant itself provides that the initial financial relationship will be maintained until it is replaced.

INTERNATIONAL TERRORISM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona [Mr. RUDD] is recognized for 5 minutes.

Mr. RUDD. Mr. Speaker, most of the peoples of the world expressed shock and indignation when the PLO terrorists that hijacked the Italian cruise ship, the *Achille Lauro*. We should have been outraged but not shocked.

Terrorism is a new form of warfare. It gains additional adherents every day. For more than a week this act of piracy dominated the newsprint and electronic media when it was learned that the hijackers had wantonly murdered an elderly passenger, some commentators expressed surprise. They should not have expressed surprise.

We all applauded when the United States Navy pilots forced the Egyptian airliner to land in Sicily where the Italian Government took custody of them and in the media we accused the Egyptian President of lying to us, and he did lie to us. We complained about the action of the Italian Prime Minister in releasing the PLO representative who was accused of being the leader of the hijackers and planning the whole plot in the first place.

The Italian Government will try the four hijackers and perhaps two accomplices. They will be defended by counsel in court and perhaps they will be convicted. But since Italy has no death penalty, the harshest sentence that they can receive is life imprisonment, and we all know that very few prisoners sentenced to life in prison actually serve the full term.

Perhaps we will find some reason for satisfaction if the Italian courts do convict the hijackers and impose punishment, but this is really only a distraction. Terrorists do not attack their enemies directly. They attack innocent civilians and then manipulate public opinion. If that Italian ship's cruise had not been interrupted by the hijackers we would never have heard about the *Achille Lauro.* But because the passengers, enjoying a brief vacation, some of them quite elderly, were threatened and terrorized, four hijackers, there may have been one or two more assisted, were able to capture the attention of the entire world.

Once a defenseless citizen is taken hostage in these circumstances, he is dead. He may return to life if the terrorists conclude that it is their best tactic, but they operate totally without restraint. They will murder, they will torture to gain their ends. While we publicly maintain a policy of nonnegotiation, the truth is that because we put a high value on human life, deals have been made. For the most part, the hijackers, no matter what they do, escape without punishment.

You may think me vengeful and you may think me bloodthirsty when I say that we cannot continue to abide by the rules of civilized behavior and ever hope to deal effectively with terrorism. The zealots who engage in terrorism are willing, sometimes anxious even, to give their lives to their cause. The four who took over the cruise ship have become instant heroes in that community which supports and advances terrorism.

Unless we are prepared to use the same force and violence against the terrorists as they are eager to use against the civilized world, we will continue to lose this battle. We cannot protect civilians everywhere throughout the world, but if civilized society will only recognize the truth of the situation, we are capable of immediate retribution. President Reagan says that we must not do this because some innocent individuals may suffer. What about the innocent hostages that have been taken prisoner by terrorist groups and are murdered by terrorist groups? We know, in general, the sources of terrorism so we are not surprised where it comes from.

We have military capacity to respond immediately and inflict terrible penalties. Undoubtedly, some civilians may die, as they did when the Israelis raided the PLO headquarters in Tunis. But if the united civilized peoples of this world make it plain that we will no longer tolerate terrorism, that where it occurs we will inflict massive, immediate retribution, those who now employ terrorism will get the message.

We may feel some sympathy for the Palestinians in their quest for their own homeland. We may attempt to understand the religious differences which divide the Middle East. We may say, well, the Arabs have a point. On the other hand, Israel is only trying to defend itself. But the bottom line is that the terrorists ignore all of the rules, and so should we when terrorists attack or find a way to return punishment for that attack.

Until Yassir Arafat and the PLO controls and contains the fanatics in its organization, until the Ayatollah Khomeini restrains his religious zealots, until the various Moslem sects struggling for control of Lebanon abandon terrorism, we are, in my opinion, justified in using our military power or whatever forces necessary to wipe out the supporters and sources of terrorism.

This is war. In every war innocent people are killed. The protagonist who used force in the most effective manner triumphs. We have the force. The question is: Do we have the will?

PARLIAMENTARY INQUIRY

Mr. GEKAS. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. GEKAS. Mr. Speaker, since the gentleman from Arizona [Mr. RUDD], the gentleman from North Carolina [Mr. COBLE], and myself are all going to engage in the same discussion, is it possible to amalgamate the special orders entered into for the three of us into one block of time and allow us to yield back and forth so that we can complete a three-way dialog on it?

The SPEAKER pro tempore. The Chair will call the Members' names in the order they appear here. No other Members are seeking special orders today. We will call Members' names in order.

Mr. GEKAS. I thank the Chair.

INTERNATIONAL TERRORISM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina [Mr. COBLE] is recognized for 5 minutes.

Mr. COBLE. Mr. Speaker, I commend the gentleman from Arizona [Mr. RUDD] for the comments that he has just made with which I am in agreement. It seems, Mr. Speaker, that there was a time, even in my lifetime, when reasonable men and women who differed could resolve those disagreements in an orderly fashion. But as the gentleman from Arizona has just pointed out, the terrorists do not operate within those standards or within those guidelines. Something arises that displeases them and then they place a gun to an innocent hostage's head, and that is how they resolve differences. I find that offensive at best, and I do thank the gentleman from Arizona for having directed our attention to this very, very crucial subject.

□ 1240

I resent the fact that a handful of terrorists are in positions that result in dictating American policy, dictating world policy, if you will. I am very much concerned about this. I am sure that my colleagues share this concern. I think the interception of the airliner was a fine hour. Even though there had been some unfavorable fallout because of it, I think that was the right decision at that time.

Again, Mr. Speaker, I thank the gentleman from Arizona [Mr. RUDD] for what he has done for us today, what he has shared with us, and I yield to the gentleman from Arizona [Mr. RUDD] to use whatever time he wishes.

Mr. RUDD. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I was attempting to point out that the terrorists in their activities ignore all the rules of civilized society and what we think the rules should be and to point out that because they do this, we must fight fire with fire and we must ignore those rules, too, in dealing with these terrorists when we are confronted with the problems that they give to us.

And I was saying that with respect to Yasser Arafat, who is the self-proclaimed and actually is the leader of the Palestine Liberation Organization, until he controls these fanatics, until he contains these fanatics within his own organization, and with respect to

Ayatollah Khomeini, until he restrains his religious zealots, until the various Moslem sects struggling for control of Lebanon abandon terrorism as a tool of attempting to bring attention to their plight in the world, then we are, in my opinion, justified in using our military power or whatever force is necessary to wipe out these supporters and these sources of terrorism that kill innocent people indiscriminately simply for the sake of gaining worldwide publicity.

What this comes down to is war, and war is a 24-hour operation. In every war, innocent people are killed, and the protagonists who use force in the most effective manner are the ones who triumph.

We have the force to do what we have to do. The question that now comes is, do we have the will to do this?

I appreciate the action of the gentleman from North Carolina [Mr. COBLE] in stating his very firm opinions on the subject of terrorism, and I compliment him. I also compliment the gentleman from Pennsylvania [Mr. GEKAS], who also has taken out a special order on this subject of terrorism in order to try to find ways and means by which we can gather together to do it.

First of all, the United States of America does have the force, but we cannot use that force without, in matters of foreign policy, attempting to get the support of our allies throughout the world. We want to do that. But I think, as long as we advise our allies and if they will support us in the intent, then we can, if we have to, act unilaterally.

Of course, we cannot use our full military force against individuals who are providing those acts of terrorism, so we must really get down to the subject of attempting to find a counterforce which can do the job without using the entire Navy, Marine Corps, Air Force, and Army in order to get this job done. I am certain that we can do that, and I am certain that men of good will, both here in the Congress and in this country and elsewhere around the world, can put their heads together to find a way in order to do this.

Let me just remind the Members of this. I am not advocating that we do this today, but about 80 years ago President Teddy Roosevelt——

The SPEAKER pro tempore. The time of the gentleman from North Carolina [Mr. COBLE] has expired.

INTERNATIONAL TERRORISM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. GEKAS] is recognized for 5 minutes.

Mr. GEKAS. Mr. Speaker, I yield to my colleague, the gentleman from Arizona [Mr. RUDD], and I would only ask that he give me a chance to say something in response to the gentleman who is in the well.

Mr. RUDD. Mr. Speaker, I thank the gentleman from Pennsylvania.

Mr. Speaker, I was attempting to say that about 80 years ago or so, the President of our country then was President Theodore Roosevelt. His Secretary of State was John Hay. There was a group of extortionists, terrorists, kidnapers, and pirates who made their living that way—and I guess it was Tripoli—and the chief extortionist involved was named Raisuli. An American by the name of Perdicaris was captured by Raisuli and held for ransom. President Roosevelt gave Secretary Hay these instructions: He said, "Send this message to them: 'Perdicaris alive or Raisuli dead.'" shortly thereafter, three marines walked ashore, picked up the American, Mr. Perdicaris, and brought him home.

I am not saying that we could do that today, but I am saying that the same type of technique does apply. I think that in discussing this whole subject, we do have to find a way to retaliate swiftly, and perhaps not without all of the fanfare that it would take to use our entire military force to do it.

Mr. Speaker, I thank the gentleman for yielding.

Mr. GEKAS. Mr. Speaker, if I may reclaim my time, I would say to the gentleman that the President of the United States, Ronald Reagan, did exhibit the same fortitude as Thomas Jefferson in his time and Theodore Roosevelt in his time in acting with respect to those situations in which the power of the United States could be used efficiently in this last week's interception of the hijackers in the airspace over the Mediterranean.

So that was a good signal, and I agree with the gentleman that more must be done.

However, I did want to point something of which the gentleman may not be aware. I refer to the case when the Italian Government said to us and to the world that it would not extradite these hijackers to the United States because the United States has the death penalty and since the Italian Government does not impose the death penalty, they could not under their own law send them to the United States for trial to undergo a greater possible penalty than their own law provides. They were erroneous in that, because the U.S. Congress has failed to put into its statutory process the death penalty for the hijacking of the type we saw on the high seas that led to the death of an American citizen.

That is the irony of this whole thing. The gentleman in the well and myself and others have been pressing this Congress and the past Congress to pass legislation to provide for the death penalty in appropriate cases. One of them would have been appropriate in this kind of situation, but, no, this Congress has failed to do so. We have legislation that the gentleman has introduced and that I have introduced. There is a discharge resolution right at the desk if the Speaker of the House to bring out a piece of legislation that would allow it.

There is only one kind of death penalty permitted now in the Federal law, and that is for skyjacking, and it does not apply to the case of the *Achille, Lauro,* to all things.

Mr. RUDD. Mr. Speaker, will the gentleman yield?

Mr. GEKAS. Certainly, I yield to the gentleman from Arizona.

Mr. RUDD. Mr. Speaker, I want to compliment the gentleman for his stand not only on the death penalty but for the legislation that we have projected here for espionage, for murder, for hijacking, and for all those sorts of things. I commend the gentleman and also the gentleman from North Carolina for their support of that.

Let me just correct one statement that possibly might reflect on how I might feel. I am not critical of the President's action in light of the cooperation that took place.

Mr. GEKAS. I know that.

Mr. RUDD. I am just saying that we cannot do that time after time. What I am saying is that the time has come for the United States of America to provide an additional force that would be able to zero in on these hijackers so we would know about it before and be able to equip ourselves with better intelligence in order to either prevent it or, if it happens, to bring swift retribution. I think the time has come for that. We cannot use the entire military forces in order to do this every time.

Mr. Speaker, I do thank the gentleman from Pennsylvania [Mr. GEKAS] for his thoughts on this matter. It is a very serious matter.

Mr. BARTON of Texas. Mr. Speaker, will the gentleman yield?

Mr. GEKAS. I yield to the gentleman from Texas.

Mr. BARTON of Texas. Mr. Speaker, I would like to ask a question of my distinguished colleague, the gentleman from Arizona.

Does he want an additional force, or would he like our current forces to be relocated? I personally think that the Delta Force should be in the Mediterranean instead of Fort Bragg, NC.

Does the gentleman want something additional or just a relocation of what we already have?

Mr. GEKAS. I yield to the gentleman from Arizona for a reply.

Mr. RUDD. Mr. Speaker, what I am thinking about is this, I say to my distinguished colleague, the gentleman from Texas: Espionage, like war, is a 24-hour operation 7 days a week, holidays, and all other times. These espionage agents must defend themselves, and in doing so, they must equip themselves very adequately or they would not be successful.

What I am saying is that terrorism does not warrant the full attention of a full-scale war, but that we must prepare ourselves, largely through an espionage-type apparatus, depending upon the espionage community, to get this job done.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania [Mr. GEKAS] has expired.

□ 1250

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative programs and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BARTON of Texas) to revise and extend their remarks and include extraneous material:)

Mr. HUNTER, for 60 minutes, on October 22.

Mr. HUNTER, for 60 minutes, on October 23.

Mr. RUDD, for 5 minutes, today.

Mr. COBLE, for 5 minutes, today.

Mr. GEKAS, for 5 minutes, today.

(The following Members (at the request of Mr. OBEY) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. UDALL, for 5 minutes, today.

Mr. OWENS, for 60 minutes, on October 22.

Mr. OWENS, for 60 minutes, on October 23.

EXTENSION OF REMARKS

By unanimous consent, premission to revise and extend remarks was granted to:

Mr. OBEY, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,673.

(The following Members (at the request of Mr. BARTON of Texas) and to include extraneous matter:)

Mr. COURTER.

Mr. PETRI in two instances.

Mr. SMITH of New Jersey.

Mr. KEMP in two instances.

(The following Members (at the request of Mr. OBEY of Texas) and to include extraneous matter:)

Mr. SMITH of Florida.

Ms. KAPTUR.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. GARCIA in four instances.

Mr. FASCELL in two instances.

Mr. STARK in two instances.

SENATE JOINT RESOLUTION

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 195. Joint resolution to designate the week of October 20, 1985, through October 26, 1985, as "National Temporary Services Week"; to the Committee on Post Office and Civil Service.

ADJOURNMENT

Mr. GEKAS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 50 minutes), the House adjourned until tomorrow, Tuesday, October 22, 1985, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2146. A letter from the Comptroller General of the United States transmitting a review of the President's 10 special message for fiscal year 1985, proposing three new deferrals and two revised deferrals of budget authority, pursuant to 2 U.S.C. 685 (H. Doc. No. 99-116); to the Committee on Appropriations and ordered to be printed.

2147. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a report on loan, guarantee and insurance transactions supported by Eximbank during August 1985 to Communist countries, pursuant to 12 U.S.C. 635(b)(2); to the Committee on Banking, Finance and Urban Affairs.

2148. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting notice of intent to approve a manufacturing licensing agreement with Japan (Transmittal No. MC-30-85), pursuant to 22 U.S.C. 2776(d); to the Committee on Foreign Affairs.

2149. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting notice of intent to issue a commerical export license for the sale of certain major defense articles to Japan (Transmittal No. MC-20-85), pursuant to 22 U.S.C. 2776(c); to the Committee on Foreign Affairs.

2150. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting notification of a proposed license and agreement for the export of defense articles and services to produce 30 P-3C aircraft in Japan (Transmittal No. MC-26-85), pursuant to 22 U.S.C. 2776(c); to the Committee on Foreign Affairs.

2151. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's proposed agreement for the lease of defense articles to the Federal Republic of Germany (Transmittal No. 2-86), pursuant to 22 U.S.C. 2796(a); to the Committee on Foreign Affairs.

2152. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's proposed agreement for the lease of defense articles to NATO (Transmittal No. 3-86), pursuant to 22 U.S.C. 2796(a); to the Committee on Foreign Affairs.

2153. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Defense Mapping Agency's proposed agreement for the lease of defense articles to the Organization of American States, pursuant to 22 U.S.C. 2796(a); to the Committee on Foreign Affairs.

2154. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

2155. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report of political contributions made by Gregory J. Newell, of Virginia, Ambassador-elect to Sweden, and members of his family, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

2156. A letter from the Comptroller General, General Accounting Office, transmitting a list of all reports issued by the GAO during the month of September 1985, pursuant to 31 U.S.C. 719(h); to the Committee on Government Operations.

2157. A letter from the Acting Deputy Assistant Secretary of the Interior for Indian Affairs, Bureau of Indian Affairs, transmitting a proposed plan for the use and distribution of funds awarded the Fort Mojave Indian Tribe in Docket 10-84L before the U.S. Claims Court, pursuant to Public Law 93-134, sections 2(a) and 4; to the Committee on Interior and Insular Affairs.

2158. A letter from the Secretary of the Interior, transmitting the fifth annual report covering progress made during fiscal year 1985 on oil and gas leasing, exploration and development activities on Federal lands in Alaska, other than on the North Slope or the national petroleum reserve, pursuant to Public Law 96-487, section 1008(b)(4); to the Committee on Interior and Insular Affairs.

2159. A letter from the Secretary of Transportation, transmitting a report of the Office of Commercial Space Transportation on Federal impediments to development of a private commercial launch industry, pursuant to 49 U.S.C. app. 2621(a); to the Committee on Science and Technology.

2160. A letter from the Director, National Science Foundation, transmitting a statistical report, "Federal Support to Universities, Colleges, and Selected Nonprofit Institutions, fiscal year 1983," pursuant to the act of May 10, 1950, chapter 171, section 3(a)(7) (82 Stat. 360); to the Committee on Science and Technology.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolu-

tions were introduced and severally referred as follows:

By Ms. KAPTUR:

H.J. Res. 422. Joint resolution to designate June 1, 1986, "National Tumor Registrar Recognition Day"; to the Committee on Post Office and Civil Service.

By Mr. UDALL (for himself, Mr. YOUNG of Alaska, Mr. LAGOMARSINO, and Mr. DE LUGO) (by request):

H.J. Res. 423. Joint resolution to authorize financial assistance for the Northern Mariana Islands, and for other purposes; to the Committee on Interior and Insular Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 60: Mr. RICHARDSON.

H.R. 1069: Mr. GEJDENSON.

H.R. 1145: Mr. GALLO.

H.R. 1538: Mr. PARRIS and Mr. LOWERY of California.

H.R. 1616: Mr. LEACH of Iowa, Mr. PRICE, Mr. ANNUNZIO, and Mr. MCDADE.

H.R. 1769: Mr. COURTER.

H.R. 2024: Mr. FORD of Tennessee.

H.R. 2383: Mr. SIKORSKI.

H.R. 2701: Mr. TRAXLER, Mr. TRAFICANT, Mr. WILLIAMS, and Mr. OWENS.

H.R. 2963: Mr. GUARINI.

H.R. 3121: Mr. TRAFICANT, Mr. CONYERS, Mr. WILLIAMS, Mr. PEPPER, and Mrs. COLLINS.

H.R. 3357: Mr. HENRY, Mr. BROWN of Colorado, and Mr. DORNAN of California.

H.R. 3515: Mr. GLICKMAN.

H.J. Res. 331: Mr. DEWINE, Mr. GINGRICH, Mr. RUSSO, Mr. FUQUA, and Mr. LAFALCE.

H.J. Res. 368: Mr. THOMAS of Georgia, Mrs. BENTLEY, Mr. WEISS, Mr. OLIN, Mr. EDWARDS of Oklahoma, Mr. HYDE, Mr. MATSUI, Mr. DE LUGO, Mrs. BOXER, Mr. BEVILL, Mr. CONYERS, Mr. FAWELL, and Mr. TOWNS.

H. Con. Res. 117: Mr. VALENTINE.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 2526: Mr. MARTINEZ.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

234. By the SPEAKER: Petition of the North Atlantic Assembly, Brussels, Belgium, relative to the recommendations and resolutions adopted at its 31st annual session held in San Francisco, during October, 1985; to the Committee on Foreign Affairs.

235. Also, petition of the school committee of the city of Boston, Boston, MA, relative to the proposal of the President to eliminate or reduce the deductibility of State and local taxes; to the Committee on Ways and Means.

SENATE—*Monday, October 21, 1985*

The Senate met at 9 a.m. and was called to order by the Honorable CHIC HECHT, a Senator from the State of Nevada.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

It is good to give thanks to the Lord, to sing praises to Thy name, O most high; to declare Thy steadfast love in the morning, and Thy faithfulness by night.—Psalm 92:1-2.

Father in Heaven, we acknowledge with heartfelt gratitude, the simple blessings which we enjoy daily. Forgive us that we so easily take for granted these common benefits, that we so often must lose them before we are appreciative. We slept in comfortable beds last night; many slept on the streets. We awakened this morning; many did not. We got out of bed with a purpose for living; many had no incentive to do so. We had water for showers or baths; many had no water to drink. We ate a nourishing breakfast; many had no food, had none yesterday and will have none tomorrow. We have work; many are unemployed. We have homes, families, friends; many are homeless, hungry and alone. We have eyes to see, ears to hear, whole bodies to work and play; many cannot see or hear, and are greatly handicapped by their physical condition. Gracious God, forgive our indifference. Help us who always have more than enough of everything to remember with compassion those who never have enough of anything. And help us to be thankful. Thank Thee, Lord. Thank Thee. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. THURMOND].

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, October 21, 1985.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable CHIC HECHT, a Senator from the State of Nevada, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. HECHT thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the acting majority leader is recognized.

Mr. RUDMAN. I thank the Chair.

A MOST TIMELY PRAYER

Mr. RUDMAN. Mr. President, first let me say that I listened carefully to the Chaplain's prayer this morning. It was a very thoughtful prayer and one that we all should think about more often than we do.

SCHEDULE

Mr. RUDMAN. Mr. President, under the standing order, each of the leaders has 10 minutes. There are special orders in favor of the Senator from Wisconsin [Mr. PROXMIRE] and the Senator from California [Mr. CRANSTON] of not to exceed 15 minutes.

There will be routine morning business not to extend beyond the hour of 10 a.m. this morning and Senators will be permitted to speak therein for 5 minutes each.

Following routine morning business, it is the intention of the majority leader to turn to the Labor-HHS appropriations bill, H.R. 3424, and it is expected that votes will occur throughout today's session, probably not before early afternoon.

Now, I see that my friend from Wisconsin, the acting Democratic leader is here, I will reserve the remainder of the leader's time.

I will now relinquish the floor.

RECOGNITION OF THE ACTING MINORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the acting Democratic leader is recognized.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the time of the Democratic leader be reserved for his later use.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE CHAPLAIN'S PRAYER

Mr. PROXMIRE. Mr. President, speaking on my time, I wish to commend the Chaplain also for his most moving prayer and it is a most appropriate prayer. I do not know how he does it. It is most timely. This morning we take up, as the acting majority leader has said, the Health and Human Services bill.

I think most interpreters would say that the Chaplain was very much on the side of that bill the way it stands. There may be some amendments. But we will do our best to do the work of the Good Lord, whatever our value judgments are, and I think we have gotten excellent guidance, as usual, from our splendid Chaplain.

RECOGNITION OF SENATOR PROXMIRE

The ACTING PRESIDENT pro tempore. The Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

WHY WE MUST SAVE THE ABM TREATY

Mr. PROXMIRE. Mr. President, this body, the Senate, ratified the Anti-Ballistic Missile Treaty overwhelmingly in 1972. Only two Senators dissented. In fact no arms control agreement between the Soviet Union and the United States has received such emphatic and universal support from the Senate as the ABM Treaty. The Senate never has ratified the Second Strategic Arms Limitation Treaty SALT II. That arms control treaty has only been put into operation by Executive order. It may expire within a few months. The Senate has also not ratified the Nuclear Explosive Limitation Treaty of 1974. That agreement too only continues in effect by executive sufferance. The ABM Treaty has persisted as the most widely supported arms control treaty of the nuclear age. It is also essential for arms control, not simply because it keeps the nuclear arms race out of space. It is critical because the ABM Treaty establishes a firm base for credible deterrence. The very heart of the peace that has persisted in the nuclear age between the United States and the Soviet Union lies in the hard fact that both superpowers control a nuclear arsenal that can utterly destroy an adversary that initiates an attack. Can anyone doubt that this absolute assurance has kept the peace? Why is this so obvious? Answer: Both superpowers know that a preemptive strike would be an act of suicide.

What reason have the leaders of both superpowers given for declaring that a nuclear war must never be fought? Both have said a nuclear war must never be fought because it can never be won. Both have said that in a nuclear war there will only be losers. What does this mean? It means deterrence works. No one can love the grim,

terrifying anatomy of deterrence. We live in this nuclear age under the terrible, intimidating shadow of a nuclear war that would constitute a human catastrophe beyond imagination. But living with this awesome threat is the price we pay for peace.

Again what has the ABM Treaty to do with this? That treaty provides the heart and soul of the assured deterrence that prevents either superpower from initiating a nuclear attack.

This, Mr. President, is why the SDI or star wars, pushed so strongly by President Reagan, represents such a dangerous threat to nuclear peace. Most of the scientific community generally believes the trillion dollar star wars missile defense project will never work. They are convinced that a vigorously progressing nuclear offense, provoked by the star wars missile defense, will find ways to penetrate any conceivable missile defense. They are also convinced that at its most effective star wars can only create the instability of doubt. In order to assure that sufficient missiles can penetrate the star war defense, the adversary not only will refuse to agree to any arms control proposal limiting its nuclear offense but will continue to build up its offensive arsenal.

Obviously, the star wars project will require a flat and total repudiation of the ABM Treaty. What is so bad about that? The answer is, plenty. The ABM Treaty is a permanent treaty that this Senate has solemnly as well as overwhelmingly ratified. So star wars will require us to repudiate our word. That is not all. In repudiating our country's word, the Government creates a tragically dangerous instability. Am I stating a partisan position? No, indeed. Consider the recent assertion of six former Secretaries of Defense reported in the Washington Post on October 5 a few days ago. These former Secretaries of Defense issued this declaration:

> We reaffirm our view that this international agreement of unlimited duration makes an important contribution to American security and to reducing the risk of nuclear war.

Again let me ask, Is my support of the ABM Treaty in opposition to the administration's policy that would totally destroy it partisan? Well, in answering that question let us consider who are the former Defense Secretaries who have just reaffirmed their support of the ABM Treaty? Just listen—they are Harold Brown, Clark Clifford, Melvin Laird, Robert MacNamara, Eliot Richardson, and James Schlesinger. Three of the six—Laird, Richardson, and Schlesinger—served under Republican Presidents. The other three served under Democratic Presidents. Mr. President, this Senator cannot conceive of better qualified or more credible experts. Each of these Secretaries is a deeply committed, patriotic American. Each fully understands, as very few Americans can, the critical importance of a strong defense and a practical and effective military policy to undergird that defense. These six represent both of our great parties equally. All six unanimously say we need the ABM Treaty. But the administration's star wars program would bluntly destroy that treaty. All Senators should understand how very vulnerable this ABM Treaty, this bulwark of our country's arms control policy, has become under the bludgeons of this administration. And all should understand that votes we cast to fund the star wars program are votes that will drive nails into the coffin of the ABM Treaty.

THE PEACE CORPS' 25TH ANNIVERSARY

Mr. PROXMIRE. Mr. President, I wish to join my colleagues in commemorating the 25th anniversary of the founding of the Peace Corps; and to honor its first Director, Sargent Shriver, who played a critical role in the development of that organization.

This year-long celebration began on October 1 when the President signed House Joint Resolution 305. It was 25 years ago, on October 14, 1960, that then-Senator John F. Kennedy proposed an international "youth services program" in an impromptu speech on the steps of the student union at the University of Michigan—Ann Arbor. On November 2, Kennedy made a formal commitment for the creation of a Peace Corps in a Presidential campaign speech in San Francisco. Thirty thousand Americans immediately responded to support the idea. On March 1, 1961, President Kennedy signed an Executive order making the Peace Corps a reality. To make this program succeed, President Kennedy needed a person who could impart the spirit of the Peace Corps to those interested in volunteering; allay the fears of Congressmen concerned over the appropriations requests; and convince foreign statesmen of the new agency's practicability. President Kennedy turned to Sargent Shriver.

"Sarge," as he is well known, and I were classmates at Yale, and I have had the privilege of his friendship for many years. An intelligent, eloquent, and charismatic personality, Sarge occupied the top job in our class. He was editor-in-chief of the Yale Daily News, the oldest college daily in the Nation. He was a superb editor. Sarge had the ability and vision to take on the Peace Corps assignment, handle it brilliantly, and lay the foundation for its success. Sarge lobbied intensively on Capitol Hill for the Peace Corps, where it initially met resistance from legislators who were not only concerned about costs, but who thought the corps might become a magnet for "fuzzy-minded" idealists and malcontents. With little help from the White House, Sarge, who is a lobbyist supreme, silenced those fears and Congress established a permanent Peace Corps in September 1961. In his characteristic manner of meeting any challenge, Sarge took the kernel of an idea, nurtured it and saw it grow, its roots firmly planted in the global society. When his term expired in 1965, he left for future directors, a thriving, vital example of America's commitment to world development and prosperity.

The late Hubert Humphrey said:

> A Peace Corps volunteer has to be an idealist. You have to believe one person can make a difference to what happens in this world.

Rarely has a program reached so many people in so many countries. During the last 25 years over 120,000 men and women from all walks of life have served in 88 countries. Americans have always had a caring and generous spirit. The success of the corps is a tribute to our willingness to share our skills and knowledge with others, to improve peoples' lives in even modest ways. Confronting poverty and adversity at its lowest levels, volunteers helped break down social and political barriers in striving to help people help themselves. This has had a positive impact on the living conditions of Third World people. John Kenneth Galbraith, former Ambassador to India, concurred. He said:

> The test of the Peace Corps is whether it has helped some people live better in less pain—and I think it has.

Even the U.S. Congress has benefited from the experiences of six former Peace Corps volunteers, five of whom still serve in Congress. They are. Senator CHRISTOPHER DODD, former-Senator Paul Tsongas, Representatives TOM PETRI of Wisconsin, JIM COURTER, TONY HALL, and PAUL HENRY.

Henry Steele Commager, the American historian, speaking before the House Subcommittee on International Development in 1977, said:

> For the first time in our history . . . we are no longer masters of our own destiny. Every major problem that confronts us now is global and to be solved only through cooperation with other nations.

Clearly, the Peace Corps is part of the world community and seeks to make a difference. Peace Corps volunteers represent our country and our society in a way no diplomat could, by what they do and the spirit in which they do it. To all who have served, to Sargent Shriver and the nine other Directors who followed, we are all indebted.

MYTH OF THE DAY: ACID RAIN NEEDS FURTHER STUDY, NOT REGULATION

Mr. PROXMIRE. Mr. President, the Reagan administration wants Congress and the American people to believe that the acid rain problem needs more study, not regulation.

This assertion seriously distorts scientific evidence of both acid rain damage and causation. Even worse, spending more time in study and not action may leave us with no resources to save.

Scientific papers recently delivered at the Muskoka International Symposium on Acidic Precipitation show, beyond a doubt, direct evidence of a linear relationship between increase in emissions of sulfur and nitrogen oxides and acidic rain, snow, and fog.

These studies validate and expand on earlier findings by the National Academy of Sciences and the Congressional Office of Technology Assessment.

Further evidence from Germany, Scandinavia, and the United States indicates that, at least with respect to forest damage, time is running out for action on acid rain.

How can we delay legislating when, according to a recent study of acid rain damage in the Smoky Mountains, in 1 year the number of healthy trees decreased by 29 percent and the number of dead trees increased by 6 percent.

German damage figures are worse still. While 8 percent of all German trees showed damage in 1982, this number climbed to 34 percent in 1983 and 50 percent in 1984.

The Environmental Protection Agency's new lake studies show entire U.S. regions with potentially serious acid rain problems unknown as recently as 1982. The Southeast and Mountain West can now be added to the Northeast and Midwest as acid rain danger zones.

The EPA report includes as many as 300,000 acres of lakes and streams in the Upper Midwest as highly susceptible to acid rain damage, about 40 percent of the total, with about one-fourth of this number in serious trouble.

Mr. President, I do not deny that acid rain studies are useful and even necessary, but action is needed now, while our resources still have a chance.

Mr. President, an article in Friday's New York Times reports on a study by seven environmental scientists which found substantial scientific consensus that immediate action was needed to combat acid rain.

I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

REPORT SAYS SCIENTISTS AGREE ON NEED TO ACT ON ACID RAIN

(By Philip Shabecoff)

WASHINGTON, October 17.—A group of scientists doing research on acid rain issued a report today saying that a substantial scientific consensus existed on the need to act now to curb the problem.

The scientists challenged the position of the Reagan Administration and industry, which have insisted that more must be learned about the causes and effects of acid precipitation from air pollution before the nation embarks on an expensive program to control it.

The report, based on an analysis of six major governmental studies of acid rain, said there was already agreement among scientists that "reducing the emissions of a large number of air pollutants, most notably sulfur dioxide, would benefit biological systems in North America significantly."

Seven academic and environmental scientists prepared the report, which was financed by the Mary Flagler Cary Charitable Trust. The trust is associated with the arboretum of the same name in Millbrook, N.Y.

Pollution created by the burning of fossil fuel, largely oxides of sulfur and nitrogen from coal-burning power plants, other industrial facilities and motor vehicles, is transformed chemically as it travels through the atmosphere and falls to the earth as acidic rain, snow, fog or dust.

DAMAGE IN EAST

According to the report issued today, the six governmental studies are in general agreement that long-term acid deposition has acidified surface waters in the northeastern United States and southeastern Canada and caused damage. In some cases, the report said, it has wiped out fish and insect species.

The scientists also said there was a consensus that acid deposition could acidify soils, particularly those that are "moderately acid to begin with" and could thus lower the nutrients and change the biological composition of the soil.

The report noted that some forests in eastern North America had been increasingly damaged in recent decades and said there was consensus that acidity, along or in conjunction with other pollutants such as ozone, might contribute to the damage. Acid precipitation also decreases visibility and corrodes manmade materials, the report said.

The panel of scientists said there was general agreement that if action was taken to reduce emissions of sulfur dioxide throughout the Eastern United States, it would reduce damage to aquatic biological systems, degradation of visibility and damage to materials.

Reduction of sulfur would also reduce exposure of humans, crops and trees to acidifying compounds, although the causes and extent of damage in these cases is less certain, the report said.

STRATEGIES TERMED ADEQUATE

The report concluded, "Adequate scientific information exists to select emission-reduction strategies to reduce acid deposition efficiently."

Among proposals that have been made to reduce sulfur and nitrogen emissions are requiring power plants, factories and smelters to install equipment to remove pollutants from smokestacks. There have also been calls for more reliance on coal with a low-sulfur content and the treatment of coal before it is burned. One suggestion for easing the effects of acid rain is to put lime in lakes and streams to neutralize the acid.

The scientists who prepared the report were Charles Driscoll of Syracuse University; James N. Galloway of the University of Virginia; James F. Hornig of Dartmouth College; Gene E. Likens of the New York Botanical Garden; Michael Oppenheimer of the Environmental Defense Fund; Kenneth A. Rahn of the University of Rhode Island; and David Schindler, of the Freshwater Institute in Winnipeg, Canada.

Officials of the Environmental Protection Agency said they had not yet seen the scientists' report. But Dwain Winters, acting director of the agency's acid rain policy office said, "The Administration has repeatedly acknowledged that acid rain is a serious environmental problem and that we don't need definitive answers before deciding on a course of action."

He added, however, "It remains the Administration's considered judgment that the uncertainties in certain areas are still great enough that it is more prudent to seek greater understanding before making a decision on appropriate action."

The Edison Electric Institute, a trade group of the electric utility industry, which would bear the brunt of an acid rain control program, disagreed with the report.

"It is now clear that rainfall acidity is not the most important factor in the acidification of lakes and that any changes in rainfall acidity are unlikely to affect most lakes," the institute said.

THE GENOCIDE CONVENTION: AIDING OUR EFFORTS AGAINST THE CREATURE CALLED SOVIET JUSTICE

Mr. PROXMIRE. Mr. President, a recent advertisement in the Washington Post declared that "Jews Have Always Received Special Treatment in the Soviet Union." It recounted the stories of Soviet Jews sent to labor camps or prisons or into exile for no other offense than practicing their faith. But perhaps the cruelty of the creature called Soviet justice should not surprise us any more. Not blind, this creature strikes with frightening precision to attack members of particular ethnic or religious groups.

Much attention is being given to what the President should ask his Soviet counterpart at their meeting this fall. Superpower stratagems and complex basing questions will be discussed when the two leaders meet. Yet the President also should ask about the special treatment that Soviet Jews receive. For when meeting with foreign heads of state, particularly when meeting with the head of the Soviet state, the U.S. President must ask the hard questions about universal human rights and personal dignity.

How frustrating it is to know that these questions will ring less with the American commitment to universal human rights because this country has failed to ratify the Genocide Convention. Gorbachev—with his creature falsely called justice—can point to his

country's ratification of the convention.

Mr. President, the Genocide Convention is a sound piece of international law that poses no threat to American citizens. The convention should be ratified by the Senate. It would aid the President when he asks Gorbachev the difficult questions. It would strengthen our voice when we ask about the special treatment of Soviet Jews and other oppressed minorities throughout the world.

Mr. President, I yield the floor.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF SENATOR CRANSTON

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from California [Mr. CRANSTON] is recognized for not to exceed 15 minutes.

UNITED STATES-CHINA AGREEMENT FOR NUCLEAR COOPERATION

Mr. CRANSTON. Mr. President, the greatest challenge of our age is to contain and reverse the nuclear arms race between the United States and the Soviet Union. A vital complement to this effort must be vigilant efforts to halt the proliferation of nuclear weapons capability to additional nations.

The nuclear nonproliferation challenge has been one in which Congress has traditionally taken a leading role. We have had some wise leaders in this effort, and it has been a bipartisan effort, involving in earlier years such individuals as Jack Bingham, Chuck Percy, and Abe Ribicoff.

These nonproliferation efforts have been severely tested by the proposal, advanced last year by the Reagan administration, to undertake a new agreement for nuclear trade with the People's Republic of China. While I have been critical of the ham-handed manner in which the administration has pursued conclusion of this "Agreement for Nuclear Cooperation," I have not wanted to take a position of opposition. Rather I have worked both with our Government and representatives of concerned American industry, as well as with senior Chinese officials in an attempt to remedy the clear defects of the draft agreement. Frankly, I have hoped that by engaging in a dialog on these crucial issues with the highest levels of the Chinese Government, we could include them in the family of nations which respect basic nuclear nonproliferation norms. I also have not wanted to foreclose a possible opportunity to gain sorely needed United States export earnings, especially in Asia where we are suffering such a horrid trade imbalance—though I recognize China may be more interested in American bids to drive down the price of French and German competitors, than in actually buying American. I have wanted, too, to advance the opportunity for mutually beneficial United States-People's Republic of China technological and commercial cooperation—in this respect, I have been suspicious of the motives of those radical rightwingers who, under the guise of nonproliferation concerns, would do most anything to sour our relations with Beijing.

It is therefore with a sense of regret that I announce today my opposition to the agreement for nuclear cooperation between the United States and the People's Republic of China in its present form. I will be working with my colleagues on the Senate Foreign Relations Committee to reject this agreement or to propose substantial alterations in the terms under which the United States would license any nuclear export pursuant to the terms of the agreement.

We can wish that the United States could serve the interest of nuclear nonproliferation by undertaking nuclear trade with China. But wishing for something does not make it so. The Reagan administration has struggled for 2 years to turn a sow's ear into a silk purse. The time has come to recognize that this effort has failed. To proceed with nuclear trade with the People's Republic of China under the terms of the faulty draft agreement would be a serious mistake.

Nuclear cooperation with China has been a suspect proposition for decades for one simple reason: The Chinese Government has taken a position of active support for nuclear proliferation. Throughout its first 30 years, Communist rule in Beijing held that proliferation was essentially a good thing which served to undermine superpower hegemony. It was against this background that the Reagan administration sought to change the People's Republic of China's policies and open doors for American nuclear exports. The effort was unwisely pressured by election-year White House politics when, in April 1984, the President initialed in Beijing a draft agreement that the administration has since conceded was deficient.

But the sad fact is that another 18 months of dialog with Beijing have utterly failed to yield satisfactory changes in either the text of the agreement or in Chinese nuclear export policies and practices.

Our concerns here are not academic ones. China has, in the recent past, engaged in the most egregious effort in history to export nuclear bombmaking know-how. To our knowledge, no other nation has ever undertaken systematically to aid the nuclear bomb development and construction efforts of another nation secretly trying to attain this capability, as China has done with Pakistan.

While many of us in Congress have pressed the executive branch to address our concerns with the Chinese Government, we have met with a totally unsatisfactory response. Led by the office of Special Ambassador for Nuclear Nonproliferation Affairs, Richard Kennedy, the administration has systematically withheld, suppressed, and covered up information—known virtually throughout the executive branch—which Congress might find worrisome as it reviewed the draft agreement now before us.

I for one will not tolerate administration efforts to have Congress legislate in the dark. Intelligence data is not the province of one branch to be jealously guarded. It is a resource which we the people's representatives in Congress can and must have in order to make sound decisions. Repeated requests for additional information and documents have met with obfuscation and delay until we reached an absurd point last week of having Ambassador Kennedy—the leading proponent of the agreement—serve as the only source for Senators concerned about the uproar in the executive branch over the China agreement. And of course he told us practically nothing. Repeated subsequent requests, made by a number of Senators, both Democratic and Republican for an unfiltered, uncolored briefing on this issue from intelligence analysts still have not been met.

I am therefore prepared to discuss for the RECORD today information which I have received from a variety of executive branch sources—but has not been volunteered in any classified briefings. This information—which has direct bearing on Congress' imminent decision to approve or reject the agreement before us—has been verified to my satisfaction.

The key issue throughout negotiations with the Chinese has been their nuclear export policy. China is a confirmed proliferator which has greatly assisted Pakistan by providing sophisticated, nuclear warhead designs; we therefore have every reason to seek ironclad assurances that China will end once and for all its cooperation with troublesome nuclear programs. After I raised this issue last year, the Reagan administration undertook additional negotiations with China to clarify what the Chinese obligations would be in return for United States

nuclear cooperation. Administration spokesmen asserted that these reopened negotiations produced secret Chinese written assurances.

Well, that's bunk. The only written assurances Congress has seen are assurances the State Department has provided to other elements of our executive branch on what we hope the Chinese intend to do in the future about their nuclear export policies.

Let's contrast these assurances provided by one American bureaucrat to another with actual Chinese export practices.

In addition to the United States, the U.S.S.R., the United Kingdom, France, and China, most American nonproliferation experts believe India and Israel already have the capability to rapidly assemble and deploy nuclear weapons. The task confronting mankind is to prevent further proliferation of this capability to other nations.

Experts identify five additional nations as having the most dangerous nuclear programs—programs that involve secret facilities inaccessible to international inspection. These are nations with both the motives and an occasionally expressed interest in developing nuclear weapons. The list includes Brazil, Argentina, Pakistan, South Africa, and Iran.

My information is that China has either engaged in serious nuclear trade negotiations with or actually has continued a series of nuclear exports to each and every one of these five nuclear outlaw nations subsequent to Chinese discussions with Reagan administration officials on the importance of curbing such troublesome exports.

The United States has absolutely no nonproliferation excuse whatsoever for building the nuclear capabilities of a nation bent on continuing such dangerous nuclear exports. We are kidding ourselves; on the one hand, the State Department is desperately trying to reassure Congress that the Chinese have new understandings with the United States that they will stop proliferating, but at the same time the State Department is aggressively stifling dissent in the executive branch and trying to suppress strong evidence that China utterly rejects such generous United States interpretations of their understandings.

China has this year continued exports of heavy water to the troublesome Argentine Nuclear Program.

China has gone forward with exports of enriched uranium to the apartheid regime in South Africa, transactions which are made through European middlemen.

China has been engaged in nuclear commerce with Brazil, a nation with large nuclear ambitions and aspirations to superpower status. There are also sketchy reports that China has worked toward agreements for sharing space launch vehicle capabilities with Brazil, capabilities which our Government has struggled hard to contain.

China has not shown, in its discussions of nuclear commerce with Iranian Prime Minister Rafsanjani—who visited Beijing this summer—anywhere near the type of prudence we would expect.

Finally, China's cooperation with Pakistan's nuclear development effort—so extensive in the late 1970's and early 1980's—continued for some time after the issue was raised by American officials.

These Chinese actions suggest that we are dealing with a nation that decidedly does not share our sense of nonproliferation obligations which, by United States law, we must expect of our nuclear customers. We are dealing instead with the same China which still rejects the Nuclear Nonproliferation Treaty and aids the nuclear efforts of nations which scorn full-scope application of International Atomic Energy Agency safeguards.

Most analysts of the draft agreement with China have long recognized the deficiencies in its provisions designed to guard against such abuses. For example, the agreement contains no guarantee, as required by law, that international safeguards will be maintained on U.S.-supplied material. And the crucial clause in the agreement outlining U.S. veto rights over subsequent reprocessing or retransfer of U.S.-supplied material is still ridden with loopholes. When concerns about this "veto rights" provision and a host of related issues were raised this July in a detailed letter signed by Secretary of Defense Cap Weinberger, the State Department succeeded in squelching this evidence. It is now claimed that the detailed list of Defense Department concerns, which Congress has sought, is a "non-document"; clearly Secretary Weinberger's all-out effort to sell Congress on a demonstrably flawed agreement.

Mr. President, the time has come for us to recognize that the China nuclear agreement as written is simply not worth the risk. We cannot afford sloppy agreements with major Communist powers on crucial nuclear issues. And we cannot tolerate the practices of a handful in the executive branch who withhold crucial information from Congress in the hope that we will ratify their flawed handiwork.

Therefore, I call upon my colleagues to reject business as usual on the pending agreement, to get the facts for themselves, and to press for remedy of the agreement's clear defects before proceeding. Our colleagues, Senator GLENN and Senator COHEN, have already joined with me in advancing some ideas in the Foreign Relations Committee about how we might propose to close the glaring loopholes in this agreement. I urge Senators to explore these and other ideas with us so that we might avert a serious nonproliferation setback while limiting damage to our important relationship with the People's Republic of China.

RESERVATION OF LEADERS' TIME

Mr. CRANSTON. Mr. President, I reserve time for both the majority leader and the minority leader.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 10 a.m., with statements therein limited to 5 minutes each.

MULTI-FIBER ARRANGEMENT

The PRESIDING OFFICER (Mr. MCCONNELL). The clerk will now read for the second time the bill H.R. 1562.

The assistant legislative clerk read as follows:

A bill (H.R. 1562) to achieve the objectives of the Multi-Fiber Arrangement and to promote the economic recovery of the United States textile and apparel industry and its workers.

Mr. WEICKER. Mr. President, I object to further consideration.

The PRESIDING OFFICER. Objection having been heard, the bill will be placed on the Senate calendar.

HOBBS ACT AMENDMENTS

The PRESIDING OFFICER. The clerk will now read for the second time the bill S. 1774.

The assistant legislative clerk read as follows:

A bill (S. 1774) to amend section 1951 of title 18 of the United States Code, and for other purposes.

Mr. WEICKER. Mr. President, I object to further consideration.

The PRESIDING OFFICER. Objection having been heard, the bill will be placed on the calendar.

THE AIR FORCE'S NEW T-46A TRAINER AIRCRAFT

Mr. D'AMATO. Mr. President, I am pleased to report to my colleagues the very successful first flight of the Air Force's next generation trainer aircraft, the T-46A, at Edwards Air Force Base, CA, on October 15, 1985.

The T-46A maiden flight lasted 1 hour and 5 minutes and chief test pilot Jim Martinez said everything went perfectly, just as planned. The first T-46A flight attained a top altitude of 15,000 feet. One source reported that this was one of the best first test flights of an aircraft in many years.

The T-46A is a giant step forward for the training of our new pilots. This twin-jet aircraft has side-by-side cockpit seating for student and instructor. The T-46A is fully pressurized, which permits above-the-weather training up to 42,000 feet. Finally, with respect to economy, the T-46A consumes 66 percent less fuel and costs 30 percent less to operate and maintain than does the present trainer.

I am proud to say that this T-46A was produced at the Fairchild Republic Co. at Farmingdale, Long Island. This was a team effort by thousands of contractor and subcontractor employees, not only in New York, but across the Nation. Developing a new jet aircraft is not an easy job. There were trying times when problems arose. However, the Fairchild team met all of the challenges, and this week we have witnessed the great success of their efforts.

I take this opportunity today to congratulate all those individuals who participated in the development of the T-46A. This aircraft will be the main trainer for our future Air Force pilots who must defend America and the free world. This is an important step in maintaining America's leadership in military aviation.

Thank you, Mr. President.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

LABOR, HEALTH AND HUMAN SERVICES AND EDUCATION APPROPRIATIONS, 1986

Mr. WEICKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 3424, an act making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1986, and for other purposes.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3424) making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1986, and for other purposes.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Appropriations, with amendments.

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italics.)

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1986, and for other purposes, namely:

TITLE I—DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

PROGRAM ADMINISTRATION

For expenses of administering employment and training programs, **[**$68,355,000**]** *$68,155,000,* together with not to exceed **[**$42,243,000**]** *$42,666,000* which may be expended from the Employment Security Administration account in the Unemployment Trust Fund.

TRAINING AND EMPLOYMENT SERVICES

For expenses necessary to carry into effect the Job Training Partnership Act, including the purchase and hire of passenger motor vehicles, the construction, alteration, and repair of buildings and other facilities, and the purchase of real property for training centers as authorized by the Job Training Partnership Act, **[**$3,521,045,000**]** *$3,453,677,000* plus reimbursements, to be available for obligation for the period July 1, 1986, through June 30, 1987, including $2,000,000 for the National Commission for Employment Policy, including $3,000,000 for all activities conducted by and through the National Occupational Information Coordinating Committee under the Job Training Partnership Act**[**, and including $10,000,000 for service delivery areas under section 101(a)(4)(A)(iii) of the Job Training Partnership Act in addition to amounts otherwise provided under sections 202 and 251(b) of the Act:**]** *Provided,* That no funds from any other appropriation shall be used to provide meal services at or for Job Corps centers: *Provided further,* That of the funds made available for obligation for the Summer Youth Employment and Training Program for the program years 1985 and 1986 the Secretary of Labor may reserve an amount, which, when combined with excess unexpended funds, shall not exceed fifteen percent of the total provided for the program, and allot such funds to the States so that each service delivery area receives, as nearly as possible, an amount equal to its prior year allocation for this program. For the purposes of this provision, "excess unexpended funds" shall mean for program year 1985, any amount unexpended as of September 30, 1985, in excess of 10 percent of the prior year State allotment, and for program year 1986, any amount unexpended as of September 30, 1986, in excess of 10 percent of the prior year State allotment. Reallocations of excess unexpended funds pursuant to this provision shall be accomplished by reducing, by an amount equivalent to the amount of excess unexpended funds, allotments made to the States.

[For the summer youth employment and training program authorized by the Job Training Partnership Act, $100,000,000, in addition to amounts otherwise provided herein for these purposes, to be available for obligation for the period July 1, 1985, through June 30, 1986.**]**

COMMUNITY SERVICE EMPLOYMENT FOR OLDER AMERICANS

To carry out the activities for national grants or contracts with public agencies and public or private nonprofit organizations under paragraph (1)(A) of section 506(a) of title V of the Older Americans Act of 1965, as amended, $254,280,000.

To carry out the activities for grants to States under paragraph (3) of section 506(a) of title V of the Older Americans Act of 1965, as amended, $71,720,000.

FEDERAL UNEMPLOYMENT BENEFITS AND ALLOWANCES

For payments during the current fiscal year of benefits and payments as authorized by title II of Public Law 95-250, as amended, and of trade adjustment benefit payments and allowances, as provided by law (part I, subchapter B, chapter 2, title II of the Trade Act of 1974, as amended) $10,000,000, together with such amounts as may be necessary to be charged to the subsequent appropriation for payments for any period subsequent to September 15 of the current year: *Provided,* That amounts received or recovered pursuant to section 208(e) of Public Law 95-250 shall be available for payments.

STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE OPERATIONS

For activities authorized by the Act of June 6, 1933, as amended (29 U.S.C. 49-49l-1; 39 U.S.C. 3202(a)(1)(E)); title III of the Social Security Act, as amended (42 U.S.C. 502-504); necessary administrative expenses for carrying out 5 U.S.C. 8501-8523, and sections 231-235 and 243-244, title II of the Trade Act of 1974, as amended; and as authorized by section 7c of the Act of June 6, 1933, as amended, necessary administrative expenses under sections 101(a)(15)(H)(ii) and 212(a)(14) of the Immigration and Nationality Act, as amended (8 U.S.C. 1101 et seq.), and section 51 of the Internal Revenue Code of 1954, as amended (26 U.S.C. 51), notwithstanding section 261(f)(2)(A) of the Economic Recovery Tax Act of 1981, as amended, $23,600,000, together with not to exceed **[**$2,459,940,000**]** *$2,446,240,000* which may be expended from the Employment Security Administration account in the Unemployment Trust Fund, and of which $22,700,000 together with not to exceed **[**$778,000,000**]** *$769,500,000* of the amount which may be expended from said trust fund shall be available for obligation for the period July 1, 1986, through June 30, 1987, to fund activities under section 6 of the Act of June 6, 1933, as amended, including the cost of penalty mail made available to States in lieu of allotments for such purpose, and of which **[**$278,732,000**]** *$283,532,000* shall be available only to the extent necessary to administer unemployment compensation laws to meet increased costs of administration resulting from changes in a State law or increases in the number of unemployment insurance claims filed and claims paid or increased salary costs resulting from changes in State salary compensation plans embracing employees of the State generally over those upon which the State's basic allocation was based, which cannot be provided for by normal budgetary adjustments.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

For repayable advances to the Unemployment Trust Fund as authorized by sections 905(d) and 1203 of the Social Security Act, as amended, and to the Black Lung Disability Trust Fund as authorized by section 9501(c)(1) of the Internal Revenue Code of 1954, as amended, and for nonrepayable advances to the Unemployment Trust Fund as authorized by section 8509 of title 5, United States Code, and to the "Federal unemployment benefits and allowances" account, to

remain available until September 30, 1987, $465,000,000.

LABOR-MANAGEMENT SERVICES

SALARIES AND EXPENSES

For necessary expenses for Labor-Management Services, [$57,505,000] *$57,612,000.*

PENSION BENEFIT GUARANTY CORPORATION

PENSION BENEFIT GUARANTY CORPORATION FUND

The Pension Benefit Guaranty Corporation is authorized to make such expenditures, including financial assistance authorized by section 104 of Public Law 96-364, within limits of funds and borrowing authority available to such Corporation, and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended (31 U.S.C. 9104), as may be necessary in carrying out the program through September 30, 1986, for such Corporation: *Provided,* That not to exceed $33,040,000 shall be available for administrative expenses of the Corporation.

EMPLOYMENT STANDARDS ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Employment Standards Administration, including reimbursement to State, Federal, and local agencies and their employees for inspection services rendered, [$191,118,000] *$190,318,000, of which not to exceed $8,000,000 shall be available for obligation through September 30, 1987, for acquisition of computer equipment and software for the Federal Employees' Compensation Level II System,* together with $406,000, which may be expended from the Special Fund in accordance with sections 39(c) and 44(j) of the Longshoremen's and Harbor Workers' Compensation Act.

SPECIAL BENEFITS

(INCLUDING TRANSFER OF FUNDS)

For the payment of compensation, benefits, and expenses (except administrative expenses) accruing during the current or any prior fiscal year authorized by title V, chapter 81 of the United States Code; continuation of benefits as provided for under the head "Civilian War Benefits" in the Federal Security Agency Appropriation Act, 1947; the Employees' Compensation Commission Appropriation Act, 1944; and sections 4(c) and 5(f) of the War Claims Act of 1948 (50 U.S.C. App. 2012); and 50 per centum of the additional compensation and benefits required by section 10(h) of the Longshoremen's and Harbor Workers' Compensation Act, as amended, $259,500,000, together with such amounts as may be necessary to be charged to the subsequent year appropriation for the payment of compensation and other benefits for any period subsequent to September 15 of the current year: *Provided,* That in addition there shall be transferred from the Postal Service fund to this appropriation such sums as the Secretary of Labor determines to be the cost of administration for Postal Service employees through September 30, 1986.

BLACK LUNG DISABILITY TRUST FUND

For payments from the Black Lung Disability Trust Fund, [$988,471,000] *$988,422,000* of which $942,868,000 shall be available until September 30, 1987, for payment of all benefits and interest on advances under subsection (c)(2) of section 9501 of the Internal Revenue Code of 1954, as amended, as authorized by section 9501(d) (1), (2), (4), and (7) of that Act and of which $25,481,000 shall be available for transfer to Employment Standards Administration, Salaries and Expenses, and [$19,746,000] *$19,697,000* for transfer to Departmental Management, Salaries and Expenses, and $376,000 for transfer to Departmental Management, Office of Inspector General, for expenses of operation and administration of the Black Lung Benefits program as authorized by section 9501(d)(5)(A) of that Act: *Provided,* That in addition, such amounts as may be necessary may be charged to the subsequent year appropriation for the payment of compensation, other benefits, or interest on advances for any period subsequent to June 15 of the current year: *Provided further,* That in addition, such amounts shall be paid from this fund into miscellaneous receipts as the Secretary of the Treasury determines to be the administrative expenses of the Department of the Treasury for administering the fund during the current fiscal year, as authorized by section 9501(d)(5)(B) of that Act.

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Occupational Safety and Health Administration, $218,045,000, including not to exceed $53,021,000, which shall be the maximum amount available for grants to States under section 23(g) of the Occupational Safety and Health Act, which grants shall be no less than fifty percent of the costs of State occupational safety and health programs required to be incurred under plans approved by the Secretary under section 18 of the Occupational Safety and Health Act of 1970: *Provided,* That none of the funds appropriated under this paragraph shall be obligated or expended for the assessment of civil penalties issued for first instance violations of any standard, rule, or regulation promulgated under the Occupational Safety and Health Act of 1970 (other than serious, willful, or repeated violations under section 17 of the Act) resulting from the inspection of any establishment or workplace subject to the Act, unless such establishment or workplace is cited, on the basis of such inspection, for ten or more violations: *Provided further,* That none of the funds appropriated under this paragraph shall be obligated or expended to prescribe, issue, administer, or enforce any standard, rule, regulation, or order under the Occupational Safety and Health Act of 1970 which is applicable to any person who is engaged in a farming operation which does not maintain a temporary labor camp and employs ten or fewer employees: *Provided further,* That none of the funds appropriated under this paragraph shall be obligated or expended to prescribe, issue, administer, or enforce any standard, rule, regulation, order or administrative action under the Occupational Safety and Health Act of 1970 affecting any work activity by reason of recreational hunting, shooting, or fishing: *Provided further,* That no funds appropriated under this paragraph shall be obligated or expended to administer or enforce any standard, rule, regulation, or order under the Occupational Safety and Health Act of 1970 with respect to any employer of ten or fewer employees who is included within a category having an occupational injury lost work day case rate, at the most precise Standard Industrial Classification Code for which such data are published, less than the national average rate as such rates are most recently published by the Secretary, acting through the Bureau of Labor Statistics, in accordance with section 24 of that Act (29 U.S.C. 673), except—

(1) to provide, as authorized by such Act, consultation, technical assistance, educational and training services, and to conduct surveys and studies;

(2) to conduct an inspection or investigation in response to an employee complaint, to issue a citation for violations found during such inspection, and to assess a penalty for violations which are not corrected within a reasonable abatement period and for any willful violations found;

(3) to take any action authorized by such Act with respect to imminent dangers;

(4) to take any action authorized by such Act with respect to health hazards;

(5) to take any action authorized by such Act with respect to a report of an employment accident which is fatal to one or more employees or which results in hospitalization of five or more employees, and to take any action pursuant to such investigation authorized by such Act; and

(6) to take any action authorized by such Act with respect to complaints of discrimination against employees for exercising rights under such Act:

Provided further, That the foregoing proviso shall not apply to any person who is engaged in a farming operation which does not maintain a temporary labor camp and employs ten or fewer employees: *Provided further,* That none of the funds appropriated under this paragraph shall be obligated or expended for the proposal or assessment of any civil penalties for the violation or alleged violation by an employer of ten or fewer employees of any standard, rule, regulation, or order promulgated under the Occupational Safety and Health Act of 1970 (other than serious, willful or repeated violations and violations which pose imminent danger under section 13 of the Act) if, prior to the inspection which gives rise to the alleged violation, the employer cited has (1) voluntarily requested consultation under a program operated pursuant to section 7(c)(1) or section 18 of the Occupational Safety and Health Act of 1970 or from a private consultative source approved by the Administration and (2) had the consultant examine the condition cited and (3) made or is in the process of making a reasonable good faith effort to eliminate the hazard created by the condition cited as such, which was identified by the aforementioned consultant, unless changing circumstances or workplace conditions render inapplicable the advice obtained from such consultants: *Provided further,* That none of the funds appropriated under this paragraph may be obligated or expended for any State plan monitoring visit by the Secretary of Labor under section 18 of the Occupational Safety and Health Act of 1970, of any factory, plant, establishment, construction site, or other area, workplace or environment where such a workplace or environment has been inspected by an employee of a State acting pursuant to section 18 of such Act within the six months preceding such inspection: *Provided further,* That this limitation does not prohibit the Secretary of Labor from conducting such monitoring visit at the time and place of an inspection by an employee of a State acting pursuant to section 18 of such Act, or in order to investigate a complaint about State program administration including a failure to respond to a worker complaint regarding a violation of such Act, or in order to investigate a discrimination complaint under section 11(c) of such Act,

or as part of a special study monitoring program, or to investigate a fatality or catastrophe: *Provided further,* That none of the funds appropriated under this paragraph may be obligated or expended for the inspection, investigation, or enforcement of any activity occurring on the Outer Continental Shelf which exceeds the authority granted to the Occupational Safety and Health Administration by any provision of the Outer Continental Shelf Lands Act, or the Outer Continental Shelf Lands Act Amendments of 1978.

MINE SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Mine Safety and Health Administration, [$150,215,000] *$150,224,000,* including purchase and bestowal of certificates and trophies in connection with mine rescue and first-aid work, and the purchase of not to exceed fifty-two passenger motor vehicles for replacement only; the Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private; the Mine Safety and Health Administration is authorized to promote health and safety education and training in the mining community through cooperative programs with States, industry, and safety associations; and any funds available to the Department may be used, with the approval of the Secretary, to provide for the costs of mine rescue and survival operations in the event of major disaster: *Provided,* That none of the funds appropriated under this paragraph shall be obligated or expended to carry out section 115 of the Federal Mine Safety and Health Act of 1977 or to carry out that portion of section 104(g)(1) of such Act relating to the enforcement of any training requirements, with respect to shell dredging, or with respect to any sand, gravel, surface stone, surface clay, colloidal phosphate, or surface limestone mine.

BUREAU OF LABOR STATISTICS

SALARIES AND EXPENSES

For necessary expenses for the Bureau of Labor Statistics, including advances or reimbursements to State, Federal, and local agencies and their employees for services rendered, [$158,616,000] *$158,640,000,* of which $13,258,000 shall be for expenses of revising the Consumer Price Index, *and $2,300,000 shall be for expenses of enhancing service sector activities,* together with not to exceed $36,309,000, which may be expended from the Employment Security Administration account in the Unemployment Trust Fund: *Provided,* That $5,848,000 shall remain available until September 30, 1987.

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

For necessary expenses for Departmental Management, including [$2,136,000] *$1,000,000* for the President's Committee on Employment of the Handicapped, [$99,037,000] *$98,167,000,* together with not to exceed $252,000 which may be expended from the Employment Security Administration account in the Unemployment Trust Fund.

ASSISTANT SECRETARY FOR VETERANS EMPLOYMENT AND TRAINING

Not to exceed [$132,975,000] *$124,485,000* may be derived from the Employment Security Administration account in the Unemployment Trust Fund to carry out the provisions of 38 U.S.C. 2001-08 and 2021-26.

OFFICE OF THE INSPECTOR GENERAL

For salaries and expenses of the Office of the Inspector General in carrying out the provisions of the Inspector General Act of 1978, [$39,323,000] *$38,136,000,* together with not to exceed [$4,300,000] *$2,161,000* which may be expended from the Employment Security Administration account in the Unemployment Trust Fund.

SPECIAL FOREIGN CURRENCY PROGRAM

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses of the Department of Labor, as authorized by law, $47,000, to remain available until expended. This appropriation shall be available in addition to other appropriations to such agency for payments in foreign currencies.

GENERAL PROVISIONS

SEC. 101. Appropriations in this Act available for salaries and expenses shall be available for supplies, services, and rental of conference space within the District of Columbia, as the Secretary of Labor shall deem necessary for settlement of labor-management disputes.

SEC. 102. None of the funds appropriated under this Act shall be used to grant variances, interim orders or letters of clarification to employers which will allow exposure of workers to chemicals or other workplace hazards in excess of existing Occupational Safety and Health Administration standards for the purpose of conducting experiments on workers' health or safety.

[SEC. 103. Notwithstanding any other provision of this Act, none of the funds appropriated or otherwise made available by this Act may be obligated or expended prior to November 14, 1985, in order to enforce the decision of February 19, 1985, by the United States Supreme Court in Garcia v. San Antonio Metropolitan Transit Authority et al, (SAMTA).]

SEC. 103. None of the funds appropriated under this title shall be used for constructing, procuring, or altering departmental sanitary facilities, including toilet, handwashing, and drinking water facilities, prior to the promulgation of a comprehensive field sanitation standard for farmworkers.

This title may be cited as the "Department of Labor Appropriation Act, 1986".

TITLE II—DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH RESOURCES AND SERVICES ADMINISTRATION

HEALTH RESOURCES AND SERVICES

For carrying out titles III, *IV,* VII, VIII, *X, and parts A and C of title XVI, and titles XIX* and XXI of the Public Health Service Act, and section 427(a) of the Federal Coal Mine Health and Safety Act, and title V of the Social Security Act, [$564,853,000] *$1,547,979,000,* of which [$2,500,000] *$3,300,000* shall be available only for payments to the State of Hawaii for care and treatment of persons afflicted with Hansen's disease; of which $750,000 to be available until expended, shall be used to renovate the National Hansen's Disease Center; *of which $5,000,000 shall be to establish geriatric educational units under section 788(b) of the Public Health Service Act;* and of which [$1,200,000] *$1,228,000* shall remain available until expended for interest subsidies on loan guarantees made prior to fiscal year 1981 under part B of title VII of the Public Health Service Act: *Provided,* That this appropriation shall be available for payment of the costs of medical care, related expenses, and burial expenses hereafter incurred by or on behalf of any person who has participated in the study of untreated syphilis initiated in Tuskegee, Alabama, in 1932, in such amounts and subject to such terms and conditions as prescribed by the Secretary of Health and Human Services and for payment, in such amounts and subject to such terms and conditions, of such costs and expenses hereafter incurred by or on behalf of such person's wife or offspring determined by the Secretary to have suffered injury or disease from syphilis contracted from such person: *Provided further,* That when the Department of Health and Human Services administers or operates an employee health program for any Federal department or agency, payment for the full estimated cost shall be made by way of reimbursement or in advances to this appropriation: *Provided further, That during the fiscal year, and within the resources and authority available under section 338 of the Public Health Service Act, gross obligations for the principal amount of direct loans under sections 335(c), 338C(e)(1), and 338E of that Act shall not exceed $1,000,000: Provided further,* That none of the funds made available by this Act shall be used to provide special retention pay (bonuses) under paragraph (4) of 37 U.S.C. 302(a) to any regular or reserve officer of the Public Health Service for any period during which the officer is providing obligated service under section 338B (or under former sections 225(e) or 752) of the Public Health Service Act except that this proviso shall not apply to any period of service covered by an agreement entered into by an officer under 37 U.S.C. 302(c)(1) before the date of enactment of Public Law 97-377: *Provided further,* That in addition to the amounts provided herein, $15,750,000 shall be available to the Health Resources and Services Administration from reimbursements from other Federal Agencies and Departments for the operation of employee occupational health programs under 5 U.S.C. 7901*: Provided further, That no funds appropriated to carry out the Public Health Service Act may be used to award grants to, enter into contracts or cooperative agreements with, or otherwise assist, a State, or any agency thereof, to administer, operate, or monitor any program supported under section 329 or 330, or title XIX-C, of the Public Health Service Act: Provided further, That during fiscal year 1986, the Secretary of Health and Human Services shall enter into commitments to guarantee loans, under subpart 1 of part C of title VII of the Public Health Service Act, to students who have not previously received loans guaranteed thereunder, and to students who have previously received loans guaranteed thereunder, except that the total of commitments so authorized may not exceed the sum of $275,000,000 plus any uncommitted balances of loan guarantee authority provided for any prior fiscal year which remain available for fiscal year 1986: Provided further, That no limitation on full-time equivalent positions of the Health Resources and Services Administration shall apply to the use of funds made available by this Act for personnel compensation.*

MEDICAL FACILITIES GUARANTEE AND LOAN FUND

FEDERAL INTEREST SUBSIDIES FOR MEDICAL FACILITIES

For carrying out subsections (d) and (e) of section 1602 of the Public Health Service

Act, $25,000,000 together with any amounts received by the Secretary in connection with loans and loan guarantees under *title VI of* the Public Health Service Act, to be available without fiscal year limitation for the payment of interest subsidies. During the fiscal year no commitments for direct loans, or loan guarantees shall be made.

HEALTH MAINTENANCE ORGANIZATION LOAN AND LOAN GUARANTEE FUND

Any amounts received by the Secretary in connection with loans and loan guarantees under title XIII of the Public Health Service Act, and not to exceed $700,000, may be disbursed with respect to any liability or contingent liability incurred prior to 1985.

CENTERS FOR DISEASE CONTROL

DISEASE CONTROL

(INCLUDING TRANSFER OF FUNDS)

To carry out titles III and XIX and section 1102 of the Public Health Service Act, sections 101, 102, 103, 201, 202, and 203 of the Federal Mine Safety and Health Act of 1977, and sections 20, 21, and 22 of the Occupational Safety and Health Act of 1970; including insurance of official motor vehicles in foreign countries; and hire, maintenance, and operation of aircraft, [$441,194,000] *$476,777,000,* of which [$3,797,000] *$4,625,000* shall remain available until expended for equipment and construction and renovation of facilities, *and of which $2,000,000 shall be used to establish, maintain, and operate a twenty-four-hour telephone hotline which permits calls to be made without charge to the caller, which provides general information concerning acquired immune deficiency syndrome and information concerning medical services and housing facilities for individuals with such syndrome, and which refers such individuals to counseling services: Provided,* That training of employees of private agencies shall be made subject to reimbursement or advances to this appropriation for the full cost of such training: *Provided further,* That not to exceed $1,266,000 in collections from user fees, including collections from training and reimbursements and advances for the full cost of proficiency testing of private clinical laboratories, may be credited to this appropriation: *Provided further,* That $10,000,000 shall be derived from unobligated balances provided under Public Law 94-266 for national influenza immunization: *Provided further, That notwithstanding any other provision of law, amounts appropriated by this Act for the Centers for Disease Control shall be used to maintain not less than 4,108 Federal full-time equivalent positions.*

NATIONAL INSTITUTES OF HEALTH

NATIONAL CANCER INSTITUTE

For carrying out section 301 *and title IV* of the Public Health Service Act with respect to cancer, [$1,221,590,000] *$1,271,555,000.*

NATIONAL HEART, LUNG, AND BLOOD INSTITUTE

For carrying out section 301, *title IV,* and section 1105 of the Public Health Service Act with respect to cardiovascular, lung, and blood diseases, and blood and blood products, [$812,882,000] *$863,652,000.*

NATIONAL INSTITUTE OF DENTAL RESEARCH

For carrying out section 301 *and title IV* of the Public Health Service Act with respect to dental diseases, [$97,691,000] *$103,728,000.*

NATIONAL INSTITUTE OF ARTHRITIS, DIABETES, AND DIGESTIVE AND KIDNEY DISEASES

For carrying out section 301 *and title IV* of the Public Health Service Act with respect to arthritis, diabetes, and digestive and kidney diseases, [$541,298,000] *$565,924,000.*

NATIONAL INSTITUTE OF NEUROLOGICAL AND COMMUNICATIVE DISORDERS AND STROKE

For carrying out section 301 *and title IV* of the Public Health Service Act with respect to neurological and communicative disorders and stroke, [$418,590,000] *$428,517,000.*

NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS DISEASES

For carrying out section 301 *and title IV* of the Public Health Service Act with respect to allergy and infectious diseases, [$371,941,000] *$429,453,000.*

NATIONAL INSTITUTE OF GENERAL MEDICAL SCIENCES

For carrying out section 301 *and title IV* of the Public Health Service Act with respect to general medical sciences, [$455,593,000] *$510,872,000.*

NATIONAL INSTITUTE OF CHILD HEALTH AND HUMAN DEVELOPMENT

For carrying out section 301 *and title IV* of the Public Health Service Act with respect to child health and human development, [$306,812,000] *$323,071,000.*

NATIONAL EYE INSTITUTE

For carrying out section 301 and [part F of] title IV of the Public Health Service Act with respect to eye diseases and visual disorders, [$188,988,000] *$184,036,000.*

NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES

For carrying out sections 301 and 311, *and title IV,* of the Public Health Service Act with respect to environmental health sciences, [$188,319,000] *$198,913,000.*

NATIONAL INSTITUTE ON AGING

For carrying out section 301 *and title IV* of the Public Health Service Act with respect to aging, [$149,067,000] *$154,118,000.*

RESEARCH RESOURCES

For carrying out section 301 *and section 472* of the Public Health Service Act with respect to research resources and general research support grants, [$304,579,000] *$305,739,000: Provided,* That none of these funds, with the exception of funds for the Minority Biomedical Research Support program, shall be used to pay recipients of the general research support grants program any amount for indirect expenses in connection with such grants.

JOHN E. FOGARTY INTERNATIONAL CENTER

For carrying out the activities at the John E. Fogarty International Center, [$11,529,000] *$11,606,000,* of which $1,999,000 shall be available for payment to the Gorgas Memorial Institute for maintenance and operation of the Gorgas Memorial Laboratory.

NATIONAL LIBRARY OF MEDICINE

For carrying out section 301 with respect to health information communications and part I of title III of the Public Health Service Act, [$46,972,000] *$60,000,000.*

OFFICE OF THE DIRECTOR

For carrying out the responsibilities of the Office of the Director, National Institutes of Health, [$117,085,000] *$37,574,000,* including purchase of not to exceed [ten] *13* passenger motor vehicles for replacement only.

BUILDINGS AND FACILITIES

For construction of, and acquisition of sites and equipment for, facilities of or used by the National Institutes of Health, $14,900,000, to remain available until expended.

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH ADMINISTRATION

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH

For carrying out the Public Health Service Act with respect to mental health, drug abuse, alcohol abuse, and alcoholism, [$903,637,000] *$995,539,000* of which $100,000 for design, modernization, and improvement of government owned or leased intramural research facilities shall remain available until expended: *Provided, That notwithstanding any other provision of law, these funds shall be used to maintain not less than 1,571 Federal full-time equivalent positions.*

FEDERAL SUBSIDY FOR SAINT ELIZABETHS HOSPITAL

For a portion of the cost of the maintenance and operation of Saint Elizabeths Hospital in the District of Columbia $43,696,000: *Provided,* That in fiscal year 1986 and thereafter the maximum amount available to Saint Elizabeths Hospital from Federal sources shall not exceed the total of the following amounts: the appropriations made under this heading, amounts billed to Federal agencies and entities by the Secretary of Health and Human Services for services provided at Saint Elizabeths Hospital, and amounts authorized by titles XVIII and XIX of the Social Security Act: *Provided further,* That this amount shall not include Federal funds appropriated to the District of Columbia under "Federal Payment to the District of Columbia" and payments made pursuant to section 9(c) of Public Law 98-621: *Provided further,* That the Secretary of Health and Human Services may set rates which in the aggregate do not exceed the estimated total cost of inpatient and outpatient services provided through Saint Elizabeths Hospital as authorized by title 16, sections 2315 and 2320, title 21, sections 511, 513, 522, 545, 902, and 1116, and title 24, sections 301 and 302 of the District of Columbia Code, and may bill and collect from (prospectively or otherwise) individuals, the District of Columbia and other entities for any services so provided: *Provided further,* That the Secretary of Health and Human Services may set rates which in the aggregate do not exceed the estimated total cost of inpatient and outpatient services provided through Saint Elizabeths Hospital as authorized by title 24, sections 191, 196, 211, 212, 222, 253, and 324, title 31, section 1535, and title 42, sections 249 and 251 of the United States Code, and may bill and collect (prospectively or otherwise) from individuals, and Federal agencies, and other entities for any services so provided. Amounts so collected shall be credited to the appropriation for Saint Elizabeths Hospital and shall remain available until expended.

OFFICE OF ASSISTANT SECRETARY FOR HEALTH

PUBLIC HEALTH SERVICE MANAGEMENT

For the expenses necessary for the Office of Assistant Secretary for Health and for carrying out title III of the Public Health Service Act, [$87,621,000] *$90,636,000,* together with *$500,000 to be transferred from amounts appropriated from the general fund for the management of the Health Care Financing Administration and* not to exceed [$1,050,000] *$3,500,000* to be trans-

ferred and expended as authorized by section 201(g) of the Social Security Act, from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds referred to therein and, in addition, amounts collected by the National Center for Health Statistics from the sale of data tapes shall be credited to this appropriation and shall remain available until expended.

From amounts so appropriated or otherwise made available, $1,000,000 shall be for the development of a comprehensive plan detailing possible administrative and legislative solutions to the problems experienced by physicians and other individuals who provide health treatment or care, including nurses and other State licensed or certified practitioners, in obtaining liability insurance at reasonable cost; and for the initiation of pilot projects to study or demonstrate any such possible solutions (including Federal reinsurance of private insurers offering malpractice or related health liability insurance).

RETIREMENT PAY AND MEDICAL BENEFITS FOR COMMISSIONED OFFICERS

For retirement pay and medical benefits of Public Health Service Commissioned Officers as authorized by law, and for payments under the Retired Serviceman's Family Protection Plan and Survivor Benefit Plan and for medical care of dependents and retired personnel under the Dependents' Medical Care Act (10 U.S.C., ch. 55), such amounts as may be required during the current fiscal year.

HEALTH CARE FINANCING ADMINISTRATION

GRANTS TO STATES FOR MEDICAID

For carrying out, except as otherwise provided, title XIX of the Social Security Act, [$17,710,469,000] *$18,315,492,000*, to remain available until expended.

For making, after May 31, 1986, payments to States under title XIX of the Social Security Act, for the last quarter of fiscal year 1986 for unanticipated costs, incurred for the current fiscal year, such sums as may be necessary[, the obligations and the expenditures to be charged to the subsequent appropriations for the current or succeeding fiscal year.]

Payment under title XIX may be made for any quarter beginning after June 30, 1985, and before October 1, 1986, with respect to any State plan or plan amendment in effect during any such quarter, if submitted in, or prior to such quarter and approved in that or any such subsequent quarter.

For making payments to States under title XIX of the Social Security Act for the first quarter of fiscal year 1987, $6,500,000,000, to remain available until expended.

PAYMENTS TO HEALTH CARE TRUST FUNDS

For payment to the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds, as provided under sections 217(g), 229(b) and 1844 of the Social Security Act, sections 103(c) and 111(d) of the Social Security Amendments of 1965, and section 278(d) of Public Law 97-248, [$19,659,000,000] *$18,854,000,000.*

PROGRAM MANAGEMENT

For carrying out, except as otherwise provided, titles XI, XVIII, and XIX of the Social Security Act, [$88,185,000] *$95,533,000 (of which $500,000 shall be transferred as provided in the Public Health Service Management Account under the Officer of Assistant Secretary for Health)*, together with not to exceed [$1,168,108,000] *$1,182,885,000* to be transferred to this appropriation as authorized by section 201(g) of the Social Security Act, from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds referred to therein: *Provided*, That in addition, $15,000,000 shall similarly be derived by transfer from said trust funds and shall be expended only to the extent necessary to process workloads not anticipated in the budget estimates and to meet unanticipated costs of agencies or organizations with which agreements have been made to participate in the administration of title XVIII and after maximum absorption of such costs within the remainder of the existing limitation has been achieved: *Provided further, That notwithstanding any other provision of law, these funds shall be used to maintain not less than 3,900 Federal full-time equivalent positions.*

SOCIAL SECURITY ADMINISTRATION

PAYMENTS TO SOCIAL SECURITY TRUST FUNDS

For payment to the Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Funds, as provided under sections 201(m), 217(g), 228(g), 229(b), and 1131(b)(2) of the Social Security Act and section 152 of Public Law 98-21, $497,008,000.

SPECIAL BENEFITS FOR DISABLED COAL MINERS

For carrying out title IV of the Federal Mine Safety and Health Act of 1977, including the payment of travel expenses on an actual cost or commuted basis, to an individual, for travel incident to medical examinations, and to parties, their representatives, and all reasonably necessary witnesses for travel within the United States, Puerto Rico, and the Virgin Islands, to reconsideration interviews and to proceedings before administrative law judges, [$727,908,000] *$727,908,000 to remain available until expended.* For making, after July 31, of the current fiscal year, benefit payments to individuals under title IV of the Federal Mine Safety and Health Act of 1977, for costs incurred in the current fiscal year, such amounts as may be necessary[, the obligations and expenditures to be charged to the subsequent appropriations for the current or succeeding fiscal year.]

For making benefit payments under title IV of the Federal Mine Safety and Health Act of 1977 for the first quarter of fiscal year 1987, $270,000,000, to remain available until expended.

SUPPLEMENTAL SECURITY INCOME PROGRAM

For carrying out the Supplemental Security Income Program, section 401 of Public Law 92-603, section 212 of Public Law 93-66, as amended, and section 405 of Public Law 95-216, including payment to the social security trust funds for administrative expenses incurred pursuant to section 201(g)(1) of the Social Security Act, $7,712,089,000, to remain available until expended: *Provided*, That any portion of the funds provided to a State in the current fiscal year and not obligated by the State during that year shall be returned to the Treasury. For making, after July 31 of the current fiscal year, benefit payments to individuals under title XVI of the Social Security Act, for unanticipated costs incurred for the current fiscal year, such sums as may be necessary[, the obligations and expenditures therefor to be charged to the subsequent appropriations for the current or succeeding fiscal year.]

For carrying out the Supplemental Security Income Program for the first quarter of fiscal year 1987, $2,339,250,000, to remain available until expended.

ASSISTANCE PAYMENTS PROGRAM

For carrying out, except as otherwise provided, titles I, IV-A and -D, X, XI, XIV, and XVI of the Social Security Act and the Act of July 5, 1960 (24 U.S.C., ch. 9), [$6,679,578,000] *$6,859,578,000*, to remain available until expended.

For making, after May 31 of the current fiscal year, payments to States under titles I, IV-A and -D, X, XIV, and XVI of the Social Security Act, for the last three months of the current fiscal year, for unanticipated costs, incurred for the current fiscal year, such sums as may be necessary[, the obligations and expenditures to be charged to the subsequent appropriations for the current or succeeding fiscal year.]

For making payments to States under titles I, IV-A and -D, X, XIV, and XVI of the Social Security Act for the first quarter of fiscal year 1987, $2,193,754,000, to remain available until expended.

CHILD SUPPORT ENFORCEMENT

For carrying out, except as otherwise provided, titles IV-D and XI of the Social Security Act, $432,601,000, to remain available until expended.

For making, after May 31 of the current fiscal year, payments to States under title IV-D of the Social Security Act, for the last three months of the current fiscal year, for unanticipated costs, incurred for the current fiscal year, such sums as may be necessary[, the obligations and the expenditures to be charged to the subsequent appropriations for the current or succeeding fiscal year.]

For making payments to States under title IV-D of the Social Security Act for the first quarter of fiscal year 1987, $170,750,000, to remain available until expended.

LOW INCOME HOME ENERGY ASSISTANCE

For carrying out title XXVI of the Omnibus Budget Reconciliation Act of 1981, $2,100,000,000.

LIMITATION ON ADMINISTRATIVE EXPENSES

For necessary expenses, not more than [$4,022,486,000] *$3,992,486,000* may be expended, as authorized by section 201(g)(1) of the Social Security Act, from any one or all of the trust funds referred to therein: *Provided*, That travel expense payments under section 1631(h) of such Act may be made only when travel of more than seventy-five miles is required: *Provided further*, That $175,000,000 of the foregoing amount shall be apportioned for use only to the extent necessary to process workloads not anticipated in the budget estimates, for automation projects and their impact on the work force, and to meet mandatory increases in costs of agencies or organizations with which agreements have been made to participate in the administration of titles XVI and XVIII and section 221 of the Social Security Act, and after maximum absorption of such costs within the remainder of the existing limitation has been achieved: *Provided further*, That $182,939,000 for automatic data processing and telecommunications activities shall remain available until expended: *Provided further*, That none of the funds appropriated by this Act may be used for the manufacture, printing, or procuring of social security cards, as provided in section 205(c)(2)(D) of the Social Security Act, where paper and other materials used in the manufacture of such cards are produced, manufactured, or assembled outside of the United States: *Provided further, That none of the funds made available in this Act may be used to plan, implement, or*

administer the closure of a Social Security field office if such closure would result in a net reduction in the total number of Social Security offices on September 30, 1986, as compared with July 1, 1985.

HUMAN DEVELOPMENT SERVICES

SOCIAL SERVICES BLOCK GRANT

For carrying out the Social Services Block Grant Act, $2,700,000,000.

HUMAN DEVELOPMENT SERVICES

For carrying out, except as otherwise provided, the Older Americans Act of 1965, the Runaway and Homeless Youth Act, the Native Americans Programs Act, the Developmental Disabilities Assistance and Bill of Rights Act, the Child Abuse Prevention and Treatment Act, *chapter 8-D of title VI-A of the Omnibus Budget Reconciliation Act of 1981 (pertaining to grants to States for planning and development of dependent care programs), the Family Violence Prevention and Services Act (title III of P.L. 98-457),* and the Head Start Act, [$2,003,722,000: *Provided,* That $76,349,000 shall be the maximum amount available for Indian and migrant Head Start programs for fiscal year 1986] *$2,006,422,000.*

FAMILY SOCIAL SERVICES

For carrying out parts B and E of title IV and section 1110 of the Social Security Act, and title II of Public Law 95-266 (adoption opportunities), [$745,019,000] *$807,412,000.*

WORK INCENTIVES

For carrying out a work incentive program, as authorized by part C of title IV of the Social Security Act, including registration of individuals for such programs, and for related child care and other supportive services, as authorized by section 402(a)(19)(G) of the Act, including transfer to the Secretary of Labor, as authorized by section 431 of the Act, [$250,000,000] *$266,760,000* which shall be the maximum amount available for transfer to the Secretary of Labor and to which the States may become entitled pursuant to section 403(d) of such Act, for these purposes.

OFFICE OF COMMUNITY SERVICES

COMMUNITY SERVICES BLOCK GRANT

For carrying out the Community Services Block Grant Act, [$361,700,000] *$372,435,000,* of which [$18,350,000] *$19,920,000* shall be for carrying out section 681(a)(2)(A), [$3,720,000] *$4,050,000* shall be for carrying out section 681(a)(2)(D), [$2,800,000] *$3,035,000* shall be for carrying out section 681(a)(2)(E), and $6,130,000 shall be for carrying out section 681(a)(2)(F).

DEPARTMENTAL MANAGEMENT

GENERAL DEPARTMENTAL MANAGEMENT

For necessary expenses, not otherwise provided, for general departmental management, including hire of six medium sedans, [$123,949,000] *$139,949,000* together with not to exceed $8,000,000 to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein, *of which $16,000,000 shall be for the award of grants, under the authority of section 301 of the Public Health Service Act, for four projects demonstrating the delivery of health care services to victims of acquired immune deficiency syndrome, to be conducted by entities located, and providing services to persons residing, in those four standard metropolitan statistical areas having the highest concentration of persons suffering the syndrome: Provided, That an additional amount of $4,500,000 shall be transferred from amounts available to the National Institutes of Health, National Cancer Institute, for construction, which additional amount shall be used by the Secretary under the contract provisions of section 301(a)(7) of the Public Health Service Act for construction of the Mary Babb Randolph Cancer Center in West Virginia.*

OFFICE OF THE INSPECTOR GENERAL

For expenses necessary for the Office of the Inspector General, $42,219,000 together with not to exceed $30,000,000 to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein.

OFFICE FOR CIVIL RIGHTS

For expenses necessary for the Office for Civil Rights, [$15,636,000] *$16,259,000* together with not to exceed $4,000,000 to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein.

POLICY RESEARCH

For carrying out, to the extent not otherwise provided, research studies under section 1110 of the Social Security Act, [$6,500,000] *$6,000,000.*

[GENERAL PROVISIONS

[SEC. 201. None of the funds appropriated by this title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

[SEC. 202. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of research an amount equal to as much as the entire cost of such research.]

SEC. 201. No funds appropriated by this Act may be used by the Department of Health and Human Services to pay an indirect cost rate in excess of the grantee's fiscal year 1985 rate in effect on December 31, 1984: Provided: That this section applies only to those grantees that had fiscal year 1985 indirect cost rates in effect on December 31, 1984.

SEC. [203] *202.* Appropriations in this Act for the Health Resources and Services Administration, the National Institutes of Health, the Centers for Disease Control, the Alcohol, Drug Abuse, and Mental Health Administration, the Office of the Assistant Secretary for Health, the Health Care Financing Administration, and Departmental Management shall be available for expenses for active commissioned officers in the Public Health Service Reserve Corps and for not to exceed [two thousand four hundred] *two thousand five hundred* commissioned officers in the Regular Corps; expenses incident to the dissemination of health information in foreign countries through exhibits and other appropriate means; advances of funds for compensation, travel, and subsistence expenses (or per diem in lieu thereof) for persons coming from abroad to participate in health or scientific activities of the Department pursuant to law; expenses of primary and secondary schooling of dependents in foreign countries, of Public Health Service commissioned officers stationed in foreign countries, at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents, between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; expenses for medical care for civilian and commissioned employees of the Public Health Service and their dependents, assigned abroad on a permanent basis in accordance with such regulations as the Secretary may provide; rental or lease of living quarters (for periods not exceeding five years), and provision of heat, fuel, and light and maintenance, improvement, and repair of such quarters, and advance payments therefor, for civilian officers, and employees of the Public Health Service who are United States citizens and who have a permanent station in a foreign country; purchase, erection, and maintenance of temporary or portable structures; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to section 207(f) or section 207(g) of the Public Health Service Act, at rates established by the Assistant Secretary for Health, or the Secretary where such action is required by statute, not to exceed the per diem rate equivalent to the rate for GS-18; not to exceed $9,500 for official reception and representation expenses related to any health agency of the Department when specifically approved by the Assistant Secretary for Health.

[SEC. 204. None of the funds contained in this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term.]

SEC. [205] *203.* Funds advanced to the National Institutes of Health Management Fund from appropriations in this Act shall be available for the expenses of sharing medical care facilities and resources pursuant to section 327A of the Public Health Service Act.

SEC. [206] *204.* Funds appropriated in this title for the Social Security Administration and the Office of Child Support Enforcement shall be available for not to exceed $5,000 for official reception and representation expenses related to income maintenance or child support enforcement activities of the Department when specifically approved by the Commissioner of Social Security.

SEC. [207] *205.* Funds appropriated in this title for the Health Care Financing Administration shall be available for not to exceed $2,000 for official reception and representation expenses when specifically approved by the Administrator of the Health Care Financing Administration.

SEC. [208] *206.* No funds appropriated for the fiscal year ending September 30, 1986, by this or any other Act, may be used to pay basic pay, special pays, basic allowance for subsistence and basic allowances for quarters of the commissioned corps of the Public Health Service described in section 204 of title 42, United States Code, at a level that exceeds 110 percent of the Executive Level I annual rate of basic pay: *Provided,* That amounts received from employees of the Department in payment for room and board may be credited to the appropriation ac-

counts "Health Resources and Services", National Institutes of Health "Office of the Director", "Disease Control", and "Federal Subsidy for Saint Elizabeths Hospital". *Funds appropriated by this Act or any other Act shall not be used for special, revised special, or continuation pay to any physician or dentist appointed to the Public Health Service Commissioned Corps during the current year whose primary duties are determined by the Secretary to be administrative or managerial: Provided, That any physician or dentist who, through promotion or reassignment within the Corps, assumes as primary duties administrative or managerial responsibilities may, at the discretion of the Secretary, receive such special, revised special or continuation pay.*

SEC. [209] *207.* None of the funds appropriated in this title shall be used to transfer the general administration of programs authorized under the Native American Programs Act from the Department of Health and Human Services to the Department of the Interior.

SEC. [210] *208.* Funds provided in this Act may be used for one-year contracts which are to be performed in two fiscal years, so long as the total amount for such contracts is obligated in the year for which the funds are appropriated.

SEC. 209. Funds appropriated by this Act may be used to pay comparability allowances, as authorized under 5 U.S.C. 5948, only to those persons who are licensed to practice medicine, except that this provision shall not apply to individuals receiving such allowances prior to January 1, 1986.

SEC. 210. Not to exceed one-half of 1 per centum of appropriations made available for this fiscal year for the activities of the National Institutes of Health funded in this Act may be transferred to any other appropriation for the National Institutes of Health, but no such appropriation, except as otherwise provided, shall be increased or decreased by more than 1 per centum by any such transfers and Congress shall be notified promptly of any such transfer: Provided, That research grants or contracts funded by any appropriation made to any National Institute of Health or the Alcohol, Drug Abuse, and Mental Health Administration, shall be awarded only after consideration by the advisory body of the full cost of such a research grant or contract.

[SEC. 211. Pursuant to United States Code title 42, paragraph 264, funds provided in this Act for research into the causes and transmission of acquired immune deficiency syndrome disease may be used by the Surgeon General for closing or quarantining as a public health hazard any bathhouse or massage parlor which in his judgment pursuant to law can be determined to facilitate this transmission or spread of the AIDS epidemic.]

SEC. 211. The Secretary is authorized to make cash awards to commissioned officers of the Public Health Service for specific suggestions, inventions, or achievements, which are of benefit to the Government.

SEC. 212. Notwithstanding 31 United States Code 1348, and for the purpose of ensuring proper management of federally supported computer systems and data bases, funds appropriated by this Act are available for the purchase of dedicated telephone service between the private residences of employees assigned to computer centers funded under this Act, and the computer centers to which such employees are assigned.

SEC. 213. Notwithstanding any other provision of law, amounts appropriated by this Act for the National Institutes of Health shall be used to maintain not less than 13,507 Federal full-time equivalent positions.

This title may be cited as the "Department of Health and Human Services Appropriation Act, 1986".

TITLE III—DEPARTMENT OF EDUCATION

COMPENSATORY EDUCATION FOR THE DISADVANTAGED

For carrying out chapter 1 of the Education Consolidation and Improvement Act of 1981, as amended, $3,688,163,000, of which $5,246,000 shall be used for purposes of section 555(d) of said Act to provide technical assistance and evaluate programs, and the remaining $3,682,917,000 shall become available on July 1, 1986, and remain available until September 30, 1987: *Provided,* That of these remaining funds, no funds shall be used for purposes of section 554(a)(1)(B), $264,524,000 shall be available for purposes of section 554(a)(2)(A), $150,170,000 shall be available for purposes of section 554(a)(2)(B), $32,616,000 shall be available for purposes of section 554(a)(2)(C) and $35,607,000 shall be available for purposes of section 554(b)(1)(D): *Provided further, That notwithstanding the provisions of section 111(c) of the Elementary and Secondary Education Act of 1965, the criteria of poverty utilized by the Bureau of the Census in the 1980 decennial census shall be used as the basis for allocating funds under chapter 1 where applicable: Provided further, That notwithstanding the provisions of section 111(a) of the Elementary and Secondary Education Act of 1965, no funds appropriated under chapter 1 shall be allocated on the basis of data taken from the 1975 survey of income and education conducted by the Bureau of the Census.*

For carrying out section 418A of the Higher Education Act, $7,500,000.

IMPACT AID

For carrying out title I of the Act of September 30, 1950, as amended (20 U.S.C. ch. 13), [$675,000,000,] *$622,000,000* of which [$22,000,000] *$20,000,000* shall be for entitlements under section 2 of said Act, $10,000,000, which shall remain available until expended, shall be for payments under section 7 of said Act and [$643,000,000] *$592,000,000* shall be for entitlements under section 3 of said Act of which $513,000,000 shall be for entitlements under section 3(a) of said Act: *Provided,* That payment with respect to entitlements under section 3(a) to any local educational agency described in section 3(d)(1)(A) of said Act shall be at 100 per centum of entitlement except that payment to such agency attributable to children who reside on property which is described in section 403(1)(C) of said Act shall be limited to 15 per centum of entitlement: *Provided further,* That payment with respect to entitlements under section 3(a) to any local educational agency not described in section 3(d)(1)(A) shall be ratably reduced from 100 per centum of entitlement except that payment to such agency attributable to children who reside on property which is described in section 403(1)(C) shall be ratably reduced from 15 per centum of entitlement: *Provided further,* That payment with respect to entitlements under section 3(b) of said Act to any local educational agency in which 20 per centum or more of the total average daily attendance is made up of children determined eligible under section 3(b) shall be at 60 per centum of entitlement and payment with respect to entitlements under section 3(b) of said Act to any local educational agency in which less than 20 per centum of the total average daily attendance is made up of children determined eligible under section 3(b) shall be ratably reduced from 100 per centum of entitlement: *Provided further,* That the provisions of section 5(c) of said Act shall not apply to funds provided herein: *Provided further,* That no payments shall be made under section 7 of said Act to any local educational agency whose need for assistance under that section fails to exceed the lesser of $10,000 or 5 per centum of the district's current operating expenditures during the fiscal year preceding the one in which the disaster occurred: *Provided further,* That in determining entitlements under section 3 of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), the local contribution rate for each local educational agency shall [not be more than] *be equal to* the local contribution rate for that agency for fiscal year 1985: *Provided further,* That in the case of a local educational agency that did not have a local contribution rate for fiscal year 1985, the Secretary shall base such agency's fiscal year 1986 payment on a local contribution rate the agency could have received for fiscal year 1985.

For carrying out the Act of September 23, 1950, as amended (20 U.S.C. ch. 19), [$20,000,000] *$10,000,000* which shall remain available until expended, shall be for providing school facilities as authorized by said Act, of which [$8,500,000] *$4,250,000* shall be for awards under section 10 of said Act, [$8,500,000] *$4,250,000* shall be for awards under sections 14(a) and 14(b) of said Act, and [$3,000,000] *$1,500,000* shall be for awards under sections 5 and 14(c) of said Act.

SPECIAL PROGRAMS

For carrying out the consolidated programs and projects authorized under chapter 2 of the Education Consolidation and Improvement Act of 1981, as amended $531,909,000, of which $31,909,000 shall be for programs and projects authorized under subchapter D of said Act, including $10,700,000 for programs and projects authorized under subsection 583(a)(1) of said Act; $6,052,000 shall be used for awards, which, except for educational television programming, are not to exceed a cumulative amount of $1,000,000 to any recipient for national impact demonstration or research projects; $7,000,000 for activities authorized under subsection 583(b)(1) of said Act; $3,157,000 for programs authorized under subsection 583(b)(2) of said Act; $3,000,000 for programs authorized under subsection 583(b)(3) of said Act; and $2,000,000 for activities authorized under subsection 583(b)(4) of said Act: *Provided,* That $500,000,000 to carry out the State block grant program authorized under chapter 2 of said Act shall become available for obligation on July 1, 1986, and shall remain available until September 30, 1987.

For grants to State educational agencies and desegregation assistance centers authorized under section 403 of the Civil Rights Act of 1964, $24,000,000.

For carrying out activities authorized under title IX, part C of the Elementary and Secondary Education Act, $6,000,000.

For carrying out activities authorized under section 1524 of the Education Amendments of 1978, [$2,700,000] *$5,000,000.*

For carrying out activities authorized under section 1525 of the Education Amendments of 1978, $2,000,000.

For carrying out activities authorized under Public Law 92-506, as amended, [$1,500,000] *$1,700,000: Provided,* That said sum shall become available on July 1, 1986, and shall remain available until September 30, 1987.

For carrying out the provisions of title VII of the Education for Economic Security Act, relating to magnet schools assistance, $75,000,000: *Provided,* That not more than $4,000,000 in the fiscal year may be paid to any single eligible local educational agency.

[For carrying out the provisions of title VI of the Education for Economic Security Act, $5,000,000 to remain available until expended.]

For carrying out activities authorized under the Follow Through Act, $7,500,000.

For carrying out the provisions of title II of the Education for Economic Security Act, $90,000,000 to become available on July 1, 1986, and remain available until September 30, 1987.

For carrying out the provisions of title IX of Public Law 98-588, $10,000,000, to become available July 1, 1986, and to remain available until September 30, 1987.

BILINGUAL EDUCATION

For carrying out, to the extent not otherwise provided, title VII of the Elementary and Secondary Education Act, title VI of the Education Amendments of 1984, and title IV, part E of the Carl D. Perkins Vocational Education Act, [$172,951,000, of which $5,000,000 shall be for section 732 of title VII of the Elementary and Secondary Education Act and $30,000,000 shall be for the Emergency Immigrant Education Program authorized by title VI of the Education Amendments of 1984.] *$143,000,000, of which $100,000,000 shall be for part A of title VII of the Elementary and Secondary Education Act, $11,000,000 shall be for part B of title VII of that Act, $28,300,000 shall be (notwithstanding any other provision of law) for part C of title VII of that Act, and $3,700,000 shall be for part E of title IV of the Carl D. Perkins Vocational Education Act and shall become available on July 1, 1986, and remain available until September 30, 1987.*

EDUCATION FOR THE HANDICAPPED

For carrying out the Education of the Handicapped Act, [$1,320,100,000] *$1,411,000,000* of which [$1,135,145,000] *$1,215,500,000* for section 611 and [$29,000,000] *$30,000,000* for section 619 shall become available for obligation on July 1, 1986, and shall remain available until September 30, 1987*: Provided, That $500,000 of the amounts available under this heading for part F of the Education of the Handicapped Act shall be available for the Theater of the Deaf.*

REHABILITATION SERVICES AND HANDICAPPED RESEARCH

For carrying out, to the extent not otherwise provided, the Rehabilitation Act of 1973, [as amended, and the Helen Keller National Center Act, $1,233,900,000, of which $1,305,916 shall be for activities under section 110(b)(3) of the Rehabilitation Act, $14,635,000 shall be for special demonstration programs for the severely disabled under section 311 of the Rehabilitation Act, $2,100,000 shall be for special recreational programs under section 316 of the Rehabilitation Act, $5,000,000 shall be for State grants under title VII, part A of the Rehabilitation Act, and $4,200,000 shall be for continued operation of the Helen Keller National Center for Deaf-Blind Youths and Adults] *the Helen Keller National Center Act, and the International Health Research Act of 1960, $1,362,000,000, of which $1,188,708,000 shall be for allotments under section 100(b)(1) of the Rehabilitation Act, $1,292,000 shall be for activities under section 110(b)(3) of the Rehabilitation Act, and $4,300,000 shall be for continued operation of the Helen Keller National Center for Deaf-Blind Youths and Adults.*

From amounts for activities under section 100(b)(2) and part C of title I of the Rehabilitation Act, $9,000,000, shall be used to award grants for projects that develop or expand transition from school to employment programs within States, including the establishment of supported employment programs for severely disabled individuals: Provided, That not less than one such grant shall be awarded within each Department of Education Region.

From amounts for activities under section 311 of the Rehabilitation Act, $750,000 shall be available for a grant to South Carolina to pay the full cost of the construction of the Comprehensive Medical Rehabilitation Center to be located in Columbia, South Carolina.

From the remainder of amounts appropriated to carry out the Rehabilitation Act, $5,000,000, to remain available until expended, shall be available, in accordance with section 311 of the Rehabilitation Act, for a grant to the Oregon Hearing Institute, in Portland, Oregon, to pay the full cost of the research activities, and the construction and renovation associated with those activities.

The amounts to carry out title VI-B (pertaining to projects with industry and business opportunities for handicapped individuals) and title VII-B (pertaining to Centers for Independent Living) of the Rehabilitation Act shall be used to assist only those entities assisted thereunder during fiscal year 1985, except for any portion of such amounts made available due either to the failure of any such entity to apply for continued funding or a determination by the Commissioner that there is a substantial failure of any such entity to comply with provisions of its approved application.

VOCATIONAL AND ADULT EDUCATION

For carrying out, to the extent not otherwise provided, the Carl D. Perkins Vocational Education Act, and the Adult Education Act, [$933,277,000] *$946,314,000* which shall become available for obligation on July 1, 1986, and shall remain available until September 30, 1987: *Provided,* That [$10,178,000 shall be available for title IV, parts A and C of the Carl D. Perkins Vocational Education Act including $6,000,000 for section 404 of said title: *Provided further,* That $7,000,000] *$7,300,000 shall be available* for State advisory councils under section 112 of the Carl D. Perkins Vocational Education Act [shall be used to provide to each State an amount equal to the amount it received in the previous fiscal year: *Provided further,* [That no State shall receive less under title II of the Carl D. Perkins Vocational Education Act than it received in the previous year: *Provided further,* That $101,963,000 for the Adult Education Act shall be used to provide to each State an amount equal to the amount it received under said Act in the previous year:] *Provided further, That $10,000,000 for title IV of that Act shall become available for obligation on July 1, 1986, and shall remain available until expended: Provided further, That $3,500,000 shall be made available for the National Occupational Information Coordinating Committee: Provided further, That $15,000,000 shall be made available to carry out title III-A of that Act and $31,633,000 shall be made available for title III-B of that Act: Provided further, That $100,000,000 shall be available for the Adult Education Act.*

STUDENT FINANCIAL ASSISTANCE

For carrying out subparts 1, 2, and 3 of part A, and parts C and E of title IV of the Higher Education Act, as amended, [$4,910,482,000] *$4,837,000,000* which shall remain available until September 30, 1987, of which $412,500,000 shall be available for carrying out subpart 2 of part A of title IV of the Higher Education Act: *Provided,* That amounts appropriated for Pell Grants shall be available first to meet any insufficiencies in entitlements resulting from the payment schedule for Pell Grants published by the Secretary of Education for the 1985-86 academic year: *Provided further,* That pursuant to section 411(b)(4)(A) of the Higher Education Act, amounts appropriated herein for Pell Grants which exceed the amounts required to meet the payment schedule published for any fiscal year by 15 per centum or less shall be carried forward and merged with amounts appropriated for the next fiscal year: *Provided further,* That the maximum Pell Grant a student may receive in the 1986-87 academic year shall be $2,100: *Provided further,* That the cost of attendance criteria used for calculating eligibility for and the amount of the Pell Grants for academic year 1986-87 shall be the same as the cost of attendance criteria used for academic year 1985-86*: Provided further, That notwithstanding section 413D(a), subsections (a) and (d) of section 462, and subsections (a), (b), (c), and (e) of section 442, of that Act, the Secretary shall apportion funds among the States so that each State's apportionment under the Supplemental Educational Opportunity Grant Program, the National Direct Student Loan Program, and the Work-Study Program bears the same ratio to the total amount appropriated under each program as that State's apportionment in fiscal year 1981 for each program bears to the total amount appropriated for fiscal year 1981 for each program: Provided further, That notwithstanding sections 413D(b)(1)(B)(ii) and 446(a) of that Act, from each jurisdiction's allotment of funds under each program, the Secretary shall allocate sums to institutions in that jurisdiction that did not receive an allocation in fiscal year 1979 (award year 1979-80) under each program in a manner that will most effectively carry out the purposes of the Supplemental Educational Opportunity Grant Program and the Work-Study Program: Provided further, That notwithstanding section 413(D)(b)(1)(B)(ii)(II) of the Higher Education Act, the provisions of clause (I) of section 413D(b)(1)(B)(ii) of such Act shall apply to the amount made available for Supplemental Educational Opportunity Grants under this heading.*

GUARANTEED STUDENT LOANS

For necessary expenses under title IV, part B of the Higher Education Act, [$2,714,482,000] *$3,300,000,000* to remain available until expended[, of which $87,000,000, shall be for administrative cost allowances under section 428(f) of said title and loan advances under section 422(c) of said title.]

HIGHER EDUCATION

For carrying out title III of the Higher Education Act of 1965, as amended, $141,208,000, of which $23,208,000 for the

endowment grant program under section 333 of title III of said Act shall remain available until September 30, 1987: *Provided*, That not less than $45,741,000 of funds appropriated for title III of said Act shall be available only to historically black colleges and universities.

For carrying out subpart 4 of part A of title IV; titles VI, [VII,] VIII, and X, parts B, C, D, and E of title IX; and sections 420, 734, and 1204(c) of the Higher Education Act of 1965, as amended; title XIII, part H, subpart 1 of the Education Amendments of 1980; and section 102(b)(6) of the Mutual Educational and Cultural Exchange Act of 1961, [$303,030,000, of which] *$282,100,000, and $5,000,000 for carrying out subpart 6 of title IV-A of the Higher Education Act of 1965: Provided further, That* $23,500,000 made available for interest subsidy grants under section 734 of the Higher Education Act [and $20,000,000 made available for undergraduate and graduate facilities grants under part B of title VII of said Act] shall remain available until expended: *Provided further*, That sections 922(b)(2) and 922(e)(2) and the funding limitations set forth in section 922(e) of the Higher Education Act shall not apply to funds in this Act.

[For carrying out title V, section 501 of the Human Services Reauthorization Act, Public Law 98-558, not to exceed $6,000,000 to remain available until September 30, 1987: *Provided*, That the Federal share of the cost of the facility shall not exceed 50 percent.]

For carrying out the provisions of part E of title V of the Higher Education Act of 1965, relating to the Carl D. Perkins Scholarship Program, $10,000,000 to remain available until expended.

HIGHER EDUCATION FACILITIES LOANS AND INSURANCE

For the payment of principal and interest, including interest insufficiencies, as authorized by the Department of Health, Education, and Welfare Appropriation Act, 1968, on account of outstanding beneficial interests or participations held by the Government National Mortgage Association, as trustee, on behalf of the Department of Education, and issued pursuant to the Participation Sales Act of 1966 (section 302(c) of the Federal National Mortgage Association Charter Act (12 U.S.C. 1717(c)), and for the payment of interest to the Treasury as required by title VII, part C, section 733(b)(2) of the Higher Education Act, as amended (20 U.S.C. 1132d-2(b)(2)), $17,996,000, to remain available until expended. The Secretary is hereby authorized to make such expenditures, within the limits of funds available under this heading and in accord with law, and to make such contracts and commitments without regard to fiscal year limitation, as provided by section 104 of the Government Corporation Control Act (31 U.S.C. 9104), as may be necessary in carrying out the program set forth in the budget for the current fiscal year. For the fiscal year 1986, no new commitments for loans may be made from the fund established pursuant to title VII, section 733 of the Higher Education Act, as amended (20 U.S.C. 1132d-2).

COLLEGE HOUSING LOANS

The aggregate amount of commitments for loans made from the fund established pursuant to title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749), for the fiscal year 1986 shall not exceed the total of loan repayments and other income available during such period, less operating costs. Payments of interest insufficiencies for the fiscal year 1986 as may be required by the Government National Mortgage Association, as trustee, on account of outstanding beneficial interests or participations issued pursuant to the Participation Sales Act of 1966 (section 302(c) of the Federal National Mortgage Association Charter Act, as amended (12 U.S.C. 1717(c))) shall be made from the fund established pursuant to title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749-1749c) using loan repayments and other income available during such fiscal year. During the fiscal year 1986 and within the resources and authority available, gross commitments for the principal amount of direct loans shall be [$80,000,000] *$40,000,000.*

EDUCATIONAL RESEARCH AND STATISTICS

For necessary expenses to carry out sections 405 and 406 of the General Education Provisions Act, as amended, $59,978,000.

LIBRARIES

For carrying out, to the extent not otherwise provided, titles I, II and III of the Library Services and Construction Act (20 U.S.C., ch. 16); and title II, part B except section 224, and part C of the Higher Education Act, notwithstanding the provisions of section 221, [$123,680,000] *$130,000,000: Provided*, That [$23,680,000] *$25,000,000* of the sums appropriated shall be used to carry out the provisions of title II of the Library Services and Construction Act and shall remain available until expended *and $5,000,000 of the sums appropriated shall be used to carry out title VI of the Library Services and Construction Act.*

SPECIAL INSTITUTIONS

AMERICAN PRINTING HOUSE FOR THE BLIND

For carrying out the Act of March 3, 1879, as amended (20 U.S.C. 101-106), including provision of materials to adults undergoing rehabilitation on the same basis as provided in 1985, $5,500,000.

NATIONAL TECHNICAL INSTITUTE FOR THE DEAF

For carrying out the National Technical Institute for the Deaf Act (20 U.S.C. 681 et seq.), [$31,400,000] *$32,000,000.*

GALLAUDET COLLEGE

For carrying out the Model Secondary School for the Deaf Act (80 Stat. 1027) and for the partial support of Gallaudet College authorized by the Act of June 18, 1954 (68 Stat. 265), including continuing education activities, existing extension centers and the National Center for Law and the Deaf, [$58,700,000] *$62,000,000.*

HOWARD UNIVERSITY

For partial support of Howard University (20 U.S.C. 121 et seq.), [$164,230,000, of which $2,000,000 shall be for an endowment matching grant in accordance with policies and procedures as appropriate for comparable grants under the Challenge Grant Amendments of 1983 (Public Law 98-95) and shall remain available until expended] *$158,230,000.*

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

For carrying out, to the extent not otherwise provided, the Department of Education Organization Act, including rental of conference rooms in the District of Columbia and hire of three passenger motor vehicles, [$224,157,000] *$225,867,000.*

OFFICE FOR CIVIL RIGHTS

For expenses necessary for the Office for Civil Rights, as authorized by section 203 of the Department of Education Organization Act, [$44,181,000] *$45,000,000: Provided, That no limitation on full-time equivalent positions of the Office of Civil Rights shall apply to the use of funds made available by this Act for personnel compensation.*

OFFICE OF THE INSPECTOR GENERAL

For expenses necessary for the Office of the Inspector General, as authorized by section 212 of the Department of Education Organization Act, [$15,281,000] *$15,312,000.*

GENERAL PROVISIONS

SEC. 301. None of the funds appropriated by this title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 302. Funds appropriated in this Act to the American Printing House for the Blind, Howard University, the National Technical Institute for the Deaf, and Gallaudet College shall be subject to audit by the Secretary of Education.

SEC. 303. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of research an amount equal to as much as the entire cost of such research.

[SEC. 304. No part of the funds contained in this title may be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to force on account of race, creed or color the abolishment of any school so desegregated; or to force the transfer or assignment of any student attending any elementary or secondary school so desegregated to or from a particular school over the protest of his or her parents or parent.

[SEC. 305. (a) No part of the funds contained in this title shall be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to require the abolishment of any school so desegregated; or to force on account of race, creed or color the transfer of students to or from a particular school so desegregated as a condition precedent to obtaining Federal funds otherwise available to any State, school district or school.

[(b) No funds appropriated in this Act may be used for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to overcome racial imbalance in any school or school system, or for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to carry out a plan of racial desegregation of any school or school system.

[SEC. 306. None of the funds contained in this Act shall be used to require, directly or indirectly, the transportation of any student to a school other than the school which is nearest the student's home, except for a student requiring special education, to the school offering such special education, in order to comply with title VI of the Civil Rights Act of 1964. For the purpose of this

section an indirect requirement of transportation of students includes the transportation of students to carry out a plan involving the reorganization of the grade structure of schools, the pairing of schools, or the clustering of schools, or any combination of grade restructuring, pairing or clustering. The prohibition described in this section does not include the establishment of magnet schools.

[SEC. 307. No funds appropriated under this Act may be used to prevent the implementation of programs of voluntary prayer and meditation in the public schools.]

SEC. [308] *304.* Section 402(c) of the Housing Act of 1950 is amended by striking out in clause (9) "October 1, 1985" and inserting in its place "October 1, 1986".

This title may be cited as the "Department of Education Appropriation Act, 1986".

TITLE IV—RELATED AGENCIES

ACTION

OPERATING EXPENSES

For expenses necessary for Action to carry out the provisions of the Domestic Volunteer Service Act of 1973, as amended (42 U.S.C. 4951 et seq.), [$150,164,000] *152,164,000*, of which [$18,364,000] *$19,000,000* shall be available to carry out title I, part A of said Act.

CORPORATION FOR PUBLIC BROADCASTING

PUBLIC BROADCASTING FUND

For payment to the Corporation for Public Broadcasting, as authorized by the Communications Act of 1934, an amount which shall be available within limitations specified by that Act, for the fiscal year 1988, $214,000,000: Provided, That no funds made available to the Corporation for Public Broadcasting by this Act shall be used to pay for receptions, parties, or similar forms of entertainment for government officials or employees: Provided further, That none of the funds contained in this paragraph shall be available or used to aid or support any program or activity from which any person is excluded, or is denied benefits, or is discriminated against, on the basis of race, color, national origin, religion, or sex.

FEDERAL MEDIATION AND CONCILIATION SERVICE

SALARIES AND EXPENSES

For expenses necessary for the Federal Mediation and Conciliation Service to carry out the functions vested in it by the Labor-Management Relations Act, 1947 (29 U.S.C. 171-180, 182), including expenses of the Labor-Management Panel and boards of inquiry appointed by the President, hire of passenger motor vehicles, and rental of conference rooms in the District of Columbia; and for expenses necessary pursuant to Public Law 93-360 for mandatory mediation in health care industry negotiation disputes and for convening fact finding boards of inquiry appointed by the Director in the health care industry; and for expenses necessary for the Labor-Management Cooperation Act of 1978 (29 U.S.C. 125a); and for expenses necessary for the Service to carry out the functions vested in it by the Civil Service Reform Act, Public Law 95-454 (5 U.S.C. Chapter 71), $23,394,000.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

SALARIES AND EXPENSES

For expenses necessary for the Federal Mine Safety and Health Review Commission (30 U.S.C. 801 et seq.), $3,815,000.

NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE

SALARIES AND EXPENSES

For necessary expenses for the National Commission on Libraries and Information Science, established by the Act of July 20, 1970 (Public Law 91-345), $690,000.

NATIONAL COUNCIL ON THE HANDICAPPED

SALARIES AND EXPENSES

For expenses necessary for the National Council on the Handicapped as authorized by section 405 of the Rehabilitation Act of 1973, as amended, [$704,000] *$765,000.*

NATIONAL LABOR RELATIONS BOARD

SALARIES AND EXPENSES

For expenses necessary for the National Labor Relations Board to carry out the functions vested in it by the Labor-Management Relations Act, 1947, as amended (29 U.S.C. 141-167), and other laws, $134,854,000: *Provided*, That no part of this appropriation shall be available to organize or assist in organizing agricultural laborers or used in connection with investigations, hearings, directives, or orders concerning bargaining units composed of agricultural laborers as referred to in section 2(3) of the Act of July 5, 1935 (29 U.S.C. 152), and as amended by the Labor-Management Relations Act, 1947, as amended, and as defined in section 3(f) of the Act of June 25, 1938 (29 U.S.C. 203), and including in said definition employees engaged in the maintenance and operation of ditches, canals, reservoirs, and waterways when maintained or operated on a mutual, nonprofit basis and at least 95 per centum of the water stored or supplied thereby is used for farming purposes.

NATIONAL MEDIATION BOARD

SALARIES AND EXPENSES

For expenses necessary to carry out the provisions of the Railway Labor Act, as amended (45 U.S.C. 151-188), including emergency boards appointed by the President, [$6,358,000] *$6,432,000.*

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

SALARIES AND EXPENSES

For the expenses necessary for the Occupational Safety and Health Review Commission, $5,901,000.

PROSPECTIVE PAYMENT ASSESSMENT COMMISSION

SALARIES AND EXPENSES

For expenses necessary to carry out section 601 of Public Law 98-21, [$2,784,000] *$2,893,000* to be transferred to this appropriation from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds.

RAILROAD RETIREMENT BOARD

DUAL BENEFITS PAYMENTS ACCOUNT

For payment to the Dual Benefits Payments Account, authorized under section 15(d) of the Railroad Retirement Act of 1974, $392,000,000 which shall be credited to the account in 12 approximately equal amounts on the first day of each month in the fiscal year.

FEDERAL PAYMENT TO THE RAILROAD RETIREMENT ACCOUNTS

For payment to the accounts established in the Treasury for the payment of benefits under the Railroad Retirement Act for unnegotiated checks, $2,200,000 which shall be the maximum amount available for payments pursuant to section 417 of Public Law 98-76: *Provided*, That these funds shall remain available through September 30, 1987.

LIMITATION ON ADMINISTRATION

For expenses necessary for the Railroad Retirement Board, [$55,422,000] *$56,501,000* to be derived from the railroad retirement accounts: *Provided*, That such portion of the foregoing amount as may be necessary shall be available for the payment of personnel compensation and benefits for not less than 1,199 full-time equivalent employees: *Provided further*, That $500,000 of the foregoing amount shall be available only to the extent necessary to process workloads not anticipated in the budget estimates and after maximum absorption of the costs of such workloads within the remainder of the existing limitation has been achieved: *Provided further*, That notwithstanding any other provision of law, no portion of this limitation shall be available for payments of standard level user charges pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(j); 45 U.S.C. 228a-r).

LIMITATION ON RAILROAD UNEMPLOYMENT INSURANCE ADMINISTRATION FUND

For further expenses necessary for the Railroad Retirement Board, for administration of the Railroad Unemployment Insurance Act, not less than $16,487,000 shall be apportioned for fiscal year 1986 [pursuant to section 3679 of the Revised Statutes, as amended (31 U.S.C. 655),] from moneys credited to the railroad unemployment insurance administration fund, and of this amount [$1,280,000] *$3,038,000* shall be derived from contributions credited to the railroad unemployment insurance account and shall be credited to the railroad unemployment insurance administration fund as authorized by section 11(a)(iv) of the Railroad Unemployment Insurance Act: *Provided*, That such portion of the foregoing amount as may be necessary shall be available for the payment of personnel compensation and benefits for not less than [379] *398* full-time equivalent employees.

SOLDIERS' AND AIRMEN'S HOME

OPERATION AND MAINTENANCE

For maintenance and operation of the United States Soldiers' and Airmen's Home, to be paid from the Soldiers' and Airmen's Home permanent fund, [$33,276,000] *$33,506,000*: *Provided*, That this appropriation shall not be available for the payment of hospitalization of members of the Home in United States Army hospitals at rates in excess of those prescribed by the Secretary of the Army upon recommendation of the Board of Commissioners and the Surgeon General of the Army.

CAPITAL OUTLAY

For construction and renovation of the physical plant, to be paid from the Soldiers' and Airmen's Home permanent fund, [$15,000,000] *$10,500,000*, to remain available until expended.

TITLE V—GENERAL PROVISIONS

SEC. 501. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 502. No part of any appropriation contained in this Act shall be expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.), pursuant to any obligation for services by contract, unless such executive agency has awarded and entered into such contract in full compliance with such Act and regulations promulgated thereunder.

SEC. 503. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18.

SEC. 504. Appropriations contained in this Act, available for salaries and expenses, shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. 505. Appropriations contained in this Act, available for salaries and expenses, shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities.

SEC. 506. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, a grant, the salary of or any remuneration whatever to any individual applying for admission, attending, employed by, teaching at, or doing research at an institution of higher education who has engaged in conduct on or after August 1, 1969, which involves the use of (or the assistance to others in the use of) force or the threat of force or the seizure of property under the control of an institution of higher education, to require or prevent the availability of certain curricula, or to prevent the faculty, administrative officials, or students in such institution from engaging in their duties or pursuing their studies at such institution.

SEC. 507. The Secretaries of Labor, Health and Human Services, and Education are authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided in this Act: *Provided*, That such transferred balances are used for the same purpose, and for the same periods of time, for which they were originally appropriated.

SEC. 508. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 509. No part of any appropriation contained in this Act shall be used, other than for normal and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, radio, television, or film presentation designed to support or defeat legislation pending before the Congress, except in presentation to the Congress itself.

No part of any appropriation contained in this Act shall be used to pay the salary or expenses of any grant or contract recipient, or agent acting for such recipient, related to any activity designed to influence legislation or appropriations pending before the Congress.

SEC. 510. The Secretaries of Labor, Health and Human Services, and Education are each authorized to make available not to exceed $7,500 from funds available for salaries and expenses under titles I, II, and III, respectively, for official reception and representation expenses; the Director of the Federal Mediation and Conciliation Service is authorized to make available for official reception and representation expenses not to exceed $2,500 from the funds available for "Salaries and expenses, Federal Mediation and Conciliation Service"; and the Chairman of the National Mediation Board is authorized to make available for official reception and representation expenses not to exceed $2,500 from funds available for "Salaries and expenses, National Mediation Board".

SEC. 511. None of the funds appropriated by this Act shall be used to pay for any research program or project or any program, project, or course which is of an experimental nature, or any other activity involving human participants, which is determined by the Secretary or a court of competent jurisdiction to present a danger to the physical, mental, or emotional well-being of a participant or subject of such program, project, or course, without the written, informed consent of each participant or subject, or a participant's parents or legal guardian, if such participant or subject is under eighteen years of age. The Secretary shall adopt appropriate regulations respecting this section.

SEC. 512. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretaries of Labor, Health and Human Services, and Education, and medical officers and other health personnel on out-patient medical service who are exempted from such limitations under 31 U.S.C. 1344.

SEC. 513. Notwithstanding any other provision of this Act, no funds appropriated by this Act may be used to execute or carry out any contract with a non-governmental entity to administer or manage a Civilian Conservation center of the Job Corps which was not under such a contract as of September 1, 1984.

SEC. 514. Upon the enactment of the Compact of Free Association, amounts appropriated by this Act for Federal financial assistance to the Trust Territory of the Pacific Islands shall be available only for the Republic of Palau, but only in amounts that such Republic would have received had the Compact not been enacted.

This Act may be cited as the "Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1986".

Mr. WEICKER. Mr. President, I ask unanimous consent that the committee amendments, with the exception of the amendment on page 43, lines 7 through 16, be considered and agreed to en bloc and that the bill as amended be regarded as original text, providing no points of order shall be waived by reason of the agreement to the request.

The PRESIDING OFFICER. Without objection, it is so ordered.

The excepted committee amendment reads as follows:

Funds appropriated by this Act or any other Act shall not be used for special, revised special, or continuation pay to any physician or dentist appointed to the Public Health Service Commissioned Corps during the current year whose primary duties are determined by the Secretary to be administrative or managerial: Provided, That any physician or dentist who, through promotion or reassignment within the Corps, assumes as primary duties administrative or managerial responsibilities may, at the discretion of the Secretary, receive such special, revised special or continuation pay.

Mr. WEICKER. Mr. President, what is the pending business?

The PRESIDING OFFICER. The first excepted committee amendment.

Mr. WEICKER. Mr. President, I move to lay on the table the first excepted committee amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table.

Mr. PROXMIRE. Mr. President, will the manager explain to me what the amendment is? I am sorry, I missed that.

Mr. WEICKER. This is removing the text of the committee amendment regarding pay of Public Health Service personnel. It has been discussed on the Democratic side. It is just tabling this excepted committee amendment.

Mr. PROXMIRE. All right.

Mr. WEICKER. Mr. President, did the Chair not call for the vote?

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table.

The motion to lay on the table was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. PROXMIRE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WEICKER. Mr. President, first I wish to thank my colleague, Senator PROXMIRE, for the industry and perception he has shown throughout the months of hearings we have had on this bill. We have not been in agreement on all issues. Some matters he raised before the committee are a part of this bill, some that I have raised are a part of this bill. But nobody in the Senate of the United States could ask for a coworker of finer quality, integrity, or vision than BILL PROXMIRE of Wisconsin.

Mr. President, the fiscal year 1986 appropriations bill for the Departments of Labor, Health and Human Services, Education and Related Agencies, H.R. 3424, which is before us today, is a very carefully crafted piece of legislation designed to maintain our Nation's commitment to vital human services while at the same time remaining within the confines of the first concurrent budget resolution.

The bill provides $105 billion in 1986, an amount slightly below the comparable appropriation for fiscal year 1985 and equal to the budget authority 302(b) allocation for this subcommittee.

The great majority of programs funded under this measure are held at actual fiscal year 1985 levels and thus the Job Corps, Work Incentives, student financial assistance, Community Services Block Grant and other programs have not been eliminated or severely reduced.

In addressing the health research concerns of our citizens, we have provided funding of 6,000 new and competing grants for the National Institutes of Health which, although a slight decrease from fiscal year 1985, is nonetheless an amount 20 percent over the administration's request. And we have given top priority to providing all funding requested by NIH, CDC, and ADAMHA to attack AIDS. Biomedical and epidemiological efforts for AIDS total $205 billion, an amount double that provided last year. In addition, $16 million is provided for the development of model AIDS treatment programs for those suffering the ravages of this deadly disease.

Mr. President, this bill does most assuredly not meet the full human service needs of our citizens. Important education, health and job training programs—many of them already unable to meet people's demands for help—will suffer further by having to absorb inflationary cost increases. Yet in this time when so many say that deficits are to be corrected by slashing only human service programs, we can at least take heart that in H.R. 3424 we have not closed our eyes and ears to human need.

I urge my colleagues to recognize H.R. 3424 for what it is—a very delicate balance between human needs and fiscal responsibility. It is a balance born from over 30 days of hearings by the Labor-HHS-Education Subcommittee. It is a balance which can be easily upset should we now tilt in one direction or another by ignoring the reality of the budget resolution or by blindly slashing at real services to needy people.

I urge that we maintain the balance and vote approval of H.R. 3424.

There is one additional comment I would like to make. What is in this bill is here by virtue of the input, I would say, of close to 100 U.S. Senators. During both the subcommittee hearings and the full committee hearings and prior to our appearance on the floor, the committee has tried to pay close attention to the priorities set forth by individual Members and the body as well.

As I come to this floor this morning, we are about $20 million under the outlay figure. And if anybody wants to go ahead and bust this bill, they can do so once we get over that figure. I have to point out, however, when that happens, then all the very carefully crafted compromises and inclusions go out the window. So I hope we could accomplish the passage of the bill in short order.

I understand there are some issues on what I would call the social agenda that need some ironing out, and I am willing to address those matters. But, otherwise, I hope we can move to rapid consideration of the bill, knowing that it is a result of hard work on the part of the committee and hard bargaining within the Republican leadership itself. And certainly there is more difficult work ahead in conference with the House.

I yield the floor.

Mr. PROXMIRE. Mr. President, we have a problem on our side. There will be some amendments that require rollcall votes and we do have Members who will have difficulty being here before midafternoon, unfortunately. I do hope that it will be possible, since this is Monday, to defer those votes until that time out of consideration for them.

Mr. President, the Labor-HHS-Education appropriation bill, as reported from the Senate Appropriations Committee, can be considered either a success story or a failure in our fight to hold down Federal spending, depending on the benchmark used to judge the bill. If we compare the bill with its fiscal year 1985 counterpart, we find that it actually provides $144,017,000 less than we appropriated last year. On the other hand, the $106.4 billion recommended in the bill for fiscal year 1986 is $5.4 billion above the President's budget request and $4.654 billion of that total lies in discretionary accounts.

Generally speaking the Appropriations Committee has proposed a freeze in funding for the many programs supported through the bill with two notable exceptions. The first exception involves programs for the handicapped and disabled, two groups. Our distinguished manager and chairman of the subcommittee, Senator WEICKER, has consistently championed as chairman of the Labor and Human Resources Committee's Subcommittee on the Handicapped. The bill provides an increase of 6.8 percent in the 1985 budget for handicapped education to a total of $1,411 million and an add-on of 10.2 percent to the 1985 rehabilitation services and handicapped research budget, providing funding of $1,362 million for this activity in 1986.

The second major exception is funding for the National Institutes of Health. In 1985, the Congress provided sufficient funding to permit the support of 6,200 new and competitive individual research grants. In order to support the continued funding of these grants and to allow the award of an additional 6,000 new and competitive grants in 1986, it was necessary to recommend a total budget for the National Institutes of Health of $5,463,658,000, a 6.1-percent boost in the Institutes' 1985 budget totals. These increases also include augmented funding for the war on acquired immune deficiency syndrome [AIDS].

One could well ask why the bill as reported exceeds the President's budget request for discretionary programs by a whopping $4.7 billion if we have held the line in so many areas. The reason is that the committee simply refused to go along with administration attempts to sharply cut and even eliminate a number of programs. For example, the administration wanted to save $617 million by closing down the Job Corps Program, cut $392.5 million by terminating health professions training and health planning support, reduce NIH funding by $287.7 million below the 1985 level, terminate the Work Incentive Program for a saving of $266.8 million and scuttle a $372,435,000 Community Services Block Grant Program.

The committee flatly rejected the President's request to terminate support for many postsecondary education programs, a move which would have saved more than $191 million. The committee also spurned proposals to save $130 million by ending impact aid payments for category "B" students; $75 million by terminating the Magnet Schools Program; $125 million through ending library assistance; and a total of $22.2 million by killing several small programs including general assistance to the Virgin Islands and territorial teacher training assistance.

None of the requests to end or cut student assistance were adopted either, Mr. President. While it is true the administration's proposal to cut Pell grants by $847 million next year was contingent upon proposed changes to the program which were never adopted by the authorizing committee, the request to end new capital contributions under the Direct Student Loan Program, thus saving $190 million in fiscal 1986, as well as the attempt to end support of the $76 million State Student Incentive Program failed to gain committee acceptance.

Mr. President, lest I leave the impression that the bill as reported makes no cuts below 1985 funding levels, let me make it clear that there are some reductions. For example, the bill includes total cuts of $295 million in Job Training Partnership Act programs with the bulk of these reductions attributable to the fact that under the Summer Youth Jobs and Dislocated Workers Programs substantial funding should be available to States and localities from prior year appropriations. Moreover, cuts of $183.9 million below current levels in education programs are included in the bill. For example there are reductions of $73.4 million in Pell grant funding, based on the latest estimates from the Congressional Budget Office,

and $51 million for impact aid payments, category "B" students.

In summary, Mr. President, Chairman WEICKER has shown a great deal of restraint in reporting out a bill that is below the comparable funding level for fiscal year 1985. His has been a tough, demanding job. And he, as I have said many times, more than any Member of the U.S. Senate in either party, has a very, very deep commitment to these programs. He feels them deeply. It is not just a matter of intellectual conviction, it is a matter of very, very strong commitment for everything that LOWELL WEICKER stands for, and I highly respect that.

With the help of a superlative staff, he has done remarkably well, I believe, under the most trying circumstances. I know that he has held the spending line on programs he would dearly love to provide greater support for.

At the same time we are facing a budget crisis of truly historic proportions. A gargantuan national debt is threatening to destroy our ability to meet the economic challenges that we have overcome so often in the past in our march toward prosperity. Under these circumstances I believe we have no choice but to make an effort on every bill, including the one before us today, to cut Federal spending. Consequently I will be introducing an across-the-board budget cut amendment that will scale funding for the discretionary programs supported through the bill one-third of the way back to the total amount recommended by the President in his February budget—a cut of about $1.6 billion, or about 5 percent, in all discretionary programs.

The President proposed a far deeper reduction. His recommendations would be $4.7 billion, or 15 percent, below the bill before us. My amendment will reduce the appropriations in the bill one-third of the way to the President's recommended spending level.

Mr. President, as I say, I know there will be amendments offered. The managers are in a difficult position here, because it is hard for us to make arguments and then just stack votes and have people come in and vote without any reference, pro or con, to arguments either way.

But we are in that difficult situation because it is Monday morning. We came in much earlier than we usually do on Monday. That puts us in something of a quandry.

Mr. WEICKER. Mr. President, I wonder if I might inquire of my good friend, the Senator from Wisconsin. It is my understanding that no restrictions were placed on our activity here this morning by the leadership, either the majority or minority. Is there some new event here which neither I nor my leadership is aware of which will indicate that we cannot move ahead and have votes?

Mr. PROXMIRE. The Senator is absolutely correct. There is no understanding, and there is no agreement certainly to defer votes until later. But I have heard from a number of Democratic Senators—there may be some Republican Senators, too—who will have great difficulty getting here until the middle of the afternoon because it is a Monday, as I say, and usually we do not convene until 12, and we do not start voting until the middle of the afternoon. A numbler of Senators will be in a difficult position. That is the situation. We have to cope with it as best we can. As a matter of fact, I think there is no obstacle in the way of our proceeding right away, and having votes. If Senators are not here, they have to take that responsibility.

Mr. WEICKER. I hope that will be the case because I think everybody was well apprised of the floor situation, both by the minority and by the majority leaders, and indeed were told that the experience of this particular bill is such that we like to move it along. I do not want to cut anybody off from debate or votes, but I know it was very inconvenient for me to get here this morning. I did not expect the bill to come up this early. But it is here. One complaint I have always had with both the majority and the minority is all of these unanimous-consent requests. We spend more time getting unanimous-consent requests than we spend in the floor. We make this adjustment, that adjustment, and by the time we are all through, we are sitting here voting between 6 and 9 o'clock at night, and everybody is complaining about it.

Maybe we can make a little legislative history here, and move along, which is not to say that I am not well aware of the fact there might be controversy. Let us vote it up or down. If not, one thing I can assure everybody is, I am going to take this bill off the floor. We are here to do our work. I am prepared to do it. I do not think I have any more amendments of my own.

I ask unanimous consent that technical amendments might be in order and that the minority and majority staff be permitted to make such technical corrections as necessary after the passage of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 814

Mr. WEICKER. Mr. President, I believe the Senator from Wisconsin has some nonmonetary amendments. I am more than glad to proceed to that, and will advise my friends who are in their offices listening to the squawk box to get to the floor, and let us hear what they have.

Mr. President, I send a technical amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Connecticut [Mr. WEICKER] proposes an amendment numbered 814.

Mr. WEICKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 18, line 7, insert "XV," after "X,".

On page 51, line 8, strike out "98-588" and insert in lieu thereof "98-558".

On page 52, line 6, strike out "$1,215,500,000" and insert in lieu thereof "$1,215,550,000".

On page 53, line 8, strike out "From amounts for" and insert "For" in lieu thereof.

On page 53, line 16, strike out "From amounts for activities" and insert in lieu thereof "For special demonstration programs for the severely disabled,".

On page 53, line 17, insert "$20,200,000, of which" before "$750,000".

On page 56, line 9, before "the" the first time it appears insert "notwithstanding sections 411(a)(2)(A)(i) and 411(b)(5) of the Higher Education Act,".

On page 56, line 16, strike out "(d)" and insert "(b)" in lieu thereof.

On page 57, line 9, strike out "413(D)(b)(1)(B)(ii)(II)" and insert in lieu thereof "413D(b)(1)(B)(ii)(II)".

On page 61, line 3, strike out "and III" and insert in lieu thereof a comma and the following: "III, IV, and VI".

On page 61, lines 8 and 11, insert "so" after "sums" each time it appears.

On page 63, strike out lines 21 through 24.

On page 65, line 19, strike out "304" and insert in lieu thereof "303".

Mr. WEICKER. Mr. President, I urge adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Connecticut.

The amendment (No. 814) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 815

(Purpose: Increase by 329 the number of full-time equivalent positions for the Centers for Disease Control)

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wisconsin [Mr. PROXMIRE] proposes an amendment numbered 815.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 23, line 1, strike "4,108" and insert "4,437".

Mr. PROXMIRE. Mr. President, the amendment I am proposing would increase by 329 the number of full time equivalent positions included in the bill for the Centers for Disease Control. This raises CDC's staffing level up to 4,437, Mr. President, and is revenue neutral. In a recent discussion with CDC by subcommittee staff, it was discovered that the FTE level provided in the bill did not allow for the Centers' reimbursable operations. My amendment would correct this. I understand the amendment has been cleared with the other side.

Mr. WEICKER. Mr. President, I urge adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment (No. 815) was agreed to.

Mr. PROXMIRE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk proceeded to call the roll.

Mr. DIXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WARNER). Without objection, it is so ordered.

AMENDMENT NO. 816

(Purpose: To add funds for the development and establishment of an Alzheimer's disease registry)

Mr. DIXON. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON], for himself and Mr. SIMON, proposes an amendment numbered 816.

Mr. DIXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 25, line 4, strike out "$154,118,000." and insert "$156,618,000, of which $2,500,000, shall be available until expended, and shall be awarded, without regard to any requirement for peer review, for the development and establishment of a registry for the collection of epidemiological data about Alzheimer's disease in the United States, for the training of personnel in the collection of such data, and for other matters respecting such disease.".

THE EVERGROWING NEED FOR AN ALZHEIMER'S DISEASE REGISTRY

Mr. DIXON. Mr. President, I am pleased to offer an amendment to H.R. 3424, a bill to make appropriations for the Departments of Labor, Health and Human Services, Education, and related agencies.

Essentially, the amendment would appropriate $2.5 million for the development and establishment of a registry for the collection of epidemiological data about Alzheimer's disease in this country, and for the training of personnel in the collection of such data.

As you may remember, on October 18, 1985, the Senate approved H.R. 2409, the Health Research Extension Act of 1985. A provision of H.R. 2409 authorizes the Director of the National Institute on Aging to make a grant to develop a registry on Alzheimer's disease. My amendment would provide the needed appropriation to implement this grant authority.

We know that Alzheimer's patients are routinely misdiagnosed because there is no clear methodology for diagnosis. A registry would provide an accumulated data base to identify cause and risk factors in Alzheimer's patients.

Mr. President, more than 2.5 million people in this country suffer from Alzheimer's disease, an irreversible brain disease that causes loss of memory followed by confusion, disorientation, loss of intellectual capacity, and eventual physical deterioration. I feel confident that a national registry would constitute the nucleus for this Nation's efforts needed to find the cause and cure for Alzheimer's disease.

I urge the adoption of this amendment.

Mr. WEICKER. Mr. President, I commend my colleague from Illinois for his amendment. I urge its adoption.

Mr. PROXMIRE. Mr. President, this is $2.5 million. May I ask my good friend, will this $2.5 million mean that, in the future, we will have to spend additional funds in this connection with this particular center, or is this a one-time appropriation which will only affect 1986?

Mr. DIXON. Mr. President, I have to tell my colleague that I cannot answer that question with any degree of authority. This amendment was adopted in the House and offered by Congressman EDWARD MADIGAN and provides for this money to be used for the collection of epidemiological data about the disease and its incidence in training personnel and the collection of the data and for other related matters. I suspect the probabilities are there will be some attendant costs in the future.

Mr. PROXMIRE. Apparently, however, it would not create a situation where we would be mandated to spend another $2.5 million next year or increasing amounts as the years go on, is that correct?

Mr. DIXON. I believe that is right. This amendment is a consequence of a bill which we approved on October 18, the Health Research Extension Act of 1985, H.R. 2409.

Mr. PROXMIRE. I appreciate that very much. There is no question that this is a most worthy cause. I cannot think of anything sadder, more devastating, or anything that we have made less progress on really than Alzheimer's disease. If any of us live long enough we are likely to get it in a devastating way, and of course it has a terrible effect on families involved.

So I congratulate the Senator. I am happy to support his amendment. As far as I know, Mr. Chairman, there is no opposition on our side.

Mr. DIXON. I thank the Senator from Wisconsin.

Mr. WEICKER. I would only like the record to show, however—and I want to emphasize the point raised by the distinguished Senator from Wisconsin—I want to make it clear this is not a continuing obligation insofar as this committee or the U.S. Senate is concerned. This is a sum of money required in pursuit of the objectives stated by the Senator from Illinois for fiscal year 1986. And that is it.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Illinois.

The amendment (No. 816) was agreed to.

Mr. DIXON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Without objection, the Senator from Connecticut is recognized.

Mr. WEICKER. I believe the Senator from Illinois has two further amendments. If he is ready to move forward, I suggest this would be the time to do so.

AMENDMENT NO. 817

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON], for himself, Mr. RIEGLE, and Mr. SIMON, proposes an amendment numbered 817.

Mr. DIXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

For the Summer Youth Employment and Training Program authorized by the Job Training Partnership Act, $100,000,000, in addition to amounts otherwise provided herein for these purposes, to be allocated to States so that each service delivery area receives, as nearly as possible, an amount equal to its prior year allocations for this program, to be available for obligation for the period July 1, 1985, through June 30, 1986.

Mr. DIXON. Mr. President, I rise for the purpose of offering an amendment on behalf of Senators RIEGLE, SIMON, and myself to restore the fiscal year 1985 level of funding for the Summer Youth Employment Program.

This program has been consistently funded at a level of $824.5 million since fiscal year 1984 and, at a minimum, should be continued at that level.

Last year, my colleagues may recall, major cities in this country would have experienced deep cuts in the program, because of a number of factors. I sponsored an amendment to add $100 million to the program, bringing funding to $824.5 million in order to partially restore the cuts which would have taken place last summer. That amendment was adopted by unanimous consent and accepted by the House of Representatives. Although some cities did not receive funding until after their programs began, funds were eventually utilized. In view of the success of this summer employment project, there is no justification for cutting it.

Mr. President, we are not requesting an increase, either real or inflation-adjusted, for this program. We are requesting a freeze at the 1984 level. The program has provided critically needed funds to young people who need these jobs.

Unemployment among our young people continues to be a major problem across this land. Unemployment has not decreased by 12 percent. Why then should funding for this program be reduced by that amount?

Just as the major cities of this country were cut drastically last summer, such a situation will exist with a $100 million cut in funds for the summer of 1986, which is when these funds will be used. The intention of the Congress has been to fund this program at a consistent level for the past two summers. It just does not make sense to impose a cut of such magnitude for next summer.

The Office of Management and Budget seems to think that there are sufficient funds carried over from last year to maintain current service levels. In fact, that is not the case, and the administration cannot possibly have figures to substantiate this since the program year just ended, and reports are not due to the Labor Department until the end of November.

I wrote to the Secretary of Labor, asking for a report on carryover funds October 1. I have not received a response to my inquiry. However, the U.S. Conference of Mayors has done a study of the impact of the proposed cuts and the amount of carryover funds in selected cities. At this time, I would like to read some of these cities, what percentage of their 1985 allocation remains, and the percentage cut they will experience without this amendment. In almost every instance, there is less than 10 percent remaining in unexpended funds from last summer's program.

Mr. President, I have the list here. I ask unanimous consent to insert this list in the RECORD at this point.

The being no objection, the table was ordered to be printed in the RECORD, as follows:

U.S. CONFERENCE OF MAYORS—IMPACT OF SENATE APPROPRIATIONS COMMITTEE PROPOSAL ON THE 1986 SUMMER YOUTH EMPLOYMENT PROGRAM AND ESTIMATED CARRYOUT FROM THE 1985 SYEP

City	Summer 1985		Summer 1986	
	Total allocation [1]	Estimated carryout (percent)	Senate committee proposal [2]	Percent loss
Baltimore, MD	6,428,068	8	3,960,999	−39

[1] $825,000,000.
[2] $725,000,000.

Mr. DIXON. It is normally accepted by the Labor Department, and others who are expert in the field of employment programs, that 10 percent should be carried over from the previous year in order to maintain continuity. Often there is a delay in appropriating funds for title IIb, resulting in a delay in starting the program when school adjourns at the end of May. Staff work begins earlier, locating jobs for these young people and taking applications. If a city does not have these funds available, the advance work cannot be done.

The city of Chicago has utilized this program in exactly the way that was intended. The Mayor's Office of Employment and Training, in collaboration with Carson, Pirie, Scott, a major department store in Chicago, and many other private companies, including Standard Oil, Sears, Illinois Bell, and First National Bank of Chicago, created a summer employment program entitled "Hire the Future." These companies hired young people last summer. Their participation is encouraging because it provides a needed link with the private sector in creating jobs for young people.

This is a very important step in the development of the summer youth employment program, and one which should not be taken lightly. Private sector initiatives were the goal of the Job Training Partnership Act, and this is an outstanding example of the successful attainment of that goal.

This amendment has the enthusiastic support of a number of diverse groups—the Conference of Mayors, the National Governors' Association, the National Alliance of Business, the AFL-CIO, the National Youth Employment Coalition, the National Association of Counties, the Lutheran Council of the U.S.A., the Full Employment Action Council, the Center for Community Change, and the National Network of Runaway Youth Services.

The concerns of many interested organizations and individuals center on two factors: First, these young people need these jobs, in many instances to help support their families or pay for their schooling. Second, the peacefulness of a community can be easily disrupted by a combination of factors including lots of young people with time on their hands who also suffer feelings of dispair because they have no money and little hope of finding work. This program has kept these kids off the streets and out of trouble. A cut will mean that fewer people can be served, and more will be idle. This is a small price to pay to provide a start for needy young people. The alternative, in terms of lack of job experience for these teenagers, is a situation which could well impair their ability to find work as adults.

This program is important, not only for the future summers for which we are now planning, but for the future lives of kids who need a chance. They have faith in this system of government, and if we turn our backs on them now, it will have an effect on their future confidence in all of us.

Mr. President, I urge the adoption of the amendment.

Mr. WEICKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. I commend the Senator from Illinois on his amendment—

certainly in terms of objectives, or questions. All he has said is so. We are also confronted, however, with some budgetary problems. Indeed, this $100 million is something that Senate action could not sustain without throwing every other worthwhile program into jeopardy. Unfortunately, the House has the full amount in its bill. Therefore, the matter will go to conference. I suspect it is one of those items that the House is going to fight very vigorously for. Obviously, it is a matter that I am going to listen to very attentively in light of what I have just stated relative to the merits of the amendment of the Senator from Illinois.

I think it should be pointed out that the reason the committee did not include the extra funds was based on the information from the Labor Department that $164,500,000 will be available next summer from unspent prior-year appropriations. Total availability would thus be $889,049,000 which is more than enough to maintain the current program level.

The bill language has also included cutbacks in certain areas that might otherwise occur due to statutory distribution formulas. Therefore, I hope that with the assurance of the Senator from Illinois this will be vigorously discussed in the conference—and the chairman is just as committed to the summer youth jobs program as is the Senator from Illinois—and that the Senator might use that as the place and time to try to achieve the objectives he has so correctly sought here on the Senate floor today.

Mr. DIXON. Mr. President, may I say to my friend, the distinguished manager of this bill, that his reputation for compassion and empathy for the needy people of this country and of the world is well known in this country. I appreciate very much his kind statements concerning the fact that he will give this every friendly evaluation in the conference.

I want to say to our manager on this side, my distinguished friend from Wisconsin, that his own concern for these interests is well known in the country. I would hope that both would indulge me when I make this comment: Every year we hear from the Department of Labor that there is some carryover money which takes care of the fact that there is a cut contemplated. Last year we vigorously debated this and I was successful in restoring the money. Because of my high regard for the two managers and my constant belief that they will do their best in the conference to get the very best consideration we can for this measure I will not pursue it this morning.

I do want to say, Mr. President, that this addresses summer jobs in the urban areas of America for kids being given their first job opportunity.

There are more than enough young people available. The contemplation of less money in a program like this where there are more people every year needing the jobs I think is one of the very sad commentaries on how we function here. There are just hundreds of thousands of young people in America desperately needing jobs and not getting them. In the city of Chicago, that great city that I have the distinct privilege of representing in the U.S. Senate, under present circumstances thousands do not obtain jobs under the existing program. Any argument that there are sufficient funds and there are carryover funds just is not an adequate response by the department involved.

I wish the Department would make a better effort to use these funds. There are plenty of people available out there who need these jobs. I would hope that this RECORD would reflect the views of this Senator because I think they are the views of many others here.

If I may indulge that view a little further, Mr. President, I would like to say in this RECORD so that someone in the Department will read it, that when we appropriate these funds for needy kids in America who desperately want jobs, funds by virtue of whch they can be engaged in useful employment instead of standing on street corners in the hot summer when they can cause trouble, I wish the administration would spend the money for that purpose and not come back to us and say, "We can afford a little cut because we have some left over."

Mr. President, we do not want the money left over. We want the money used in the urban centers of America for kids who desperately need jobs and who live in neighborhoods where there is 40 or 50 percent unemployment. I did not say 8, 9, 10, 11, 12, or 15. I said 40 percent or 50 percent. There are kids who have never known a job, and no one in their family has a job. This is a decent and responsible governmental activity to address that concern in America.

I only want to say for the record that, as we appropriate these funds this time, and I am deeply appreciative of the compassion and the understanding of my distinguished and admired friends from Connecticut and Wisconsin, I hope the conference will take the whole $100 million that is in the House version of the bill. I would ask my friends to open their hearts and consider that. I hope that next year we do not have to do this same thing again.

Beyond that, Mr. President, may I say on the basis of the very kind statements by my colleague from Connecticut, my distinguished friend from Connecticut, and the private understandings I have received from my friends from Wisconsin who is in the Chamber now, I am persuaded, Mr. President, to withdraw this amendment and leave the fate of this program to the good understanding, the intellectual capacity and the compassion of the conference committee.

The PRESIDING OFFICER. The amendment is withdrawn.

Who seeks recognition?

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 818

Mr. CHILES. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Florida [Mr. CHILES] for himself and Mr. RIEGLE proposes an amendment numbered 818.

Mr. CHILES. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 22, line 3 change $476,777,000 to $477,777,000.

On page 23, line 2 change period to colon and add the following: Provided further, that $1,000,000 shall be used for studies of designer or synthetic drug use.

Mr. CHILES. Mr. President, I rise to offer an amendment which would add $1 million for studies by the Centers for Disease Control of the prevalence of designer or synthetic drug use and the clinical health effects over time. In response to my inquiry, CDC advised that it needs this amount to do this effort. The director of the group within CDC responsible for this effort, the Center for Environmental Health, advises that designer drugs has the potential of being a fairly significant problem.

This money is needed now so that we do not lose a year and this problem does not develop into a disaster. This money would allow CDC to follow the more than 400 young people who CDC identified as having Parkinson type symptoms from a bad batch of these drugs and to identify more such cases. Also, it would allow CDC to initiate studies of users taking the fentanyl series of these drugs.

I became aware of designer drugs earlier this year and in March brought the matter to the attention of my colleagues in the Senate. I introduced legislation calling on the Drug Enforcement Policy Board to review the

designer drug problem and make recommendations to Congress for necessary legislation. The Board moved quickly and in July, Senator THURMOND introduced the Designer Drug Enforcement Act of 1985 on the administration's behalf. Under the bill, persons convicted of manufacturing, possessing, or distributing would be subject to 15 years imprisonment and a $250,000 fine.

The Judiciary Committee recently held hearings on this issue and I believe this bill will be acted on very quickly by both Houses and signed into law this year.

Earlier in July, I held a hearing about the designer drug problem and heard how someone can spend $2,000 on equipment and chemicals, and turn 2 weeks of time into 200 million doses of drugs which has the potential street value of $70 billion. That just blows my mind. We have an opportunity to get ahead of the curve here before it becomes a disaster and that is why I am offering this amendment.

Mr. President, designer drugs are extremely dangerous from a health standpoint. The drugs are thousands of times more potent than the illegal narcotics presently flooding the country, and over a hundred deaths have been identified with designer drug use so far. Furthermore, these drugs have been responsible for causing long term neurodegenerative diseases in some users.

The doctors are not optimistic about the future of a number of these patients because of the problems they are having. The human body cannot last very long in this condition. At the hearing I held in July on the designer drug problem Dr. William Langston showed a video tape about the parkinson-like syndrome these patients developed.

They literally changed before our eyes as the medication they were taking wore off—they became like zombies. The doctors are aware of over 400 young people who used these drugs in northern California. Although most are currently asymptommatic, a senior investigator at NIH has referred to them as walking time bombs. The human and medical costs of designer drugs are potentially devastating.

At my hearing I heard how the effects of designer drugs are unknown because there is no quality control when a batch is made. The kitchen chemists do not throw out a bad batch. The poor user is the guinea pig. The CDC was helpful in identifying the 400 young people who used contaminated designer drugs but Dr. Langston testified that when they left northern California they left almost in a State of retreat. They were finding so many new cases. He thinks that we are touching just the tip of the iceberg in northern California.

We have a situation now where, in my own State of Florida, the medical examiners are concerned about this problem. Most do not have the expertise to detect a death from designer drugs. Also, I have recently been told that a number of chemists in other parts of the country have been making designer drugs for their own use and to sell for profit. These are just a few reasons why we need to do something right now, today.

I urge adoption of the amendment.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, I agree with the analysis of the situation described by the distinguished Senator from Florida and I urge adoption of the amendment.

The PRESIDING OFFICER. Is there further discussion?

If not, the question is on agreeing to the amendment of the Senator from Florida.

The amendment (No. 818) was agreed to.

Mr. CHILES. I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who seeks recognition?

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 819

(Purpose: To provide funds for grants to organ procurement organizations and to reduce funds for State grants for mathematics and science education)

Mr. GORE. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee [Mr. GORE] proposes an amendment numbered 819.

Mr. GORE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 18, line 11, strike out "$1,547,979,000," and insert "$1,550,979,000, of which $3,000,000 shall be available for grants under section 371 of the Public Health Service Act;".

Mr. GORE. Mr. President, the purpose of this amendment is to reaffirm the resolve of the Congress to help the thousands of patients around our country waiting for a lifesaving organ transplant. It insures that the mandate of the Congress, as contained in the National Organ Transplant Act, is carried out as the Congress intended.

The amendment adds $3 million for the grant program for organ procurement organizations [OPO's] mandated by section 371 of the Public Health Service Act.

Last year, following 2 years of exhaustive investigation of the problems faced by thousands of patients in need of an organ transplant and their families, Congress passed and the President signed into law a series of carefully crafted programs to respond to the pleas for help that all of us have heard. These programs, contained in the National Organ Transplant Act, have been strongly endorsed by virtually every major group involved with organ transplantation, including the American Society of Transplant Surgeons, the North American Transplant Coordinators Organization, the Southeastern Organ Procurement Foundation, and the Association of Independent Organ Procurement Agencies.

Unfortunately, the National Organ Transplant Act was signed into law on October 19, 1984, after action had been completed on the fiscal year 1985 appropriation act. The administration, which opposed this legislation every step of the way, has used the lack of appropriated funds to delay implementing what I believe are the two most important provisions in the Transplant Act, the organ procurement and transplantation network and the organ procurement organization grant program. The experts agree that these two programs are what will most help with the current tragic shortage of transplantable organs.

Despite the fact that the grant program was the only program in the law requiring a new appropriation, DHHS has chosen to implement only the Office of Transportation and the task force, contained in the law deferring implementation of the grant program, the computerized network, and the scientific registry. I have been told in conversations with the many transplant groups that worked with me on the legislation that this approach will seriously undermine the progress we have made over the last 2 years.

This bill before us today already addresses the network and scientific registry are my amendment today will care of the grant program.

Further delay in implementing section 371, the OPO grant program, costs the taxpayer money. Under current law Medicare spends approximately $70 million each year, which is equal to 100 percent of costs, to operate the approximately 110 Medicare approved organ procurement agencies

[OPA's]. Yet Medicare has done nothing to manage this system. As a result, Medicare is losing a great deal of money, because of dollars poorly or inappropriately spent by ineffective OPA's and because Medicare patients are forced to remain on dialysis due to an insufficient number of donors. Section 371 was carefully designed by the experts in the transplant field to provide a strong incentive to existing OPA's to adopt operating standards spelled out in section 371 that the experts have found to be consistent with successful organ retrieval efforts. When they are implemented, Government pilot studies indicate we can expect a threefold increase in the number of donors.

My amendment simply insures that the OPO grant program that is contained in the National Organ Transplant Act moves forward in the manner the Congress intended.

I hope the administration will view passage of this amendment as a restatement of congressional resolve on this issue and take immediate steps to implement section 371—so that when the money becomes available in November, grants can be awarded as soon as possible.

I urge support for this amendment.

Mr. President, this amendment has been discussed with the committee in some depth.

I shall briefly summarize exactly what this amendment is all about.

Saturday marked the first anniversary of the passing of the National Organ Transplant Act, and yet the act has not been implemented.

We know that we can save many thousands of lives through improving the organ transplant system in this country.

The National Organ Transplant Act embodied a plan to do so which was based on many, many hearings at which experts, doctors, scientists, and others testified on how to make the transplant system work.

The bill that resulted passed the Senate unanimously. It passed the House of Representatives 396 to 6.

It is partly based on a pilot project that was conducted by the Centers for Disease Control which had an educational and training program in hospitals and medical communities to instruct doctors, nurses, and emergency room personnel in how to make the request of the family of a brain-dead patient for organ donation.

That pilot project resulted in almost tripling the rate of organ donations and we believe we can do that nationwide.

There are 20,000 brain deaths each year and yet only 2,200 of them result in organ donations.

The reason that so few result in organ donations is in most cases the families are not asked, and there is a reason for that. It is a very difficult, emotional situation for a doctor or a nurse because they have been fighting to save a patient's life. They lost that struggle and the patient is brain dead, and then they have to shift emotional gears and tell the family of the benefits of organ donation and make a request for organ donation, and that is a very hard, human thing to do and as a result, it is often not done.

But it has to be done, and we know how to train doctors and nurses in the methods that are most effective in helping the family in their time of emotional need and at the same time stimulating organ donations to save the many thousands of lives that can be saved.

This program, incidentally, has many offsetting savings, and I wish to tell my colleagues why that is the case. The Federal Government pays for kidney dialysis for all Americans who need kidney dialysis. That expense is about $25,000 per patient per year. If a kidney dialysis patient receives a kidney transplant, then the one-time cost is approximately $40,000 but then the Government avoids paying $25,000 each and every year for the remainder of that patient's life.

So there are many offsetting savings. Due to the vagaries of the budget process, we have already taken credit for those savings because of the way CBO calculates these matters, but in order to actually realize the savings we have to implement the law. So it is a matter of saving money. It is also a matter of saving lives and avoiding needless suffering.

This particular amendment specifically implements the grant program by designating $3 million for the grant program. This was the only program in the law requiring a new appropriation.

Health and Human Services has chosen to implement only the task force in the law and has deferred implementation of the grant program, the computerized network, and the scientific registry.

I have been told in conversations with many transplant groups that have worked with me on legislation over the last couple of years that this approach will seriously undermine the progress we have made in the last 2 years.

Furthermore, delay in implementing this grant program does cost the taxpayers money.

We are spending approximately $70 million each year which is 100 percent of the cost to operate the approximately 110 Medicare-approved organ procurement agencies around the country, and this program is designed to make that program work much more efficiently and save money.

Medicare has not adequately managed this program and as a result is losing a great deal of money because of dollars poorly or inappropriately spent by ineffective OPA's and because Medicare patients are forced to remain on dialysis due to an insufficient number of donors.

Section 201 of the National Organ Transplant Act, which this amendment will implement, was carefully designed by the experts in the transplant field, and I emphasize for my colleagues that all of the experts, the surgeons, nurses, and transplant coordinators, all signed off on this as the consensus approach which represents the state of the art of our current knowledge in how to implement this law.

It was carefully designed and it offers a strong incentive to existing organ procurement agencies to adopt operating standards spelled out in section 371 of the Public Health Services Act and as a result I urge my colleagues to support this amendment.

I am very, very appreciative of the leadership offered by the subcommittee on this issue and very grateful for the advice and cooperation that I have had from the chairman and ranking minority member and the thousands and thousands of families out there waiting for transplants are much in need of this amendment to implement the law and, speaking for those among them with whom I have worked, I wish to thank the subcommittee chairman particularly.

I yield the floor.

The PRESIDING OFFICER (Mr. NICKLES). The Senator from Connecticut is recognized.

Mr. WEICKER. Mr. President, I first of all commend the distinguished Senator from Tennessee, Senator GORE.

I think, as each one of us come into this body, there are certain matters of concern, interest, and opportunity that we especially involve ourselves in, which does not mean to say that everyone in the Senate does not have an interest in the matter of organ transplants. They do. But there has to be someone to take the lead, and I wish to say right now the distinguished Senator from Tennessee has taken the lead on this matter.

It is a matter about which we still have a lot to learn, but no one is going to deny the lives that will be saved and human tragedy that can be averted.

So I compliment him personally. I am sure not only are we seeing Senator GORE address the subject today, but for years to come this will be something that he will strike out in a leadership role to bring to pass the most effective organ transplant program in the world.

The amendment is acceptable, and the additional $3 million will permit the initiation of grants for the establishment of the initial application for organ procurement organizations.

I hope the amendment is agreed to.

Mr. PROXMIRE. Mr. President, will the Senator from Tennessee yield for a question?

Mr. GORE. I am delighted to respond to any questions.

Mr. PROXMIRE. Mr. President, as I understand it, this amendment is in a sense at least self-financing, that is, that the program itself pays for itself. Will the Senator describe that process?

Mr. GORE. I will, indeed. The Senator is correct, it will, in large part, be offset by compensating savings and for this reason:

The Federal Government now has a program which pays for kidney dialysis for almost all patients who need kidney dialysis as part of the Medicare Program, the End Stage Renal Disease Program, the ESRD Program. Every patient on that program costs the Federal Government approximately $25,000 each year for kidney dialysis. If one of those patients gets a kidney transplant, then the Government will pay approximately $40,000 for that person to have kidney transplant. That is an expenditure, but for every remaining year of that patient's life, the Government will save $25,000 that it does not have to spend on dialysis in that year for that patient.

The limitation on the number of dialysis patients who now receive kidney transplants is the lack of availability of donated kidneys from brain-dead patients. Kidneys are different from hearts, lungs, livers, and other so-called beating heart organs, in that patients have two kidneys and there are some living related donations of kidneys. But the majority are still so-called cadaver donations which have to come from brain-dead patients. There is a limited universe of brain-dead patients, approximately 20,000 each year and only 2,200 result in donations. And if we can increase that 2,000 figure to 4,000, 5,000, 6,000, or 10,000, then the number of people now receiving dialysis at the rate of $25,000 a year will be reduced and the expenditures of the Federal Government for dialysis will be reduced in the process.

Mr. PROXMIRE. I thank the Senator. If I calculate it correct, it sounds as if only 150 people should choose this, in a matter of less than 2 years, it would pay for itself. The Senator says there will be several thousand, is that correct?

Mr. GORE. We hope there will be many thousands.

Mr. PROXMIRE. So this should be money saved over a period of just a very few years, 3 or 4 years, not a program that will actually cost money in the long run, is that right?

Mr. GORE. If it works as well as I hope it will and as the experts hope it will, then that might very well be the case.

Mr. PROXMIRE. Even if it does not work as well, it seems to me there is enough leeway here so that, as the Senator says, if it is a matter of thousands of lives being saved and a matter of $25,000 a year, it is easy to see that this program should in all likelihood more than pay for itself. I thank the Senator and I support the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (No. 819) was agreed to.

Mr. GORE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 820

(Purpose: To set aside $250,000 for a study of automation in the labor exchange process)

Mr. HART. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Colorado [Mr. HART] proposes an amendment numbered 820.

Mr. HART. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 5, line 15, after "Trust Fund," insert the following: "and of which not to exceed $250,000, of the amount which may be expended from said Trust Fund for Employment Service purposes, shall be used by the Secretary of Labor to conduct a study, to be submitted to Congress prior to June 1, 1986, designed to examine the status of automation in the labor exchange process throughout the Employment Service system, and to develop recommendations (including cost estimates) necessary to ensure the most efficient and effective job matching program within each State and among the States (known as the Interstate Job Bank System),".

Mr. HART. Mr. President, when one looks at the causes and possible responses to the problems of structural unemployment and worker dislocation in this country, one of the most stunning and startling facts that emerges is the degree of primitiveness in our system for identification of those who are out of jobs and jobs that do exist.

This amendment does not seek by itself to solve that problem alone, but it is a single and important first step in taking advantage of the technologies presently available to this great Nation for making the very obvious job matchups that are necessary in a complicated and large society such as ours.

When I use the word "primitive," I do so advisedly, Mr. President, because we are well behind virtually every industrial democracy on Earth in having a modern system for matching up unemployed people and jobs that are available throughout our country.

This amendment seeks, as I say, in a first-step way, to address that problem.

This amendment directs the Department of Labor to examine the automation needs of the employment systems responsible for matching unemployed workers with available jobs. Let me state at the outset that this study is financed through an earmarking mechanism and requires no new appropriations.

My amendment simply instructs the Department of Labor to examine the status of automation in the labor exchange process throughout the employment service system. The study, to be submitted to Congress by June 1, 1986, will include recommendations and cost estimates necessary to ensure the most efficient and effective job matching program within each State and among the States.

If we consider the reemployment of our jobless workers a high priority, as most of us do, then this amendment should be acceptable to the subcommittee floor managers and to the Senate. The obsolete equipment used by the State employment services offices and the Interstate Job Bank System not only results in vast inefficiency but, equally important, delays the search of unemployed workers who desperately want to find jobs, if not in their own State, somewhere in the United States.

A principal task of each State employment services system is to match unemployed workers with available jobs within that State. The Interstate Job Bank System, described in the Job Training and Partnership Act, provides similar services for workers and jobs throughout the Nation.

But the failure to provide funds for up-to-date automation equipment in the employment services system has produced a critical gap and enormous inefficiency. While funding for some employment administration programs has increased, the deteriorating condition of automation technology and equipment within employment services offices has been ignored. As a result, many of these offices lack the capacity to operate effective job matching programs.

Even the national organization of employment security offices—the International Conference of Employment Security Agencies [ICESA]—has documented the plight of its own system. In its September 1985 study, ICESA reports that, "Much of the States' equipment is obsolete, worn out, and in need of replacement. Many

of the States do not have adequate equipment necessary for a basic level of automation."

In the face of Government inability to reduce unemployment significantly, we must ensure that our employment services system has the technological capacity to match workers with jobs that are available. The least that an unemployed worker deserves is the opportunity to apply for an available job. Businesses and taxpayers, too, could only benefit from a job matching system that works efficiently to reduce unemployment.

As I mentioned, this amendment requires no new appropriations to fund the Department of Labor study. Instead, funds not to exceed $250,000 are to be earmarked for the report from the Employment Security Administration account—an account with a $900 million surplus at the end of September 1985. More specifically, my amendment contemplates that the study be funded through the National Activities Trust Fund of the Employment Service account.

While there is no doubt that automation equipment in the employment services system is in a deplorable condition, legislation to fund improvements is premature. Instead, a preliminary study is appropriate and necessary at this point. It is my hope that, on the basis of this report, Congress then will provide sufficient funds for the improvement of automation equipment in the system.

Mr. President, given all these facts, one might ask: why not just go ahead and update the equipment in these offices? Well, there is much that Congress does not know about what equipment is needed, what can be most efficiently and effectively purchased and installed to give us a truly efficient nationwide system. That is the purpose of this very inexpensive study.

In looking for grand schemes to reduce unemployment, we must not overlook smaller, workable programs. This simple amendment will enable our job-matching system to provide unemployed men and women with opportunities for work, hope, and renewed self-esteem.

Mr. President, I urge the floor managers to give this amendment serious and hopefully positive consideration.

Mr. WEICKER. Mr. President, I accept this amendment to set aside funds for a study of the computerized job matching systems. It does not add to the bill, but earmarks $250,000 from the existing trust fund. I commend my good friend from Colorado for the idea.

Mr. PROXMIRE. Will the Senator from Colorado yield for a question?

Mr. HART. I yield.

Mr. PROXMIRE. As I understand it, this amendment, again, is an amendment, in the first place, that requires no appropriations because it earmarks appropriations already in the bill?

Mr. HART. The Senator is correct.

Mr. PROXMIRE. In the second place, the purpose of the computer study would be to increase the efficiency of the employment service, is that right?

Mr. HART. Precisely; it is horribly outdated.

Mr. PROXMIRE. So there is no question about this being an amendment that we could expect would save money, and perhaps a great deal of money over the long run.

Mr. HART. One could certainly hope, if nothing else, in returning revenues to the Federal Treasury by productive workers who are today not working and who would be placed in available jobs through this system.

Mr. PROXMIRE. I thank the Senator. I am delighted to support the amendment.

Mr. HART. Mr. President, I thank the distinguished Senator from Connecticut and the Senator from Wisconsin.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question? If not, the question is on agreeing to the amendment of the Senator from Colorado.

The amendment (No. 820) was agreed to.

Mr. HART. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 821

(Purpose: To provide a floor on the amount to be used for personnel compensation and benefits of the Social Security Administration)

Mr. CHILES. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Florida [Mr. CHILES] proposes an amendment numbered 821.

Mr. CHILES. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 34, line 23, after "*Provided,*" insert "That not less than $2,295,098,000 shall be used only for personnel compensation and benefits, and the Impoundment Control Act of 1974 shall apply to any amount less than $2,290,000,000 not required for personnel compensation and benefits: *Provided further,*".

On page 35, line 1, strike out "$175,000,000" and insert "$145,000,000".

Mr. CHILES. I rise to offer an amendment which would protect service to our elderly and disabled Social Security recipients by restoring staffing cuts which the administration has proposed for the Social Security Administration [SSA]. My amendment would never have been necessary were it not for the ill-conceived plan of the administration to cut back on the ability of the Social Security Administration to provide adequate service to Social Security beneficiaries.

When the President sent his budget request to the Congress last February, it included a proposal to cut 17,000 positions from the Social Security Administration over the next 6 years. Shockingly the rationale for these drastic cuts was virtually nonexistent; 2,000 of these positions were to be eliminated as a result of something called streamlining service delivery. This euphemism meant that each Social Security office would be reviewed to see whether it was needed any longer; as a result of these reviews, offices would be closed or consolidated. No evidence was presented to show that such closings or other changes would allow elimination of any jobs, let alone 2,000 positions.

The claim that the other major staffing cuts could be achieved without cutbacks in service to the public was equally vacuous. For example, 3,279 positions were supposed to be eliminated through "ongoing systems enhancements and procedural changes." Yet no examples of future enhancements or procedural changes were presented. About 5,000 of the 17,000 positions to be cut were supposed to be eliminated through automation of the claims processing procedures in the field offices. At the time this figure of 5,000 positions was announced, the new computer software for this project had not yet been pilot tested in even one field office.

In the absence of real justifications for all of those drastic changes, Congress could only conclude that the delivery of service to Social Security recipients would be severely impaired if one-fifth of the positions in the Social Security Administration were eliminated. Indeed, SSA has yet to provide Congress with a more detailed justification for most of those changes. In fact, an internal SSA memorandum from last December indicated that some serious problems would arise from these cutbacks. The memo noted that:

First, quality of service in the field offices may be impacted;

Second, the payment error rate could be increased;

Third, the productivity of employees could be decreased;

Fourth, employees would have to be relocated;

Fifth, the morale of employees would be adversely affected; and

Sixth, control over operations that are "contracted out" would be restricted.

Once SSA's proposals were made public, there was an immediate outcry from many Members of Congress over the possibilities of office closings and staffing reductions. Subsequently, SSA made public the methodology it was using to review field offices to see whether they should be closed. A careful reading of this methodology raised even more alarms, especially in view of the fact that the review could result in offices being closed as early as this January.

When all of the details of SSA's review methodology are distilled, it turned out to provide for no standards for adequate service delivery to the public whatsoever. Obviously, standards for such things as travel time to offices cannot be made uniform throughout the country. It may be desirable for instance, to allow for different travel arrangements in rural areas than in urban areas. By taking into account such differences, the standards can be made flexible. But to say that such standards should be flexible is far different than to say that there should be no standards at all. Yet Martha McSteen, the Acting Commissioner of SSA flatly stated that SSA had no intention of promulgating any standards whatsoever. This statement came in her response to a bipartisan letter to her from 13 Senators, including myself, who are members of the Subcommittee on Labor, HHS, and Education of the Senate Appropriations Committee.

In the absence of any standards at all there is every reason to believe that SSA's "service delivery reviews" will result in changes that hurt Social Security recipients. For example, there would be no standards for how long a person must travel to get to an SSA office or how much time they would have to wait to be served there. There would be no standards to limit the incidence of inaccurate benefit checks, and no standards for the time SSA needs to process a claim or respond to a routine request. Moreover, the absence of nationwide standards could lead to vastly different levels of service in different parts of the country, in direct contradiction to SSA's goal of eliminating such disparities.

In view of the fact that Social Security offices could be closed as early as this January because no such standards for review exist, I believed that congressional action was urgently needed. Therefore, when this appropriations bill was being considered in committee, I proposed an amendment which would prohibit the Social Security Administration from reducing the total number of its field offices during fiscal year 1986 below the number which existed on July 1, 1985. Accompanying report language which I submitted indicated that this service restriction was being imposed because SSA had not sent the Congress any standards for its service delivery review. If such standards are ever received, Congress might contemplate lifing its prohibition against reducing the number of field offices.

With regard to SSA's proposed staffing cuts, the complete emptiness of its justification was underlined even further this summer. What appeared to be a close-to-final-draft of an SSA memo revealed that SSA was no longer claiming its "service delivery review" could eliminate any positions, let alone the reduction of 2,000 it had earlier advertised. However, the author of the new document noted that, "this is not a panacea, however, since the bottom line reduction (of staff) remains 17,006, despite the fact that 2,000 of the savings is acknowledged to be nonexistent". The author concludes by saying "Therefore, we know we will continue our service delivery review in a climate of concern—inside and outside of SSA."

In light of all of those revelations, I believe that Congress must restrict SSA from proceeding with these enormous staffing reductions in order to protect service to our Social Security beneficiaries. Placing congressional restrictions on the full scope of the planned reduction is made more difficult because the cut of 17,000 positions was to be spaced out over a 6-year period, whereas this appropriations bill is primarily concerned with cuts that would occur this year. Nonetheless, it is imperative that Congress restrict SSA's plans to cut staff this fiscal year.

SSA has proposed a net reduction of about 1,700 positions for fiscal year 1986. I am therefore proposing an amendment which will restore 1,000 of these positions for the coming fiscal year. The amendment leaves SSA the flexibility to make some minor staffing changes in the interest of efficiency. But to allow it to make the full reduction of 1,700 positions, as contemplated in the President's budget, would only result in adverse consequences for our elderly and disabled citizens who are served by the Social Security system.

My amendment would accomplish the restoration of 1,000 positions by shifting $30 million from the administrative contingency fund for SSA into the direct allocation for SSA's administrative expenses. This $30 million would augment the other funds to be spent on personnel compensation and benefits. I am advised by CBO that this shift of $30 million will not add to the cost of the bill. My amendment further stipulates that the President would be guilty of impounding funds if he spent an amount for SSA personnel compensation and benefits which is less than $2,290 million. This figure includes the $30 million in additional funds to which I have referred previously.

I also expect that SSA will forward to the appropriations committee as soon as possible, a detailed justification of its earlier proposal to cut 17,000 positions. This justification should include an analysis of proposed staffing reductions on services to the public, such as waiting time in Social Security offices, travel times to those offices, the incidence of inaccurate benefit checks, a further deterioration in SSA's ability to respond to routine requests in a timely fashion, and so forth. In addition, I would expect the Commissioner of SSA to provide to the Appropriations Committee by January of next year: First, a plan for collecting data for measuring services to the public, and second, quarterly progress reports to monitor field activities in this regard. Those reports and plans are needed in order for Congress to evaluate further the administration's current staffing reduction proposals, as well as to evaluate any future submissions.

In summary, the two amendments which I have sponsored are designed to prevent the drastic reductions in service to Social Security beneficiaries which could occur under the administration's current plan. Unless we take action now, Social Security recipients may face serious difficulties in securing adequate service in the future. I believe the Congress has an obligation to ensure that such difficulties do not occur.

Mr. President, this amendment would restore 1,000 work years of Social Security staff, and it requires the Social Security Administration to send Congress its justification for any cuts that it wishes to make, and how service can be maintained with less staff. This simply transfers $30 million from the contingency fund to the personnel compensation benefit fund.

Mr. President, this amendment has been discussed with the chairman and ranking member.

Mr. WEICKER. Mr. President, first of all, the distinguished Senator from Florida, as I understand this amendment, does not add money to the bill. Is that correct?

Mr. CHILES. That is correct.

Mr. WEICKER. I want to commend the distinguished Senator from Florida. It became very clear during the course of the appropriations that every member of the subcommittee and, indeed, the full committee was adamant that unless someone could assure us what the impact the proposed administration cuts of employees in the Social Security Administration—those cuts were not to take place. So there is no question about the fact that I do think we are prepared here in the Senate to see em-

ployees cut back if that means a cutback in services. We do not know the answer to that. We are not about ready to go ahead and take that kind of step.

I commend the Senator from Florida and support the amendment.

Mr. PROXMIRE. Mr. President, let me ask the Senator. The Senator from Wisconsin is a little confused on this. I understand it does not obviously add money to the bill. For one thing it is within the Social Security account. It would not affect the budget anyway.

Mr. CHILES. That is correct.

Mr. PROXMIRE. But it restores 1,000 Social Security staff. Say $30,000 a position, that would be $30 million if it means you are going to hire another 1,000 people.

Mr. CHILES. I say to my good friend it does not mean you are going to hire another 1,000 people. It means we will say do not fire those people or RIF them or use an attrition process until you can come to the Congress and show you are able to reduce your manpower without reducing services. That is what this amendment is all about. The administration anticipated certain savings on the basis that they were going to be able to streamline the delivery of service. When we asked them, "What is the streamlined process?" they said, "Well, we are reviewing all the Social Security offices and we may close some that are not needed." Again we said, "What is your criteria for closing an office?" That is what we are still waiting for. We have not received the criteria of standards yet which may be used to justify why an office would be closed. My amendment would transfer some money from the contingency fund and require it to be spent on personnel compensation and benefits to keep the administration from using a RIF or from failing to replace workers. But we are not talking about hiring any new workers. We are talking about trying to stay at about the same level of workers unless the administration can show us that they can streamline the delivery of service.

Mr. PROXMIRE. I understand that. Then it seems to me what the Senator's amendment would do—it undoubtedly is a necessary amendment, we certainly want to provide service for Social Security beneficiaries, they need it, and their system pays for it—but, as I understand, if they are going to avoid a RIF of 1,000 people, or replacing those who have left through attrition, then it would prevent the savings of $30 million or whatever it is. It would prevent the saving, for not having 1,000 workers. Is that right?

Mr. CHILES. I think that is correct.

Mr. WEICKER. If the Senator will yield, I want to make the point in supporting the amendment of Senator CHILES that the administration came to us and said they anticipated these savings because of the computer system that was going to be installed. It is not installed. So let us understand we have no proof that anything is being saved at this juncture. And the very basis of their assumption is not in being. So I think this amendment of the Senator from Florida makes good, common sense.

Mr. CHILES. I thank the distinguished chairman, and the ranking member.

Mr. President, I urge adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Florida.

The amendment (No. 821) was agreed to.

Mr. CHILES. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 822

(Purpose: To increase by $122,500,000 in the appropriation for title III of the Job Training Partnership Act, relating to dislocated workers)

Mr. DIXON. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON] for himself and Senators RIEGLE, HART, ROCKEFELLER, and SIMON, proposes an amendment numbered 822.

Mr. DIXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 15, strike out "$3,453,677,000" and insert in lieu thereof "$3,576,177,000".

Mr. DIXON. Mr. President, I rise to offer an amendment to restore last year's level of funding to title III of the Job Training Partnership Act on behalf of Mr. RIEGLE, Mr. HART, Mr. ROCKEFELLER, Mr. SIMON, and myself. This program has been reduced from $222.5 to $100 million. Title III provides services to dislocated workers, people who have lost their jobs because of plant closings, or because new technologies have made their jobs obsolete.

These are people who have been a key element in our work force for their entire adult lives. They were auto workers, steel workers, textile workers, coal miners, and farmers. Some of them made heavy equipment such as farm implements and road graders. Now, at a time when many of these workers are middle aged, their jobs are gone—forever.

The Labor Department has estimated that 5.1 million Americans lost their jobs between 1979 and 1983. Studies show that 60 percent of these dislocated workers found other jobs by 1984, but no one is certain what happened to the rest.

The Dislocated Worker Program has been cited by the President in recent months as the answer to two problems he has decided not to act on directly. When the Federal Supplemental Compensation Program, which provided several additional weeks of unemployment compensation, expired last March, the President decided not to extend the program. In response to a question at a press conference, he said, and I quote:

"We believe that the place now for people who are having problems is our Job Training Program, particularly job training directed at those who have to be relocated because something happened to the industries that they formerly worked in." In order to follow up on the President's comments, we need to make sure these people who have exhausted their unemployment compensation are not shortchanged.

As many of my colleagues will recall, the President elected not to implement the recommendations of the International Trade Commission on a petition for relief from shoe imports. Instead, he directed the Secretary of Labor to help the people who would be losing their jobs in this beleaguered industry through the Dislocated Worker Program. According to my calculations, there are currently 20,000 unemployed shoe workers in the United States. The Secretary has reserved $5 million of his title III discretionary money for assistance. This allocation calculates out to only $250 for each worker currently unemployed. Since the date of the President's decision not to assist this industry, plants have closed in New York, New Jersey, Florida, Maine, Pennsylvania, and Massachusetts, resulting in several thousand more workers losing jobs which will never return. It is becoming more and more likely there will be very little shoe manufacturing left in this country.

The Congressional Budget Office cites studies suggesting that industrial robots alone could eliminate between 1 and 3 million industrial jobs in the next few years. These figures represent up to 15 percent of all manufacturing jobs in the entire country.

In my State of Illinois alone, 181 facilities closed between July 1, 1984 and June 30, 1985. Most recently, the Fiat-Allis plant in Springfield closed, causing the loss of 1,300 jobs. The International Harvester plant in Rock Island also shut down, resulting in the imme-

diate layoff of 3,600 workers. United States Steel closed its South Works plant in Chicago, displacing 9,000 workers. Several shoe factories have closed in our State, affecting over 1,000 workers.

Hundreds of farmers in Illinois have been displaced because they lost their farms. This Dislocated Worker Program can also help them. No one can be helped, however, unless we provide sufficient funds.

The State of Illinois served 14,789 people in the year ending June 30, 1985, through the Dislocated Worker Program. There were 117,743 jobs lost in the State during the same period. Next year, it is anticipated that many more jobs will be lost to plant closings. Under the proposed cutbacks in the Dislocated Worker Program. Illinois will have little capability to respond to the needs of thousands of workers who have lost, or who will lose, their jobs. Few, if any, new enrollments will be possible, and there will be no reserve funds. This is the situation in just one State, Mr. President. I am sure many of my colleagues are aware of similar difficulties in their States.

The administration maintains that there are sufficient carryover funds to provide current service levels. I respectfully disagree. The National Governors' Association conducted a survey of 43 States in the past few weeks, asking how much money each had spent and obligated in the past program year which ended June 30, 1985. This information was compared to the proposed allocation that each State would receive out of the $75 million which would be available if my amendment is not adopted. The percentage of reduction for each State is sizable. Tennessee is the State which will suffer the lowest reduction, and that will be 28.2 percent. The State with the highest cut will be Hawaii, with 80.35 percent less than last year.

These reductions are especially worrisome, considering the fact that this program only serves approximately 5 percent of those who actually qualify.

Mr. President, we cannot stand by and allow this important program to be crippled. The cutback in funds is based on an assumption that there are adequate funds already in the system. This is simply not the case. The unexpended funds are, for the most part, obligated. Those that are not, need to be available for unplanned plant closings. We cannot delay, because any effort to restore last year's level of funds later this fiscal year, would prevent States from proper planning for and implementation of the Dislocated Workers Program.

I urge the adoption of this amendment.

Mr. HART. Mr. President, I am delighted to join Senator DIXON's efforts to restore funding for the Dislocated Worker Program, a new and successful worker retraining and relocation program. The Senate-reported bill cuts spending for this program by 55 percent from last year's appropriated levels.

The industrial base of this country is in transition. Manufacturing industries are being reshaped by a technological revolution that requires workers with advanced skills. And many of the high-technology industries that are essential to our changing industrial base are still in an incubator stage, making their employment planning susceptible to continuous reorganization.

In an era of multiple farm foreclosings and intense competition from foreign nations, a labor training and relocation program is desperately needed. A November 1984 Department of Labor study shows that 5.1 million long-term worker were displaced from their jobs between 1979 and 1984 because of plant closings, relocation, slack work, or the elimination of a position or shift. One-quarter of the 5.1 million displaced workers, many of whom were employed in traditional industries, continue to search for work. At the same time, the Department of Labor projects a shortage of 2.5 million skilled workers by 1990.

The Dislocated Worker Program is the only federally sponsored worker training program in the United States designed to address this economic condition. In 1983, the Dislocated Worker Program was created as title III of the Job Partnership Training Act to help workers adjust to the vicissitudes of a dynamic modern economy.

The Dislocated Worker Program provides a cushion for employment fluctuations by furnishing training, retraining, and placement assistance to displaced workers. Unlike most Federal programs, title III is based on a unique partnership between local governments, education agencies, labor, and the private sector.

There is concern in Congress that the Dislocated Worker Program is overfunded and some Members have sought a reduction in Federal funding of 55 percent. However, the expenditure data on which this action is based is dated and does not accurately reflect the program's pattern of spending.

The rationale for making the cuts was drawn from the Office of Management and Budget Expenditure data showing large amounts of unexpended funds in 1984 after the startup period of the program. Yet the data did not take into consideration the difference between funds that were obligated, but not yet unexpended. Nor was it considered that this is a new program and that initial costs would be low, but increase as the program becomes established. Finally, the OMB did not recognize the title III is a reactive program; it is often difficult to anticipate the closure of a plant, and some States prudently hold back funds in anticipation of greater demands of the program by the end of the fiscal year.

The success of this program can be measured by the contribution it made to the economic revitalization of Pueblo, CO. In Pueblo, between 1982 and 1985, 3,000 people were laid off from the CF&I Steel Co., the city's main industry. By guaranteeing a supply of trained workers through the Dislocated Worker Program, the Pueblo Economic Development Corp. was able to encourage Sperry Corp. to locate a facility in the area. With title III funds, Pueblo Community College trained former steelworkers to become electrical manufacturing technicians for the new company which is now providing 60 jobs a month.

The Dislocated Worker Program has been successful on the national level as well. Between October 1983 and June 1984, the title III program enrolled a total of 96,100 individuals, of whom 50,500 finished the program. Of those who completed training, 72 percent where reported as having entered employment after completing training.

Title III is a tremendous example of the role Government can play as a catalyst: Aiding displaced workers and private industry to master the challenges of a changing economy. America's workers and industries need not be the victims of technological change and trade imbalances. The Dislocated Worker Program is an effective and well-designed program. It is needed and it works. Let us give it a chance to help our economy flourish.

For these reasons, I support Senator DIXON's amendment to restore funding for the Dislocated Worker Program and urge my colleagues to do the same.

Mr. WEICKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, I rise to regrettably oppose the amendment of the distinguished Senator from Illinois. I do not oppose it in the sense of the intent or objectives of the program or to deny that help is not needed. But I have to oppose it in the sense that the moneys are available to carry forward the intent of the program. The committee bill reduced the new appropriations from the current level of $222,500,000 to $100 million. That was based on administration projections that sufficient unspent funds currently estimated at $245,050,000 will be carried over from prior year appropriations to maintain the current level of 50,000 enrollees. A total of $345,050,000 is expected to be available in the program year 1986. This is far in excess of $161,500,000 actually spent in the most recent program which ended June 30, 1985. It is for

that reason that I oppose the amendment of the Senator from Illinois.

Mr. PROXMIRE. Mr. President, I, too, rise in opposition to the Dixon amendment. As the distinguished manager of the bill has pointed out, this will cost $122.5 million. The committee agreed with the House and the administration to cut the level of funding by $122.5 million, to $100 million. The committee action does not, I repeat does not, cut the program's operating level because that amount is available in carryover funds from this year. The carryover is a result of slow development of the locally run programs.

The committee report made clear that the Secretary of Labor should use discretionary funds if a particular program faces serious disruptions.

Mr. President, current service levels will be maintained under the committee's funding level. The committee asked the Secretary of Labor to offer aid in special cases. Therefore, Senator DIXON's add-on is not needed and I oppose it.

I think if there is any Senator in this body who has credibility in this kind of program, it is LOWELL WEICKER. LOWELL WEICKER is certainly the kind of Senator who throughout his career here has always worked hard to provide assistance to people who are unemployed through no fault of their own, who are seeking work. He has done more than any Senator I know.

I have worked with him closely on this subcommittee where we sometimes disagree. He always wants more money and I always want less.

In this particular case, I think that since he agrees that it is unnecessary, I must say that speaks volumes. I would expect under these circumstances, and I would hope, that the Senate would realize that in view of the agreements with the House as well as the administration, in view of the fact that the funds are available, that we do not add this additional, unnecessary, redundant appropriation.

Mr. DIXON. Mr. President, I would like to make some very brief comments. It is my understanding, Mr. President, from my conversation with the manager of the bill and the ranking member, the rollcall requested on this amendment will not take place until later in the afternoon when colleagues have returned from obligatory trips to their States for business purposes.

I would like to ask for the yeas and nays at such time as our colleagues shall return today, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, I will ask unanimous consent that the vote on this matter be at such time as designated by the majority and minority leaders. Apparently, there seems to be some lack of understanding on when there will be votes. That is being resolved at the leadership level. I ask unanimous consent that the vote on the Dixon amendment take place at such time as designated by the majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. I suggest the absence of a quorum.

Mr. DIXON. Will the Senator withhold?

Mr. WEICKER. I withhold.

Mr. DIXON. Mr. President, may I say, in connection with the remarks of my distinguished friends and colleagues from Connecticut and Wisconsin that everything I might say in these very brief remarks in response is not meant in any way to reflect upon their excellent reputations as compassionate and understanding Members of the Senate, nor upon any other Member.

Mr. President, I feel compelled to make this statement: This is the third amendment I have offered in the last several days concerning cuts in programs that are so obviously meritorious and necessary and each time, the administration says, "We are carrying over money, there is adequate money there."

Last Thursday evening, as the last order of business, the manager of the HUD appropriations bill took a $20 million amendment of mine to restore money for the hungry and homeless to the same level as last year. The money for that program is totally inadequate, but the administration had cut it anyway. I suppose the administration wants us to believe that there are fewer people who are hungry and homeless. But the problem, Mr. President, is that there are not. There are more hungry and homeless, not fewer; more people starving in the wealthiest country in the world, not fewer; more people sleeping under bridges and in viaducts and on the grates in the District of Columbia, our Capital City, to keep warm in the winter when there is snow and ice on the ground—not fewer.

Then, today, I offered an amendment and I withdrew it because of my affection and respect for the managers of this bill, who say they will do the best they can in conference, for summer jobs for kids in the major cities in this country. Let us talk openly about it: These are deprived kids in the ghetto neighborhoods. Many come from families who are unemployed. Their only chance of getting a job is if they have summer jobs. The administration cuts it. I guess they are saying fewer people need summer jobs. That is not true; more people need summer jobs. Kids who have no chance for a college education, kids who are raised in the ghettos, kids who are mostly raised in one-parent families, their only chance to get a job or to learn how to work rather than go into a life of crime is the kind of chance they get in summer jobs programs. But they cut it. They say, "Oh, we have some carryover money," as if that were some kind of miracle, as if they had carryover money because there was no need. The need is there.

Now we come to dislocated workers and more of the Alice-in-Wonderland stuff. Earlier this year, we discontinued the Federal extension of unemloyment compensation. Now the numbers are showing that unemployment is going down in some places. It is not going down; it is going up! They have fallen off the end of the cliff. They do not count them anymore. They are still not working, they still do not have a job, they are still hungry, they do not have anything anymore—not even unemployment compensation—nothing.

But the President says, don't worry about it. Don't worry about the fact that we will not have unemployment compensation anymore because we have a new program. We are going to get rid of that one, but we have this one over here. We call this one the Dislocated Workers Program.

It sounds great. I am for it, may I say, incidentally, because this is the one where we take the unemployed people over here and instead of keeping them on unemployment benefits, we take the money and retrain them and give them an opportunity for a new job, so they can go back to work.

They lose their job making automobiles, they lose their job in the steel plant, they lost their job in the shoe factory because we do not make shoes any more and the textile mills because we do not sell textiles. But, the administration says not to worry, because we will take the money and retrain them for a productive job.

I think that is great. I think it is wonderful. The only trouble is then they cut the program that is going to do it by 55 percent!

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. DIXON. Surely, Mr. President.

Mr. PROXMIRE. The Senator is tremendously persuasive on this issue and I know how deeply he feels. But is it not true that a person who loses his job under these circumstances can do what 600,000 people in our State of Wisconsin do—and we have a much smaller State than Illinois—we have 600,000 people who take vocational and technical education. A person unemployed can take that full time, get a student loan, paid by the Federal Government, get any kind of training he wants—and that training is superb. It is a very economical, efficient pro-

gram; much of it is paid for locally because they train in the localities to get the kind of people they want.

Why is that not a sufficient response? It works, and I say it works tremendously well in my State of Wisconsin. I think it probably would work well in Illinois. We have vocational and technical facilities everywhere in the State. Everyone can easily get to them and they can borrow the money from the Federal Government to get that training.

Mr. DIXON. Let me say to my friend from Wisconsin that I understand what a fair man he is and I appreciate what he has said. But may I first say that some of the programs he is citing have been cut. Student loan programs have been reduced. He might be interested to know that the Wisconsin State Legislature voted to urge Congress to fully fund this Dislocated Worker Program only last week. I mean this as no reflection on the Senator from Wisconsin or other fair-minded people here, but I mean to say that miracles do not occur.

We keep talking about how everything is going to be all right. But obviously, there are millions of dislocated workers out there and if we keep on cutting back on these programs, there are more people getting less money.

Mr. PROXMIRE. May I say to my good friend from Illinois that there is no question it is a problem when people get laid off. But the problem is not in training, which is what this does, I say, because they can get training. It will be paid for. They can borrow the money and not pay it back until they get the job. They can get the training. What we need is jobs. The way to get those jobs is to get the deficit under control and have a situation where we do not run a deficit of $200 billion so we do not have the high interest rates and the very, very adverse balance of trade which is so costly. The only way to get the deficit under control is to cut out spending. The only way to cut spending is to cut out this program as well as other programs.

Mr. DIXON. Mr. President, may I say to my distinguished friend that he is saying that in connection with all of these programs, every one. Cutbacks are occurring and unemployment continues to be a major problem in the country. I have before me the National Governors' Association survey. The percent of reductions in this program, where I am trying to make a restoration, in the Senator's State of Wisconsin is 44.71 percent; in my State, it is 65.67 percent. I could go on. In every major State in the Union, major cuts.

The only point I am trying to make is, yes, there are other programs out there but on every single, solitary one of these programs I have discussed here today, there have been cuts again this year. In every one of these programs, the need is greater, not less. In every one of these programs, the administration comes to us and says, we have carryover funds, don't worry, we can take care of the program.

Well, the point I would like to make, Mr. President, in conclusion is this: that miracles do not take place on these kinds of things. We have to address these problems in the Senate of the United States. I regret very much that once again—and as I say, this is the third time in less than a week we are discussing significant programs—hunger and homelessness, summer jobs, dislocated workers—where there is a real need out there and there are actual cuts in these significant programs.

I realize, regrettably, that there are not people here participating in this debate on the floor. I do not know how many are listening on their speakers in their offices. The vote will take place later this afternoon. It will be a dispassionate vote where we all come down here and cast our yeas or nays on this question and I do respect my colleagues, but I wonder how long we are going to continue to wear rose-colored glasses and suggest everything is all right in these programs and the solution will take place or that the problems will go away. These problems are not going to go away. These dislocated workers still have their concerns. We are simply not addressing their concerns in the Congress of the United States. I regret that very, very much.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, in anticipation of a unanimous consent agreement shortly to be propounded, I make the following statement:

Mr. President, the question has come before us time and time again as to whether U.S. taxpayers should be required to pay for the deliberate termination of innocent human life. In my judgment, the answer is a resounding no.

The House-passed version of the Labor-HHS appropriations bill, H.R. 3424, had the familiar Hyde amendment stating, "None of the funds contained in this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term." This has been the law since 1981.

The Senate Committee on Appropriations, however, struck this provision and put nothing in its place. If we were to adopt the committee amendment, we would open the floodgates to taxpayer funding of abortion on demand. I hope the Senate wil not agree to this committee amendment.

Mr. President, as much as many in Congress would prefer to ignore, minimize, or cover up the abortion issue, the fact is that it will not go away. Simply put, it is impossible to escape the injustice of killing through abortion over 1½ million unborn babies a year in this country.

As long as abortion remains legal and as long as Roe against Wade stands, there will be no escape for any of us from the horror of this unspeakable crime. Abortion will raise its ugly head at countless turns in countless roads for Americans and their representatives in government. Today the issue is funding abortion, tomorrow it will be something else.

The reason there is no escape is this: Those innocent babies being destroyed throughout the country keep making a silent but unmistakable claim on our conscience. Every time the abortion issue comes up, those unborn babies are asking us to remember them, to do something to help them, to stop the killing.

Mr. President, unborn children in the womb are members of the human family. They deserve the right to survive their mothers' womb and live the life that God has given them.

"We hold these truths to be self-evident," said Thomas Jefferson in the Declaration of Independence, "that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty, and the pursuit of Happiness."

Mr. President, the abortion issue presents squarely the question of whether we will secure the right to life for all human beings in this country, including those in the womb. Will we give these small but precious creatures their due, will we secure justice for them, will we protect them from the mortal violence of abortion?

I wish we were today voting directly on these questions. I wish we were voting on whether Roe against Wade will stand, or whether, or the other hand, the right to life for unborn human beings will once again be recognized in our law. Unfortunately, we are not. The intolerable injustice of legalized abortion will remain irrespective of the outcome of Senate consideration of this committee amendment.

But, Mr. President, we are today considering a part of the injustice—the important question of whether American taxpayers will be forced to fund the deliberate termination of innocent human life with their tax dollars.

I urge my colleagues to support retention of the Hyde amendment language adopted by the House.

Mr. President, as someone who has taken an active interest in this Hyde amendment over the years, I now offer a few comments on it.

The motivation for the Hyde amendment—on the part of Congressman HYDE, myself, and others—has been a recognition that abortion takes the life of a living unborn child with a God-given right to life. Accordingly, our purpose has been and is to make sure that Federal taxpayers are never forced to participate with their tax dollars in the crime of taking innocent human life.

In the early years of the Hyde amendment debates, we were not successful—or we were only partially successful—in persuading Congress to go along with our view. Since June 1981 and the enactment of Public Law 97-12, however, we have been successful, and Congress has adopted the Hyde amendment undiluted.

This undiluted Hyde amendment language is the same as the language in section 204 of the House-passed version of H.R. 3424 before us:

None of the funds contained in this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term.

Our specific intent in offering this language was, and is, to stop all taxpayer funding of abortion. At the same time, however, we have never sought to bar funding of medical procedures necessary to save the life of the mother where bonafide, physical life-threatening conditions occur in connection with pregnancy. That is why the exception clause has been included since 1981.

Given our general purpose and specific intent, the application of the Hyde amendment should always proceed on the basis that with every pregnancy there are two human lives involved, the mother and her unborn child (or fetus). ("Child" and "fetus" are taken as being synonymous.) Therefore, if exceptional cases occur where funding would be permitted, it is important that every reasonable effort be made to preserve not only the mother's life but also that of her unborn child. In other words, authorizing the funding of medical procedures to save the mother's life is not intended to sanction abandonment of the unborn child. In keeping with the principles embodied in the Hyde amendment, equal care should be extended to both mother and child.

Mr. President, it is by no means clear that the Hyde amendment has been applied by the Department of Health and Human Services since 1981 with these understandings. On the contrary, enforcement of the Hyde amendment appears to have been lax. Certain jurisdictions, for example, have beem reimbursed with Federal Medicaid funds for procedures to save the life of the mother at a rate far out of proportion to their populations.

Moreover, medical opinion available to me indicates that with advances in modern obstetrics, the cases of bona fide, physical life-threatening conditions for a mother in connection with her pregnancy are exceedingly rare. Thus, the raw figures alone for exceptions to the Hyde amendment restriction—1,033 in fiscal year 1982 and 528 in fiscal year 1983—appear to cast doubt on whether the Hyde amendment is being given full force and effect.

Mr. President, I hope that the Department of Health and Human Services will reevaluate its performance in this area, bear in mind that human lives are at stake, and rigorously enforce the Hyde restriction.

I thank the chair and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I wish to pose a couple of questions to my distinguished friend from Connecticut if he would be available, the first being, is it the opinion and understanding of the Senator from Connecticut of the Public Health Service Act that the Surgeon General of the United States has full authority to close any business or other establishment that, in the Surgeon General's judgment, facilitates the introduction, transmission, or spread of communicable diseases?

Mr. WEICKER. Mr. President, my colleague from North Carolina is correct. Section 361, paragraph 264 of the Public Health Service Act provides that authority.

Mr. HELMS. I thank the Senator.

If I may inquire further, is it the Senator's understanding that this authority would be applicable under the Surgeon General's discretion relative to bathhouses and acquired immune deficiency syndrome?

Mr. WEICKER. That is correct.

Mr. HELMS. I thank the Senator.

Mr. President, I hope the conference committee on this bill will keep the original Dornan language, despite the assurances from my colleague from Connecticut, but I will not now press for a vote on the Dornan language in the Senate.

Mr. President, so that we might all have a better understanding of the nature of the AIDS problem and legislation concerning it, I ask unanimous consent that an article from the September 8 Washington Post, by Dr. Richard Restak, entitled "Worry About Survival of Society First; Then AIDS Victims' Rights," and an editorial from the October 11 New York Post, entitled "Government Has No Business Keeping Bathhouses in Business," be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 8, 1985]

WORRY ABOUT SURVIVAL OF SOCIETY FIRST; THEN AIDS VICTIMS' RIGHTS

(By Richard Restak)

Paradoxically, the truly humanitarian position in the face of an AIDS plague is that we *not* identify with the victims and instead cast our lot with what in earlier times was dubbed the "common good."

More than 1 million Americans may have been infected with the AIDS virus. And the 13,000 Americans with confirmed cases of the disease, whose number is doubling every year, should be treated with the care and compassion due to anyone who is ill with a so-far incurable and invariably fatal disease. This shouldn't be confused, however, with a refusal to make painful, sometimes anguishing but nonetheless necessary distinctions in the interest of diminishing the likelihood that this awful disease will spread further.

Plagues are not new. They have been encountered in every age and among every nationality: syphillis among the Spanish, bubonic plague among the French, tuberculosis among the Eskimos, polio in America.

What is new are efforts by medically unsophisticated politicians and attorneys to dictate policy in regard to an illness that has the potential for wreaking a devastation such as has not been encountered on this planet in hundreds of years.

Also different is the response that, in some quarters, is being suggested: Accept the AIDS victim into our schools, place little or no restrictions on employment or housing. The AIDS victims' "rights" in these areas, we are told, should take precedence over the so-far incompletely determined potential for these victims to spread this dread illness.

But what some are describing as "discrimination" and "segregation" has a long and not in glorious history in medicine. Quarantines have been very effective in beating outbreaks of scarlet fever, smallpox and typhoid in this century. Indeed, by protecting the well from the ill we follow a long-established sensible and ultimately compassionate course. Throughout history true humanitarianism has traditionally involved the compassionate but firm segregation of those afflicted with communicable diseases from the well. By carrying out such a policy, diseases have been contained:

Only sentimentalists refuse to make any distinction between the victims of a scourge and those not presently afflicted. Scientists still are unsure why the AIDS virus targets the white blood cells that are the one indispensible element of the body's immune system. But the threat of AIDS demands from us all a discrimination based on our instinct for survival against a peril that, if not somehow controlled, can destroy this society. This is a discrimination that recognizes that caution is in order when knowledge is incomplete so that the public interest can be protected. This argument is not a counsel against good medical care or proper concern for AIDS victims.

Nor is it a suggestion that we curtail any "civil right" which doesn't potentially imperil the lives of others.

It is a suggestion that the humanitarian response to AIDS is exactly the opposite of a humanitarian response to sexism or racism: In the presence of considerable ignorance about the causes and effects of the syndrome, the benefit of the doubt should *not* be given to the victim of AIDS. This is not a civil rights issue, this is a medical issue. To take a position that the AIDS virus must be eradicated is not to make judgments on morals or lifestyles. It is to say that the AIDS virus has no "civil rights."

At the moment, social and legal solutions to the AIDS problem are proceeding at a pace disproportionate to the knowledge that experts presently possess concerning the illness.

For instance, on Aug. 14 the Los Angeles City Council unanimously approved an ordinance making it illegal to discriminate against AIDS patients in regard to jobs, housing and health care.

"We have an opportunity to set an example for the whole nation, to protect those people who suffer from AIDS against insidious discrimination," said the councilman who introduced the measure.

Councilman Ernani Bernardi said the ordinance was meant to educate the public to "prevent hysteria."

Preventing hysteria is good, but this ordinance was passed despite doctors' not having yet made up their minds on the degree of contact required for the disease to be spread from one person to another.

Consider, for example, the varied and patently contradictory measures put into effect across the country in response to the recent discovery that the AIDS virus can be isolated from a victim's tears.

At Boston University, when an AIDS patient is examined, "We are not using the applanation tonometer [a device that tests for glaucoma] because we don't feel we can adequately sterilze it" said the chairman of the department of ophthalmology.

The Massachusetts Eye and Ear Infirmary specialists plan to "review our technique." Translation: we're not sure yet what we're going to do.

In San Francisco, the chief of the eye service routinely sterilizes his optic instruments with merthiolate which "as far as I know" kills the AIDS virus.

At this point live AIDS virus has been isolated from blood, semen, serum, saliva, urine and now tears. If the virus exists in these fluids, the better part of wisdom dictates that we assume the possibility that it can also be transmitted by these routes.

It seems reasonable, therefore, that AIDS victims should not donate blood or blood products, should not contribute to semen banks, should not donate tissues or organs to organ banks, should not work as dental or medical technicians, and should probably not be employed as food handlers.

While the Los Angeles ordinance exempts blood banks and sperm banks, it's prepared to exert the full power of the law against nonconformists who exclude AIDS sufferers from employment in restaurants, hotels, barber shops and dental offices.

According to the new law, then a person afflicted with AIDS may, if he is properly trained, work as a dental hygienist. He may clean your teeth. He may even clean your teeth if he has a paper cut on one of his fingers of which he is barely aware. This despite the fact that the AIDS virus can be transmitted from bloodstream to bloodstream.

The battle lines that are presently forming in regard to the admission of AIDS victims into our nation's schools are similarly disturbing. "This is the test case for the nation," says attorney Charles Vaughn, who represents 13-year-old AIDS victim Ryan White, who has been refused admission to his local school in Kokomo, Ind. "What happens here will set the trends across the country." (In America there are about 180 children, not all of school age, diagnosed as having AIDS.)

To those such as Vaughn who see this issue in civil liberties terms, the plight of Ryan White represents simply another instance of prejudice and discrimination that should be opposed with all of the vigor that has marked the efforts against racism and sexism in the past. In support of their position, they point to the recent directive of the CDC that AIDS cases be evaluated on an individual basis in order to determine whether or not a child should be admitted to school.

Spokesmen from the CDC and other AIDS authorities including Dr. Arye Rubenstein, who treats the largest group of children with AIDS, may be correct in stating that there is "overwhelming evidence that AIDS is not a highly contagious disease." However, in a combined interview, they then gave the following responses to the interviewer's questions.

Q: *Suppose my child got into a fight with an AIDS victim and both began to bleed?*

A: That kind of fight with a possible exchange of body fluids would arose some concern about transmission of the virus.

Q: *What if my child is in a classroom with an AIDS victim who threw up or had diarrhea?*

A: Such events would be a matter of concern. In its guidelines, the CDC said that AIDS victims who cannot control body secretions should be kept out of ordinary classrooms.

Q: *Suppose a child with AIDS bit my child?*

A: Again, a bite would arouse concern.

Any grade-school teacher can attest that "body-fluid contamination" in the form of scratching, throwingup, diarrhea, biting and spitting are everyday fare within a normal schoolroom. That's why infectious diseases like the flu spread through schools like flash fires.

It is difficult to imagine how the CDC or anyone else is going to make individual determinations under such circumstances.

"I'd rather err on the side of caution," says New York Mayor Edward Koch about admitting AIDS-afflicted children to schools. In this sentiment, he echoes the concern of parents everywhere: What if future research shows that AIDS can be caught in other ways? What then? Isn't it more sensible to forego premature steps against "discrimination" and await scientific developments?

AIDS is not about civil rights, political power or "alternative lifestyles." It's a disease, a true plague that already, in the words of infectious disease expert Dr. John Seale, writing in the August issue of Britain's Journal of the Royal Society of Medicine, is capable of producing "a lethal pandemic throughout the crowded cities and villages of the Third World of a magnitude unparrelled in human history." Further, this disease is only partially understood, is presently untreatable, and is invariably fatal. For these reasons alone, caution would seem to be in order when it comes to exposing the public to those suffering from this illness.

But in addition, the incubation period is sufficiently lengthy to cast doubt on any proclamations no matter how seemingly authoritative in regard to the transmissibility of the illness: "The virus may be transmitted from an infected person many years before the onset of clinical manifestations," according to Dr. George D. Lundberg, editor-in-chief of the Journal of the American Medical Association. "Latency of many years may occur between transmission, infection and clinically manifest disease."

Indeed, truly authoritative statements regarding AIDS cannot presently be made. "The eventual mortality following infection with a lentivirus such as the AIDS virus cannot be ascertained by direct observation till those recently infected have been followed well into the 21st century," according to Dr Seale.

Given these grim realities, lawyers and legislators should ponder long and hard whether or not they wish, by means of legal maneuvering, to inadvertently create situations—child AIDS victims in the schools, adult AIDS victims working in medical, dental offices and other health care facilities—in which those afflected are in a position to pass this virus on to the general public.

Obviously, the most pressing issue at this point is to arrive at an understanding of all of the ways the AIDS virus spreads. But until we do that, political posturing, sloganeering, hollow reassurances and the inappropriate application of legal remedies to a medical problem can only make matters worse and potentially imperil the health of us all.

[From the New York Post, Oct. 11, 1985]

Government Has No Business Keeping Bathhouses in Business

Gov. Cuomo should pick up the report on New York's homosexual bathhouses from his AIDS advisory council with a pair of sterilized tongs and drop it into a burn-bag. It could spread the AIDS virous more readily than contaminated blood.

The council wants the bathhouses to stay open—provided that operators agree to certain "regulations" to reduce transmission of the AIDS virus.

It argues that the bathhouses and other such establishments—which exist almost solely to facilitate promiscuous sex—are the perfect vehicles to educate homosexuals to the dangers of AIDS.

This argument is absurd. If education is needed to stem an epidemic, it does not have to be accompanied by the promiscuity which is the epidemic's main cause. And such education is hardly necessary at this stage since everybody—including promiscuous gays—knows that the main way in which the disease is spread is gay promiscuous sex.

Indeed, those who cling to a promiscuous lifestyle in the face of this knowledge are the people least likely to pay regard to whatever "education" would be available in a bathhouse.

It should be plainly said that this is not true of most homosexuals. The Center for Disease Control in Atlanta reports a dramatic change in homosexual lifestyles.

A CDC study concludes that 81 percent of the homosexual or bisexual men surveyed now restrict themselves to one partner or are celibate—up from 69 percent only one year ago.

"By and large changes in sexual practices are the only things available in terms of reducing transmission in gay and bisexual

men," says CDC staff member Dr. Ken Powell.

That argument alone makes an unanswerable case for closing down institutions which serve to maintain and encourage the kind of sexual behavior that actually spreads the AIDS virus.

But not everybody's getting the message. A separate CDC survey indicates that 36 percent of those homosexuals interviewed reported having more than one sex partner during the previous 30 days.

And the CDC reports that the presence of the AIDS virus in a group of San Francisco homesexuals increased from 4.5 percent to a chilling 73.1 percent between 1978 and 1985.

Not everybody who has the virus develops AIDS of course. But everybody who develops AIDS dies!

This is a serious illness, and it cries out to be taken seriously. Cuomo's council does nothing of the sort.

It argues that high-risk sex will occur anyway. Why not keep an eye on it?

So it not only recommends that the baths remain open—it demands that lubricants, condoms and fresh towels be distributed free of charge.

To that complacent nonsense there are three clear objections. That first is practical. If centers where promiscuous sexual partners are known to be available are closed down, that will place an obstacle in the way of those seeking such sex. There will be fewer places to go.

The second is medical. Such precautions as the council suggests can make casual gay sex safer, but they cannot make it safe. The disease would continue to spread more rapidly than if the bathhouses had been closed.

And, thirdly, there is the moral objection that the state should not encourage behavior which is both plainly immoral and dangerous to the health of the community by facilitating it. Sexual promiscuity, whether heterosexual or homosexual, comes into that category.

But why stop there? If it is to be free condoms and lubricants for promiscuous gays, why not free booze for alcoholics? Or free drugs for addicts?

Because alcoholics, addicts and those who practice high-risk sex are indulging in highly irresponsible, self-destructive behavior. Government has no business assisting them.

Indeed, it has the duty to discourage such behavior. Those bathhouses must be closed. Today.

Mr. HELMS. I thank the Chair and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. DOLE. Mr. President, I understand we are now prepared to get a unanimous-consent agreement on certain amendments and also for the time to vote.

I wish to thank all my colleagues for their cooperation on both sides of the aisle, and I thank the distinguished minority leader, the managers of the bill, and other Senators who have had amendments and votes. It has taken some time. I think in the final analysis it will still save us some time.

Mr. President, I ask unanimous consent that during the remainder of the Senate's consideration of H.R. 3424, the Labor, HHS appropriations bill, the following amendments be the only amendments in order:

Bradley, add $100 million, Chapter I—Disadvantaged Education; Bumpers, $ for immunizations; Dixon, $122.5 million for dislocated worker assistance; Hawkins, $3 million for Runaway and Homeless Youth Act; Heinz, $2.5 million for excellence in education; Lautenberg, $500,000 earmarked for health professions training assistance; Proxmire, eliminate the Work Incentive Program (−$266,760,000).

Proxmire, eliminate the Job Corps (−$617,000,000); Proxmire, 5 percent cut in discretionary budget authority but limited to no more than 8 percent reduction in each activity; Byrd, $338,000 for administrative expenses for the Federal Merit Scholarship Program; Metzenbaum, $10.6 million for mine safety; Evans, refugee targeted assistance funding; Glenn, adding $200,000 for an Afro-American Heritage Commission and Museum; and Metzenbaum, adoption opportunities, $5 million.

I further ask unanimous-consent that no motions to recommit with instructions be in order.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas?

Mr. PROXMIRE. Mr. President, on that unanimous-consent request, the minority leader is very concerned that there be an addition here that no amendment to the amendment be in order, because of the concern that amendments might come in without an opportunity to debate them which would, of course, put us at a disadvantage.

Mr. DOLE. Is that the understanding?

Mr. WEICKER. Yes, that is the understanding.

Mr. PROXMIRE. The Senator says only amendments; is that correct? No amendment whatsoever then would be in order to the amendments; is that correct?

Mr. DOLE. That is correct.

Mr. WEICKER. In order to forestall any apprehension on the floor, as soon as the majority leader gets his request, I have an additional unanimous-consent request in order that we can allay the fears very frankly inherent in this request of the Senator from Wisconsin. So let us do this.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas?

Mr. DOLE and Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I am now advised——

Mr. HELMS. Mr. President, reserving the right to object, I am sorry. I was trying to get the Chair's attention.

Why not make this unanimous-consent proposal a part of the majority leader's?

Mr. WEICKER. That is all right.

Mr. President, I am advised that Senator GORTON may have an amendment to assure the indirect cost rate program of NIH.

Mr. WEICKER. Let us withdraw that.

Mr. DOLE. Let us withdraw that.

Mr. President, let me add then to the reqeust made so far the additional request. Mr. President, there have been certain disagreements about various matters in the pending bill. In order to go forward on the bill in an orderly manner, I now propose the following unanimous-consent request:

That, with respect to abortion, no amendments be in order, and that the committee amendment appearing on lines 24 and 25 page 41 and line 1 and 2 of page 42 be deemed disagreed to;

That, with respect to funding of title X of the Public Health Service Act, this bill add no such funding and that the bill be deemed amended by striking the roman numeral "X" on line 7 of page 18, and by reducing the figure $1,547,979,000 on line 11 of the same page by $142,500,000, which amendments I will send to the desk;

That no further amendments on title X of the Public Health Service Act be in order on this bill; and

That the committee amendments with respect to school busing, sections 304, 305, and 306, of the bill, as originally passed by the House, appearing on pages 64 and 65 of the pending bill, be deemed disagreed to by the Senate.

The PRESIDING OFFICER. The majority leader will withhold for a moment.

Is there objection? Without objection, it is so ordered.

Mr. DOLE. Mr. President, I further ask unanimous consent that any rollcall votes ordered between now and 3:30 p.m. today begin in the order in which the yeas and nays are ordered, excluding final passage.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOLE. Mr. President, I might add that the amendment by the distinguished Senator from Illinois, Senator DIXON, will be voted on at 3:30. In any event, that will be the first vote. I also indicate that we will see how many additional rollcall votes there are and then I will be talking with the manager of the bill later.

THE KEMP-HATCH AMENDMENT

Mr. HATCH. Mr. President, under an agreement with many of my Senate colleagues, I have agreed to withdraw

the Kemp-Hatch amendment. In exchange for this, it is my understanding that the Labor, HHS, and Education appropriation bill will contain no appropriation for the title X/family planning program. This is similar to the House-passed Labor, HHS, and Education bill and represents a reasonable compromise in temporarily resolving the complex and delicate issues surrounding the funding of the title X program.

This step today, however, does not conclude further debate concerning necessary changes in the title X law. I am still committed to seeing that the original intent of the title X law is preserved. In addition, other necessary changes should be made in the title X program. One issue is that no title X money should be used for abortion referral, counseling or services.

Abortion was never to be involved in title X. When the program was begun, its congressional framers went out of their way to insist that the program would have nothing to do with abortion. That is no title X moneys would be used for abortion. But beyond that, the whole program was to be abortion-free. As section 1008 of the original legislation, in 1970, put it, "None of the funds appropriated under this title shall be used in programs where abortion is a method of family planning." When Congressman JOHN DINGELL authored this provision he stated, "This provision would not merely prohibit the use of such funds for the performance of abortion but would prohibit the support of any program in which abortion counseling or abortion referral services are offered."

The wall of separation between abortion and Federal family planning activities has been more than breached. It has been razed. In fact, current HHS guidelines, drawn up during the Carter administration and put into effect early in the present administration, actually require applicants for title X funds to refer for abortions. That outrageous distortion of the intent of Congress should come as no surprise, for the current guidelines were drawn up by an HHS advisory committee under the control of those title X grantees who are in the abortion business. And significantly, the guidelines were not issued as regulations, which would have required the Department to secure clearance from OMB and to subject them to public comment.

We have come that far away from the family planning program of 1970: The Department of HHS requires what was originally forbidden. In some cases, title X grantees are co-sited with abortion clinics, so that only an expert bookkeeper could tell the difference between the two operations. Title X grantees tell clients how easy it is to get abortions, where they can get them, and who will do them. They can make all the arrangements. They do everything with the public's money except perform the actual abortion procedure. They make a mockery of our prohibition against abortion in Federal family planning.

There is only one way of ensuring that abortion does not intrude upon title X, only one way to rebuild the shattered wall of separation between that Family Planning Program and the abortion industry. That is to prohibit the use of title X funds, not only for the abortion procedure directly, but also indirectly. Under my withdrawn amendment, no title X money could be used for abortion referral or counseling except for those extremely rare instances in which the mother's life would be endangered by carrying the baby to term. Furthermore, no title X funds could be awarded, by grant or contract, to any organization involved in abortion.

Who could possibly object to that? Many current title X grantees, of course, have reacted to this modest proposal like vampires to the sunrise. My colleagues may have seen the rather extreme literature being circulated by some riders on the title X gravy train. It calls for "immediate, forceful efforts." It urges "A massive onslaught of calls and letters" against the Congress. But that is what we can expect whenever we come between an entrenched network of Federal grantees and their continued funding.

Let's look at some of the outlandish propaganda that is being spread against my withdrawn amendment. The basic accusation—the theme of this year's title X coverup—is that the Kemp/Hatch amendment will destroy family planning in the United States. Entirely apart from the fact that almost all family planning in this country is privately funded, that's ridiculous. It does not reduce Federal funding for title X by $1. Indeed, it in no way restricts any legitimate family planning activity. On the contrary, my amendment is probably the best preservative of title X.

It is alleged, however, that title X grantees cannot live with this amendment; they will close their doors. Millions of Americans will be without family planning services. That assertion is simply a myth. Under the amendment, each current title X grantee can decide for itself which is more important: Continued eligibility for title X funds or involvement in the abortion business. A few title X grantees may be so fanatically attached to abortion that they will decline future Federal grants. But are we really to believe that family planning providers would rather shutdown than stop doing abortions, stop referring for them, or stop counseling for them? Are they so little concerned about the need for family planning services that they would reject title X, en masse, in order to participate in abortion? If so, they reveal that abortion is much more important to them than is the provision of family planning to those who need it.

Another allegation is that this amendment would put hospitals out of business. In a few cases, hospitals are title X grantees; and many of those hospitals perform abortions. In that situation, my amendment treats the hospital as any other participant in title X. Unless it withdrew from the abortion business, it would not be eligible for continued participation in that particular program. But nothing else would be affected, in particular not Medicare, Medicaid, and the other Federal programs in which the hospital participates.

Yet another red herring to cover up abortion abuses in title X is the charge that my amendment would interfere with the provision of needed medical care. That is as offensive as it is outlandish. In dealing with a pregnant client, a title X grantee can refer a "problem pregnancy" to health care providers—a hospital emergency room, in extreme cases—without sending a poor and vulnerable woman to an abortionist. Title X grantees were able to provide complete and completely ethical services when the program began, in States where abortion was illegal. They can do so again, knowing that the Congress of the United States is making clear its will in this matter to the Federal courts.

That brings me to a final canard against my withdrawn amendment. In the opinion of some title X grantees, it is unconstitutional. When did we hear that before? When the Congress prohibited Federal funding of abortion under Medicaid. When the Congress prohibited Peace Corps funding of abortion. When the Congress prohibited abortion funding by the Defense Department. But let us be fair. Some attempts by State legislatures to restrict funding of abortion providers have indeed been struck down by lower Federal courts. That is not surprising to anyone who remembers how a single Federal judge in New York City arrogantly commanded HEW to ignore the Hyde amendment in the 1970's. Judge Dooling was eventually put in his place by the Supreme Court, of course, and I am confident that my amendment will receive the same judicial treatment as given to an amendment by the legislature of the State of Arizona, which has been upheld in principle by a panel of the ninth circuit.

No, I do not believe this amendment would be considered unconstitutional. It is merely inconvenient. It highlights the Federal Government's continuing support for the abortion industry and the unseeming involvement of a Federal program with abortion providers.

There are those who would not make abortion illegal, but who do not want our Government to support it in any way.

If a Member of Congress wanted to destroy family planning programs, if he wanted to erode public support for those programs, if he wanted to taint them beyond hope of reform, he would be well advised to leave things as they are: To let the abortion connection fester within title X until the entire program is cut off in revulsion. It takes no great powers of foresight to predict that outcome if we do nothing to curb the abortion abuses which are now rampant within it. If, in a few years, the rising tide now surging against the abortion industry sweeps away title X, too, the responsibility for that will rest with those who resisted necessary changes in the program, changes that will not diminish its effectiveness but will restore its original purpose.

Whatever happens to the legal status of abortion in this country, and whatever side of that issue we happen to be on, Federal family planning should be a matter apart. It should be insulated from the abortion controversy. Its funding should be immunized against involvement with abortion.

In addition other proposed changes should be adopted. Some of my concerns can be elaborated as follows:

Title X of the Public Health Service Act was intended to provide family planning services for low-income families. Indeed, that statement sounds like a tautology: What else would we expect a family planning program to do other than to help families plan their growth? Today's title X program answers that question in a most disturbing way. A large portion of its resources is directed, not to families, but to teenagers. In this regard, it is not a family planning program; it is a "safe sex" program for unmarried adolescents. And whatever we may think of the wisdom of that venture, the worst of it is that it does not work, as demonstrated by the realities of venereal disease, illegitimacy, and abortion among the young.

Today's title X program diverts resources away from low-income couples to service affluent individuals. The ingenious rule-writers at the Department of Health and Human Services a few years ago decided upon a novel way of determining income for purposes of title X eligibility. Indeed, their bizarre low-income standard in title X is probably a unique anomaly among Federal programs. For while we have been tightening up on the abuse of public assistance by those who are not truly needy, the title X bureaucrats made millions of people who are not poor income-eligible for what was supposed to be a poor people's program. They did this by determining a minor's income without regard to parental income. So unless the teenager has a large independent income, apart from his or her household resources, that youngster is "poor" for purposes of title X. Remember, that ingenious dodge, that artful loophole, that flagrant abuse of an in-kind welfare program was invented, not by the affluent individuals who take advantage of it, but by officials of their government.

Its practical effect is that the sons and daughters of doctors, lawyers, bankers, Senators, millionaires, and the middle class are all eligible, as poor people, for title X services. That means free contraceptives, courtesy of the working public. It is one of the strangest subsidies in contemporary government. This is an issue we need to correct.

In addition last summer, a mother in Erie, PA, was horrified to discover birth control pills in the purse of her 12-year-old daughter. The little girl explained that she got the pills free at a family planning clinic because "everybody else had them." Now, we all know that birth control pills are prescriptive contraceptives. That is, a fully informed adult cannot purchase them without a prescription from a physician. And the reason is that they are very powerful drugs, which can have serious side effects, not only in the short term but sometimes many years after the medication has been stopped. Adult women take these pills only under a doctor's supervision and with counseling about their possible harmful effects, so that dangerous conditions can be reported immediately and properly treated.

The 12-year-old in Erie might not have been able to tell her pills from a bag of candy. Her outraged mother demanded an investigation by the Erie County district attorney, whose case eventually had to be dropped. Why? Because the D.A.'s office, according to the Pittsburgh Post-Gazette of August 30, "discovered that the Family Planning Services of Erie County had acted within bounds of Federal guidelines when it gave the girl contraceptives without telling her parents. The mother is still simmering. "How can they do this to my little girl?" said the woman, who asked not to be named. "She can't go to an X-rated movie without my permission. She can't buy a pack of cigarettes. How can she get birth control?"

Let me answer the mother's question. Her little girl can get free prescriptive contraceptives, paid for by the unwitting taxpayers, because the title X program allows it. It is a multimillion dollar assault on family rights and parental authority. It is a travesty against family rights and parental authority. It is a travesty of what family planning is really about. The little girl in Erie is only one of millions of youngsters who have been drawn into the web of title X. If a stranger approached her in the schoolyard and gave her contraceptives, along with instructions for their use, he could be arrested for child molesting. But the Congress every year appropriates about $150 million for title X grantees who do exactly the same thing. They do it without our permission and contrary to the intentions of those who established title X. It is long past time for the Congress to exercise its responsibility in this matter, and I hope we will have occasion to do so in the near future.

BUSING AMENDMENT

Mr. President, I am particularly pleased that this agreement restores language prohibiting Federal funding of forced busing. This prohibition on Federal funding of the controversial and ineffective busing remedy has been included in appropriations bills for years. The failures of forced busing have not diminished. Accordingly, our denial of Federal assistance ought to continue.

Ideally the Senate would consider the merits of removing from the courts the option of using forced busing as a remedy in desegregation suits. Other, more effective, remedies are available when warranted to stamp out de jure segregation or to vindicate the rights of actual victims of discrimination.

The problem is that busing is itself a form of discrimination. It classifies students on the basis of race and burdens them with traveling long distances to attend public schools. The Federal Government has no business supporting this discriminatory practice with Federal taxpayer funds.

Educational excellence, not busing to achieve some notion of racial balance, is what our public schools need. In fact, busing—a form of governmental discrimination based on race—interferes often with excellence in education.

This situation is accurately reflected by Mr. David Armor, who commented before the Constitution Subcommittee in May of 1981:

> I think we have to get rid of remedies that in fact are not remedies at all and that simply make the problem worse.

I think the time is right for use to end this form of discrimination that masquerades as a remedy to enhance educational opportunities.

Assigning students to public schools on the basis of race, was supposed to be solved in 1954 by the momentous Supreme Court decision of *Brown* v. *Board of Education*, 347 U.S. 483. Again the Senate thought it had prohibited the consideration of race when assigning students to public schools in 1964 when it enacted the Civils Rights Act. Therefore, when we are still striving to convince judicial policymakers decades later that students should be

allowed to attend schools without regard for race or color, I can understand why the task would become frustrating. Nonetheless the basic constitutional principle that race should not determine what schools our students may attend must not be abridged.

This principle was clearly enunciated by the venerable Justice John Marshall Harlan in his dissent to the Plessy against Ferguson case. Plessy upheld a Louisiana statute requiring "equal but separate accommodations for the white and colored races" in passenger trains, 163 U.S. 540, 551 (1869). Justice Harlan dissented with the thought that "our Constitution is color-blind," (Id. at 559). These few words captured the essence of our 14th amendment prohibition against deprivation of life, liberty, or property without due process of law and against denial of equal protection of laws.

Harlan's dissent laid the foundation for the Court's ruling in the Brown case 58 years later. In Brown the Court found that—

The Constitution of the United States, in its present form, forbids, so far as civil and political rights are concerned, discrimination by the General Government or by the States against any citizen because of his race, 347 U.S. at 499.

In other words, race and color were not to play any role whatsoever in decisions relative to school district boundaries and school attendance. Race was not to be used in assessing the rights of "any citizen"; certainly racial assessments were not to benefit one group at the expense of another.

It is ironic that the Brown Court mentioned one of the same phenomenons that social scientists are today citing in their condemnation of busing: the stigma of inferiority associated with the victims of racial separation. The Brown Court explained the significance of this stigma when it said:

To separate students from others of similar age and qualifications solely because of their race generates a feeling of inferiority as to their status in the community that may affect their hearts and minds in a way unlikely ever to be undone.

Unfortunately, our current busing policy is actually nurturing racial discrimination and its stigma of inferiority. This was made clear to me by the testimony of the witnesses before the Constitution Subcommittee's hearings on school busing.

Brown was not the only case that established the principle that the 14th amendment prohibited States from taking cognizance of race. The *Loving* case, 388 U.S. 1 (1967), for instance, struck down a Virginia statute prohibiting interracial marriage. The Court clearly stated that classifying marriage rights on the basis of race was "unsupportable." The *Anderson* case, 375 U.S. 399 (1964), declared unconstitutional any racial designation of candidates on an election ballot. In *Evans*, 396 U.S. 435 (1970), the Court clarified that provisions in a will leaving property to a city for a public park which the will expressly stipulated could never by used by blacks could not be honored. Each of these cases understood and carried out the intent of the case that the 14th amendment forbid consideration of racial classifications of any kind in administering societal programs.

Congress has attempted to statutorily implement the Brown decision. The most notable attempt was, of course, the Civil Rights Act of 1964. Title IV of the act contains several provisions designated to make national education policy colorblind. Section 401(b) defined "desegregation" as:

The assignment of students to public schools and within such school without regard to their race, color, religion, or national origin, but "desegregation" shall not mean the assignment of students to public schools in order to overcome racial balance.

The second part of this section was authored by Congressman Cramer of Florida. He explained clearly that the provision was necessary to prevent de facto segregation, or chance segregation caused by housing patterns and adherence to the neighborhood school concept, from becoming the object of congressionally approved desegregation schemes. Cramer, and the 88th Congress, equated the terms de facto segregation and racial imbalance (110 CONGRESSIONAL RECORD 1508).

The Senate version of the Civil Rights Act added two more amendments to insure that congressional policy would not be misconstrued to countenance any assignment of students to schools on the basis of race (section 407 of the act). The section authorizing the Attorney General to bring school desegregation suits, states that—

nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another in order to achieve such racial balance. 42 U.S.C 2000c-6(a).

Moreover section 410 clarified that—

nothing in this title shall prohibit classification and assignment for reasons other than race, color, religion, or national origin. 42 U.S.C. 2000c-9.

Both Senate amendments were drafted and approved to prevent defacto segregation, as opposed to dejure or legally enforced segregation, from becoming a justification for the extreme remedy of busing, or assigning students to schools on the basis of race.

Senator Hubert Humphrey of Minnesota, floor manager for the bill in the Senate, explained that these amendments were intended to make doubly clear that title IV did not authorize the Attorney General to correct racial imbalance and in general—to soothe fears that title V might be read to empower the Federal Government to order the busing of children around a city in order to achieve a certain racial balance or mix in schools. 110 Cong. Rec. 12714.

Senator Humphrey stated that he was relying on the recent decision in *Bell* v. *School of Gary*, 324 F. 2nd, 209 (1963), in stating that Federal officials were not required to correct segregation unless it had been enforced by past laws.

This provision was included in the Civil Rights Act to expressly note that racial discrimination was not to be identified soley through use of numerical or statistical evidence use of numerical or statistical evidence rather than through some demonstration of wrongful intent by some individual or group of individuals. Unfortunately, the courts have disregarded this express language and instead relied upon evidence or racial imbalances within schools as proof of unlawful discrimination. Rather than placing the burden upon those alleging discrimination to demonstrate some identifiable act of discrimination, the courts have instead allowed discrimination to be adduced by evidence that some ideal racial proportion has not been achieved.

Harmful intent to discriminate was replaced with statistics that showed, for whatever reason, that more of one race than another were in a particular school or classroom. The defendant, therefore, not only had to demonstrate an absence of a corrupt state of mind, but had to show an affirmative commitment to a racially balanced institution. Treating individuals without regard to race was no longer enough, the defendant had to consider race at least to the degree that the court found proper. The problem, of course, is that no defendant could be sure in advance of adjudication if his notion of racial balance would be the same as the court's. Meantime, students had to be classed again according to race.

This in not the intent of the Constitution or Congress. Instead of considering each child in a school district only as a student, Federal courts classify students according to race. When the numerical ratio between the classes is unsatisfactory according to some subjective notion of racial balance, some black students or some white students are legally required to be hauled to a distant school simply because they are black or white. This is precisely the injustice that Brown and the Civil Rights Act intended to terminate. Prior to Brown, some students were legally required to be hauled to a distant school simply because of their race. It is a tragedy that we are still fighting to secure civil rights for our public school students.

Some commentators on this problem will undoubtedly note that the situation today is different than it was

before Brown, that assigning students to schools on the basis of race is necessary to eradicate the vestiges of past legal segregation. To that my response is clear: we are not going to put an end to racial discrimination by perpetuating distinctions based on race. School busing is nothing more than assigning students to schools on the basis of race. I repeat, Mr. President, we will never end discrimination by discriminating.

The hearings in the Constitution Subcommittee have substantiated the ill effects of a discriminatory school-busing policy. The subcommittee's hearings have demonstrated that past unconstitutional segregation—racial segregation enforced by law—is not a significant cause of existing racial imbalances in public schools.

Whatever the cause of racial imbalances in public school, the assignment of students to public schools on the basis of race—busing—results only in more segregation by inducing large numbers of families to migrate from the school systems being subjected to busing mandates or to seek alternatives to public school education. For example, according to Constitution Subcommittee witness David Armor, between 1976 and 1980 Los Angeles lost nearly one-half of its students through a combination of demographic decline and racial "flight" from Federal "desegregation" decrees. Busing not only is not the solution, it actually aggravates the problem.

Since assignment of students to public schools on the basis of race cannot be justified as a means of preventing or undoing racial discrimination by school authorities, such assignment is itself an unjustifiable practice of racial discrimination in violation of the 14th amendment.

Mr. President, one of my colleagues, Senator WEICKER, in particular, has asked me if we in the Labor and Human Resources Committee will be marking up the reauthorization of title X before the end of this year. I fully intent to see that that opportunity does occur in the committee and that we will have that opportunity of debating these matters at greater length at that particular time.

Mr. WEICKER. Mr. President, I thank my colleague from Utah for his comments. I believe especially important to note here, as a matter of procedure, is that hearings will be held on the reauthorization of title X within his committee. That is the place to debate this matter.

My colleague from Utah has indicated his feelings as to what these moneys can or should be used for. I disagree with him. But the place to resolve that is within the Labor and Human Resources Committee. The hearings are assured and I only suggest that those that have different points of view on the subject matter prepare themselves for the hearings. It will be debated there and whatever is then needed in conformity with the authorizing legislation will be placed on the continuing resolution.

So let us make no mistake about it. It was just felt, properly so, I believe, by the chairman of the authorizing committee that the appropriations bill was not the place of debate and final resolution of these matters, but later within his committee.

Mr. HATCH. If the Senator will yield, I agree with the Senator about our concern to keep it in the committee. The debate on the reauthorization of the Adolescent Family Life Act will be taking place at the same time, because I think they go hand in hand. Hopefully, we can resolve some of the complex arguments over this matter by considering both bills, as we have over the last number of years, and doing the best job we can with them.

Mr. WEICKER. Again, the chairman of the Labor and Human Resources Committee is correct. The Adolescent Family Life Program was unfunded in the bill and faced the prospect of potential funding on the floor, but that action has not been taken, so the matter can be resolved in the authorizing committee. Again, when it is resolved in the authorizing committee, then the funding, or lack thereof, will occur on the continuing resolution.

So I wish to make it very clear that the Senate action today does not, in effect, relate to the merits of either of these programs. That is to be decided within the committee of the Senator from Utah. And when that issue is resolved, the funding will follow, which is the normal course of events.

Mr. CRANSTON. Mr. President, I think it is extremely unfortunate that the situation has arisen which has resulted in the deletion of the provisions of the bill relating to the title X program.

I totally concur with the Senator from Connecticut [Mr. WEICKER], that the appropriate place for consideration of the amendments proposed by the Senator from Utah [Mr. HATCH] and others is when the authorizing committee, the Labor and Human Resources Committee, meets to consider the legislation reauthorizing the title X program.

Mr. President, on April 3, legislation, S. 881 of which I was an original cosponsor, was introduced and referred to the Labor and Human Resources Committee. S. 881 would extend the authorizations of appropriations for the title X program for an additional 3 years. This bill has strong bipartisan support. It has now been cosponsored by 33 Senators from both sides of the aisle and by individuals with widely varying perspectives on the issue of abortion. Title X has always enjoyed broad bipartisan support because it does help prevent unintended pregnancies, many of which result in abortions.

However, no action or hearings have been scheduled on this legislation by the chairman of the Labor and Human Resources Committee. I was pleased therefore to hear that the distinguished chairman of the Labor and Human Resources Committee has agreed to schedule hearings on reauthorization of the title X program as part of these negotiations. I hope that he will permit the title X legislation to be scheduled for a committee markup following such hearings. Since a majority of the members of the committee are cosponsors of S. 881, I am confident that the reauthorization legislation would easily be approved by the committee.

I am also confident that the supporters of the title X program would also oppose the kind of amendments that the Senator from Utah and others have indicated they would have proposed to the appropriations bill to alter the title X program.

Mr. President, I think it is vitally important that we clearly understand what the type of amendment described by the Senator from Utah would do.

It would not reduce the number of abortions in this country. Quite the contrary.

Title X funds cannot now be used for abortions. The GAO was requested in 1981 to investigate whether title X funds were being used for abortions and they concluded that there was no evidence that title X funds had been used for abortions or to advice clients to have abortions.

That prohibition has been part of the title X legislation since its enactment 15 years ago.

Not only are title X funds not used for abortions, but under HHS guidelines title X funds cannot be used to advocate or encourage abortions. That restriction, however, does not, has never been construed to, prevent title X grantees from providing patients with information on all of the options for dealing with an unintended pregnancy, including prenatal care, adoption, and abortion. Indeed, standard medical ethics require making information on all of the legal options available to women facing unintended pregnancies.

Title X grantees are not permitted to advocate or encourage women to have abortions. They do provice information about that alternative for women indicating a desire for that information. The GAO investigation found no evidence to suggest that title X grantees were encouraging women to have abortions.

If any violation of the policy regarding not advocating abortion to patients is found, there is ample authority under the existing HHS guidelines to

correct that situation and, if appropriate, to terminate such a grantee from the program.

But this type of amendment seeks to go a giant step beyond and forbid title X grantees from providing basic information on the legal options available to a women facing an unintended pregnancy. A grantee could not, for example, even advise a patient that State law requires that decisions about abortion must be made before the pregnancy had advanced past a particular time or that after a certain point in a pregnancy, the abortion would have to take place in a hospital rather than a clinic setting.

Mr. President, I have been advised that no responsible medical practitioner would be able to accept these kinds of restrictions on the advice that could be provided to a patient.

The changes proposed by the Senator from Utah would not merely prohibit title X program funds from being used in this manner but they would disbar from the program any grantee who provided such information with nontitle X funds. They would also disbar from the title X program any grantee which provided abortion services with other, nontitle X funds.

Mr. President, the title X prohibition regarding abortions applies only to the title X program itself. The 1970 conference report accompanying the original legislation made it clear that the prohibition did not apply to activities carried out by grantees with other sources of funds.

It is a simple reality that many Family Planning Programs are operated by entities, such as hospitals or health clinics, that provide abortion services with other sources of funds. In my own State, at least five of the title X grantees are hospitals which provide abortions for a variety of patients.

The attempts to deny title X funds to any entity which assists women in exercising a constitutional right raises, in my view, very serious policy and constitutional questions. The amendment is clearly designed to apply coercion and pressure upon these facilities to deny women access to safe medical procedures which they are legally entitled to receive.

Title X should not be manipulated or used as a political tool to achieve such a purpose. The result, again, would not be to eliminate abortions, but to make them less safe and occur later.

Mr. President, there are other aspects of the amendments proposed by the Senator from Utah and others which will certainly be thoroughly examined when the Labor and Human Resources Committee is permitted to meet to consider them, along with reauthorization of appropriations for the title X program itself.

I am confident that the committee and the Senate will reject these types of amendments which are aimed at fundamentally weakening the title X program. Making family planning services more difficult to obtain could lead only to more unintended pregnancies and more abortions—a tragic result from every perspective. Over the past 15 years, title X has been tremendously effective. Title X clinics have been estimated to have helped avert some 800,000 unintended pregnancies each year—more than half of which, it is estimated, could well have ended in abortion. The program should be extended and refunded without these kinds of gutting amendments.

AMENDMENT NO. 823

Mr. WEICKER. Mr. President, in that regard, before the Senator from Utah leaves, just to assure him that this will be taken care of, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Connecticut [Mr. WEICKER] proposes an amendment numbered 823.

On page 18, line 7, strike out "X,".

On page 18, line 11, strike out "$1,550,979,000 and insert in lieu thereof "$1,408,479,000."

Mr. WEICKER. Mr. President, this implements the second portion of the majority leader's request. I ask for passage of the amendment.

The PRESIDING OFFICER. Is there further discussion? If not, the question is on agreeing to the amendment of the Senator from Connecticut [Mr. WEICKER].

The amendment (No. 823) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 824

(Purpose: To appropriate $2,500,000 for the Excellence in Education Program)

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania [Mr. HEINZ], for himself and Mr. BRADLEY, proposes an amendment numbered 824.

On page 50, after line 25, add the following:

For carrying out the provisions of title VI of the Education for Economic Security Act, $2,500,000 to remain available until expended.

Mr. HEINZ. Mr. President, I would like to commend my friends, the distinguished Senator from Connecticut [Mr. WEICKER] and the distinguished Senator from Wisconsin [Mr. PROXMIRE] for their tireless efforts to fashion a fair appropriation under tremendous constraints. The concern I present this afternoon is a small one which I hope we can bring to a satisfactory conclusion.

Two years ago, the National Commission on Excellence in Education presented its report, "A Nation at Risk." It warned of a rising tide of mediocrity in our schools. Later that same year, my colleagues, Senator CHAFEE, Senator BRADLEY, Senator MOYNIHAN, Senator ANDREWS, and Senator TSONGAS joined with me in supporting the Excellence in Education Act, which passed the Senate at the close of the session. Congress appropriated $5 million for its purposes, and the House version of this bill contains a similar amount. The program is one of the few responses this Congress has which targets the serious problems faced in our schools. In particular is the need for increased reliance on basic academic skills, which is the prime focus of the measure.

My amendment would simply allow a $2½ million appropriation for the Excellence in Education Program. This level is half that of fiscal year 1985, and also half the amount appropriated by the House. The Senate has already passed a 3-year authorization for excellence in education, demonstrating the continued support of this body for the measure.

One should not infer that the program only needs half the House level. Given the gravity of the problems facing elementary and secondary education in this country, I would say that $15 million is not quite enough; $2.5 million is simply a minimal level of funding which would allow the program to survive through fiscal year 1986. The Department of Education has indicated that it will distribute the fiscal year 1985 moneys at the end of this month. Schools which are awarded excellence grants will use them to initiate modernization of curriculums and teacher incentives when school reopens in January. Unless my amendment is adopted, there will be no funding available for these initiatives in the next school year, and we will never really know if this selective, targeted Federal program worked or not. Only by accepting my amendment will we give these demonstration grants enough time—1 full year—to prove themselves.

Some in the administration have called Excellence in Education duplicative. The program has not even begun yet—underfunded as it is—and it is already attacked as duplicative. Mr. President, let me say that there is

absolutely no other program which grants both flexibility to local priorities, and yet provides the Federal Government a guarantee that a national problem will receive the national attention it deserves. Excellence in Education grants are competitive—they may only be given to schools which demonstrate the purpose and ability to use the funds wisely. They are limited to areas which the report, "A Nation at Risk," identified as deficiencies in our schools. These are: Modernizing school curricula through emphasizing basic academic skills and competence in basic functional skills; providing incentives to teachers and teams of teachers for outstanding performance; and for experiments in a changed school calendar, and special school-community and school to business relationships.

We have very few programs of this sort available. The math-science grants of the Education for Economic Security Act are laudable, but I note that the House has eliminated such funding in their appropriation, and the Senate has cut them back from the 1985 level. We have a new LEAD Program, which I hope will be of great assistance, along with the Talented Teacher Program which my colleague, Mr. SPECTER, has fought diligently for. None of these programs specifically target the activities of the Excellence in Education Act, and all are funded at very low levels. Thus, it is imperative that the Excellence in Education Act continue, even if it must be at lower level of funding.

The chapter 2 block grants to State and local education agencies are not duplicative of Excellence in Education. These moneys can be used for a broad range of purposes including metric education, with no assurance that Federal priorities will be met. Only Excellence in Education can provide such assurance, and for that reason, it is a vital and important part of our efforts.

I recognize the difficulties my colleagues faced in committee and in subcommittee with the diverse needs of our Nation. They did a fine job of choosing between a multitude of priorities. For that reason, I do not seek a large appropriation for this measure—only a bare minimum to allow it a little more time.

I will not go on at length at this point, but simply emphasize that this program is in the process of being implemented. During its first year, it has stimulated hundreds of thousands of proposals from public elementary and secondary schools throughout the United States. It has gotten teachers, administrators, students, and also parents involved in thinking about how to make their school systems better, make their classes and curricula taught better, and make the time spent in the classrooms, as well as the time spent outside more effectively used. It is an enormously stimulative program which I would like my colleagues to continue to fund.

Mr. President, I have discussed this amendment with the distinguished chairman of the subcommittee. It is my understanding that in view of the fact this has been funded previously the chairman of the subcommittee does not object to the amendment.

Mr. WEICKER. Mr. President, the amendment is acceptable on this side of the aisle.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Pennsylvania [Mr. HEINZ].

The amendment (No. 824) was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HEINZ. Mr. President, I want to thank my good friend and colleague, the Senator from Connecticut, and the ranking member, the distinguished Senator from Wisconsin [Mr. PROXMIRE].

Thank you, Mr. President.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO 825

(Purpose. To add $500,000 to the Health Resources and Services account to provide assistance to two-year schools of medicine and osteopathy)

Mr. PROXMIRE. Mr. President, I send an amendment to the desk on behalf of Senator LAUTENBERG and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wisconsin [Mr. PROXMIRE], for Mr. LAUTENBERG, proposes an amendment numbered 825.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 18, line 11, strike out $1,408,479,000 and insert in lieu thereof "$1,408,979,000 of which $500,000 shall be available for assistance to two-year schools of medicine or osteopathy under section 788(a) of the Public Health Service Act;".

Mr. PROXMIRE. Mr. President, I am offering this amendment on behalf of my good friend, Senator LAUTENBERG, who is at a meeting elsewhere.

The PRESIDING OFFICER. The amendment is not in order except by unanimous consent. It amends a section of the bill which has already been amended.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I understand there is a technical problem with the amendment because this section of the bill has already been amended. But I understand there is no objection among Senators to the amendment. I ask unanimous consent that the amendment be in order notwithstanding that technical problem, and also that I be entitled to offer the amendment on behalf of Senator LAUTENBERG.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, the amendment adds $500,000 to the Health Resources and Services Administration and will provide assistance for 2-year schools of medicine and osteopathy.

The amendment has been cleared with the distinguished chairman of the subcommittee.

Mr. President, I understand my good friend from New Jersey, Senator BRADLEY, wishes to be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I hope the Senate will adopt the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 825) was agreed to.

Mr. PROXMIRE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PROXMIRE. Mr. President, I suggest the absense of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. EVANS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DENTON). Without objection, it is so ordered.

AMENDMENT NO. 826

(Purpose: To make available funds to carry out refugee targeted assistance which were unobligated at the close of fiscal year 1985)

Mr. EVANS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Washington [Mr. EVANS], for himself and Mr. GORTON, proposes an amendment numbered 826.

Mr. EVANS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 34, after line 17, insert the following:

REFUGEE AND ENTRANT ASSISTANCE

Notwithstanding any other provision of law, $11,526,000 of funds appropriated for fiscal year 1985 to carry out refugee targeted assistance under section 412 of the Immigration and Nationality Act, and which remained unobligated at the close of the fiscal year 1985 as a result of the failure of the Office of Management and Budget to apportion such funds, shall remain available until September 30, 1986, and shall be obligated by January 1, 1986.

Mr. EVANS. Mr. President, I offer this amendment on behalf of myself and the distinguished Senator from Washington [Mr. GORTON] to clarify congressional intent with respect to Federal refugee and entrant assistance. For the past 2 years, we have worked with the Senator from Connecticut [Mr. WEICKER] who is chairman of the Senate Appropriations Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, to resolve the continuing controversy surrounding Federal refugee assistance.

The Office of Refugee Resettlement [ORR], in fiscal year 1984, did not make available to States, the full amount Congress appropriated for targeted assistance. In that fiscal year, ORR reduced from $72 million to $44 million funding for refugee social services which had already been appropriated under the fiscal year 1984 continuing resolution. In the end, $16.6 million had been unlawfully reprogrammed away from targeted assistance. The senior Senator from Washington [Mr GORTON] and I asked the Senator from Connecticut [Mr. WEICKER] to include in the Appropriations Committee report on fiscal year 1985 appropriations a clarification of congressional intent in support of funding for refugee targeted assistance. We remain deeply appreciative of the Senator's accommodation of this request.

Despite this clear statement of congressional intent in both the House and Senate reports on fiscal year 1984 appropriations, ORR, at the direction of OMB, once again was unwilling to make available to States the full amount Congress intended in fiscal year 1985. ORR has contended that the level of funding for targeted assistance should be $50 million less unused appropriations from fiscal year 1984. Such an interpretation means that only $11 million out of the $50 million Congress intended would be available for targeted assistance areas nationwide. The senior Senator from Washington [Mr. GORTON] and I, again, asked the Senator from Connecticut [Mr. WEICKER] for his help. Specifically, we asked him to include specific bill language in the fiscal year 1985 Supplemental Appropriations Act directing ORR to release all of the fiscal year 1985 funds Congress has already allocated.

Pursuant to this request, the Senator from Connecticut [Mr. WEICKER] and I engaged in a colloquy June 20, 1985, wherein the Senator assured me the Appropriations Committee had requested the Comptroller General to review the legality of ORR's action. He also assured me, in the event that the Comptroller General reported unfavorably and ORR did not release the full amount Congress intended for fiscal year 1985, he seriously would consider specific bill language in the next general appropriations bill for Labor-HHS-Education and related agencies. We now are considering the next general appropriations bill for Labor-HHS-Education. The controversy remains unresolved and I would like to review briefly what has transpired since this colloquy.

On June 28, 1985, the Comptroller General ruled that ORR acted erroneously in deducting fiscal year 1984 carry-over from the sum appropriated for refugee assistance by the fiscal year 1985 Continuing Resolution. However, the Comptroller General did not find ORR in violation of the Impoundment Control Act because ORR, in good faith, relied upon authority from a previous GAO opinion. The Comptroller General did distinguish this previous rule and found no basis upon which ORR could withhold fiscal year 1985 funds.

Despite the Comptroller General's clear and uncontroverted decision, OMB refused to release all of the fiscal year 1985 funds. On September 26, 1985, the Comptroller General notified Congress of an unlawful rescission of budget authority by ORR. However, under the Impoundment Control Act, the decision will not take effect for 45 legislative days. This means the period will not expire until November 15, 1985. Because the funds in question would not have been available after September 30, 1985, several Members of Congress sought and obtained a temporary restraining order in U.S. District Court for the Northern District of California requiring OMB to release the full amount appropriated by Congress for fiscal year 1985.

My amendment would do exactly what the Federal district court and two Comptroller General decisions have ordered: The immediate release of the full amount appropriated by Congress for refugee assistance for fiscal year 1985 which is $89,026,000.

Mr. President, this amendment is exceedingly important because it would restore and carry out the will of Congress.

There are 33 targeted assistance areas around the Nation and in the absence of such a clarification, States would be faced with an undue financial hardship. My own State of Washington would endure a loss of about $1 million in this fiscal year or a 51-percent reduction in Federal assistance—money, I might add, which the State has already counted on in its own fiscal planning.

In conclusion, I must emphasize that I am deeply disturbed by OMB's action. Not only is the amount of money involved in this controversy relatively small, but the authority upon which OMB has relied has been unanimously rejected. Targeted assistance is a vital and effective resource for States and localities in their efforts to integrate refugee population into communities. Its purpose is to help refugees off public assistance programs and encourage them to become productive members of our society. OMB's action has been a clear erosion of congressional intent as well as a deliberate attempt to frustrate the important objectives of Federal refugee assistance. I urge my colleagues to support the adoption of this amendment.

Mr. President, let me add that this amendment has been cleared on both sides of the aisle. I believe it is acceptable. I should like to add just three brief stories of what this targeted assistance has done in Washington State. I think it has proven to be a clearly more successful and in many respects better program than some of our longer standing social service programs. One is of a South Cambodian man in the United States, residing in the Seattle area for about 6 or 7 months. During that time, he enrolled in a targeted assistance janitor's training program. He then found a job as a custodian at the Group Health Hospital in Seattle and, in addition, was hired as a teaching assistant at the Highline Community College. Working at both jobs, he makes approximately $2,000 per month.

Another South Cambodian man went through the same janitorial

training program. He, too, had two jobs, one as a janitor the other as a painter, with a combined monthly salary of $2,400.

A single woman on AFDC, with three children, was trained through a targeted assistance program to work on an electronic assembly line. She is now off AFDC and has been working at a new job for about 9 months.

Mr. President, these are not rare or unusual examples, but rather common examples of the success of this program. I urge that the full amount Congress wanted to provide for this program be now mandated through this second action of Congress.

Mr. GORTON. Mr. President, I am pleased to join today with my distinguished colleague from Washington [Mr. EVANS], in cosponsoring the amendment to release funds for refugee targeted assistance.

Since fiscal year 1984, the Office of Refugee Resettlement has not made available to the States the full amount Congress appropriated for targeted assistance. This has occurred in spite of the excellent efforts by the Senator from Connecticut [Mr. WEICKER], the distinguished chairman of the Senate Appropriations Subcommittee on Labor, HHS, and Other Related Agencies.

In fiscal year 1984, the Office of Refugee Resettlement unlawfully reprogrammed away $16.6 million from targeted assistance. Again in fiscal year 1985, despite a clear statement of congressional intent in both the House and Senate reports on fiscal year 1984 appropriations, the Office of Refugee Resettlement was again unwilling to make available to States the full amount Congress intended.

Mr. President, this amendment calls for the immediate release of the full amount appropriated by Congress for refugee assistance for fiscal year 1985 which is $89,026,000. This amendment does exactly what the Federal district court and two Comptroller General decisions have ordered.

There are 33 targeted assistance areas around the Nation and if no clarification is made, States will face undue financial hardship. For example, in my own State of Washington, there would be a reduction of about 51 percent or $1 million in this fiscal year in the amount of assistance provided under this program.

Though the amount of money is relatively small, targeted assistance is a vital and effective resource aiding States and localities in their efforts to assist refugees in getting off public assistance and becoming productive members of our society. I urge my colleagues to support the adoption of this amendment.

Mr. WEICKER. Mr. President, this amendment is acceptable, and I urge its adoption.

The PRESIDING OFFICER. Is there objection? Without objection, the question is on agreeing to the amendment.

The amendment (No. 826) was agreed to.

Mr. EVANS. I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 827

(Purpose: To terminate the Job Corps Program)

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin [Mr. PROXMIRE] proposes an amendment numbered 827.

On page 2, line 15, delete "$3,453,677,000" and insert in lieu thereof "$2,836,677,000".

Mr. PROXMIRE. Mr. President, my amendment would delete all funding for the Job Corps Program and thus save $817 million of new budget authority in fiscal year 1986.

The Reagan administration also supports the termination of the Job Corps Program and has proposed that the program be closed down in its fiscal year 1986 budget document.

Why should we kill the Job Corps Program? The best argument, I believe, is the substantial cost of each Job Corps slot. I want to emphasize that I am talking about slots, not people, because the figure I shall use is the 1-year per-trainee cost of running a Job Corps center while an average Job Corps trainee would be processed through a center in less than a year.

What is that 1-year Job Corps training cost? In fiscal year 1985, it was estimated at $15,200. That would pay full room, board, and tuition for a student at one of the Nation's most prestigious universities. I grant that we are comparing the costs of an 8- to 9-month college education with a 12-month Job Corps expenditure, but the fact remains that we are talking about continued Federal funding for centers that cost on a comparable basis two-thirds as much as the best universities in the country.

I am not denying, Mr. President, that there is a great deal to be said for a program that removes inner city youth from a destructive environment and places them in a Job Corps center that provides the discipline and concentrated instruction so sadly lacking in their ghetto environment.

Mr. President, I have had the opportunity to visit a Job Corps center in Wisconsin. I was very impressed with the morale, the attitude, the dedication of the people who were instructing the Job Corps trainees. It was all very impressive.

Of course, it must be added that many enrollees simply cannot adjust to this disciplined environment—that is one of the problems here: About 30 percent drop out within 90 days—and others may simply be going back to the destructive conditions they left when they entered the Job Corps Program. In fact, one of the difficulties in determining just how successful the program may be is that it has been extremely difficult to locate a great many Job Corps trainees after they leave the corps. One followup study was only able to locate about 60 percent of fiscal 1987 terminees.

In any event, I contend that this program is too rich for our blood at a time when we are facing a $2 trillion national debt and a 1986 deficit of $185 billion. That $15,200 per year spent on Job Corps slots is mighty expensive when compared with the costs of vocational education programs or Job Training Partnership Act activities.

As I said earlier, in a discussion with Senator DIXON, we have 600,000 people in Wisconsin who go to vocational-technical education school. I am sure in Alabama, there is a similar very large proportion who do that. The training is excellent, it is available, people can go there and if they go there full time because they are unemployed, they can have it financed in a student loan program and pay it back after they get a job. Far more efficient, Mr. President. I am sure that is true in Connecticut, too.

In the last analysis, if a particular Job Corps center is doing impressive work, States in that part of the country should be willing to contribute to its costs and some of the private sector firms running the centers—corporations such as RCA, Singer, Teledyne and ITT should be involved in sharing those costs.

Mr. President, the only way to cut Federal spending is to scale back or eliminate Federal programs. Job Corps is a prime candidate because of its high per-trainee costs as well as the availability of other, cheaper, training opportunities through the Job Training Partnership Act, vocational education, and the like. I hope my colleagues will join me in voting to kill this program.

Mr. President, let me just summarize by pointing out what the situation is here. In fiscal year 1985, each one of the Job Corps 40,500 slots will cost the taxpayer $15,000. This cost nearly equals the annual cost of sending a student to Harvard or Stanford University, which is far beyond the reach of most American families. It is more than three times the annual cost of education at the average 4-year public university, such as the University of

Wisconsin. The cost per placement is nearly four times higher than the Job Training Partnership Act.

Despite the provision of higher cash allowances for Job Corps members who continue in the program, almost two-thirds do not remain on-board long enough to complete coursework.

Almost half of all terminees go AWOL—think of that: almost half go AWOL—or voluntarily resign; of these about 20 percent leave within 1 month of entering.

Only one-third of Job Corps terminees are reported as being employed 6 months after they leave Job Corps. This job placement rate is only marginally better than that of the discredited and terminated CETA Public Service Employment Program.

Other training programs, such as the Block Grant Training Program under the Job Training and Partnership Act JTPA, can more effectively train youth for jobs.

Recent data on the Job Training and Partnership Act show that JTPA—that act which I would continue—cost per participant is one-third of the Job Corps, and the cost per job placement is less than one-fifth of the Job Corps. In other words, JTPA, which we will continue, costs only a third as much and has five times as good a record in job placement.

The relative success of JTPA is largely due to active private business sector involvement.

Available evidence suggests that eliminating the Job Corps and transferring responsibilities to JTPA will benefit both the taxpayer and the youth who are trying to overcome their disadvantages and become permanent members of the workforce.

I might say in conclusion, Mr. President, that if we are going to have any expectation of achieving what we voted for the other day in the Gramm-Rudman-Hollings amendment, we have to start now to eliminate these programs and over the years the amount saved in cost—in 1987, 1988, 1989, 1990, 1991—will be substantial. That is the only way we can do it. If we wait and continue this program, it is going to be a lot harder next year, which is an election year, than it is now. And it is going to continue in the future.

Mr. President, I yield the floor.

Mr. HATCH. Mr. President, I cannot believe that we are again debating the benefits of the Job Corps Program. I thought that we had endorsed its unique and highly effective job training program when the proposal to eliminate it was rejected in the budget process last spring. With all due respect to the distinguished senior Senator from Wisconsin, who I know is most sincere in his intent to reduce Federal spending in this way, I do believe that debating an amendment to zero-out the Job Corps is beating a dead horse.

Every day, it seems, we are reading newspaper and magazine accounts about the long-term societal perils which accompany youth unemployment. There was such an article just yesterday in the New York Times, on page 1 no less. I agree that we must contain Federal spending in many areas, including the job training area. But, I do not agree that it is wise to eliminate the Job Corps, a program that has recently been examined under a microscope by a variety of interested parties, including the Congress, General Accounting Office, and the media, is wise.

I admit that the Job Corps is expensive on a cost-per-slot basis. But I urge my colleagues to consider the plight of youth who benefit most from the residential centers. We are not talking about the Job Training Partnership Act as a substitute for the Jobs Corps. I happen to believe in the JTPA and the programs it has made possible for youth across the Nation. I am proud to say I participated in JTPA's enactment. But the JTPA programs are geared to youth who know the difference between right and wrong and for whom poverty and lack of education are the only obstacles to success. The Job Corps, on the other hand, must not only teach job skills, it must also teach life skills. Job Corps centers are a holistic approach to rehabilitating youth who are not only economically disadvantaged, but who must shake life-threatening conditions such as alcoholism and drug abuse, illiteracy, and behavioral problems. It makes sense that the value of teamwork, cleanliness, respect, courtesy, hard work, and study, cannot be taught in an environment where such values are not exemplified, nor expected.

Considering the great deficits with which youth enter the Job Corps Program, it is remarkable that Job Corps places 75 percent of its enrollees in jobs, the Armed Forces, or in advanced training or education programs. It is not uncommon for a teenager to enter the Job Corps with only a sixth grade reading level, obtain a high school diploma, and leave Job Corps as a matriculated student of a 2- or 4-year college.

Mr. President, I wish more of our colleagues would take the time to visit with the students in the Job Corps Centers located in their home States. I have toured both the Clearfield and Weber Basin Job Corps Centers in Utah and have greatly enjoyed my chats with the students. These kids are going places. There is no doubt in my mind that without Job Corps, they would still be going backward. These youth are the personification of the fact that Job Corps returns 45 percent more in social benefits than it costs.

Now, I am not blind to Job Corps' faults. I have publicly noted several issues within the program which must be addressed. These include standards for facilities and equipment, retention rates both among corps members and those newly placed in jobs, and the adequacy of vocational programs in meeting the demands of entry level private sector employment. The Labor and Human Resources Committee as well as two House subcommittees have held oversight hearings on the Job Corps. I have pledged to work with the Department of Labor in addressing these issues: I think we can improve the program. We should not kill it.

I salute Senator WEICKER for the bill's current provision for the Job Corps. A freeze at fiscal 1985 levels is, to me, a responsible appropriation given the Federal deficit. I agree we should not increase Job Corps above this level this year, as much as some of us might like to. I believe we could justify an increase if the deficit were not an issue. But we all know that money does not grow on trees and we must restrain spending. That does not mean, however, that we throw the baby out with the bath water. We should not sacrifice the only program aimed at this targeted group of youth.

I ask my colleagues to vote against the amendment of the Senator from Wisconsin.

Mr. WEICKER. Mr. President, I rise to oppose the amendment of the distinguished Senator from Wisconsin.

Evaluations of the Job Corps indicate that the economic benefits to society far outweigh the costs; an estimated $1.46 is returned for each dollar invested, that from a study conducted under Labor Department contract by Mathematica Policy Research.

Each year, the program enrolls more than 100,000 disadvantaged youth, and places 90 percent in jobs, higher education, or the Armed Forces.

These results have been obtained with a group of young people that are so severely disadvantaged that they need residential living away from disruptive homes to get a new start in life. Seventy-five percent are minorities; 90 percent are school dropouts; 38 percent have been arrested, and 19 percent convicted. Almost all come from impoverished families.

The average cost per trainee of $5,200 covers residential living, basic education, vocational skills training, health care and education, counseling and job placement. The plus-$15,000 annual "slot" cost is misleading, since more than one youth is served during each 12-month "slot."

The committee has exercised restraint in freezing Job Corps at last year's level of $617 million, compared to the $640 million House allowance. At the Senate level, the Labor Department has indicated it would have to

close 3 to 5 of the existing 107 Job Corps centers.

I hope that the amendment would be defeated.

Mr. PROXMIRE. Mr. President, I recognize the problem with this amendment. I knew that my good friend, the Senator from Connecticut, was going to oppose it. I have discussed this with a number of Senators, and I regretfully withdraw the amendment. But I am going to send another amendment to the desk, on which I will ask the yeas and nays, which I think has an even stronger case than Job Corps.

I wish I could press the Job Corps amendment, but I recognize I am up against a real powerhouse, and so I will send another amendment to the desk.

The PRESIDING OFFICER. The Senator from Wisconsin is advised that it does take unanimous consent to withdraw the amendment.

Mr. PROXMIRE. Mr. President, I ask unanimous consent I may withdraw my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 828

(Purpose: An amendment to terminate the Work Incentive (WIN) Program)

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Wisconsin [Mr. PROXMIRE] proposes an amendment numbered 828.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 36, beginning with line 24, strike all through line 8 on page 37.

Mr. PROXMIRE. My amendment would delete $266,760,000 provided in the bill as reported from committee for the Work Incentive WIN Program. If we are serious about making inroads into our enormous budget deficits, WIN is a prime candidate for extinction.

Now, what does the WIN Program do? It provides employment and training services for the recipients of Aid to Families with Dependent Childen—AFDC—who are required to register for employment and work-related training. According to the budget justification for the program, its intent is to place the maximum number of participants in self-supporting employment, thus reducing the Nation's welfare assistance costs.

It has been argued by the Reagan administration, which supports the termination of the WIN Program—they want to end it so presumably they would support this amendment—that studies by the General Accounting Office—nobody can say the General Accounting Office is not objective—and private contractors have shown that the program is not cost-effective. For example, a June 1982 General Accounting Office study claims that the vast majority of those reported as entering employment through WIN actually find jobs on their own without WIN assistance.

Well, I am not going to argue the effectivenss or lack of effectiveness of the program. If the program is being used effectively by a particular State to move welfare recipients off the dole, then that State has every reason in the world to pay for WIN training costs with State dollars. After all, the States have to ante up roughly 50 cents of each dollar paid to AFDC clients and other welfare recipients. A cost-effective training program—which this one is not—should be worth its weight in gold to a State and that State should be more than willing to pick up 100 percent of its costs.

On the other hand, if WIN is not working in another State, it is highly unlikely that the State will pick up its costs after the Federal dollars stop. And why should they? In fact, why should Uncle Sam be picking up those costs today? The answer is, he should not, and if my amendment passes, he would not.

Let me mention one other reason why we should do away with the WIN Program. The program discriminates against welfare recipients by putting them in a special category when they should be merged with other out-of-work Americans who receive assistance under the Job Training Partnership Act. The basic thrust behind, JTPA, as I understand it, is to involve the private sector with State and local governments in a comprehensive effort to supply training and jobs for the unemployed, teenagers, the undereducated, and other groups that have fared badly in the job market. I suspect that individual States are currently providing assistance to AFDC recipients using JTPA dollars.

WIN simply represents a duplicative competing system that should have been eliminated at the time we passed the Job Training Partnership Act and that tends to undermine the act by creating a special class of out-of-work Americans. If we truly believe that the JTPA way is the best way to provide training, then we should not deny this training to AFDC recipients or permit the competing WIN system to remain in operation.

I hope that my colleagues will join me in making a significant budget cut in fiscal year 1986, and saving about $210 million in 1986 outlays in the process, by supporting my amendment to kill the WIN Program.

Mr. President, let me summarize by pointing out that the deficit reduction plan proposes termination of WIN and the Community Services Block Grant. I guess the Community Services Block Grant will not be offered, but I am offering WIN now.

WIN provides job search, limited training, and support services to AFDC recipients. However, a recent GAO survey showed that taxpayers get back only 25 cents for every dollar spent in WIN.

About $3 in $4—listen to this—are spent for State bureaucrats' salaries and overhead, not for training for AFDC recipients.

I have received a number of letters from Governors, including Wisconsin, who say they like this program; they want to keep it. I understand why. But I think they are wrong, and if they were in the Senate, they would see why they are wrong, too.

Job finding and job training services can be provided more efficiently through the multi-billion-dollar Job Training Partnership Act State Training Grant Program.

Mr. President, I yield the floor.

Mr. WEICKER. I rise in opposition to the amendment of the distinguished Senator from Wisconsin. This program trains and places welfare recipients, mostly women on AFDC, into permanent jobs, and it is estimated to save $2 in welfare costs for each $1 invested in job training. The Labor Department has long since made adjustments in the WIN Program called for in a 1984 critical GAO report, and I would suggest that in terms of cost effectiveness and dealing with the problem, the program is now of such a nature and administered in such a way as to represent a savings to the taxpayers of this Nation. I oppose the amendment, and I hope it is rejected.

Mr. PROXMIRE. Mr. President, may I say in addition on my amendment, what I am talking about is the estimate of the General Accounting Office. As I say, the General Accounting Office makes these estimates on the basis of very careful study. I have used the General Accounting Office probably as much as any Senator in the years I have been here. I have never seen them to be inaccurate, because what they do is submit their findings to the agency involved when they are critical of it, and the agency can correct it. But the study by the General Accounting Office has shown that it is not cost effective. They claim that the vast majority of those reported as entering employment through WIN actually find jobs on their own without WIN assistance.

As I pointed out before, they get only 25 percent of benefits in return for each dollar spent. It is hard to conceive of a more wasteful program. It is a program that the Governors approved because you are spending Federal money and not their money.

Mr. DIXON. Mr. President, I should like to be heard briefly in opposition to the amendment to eliminate the WIN Program which has been offered by my friend from Wisconsin.

On several past occasions, I have been one of the cosponsors in retaining this program. As a matter of fact, last year, 22 of us cosponsored the effort to retain this program.

In 1984, the program cost the Federal Government $271 million. The program found jobs for 354,396 people, mostly women, It saved $587,072,000 in AFDC payments, and brought in taxes on $3,366,762,000 in income.

Mr. President, we should understand that the WIN Program aims to assist welfare applicants and recipients to get into unsubsidized employment by providing skill assessments, job training, supporting services, and job placement. It has been working well in 34 States.

I think it would be a massive mistake to cut out the money for this program, which returns $2 for every dollar spent and follows the theory of this administration's policy of trying to take people off welfare and put them into productive jobs.

I earnestly hope the Senate will oppose the amendment.

Mr. PROXMIRE. Mr. President, I must respond to my friend from Illinois.

In the first place, the Senator makes an estimate that this is cost effective. As I say, the General Accounting Office, which is about as authoritative as you can get, said it is not cost effective, that it costs $1 for every 25 cents you get back.

In other words, you lose three times as much as you get. If you can get a more authoritative source than the General Accounting Office, I would like to hear it.

Furthermore, it is appealing to say that this is for welfare recipients, and especially women. I emphasize that this program discriminates against welfare recipients by putting them in a special category when they should be merged with other out-of-work Americans who receive assistance under the Job Training Partnership Act. I want to treat men and women exactly the same. The basic thrust behind JTPA, as I understand it, is to involve the private sector with State and local governments. That is what we should have, and that is what is in the law now. We should do so in a comprehensive effort to supply training and jobs for the unemployed, teenagers, the under-educated, and other groups that have fared badly in the job market.

I suspect that individual States are currently providing assistance to AFDC recipients using JPTA dollars. WIN simply represents a duplicative competing system that should have been eliminated at the time we passed the Job Training Partnership Act, and that tends to undermine the act by creating a special class of out-of-work Americans and handles it in a way, as has been documented, that it simply does not work effectively today.

Mr. WEICKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, I move to table the amendment of the distinguished Senator from Illinois [Mr. DIXON], which is due for a vote at 3:30, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 783

(Purpose: To appropriate an additional $5,700,000 for the Runaway and Homeless Youth Act)

Mr. WEICKER. Mr. President, I call up amendment No. 783, on behalf of the Senator from Florida [Mrs. HAWKINS], and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Connecticut [Mr. WEICKER], for Mrs. HAWKINS, proposes an amendment numbered 783.

Mr. WEICKER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 36, line 18, strike out "$2,006,422,000" and insert in lieu thereof "$2,012,122,000".

(By request of Mr. WEICKER, the following statement was ordered to be printed in the RECORD:)

● Mrs. HAWKINS. Mr. President, this amendment, cosponsored by Senator SIMON, would increase the appropriations for the Runaway and Homeless Youth Act by $3 million, raising the total from $23.25 million to $26.25 million for fiscal year 1986. I feel that this increase is not only justified, but essential if we are to protect these children from the dangers of the street and reduce more costly expenditures in terms of incarceration, institutionalization, crime and the incalculable cost in human lives.

My Subcommittee on Children, Family, Drugs and Alcoholism held a hearing on the exploitation of runaways on October 1. I was very moved by the dramatic testimony of witnesses who documented not only the plight of runaway and homeless children, but the success of runaway and homeless youth programs serving these children and their families.

Mr. President, Congress was first motivated to provide Federal funding for programs serving runaway and homeless youth after the discovery of the runaway teenagers found tortured and murdered in Houston, TX, in the late 1970's. Unfortunately, this is not an isolated example. In Seattle, WA, a repeat murderer called the Green River killer has already strangled 32 young teenage runaways. Runaway and homeless children continue to be preyed upon because it seems no one cares, no one protects these children from harm.

But we do care and we can help. The Runaway and Homeless Youth Act provides Federal financial assistance to 273 shelters and youth programs in all 50 States. These programs have an excellent record of successfully returning runaway youth to their homes or otherwise placing them in a safe environment. But these programs are too few, and the problems of the children they are seeing is escalating beyond their capabilities. The runaway and homeless youth programs desperately need additional funding to expand their services and provide staff and volunteers with the training necessary to help children cope with the complex problems that forced them to flee to the streets.

This money is very well spent. Each Federal dollar allocated leverages an average of $3 in State, local, and private funding. My State of Florida has budgeted $1.8 million for runaway programs. In passing the Florida Runaway Youth and Family Act, the State legislature specifically cited the cost efficiency of early intervention through community based programs. They recognized that without such services taxpayers will bear the increasing costs of emergency shelter, foster care and long-term group living programs as well as court-order supervision or incarceration for those runaways who run afoul of the law.

Last year, Florida's runaway and youth service program were able to serve approximately 7,500 children. But despite the efforts of these centers, Florida still leads the Nation in the number of children placed in secure detention. During the fiscal year 1984–85, 2,271 nonoffenders, the majority being runaway and homeless youth, were placed in secure detention, a 46-percent increase over the previous year. These secure detentions most frequently occur in countries where runaway and youth shelters do not exist or are filled to capacity.

Clearly, it is more cost effective to fund preventive programs such as the runaway and youth programs rather than wait and have the taxpayers bear the cost of a delinquent child. Cost effectiveness and self-sufficiency are the keys to this program.

Unfortunately the major portion of funding for children's services still goes to the most expensive and end of the line interventions. Each year we place more and more money into residential programs for emotionally disturbed children. In Florida alone in the children's programs, we are presently spending two-thirds gf a $20 million budget in the children, youth, and families program for residential treatment compared to only about 7 percent for prevention.

By not adequately funding this program, we are incurring additional costs at a later date. The runaway and youth shelters in the Nation have an excellent rate of successful intervention with these troubled children and their families. But because of inadequate funding, far too many children are being denied service they need to avoid the dangers of the street. A July 1985 report by the National Network of Runaway and Youth Services, Inc., entitled "To Whom Do They Belong? A Profile of American's Runaway and Homeless Youth and the Programs That Help Serve Them," found that runaway and homeless youth shelters were forced to turn away at least 6,732 youth because the shelter was filled to capacity and there was no available space. Another 3,518 youth were turned away because it was determined that the shelter could not supply the counseling or treatment necessary to serve an increasingly more troubled clientele.●

Mr. WEICKER. Mr. President, the amendment is acceptable.

Mr. PROXMIRE. Mr. President, there is no objection on our side.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment.

The amendment (No. 783) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 822

The PRESIDING OFFICER. Under the previous order, the question occurs on agreeing to the motion to lay on the table the amendment of the Senator from Illinois [Mr. DIXON].

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Dakota [Mr. ANDREWS], the Senator from New York [Mr. D'AMATO], the Senator from Florida [Mrs. HAWKINS], the Senator from Maryland [Mr. MATHIAS], the Senator from South Dakota [Mr. PRESSLER], the Senator from Alaska [Mr. STEVENS], and the Senator from Idaho [Mr. SYMMS] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. INOUYE], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Louisiana [Mr. LONG], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from New York [Mr. MOYNIHAN], and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

I also announce that the Senator from Michigan [Mr. LEVIN] is absent because of death in the family.

I further announce that, if present and voting, the Senator from Rhode Island [Mr. PELL] would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 53, nays 33, as follows:

[Rollcall Vote No. 235 Leg.]

YEAS—53

Abdnor	Exon	McClure
Armstrong	Garn	McConnell
Baucus	Goldwater	Murkowski
Bentsen	Gore	Nickles
Bingaman	Gorton	Nunn
Boren	Gramm	Proxmire
Boschwitz	Grassley	Roth
Chafee	Hatfield	Rudman
Chiles	Hecht	Simpson
Cochran	Helms	Stafford
Cranston	Humphrey	Stennis
Danforth	Johnston	Thurmond
DeConcini	Kassebaum	Trible
Denton	Kasten	Wallop
Dole	Laxalt	Warner
Domenici	Leahy	Weicker
East	Lugar	Wilson
Evans	Mattingly	

NAYS—33

Biden	Glenn	Mitchell
Bradley	Harkin	Packwood
Bumpers	Hart	Pryor
Burdick	Hatch	Quayle
Byrd	Heflin	Riegle
Cohen	Heinz	Rockefeller
Dixon	Hollings	Sarbanes
Dodd	Kerry	Sasser
Durenberger	Lautenberg	Simon
Eagleton	Melcher	Specter
Ford	Metzenbaum	Zorinsky

NOT VOTING—14

Andrews	Levin	Pell
D'Amato	Long	Pressler
Hawkins	Mathias	Stevens
Inouye	Matsunaga	Symms
Kennedy	Moynihan	

So the motion to lay on the table was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 828

The PRESIDING OFFICER (Mr. COCHRAN). The question is on agreeing to the amendment of the Senator from Wisconsin. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Dakota [Mr. ANDREWS], the Senator from New York [Mr. D'AMATO], the Senator from Florida [Mrs. HAWKINS], the Senator from Maryland [Mr. MATHIAS], the Senator from South Dakota [Mr. PRESSLER], the Senator from Alaska [Mr. STEVENS], and the Senator from Idaho [Mr. SYMMS] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. INOUYE], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Louisiana [Mr. Long], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from New York [Mr. MOYNIHAN], and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

I also announce that the Senator from Michigan [Mr. LEVIN] is absent because of death in the family.

I further announce that, if present and voting, the Senator from Rhode Island [Mr. PELL] would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 20, nays 66, as follows:

[Rollcall Vote No. 236 Leg.]

YEAS—20

Armstrong	Hecht	Proxmire
Boschwitz	Heflin	Quayle
Denton	Helms	Roth
East	Humphrey	Thurmond
Exon	Mattingly	Wallop
Goldwater	McClure	Zorinsky
Gramm	Nickles	

NAYS—66

Abdnor	Eagleton	McConnell
Baucus	Evans	Melcher
Bentsen	Ford	Metzenbaum
Biden	Garn	Mitchell
Bingaman	Glenn	Murkowski
Boren	Gore	Nunn
Bradley	Gorton	Packwood
Bumpers	Grassley	Pryor
Burdick	Harkin	Riegle
Byrd	Hart	Rockefeller
Chafee	Hatch	Rudman
Chiles	Hatfield	Sarbanes
Cochran	Heinz	Sasser
Cohen	Hollings	Simon
Cranston	Johnston	Simpson
Danforth	Kassebaum	Specter
DeConcini	Kasten	Stafford
Dixon	Kerry	Stennis
Dodd	Lautenberg	Trible
Dole	Laxalt	Warner
Domenici	Leahy	Weicker
Durenberger	Lugar	Wilson

NOT VOTING—14

Andrews	Levin	Pell
D'Amato	Long	Pressler
Hawkins	Mathias	Stevens
Inouye	Matsunaga	Symms
Kennedy	Moynihan	

So the amendment (No. 828) was rejected.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, may we please have order?

The PRESIDING OFFICER. Will the Senate please be in order?

The Senator from Connecticut.

Mr. WEICKER. Mr. President, I hoped those Senators who have worked out their amendments with the distinguished Senator from Wisconsin and myself would be here on the floor right now to present those amendments, and that we could conclude consideration of this bill. If it is not done tonight, I am not inclined to wait to see it done tomorrow.

That is not to say it cannot happen. We are trying to move the legislation along and I would deeply appreciate it if my colleagues would present their amendments. We are prepared to help, and Senators can assist by coming to present their requests.

Mr. DOLE. Mr. President, may I make an announcement? If we could have order, I would like to discuss with the distinguished minority leader—in fact, I shall yield to him so we may discuss the program for the balance of the day and tomorrow.

Mr. BYRD. Mr. President, I thank the distinguished majority leader. May we have order so that the majority leader and I may be heard?

The PRESIDING OFFICER. Will the Senate please be in order?

The Democratic leader.

Mr. BYRD. Mr. President, I thank the Chair.

Mr. President, the distinguished majority leader was about to proceed with the outline of the program. That was why I sought recognition. If he could do that and tell us whether or not there will be other rollcall votes today and what the program is for tomorrow, and Wednesday, and so on.

Mr. DOLE. Mr. President, I thank the distinguished minority leader. I understand from the managers of the bill that there will probably be two additional rollcall votes, a Proxmire amendment and final passage; that the others could be resolved somehow with the managers of the bill, and there are four or five of those. I am also advised that some of our colleagues on each side are absent not because they are not trying to get back but because there happens to be some weather around in some areas. And so it would seem to me that it would not disadvantage anyone to have the vote on the Proxmire amendment and final passage sometime tomorrow, maybe at 2 o'clock after the policy luncheon. I do not know how much debate there will be on the Proxmire amendment but hopefully——

Mr. PROXMIRE. As far as I am concerned on my side, I think 15 minutes will be plenty.

Mr. DOLE. So we could conclude action on the bill then and have the votes between 2 and 3 o'clock. I hope we might do that. I know both Senators DOMENICI and CHILES are anxious to get on reconciliation full time, so we will plan on concluding this bill between 2 and 3 o'clock tomorrow. It is still my hope to have another appropriation bill which we can start on at 8 o'clock in the morning, and we are trying to find one where we can move rather quickly because I do want to keep my word to Senators CHILES and DOMENICI on the reconciliation bill.

I would also say that after the managers accept amendments or whatever they are going to do with the amendments that can be dealt with this afternoon, we could spend a couple hours on the reconciliation bill yet this afternoon. Now, if there are votes, I would attempt to put those over until tomorrow.

Mr. BYRD. Mr. President, will the distinguished majority leader indicate when the farm bill will come up and also if he might tell us when he expects to go back to the trade legislation on which we were acting a few days ago and which he has indicated will be coming back up after reconciliation, I believe?

Mr. DOLE. I did indicate that it would come up after reconciliation and in the meantime we have taken up some appropriations bills, so that I think to keep my pledge to both Senators HOLLINGS and THURMOND and others, we need to call up the Micronesia bill sometime this week or in the alternative call up the House-passed textile bill, offer an amendment to that, and file cloture, whatever. We are working with the parties on that agreement.

It is also my hope that the farm bill can come up certainly no later than Thursday, but that will depend on how much time reconciliation takes. We still have 10 to 12 hours, I believe. How much time is there on reconciliation?

The PRESIDING OFFICER. The Chair is advised that just under 16½ hours remain.

Mr. DOLE. I do not believe that is correct. That does not give us credit for the last agreement we made. But, in any event, we are going to try to get to the farm bill this week and also Micronesia in addition to at least one appropriation bill.

Mr. BYRD. My final question: Does the distinguished majority leader expect any rollcalls tomorrow morning or prior to noon? He has indicated we will have rollcalls on the remaining amendment and final passage of this measure, but will there be any other rollcalls he might anticipate tomorrow morning?

Mr. DOLE. I might just alert my colleagues there could be rollcall votes as early as, say, 9:30 or 10 o'clock tomorrow morning. We hope to have a vote tomorrow morning to extend the 1971 international wheat agreement. That would be a rollcall vote. And hopefully, if we can find an appropriation bill, there could be votes by, I would say, 10 or 10:30.

Mr. BYRD. Mr. President, I thank the able majority leader.

Mr. DOLE. I think it is also fair to say that we will probably have a Friday session, hopefully not run too late on Friday.

AMENDMENT NO. 829

(Purpose: To provide an appropriation for the National Center for the Study of Afro-American History and Culture)

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The bill clerk read as follows:

The Senator from Ohio [Mr. GLENN] proposes an amendment numbered 829.

Mr. GLENN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 67, after line 24, insert the following:

NATIONAL CENTER FOR THE STUDY OF AFRO-AMERICAN HISTORY AND CULTURE

For necessary expenses for the National Center for the Study of Afro-American History and Culture Act (title II, Public Law 96-430), $200,000.

Mr. GLENN. Mr. President, I rise today in support of a measure to provide funds for the National Center for the Study of Afro-American History and Culture. In 1980, I sponsored legislation which established the National Afro-American History and Culture Commission. This 15-member Commission is charged with the responsibility for planning the development of the center located at Wilberforce, OH. No Federal funds have been provided either for the construction of the center or for the expenses of the Commission.

This Commission was established by Public Law 96-430 and the President has appointed the Commissioners. Although representatives of the Department of Education, the Department of the Interior, the Smithsonian Institution, and the Library of Congress are included on the Commission along with Presidential appointees and even though this Commission was established by Federal law, no Federal funds are appropriated so that the Commission can carry out its work.

This Commission has met twice during the past year and their ex-

penses have been paid by funds appropriated by the State of Ohio for the construction of the center. It is my feeling that the Commission should be supported in its efforts to plan the future of this important project by providing the necessary funds to pay for the meeting expenses of the Commission. I might point out that the early phases of this project are already under way and that Ohio has committed almost $9 million for the center's construction. I feel we should do our part and defray the expenses incurred by the Commission. This will ensure that the money provided by the State and private contributors will be used for construction and that the Congress provide $200,000 for the Commission to pay for necessary expenses to hold its meetings.

Mr. President, this amendment has been discussed with both floor managers and I believe they are prepared to accept it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio.

The amendment (No. 829) was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 830

(Purpose: To add funds for childhood immunization program)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Arkansas [Mr. BUMPERS] proposes an amendment numbered 830.

Mr. BUMPERS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 22, line 3, strike "$477,777,000" and insert in lieu thereof "$480,277,000" of which $59,906,000 shall be available for the childhood immunization program, and".

Mr. BUMPERS. Mr. President, this is an amendment which adds $2.5 million to the Childhood Immunization Program administered by the Centers for Disease Control. It is my intent that this amendment increase the State Grants Program funding. There is a very simple reason for this amendment, and that is that there are a very limited number of manufacturers of the DTP vaccine. The obvious reason for the shortage of manufacturers is that 1 out of every 350,000 DTP immunizations results in a serious reaction, and as a consequence these pharmaceutical companies are being sued frequently and for large amounts.

Now, the Lederle Co. is one of the principal manufacturers of the DTP vaccine, and Lederle representatives say the company is getting hit by lawsuits from the families of children who suffer these serious reactions. Lederle testified before the Labor and Human Resources Committee's hearing on S. 827 that the company had 115 cases for both DTP and polio pending, with some of the suits claiming as much as $150 million in damages. They also testified that those 115 claims against Lederle represented a total possible judgment of $2 billion.

Now, as a consequence of the "20/20" show on vaccine injuries in 1982, the number of vaccine injury cases has gotten completely out of hand and a number of Senators are sponsoring a vaccine injury compensation bill which will set up an alternative, administrative compensation system and allow parents of injured children to seek fair compensation through this system. We are trying to deal with vaccine injuries in a more rational manner than we have in the past. Many Senators know that I have fought for the immunization program ever since I have been in the Senate, and my wife was very active in Arkansas' immunization program and in the national immunization program. The immunization program saves unbelievable amounts of money: Estimated benefits run as high as $23 for every $1 we invest. But listen to these figures, Mr. President, and you will understand why we are really in a crisis.

In 1981, the cost of a DTP vaccine shot was 10½ cents. On July 15 of this year Lederle announced that they were increasing the price of the vaccine from $2.80 to $4.29. And yet the funding for the immunization program has not kept up with price increases. The first thing you know, we are going to have vaccines for children whose families can afford them and we will not have the immunization program for children whose families cannot afford them and who depend on public health clinics for their immunizations. We do not want to do that.

I thank the chairman of the committee for graciously agreeing to a $2.5 million increase. But I should say now that we will be asking for more funding for this program on the supplemental, because as these vaccine prices we will have to have more money. I do not want anybody to be deceived about that.

One other point I do want to get into the RECORD: I mentioned a moment ago that Lederle testified that they had 115 cases pending against them, with a total exposure of $2 billion. But here is what their 1984 annual report said:

The company and its subsidiaries are parties to numerous suits and claims arising out of the conduct of the business. Included among such suits are approximately sixty-six involving personal injury occurring in connection with administration of the company's DPT and oral polio vaccines; these suits involve very large damage claims, including claims for punitive damages in many cases. In the opinion of management, the ultimate liability resulting from all pending suits and claims (after taking into account insurance coverage) will not have a material adverse effect upon the consolidated financial position of the company and its subsidiaries.

I am reluctant to read that, because I do not want anybody to use that to vote against the compensation bill. I think the compensation bill is absolutely essential. But I want to serve notice on the vaccine manufacturer that the people here want to know what their exposure is so we can deal with the vaccine injury issue properly.

Mr. President, I ask unanimous consent that my amendment be declared in order, since it amends a section of the bill previously amended.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, will the Senator yield for a question?

Mr. BUMPERS. I yield.

Mr. METZENBAUM. In connection with the compensation bill, of which there are two versions, am I correct in my assumption that the amendment of the Senator from Arkansas at this point has nothing to do with that, and this only has to do with a matter of appropriation for funding for research?

Mr. BUMPERS. The Senator is correct. The amendment will provide funds for the Childhood Immunization Program run by the Centers for Disease Control.

Mr. METZENBAUM. I thank the Senator.

Mr. WEICKER. Mr. President, I support the amendment of the distinguished Senator from Arkansas.

This matter of immunization has been one that Senator BUMPERS has followed through on since I have been chairman of the subcommittee, and even before that. I commend him for his interest.

I believe that we get some sort of answer from Lederle. It might be that the committee should correspond with Lederle and ask them exactly what the facts are. I think we should know.

Mr. BUMPERS. I think that would be in order, because I believe the compensation bill is scheduled to be marked up next week by the authorization committee.

Mr. WEICKER. We will try to get that answer.

In the meantime, I hope the amendment is adopted.

VACCINE RESEARCH

● Mrs. HAWKINS. This body has assigned a high priority to resources to support NIH activities and rightly so.

Somewhere in that budget, basic research dollars are provided to stimulate and prompt vaccine development. With limited Federal resources, priorities must be identified. At issue here is where in this list of research priorities at NIH do we stand with respect to vaccine innovation and development for our children? With the technology now available, safer and more effective pediatric vaccines are on the horizon. Are we doing enough? Can we do more? Vaccines going into the arms of our children must be the very best that science can offer.●

● Mr. WEICKER. I share the concern of the Senator. Full utilization of new techniques in biotechnology should be a priority at NIH, especially as they pertain to the pediatric vaccines that protect our children from the ravages of disease. I will direct NIH to report to this body as to their allocation of resources in the area and the steps they have taken toward safer and more effective immunizing agents for our children.●

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 830) was agreed to.

Mr. BUMPERS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 831

(Purpose: To add $3,000,000 for the recruitment, outreach, and training for special needs children under the adoption opportunities program)

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM] proposes an amendment numbered 831.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 36, line 23, strike out "$807,412,000." and insert "$810,412,000, of which $3,000,000 shall be available for activities under title II of Public Law 95-266 (adoption opportunities) (in addition to amounts otherwise available under this heading for activities under such title), for the recruitment and outreach of families to adopt special needs children, including minority children, and for the training of personnel to recruit and work with such families.".

Mr. METZENBAUM. Mr. President, I am offering an amendment to the adoption opportunities program—title II of the Child Abuse Prevention and Treatment and Adoption Reform Act—requesting an increase of the fiscal year 1986 appropriation level to its fully authorized level of $5 million. The program is currently funded for $2 million. That $2 million provides for a national adoption information exchange. And that is necessary.

However, at hearings on barriers to special needs adoption, the Labor and Human Resources Committee heard testimony on a range of problems which prevent special needs children from moving out of their temporary foster placements into permanent adoptive homes. Too frequently those temporary placements keep children permanently in the custody of the State without ever knowing the love and security of a permanent family.

Professional experts who have successfully placed special needs children—the handicapped, the sibling groups, the older children, and minority children—testified that one of the barriers to such placement is lack of money to train workers and to target recruitment and outreach efforts.

Therefore, the amendment I am offering would provide the fully authorized level of appropriations to $5 million, an increase of $3 million over the current appropriations, specifically targeted for recruitment and outreach efforts, including minority adoptive families, and to training of workers.

I believe this to be a cost-savings amendment, for it would eliminate much of the high costs of foster care. And later homelessness and dependency and I believe it to be a humane amendment in providing permanent homes for special needs children, including minority children.

Mr. WEICKER. Mr. President, I commend the distinguished Senator from Ohio for his amendment. It is acceptable to the committee.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 831) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 832

(Purpose: To appropriate $3,000,000 to hire additional mine safety and health inspectors)

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM] proposes an amendment numbered 832.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 14, line 11, strike out "$150,224,000" and insert in lieu thereof "$153,224,000".

Mr. METZENBAUM. Mr. President, the Mine Safety and Health Administration [MSHA] is required by law to carry out a minimum number of inspections: Four a year for underground mines, and two a year for surface mines.

GAO has found that many of these mandated inspections are not being carried out—in particular, only 62 percent of surface metal/nonmetal mine inspections required under the act were completed in 1984.

This alarming failure to carry out the law dates back to at least 1983, and is projected to continue unless we act.

In 1984, MSHA did not perform 7,100 mandatory inspections of surface mines.

For 1985, MSHA's plans called for no inspections of nearly 5,000 surface mines.

Thousands of violations in these uninspected mines are going undiscovered. This cannot be allowed to continue.

The lack of an adequate number of inspectors creates serious safety and health risks even where inspections are performed.

For example, in a coal mine explosion in 1984 in Greenwich, PA, in which 3 died and 11 were injured, MSHA was forced to admit that the inspections conducted prior to this accident were seriously incomplete. In fact, one ventilation specialist testified that he was nearly 2 years behind in his reviews in this region.

This Appropriations Committee has repeatedly expressed its concern that MSHA must meet the requirements for inspections set forth in the act.

Exactly 2 years ago, this committee explicitly directed MSHA to advise the Senate if it was unable to conduct the required inspections.

This year, this committee has learned of the dangerous inspection shortfall, and has ordered MSHA to report with revised inspection plans by December 1.

My amendment allows MSHA to hire an adequate number of inspectors to do the job we want them to do. We must not wait for the next mine disaster before we act on this matter.

We know that MSHA is not carrying out the inspections necessary to protect this country's miners. This amendment will go a long way toward diminishing the risk undertaken by those miners.

Mr. WEICKER. Mr. President, the amendment is acceptable.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 832) was agreed to.

Mr. METZENBAUM. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. METZENBAUM. Mr. President, I express my appreciation for the understanding and cooperation of the managers of the bill, Senator WEICKER and Senator PROXMIRE. As always, they are understanding and cooperative in matters of concern for the general welfare of the people of this country.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 833

(Purpose: To provide administration monies to the 50 States, the District of Columbia, and Puerto Rico for the Federal Merit Scholarship Program)

Mr. BYRD. Mr. President, I sent an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD] proposes an amendment numbered 833.

Mr. BYRD. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Page 58, line 9, strike $5,000,000 and insert in lieu thereof, $5,338,000

Mr. BYRD. Mr. President, I thank the chairman of the Appropriations Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, for providing $5 million in funding in the fiscal year 1986 bill for the Federal Merit Scholarship Program. Although this funding level is adequate to provide for 7 scholarships in each of the 435 congressional districts, the District of Columbia, and Puerto Rico, it falls $338,000 short in funding State administrative costs. The amendment I offer will rectify that shortfall.

Again, I thank the distinguished chairman and the ranking minority member for the support that has been given to this very meritorious program—which I think is not only an investment in America's future but also a recognition of scholarship on the part of those students who merit such scholastic recognition.

I hope that the distinguished chairman will accept this amendment.

Mr. WEICKER. Mr. President, as I understand what the distinguished Senator from West Virginia has done here, the amendment ensures that the dollars go for scholarships to the students, and indeed, the moneys we are talking about here are for administrative costs, so that these costs not get taken out of the scholarships to the young persons who are eligible for this program.

I commend the Senator from West Virginia for his continuing interest in the program, and I enthusiastically support the amendment and ask for its adoption.

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the amendment of the Senator from West Virginia.

The amendment (No. 833) was agreed to.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, again I thank Mr. WEICKER for his support of this program, and without whose support I would not be able, of course, to succeed on behalf of our young people over this country. I have said many times, education is the first line of national defense and national security.

I thank the chairman again, and I thank the ranking minority member.

● Mr. ABDNOR. Mr. President, as the distinguished Chairman of the Labor-HHS, Education, and Related Agencies is aware, I am disturbed greatly by the $63 million reduction in impact aid called for in the bill before us. This cut could prove disastrous to a number of our Nation's federally impacted schools.

The Omnibus Reconciliation Act of 1981 reduced funding for impact aid by more than 40 percent. In contrast, other education programs were cut from 7 to 10 percent. During the past couple of years, Congress has restored a portion of the tremendous cut in support for federally impacted schools. More than 40 of our colleagues last year cosponsored the reauthorization of this necessary program.

The Senate version of H.R. 3424 reduces funding for impact aid by $63 million, with the bulk of that cut in support for category B children. Since impact aid is current-year funded, unlike most Federal education programs, local school districts which are relying upon impact aid will feel this cut during the current—1985-86—school year. The House-passed bill maintains at the fiscal year 1985 level funding for impact aid.

From a strictly parochial perspective, my State is far more reliant upon category A funding than it is upon category B. There is a school district at the SAC installation in South Dakota, however, which relies greatly on both A and B funding. With the phase-in of the B1 program, 600 new military families will be based at the Ellsworth Air Force Base. The funding reduction agreed to by the subcommittee would be catastrophic for this school district.

Mr. President, as a member of the Appropriations Committee, who also serves as chairman of a subcommittee, I recognize and sympathize with the difficult task the senior Senator from Connecticut faces in allocating the limited funds available for the many important programs under his jurisdiction, and I appreciate the consideration he and his more able staff have always given this Senator. This is the first time since Senator WEICKER has chaired this subcommittee that the House has approved a higher appropriation for this program than has the Senate. Given the Senate Appropriations Committee's longstanding commitment to providing adequate support for our Nation's federally impacted schools, I trust that my friend and colleague will do everything possible to accommodate the higher figures contained in the House-passed bill.

● Mr. WEICKER. As the Senator from South Dakota is aware, this has been a particularly difficult year for the Appropriations Committee. We have had to make some very tough decisions. I appreciate the Senator's interest in the impact aid program and I assure him I will give this program every consideration in conference with our colleagues from the House.

● Mr. ABDNOR. I thank the distinguished subcommittee chairman for this assurance.●

● Mr. DECONCINI. Mr. President, it has only recently come to my attention, as a member both of the Appropriations Committee and the Committee on Veterans' Affairs, that two important veterans' employment programs administered by the Department of Labor—the Disabled Veterans Outreach Program [DVOP] and the Local Veterans Employment Representative [LVER] Program—may have to be significantly scaled back if appropriations are not increased in the pending bill. Is the distinguished chairman of the Subcommittee on Labor and Human Services Appropriations [Mr. WEICKER] aware of this problem.

● Mr. WEICKER. Mr. President, I am indeed familiar with the situation outlined by the distinguished Senator from Arizona [Mr. DECONCINI]. It is my understanding that Secretary Brock has initiated a supplemental appropriation request for an additional $8.49 million in Federal Unemployment Trust Fund moneys. That amount would bring the programs to the staffing levels mandated by law.

● Mr. DECONCINI. Mr. President, since any supplemental request would probably not be forthcoming until next year, I believe additional funding should be made available for the programs at this time so as to avoid disruptions in these important programs. Absent additional appropriations, it is my understanding that the DVOP Program will be 96 positions short of the staffing level mandated by current law—2,028 positions—and that States may have to begin riffing disabled veterans who perform outreach services under the program. Current data for the LVER Program calls for a staffing level of 1,598 positions. Without additional appropriations, only 1,431 positions—167 less—can be funded. This means a significant loss of personnel for this important veterans program as well.

In order to remedy this problem, Representative THOMAS DASCHLE, the chairman of the Subcommittee on Education, Training, and Employment of the House Veterans' Affairs Committee, offered an amendment during the House's consideration of the pending measure. That amendment, which added the necessary $8.49 million for the program, was adopted.

I know that the distinguished Senator from Connecticut is always in the forefront of providing necessary assistance to disabled individuals in our society and generally in efforts to assist jobless veterans. I would at this time urge him to consider favorably the position of the House on this issue during conference on the pending measure.

● Mr. CRANSTON. Mr. President, as the ranking minority member of the Senate Veterans' Affairs Committee, I would like to join the distinguished Senator from Arizona [Mr. DECONCINI], who serves on both committees, in urging the chairman to look favorably upon this issue during conference. The DVOP and LVER Programs are vital elements of the system we have developed to meet the employment needs of veterans—particularly the needs of those with service-connected disabilities and those who served during the Vietnam era. I know that the chairman has been supportive of these programs in the past, and I urge him to take whatever steps are necessary to provide sufficient funding for these programs at this time.

● Mr. WEICKER. Mr. President, I appreciate the opportunity to address this issue at this time and want to assure both distinguished Senators of my intention to carefully review this matter in conference.

● Mr. CRANSTON. Mr. President, I thank the Senator for his foresight and dedication on this issue and so many others.

● Mr. DECONCINI. Mr. President, I also thank the chairman for his consideration of this request and for his willingness to address this problem in conference. I also commend the chairman for the outstanding job he has done in fashioning a truly compassionate bill.●

INDIRECT COST RATES FOR NATIONAL INSTITUTES OF HEALTH GRANTS

● Mr. GORTON. Mr. President, Senator EVANS and I came to the floor today prepared to offer an amendment which would remove the freeze in indirect cost rates contained in the Labor, Health and Human Services, and Education, and related agencies appropriation bill. Along with many of our colleagues, we are concerned about the effect of this freeze on universities, such as the University of Washington, which have disproportionately low indirect cost rates relative to other institutions across the country. The freeze will severely effect the ability of these schools to perform necessary Federal research. At the University of Washington, for instance, the freeze will mean the school will have to find $1.25 million elsewhere in its budget to cover the overhead cost of federally sponsored research. This is a cost that has been, and should remain, the responsibility of the Federal Government.

● Mr. EVANS. Mr. President, I concur with the comments of my colleague from Washington and add that during my term as Governor of the State of Washington, I was intimately involved with the creation of a cooperative network of medical research and teaching which included the States of Washington, Alaska, Montana, and Idaho. This program, called WAMI, involves exchanging students and professors across the Northwest so that citizens of all the States in the Northwest can have the opportunity to attend medical school and do medical research at the region's primary medical institution, the University of Washington. This program continues to work well today and is an excellent example of cooperation between the States in the Northwest.

An important part of the research that takes place at the university is federally sponsored. Indirect cost rates are an integral part of that research. A freeze at this time will hurt the university and other schools across the country which do not have the luxury of higher rates. The projected savings from the freeze are approximately 0.5 percent of the NIH budget. However, the freeze would not be evenly shared because savings would come only from a few institutions. The institutions most affected are those which historically have been under-reimbursed and are now seeking reimbursement closer to the level of actual costs. Others affected are those institutions which, upon the encouragement of the Federal Government, have borrowed money to build research facilities and now are receiving interests and depreciation allowed by the Federal Government.

● Mr. GORTON. In lieu of offering our amendment we would like to offer a compromise to my colleague from Connecticut, the distinguished manager of the bill. I realize that Senator WEICKER is committed to keeping down the cost of the Labor-HHS bill, a job he has done admirably. He also knows that the indirect cost rate freeze issue is also addressed in the House version of this bill. The House chose not to freeze the rates for indirect costs, just what our amendment would have sought here today. We will agree not to pursue this issue at this point if the Senator from Connecticut will give us some assurances that he will look favorably upon our request when the Labor-HHS bill reaches conference. I know that he cannot give us complete assurances on the floor today, but I would appreciate it if he would, at the very least, agree to reexamine the issue and discuss the possibility of providing some relief for those institutions which have historically suffered with low-indirect cost rates.

● Mr. WEICKER. Mr. President, the Senators from Washington and many other Senators have indicated their strong feelings on this issue to me many times. During our subcommittee's markup of this bill we discussed and examined the indirect cost rate issue very closely. We concluded that the need to exercise reasonable restraint on the escalating expense of indirect cost rates required the subcommittee to take some action. The freeze was the best available answer at that time.

I will say, however, that there can certainly be room for a reexamination of this issue when the bill reaches conference. I appreciate the Senators' decision to withhold their amendment at this time.

While I cannot give an absolute commitment that we will recede to the House language in conference, I will offer assurances that I will look favorably on the proposal made by the Senators from Washington and do my best to accommodate them during conference. If a middle ground can be reached, perhaps that is what we will pursue.

● Mr. GORTON. Mr. President, am I to understand that my colleague is willing to examine during conference the discrepancies in indirect cost rates

that exist between universities of equal caliber, and work to amend that situation if at all possible, as well as addressing the general freeze on indirect cost rates?

● Mr. WEICKER. The Senator is correct, I will do my best.

● Mr. WILSON. Mr. President, I ask that the conferees be instructed to address the questions of unusual hardship when addressing the issue of indirect costs. For example, the La Jolla Cancer Research Center, unlike any other in the Nation, cannot spread the impact of the indirect cost adjustment throughout its fiscal system. This center raised $606,909 in private funds and with a matching NIH grant has constructed a new building for its research activities. It is now in the difficult position of being unable to pay the rent on this building because of the freeze on the indirect cost adjustment. I point out that throughout this Nation only two other foundations are similarly situated, and neither will suffer the amount of loss that will occur at the La Jolla Cancer Research Foundation. Mr. President, I support the efforts to deal with rising expenditures, but I believe that limited hardship situations can be addressed.●

DISLOCATED WORKER ASSISTANCE PROGRAM

● Mr. GORTON. Mr. President, the Labor, Health and Human Services, and Education appropriation bill reduces Federal support for the Dislocated Worker Assistance Program by almost 55 percent from its 1985 level. This Federal program has helped to provide retraining and specialized support services to Americans who are unemployed and unlikely to return to their former industry because of technological innovation, shifts in product demand, and declines in heavy manufacturing industries.

In my State of Washington, State officials are projecting increases in the number of dislocated workers. In addition to the great numbers of forest products and steel industry employees currently being displaced by industry changes in Washington, projections include losses of more than 6,000 workers in the shipyard industry, and 750 losses in the number of jobs in the aluminum industry.

Mr. President, I ask the chairman of the Appropriations Subcommittee on Labor, Health and Human Services, and Education what steps have been taken to ensure adequate program funding for retraining dislocated workers?

● Mr. WEICKER. Mr. President, although this bill does reduce the appropriation for the Dislocated Worker Assistance Program, this decrease is not reflective of the program's operating level, which is expected to remain constant nationally between program years 1985 and 1986 due to the availability of carryover. In those individual States in which sufficient carryover is not available to maintain ongoing levels, I expect the Secretary of Labor to use his discretionary resources to prevent serious program disruptions.

In addition, the Appropriations Subcommittee on Labor, Health and Human Services, and Education will monitor the level of carryover funding as the program enters program year 1986.

Finally, the subcommittee appreciates the special problems posed by the forest products industry in the Pacific Northwest. In the report accompanying this appropriations bill, we have urged the Secretary of Labor to give special attention to programs that aid dislocated workers in the wood products industry in the Pacific Northwest.

● Mr. GORTON. I thank the Senator.●

(By request of Mr. DOLE the following statement was ordered to be printed in the RECORD.)

● Mrs. HAWKINS. Mr. President, I rise in support of the appropriations to the Department of Health and Human Services that will promote the war on the dread disease AIDS. I commend Senator WEICKER and the Appropriations Committee for their recognition of the seriousness of this problem. The American medical community is presently facing a crisis in the care for victims of acquired immune-deficiency syndrome, a disease for which there is no known cure.

I am personally aware of the necessity to provide additional aid to the health care community serving the needs of AIDS victims. The Florida community of Belle Glade has the highest incidence of AIDS victims per capita in the Nation. No one knows why this community has such a high incidence. Over half of the victims do not fit the high risk profile for AIDS.

Glade's General Hospital, a 73-bed acute care hospital serving the 70,000 residents in Western Palm Beach County has treated 33 diagnosed AIDS patients at a cost of almost a half million dollars. In addition, this hospital has treated 102 cases with "AIDS like symptoms." Nationally, a conservative estimate of the average medical cost per case of AIDS is $114,000. Glade's General Hospital administrator, Patrick A. Lennon, has predicted that the hospital may lose between $1 to $4 million in uncollectable AIDS related debts over the next 2 years. This hospital does not want to turn away patients for financial reasons. It needs help. Many of the AIDS victims do not speak English. The hospital needs translators that can handle the complex technical questions that must be asked to discover the sources of infection and to provide hygienic and health care instruction. It needs additional doctors and nurses; yet because of the publicity the community has received, the hospital is having a difficult time attracting qualified professionals. It needs additional equipment and supplies to meet the acute needs of patients whose immune systems can no longer fight infections, from the common cold to pneumonia or tuberculosis. It needs help in providing a frightened community with up-to-date prevention techniques. It needs social service support not only for the victims and their families but also for the larger community that is suffering from the triple afflictions of fear of further infection, or continued financial drain, and of repeated adverse publicity. Most of all, it needs an answer that will not come soon enough. It needs an answer that can only come from an increased focusing of the research on this disease that is threatening the entire population, women, men, and children, of this country.

The appropriations in the HHS bill reflect a recognition of some of these needs. They will assure expanded efforts to discover the epidemiology and natural history of the disease, fund the purchase and distribution of drugs for the treatment of AIDS patients not included in the NIH clinical trials, provide technical training and assistance for public education and effective community risk reduction, encourage research on psychosocial, and psychiatric aspects of AIDS, and increase the dissemination of research findings to health care providers and the public. In addition, there are funds for limited demonstration projects on health care for victims of AIDS which will help meet the needs of both the medical community and the victims during the interim time until the cure or prevention can be found.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it so ordered.

TIME REMAINING ON RECONCILIATION BILL

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate resumes consideration of the reconciliation bill tomorrow, there be 10 hours of debate remaining on the bill as provided in the statute.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

THE CALENDAR

Mr. DOLE. Mr. President, I inquire of the minority leader if he is in a po-

sition to pass the following Calendar items: Calendar item No. 346, Senate Concurrent Resolution 71; Calendar No. 349, House Joint Resolution 407.

Mr. BYRD. Mr. President, I am pleased to state to the able majority leader that those two items have been cleared on this side.

COMMEMORATION OF ACCOMPLISHMENTS UNDER THE EDUCATION FOR ALL HANDICAPPED CHILDREN ON THE 10TH ANNIVERSARY OF ITS ENACTMENT

The concurrent resolution (S. Con. Res. 71) to commemorate the accomplishments of Public Law 94-142, the Education for All Handicapped Children Act on the 10th anniversary of its enactment, was considered, and agreed to.

The preamble was agreed to.

The concurrent resolution, with its preamble, is as follows:

S. CON. RES. 71

Whereas part B of the Education of the Handicapped Act, commonly known as Public Law 94-142 (The Education for All Handicapped Children Act), was signed into law ten years ago on November 29, 1975;

Whereas Public Law 94-142 established as policy for the United States of America the principle that all children, regardless of disabling condition, have the right to a free, appropriate public education in the least restrictive setting;

Whereas Public Law 94-142 currently serves over 4,000,000 handicapped children;

Whereas Public Law 94-142 ensures the full partnership between parents of children with disabilities and education professionals in design and implementation of the educational services to be provided handicapped children;

Whereas Public Law 94-142 has greatly enriched the classrooms of the Nation by allowing the potential of children with disabilities to be developed, together with the potential of nondisabled youngsters;

Whereas Public Law 94-142 has greatly enriched America's society as a whole by providing the means for disabled youngsters to contribute to the social and economic progress of the United States; and

Whereas Public Law 94-142 has succeeded even beyond the expectations of congressional supporters in marshalling the resources of the Nation to fulfill the promise of full participation in society of disabled youngsters: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress—

(1) recognizes the 10th anniversary of the enactment of Public Law 94-142 and the successful implementation of that law;

(2) acknowledges the many and varied contributions by disabled youngsters, parents, teachers, and administrators; and

(3) reaffirms its support for Public Law 94-142 and the primary goal of Public Law 94-142 that all children, regardless of disabling condition, have the right to a free, appropriate public education in the least restrictive setting.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CENTENNIAL YEAR OF LIBERTY IN THE UNITED STATES

The joint resolution (H.J. Res. 407) designating the 12-month period ending on October 28, 1986, as the "Centennial Year of Liberty in the United States", was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

S. 1779—MEASURE PLACED ON CALENDAR

Mr. DOLE. I send a bill to the desk in behalf of Senators THURMOND, HATCH, STEVENS and KENNEDY and ask unanimous consent that it be placed on the calendar.

Without objection, the bill, S. 1779, to amend the act establishing a Commission on the Bicentennial of the Constitution of the United States to clarify the status of employees of the Commission, to raise the limits on private contributions, and for other purposes was considered to have been read twice and was ordered to be placed on the calendar.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVALS

A message from the President of the United States reported that he had approved and signed the following joint resolutions:

On October 16, 1985:

S.J. Res. 72. Joint resolution to designate October 16, 1985, as "World Food Day";

S.J. Res. 183. Joint resolution to provide for the designation of the week of October 6 through October 12, 1985, as "Myasthenia Gravis Awareness Week"; and

S.J. Res. 197. Joint resolution to designate the week of October 6, 1985, through October 13, 1985, as "National Housing Week."

On October 18, 1985:

S.J. Res. 155. Joint resolution to designate the month of November 1985 as "National Hospice Month";

S.J. Res. 175. Joint resolution to designate the week of October 20, 1985, through October 26, 1985, as "National CPR Awareness Week"; and

S.J. Res. 194. Joint resolution to designate the week beginning October 1, 1985, as "National Buy American Week."

MESSAGES FROM THE HOUSE

At 12:30 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 1726. An act to amend section 51(b) of the Arms Export Control Act relating to the funding of the Special Defense Acquisition Fund.

The message also announced that the House has passed the following bill and joint resolution, in which it requests the concurrence of the Senate:

H.R. 3327. An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes; and

H.J. Res. 308. Joint resolution designating the week beginning on October 20, 1985, as "Benign Essential Blepharospasm Awareness Week."

MEASURES REFERRED

The following bill and joint resolution were read the first and second time by unanimous consent, and referred as indicated:

H.R. 3327. An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes; to the Committee on Appropriations.

H.J. Res. 308. Joint resolution designating the week beginning on October 20, 1985, as "Benign Essential Blepharospasm Awareness Week"; to the Committee on the Judiciary.

MEASURES PLACED ON THE CALENDAR

The following bills were read the second time, and placed on the calendar:

S. 1774. A bill to amend section 1951 of title 18 of the United States Code, and for other purposes; and

H.R. 1562. An act to achieve the objectives of the Multi-Fiber Arrangement and to promote the economic recovery of the U.S. textile and apparel industry and its workers.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and

were referred or ordered to lie on the table as indicated:

POM-479. A resolution adopted by the Council of the City of Maui, Hawaii relating to the Fair Labor Standards Act; to the Committee on Labor and Human Resources.

POM-480. A joint resolution adopted by the legislature of the State of California; to the Committee on Foreign Relations.

"ASSEMBLY JOINT RESOLUTION No. 21

"Whereas, it is fundamental to the conceptual foundations of America to promote and support the principles of freedom, justice, and the equality of all persons throughout the world; and

"Whereas, the Republic of South Africa government with its system of apartheid violates every cherished principle of humanity espoused in the United States Constitution; now, therefore, be it

"*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California requests the United States Attorney General to refuse to issue visas to segregated South African teams and segregated athletes representing the government of South Africa to participate in athletic events in the United States; and be it further

"*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the United States Attorney General, to the Secretary of State of the United States, to the Ambassador to the United Nations, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-481. A petition from a citizen of Concord, New Hampshire relating to AIDS; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, without amendment:

S. 1776. An original bill to extend the authorization for appropriations for the Federal Insecticide, Fungicide, and Rodenticide Act (Rept. No. 99-160).

S. Res. 241. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1776; referred to the Committee on the Budget.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources:

John S. Erthein, of California, to be a member of the National Council on the Handicapped for a term expiring September 17, 1987.

(The above nomination was reported from the Committee on Labor and Human Resources with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry:

S. 1776. An original bill to extend the authorization for appropriations for the Federal Insecticide, Fungicide, and Rodenticide Act; placed on the calendar.

By Mr. MOYNIHAN:

S. 1777. A bill for the relief of Sukhjit Kuldip Singh Saund; to the Committee on the Judiciary.

By Mr. BENTSEN (for himself, Mr. DURENBERGER, Mr. LEAHY, Mr. LONG, Mr. HOLLINGS, Mr. JOHNSTON, Mr. BINGAMAN, Mr. HEFLIN, Mr. BURDICK, Mr. FORD, Mr. CHILES, Mr. PRYOR, Mr. SPECTER, Mr. KERRY, Mr. MCCONNELL, Mr. BOREN, Mr. HATCH, Mr. COHEN, Mr. EXON, Mr. INOUYE, Mr. D'AMATO, and Mr. MURKOWSKI):

S. 1778. A bill to deny most-favored-nation trade treatment to any country that provides support for acts of terrorism; to the Committee on Finance.

By Mr. DOLE (for Mr. THURMOND (for himself, Mr. HATCH, Mr. STEVENS, and Mr. KENNEDY)):

S. 1779. A bill to amend the act establishing a Commission on the Bicentennial of the Constitution of the United States to clarify the status of employees of the Commission, to raise the limits on private contributions, and for other purposes; read twice and placed on the calendar.

By Mr. HATCH:

S. 1780. A bill to provide for the disposition of unclaimed property in the custody of the United States; to the Committee on Governmental Affairs.

By Mr. RIEGLE:

S. 1781. A bill to provide for a system of cost sharing for health care and uncompensated care, and for other purposes; to the Committee on Finance.

By Mr. MATTINGLY (for himself, Mr. MURKOWSKI, Mr. THURMOND, Mr. DIXON, and Mr. HOLLINGS):

S.J. Res. 220. Joint resolution to provide for the designation of September 19, 1986, as "National P.O.W./M.I.A. Recognition Day"; to the Committee on the Judiciary.

By Mr. CRANSTON (for himself and Mr. WILSON):

S.J. Res. 221. Joint resolution to authorize the continued use of certain lands within the Sequoia National Park by portions of an existing hydroelectric project; to the Committee on Energy and Natural Resources.

By Mr. D'AMATO (for himself, Mr. MOYNIHAN, Mr. BRADLEY, Mr. MURKOWSKI, Mr. LAUTENBERG, and Mr. HEFLIN):

S.J. Res. 222. Joint resolution concerning the cruel and inhuman killing of Leon Klinghoffer by international terrorists aboard the cruise ship *Achille Lauro* because he did not submit to the demands of these terrorists; to the Committee on Banking, Housing, and Urban Affairs.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry:

S. Res. 241. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1776; to the Committee on the Budget.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BENTSEN (for himself, Mr. DURENBERGER, Mr. LEAHY, Mr. LONG, Mr. HOLLINGS, Mr. JOHNSTON, Mr. BINGAMAN, Mr. HEFLIN, Mr. BURDICK, Mr. PRYOR, Mr. SPECTER, Mr. MCCONNELL, Mr. FORD, Mr. CHILES, Mr. KERRY, Mr. BOREN, Mr. HATCH, Mr. COHEN, Mr. EXON, Mr. INOUYE, Mr. D'AMATO, and Mr. MURKOWSKI):

S. 1778. A bill to deny most-favored-nation trade treatment to any country that provides support for acts of terrorism; to the Committee on Finance.

ANTITERRORISM TRADE PREFERENCE ACT

● Mr. BENTSEN. Mr. President, terrorism is a worldwide problem that is growing in severity, and during the past several years, the United States—its citizens, its property, its Government—has been the target of over 40 percent of all international terrorist incidents. The hijacking of the Italian cruise ship and the execution of Leon Klinghoffer is but the latest in a series of terrorist incidents for which there is no end in sight. This most recent incident was unusual only because the four PLO terrorists directly involved in the piracy were caught and can now be tried for their crimes.

It is fair to say, though, that terrorism directed against us in the Middle East will not be ended by the successful apprehension of the men who killed Mr. Klinghoffer, because much of the terrorism in that war-ravaged part of the world is state-sponsored and can be attributed to three countries: Iran, Libya, and Syria. The Iranians, we can say to a moral certainty, were the force behind the bombings of the U.S. Embassy and Embassy Annex and the Marine Barracks in Beirut. The Libyans and Colonel Qadhafi have established themselves as supporters of terrorism not just in the Middle East, but here in the United States as well. And the Syrians, despite the help they may have given us during the recent TWA hijacking, are strong supporters of the PLO.

Each of these countries, in its own way, has helped create a climate of terrorism that has killed hundreds of Americans and resulted in the captivity and torture of scores of others of our fellow citizens, and each of these countries has been named by the Secretary of State as a supporter of international terrorism.

What may surprise you is that each of these terrorist-supporting countries enjoys most-favored-nation trade preference when it sells to the United States. This means that imports from Iran, Libya, and Syria are given the same preferential tariff treatment that we give to our best friends, rather than making them pay the higher duties that we require of those who are not friendly toward us, like most communist countries.

I believe it is time to end the benefit we currently give to those who engage in terrorism or actively support terrorist groups or individuals. Joined by my colleagues, I am introducing legislation, "The Anti-Terrorism Trade Preference Act of 1985," to end this terrorist reward.

This legislation will do the following three things:

First, it will require the Secretary of State to maintain a list of nations that support terrorism, notifying the Congress whenever a country is added to or taken from the list. The Secretary already maintains such a list for the purpose of notifying the Congress of certain military exports; this would require the same thing with regard to countries from which we receive imports.

Second, it will deny trade preferences, including most-favored-nation status, to any country on the list of supporters of terrorism.

Third, it will give the President the authority to waive this proscription if he decides that it is in the best interests of the United States to do so, and he notifies Congress of his intent 30 days in advance. I anticipate that this wavier would be given very infrequently and only for the most urgent of reasons, if it is ever given at all.

The effect of this action will be significant. Imports from these terrorist-supporting countries will be moved from column 1 of the tariff schedule—the most-favored-nation column—to column 2, and this will increase the tariff rate for most of the goods that they export to us.

Petroleum and petroleum products, for example, are our largest import from both Iran and Libya; during the first 7 months of this year, we bought almost $210 million in such products from these two countries. As a result of this legislation, the tariff on crude oil from these countries will jump from 10½ cents per barrel to 21 cents per barrel. That may not sound like much, but when you consider the competitiveness of the world petroleum market, this extra charge would represent a significant disadvantage for the Iranians and the Libyans. The third member of this terrorist trio, Syria, will similarly be disadvantaged by a tripling of the tariff on tobacco, its largest export to us, from 11.5 cents per pound to 35 cents per pound.

I do not know whether tariff increases will cause these three countries to seek other markets for their products, or whether they will absorb the lost profits themselves. But by ending the favorable tariff treatment of these terrorist-supporting nations, we will give additional credibility to action we took last Thursday night in bringing the four PLO hijackers to custody where they can be tried for their crimes. This legislation tells nations that support terrorism: "You cannot do so with impunity. You cannot do so and continue to enjoy the benefits we give our friends."

I want to thank the gentleman from Minnesota, the chairman of the Select Committee on Intelligence, for joining with me in offering this legislation. And I want to thank the gentleman from Vermont, the vice chairman of the Select Committee on Intelligence, for his cosponsorship of this legislation and for his strong efforts in the fight against terrorism. As ranking Democrat on the Judiciary Subcommittee on Security and Terrorism, he brings to this legislation a full understanding of both its national and international implications and aspects; his work on both the Judiciary and Intelligence Committees has been a valuable part of our effort to combat this international scourge.●

THE ANTI-TERRORISM TRADE ACT

Mr. D'AMATO. Mr. President, I rise today to cosponsor legislation introduced by my good friends, the senior Senators from Texas and Minnesota, and the junior Senator from Vermont. This legislation, the Anti-Terrorism Trade Preference Act of 1985, would end the favorable trade status we now give certain nations which are known exporters of international terrorism. Specifically, this act would require the Secretary of State to maintain a list of nations that support terrorism, would deny trade preferences to any nation on that list, and would give the President authority to waive this requirement by notifying Congress if he decides that it is in the best interests of the United States to do so.

Most terrorist activities either occur or originate in the Middle East. The nations most actively involved in this terrorism are Iran, Libya, and Syria. Astoundingly, each of these nations now enjoys most-favored-nation trading status, receiving the same preferential treatment on tariffs as our best and closest allies. Imports from Iran, Libya, and Syria totaled $280 million during the first 7 months of 1985 alone.

Recently, I cosponsored S. 925, legislation to rescind MFN trading status for the illegal Government of Afghanistan. While our trade with that nation is insignificant, I strongly believe our trade policy must be consistent with our foreign policy. Since 1968, U.S. personnel and institutions have been the target of over 50 percent of all attacks—the highest of any nation. In 1984, there were over 100 American casualties due to terrorists. Terrorism is one of the major threats to our democracy, and trade is a major way to combat it.

As citizens of the strongest and wealthiest nation in the world, Americans are inviting targets to terrorists. However, we are not alone. Most Western democracies, by virtue of their free and open societies, share our lot as victims of terrorism.

I do not know how long it will take before the nations which are the most susceptible to terrorism realize their extraordinary powers to combat it. The most common denominator among the nations victimized by terrorism is their incredible economic strength. Western Europe, Japan, and the United States alone account for well over half of the world's GNP. We are reluctant, however, to use this tool as a weapon. Incredibly, we continue to trade with Libya, one of the most notorious exporters of terrorism. We rationalize this inconsistency by correctly pointing out that our allies will eagerly replace any business we would lose.

It is ironic that a democratic nation will not hesitate to use trade as a weapon against her allies, but refuse to use it against her enemies. By economically isolating those nations which actively promote international terrorism, we will at least respond economically where we fail to act militarily. It is only common sense that dictates that the United States and our allies band together to solve the growing threat of terrorism. Using our economic strength is the first politically palatable step in a comprehensive, unified response to terrorism. But this is still only a first step.

It is the United States which must take the lead. By passing the Anti-Terrorism Trade Preference Act of 1985, we would set a tremendous example for our allies and send an unmistakenly clear signal to the terror-broker nations. Until this legislation is signed into law, I urge the President to use the powers authorized in the foreign aid bill which was signed into law just this past August. Under this legislation, the President may ban the importation of goods from any nation who supports terrorism. The administration has the tools to combat terrorism, and it is my hope that they will use them.

The longer we neglect to unify our stand and jointly direct our collective resources against terrorism, the longer terrorists will strike with impunity against civilized nations. I fear that unless we treat terrorism as the serious threat to national security that it is, then possibly one day we will find ourselves risking much more than a

few overseas tourists or consulate buildings. Quick passage of the Antiterrorism Trade Preference Act, coupled with similar actions by other nations victimized by terrorism, would be a strong initial and effective response to the growing cancer of terrorism.

By Mr. HATCH:

S. 1780. A bill to provide for the disposition of unclaimed property in the custody of the United States; to the Committee on Governmental Affairs.

UNCLAIMED PROPERTY ACT

Mr. HATCH. Mr. President, I rise to introduce the Unclaimed Property Act of 1985. The bill relates to the matter of escheat, the succession of abandoned property to the State. It results from the failure of a person legally entitled to the property to make a valid claim against the holder of the property within a prescribed period of time. Property is also escheated from the estate of a person dying intestate or partially intestate without any known or discoverable heirs.

The principle of escheat originated in the elaborate feudal landholding system which existed in England during the Middle Ages. The basic premise was that property which remained without an owner or upon failure to make claim by a descedent's heirs, reverted to the sovereign from whom all property rights were derived. This concept was brought to the American Colonies by the English settlers and was included in the instrument by which the lords proprietors governed the Colonies.

The bill that I am submitting actually applies to either escheat or unclaimed property depending upon the specific law within the State. There is a distinction that needs to be made between the terms escheat and unclaimed property. Escheat refers to money that actually belongs to the government, which they can keep after a specified amount of time. Whereas, unclaimed property is money that the State is holding in its custody; however, an owner or legal heir may come back at any time to reclaim it.

The majority of the States have enacted uniform unclaimed property statutes which empower the States to collect and hold abandoned property, pending the submission of claims by the owners or their heirs to recover this property. Before a State executes its power of escheat, each State must establish a mechanism for locating lost owners through newspaper advertising and letters. A number of States have staff members whose sole duty is to track down lost owners. The last known address of the owner would be in the State receiving possession of the funds. The success rate in various States varies, but some claim having returned 50 percent of the funds initially reported by the holders. With the Unclaimed Property Act of 1985; the States would only begin their search after the Federal agencies have ceased to look. Thus, after the Federal agency has declared itself unable to locate the lost owner, they would turn over the funds to the States rather than the U.S. Treasury.

The States have formed the National Uniform Law Commission, which is a national group composed of all the individual State agencies whose job it is to find the owners of this unclaimed property. In 1954, they held their first meeting at which they prepared the initial unclaimed property law. Many States subsequently adopted this legislation. It has been reviewed and altered twice since this time, once in 1966 and most recently in 1981. The majority of all States have adopted the current law, in most instances with respect to unclaimed property rather than escheat.

For nearly 50 years, the States have been involved in an ongoing controversy with agencies of the Federal Government with regards to the right of escheat. Historically, the right of escheat was considered a State prerogative. Congress however, has passed escheat laws which increasingly supersede this right. I am submitting this legislation in order to restore the right to escheat to the States.

There have been too many instances in which the Federal Government has refused to comply with State agencies when they have asked for various types of unclaimed property. California is now holding more than $1 million in U.S. bonds which the U.S. Treasury will not cash. I am compelled to conclude the Federal agencies will insist on continuing to hold such funds and will refuse to turn them over to the States so that the rightful owners can be sought and will neither negotiate nor moderate their stand without compelling legislation, such as the present bill.

Among the various types of property involved in this controversy are: the cashing of U.S. savings bonds turned over to States as unclaimed or escheated property through bank safe deposit boxes, savings bonds purchased and never delivered to owners, uncashed U.S. tax refund checks, unclaimed wages collected by the Department of Labor, uncashed postal money orders, uncashed unemployment compensation checks, unclaimed Federal retirement contributions including pension and military checks, unclaimed funds held by HUD, for a variety of examples.

I urge my colleagues to join me in restoring this traditional right to the State government. I ask unanimous consent that the text of the proposed bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1780

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Unclaimed Property Act of 1985".

DECLARATION OF POLICY

SEC. 2. It is the policy of the Congress that:

(a) The United States Government recognizes that the States, as lawful custodians, may escheat or acquire unclaimed property in custody of United States officers, departments, and agencies under the following three conditions:

(1) Whenever the owners of such property have or may have had a vested interest therein;

(2) Whenever claims for delivery and possession thereof have been made by or on behalf of such owners or their heirs, assigns, or representatives and;

(3) Whenever such owners of above mentioned party or parties have been unsatisfied.

(b) If a State may escheat or become the lawful custodian of such property, the United States Government shall not assert an interest in such property by reason of any delay in the presentation of claims or demands for payment or delivery by or on behalf of the original owners.

(c) The United States shall assist the States in discovering and recovering such property.

DEFINITIONS

SEC. 3. As used in this Act—

(a) The term "unclaimed property" means any tangible or intangible personal property, including chores in action in amounts certain and all debts, entrusted funds or other property held by any Federal agency, officer or employee thereof, whether occasioned by contract, operation of law or otherwise, except bonuses, gratuities, and sums held by the Social Security Administration, which has remained unclaimed by the owner for:

(1) 5 years from the date of maturity or call for payment, if arising from transactions under the public debt; or

(2) 5 years after the last transaction concerning principal or interest, if deposits are in the postal savings system; or

(3) 5 years after the property first became payable, demandable, or returnable, if arising from any other transaction.

(b) The term "owner" means any person, including his legal representatives, who has or had a legal or equitable interest in unclaimed property. The owner shall be conclusively presumed to be the person to whom unclaimed property was or is payable or returnable according to the records of the United States Government. If two or more persons are interested in the property, and the extent of their respective interests is unknown, it shall be presumed that their interests in such property are equal.

(c) The term "State" means any State of the United States, including any antecedent commonwealth, republic, territory, or other jurisdiction, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, and Guam.

(d) The term "person" includes any individual, partnership, corporation, unincorporated association, or other legal entity.

(e) The term "Federal agency" means (1) any executive or military department, agency, or independent establishment in the executive branch of the Government, (2) any wholly owned Government corporation, and (3) any establishment in the legislative or judicial branch of the Government (except the Senate, the House of Representatives, and the Architect of the Capitol and any activities under his direction).

(f) The term "Administrator" means the Administrator of General Services.

(g) The term "Comptroller General" means the Comptroller General of the United States.

DISCOVERY OF UNCLAIMED PROPERTY

SEC. 4. (a) The Comptroller General shall conduct annually an examination of all records in possession of or relating to the accounts of each Federal agency concerning unclaimed property. From such records, the Comptroller General shall determine and record the following information with respect to such property:

(1) The name and last known address of each owner;

(2) The dates essential to determine when the property became unclaimed property;

(3) The recoverable value, if funds or description of the property, if not funds; and

(4) The transaction whereby the property is held in custody by such Federal agency and the name and address thereof.

(b) Except as otherwise provided by section 2575 of title 10 of the United States Code, all unclaimed property in the custody of any Federal agency shall be transferred, under such regulations as the Comptroller General shall prescribe, to the custody of the Administrator, who shall retain custody thereof pending its disposition pursuant to the provisions of this Act.

REPORTS TO STATES

SEC. 5. (a) Notwithstanding any other provision of law, the Comptroller General shall report annually, beginning June 30, 1987, to the authorized officer of any State, upon request of that officer, all relevant information previously determined and unreported concerning unclaimed property in which that State is or may be interested under the provisions of this Act.

(1) The chief executive of such State certifies that it is a lawful custodian under its laws and the State is entitled to such unclaimed property notwithstanding that no other States have provided the certification required pursuant to section 5; and

(2) The Comptroller General is satisfied that the law of such State provides effective means whereby the United States shall be held harmless or otherwise protected against any claim if the State escheats or acquires lawful custody of the unclaimed property.

RECOVERY OF UNCLAIMED PROPERTY BY STATES

SEC. 6. (a) Where according to the records of the United States examined pursuant to section 4(a) the last known address of an owner of unclaimed property is in a State, such unclaimed property held by any Federal agency shall be subject to (1) escheat or custodial taking by that State or its authorized representative, or (2) collection by a fiduciary who has been appointed by a court in that State for the purpose of collecting assets of a deceased, disappeared, or missing person or of an owner of unclaimed property where the property will be escheated or taken into custody by the State if the owner or his successors do not claim the property. For the purposes of this Act it shall be presumed that the situs of unclaimed property is in the State of the last known or presumed address of the owner. In case of any unclaimed property disclosed by such records to be owned by two or more persons—

(1) if the last known addresses of owners are in one State, any owner's address which is unknown shall be presumed to be in that State;

(2) if the last known addresses of owners are in more than one State, the addresses of owners whose addresses are unknown shall be presumed to be in the States where the owners' addresses are known; and

(3) if the records of the United States do not disclose the address of any owner of unclaimed property, such unclaimed property shall be presumed to have a situs in all the States and the Comptroller General shall determine the proportionate share of a State as follows: The total of such unclaimed property shall be multiplied by a fraction, the numerator of which is that State's population as determined by the most recent census and the denominator of which is the total population of all States as determined by the most recent census.

(b) The administrator shall deliver or pay over the unclaimed property upon written request accompanied by a certified copy of the order or judgment if:

(1) a State has adopted a statute providing for the escheat or lawful custody of unclaimed property subject to this Act and satisfied the provisions thereof; or

(2) a State's authorized representative, or a proper fiduciary of the owner has obtained an appropriate order or judgment of a State court declaring the right of the State or such fiduciary to escheat, acquire custody, or obtain possession of any unclaimed property.

(c) The expiration of any period of time specified by statute or court order, during which an action or proceeding may be commenced or enforced to obtain payment of a claim for funds or recovery of property shall not affect the right of a State, its authorized representative, or a proper fiduciary of the owner to escheat, acquire custody, or obtain possession of unclaimed property in accordance with the provisions of this Act.

(d) There is hereby authorized to be appropriated to the Comptroller General and to the General Services Administration, out of any money in the Treasury not otherwise appropriated, such amounts as may be necessary to carry out the provisions of this Act.

RULES AND REGULATIONS

SEC. 7. The Comptroller General shall prescribe such rules, regulations, forms, systems, and procedures for Federal agencies as may be required for the administration of the provisions of this Act.

AMENDMENTS

SEC. 8. (a) Subsection 203(m) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 484 (m)), is amended to read as follows:

"(m) Subject to the provisions of section 2575 of title 10 of the United States Code, the Administrator is authorized to take possession of abandoned and other unclaimed property on premises owned or leased by the Government, and to retain custody thereof pending its disposition pursuant to the provisions of the Unclaimed Property Act. Except in the case of property transferred to the Administrator pursuant to that section, such disposition shall not be made until (1) the Administrator has made a diligent effort to determine and locate the owner of the property, his heirs or next of kin, or his legal representative, and (2) 1 year has expired after the date of receipt of such property by the Administrator.".

(b) The text of section 2575 of title 10 of the United States Code is amended to read as follows:

"(a) Subject to the provisions of sections 4712 and 9712 of this title, if money or other personal property of a decreased member of an armed force of the United States is in the custody of a military department, the secretary concerned shall keep it in safe custody and make a diligent effort to determine and locate the heirs, next of kin, or legal representative of the deceased member. Property remaining unclaimed 2 years after the death of the member shall be transferred to the Administrator of General Services, who shall dispose of such property pursuant to the Unclaimed Property Act:

"(b) Whenever any other lost, abandoned, or unclaimed property is in the custody of a military department, the secretary concerned shall make a diligent effort to find the owner, his heirs or next of kin, or his legal representative. If the owner, his heirs or next of kin, or his legal representative cannot be found within 1 year after such property is received at a storage point designated by the secretary concerned, the secretary shall transfer such property to the Administrator of General Services, who shall dispose of that property pursuant to the Unclaimed Property Act, with the, exception that if the owner, his heirs or next of kin, or his legal representative is determined but not found, such property may not be so transferred until the expiration of 120 days after the date when notice, giving the time of the intended transfer, has been sent by registered mail to that person at his last known address.".

(c) Subsections (e), (f), and (g) of section 4712 of title 10 of the United States Code are amended to read as follows:

"(e) If the summary court-martial cannot dispose of the effects under subsection (d) because there are no persons in those categories or because the court finds that the addresses of the persons are not known or readily ascertainable, the court shall transmit the effects to the Department of the Army for disposition pursuant to section 2575 of this title.

"(f) The summary court-martial shall make a full report of the transactions under this section, with respect to the deceased, to the Department of the Army for transmission to the General Accounting Office for action authorized in the settlement of accounts of deceased members of the Army.".

(d) Subsections (c), (f), and (g) of section 9712 of title 10 of the United States Code are amended to read as follows:

"(c) If the summary court-martial cannot dispose of the effects under subsection (d) because there are no persons in those categories or because the court finds that the addresses of the persons are not known or readily ascertainable, the court shall transmit the effects to the Department of the Air Force for disposition pursuant to section 2575 of this title.

"(f) The summary court-martial shall make a full report of the transactions under this section, with respect to the deceased, to the Department of the Air Force for transmission to the General Accounting Office for action authorized in the settlement of accounts of deceased members of the Air Force.".

(e) Sections 4713, 6522, and 9713 of title 10 of the United States Code are repealed.

EFFECTIVE DATE

SEC. 9. This Act shall take effect on the first day of the second month beginning after the date of enactment of this Act and shall apply to unclaimed property accruing on and after that date.

By Mr. RIEGLE:

S. 1781. A bill to provide for a system of cost sharing for health care and uncompensated care, and for other purposes; to the Committee on Finance.

HEALTH CARE FOR THE UNINSURED ACT

● Mr. RIEGLE. Mr. President, today I am introducing S. 1781, the Health Care for the Uninsured Act of 1985. This bill will address the need of the growing number of individuals and families in this country who are finding themselves without the financial access to health care. These Americans who are being denied access to our health care system, represent a growing segment of our population. The Census Bureau recently estimated that there are 35 million individuals who lack either a public and/or private form of health care coverage. This represents a 25-percent increase since 1977. The reasons for this increase in uninsuredness are complex. Clearly at the top of the list are reductions in funding for the Federal Government's health care programs and the failure of certain segments of our society to rebound from the recent recession with its accompanying continued high unemployment. This number fails to include the millions of Americans who have inadequate insurance, which the American Medical Association recently estimated to include an additional 75 million persons under 65 years of age.

This is not an academic or statistical problem. There is scientific evidence to suggest that the lack of health insurance, and the resulting failure to seek medical attention, actually leads to needless suffering or in some cases even death. The failure of millions of Americans to have access to health care services is an indictment of our health care system and of our political system, which, at least up to this point, has failed to respond to this critical problem. The Federal Government can no longer ignore what can only be called a national disgrace; 5 million Americans report annually that they do not seek health care because they are unable to pay for it. Due to our inaction, Americans are needlessly suffering preventable illness and are literally experiencing premature death.

The increase we are witnessing in uninsuredness is a phenomenon that should not be ignored by those of us making public policy. As a result of Federal policy, through tax deductions and Federal health insurance, we have already made the decision to spend considerably more dollars on health care for middle- and upper-class citizens than we do for poor, and working, lower-middle-class Americans. In fact, in our zeal to reduce spending in existing Federal health programs, we have indirectly made it significantly more difficult for those without insurance to secure health care. Hopefully, S. 1781 will start the long overdue dialog on how we can solve this tragic problem during a period of Federal austerity.

The problem of individuals and families without health insurance is documented by the increase in uncompensated care incurred by hospitals for the delivery of charity care and care to those with limited ability to pay. This increase in uncompensated care has led to the restriction and elimination of services by selected hospitals and a rise in the number of Americans who have been refused care because of a real or perceived inability to pay. As the health care market becomes more competitive, the lack of access to health care services for uninsured persons will only increase unless action is taken now.

During the consideration of my Health Insurance for the Unemployed Workers Act of 1983 there were those who felt that we should broaden the scope of the discussion and look at the entire uninsured population and their relationship to those hospitals that deliver a disproportionate share of uncompensated care within their respective communities. Since that time, as I have mentioned, the number of individuals without insurance has grown and the ability of health care system to serve these individuals has diminished. Therefore, I have broadened the focus of my earlier legislative initiatives on this issue to include not only the unemployed uninsured, but also the working uninsured and other individuals who lack access to health care. S. 1781, the Health Care for the Uninsured Act of 1985, is designed to address this serious problem in a manner that will be implemented at the State level and, in keeping within the constraints created by high Federal deficits, will require no new Federal expenditures. In the remaining portion of my statement, I will in a more detailed fashion illustrate who these uninsured Americans are, the impact this lack of access to health care is having on them personally, and examine the consequences for certain hospitals serving a large number of uninsured individuals. I will then briefly review the major objectives of S. 1781 and how implementation will help to alleviate this situation.

THE UNINSURED IN AMERICA

It is becoming increasingly clear that the entire population of uninsured Americans is a diverse segment of the population, spanning all age groups, employment status, and income levels. In contrast to the common misconception, this is not solely a poverty or welfare issue. It is necessary to examine in detail various demographic characteristics of this population, for a better understanding of the problem so that we can move toward more equitable and insightful solutions.

EMPLOYMENT STATUS

The individuals who are uninsured find themselves in all employment categories.

1. EMPLOYED AND UNINSURED

It is true that the majority of Americans presently have health care coverage through the workplace. A Department of Labor study of health insurance coverage in 1979 estimated that 75 percent of the civilian labor force had group health coverage through their place of employment. A 1984 survey demonstrated that 97 percent of full-time employees of medium and large firms had health insurance covering them for most categories of hospital and medical costs. So it may come as a surprise to some that the majority of the uninsured are actually employed individuals and their families. The National Center for Health Services Research [NCHSR] has estimated that the employed may account for close to 75 percent of the uninsured in this country. The uninsured workers most at risk are young persons with poor economic circumstances, lower level of education, and limited means to obtain coverage. They tend to come from occupations displaying seasonal employment patterns and less technically skilled positions such as in agriculture, construction, sales, and personal services. Many are self-employed or underemployed, or are working less than full time, which makes them ineligible for coverage even if a plan is offered to full-time employees; 85 percent of the uninsured workers received wages less than $5 an hour and have annual earnings less than $10,000.

Many would say that a large proportion of the employed uninsured simply decide not to participate in an employer-sponsored plan. However, the NCHSR, recently demonstrated that close to 90 percent were unable to obtain insurance through their employment either because a plan was not offered or the worker was ineligible. It is essential that we not be deluded into believing that inadequate financial access to health care is not a problem faced by our employed population. Employment may insure access for millions of Americans, but it very much depends on the type and location of employment.

2. UNEMPLOYED AND UNINSURED

It is the plight of the unemployed worker and his/her family that drew our attention to the possible loss of health care coverage during the last recession. The return of double-digit

unemployment focused our attention on the needs of the unemployed. The 97th and 98th Congress saw multiple proposals to alleviate or reduce the burden faced by many of these families. I first introduced legislation (S. 2798, 97th Congress, on Dec. 10, 1982) during the peak of the previous recession to provide health insurance for the unemployed. It was actually the severe unemployment in my home State of Michigan that first drew my attention to the needs of those who lacked health care coverage. We were very close to seeing enactment of legislation that would have lent relief to many of the recently unemployed. The Congressional Budget Office estimated that following the most recent recession that about 5.3 million recently laid off workers had lost coverage under an employer-based health benefit plan. If the dependents of these individuals are included the number increases to 10.7 million persons who lacked health insurance coverage in December 1982 because of job loss.

Many of these employer-based health benefit plans may actually have provided for conversion from the group rate to an individual rate. Yet how many unemployed persons can afford the increased premium of an individual plan, without an employer contribution at a time when they are least able to pay. In 1984, 51 percent of the recently unemployed in the Detroit area lacked health care coverage. In addition, despite limited incomes, these families frequently fail to meet the categorical requirement of the public assistance health programs such as Medicaid, which frequently does not provide assistance to two-parent families, independent of a family's financial need for services.

OTHERS

Finally, there is a substantial number of individuals with no recent involvement in the labor market. They are comprised of discouraged workers, individuals in school, and dependents who might not be covered by a spouses plan. Many of these individuals are living below the poverty threshold, yet again they fail to qualify for programs such as Medicaid and Medicare.

The employment characteristics of the uninsured family will undoubtly vary from region to region depending on the economic circumstances, the degree of industrialization and unionization, and the specifics of individual State's public assistance programs. Yet despite this variability, it is a national problem with large numbers of uninsured individuals living in our cities, towns, and rural areas.

INCOME STATUS

As can be deduced from the fact that many of these uninsured persons are working individuals and their families, this is not solely a poverty or welfare issue, though a disproportion number of the uninsured are represented by low-income families. A recent analysis of the current population survey by the Urban Institute demonstrated that 35 percent of the uninsured were from families with incomes below the poverty line. However, 65 percent had incomes above poverty with 11 percent actually having incomes four times the poverty threshold. Any legislative attempt to address this problem should provide access to health care coverage for all individuals, independent of their financial status. Individuals with the financial resources should be asked to pay their fair share for the care received while individuals unable to afford the full cost of health care coverage should be asked to contribute based in their ability to pay. The bill I am introducing today accomplishes this objective.

AGE DISTRIBUTION

The age distribution of the uninsured is of particular concern to me for it again spans all ages. However, it seems to affect women and children in a disproportionate manner; 11 million, or close to one-third of the uninsured, are children. In addition, 17 percent of all women in the reproductive age—15 to 44—and more than 25 percent of women in their prime child-bearing years—18 to 24—have no form of health insurance and are unlikely to be able to afford adequate care without it. There are also close to 6 million individuals who are middle aged or in their pre-senior years who lack coverage. This is particularly alarming, considering the increased cost of medical care required as persons grow older. It seems that the only population that we have assured adequate financial access to health care are our senior citizens, who at this point are relatively well protected by Medicare. It is estimated that of the 27 million elderly in this country, only 0.7 percent were without health care coverage. This is a commendation for a program which recently celebrated its 20th anniversary.

A SERIOUS PROBLEM—GETTING WORSE

The problem of health care for the uninsured looms heavily over the health care system. There are multiple trends at present which will only worsen the situation. These include, but are not limited to the following categories:

CONTINUED ESCALATION OF HEALTH CARE COSTS

The Department of Health and Human Services [HHS] has estimated that in 1984, our Nation spent over $387 billion on health care. This represents approximately 10.6 percent of our gross national product [GNP]. The increasing cost is also making making it difficult for those who lack an employment based plan to afford the cost of care.

THE INABILITY TO COST SHIFT

In the past, the care for those with a limited ability to pay was shifted to those who were able to pay. As we continue to move toward a competitive market for health care, it is becoming increasingly more difficult to shift the burden of charity care to other payers in both the public and private sector. This is presently seen with the transition of Medicare under the new prospective payment system [PPS] where the cost of charity care has not been incorporated into the system. The emergence of alternative delivery systems in the private sector such as health maintenance organizations [HMO's] and preferred provider organizations [PPO's], along with employers' growing interest in becoming self-insured, is making it difficult for these costs to be absorbed by other payers.

REDUCTIONS IN PUBLIC HEALTH PROGRAMS

There has been a major reduction in health care program expenditures during the first term of this administration. The Omnibus Budget Reconciliation Act of 1981 [OBRA] enacted major changes in the Medicaid Program which hurt many low-income individuals. The two major changes were a reduction in the Federal match over 4 years, and tightening eligibility for the work incentive aspect of the aid to families with dependent children [AFDC] which qualifies recipients for Medicaid benefits. The Government Accounting Office [GAO] estimates that half a million low-income, working families were eliminated from the Medicaid Programs as a result of OBRA. It has also been estimated that over 700,000 children were dropped from Medicaid following the enactment of this legislation. It is now estimated that Medicaid services less than half the poor and near poor in this country.

The Discretionary Health Programs, which were designed to improve access to the health care system, and includes the maternal-child health block grant, community and migrant health centers, the Indian Health Service, and the National Health Service Corps have been reduced by 36 percent during this administration. It is no wonder that so many of our children and low-income families lack adequate access to care.

METAMORPHOSIS OF THE HOSPITAL INDUSTRY

The hospital industry is in tremendous flux, which is being generated in part by the new Medicare prospective payment system, the continued efforts to contain costs, and recent reductions in hospital utilization. Two changes are directly affecting access for those who find themselves uninsured. The first is the increase in proprietary—for-profit—hospital chains. It has been demonstrated time and again that these chains serve a disproportionately small number of individuals who lack an ability to pay. The second is hospitals' continued fulfillment of their Hill-Burton charity care obliga-

tion. It is estimated that as of January 1, 1984, 28 percent of hospitals that had received Hill-Burton funds has retired their 20-year, free-care obligation.

Each of the above trends will only continue to place a continued stress on the health care system. This stress is evidenced by the increasing difficulties uninsured individuals are having in gaining access to the health care system.

IMPACT OF UNINSUREDNESS

Many researchers have demonstrated that those individuals and families who lack health insurance have much different health care utilization patterns of health care services. The frequently have poorer health status, utilize less physician, and hospital services. The care is fragmented, acute, and more expensive. It is usually received in hospital emergency rooms, or public hospital outpatient clinics. There is also much less use of preventive services which could reduce the need for hospitalization.

However, as the amount of uncompensated care incurred by hospitals increases, they will be less able to deliver even this less than optimal type of care. The time has come once again when those individuals lacking health insurance are being turned away. A recent Robert Wood Johnson report documented that in 1982 over 1 million families were refused care because of a presumed inability to pay. The problem of refusal of care is faced by many of those described above. This refusal can take the form of several new practices which are increasing in frequency in this country. They include: patient dumping, preadmission deposits, and the actual reduction of certain services by hospitals.

PATIENT DUMPING

Patient dumping is the practice of transferring a person in need of emergency services from one hospital to another because of the inability to pay. It is frequently from a private or proprietary hospital to a public teaching hospital. To demonstrate the burden faced by many of these public hospitals, the public hospitals accounted for only 22 percent of hospital charges in 1984, and yet delivered 40 percent of the uncompensated care in this country. In Florida, for-profit hospitals make up nearly 50 percent of hospitals, yet accounted for only 4.2 percent of State's care for the poor. The problem is further illustrated by the testimony of Dr. Gordon Schiff, a physician from Cook County Hospital, who stated before the Senate Special Committee on Aging, that the number of inpatient economic transfers had increased 500 percent since 1979. This same story is told from State to State across this country. "Sixty Minutes," CBS news magazine program, recently broadcasted a segment entitled the "Billfold Biopsy" which documented the problem of patient dumping at Parklawn Hospital in Dallas.

PREADMISSION DEPOSITS

The practice of requiring preadmission deposits from uninsured individuals is becoming commonplace in many parts of this country. The deposit can range from anywhere from a few hundred to a few thousand dollars. If the deposit is not available, the patient is told he or she will have to look elsewhere for care. There are numerous reported cases where women in labor, or persons in need of surgery were told to seek care elsewhere.

REDUCTION OF SERVICES BECAUSE OF UNCOMPENSATED CARE

As the burden of charity care increases and is placed increasingly upon the shoulders of the public and teaching hospitals, the ability of these hospitals to deliver such care is becoming increasingly difficult. The uncompensated care incurred by hospitals in 1982, was $6.2 billion, an increase of 27 percent since 1978. Many hospitals, faced with financial instability, may have to eliminate services which account for a large portion of uncompensated care including obstetrical and maternity care, neonatal intensive care, and outpatient ambulatory services. Once these services are eliminated at the public hospitals, where will these families go for care? For these reasons, Representative STARK and Senator KENNEDY should be commended of their efforts to put severe restrictions for patient dumping in their new health initiative. In addition, the legislation I am introducing today, Health Care for the Uninsured Act of 1985, will address this serious problem from a different perspective.

INCREASING INFANT MORTALITY

It seems inconsistent that a nation that spends over $1 billion a day on health care, and has the most advanced medical technology in the world, should have so many millions of individuals who lack basic access to these vital services. The impact of these discrepancies is becoming increasingly evident in the health of our Nation.

The infant mortality rate has long been used by nations as a gauge of the health of a society. In 1950, the United States ranked fifth as compared to other industrialized countries. In 1982, we had dropped to 17th. In addition, there are numerous reports of the infant mortality rate actually starting to increase in certain urban centers including Detroit, Boston, and the District of Columbia. Despite the continued improvement for white children, it appears that we will not meet the goals set for 1990 by the U.S. Public Health Services for infant mortality of minority children. Undoubtedly, the reasons are complex, But certainly two of the reasons must be the recent reduction of health care services for those in need and a health environment which turns people away when they are most in need of services.

HEALTH CARE FOR THE UNINSURED ACT OF 1985, SUMMARY OF PROVISIONS

INTENT AND PURPOSE

The purpose of S. 1781, is to utilize the existing health care delivery system to provide access to health care services for those who are unable to afford care under the current health care environment. By the use of a pooling mechanism, an attempt will be made to address the two serious problems described above which includes:

First, providing health care to any eligible uninsured individual in each State, and to, second; provide a mechanism of cost sharing among hospitals for reimbursement of a portion of the uncompensated care now being delivered.

By addressing both of these interrelated problems, we are attempting to reduce substantially the uninsured population in this country—which itself will reduce the burden on many hospitals—and to address directly the problem of charity care faced by many hospitals today.

IMPLEMENTATION

The bill is designed to involve no new Federal expenditures and to allow the States a high degree of flexibility in the design and implementation of the program. The bill allows for three methods to fulfill the intent of the legislation.

First, if a State has enacted a program, or is in the process of drafting legislation which will address these problems on a statewide basis, a waiver provision is provided which will allow the State to continue with its current plans.

Second, if a State has nc plan, S. 1781 provides a model State health care pool, which defines who is eligible, a minimum benefits package, financing mechanisms of the pool, and the various cost-sharing components.

Third, finally, if the State fails to implement either of the previous two provisions, the Federal Government will institute the State health care pool and monitor its progress.

THE MODEL STATE HEALTH CARE POOL

As previously mentioned, the State health care pool will provide health care services to the uninsured through a health care program, and reimburse hospitals for a portion of their uncompensated care in a manner proportional to the amount of uncompensated care they deliver. The pool will be financed from a variety of revenue sources so as to help maintain the solvency of the pool. These include:

First, existing and perhaps new funding by State, counties, and local municipalities.

Second, premiums from those who utilize the health care program portion of the pool. These individuals will

pay the premium on a sliding scale based on their ability to pay.

Third, a tax on the net operating revenues of the hospitals in the State, exempting certain hospitals based on the amount of care which is delivered to low-income individuals in the State—composite of Medicaid and uncompensated care. Those hospitals which are currently providing care for individuals who are unable to pay at twice the State average will be exempt. In addition, 30 percent of the funds from the health care pool will be returned to all hospitals in a manner proportional to the amount of uncompensated care which is delivered.

The other major provisions of S. 1781, includes provisions for enrollment, needs assessment, and outreach, additional cost sharing, and the care for those with a pre-existing condition. These will be further clarified in the section-by-section analysis of the bill to follow and with the text of the bill itself.

Mr. President, I introduce S. 1781, not as the ultimate answer to the problem of uninsuredness in this country, but as the starting point in a national debate on the issue. We must begin to address this very serious problem, and I urge all my colleagues to join in their support and cosponsorship for this bill.

Mr. President, I also request, that the section-by-section analysis and that the bill itself be included in the RECORD at this point. I also request that the text of several newspaper articles and the transcript of the "Sixty Minutes" segment also be included for they elucidate in greater depth and in more detail the plight presently faced many millions of Americans.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1781

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Health Care for the Uninsured Act of 1985".

SEC. 2. STATE PROGRAMS.

(a) IN GENERAL.—

(1) STATE POOLS.—Each State may establish a program pursuant to this section which provides for a health care pool to make health care available to any eligible uninsured individual in the State, and which provides for cost sharing among hospitals for uncompensated care provided by hospitals in the State.

(2) FEDERAL ALTERNATIVE.—If a State does not establish a program pursuant to this section, the Federal program established pursuant to section 5 shall apply in such State, and the tax imposed pursuant to section 4285 of the Internal Revenue Code of 1954 shall apply to hospitals in such State.

(b) STATE PROGRAM REQUIREMENTS.—

(1) IN GENERAL.—A State program meets the requirements of this section if such program—

(A) establishes and maintains a health care pool which meets the requirements of subsection (c);

(B) is approved by the Secretary of Health and Human Services (hereinafter referred to in this Act as the "Secretary"); and

(C) provides such information to the Secretary as the Secretary may require in order to evaluate the State program.

(2) WAIVER AUTHORITY.—The Secretary may waive the requirements of this section and approve a State program if the Secretary determines that such program substantially provides the same results, with respect to uninsured individuals and hospitals which provide uncompensated care, as would the program specified in this section.

(c) STATE HEALTH CARE POOL.—A State health care pool is an entity established under State law for the purposes of—

(1) providing health care, through insurance or otherwise, to all uninsured individuals residing in the State; and

(2) sharing among all hospitals in the State the costs of uncompensated care provided by any such hospital.

(d) POOL FINANCING.—The State shall ensure the solvency of the health care pool through any combination of—

(1) premiums collected pursuant to section 3(d), but subject to the limitations contained in such section;

(2) revenues from the hospital tax required under section 4(b), but subject to the limitations contained in such section; and

(3) funds provided by the State or political subdivisions thereof.

SEC. 3. HEALTH CARE PROGRAM.

(a) IN GENERAL.—The State health care pool shall provide health care, through insurance or otherwise, to all uninsured individuals (as defined in subsection (b)) residing in the State.

(b) UNINSURED INDIVIDUAL.—For purposes of this section, an uninsured individual is any individual who—

(1) is not eligible to be covered under any employment-based health plan (provided by insurance or otherwise) by reason of his own employment or the employment of his spouse or parent, including any post-employment extended eligibility provided at the same rate and with the same employer cost sharing as are provided to employees; and

(2) is not eligible for the Medicare program under title XVIII of the Social Security Act or for medical assistance under a State Medicaid plan approved under title XIX of such Act.

(c) REQUIRED BENEFITS.—

(1) IN GENERAL.—The health care pool must provide for a program which provides, either through insurance or otherwise, including (but not limited to) the use of health maintenance organizations or State-established preferred provider arrangements, at least the following benefits:

(A) Inpatient hospital services.

(B) Emergency outpatient hospital services.

(C) Routine and emergency physician services (including those provided in health clinics).

(D) Prenatal, delivery, and post partum care.

(E) Laboratory and diagnostic x-ray services.

(F) X-ray, radium, and radioactive isotope therapy.

(G) Services of a nurse midwife, described in section 1905(a)(17) of the Social Security Act.

(H) Home health services in cases where the State determines that the coverage of such services is cost effective.

(I) Drugs or biologicals provided as part of inpatient hospital services.

(2) AMOUNT, DURATION, AND SCOPE.—The State shall determine the amount, duration, and scope of the covered services described in paragraph (1) which shall be included under the program, but in no event shall the amount, duration, or scope of such services under the program under this section be less than the amount, duration, or scope of such services included under the State Medicaid plan for medical assistance for individuals described in section 1902(a)(10)(A) of the Social Security Act.

(d) PREMIUMS.—

(1) COLLECTION OF PREMIUMS.—Each uninsured individual who wishes to secure health care through the health care pool shall pay a premium for such coverage determined in accordance with paragraph (2).

(2) AMOUNT OF PREMIUM.—(A) The amount of the premium shall be determined on a sliding scale based upon the individual's family income as follows:

(i) In the case of an individual whose family income equals or exceeds 200 percent of the official poverty line for a family of that size (established by the Office of Management and Budget), the premium shall be equal to 120 percent of the actuarial value of the group benefit package provided.

(ii) In the case of an individual whose family income is below 100 percent of such poverty line, the premium shall be a nominal amount, or there shall be no premium.

(iii) In the case of an individual whose family income equals or exceeds 100 percent of such poverty line, but is less than 200 percent of such poverty line, the premiums shall be set based upon a sliding scale between the two premium amounts established under clauses (i) and (ii), but may not exceed 100 percent of the actuarial value of the group benefit package provided.

(B) For purposes of determining family income, the State shall require certification and periodic recertification in the same manner as is required under the State's program of aid to families with dependent children under part A of title IV of the Social Security Act, but in no case may recertification be required more often than on a quarterly basis.

(C) The Secretary shall establish a uniform definition of family income which shall apply to all States. Such definition shall be consistent with the definition used by the Office of Management and Budget for purposes of establishing the poverty line referred to in subparagraph (A).

(e) DEDUCTIBLES AND COINSURANCE.—The State may require that deductibles and coinsurance amounts be imposed for users of services under the program. If the State chooses to require such deductibles and coinsurance amounts, the combined value of the deductibles and coinsurance may not exceed 8 percent of the actuarial value of the benefit package provided.

(f) OPEN ENROLLMENT.—The health care pool shall provide for open enrollment in the program of health care, upon giving 30 days notice of the intent to enroll or disenroll.

(g) PREEXISTING CONDITIONS.—Coverage under the program may not be limited or denied by reason of any preexisting illness or medical condition.

(h) NEEDS ASSESSMENT AND OUTREACH PROGRAM.—The State shall conduct an ongoing program to—

(1) assess the need within the State for health care provided through the health care pool; and

(2) notify individuals who may be eligible for health care through the pool of the existence of such care and how to obtain such care.

SEC. 4. UNCOMPENSATED HOSPITAL CARE.

(a) IN GENERAL.—A State health care pool shall provide for sharing among all hospitals in the State of the costs of uncompensated care provided by any hospital in such State.

(b) TAX ON HOSPITAL REVENUES.—In order to comply with the requirements of section 2, the State law must require (except as otherwise provided in section 2(b)(2)) that each hospital in the State be subject to a tax on the operating net revenue of such hospital, the proceeds from which shall be used by the health care pool. Not less than 30 percent of such proceeds must be used to compensate hospitals in the State, in proportion to the amount of otherwise uncompensated care provided by each hospital.

(c) UNCOMPENSATED CARE.—For purposes of this section, uncompensated care is charity care, and other care provided by a hospital for which a bill is presented, but payment for which is not made within 6 months, after all reasonable efforts at collection have been made from the patient and from any third party which may be liable for such payment.

(d) HOSPITALS SUBJECT TO POOL AND TAX REQUIREMENTS.—(1) For purposes of this section, all hospitals located in the State shall be subject to participation in the health care pool and to the tax imposed pursuant to subsection (b), except hospitals operated by the Federal Government, psychiatric hospitals, and rehabilitation hospitals.

(2) For purposes of this section, a hospital shall be exempt from the tax imposed pursuant to subsection (b) for any taxable year if such hospital is—

(A) providing uncompensated care at a rate equal to or greater than 200 percent of the State average (as determined by the State for the most recent taxable year for which data is available); and

(B) providing care to individuals eligible for medical assistance under the State's plan approved under title XIX of the Social Security Act at a rate equal to or greater than 200 percent of the State average (as determined by the State for the most recent taxable year for which data is available).

SEC. 5. FEDERAL PROGRAM.

(a) SECRETARY SHALL ESTABLISH PROGRAM.—The Secretary of Health and Human Services shall establish a health care pool for any State which does not have in effect a State program approved pursuant to section 2(b) of this Act. Except as otherwise provided in this section, the Secretary shall operate such program in the same manner as the States are required to operate State programs under section 2.

(b) FINANCING OF PROGRAM.—

(1) IN GENERAL.—The Federal program in effect in any State pursuant to this section shall be financed by the hospital tax collected from hospitals in such State under section 4285 of the Internal Revenue Code of 1954, and from premiums collected. Not less than 30 percent of the proceeds from tax collected in any State must be used to compensate hospitals in such State for otherwise uncompensated care, in the same manner as is required under section 4, with payments to hospitals being made not less frequently than quarterly. If, after providing for a health care program and compensating all hospitals in the State for all otherwise uncompensated care, any amounts remain in the State's special account (established under paragraph (2)), such amounts shall be refunded to the hospitals in such State, in proportion to the amount of such tax paid by each hospital.

(2) SPECIAL ACCOUNTS.—(A) The Secretary of the Treasury shall establish a special account in the Treasury for each State for which the Secretary of Health and Human Services has established a program under this section. Such account shall be used to operate the health care pool established by the Secretary for such State.

(B) There are hereby appropriated into each such account—

(i) amounts equivalent to the taxes received in the Treasury under section 4285 of the Internal Revenue Code of 1954 from hospitals located in such State, and

(11) amounts collected by the Secretary of Health and Human Services as premiums from individuals enrolled in the health care program established through the health care pool in such State.

(C) The amounts appropriated by subparagraph (B) shall be transferred from time to time (but not less frequently than quarterly) from the general fund of the Treasury on the basis of estimates made by the Secretary of the Treasury. Proper adjustments shall be made in the amounts subsequently transferred to the extent prior estimates were in excess of or less than the amounts required to be transferred.

(c) EXCISE TAX ON HOSPITAL SERVICES.—

(1) IN GENERAL.—Chapter 33 of subtitle D of the Internal Revenue Code of 1954 (relating to miscellaneous excise taxes) is amended by inserting after subchapter C the following new subchapter:

"SUBCHAPTER D—HOSPITAL SERVICES

"Sec. 4285. Imposition of tax.
"Sec. 4286. Definitions.
"Sec. 4287. Time for filing return; estimated tax payments.

"SEC. 4285. IMPOSITION OF TAX.

"(a) TAX IMPOSED.—There is hereby imposed on hospital services a tax equal to 3 percent of the net hospital charges for the taxable year of any hospital which is located in a State and is not subject to a program of such State approved under section 2 of the Health Care for the Uninsured Act of 1985.

"(b) PAYMENT OF TAX.—The tax imposed by this section shall be paid by the hospital.

"SEC. 4286. DEFINITIONS.

"For purposes of this subchapter—

"(1) NET HOSPITAL CHARGES.—The term 'net hospital charges' means the excess (if any) of—

"(A) the hospital charges of the hospital for such taxable year, over

"(B) the hospital charge reductions of the hospital for such taxable year.

"(2) HOSPITAL CHARGES.—The term 'hospital charges' means the amount imposed by the hospital for hospital services, ambulatory services, and ancillary services.

"(3) HOSPITAL CHARGE REDUCTIONS.—The term 'hospital charge reductions' means the amount which equals—

"(A) uncollectable hospital charges, including bad debts,

"(B) the value of uncompensated care, and

"(C) contractual adjustments and discounts.

"(4) HOSPITAL.—The term 'hospital' shall not include—

"(A) any hospital operated by the Federal Government,

"(B) any psychiatric hospital,

"(C) any rehabilitation hospital, or

"(D) any hospital which is—

"(i) providing uncompensated care (as defined in section 4 of the Health Care for the Uninsured Act of 1985) at a rate equal to or greater than 200 percent of the State average (as determined by the Secretary of Health and Human Services for the most recent taxable year for which data is available); and

"(ii) providing care to individuals eligible for medical assistance under the State's plan approved under title XIX of the Social Security Act at a rate equal to or greater than 200 percent of the State average (as determined by the Secretary of Health and Human Services for the most recent taxable year for which data is available).

"SEC. 4287. TIME FOR FILING RETURN; ESTIMATED TAX PAYMENTS.

"(a) TIME FOR FILING RETURN.—

"(1) IN GENERAL.—Each hospital on which a tax is imposed by section 4285 for any taxable year shall file a return of such tax no later than the time for filing the return of tax imposed by chapter 1 for such taxable year.

"(2) TAXABLE YEAR.—For purposes of this chapter, the taxable year of any hospital shall be—

"(A) such hospital's taxable year for purposes of chapter 1, or

"(B) if there is no taxable year for purposes of chapter 1, the calendar year.

"(b) ESTIMATED TAX PAYMENTS.—For purposes of sections 6154 and 6655, any tax imposed by section 4285 shall be treated as a tax imposed by section 11.".

(2) CONFORMING AMENDMENT.—The table of subchapters for chapter 33 of such Code is amended by inserting after the item relating to subchapter C the following new item:

"SUBCHAPTER D—HOSPITAL SERVICES.".

SEC. 6. EFFECTIVE DATES.

(a) IN GENERAL.—(1) Except as otherwise provided in paragraph (2), this Act shall become effective on the first day of the nineteenth month beginning after the date of the enactment of this Act.

(2) The Secretary of Health and Human Services may delay for up to 12 months the effective date of this Act with respect to any State if the Secretary determines that such State requires extra time to comply with the requirements of this Act due to existing contracts, the schedule of the State legislature, or other factors which the Secretary determines make compliance within 18 months impossible.

(b) HOSPITAL TAX.—The tax imposed by section 4285 of the Internal Revenue Code of 1954 shall apply to taxable years ending in or after the first month for which the provisions of this Act apply to the State in which the hospital is located, but only with respect to revenues received in or after such first month.

HEALTH CARE FOR THE UNINSURED ACT OF 1985 SECTION BY SECTION ANALYSIS

The purpose of this bill is to utilize the existing health care delivery system to provide access to health care services for those who are currently unable to afford care under current reimbursement mechanisms. This is accomplished by the creation of insurance pools which would make health care available based on the ability to pay. It would also reimburse hospitals for a portion of their uncompensated care.

SECTION 1

Section 1, provides for the short title of the bill, which is the "Health Care for the Uninsured Act of 1985".

SECTION 2

Section 2, mandates that a mechanism be established within each state to address the health care needs of the uninsured individuals in a state, and the uncompensated care incurred by hospitals for treating this uninsured population. The bill then allows three approaches to address these problems.

1. The first approach would require the establishment of a "State Health Care Pool", which when implemented will accomplish the two stated objectives of this legislation.

2. If a state does not establish the program or receive a waiver by the Secretary of Health and Human Services (HHS), the model "State Health Care Pool", will be implemented at the Federal level.

3. The bill grants the Secretary of HHS the authority to grant a waiver to a state, if the Secretary determines that an independently formulated state plan will provide similar results as the model "State Health Care Pool". Such a program must be approved by the Secretary and the states must provide sufficient information to the Secretary to asset in such approval.

The section then outlines the operating and financing mechanisms for the "State Health Care Pool". The "State Health Care Pool", must provide health care, through insurance or otherwise and contribute to the cost of uncompensated care incurred by hospitals. To maintain its solvency, this section delineates the revenue sources including:

1. Funding by State, counties, and municipalities,

2. Premiums from those accessing the "Health Care Program" portion of the of pool,

3. Revenues from a tax on the operating net revenues of the hospitals in a state.

Section 3, outlines the provisions of the "Health Care Program", portion of the model "State Health Care Pool." It describes the uninsured population to be served, the collection of premiums, deductibles, and coinsurances, the minimum benefit package, and a needs assessment and outreach provision.

Uninsuredness

The uninsured population, is defined and includes those individuals and their families who are not eligible for an employment-based health care plan, and those who are not eligible for either Medicaid or Medicare.

Minimum benefit package

The minimum benefit package in the "Health Care Program", could be delivered through a variety of health care delivery systems including but not limited to traditional insurance coverage, Health Maintenance Organizations (HMO's), and Preferred Provider Organizations (PPO's).

The benefits must include Inpatient hospital services; emergency outpatient services; physician services; perinatal services; Laboratory and diagnostic X-ray services; nurse midwife services; home health care services; and inpatient drugs.

Premiums

The premium payments of each person who would seek health care coverage through the pool, will be determined on the basis of a family's financial status.

1. Those individuals with family incomes below the Federal Poverty threshold would pay no premium or a nominal premium.

2. Those individuals with family incomes greater than 200 percent of poverty, would be required to pay a premium equal to 120% of the actuarial value of the group benefit package being offered.

3. Those individuals with income between 100 and 200 percent of the poverty level, would pay a premium on a sliding scale between the two payment levels described above, but no more than 100% of the actuarial value of the group benefit package.

Deductibles and coinsurance

The State may require the deductibles and coinsurance be imposed for users of the "Health Care Program", and if implemented must not exceed 8 percent of the actuarial value of the benefit package.

Enrollment

The bill requires an open enrollment within 30 days as part of the "Health Care Pregram."

Pre-existing conditions

The bill prohibits the denial of coverage or the limitation of benefits due to a pre-existing medical condition.

Needs assessment and outreach

Finally, the bill requires that the state conduct a needs assessment to determine the extent of their uninsured population, and that they conduct an ongoing outreach program to notify those individuals who may be eligible for entrance into the program.

SECTION 4

This section creates a mechanism for both raising revenues and reimbursing hospitals in a proportional manner for the amount of uncompensated care that is being delivered. Hospitals already providing a disproportionate share of charity would be exempt from any new revenue burdens. The exemption for disproportionate share hospitals would be determined by excluding those hospitals serving two times the state average of both Medicaid and uncompensated care patients.

With regard to returning these funds to the hospitals, the provision provides that a minimum of 30 percent of the hospital revenues collected will be used for the reimbursement of hospitals. Uncompensated care is defined as charity care and/or other care for which a bill is presented and for which no payment is received within 6 months.

SECTION 5

This section outlines the mechanism that the Secretary of HHS will use to implement the "State Health Care Pool", at the Federal level is the state fails to do so. It includes the following:

1. the establishment of a special account in the Treasury for each state to be utilized in the carrying out of the provisions of this bill,

2. the imposition of a 3% net hospital revenue tax, to assist in the financing of the pool, along with the premiums, deductibles and coinsurances previously discussed,

3. a provision that once the pool is solvent, and all uncompensated care has been reimbursed, the remaining revenues from the hospital tax will be reimbursed to the hospitals in proportion to the amount of tax originally collected.

SECTION 6

This section provides for the effective dates of the legislation beginning on the nineteenth month after the date of enactment. In addition, for states unable to respond to the new requirements under this legislation within an eighteen month period, the Secretary may delay implementation of this act for an additional 12 months.

[60 Minutes—Sunday, March 17, 1985]

"THE BILLFOLD BIOPSY"

MIKE WALLACE. Twenty-five years ago, the comedy team of Elaine May and Mike Nichols did a television sketch about "The Billfold Biopsy." What can happen when a patient in pain arrives at a hospital emergency room.

MAN (Mike Nichols). Nurse!

WOMAN (Elaine May). Hello.

MAN. Is—is this the emergency desk?

WOMAN (affirmative). Uh-huh.

MAN. I—I—I was in an auto accident. I've broken my arm and they said this was the nearest hospital; you'd take care of me.

WOMAN. OK. And, um, do you have any hospital insurance?

MAN. Yes; I have Blue Cross.

WOMAN. Can I see your Blue Cross card?

[Audience laughing.]

MAN. I—I don't have it with me.

WOMAN. You don't have your Blue Cross card?

MAN. No; you see, Nurse, when I left the house, I didn't know I was gonna have an accident. [Laughter.]

WOMAN. Well, I mean, do you have any cash?

MAN. Yeah, I have about $5.

WOMAN. Oh, well, that's not enough. [Laughter.]

MAN. Miss, I'll pay you in the morning.

WOMAN. Oh, well, I—we—this is a private hospital. We can't do that, sir. I mean, that's against hospital regulations.

WALLCE: Twenty-five years later, the billfold biopsy is still the first test that most folks are given when they go to a hospital. Do they have medical insurance? Well, 35 million Americans will answer no, that they are not covered by Medicaid or Medicare and have no private health insurance.

Why? They're not eligible. They've lost their jobs. They have jobs that don't provide medical insurance and they can't afford to buy it on their own. They are the working poor, too rich for Medicaid, too young for Medicare. What happens when they need hospital care? Come with us to Dallas, Texas.

These are some of the more than 65 private hospitals that serve the Dallas-Fort Worth area. Have an accident or an unexpected illness, and you'll probably be taken to one of their emergency rooms. But then, fail the billfold biopsy, and you'll probably be sent here, the emergency room at Parkland Hospital in Dallas, Texas, where President Kennedy was brought back in 1963. This emergency room still receives the hurt and the sick, but today hundreds of them are brought here, some say dumped here, by other hospitals in the area because those patients have no money and no medical insurance.

They come by ambulance, and they come by private car. Some show up in taxis or on foot. They arrive critically ill and in pain, burn victims, women in the middle of labor, persons near death from drug overdoses.

WOMAN: Twenty-seven year old female, an OD on heroin, has no work, no insurance.

WALLACE. Accident casualties like young Julie Mayfield, 26-years-old, a part-time actress with no insurance. She's lucky she survived this car wreck at all. She did and was taken to the closest hospital, Dallas-Fort Worth Medical Center, a private hospital.

And, why didn't you stay there?

JULIE MAYFIELD. Well, because I didn't have any insurance.

WALLACE. How about your family?

MAYFIELD. I'm 26. So, I'm no longer, you know, a dependent.

WALLACE. And Julie and her family were told her hospital stay would run into five figures at least.

MAYFIELD. For setting—putting a rod in my leg, and for getting me up on my feet and walking.

WALLACE. Julie Mayfield had a concussion, a lacerated jaw, a broken hand, and a broken thigh, but no money and no insurance. So, she was transported from this private hospital in the Dallas suburbs, 20 miles, to the public Parkland Hospital.

MAYFIELD. Every time they moved me my bones, which normally are like this, were broken like this, and they would move. You know, they would move me from——

WALLACE. Oh, my!

MAYFIELD. An accident trolley car, you know, an ambulance trolley to a bed, to another bed. Well, every time they did, I passed out, it hurt so bad. It was—I've never felt that kind of pain before. And that was the worst part of switching hospitals.

WALLACE. Dan Nielsen runs the Dallas-Fort Worth Medical Center, and he lays it on the line, the hospital business is now big business.

DAN NIELSEN. As our business, the health care business, becomes more of a true large corporate business, there is more emphasis on who is going to pay, who will pay, who cannot pay.

WALLACE. Julie Mayfield is just one of more than 150 people who are transferred to Parkland Hospital every month. Word that they are about to arrive comes over the Parkland hotline.

[Phone ringing.]

WOMAN. Parkland hotline, this is Barbara.

WALLACE. The hotline is designed to give Parkland's emergency staff some warning that a legitimate medical transfer needs to be made. But hospitals in the area use the hotline primarily for economic reasons, to warn Parkland that another uninsured patient is on his way. You will hear some remarkable candor in these conversations among doctors, nurses, and administrators, and lots of talk about money.

First, the Dallas-Fort Worth Medical Center is on the line to Parkland. One of their doctors wants to transfer a heart patient.

MAN. This lady has diagnosive heart failure, and she's in ICU now, and we need to transfer her over.

MAN. Not so quickly, you don't. First of all you have to tell me a little bit about her.

MAN. What do you mean, not so quickly?

MAN. Well, I mean, I'm not going to take an unstable patient basically.

MAN. Then I won't send anybody who's not stable, you got it?

MAN. OK.

MAN [speaking Spanish]. Listen to me for a minute now, don't give me all that crap. She does not have any insurance. The hospital does not want to take care of her. OK.

MAN. Yeah.

MAN. This is private, capitalistic money-making hopital. They're on my back to have her transferred.

Dr. RON ANDERSON. This hospital's policies are not different than any of the other policies that I'm aware of in the metropolitan area with regard to the care of indigent care, indigent folks. We are not in the business of caring for large numbers of people who do not have the ability to pay. We do not have the money to do that.

WALLACE. Dr. Ron Anderson runs Parkland Hospital, a public hospital supported mostly by tax money. He fought for that hotline, and he still gets angry at the condition in which sick people are sometimes dumped at his emergency room.

Dr. ANDERSON. The person's on a ventilator, the person has what we call pressors to keep your blood pressure up on a IV drip.

WALLACE. So, the other hospital, the other doctor is simply lying to you about the condition of the patient?

Dr. ANDERSON. One of the classic ones was when our resident called back and said, "We don't have an intensive care bed, doctor, that's why I didn't want to take the transfer, and you didn't tell me this patient was so ill. You told me that he didn't need intensive care, what possessed you to do that?" And he said, "I forgot, I forgot."

MAN. We got a pretty nasty little case, a gentleman about 50-ish, unemployed who——

MAN. Yeah.

MAN.—Fell. He's got a compound fractured hand. I think that you and Larry will have a lot of fun.

MAN. Oh, boy! They want to transfer an open tib fib in a 59-year-old here. It can be taken care of by another hospital. What it is is a poor person with an open fracture that they dump on us. That's what it's all about.

WALLACE. In that hotline conversation between a doctor at this for-profit hospital, Charter Suburban, and the folks at Parkland, they were talking about a 59-year-old grandfather, Ward McDonald. McDonald had health insurance until 2 years ago when he lost his job and with it his insurance. His age and his high blood pressure made it virtually impossible for him to get any insurance on his own. Then he fell off a roof and nearly severed his foot. Ward McDonald was taken to the nearest hospital, a very sick man. His wife Bernice was called immediately.

BERNICE MCDONALD. He was having chest pains awful badly, and they was afraid that he was going to have a cardiac arrest.

WALLACE. The McDonalds were concerned about the injury, but they also became concerned about who would pay and how.

WARD MCDONALD. I was very worried about it 'cause I—and at my foot, and seeing how badly it was broken, I was afraid it was going to run into quite a bit of money.

BERNICE MCDONALD. Well, first thing I was asked, if we had medical insurance. I thought it was very, very cold now. I don't know if that's the right word or not, but that's the way I felt. I mean, his—his life wasn't important, but it is to me.

WALLACE. John Templeton runs the hospital that shipped Ward McDonald to Parkland.

JOHN TEMPLETON. Our first attempt when a next of kin arrives, of course, is to find who will be responsible, so we can talk responsibly with them——

WALLACE. Sure.

TEMPLETON.—About financial arrangements. And in doing so, if it comes off cold and harsh, I can only apologize. These are awful times to be talking about finances.

WALLACE. Dr. Jesse Doyle is head of the emergency room at Charter Suburban. He was there the day Ward McDonald was brought in. He used to be a resident at Parkland Hospital.

Dr. JESSE DOYLE. And when you're a resident over there, and you haven't had, you've been up all night on call, you don't ever like to hear that you're getting three or four transfers during the middle of the night, but——

WALLACE. And the transfers are?

Dr. DOYLE.—I think, I think most of them are appropriate, and they—I think the system is fine the way it is.

WALLACE. So, Ward McDonald was transported from this private for-profit hospital 30 miles and 45 minutes to Parkland.

BERNICE MCDONALD. As soon as they got him out here, the ambulance driver came up to me and asked for their money, or what the fee was. If I would pay it immediately, it would be $75. If I waited until the next day, it would be $105.

WARD MCDONALD. And it was pretty rough to start with, and then the ambulance driver missed his turn coming over to Parkland, and they came through downtown, and hit a bunch of those rough streets down there, and my leg got to bouncing up and down in that ambulance. And I was afraid I was going to pass out then.

WALLACE. Mrs. McDonald borrowed some money from her son, and she payed up that day. A few weeks later the McDonalds received a bill for almost $900 from Charter Suburban Hospital for the care he received there. McDonald doesn't know how he's going to pay it. The taxpayers will end up paying for his care at Parkland. His bill there is now more than $18,000.

Isn't there a certain callousness about this whole business? I mean, for one hospital to say, well, this fellow, this woman cannot afford this; therefore, send him or her over to Parkland? It—it doesn't seem somehow to square with the Hippocratic oath.

Dr. ANDERSON. Well, the Hippocratic oath is sometimes in conflict with corporate policy.

WALLACE. Corporate policy that Dr. Anderson says forces more and more hospitals faced with rising costs and falling revenues to think of money before medicine.

Dr. ANDERSON. They're taking what is a businesslike, rational approach, which scares the hell out of me because medicine is not just business; it's caring for people. We got to be businesslike, but those ward rooms are a long way from my emergency room.

WALLACE. Karen Cawley works for Dr. Anderson. She's Parkland's vice president for emergency services. She, or a member of her staff, must approve every hotline transfer to Parkland hospital.

On the hotline, I've heard you get into little fracases——

KAREN CAWLEY. Yes.

WALLACE.—With doctors from other hospitals. They want to send them over, and you're suspicious that they're sending them over not for medical reasons, but purely for money reasons.

CAWLEY. Right, that's true. Tensions do run high at times.

WALLACE. And—and what do doctors say to you?

CAWLEY. They're very honest. They're very upfront. They will say——

MAN. Hey, we're not talking about ethical grounds. We're talking about a lady that needs something done, that doesn't have the money to do it with. I am dead serious, sweetheart. We have had no end of problem at Irving Community Hospital with Parkland Hospital in the last 6 months regarding perfectly legitimate transfers. That's what your damned hospital is there for. That's what I pay my taxes for.

WALLACE. Forget the—the physical health of a patient, what does it do to the mental health of the patient and his family when he or she is shipped around from hospital to hospital, transferred, dumped?

Dr. ANDERSON. I happened to be in a motor accident at one point where I had insurance, and the other fellow didn't have insurance when I was just a teenager, and they transferred him. And I remember trying to tell them that I would pay the bill because I thought he was unstable. And I remember feeling that somehow he wasn't worth as much as I happened to be because I had a Blue Cross card in my pocket.

WALLACE. Meet Billy Petty and his 6-year-old daughter Jennifer. Jennifer had no Blue Cross card or any other insurance. She is one of millions of children not covered by health insurance. Because of that, they were turned away from this neighborhood medical center, told to get in their car and go to Parkland. The doctor never alerted Parkland they were on their way. Jennifer Petty arrived in what the hospital described as rather critical condition, in a state of impending shock. The doctor who had sent Jennifer on her way didn't want to talk to us, but her father did at Parkland.

BILLY PETTY. She was dehydrating, but I didn't have no insurance. So, they told me I had to carry her to Parkland.

WALLACE. And did he offer to call Parkland for you—

PETTY [negative]. Uh-uh.

WALLACE.—Or say that he was going to call on the hotline or anything like that? Just said, "Go on."

PETTY. They need to go put her in the hospital. So, I brought her over here.

WALLACE. And he didn't charge you anything?

PETTY [negative]. Uh-uh.

WALLACE. Jennifer Petty was placed in immediate isolation suffering from meningitis. She was hospitalized for 8 days.

I see that she's in bed there now, and how is she doing?

PETTY. She's doing pretty good since they gave her some medicine.

WALLACE. Good luck.

PETTY. OK, I need it.

WALLACE. Jack Ayres gets especially angry when children are involved. He is a lawyer and a certified paramedic who teaches medical legal issues to medical students, and to Parkland's staff.

Let me play devil's advocate. I mean, I—I'm running a hospital. I got to stay alive.

JACK AYRES. There's absolutely nothing wrong with a proprietary hospital saying that we do not electively treat people who don't have insurance or money. That's a different animal than the person that holds themselves out to the public as having a 24-hour emergency department, lures the public into the hospital upon the expectation that emergency care is available, and then tries to discriminate in providing that care because of the patient's ability to pay.

WALLACE. Private hospitals insist they render that emergency care by stabilizing the patient before they transfer him. But most of them will admit that the dumping of the uninsured is not only a Dallas phenomenon, but a nationwide problem.

Dallas. "Money, cause of care refusal." South Carolina. "Hospital turns girl away because family can't pay." Washington, D.C. "Hospitals refusing to admit poor." Across the nation, people without insurance have become part of the dumping dilemma.

And only, only for the reason that they don't have some kind of insurance?

Dr. ANDERSON. That's true.

WALLACE. Money.

Dr. ANDERSON. I think, yeah, it is. We thought maybe it was ethnic. We looked at this in our own data, nearly 2,000 transfers, and it does turn out that many of these patients are Hispanic, black, Southeast Asian, but as you really look, everything that ties them together is the lack of green. They don't have money.

BERNICE MCDONALD. You kind of try to plan your life, and you feel like you got it made, and then one day it's there, the next day it's not. Your props are all knocked out from under you.

"BROTHERS KEEPER"

ED BRADLEY. Two brothers. One has lived the American Dream—star athlete, scholar, professor, writer. The other, the younger of the two, has lived the American nightmare; he's in prison, sentenced to life without parole. "Brothers and Keepers" is the name of the book written by one of them based on conversations and letters with the other. The book is a plea to give his brother another chance.

[From American Medical News, Aug. 9, 1985]

IN FIRST QUARTER OF 1985—HOSPITALS SCORE RECORD PROFITS UNDER DRG'S

(By Doug Lefton)

Hospitals racked up record profits in the first quarter of this year, according to data released by the American Hospital Assn. (AHA) during its annual convention in Chicago.

The data showed that profits for the hospital industry as a whole rose to $2.8 billion in the first quarter—a 22% increase over the first quarter of 1984.

"We've never had operating margins like this that I can remember," acknowledged Alex McMahon, AHA president, in an interview.

While the hospital industry as a whole fared extremely well, 18% of all hospitals are running in the red, according to the data, published in *Economic Trends*, an AHA quarterly report on hospital statistics.

That figure prompted Donald Wegmiller, who was named the AHA's chairman-elect during the group's meeting, to predict that many of the nation's hospitals would close in the next few years.

"It wouldn't surprise me if half of the 18% closed over the next few years," he said. That would mean that more than 500 of the nation's 5,800 hospitals would close.

Wegmiller said that small hospitals, many of which cannot cut costs any further, were the most vulnerable.

McMahon attributed the hospital industry's unprecedented bottom line to Medicare's prospective payment system, which pays hospitals for inpatient services according to diagnosis-related groups (DRGs).

The plan, which began phase-in in late 1983, has given hospitals strong incentives to cut costs by becoming more efficient, McMahon said. Under the plan, "Medicare revenue [for a given diagnosis] is fixed. Therefore, if you save money, you keep money [as profit]," he explained.

The data in *Economic Trends* showed that the hospital industry's profit margin increased to 7.9% in the first quarter, the highest first-quarter margin reported since the AHA began tracking the statistic in 1963. The figure surpassed the 6.2% profit margin reported for 1984, which also set a record.

Generally, the viability of a business is judged by its profit margin, the percent of revenue that exceeds expenses. Profits are treated differently by for-profit and not-for-profit hospitals. A for-profit hospital distributes some of its profit to stockholders as dividends and plows the rest back into the business. A not-for-profit hospital, which has no stockholders, plows its entire profit back into the business or saves the profit to meet future needs.

AHA officials said that the industry's profit margins, though record high, were not excessive. McMahon said that, while profit margins grew, hospital costs grew slowly. The data showed that hospital revenue, or the total cost of hospital care to the nation, was only 4.7% higher this first quarter than in the first quarter of 1984.

Other AHA officials said they thought that profit margins in the 6% to 7% range were not excessive when compared to margins in other industries.

The data, as well as interviews conducted at the AHA convention, indicated that high profits have resulted primarily from cost slashing at hospitals, much of it achieved by cutting staff and through more careful purchasing. "I haven't talked to a person at this meeting that hasn't gone through a significant downsizing in operation in the last year," said Donald Shropshire, president and chief executive officer of the 650-bed Tucson Medical Center in Tucson, Ariz.

Shropshire said he reduced staff at his hospital by 200 employees during the last year through attrition and early retirements.

Hospitals also are reducing costs by tracking physician use of the hospitals, said Raymond Leitner, president and CEO of John C. Lincoln Hospital in Phoenix and an AHA board member. Hospitals "are just getting there" in identifying physicians who are heavy users, and in conveying that data to utilization review committees, he said.

At an AHA hearing committee meeting, however, James H. Sammons, MD, executive vice president of the AMA, said that some of the cost savings might be coming through the release of patients who are not yet ready to go home. There is "a significant amount of anecdotal evidence" that patients are being released "too quick and too sick," he said.

In an interview shortly after Dr. Sammons spoke, the AHA's McMahon said, "We have to be certain that the better margins have not come at the expense of qualify of care. I do not think they have."

Although the hospital industry as a whole has fared profitably, 18% of all hospitals experienced negative margins for the year ended in March, the data indicated. This means that nearly one in five hospitals is losing money.

Wegmiller, who is president and chief executive officer of Health Central Corp., a Minneapolis-based chain of non-profit hospitals, said he doubted that there ever had been so many hospitals with negative margins. "Just as everyone predicted, under prospective payment, there are winners and losers. And that disparity is becoming more and more evident," he said.

The hospitals that are faring the worst tend to be the small hospitals. According to the data, hospitals with fewer than 50 beds, as a group, have decreasing profit margins.

Although large hospitals can cut costs by reducing personnel, small hospitals often cannot reduce their staff complement, hospital observers have said. As an example, a large hospital can let go one of its building engineers, but a small hospital that has only one building engineer cannot.

Small urban hospitals are the most likely to close, Wegmiller said, because of competition from neighboring hospitals. The next most endangered class of hospitals are small

rural hospitals, he said. Large inner-city hospital plagued with high loads of indigent care and aging physical plants are the third most likely class of hospitals to face closing, he said.

Wegmiller added that many failing hospitals that do not close would convert to nursing homes or institutions that treat chemical dependency, sexual and sleep dysfunctions, or pain.

Wegmiller also said there was a "direct correlation" between the oversupply of physicians in an area and failing hospital margins. When the physician population becomes competitive, the MDs begin to do work in their offices that formerly was performed in hospitals, he said. "They need to do more and more themselves to maintain their income levels or to sustain their medical practices.

"The greater the supply of physicians, the worse the hospital margins in that area," Wegmiller said.

The data in the AHA's *Economic Trends* are based on a survey returned by 1,200 of the nation's 5,800 hospitals. The publication revealed that in the first quarter of 1985, compared to the first quarter of 1984:

Admissions feel 5.7%.

Average length of stay dropped 2.4%.

The total number of inpatient days dropped 7.9%.

Outpatient visits increased 1.5%.

Occupancy decreased from 72% to 68%.

The number of full-time equivalent personnel decreased 3.8%.

The number of staffed beds dropped by 2.2%.

[From the Washington Post, June 30, 1985]

AILING, UNINSURED AND TURNED AWAY—AMERICANS WITHOUT HEALTH COVERAGE FINDING HOSPITAL DOORS CLOSED

(By Paul Taylor)

DALLAS.—When G.R. Lafon walked shakily into the emergency room of Parkland Memorial Hospital here, a nursing supervisor asked is she could help.

"I hope so," said the uninsured 56-year old laborer, displaying a nasty third-degree grease burn on his side and back. "I already been to three hospitals today that couldn't."

Lafon had been thrice "dumped"—turned away from emergency rooms for lack of a deposit ranging from $500 to $1,500 required by three for-profit hospitals closer to his home.

"Kind of makes you feel like a dog," said Lafon, who received a skin graft and 19 days of hospital care at county-owned Parkland.

Dumping is not new, but it is a growing practice. The 20 million to 35 million Americans without health insurance are finding themselves left out in two upheavals that are changing the face of the health industry: the ascendancy of for-profit hospitals and the emergence of price-conscious consumers—led by the biggest health consumer of all, the federal government.

These developments have set loose free-market incentives into an arena long shielded from them, the hospital, and may lead to lower-cost, more efficient health care for everyone. Already they seem to be taming medical inflation.

In the meantime, however, as the leading players in this brave new marketplace—hospitals, counties, states, the federal government, private insurers—sort out new roles and protect old turf, "the uninsured are the ones who are left with their jaws exposed," said John Gavras, president of the Dallas-Fort Worth Hospital Council.

Dumping is the prime symbol of that exposure. In communities nationwide, dumping headlines have become the $600 ashtrays of medical care. The horror stories that make the news—of patients being sent to other hospitals while in labor or while comatose or immediately after devastating accidents—are atypical, but they speak to the perverse incentives of a larger system.

Nobody knows how many patients are dumped nationally; few hospitals keep records. Parkland does. It gets "dumped on" 150 times a month—twice the level of three years ago. Other big-city public hospitals that monitor dumping report similar jumps. Last year, Cook County Hospital in Chicago admitted 6,000 emergency patients transferred from other facilities, a fivefold increase in four years.

Parkland and Cook County are tax-supported, and their charge is to care for the poor. Both are teaching hospitals; their staffs have excellent reputations. So the question arises: What's wrong with putting uninsured patients in places like that?

One set of concerns is strictly medical; the other involves access and equity.

Last year, a Harvard Medical School research team analyzed records of the 458 patients transferred during a six-month period to tax-supported Highland General Hospital in Oakland, Calif. It found that in 7.2 percent of the cases, the patients were transferred without being stabilized medically and that their care suffered as a result.

"Medical judgment, compassion and common sense nowadays are too often overwhelmed by the economic considerations of hospital managers," said Arnold S. Relman, editor of the New England Journal of Medicine.

Relman and other critics also fear that the country is heading toward a two-tiered network of hospital care—private hospitals for paying patients, public hospitals for the poor and uninsured.

"It doesn't take too long to figure out who loses in a system like that," said Dr. Ron Anderson, president of Parkland, who believes that a community will spend only so many tax dollars on public hospitals.

Anderson bumps into those limits every day. Parkland, he likes to joke, has an "open-door" policy—literally.

"Our doors are kept open by the long lines of people trying to get care," he says. Waits at some of his hospital's outpatient clinics can run five or six hours. During busy times, Parkland's four-bed hospital rooms have five beds, making even getting in and out a chore for visitors, doctors and nurses.

It is crowding, rather than the quality of medical care, that gives public hospitals their generally poor reputations. But reputation is the least of the public hospitals' worries.

In the new medical marketplace, public hospitals are being hit from all sides by cost pressures. Federal cutbacks in Medicaid and Medicare have reduced their reimbursements; employer cutbacks in health benefits have added to the pool of the uninsured for whom they are ultimately responsible; and the "skimming" of paying patients by the aggressive marketing techniques of for-profit hospital chains have taken away many of their paying customers.

At least seventy public hospitals have closed their doors in the past five years, and another 180 have been bought or managed by for-profit hospitals—thereby adding to the strains on the remaining public hospitals.

"Health care is now a commercial commodity sold in a market in which nice guys (those who render uncompensated care to the indigents) are bound to finish last," writes Uwe Reinhardt, a health economist at Princeton University.

In Texas, where the proprietary hospital industry has its strongest foothold, 30 percent of all hospital beds are owned by for-profit chains; nationally, the figure is 11 percent, but it is expected to grow to 30 percent within a decade.

Public hospitals nationwide spend 11 percent of their gross patient revenues on "indigent care"—that is, care for uninsured patients too poor to pay, too young for Medicare (the federal program for those 65 and older) and unqualified for Medicaid (a state-federal program whose eligibility guidelines make coverage available to only half the nation's poor).

Private hospitals, on the other hand, spend 3 percent of their gross patient revenues on care for the indigent—despite laws, in Texas and other states, requiring hospitals with emergency rooms to provide emergency care to all patients who need it, regardless of ability to pay.

Given that disparity, a predictable tug of war has developed in this state and nationally betwwen public and for-profit hospitals. The hybrid private/nonprofit hospitals, which own more than half of all beds nationwide, have generally sat on the sidelines, feeling sympathy for both combatants.

Here in Dallas, Parkland's emergency room has instituted a tough screening policy designed to curb dumping. Parkland's screeners are directed not to take transfers without sound medical reasons, or unless the patients are legitimate charity cases rather than the "medically indigent." The screening has worked to a degree, but it is a voluntary system that relies on the sending hospitals to phone in advance for permission to transfer. Not all do so.

Parkland also pushed a bill in the Texas Legislature that would have placed a 1 percent tax on the net revenues of all hospitals, and used the money to set up a state fund to care for the medically indigent. Florida recently enacted a similar tax. States that have hospital ratesetting powers, such as New Jersey and Massachusetts, factor the cost of indigent care into their rates.

Texas for-profits launched an aggressive lobbying campaign against what they dubbed the "sick tax," and they killed it. Instead, the legislature passed a law last month requiring each county that does not have a public hospital (about half do not) to spend at least 10 percent of its local tax revenues on medical care for the indigent. Counties that spend more than 10 percent receive state reimbursements.

The lobbying by the for-profit hospitals angered many legislators—state Rep. Brad Wright of Houston, chairman of the public health committee, accused them of "reprehensible tactics"—but the proprietary hospitals refuse to be cast in the role of bad guy.

They argue that guaranteeing health care for the indigent is the responsibility of government—not hospitals, patients or patients' insurers, all of whom would ultimately pay a "sick tax."

"We don't expect Safeway or A&P to give away free food for people who can't afford it," said R. Bruce Andrews, executive vice president of American Medical International, a for-profit chain, expressing the free-market view in its purest form.

Who, then, should pay? The question goes to the heart of this nation's longstanding

ambivalence toward funding medical care for the poor.

The United States spends more per capita on health than any country in the world, yet it is the one Western industrial democracy that does not treat health care as a basic national right. On the other hand, it will not stand for any health delivery system that shuts out critically ill patients because of their inability to pay.

Over the years, a jerry-rigged system of hidden subsidies came into being that addressed the problem of reconciling those crosscurrents and reflected the ambivalences. The hospital bills of the uninsured were paid by the hospital bills of the insured, a mechanism of "cost-shifting" that thrived, until the onset of the 1980s, in the milieu of generous hospital-reimbursement formulas built into the Medicare and Medicaid programs.

When the federal government got into the health insurance business in 1965 with Medicare and Medicaid, it said to the hospitals, in effect: We lack the political consensus to insure all the poor, but we will reimburse you handsomely enough for those we do insure so that you can pick up the slack and take care of the rest.

Because the federal government became the nation's biggest purchaser of health care through those two programs, it served as the industry pricing leader; private insurers had little choice but to go along with "cost plus" reimbursement formulas. From 1965 to 1980, cost-shifting thrived, and hospitals flourished. Their share of the health-care dollar grew from one-third to more than 40 percent, and the cost-plus formulas drew entrepreneurs into the field. So began the era of for-profit hospitals.

By the late 1970s, the poor were staying in hospitals and seeing doctors as often as the not-poor. The uninsured still had less access to care, but their numbers were diminishing—down to 10 percent of the population, by some estimates.

Then something snapped. The galloping medical inflation of the 1970s, triggered in no small measure by those generous reimbursement policies, became politically intolerable. The federal government decided to reverse field. After 15 years of making expansion and access the hallmarks of its health policy, it would now make cost containment the critical ingredient.

In the early 1980s, Medicare and Medicaid budgets were cut or capped, and for the first time in nearly 20 years, the number of uninsured started rising again. Moreover, in a key change in 1983, the Medicare reimbursement formula was changed to a fixed price, rather that cost-based, approach. Private insurers, emboldened by the government's example and aroused by the doubling of health-care costs as a percentage of gross national product in the previous 25 years, followed suit.

Much good has come of this cost squeezing. Medical inflation has been cut in half, average hospital stays have been shortened, and insurers such as Blue Cross are passing their savings back to subscribers. From the hospital industry's standpoint, however, the squeeze has meant cutthroat pressures to economize and to compete—for paying customers, please.

It is a brave new market, indeed.

A few blocks down the street from Parkland stands Medical Arts Hospital, one of the new "medical boutiques" that have carved out a market niche by offering hospital inpatients such amenities as midafternoon wine and cheese, fine china and silverware. Throughout the city, billboards beckon hospital patients (marketing has not yet reached the point of "specials this week on cataracts," but the visionaries say it's coming).

Suburban shopping strips are filling up with minor-emergency centers (Doc-in-a-Box, as the genre is affectionately known) where "McDoctors" treat broken arms and runny noses for less money and with less waiting time than good old, disappearing Marcus Welby.

Meanwhile, there is an emerging glut of doctors and hospital beds, both of which tooled up in the 1970s for an expanding market. But as the uninsured are discovering, too many doctors and too many beds do not necessarily add up to increased access to medical care.

The day he burned himself in a grease fire at a fish fry, G.R. Lafon found that out firsthand.

Doctors at the first three emergency rooms he visited, after determining he could not pay, decided that he was not an emergency case. At the second of those hospitals, North Texas Medical Center, doctors took the precaution of inserting an intravenous tube and a catheter in Lafon, to stabilize his liquids (a critical factor for burn patients). But without a deposit, they would not admit him.

So Lafon slung the IV bottle over the coat hook of his sister's 1976 Oldsmobile and headed off.

Finally, after seven hours and 70 miles of trekking around—"It was starting to hurt real bad," Lafon said—he wound up at Parkland, where he would run up a bill of $22,189 for 19 days of hospitalization and a skin graft. There has been a spirited debate on who was in the wrong.

"Our doctors here . . . think that maybe that course of treatment [at Parkland] was a little bit excessive," said Steven Woerner, administrator of North Texas Medical Center.

"He was definitely an emergency case, with third-degree burns that would not heal on their own," said Dr. John Hunt, director of Parkland burn unit. "I would question whether those doctors had the experience to determine this was a third-degree burn. I also find it grossly inappropriate for them to insert an IV and a catheter and then send him on his way."

Debates about the appropriate levels of care have been going on among doctors since the dawn of medicine, and market incentives have not made them less complicated.

Meanwhile, Lafon has recovered, but he has been receiving dunning notices for an overdue hospital bill. It's not the $22,189 from Parkland; the taxpayers will have to eat that one.

It's a $353.75 bill from North Texas Medical Center—for the catheter and IV.

MANY NOT INSURED FOR MATERNITY COSTS—STUDY SAYS 1 IN 4 WOMEN OF PRIME CHILDBEARING AGE LACK COVERAGE

(By Spencer Rich)

Although a normal hospital birth now costs an average of $3,200, about one-quarter of all the nation's women in the prime childbearing years have no health insurance to pay the bill, according to a study released yesterday by the Alan Guttmacher Institute.

The nonprofit organization, which researches birth and family-planning issues, said that calculations derived from recent Census Bureau findings show that a quarter of all women 18 to 24 lack health insurance or government health services under such programs as Medicaid. Fifteen percent of women in the next major childbearing age group, 25 to 29, also are without coverage. These two age groups account for about three-quarters of all U.S. births.

Most of those without coverage have low incomes. If all low-income women of childbearing age, 15 to 44, are taken into account, about one-third with family incomes below $15,000 last year had no health insurance.

The Guttmacher study, written by Rachel Benson Gold and Asta Kenney, said 95 percent of all U.S. births occur in hospitals, raising the question of who pays the big bills when so many women lack insurance.

Although some of the women without coverage pay the costs out of pocket, in many cases they are taken as charity patients or they simply run up a bill and never pay it. As a result, the hospital and doctor get stuck with unpaid bills and either absorb the losses, shift costs to other patients who have insurance or try to get aid from local health agencies.

A recent study by Vanderbilt University researchers, the Guttmacher study said, concluded that births are responsible for about 37 percent of all admissions in which the hospitals are not compensated or are paid directly out of the patient's pocket.

In addition, hospitals bear the costs of caring for newborns in many cases; Vanderbilt Hospital estimated that 27 percent of all its uncompensated costs were for newborns.

Nationwide, it has been estimated that hospitals provide $6.2 billion a year in uncompensated care for all types of cases—a major financial burden, especially for inner-city and public hospitals.

The Guttmacher study said that although the federal-state Medicaid program was intended to provide coverage to low-income women, there are large coverage gaps because states set their own standards. Half of obstetrician-gynecologists do not participate in Medicaid, which often offers only small payments to doctors. In addition, some private health policies do not cover maternity care.

According to the recommendations of the American College of Obstetricians and Gynecologists, a pregnant woman should have at least 13 prenatal visits, beginning very early in the pregnancy. In addition to the cost of those visits, the study said, typical costs of a normal birth are likely to total more than $3,200, and for a Caesarean delivery about $5,000.

Despite doctors' recommendations for early prenatal care, another study published by the Guttmacher Institute yesterday estimated that three-quarters of all pregnant women (two-thirds of blacks and low-income women) received care in the first three months of pregnancy during 1980. Eighteen percent received no care until the second three months, and 5 percent received care in the last three months or not at all.

HEALTH INSURANCE SHORTFALLS FOUND—1 IN 4 UNDER 65 HAVE INADEQUATE OR NO COVERAGE, HHS SAYS

(By Spencer Rich)

One of every four Americans under 65 is without health insurance coverage at least part of the year or has a private policy that fails to cover major health costs, according

to a study released yesterday by the Department of Health and Human Services.

Although the nation is spending more money on health care than ever before, the study found that anywhere from 49.1 million to 76.7 million Americans under 65 either lack full-year insurance or have inadequate policies, depending upon how the adequacy of a private health policy is measured.

The study, probably the most detailed look to date at the nation's health insurance coverage patterns, was conducted by Pamela J. Farley of the HHS National Center for Health Services Research.

Three alternative measurements of the adequacy of health plans were used.

One alternative assumed a moderate illness with costs of a few thousand dollars, the type likely to befall about one person in 20. A policy was considered adequate if it covered the bulk of the charges, so that the family did not have to spend more than 10 percent of its income.

The second alternative, which the author said is probably the most realistic, assumed a more serious and costly illness with a one in 100 risk of occurrence; the policy was considered inadequate if family outlays would have exceeded 10 percent of income.

The third alternate measure of adequacy assumed a serious illness with catastrophic costs, of which the risk is small. The policy was considered inadequate if it did not include a catastrophic protection feature.

The study found:

Using the first definition, about 23.5 percent of the population under 65—49.1 million people this year—either lack coverage or have inadequate coverage. This consists of 9 percent without any private or government health protection such as Medicare or Medicaid, 9.4 percent who were uncovered for part of the year (these two categories include 38.5 million people) and 5.1 percent whose private coverage is inadequate (10.6 million).

Under the second definition, about 26.7 percent of the under-65 population—55.8 million people—lack coverage, have coverage only part of the year or have inadequate coverage. This consists of the 38.5 million without any coverage or without full-year coverage, plus 8.3 percent (about 17.4 million people) whose private insurance does not meet the adequacy test.

Using the third definition, 36.7 percent of the under-65 population, or 76.7 million people, lack coverage or are underinsured. This consists of the 38.5 million plus 18.3 percent without catastrophic coverage (38.2 million).

The study shows that there are substantial differences among various groups in coverage.

Using the second definition, for example, Farley's figures show that 39 percent of female-headed households have no coverage or inadequate coverage, compared with only 25 percent of male-headed households.

About 25 percent of households headed by whites have no coverage or inadequate coverage, while blacks and Hispanics are about 8 points higher.

HOSPITALS REFUSING TO ADMIT POOR—PATIENTS TRANSFERRED TO D.C. GENERAL

(By Margaret Engel)

Private hospitals in Washington increasingly are refusing to admit poor people and instead are transferring them to the city's public hospital, D.C. General.

In recent years, patient transfers to D.C. General have risen 374 percent, according to the hospital's director, Robert B. Johnson. The hospitals transferring the most patients, he said, are the ones closest to the public facility—the Washington Hospital Center, Capitol Hill Hospital and Greater Southeast Hospital, he said.

In the year that ended Sept, 30, 904 persons were transferred to D.C. General from Washington hospitals. Three years ago, that figure was 169 persons.

"We're afraid this is part of the phenomenon of patient dumping," said Dr. Jessie Barber, a neurosurgeon who practices at D.C. General and Howard University hospitals. "Patients who have no insurance are transferred to D.C. General because, by law, that hospital takes all patients."

Traditionally, hospitals have cared for anyone who presented themselves, writing off the losses as charity care. Area hospital officials say they continue to admit people needing emergency treatment, whether or not they can pay.

But with increased competition from suburban hospitals for paying patients, declining revenues because of fixed government payments and the growing number of people not eligible for welfare who are without health insurance, Washington hospitals are finding they cannot give unlimited free care to nonemergency patients.

"Our free care load has been rising, particularly in 1984," said Barry Passett, president of the Greater Southeast Hospital Foundation, who said the hospital is giving 11 percent of its care for free, up from its usual 8 percent.

The hospital cannot continue to treat everyone who asks for help, he said, because "a bankrupt institution out here is not going to help people east of the river." As a result, "We've become very careful in our pre-admission screening program," Passett said. "[Some] people who are not emergency cases, who are stable and are appropriate for transfer have been transferred to D.C. General"

The Washington Hospital Center transferred 20 of its emergency room patients to D.C. General Hospital in June, July and August. The patients were transferred for financial reasons or because they were under police custody, said hospital spokeswoman Stephanie McNeill. Another 39 patients were transferred to other hospitals during that period, she said, mostly on the orders of the patients' health maintenance organizations.

Under federal and city rules, most hospitals are required to give 3 percent of their care for free. Most far exceed that amount. According to the D.C. Hospital Association, Washington hospitals give about $70 million in free care each year, in addition to the $35 million in free care given by D.C. General. "In spite of the transfers, there is a fair amount of charity care given in the city," said Johnson.

The problem here and across the country is that the burden is not equal but falls most heavily on a handful of hospitals—chiefly the public hospitals and those located in poor neighborhoods. "Locally and nationally, we must deal with the care of the indigent," said Johnson. "It's the single most important hospital issue today."

Passett is urging the D.C. Hospital Association to follow the lead of Florida, which requires all hospitals to pay 1 percent of revenues into a fund for charity care. An association committee, which met last week, is studying the plan.

At D.C. General, a private ambulance is dispatched for patient's after a hospital calls to make a transfer. But at least one private hospital in Los Angeles handed out maps to poor patients showing them the bus routes to take to a public hospital, Andrulis said.

"As public hospitals we don't want to close the doors, but we're concerned about inappropriate transfers," said Andrulis, whose association is studying patients who are transferred when their insurance runs out and government-insured patients who are denied admission in private hospitals because of their ailments are expensive to treat.

To deal with such problems, D.C. General has established policies that insist that a doctor at the transferring hospital talk to a doctor at D.C. General about the incoming patient. The patients' medical records must accompany them. Johnson said that once a patient is admitted to another, hospital, he or she cannot be transferred to D.C. General in the midst of treatment. He said since the policies were issued last November, there have not been major problems with hospitals transferring seriously ill patients.

The increased patient transfers raise the problem of encouraging a two-tiered system of medicine, where the poor receive care in public facilities and those who have insurance use private facilities. The federal health programs of Medicare and Medicaid have allowed poor Americans to use nearly all health facilities, but new limits on eligibility for welfare, and therefore Medicaid, have dropped thousands of people from those programs in recent years.

John Ashby Jr., associate executive director of the D.C. Hospital Association, noted that this increase in low-income patients, plus more drug and alcohol problems and the attendant security costs, have added financial burdens to public hospitals.

But private hospitals have been unable to help because of declining revenues, he said. He noted that fixed payments for Medicare patients, which began to be phased in last year, "will result in big losses in our hospitals. They have to compete and we can't direct them to accept more no-pay patients."

"It's a national phenomenon," said Ashby. "Money is getting tighter. Before, the District government could count on other hospitals a little bit more to take care of their problem. For better or for worse, that's no longer true."●

By Mr. MATTINGLY (for himself, Mr. MURKOWSKI, Mr. THURMOND, Mr. DIXON, and Mr. HOLLINGS):

S.J. Res. 220. Joint resolution to provide for the designation of September 19, 1986, as "National P.O.W./M.I.A. Recognition Day"; to the Committee on the Judiciary.

NATIONAL P.O.W./M.I.A. RECOGNITION DAY

Mr. MATTINGLY. Mr. President, today I am joined by Senators MURKOWSKI, THURMOND, HOLLINGS, and DIXON, in introducing a joint resolution calling for the designation of September 19, 1986 as "National P.O.W./M.I.A. Recognition Day."

Seven previous days have been similarly designated by Congress and proclaimed by the President as a special time for all Americans to pause and

pay tribute to those who have so faithfully served our Nation and to recognize and express appreciation for the sacrifices that they and the members of their families have made.

A number of encouraging steps have been taken toward our goal of obtaining a full accounting of those who remain missing. Progress toward that goal however, must not diminish our resolve or lessen our determination to keep the faith with those that we seek to honor with this resolution and insure that they are not forgotten.

Passage of this joint resolution will provide an important symbol of our Nations' continued attention to this vital issue. Indeed, I believe that such efforts in the past have been responsible in some degree for the progress that has been made in resolving this critical matter.

I hope that all Senators will join me and the other sponsors of the joint resolution in passing the proposal at the earliest possible time.

By Mr. CRANSTON:

S.J. Res. 221. Joint resolution to authorize the continued use of certain lands within the Sequoia National Park by portions of an existing hydroelectric project; to the Committee on Energy and Natural Resources.

CONTINUED USE OF LANDS WITHIN SEQUOIA NATIONAL PARK FOR AN EXISTING HYDROELECTRIC PROJECT

Mr. CRANSTON. Mr. President, on behalf of Senator WILSON and myself, I introduce for appropriate reference legislation to authorize the continued use of certain lands within Sequoia National Park by portions of an existing hydroelectric project. The legislation is identical to House Joint Resolution 382 sponsored by Congressman PASHAYAN.

Since 1912, the Southern California Edison Co. has operated some hydroelectric facilities in Sequoia National Park under permit from the National Park Service. These facilities include diversion structures on the Middle and Marble Forks of the Kaweah River, flumes to a powerhouse, and rubble dams which enlarge some small lakes. The powerhouse for this project, Kaweah No. 3, is located outside the park boundaries.

The original permit was issued for 50 years and has twice been extended for 10 years. The congressional authorization for the current permit expires December 14, 1985.

When Congress last authorized the Secretary of the Interior to issue a permit for the Kaweah No. 3 hydroelectric project, Congress required the preparation of a report on the impact of the operations on Sequoia National Park. A principal concern has been the water diversions from the Kaweah River.

The Park Service transmitted the required study to Congress in July of this year. The study concludes that the Kaweah No. 3 project does alter the physical and biological characteristics of the affected portions of the Kaweah River basin relative to the conditions which would exist without the project. It also points out the need to fix conditions to the permit for minimum flows and for control over access and types of equipment used to maintain the facilities and the need to continue monitoring the impacts. However, the National Park Service did not find the current impacts sufficiently adverse to warrant objection to the relicensing of Kaweah No. 3.

Mr. President, ideally I would prefer that we not have these facilities in Sequoia National Park. The operation of a hydroelectric project within the park in my view is not consistent with the purposes for which the park was established. Certainly if faced with the situation today I would oppose granting the initial permit. But these facilities have been operating in Sequoia National Park for nearly 75 years. Given this history and in light of the NPS report, I believe the project should be allowed to continue for the short term, provided the Park Service may impose conditions to protect park values, continue monitoring to assess the impact of the facilities on the park, and review the permit periodically.

Mr. President, the legislation we are introducing today would allow the Secretary of the Interior to issue a new permit with such conditions as he determines are necessary to protect Sequoia National Park. The measure specifically prohibits any expansion of the existing facilities.

I'm introducing the measure identical to the House joint resolution to expedite Senate consideration on this matter as the existing permit expires December 14. However, I believe there could be improvements in the legislation to provide additional safeguards for the park—specifically by limiting the permit to 10 years. I look forward to working with the Senate committee to make such modifications in the legislation as are necessary to ensure protection for Sequoia National Park.

Mr. President, I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 221

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is hereby authorized to issue a permit for portions of an existing hydroelectric project, known as the Kaweah Project of Southern California Edison Company, to continue to occupy and use lands of the United States within Sequoia National Park as necessary for continued operation and maintenance.

SEC. 2. The term of such permit shall expire not later than the expiration of existing or future licenses for the Kaweah Project as may be granted by the appropriate agency of the United States to Southern California Edison Company.

SEC. 3. The permit shall contain a provision prohibiting expansion of the Kaweah Project in Sequoia National Park and shall also contain such other terms and conditions as the Secretary of the Interior shall deem necessary for the protection and utilization of Sequoia National Park.

By Mr. D'AMATO (for himself, Mr. MOYNIHAN, Mr. BRADLEY, Mr. MURKOWSKI, Mr. LAUTENBERG, and Mr. HEFLIN):

S.J. Res. 222. Joint resolution concerning the cruel and inhuman killing of Leon Klinghoffer by international terrorists aboard the cruise ship *Achille Lauro,* because he did not submit to the demands of these terrorists; to the Committee on Banking, Housing, and Urban Affairs.

CONCERNING THE KILLING OF LEON KLINGHOFFER

Mr. D'AMATO. Mr. President, I am proud today to introduce a Senate joint resolution to posthumously award Leon Klinghoffer a Congressional Gold Medal to show Congress' admiration for his bravery and sacrifice while in the hands of Palestinian terrorists. Earlier today, I was privileged, but saddened, to attend the funeral of this fine American.

Leon Klinghoffer and his wife Marilyn, along with passengers of many nationalities, had embarked on the Italian cruise ship *Achille Lauro* for a peaceful cruise on the eastern Mediterranean Sea. Suddenly, their cruise ship was taken over by armed terrorists.

These outlaws sought to intimidate and coerce not only the passengers and crew, but also their relatives and law-abiding citizens everywhere in an attempt to further the goals of terrorism. This is a war that knows no boundaries. It operates on land, at sea, and in the air.

The terrorists who gained control of the *Achille Lauro,* who attempted to force the passengers and crew into submission, have been charged under U.S. law with hostage-taking, piracy, and conspiracy to commit both.

Leon Klinghoffer was a 69-year-old handicapped American who refused to submit to the demands of these terrorists. For this he was brutally and viciously killed. These cowards shot a man in a wheelchair, not once, but several times, and then, in an inhuman and despicable gesture, threw his body into the sea.

We, the Congress and the American people, need to recognize Leon Klinghoffer for the good man, the good husband, and the good father, that he was.

Most importantly, we must recognize him as a symbol of American resist-

ance to terrorism. Because he did not submit, they killed him.

To show our appreciation for his bravery and courage, I am introducing this Senate joint resolution to award Leon Klinghoffer a Congressional Gold Medal. I ask unanimous consent that this resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 222

Whereas the Italian cruise ship Achille Lauro was on a peaceful journey in the Eastern Mediterranean Sea in international waters;

Whereas the Achille Lauro was seized by a group of terrorists for the purpose of frightening and threatening the passengers, their relatives, and law-abiding citizens everywhere, and for the purpose of drawing attention to the terrorists' goals;

Whereas the terrorists were armed and dangerous and attempted to force the passengers and crew of the Achille Lauro into submission to further their purposes of terror, anarchy, hate, and death;

Whereas the terrorists have been charged under United States Law with hostage-taking, piracy, and conspiracy to commit both;

Whereas Leon Klinghoffer, a sixty-nine year old dearly-beloved American who was crippled and confined to a wheelchair did not submit to the demands of the terrorists; and

Whereas the terrorists brutally killed Leon Klinghoffer by shooting him several times and throwing his body overboard because he resisted their demands; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That

(1) the Congress award posthumously to Leon Klinghoffer a Congressional Gold Medal to show Congress' admiration for the bravery of Leon Klinghoffer, a handicapped senior citizen, who, during his kidnapping by terrorists on the high seas, did not submit to terrorist demands to further the objectives of terrorism, and who gave his life as a result of this resistance;

(2) the Secretary of the Treasury is directed to strike and issue this gold medal in accordance with the national medals provisions of section 5111 of title 31, United States Code;

(3) the President is authorized to present this gold medal, on behalf of the Congress, to Marilyn Klinghoffer, the widow of Leon Klinghoffer; and

(4) such sums as may be necessary to provide and present this fitting tribute are hereby authorized to be appropriated.

ADDITIONAL COSPONSORS

S. 259

At the request of Mr. DANFORTH, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 259, a bill to protect the public interest in stable relationships among communities, professional sports teams and leagues and in the successful operation of such terms in communities throughout the Nation, and for other purposes.

S. 827

At the request of Mrs. HAWKINS, the name of the Senator from Maryland [Mr. MATHIAS] was added as a cosponsor of S. 827, a bill to amend the Public Health Service Act to provide for the compensation of children and others who have sustained vaccine-related injuries, and for other purposes.

S. 964

At the request of Mr. D'AMATO, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 964, a bill to amend title 38, United States Code, to eliminate the provision establishing the 10-year delimiting period for educational assistance under the Veterans' Educational Assistance program and to eliminate related provisions.

S. 1206

At the request of Mr. ROTH, the name of the Senator from Tennessee [Mr. SASSER] was added as a cosponsor of S. 1206, a bill to require the Director of the Office of Management and Budget to prepare and transmit to the Congress a comprehensive report and plan on the reorganization, restructuring, consolidation, or realignment of Federal field offices, and for other purposes.

S. 1445

At the request of Mr. METZENBAUM, the name of the Senator from New Jersey [Mr. BRADLEY] was added as a cosponsor of S. 1445, a bill to amend the Sherman Act regarding retail competition.

S. 1456

At the request of Mr. LAUTENBERG, the name of the Senator from South Carolina [Mr. THURMOND], and the Senator from Alaska [Mr. MURKOWSKI] were added as cosponsors of S. 1456, a bill to recognize the Army and Navy Union of the United States of America.

S. 1570

At the request of Mr. NICKLES, the names of the Senator from Georgia [Mr. NUNN], and the Senator from Alaska [Mr. MURKOWSKI], and the Senator from Oregon [Mr. HATFIELD] were added as cosponsors of S. 1570, a bill to amend the Fair Labor Standards Act of 1938 to exclude the employees of States and political subdivisions of States from the provisions of that act relating to maximum hours, to clarify the application of that act to volunteers, and for other purposes.

S. 1774

At the request of Mr. GRASSLEY, the name of the Senator from Kentucky [Mr. MCCONNELL], was added as a cosponsor of S. 1774, a bill to amend section 1951 of title 18 of the United States Code, and for other purposes.

SENATE JOINT RESOLUTION 184

At the request of Mr. DENTON, the names of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of Senate Joint Resolution 184, a joint resolution to authorize the Korean War Memorial, Inc. to erect a memorial in the District of Columbia or its environs.

SENATE JOINT RESOLUTION 190

At the request of Mr. ROTH, the names of the Senator from Minnesota [Mr. BOSCHWITZ] and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of Senate Joint Resolution 190, a joint resolution to establish greater productivity in Federal Government operations as a national goal of the United States.

SENATE JOINT RESOLUTION 210

At the request of Mr. BENTSEN, the names of the Senator from California [Mr. CRANSTON], the Senator from Alabama [Mr. DENTON], the Senator from Arizona [Mr. GOLDWATER], the Senator from Tennessee [Mr. GORE], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Maryland [Mr. MATHIAS], the Senator from Michigan [Mr. RIEGLE], the Senator from Mississippi [Mr. STENNIS], the Senator from Idaho [Mr. SYMMS], and the Senator from Virginia [Mr. TRIBLE] were added as cosponsors of Senate Joint Resolution 210, a joint resolution designating the week beginning October 20, 1985 as "Benign Essential Blepharospasm Awareness Week."

SENATE JOINT RESOLUTION 213

At the request of Mr. FORD, the names of the Senator from New Jersey [Mr. BRADLEY], the Senator from Montana [Mr. MELCHER], the Senator from South Carolina [Mr. THURMOND], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from Arizona [Mr. DECONCINI], the Senator from Connecticut [Mr. DODD], and the Senator from South Dakota [Mr. PRESSLER] were added as cosponsors of Senate Joint Resolution 213, a joint resolution to designate January 19-25, 1986, "National Jaycee Week."

SENATE CONCURRENT RESOLUTION 69

At the request of Mr. DANFORTH, the name of the Senator from Nebraska [Mr. ZORINSKY] was added as a cosponsor of Senate Concurrent Resolution 69, a concurrent resolution to recognize the National Camp Fire Organization for seventy-five years of service.

SENATE CONCURRENT RESOLUTION 71

At the request of Mr. WEICKER, the names of the Senator from Virginia [Mr. WARNER] and the Senator from Vermont [Mr. LEAHY] were added as cosponsors of Senate Concurrent Resolution 71, a concurrent resolution to commemorate the accomplishments of Public Law 94-142, The Education for All Handicapped Children Act on the 10th anniversary of its enactment.

SENATE RESOLUTION 96

At the request of Mr. GOLDWATER, the name of the Senator from South Carolina [Mr. THURMOND] was added

as a cosponsor of Senate Resolution 96, a resolution relating to the centennial observance of the University of Arizona.

SENATE RESOLUTION 241—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 241

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1776, a bill to extend the authorization for appropriations for the Federal Insecticide, Fungicide, and Rodenticide Act.

The waiver of section 402(a) is necessary to permit consideration of statutory authority to extend the authorization for appropriations for the Federal Insecticide, Fungicide, and Rodenticide Act, which is the basic statute regulating the use of pesticides in the United States. That Act is administered by the Environmental Protection Agency, which is charged with the responsibility for ensuring that pesticides do not cause unreasonable adverse effects on the environment.

The delay in reporting S. 1776 was occasioned by the lengthy process of developing and reporting the 1985 farm bill.

AMENDMENTS SUBMITTED

DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, EDUCATION, AND RELATED AGENCIES APPROPRIATION, 1986

WEICKER AMENDMENT NO. 814

Mr. WEICKER proposed an amendment to the bill (H.R. 3424) making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1986, and for other purposes; as follows:

On page 18, line 7, insert "XV," after "X,".

On page 51, line 8, strike out "98-588" and insert in lieu thereof "98-558".

On page 52, line 6, strike out "$1,215,500,000" and insert in lieu thereof "$1,215,550,000".

On page 53, line 8, strike out "From amounts for" and insert "For" in lieu thereof.

On page 53, line 16, strike out "From amounts for activities" and insert in lieu thereof "For special demonstration programs for the severely disabled,".

On page 53, line 17, insert "$20,200,000, of which" before "$750,000".

On page 56, line 9, before "the" the first time it appears insert "notwithstanding sections 411(a)(2)(A)(i) and 411(b)(5) of the Higher Education Act,".

On page 56, line 16, strike out "(d)" and insert "(b)" in lieu thereof.

On page 57, line 9, strike out "413(D)(b)(1)(B)(ii)(II)" and insert in lieu thereof "413D(b)(1)(B)(ii)(II)".

On page 61, line 3, strike out "and III" and insert in lieu thereof a comma and the following: "III, IV, and VI".

On page 61, lines 8 and 11, insert "so" after "sums" each time it appears.

On page 63, strike out lines 21 through 24.

On page 65, line 19, strike out "304" and insert in lieu thereof "303".

PROXMIRE AMENDMENT NO. 815

Mr. PROXIMIRE proposed an amendment to the bill (H.R. 3424), supra; as follows:

On page 23, line 1, strike "4,108" and insert "4,437".

DIXON (AND SIMON) AMENDMENT NO. 816

Mr. DIXON (for himself and Mr. SIMON) proposed an amendment to the bill (H.R. 3424), supra; as follows:

On page 25, line 4, strike out "$154,118,000." and insert "$156,618,000, of which $2,500,000 shall be available until expended, and shall be awarded without regard to any requirement for peer review, for the development and establishment of a registry for the collection of epidemiological data about Alzheimer's disease in the United States, for the training of personnel in the collection of such data, and for other matters respecting such disease.".

DIXON (AND OTHERS) AMENDMENT NO. 817

Mr. DIXON (for himself, Mr. RIEGLE, and Mr. SIMON) proposed an amendment to the bill (H.R. 3424), supra; as follows:

On page 3, after line 23, add the following:

For the Summer Youth Employment and Training Program authorized by the Job Training Partnership Act, $100,000,000, in addition to amounts otherwise provided herein for these purposes, to be allocated to States so that each service delivery area receives, as nearly as possible, an amount equal to its prior year allocations for this program, to be available for obligation for the period July 1, 1985, through June 30, 1986.

CHILES (AND RIEGLE) AMENDMENT NO. 818

Mr. CHILES (for himself and Mr. RIEGLE) proposed an amendment to the bill (H.R. 3424), supra; as follows:

On page 22, line 3 change $476,777,000 to $477,777,000.

On page 23, line 2 change period to colon and add the following: *Provided further,* that $1,000,000 shall be used for studies or designer or synthetic drug use.

GORE AMENDMENT NO. 819

Mr. GORE proposed an amendment to the bill (H.R. 3424), supra; as follows:

On page 18, line 11, strike out "$1,547,979,000," and insert "$1,550,979,000, of which $3,000,000 shall be available for grants under section 371 of the Public Health Service Acts;".

HART AMENDMENT NO. 820

Mr. HART proposed an amendment to the bill (H.R. 3424), supra; as follows:

On page 5, line 15, after "Trust Fund," insert the following: "and of which not to exceed $250,000, of the amount which may be expended from said Trust Fund for Employment Service purposes, shall be used by the Secretary of Labor to conduct a study, to be submitted to Congress prior to June 1, 1986, designed to examine the status of automation in the labor exchange process throughout the Employment Service system, and to develop recommendations (including cost estimates) necessary to ensure the most efficient and effective job matching program within each State and among the States (known as the Interstate Job Bank System),".

CHILES AMENDMENT NO. 821

Mr. CHILES proposed an amendment to the bill (H.R. 3424), supra; as follows:

On page 34, line 23, after "*Provided,*" insert "That not less than $2,295,098,000 shall be used only for personnel compensation and benefits, and the Impoundment Control Act of 1974 shall apply to any amount less than $2,290,000,000 not required for personnel compensation and benefits: *Provided further,*".

On page 35, line 1, strike out "$175,000,000" and insert "$145,000,000".

DIXON (AND OTHERS) AMENDMENT NO. 822

Mr. DIXON (for himself, Mr. RIEGLE, Mr. HART, Mr. ROCKEFELLER, and Mr. SIMON) proposed an amendment to the bill (H.R. 3424), supra; as follows:

On page 2, line 15, strike out "$3,453,677,000" and insert in lieu thereof "$3,576,177,000".

WEICKER AMENDMENT NO. 823

Mr. WEICKER proposed an amendment to the bill (H.R. 3424) supra; as follows:

On page 18, line 7, strike out "X".

On page 18, line 11, strike out "$1,550,979,000" and insert in lieu thereof "$1,408,479,000".

HEINZ (AND BRADLEY) AMENDMENT NO. 824

Mr. HEINZ (for himself and Mr. BRADLEY) proposed an amendment to the bill (H.R. 3424), supra; as follows:

On page 50, after line 25, add the following:

For carrying out the provisions of title VI of the Education for Economic Security Act, $2,500,000 to remain available until expended.

LAUTENBERG (AND BRADLEY) AMENDMENT NO. 825

Mr. PROXMIRE (for Mr. LAUTENBERG, for himself and Mr. BRADLEY) proposed an amendment to the bill (H.R. 3424), supra; as follows:

On page 18, line 11, strike out "$1,408,479,000" and insert in lieu thereof "$1,408,979,000, of which $500,000 shall be available for assistance to two-year schools of medicine or osteopathy under section 788(a) of the Public Health Service Act;".

EVANS (AND GORTON) AMENDMENT NO. 826

Mr. EVANS (for himself and Mr. GORTON) proposed an amendment to the bill H.R. 3424, supra; as follows:

On page 34, after line 17, insert the following:

REFUGEE AND ENTRANT ASSISTANCE

Notwithstanding any other provision of law, $11,526,000 of funds appropriated for fiscal year 1985 to carry out refugee targeted assistance under section 412 of the Immigration and Nationality Act, and which remained unobligated at the close of the fiscal year 1985 as a result of the failure of the Office of Management and Budget to apportion such funds, shall remain available until September 30, 1986, and shall be obligated by January 1, 1986.

PROXMIRE AMENDMENT NOS. 827 AND 828

Mr. PROXMIRE proposed two amendments to the bill (H.R. 3424), supra; as follows:

AMENDMENT No. 827

On page 2, line 15, delete "$3,453,677,000" and insert in lieu thereof "$2,836,677,000"

AMENDMENT No. 828

On page 36, beginning with line 24, strike all through line 8 on page 37.

GLENN AMENDMENT NO. 829

Mr. GLENN proposed an amendment to the bill (H.R. 3424), supra; as follows:

On page 67, after line 24, insert the following:

NATIONAL CENTER FOR THE STUDY OF AFRO-AMERICAN HISTORY AND CULTURE

For necessary expenses for the National Center for the Study of Afro-American History and Culture Act (title II, Public Law 96-430), $200,000.

BUMPERS AMENDMENT NO. 830

Mr. BUMPERS proposed an amendment to the bill (H.R. 3424), supra; as follows:

On page 22, line 3 strike "$477,777,000" and insert in lieu thereof "$480,277,000, of which $59,906,000 shall be available for the childhood immunization program, and"

METZENBAUM AMENDMENT NOS. 831 AND 832

Mr. METZENBAUM proposed two amendments to the bill (H.R. 3424), supra; as follows:

AMENDMENT No. 831

On page 36, line 23, strike out "$807,412,000." and insert "$810,412,000, of which $3,000,000 shall be available for activities under title II of Public Law 95-266 (adoption opportunities) (in addition to amounts otherwise available under this heading for activities under such title), for the recruitment and outreach of families to adopt special needs children, including minority children, and for the training of personnel to recruit and work with such families.".

AMENDMENT No. 832

On page 14, line 11, strike out "$150,224,000" and insert in lieu thereof "$153,224,000".

BYRD AMENDMENT NO. 833

Mr. BYRD proposed an amendment to the bill H.R. 3424, supra; as follows:

Page 58, line 9, strike "$5,000,000" and insert in lieu thereof, "$5,338,000".

COMMERCE, JUSTICE, STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATION, 1986

SPECTER AMENDMENT NO. 834

(Ordered to lie on the table.)

Mr. SPECTER submitted an amendment intended to be proposed by him to the bill (H.R. 2965) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1986, and for other purposes; as follows:

On page 23, line 9, strike out "$62,100,000" and insert in lieu thereof "$70,282,000".

FEDERAL COAL LEASING

Mr. McCLURE. Mr. President, on October 17, 1985, I introduced two amendments to (S. 570), a bill to amend the Mineral Lands Leasing Act of 1920 to improve the administration of the Federal coal leasing program, and for other purposes. There was an error in amendment No. 802 and I ask unanimous consent that the amendment be modified to correct the error and be printed in the RECORD with the modification.

There being no objection, the amendment, as modified, was ordered to be printed in the RECORD, as follows:

On page 2 after line 6 insert a new section 2 as follows and renumber succeeding sections accordingly:

"SEC. 2. Subsection 2(c) of the Mineral Lands Leasing Act (41 Stat. 438), as amended, is hereby repealed.".

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Committee on Energy and Natural Resources to consider the nomination of C.M. Naeve, of Virginia, to be a member of the Federal Energy Regulatory Commission for a term expiring October 20, 1989.

The hearing will take place Thursday, October 24, 1985, 9:30 a.m. in room SD-366 of the Senate Dirksen Office Building in Washington, DC.

Those wishing to testify or who wish to submit written statements should write to the Committee on Energy and Natural Resources, U.S. Senate, room SD-358 Dirksen Senate Office Building, Washington, DC 20510. For further information, please contact David Doane or Gerry Hardy at (202) 224-5305.

Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public that the hearings scheduled before the Subcommittee on Natural Resources Development and Production of the Senate Energy and Natural Resources Committee on October 22 and 24, beginning at 9:30 a.m. in room SD-366, Dirksen Senate Office Building, have been rescheduled to take place Friday, November 8, at 9:30 a.m. in room SD-366, Dirksen Senate Office Building.

In addition to S. 570, S. 372, and S. 946, testimony also will be received on S. 913. These are bills to amend the Mineral Lands Leasing Act of 1920, as amended. Also, testimony will be received on Senator McCLURE's amendments to S. 570 to amend and repeal section 2(c) of the Mineral Lands Leasing Act of 1920.

For further information regarding the hearings, you may wish to contact Mr. Patrick Sullivan of the subcommittee staff on (202) 224-5205.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON SURFACE TRANSPORTATION

Mr. WEICKER. Mr. President, I ask unanimous consent that the Subcommittee on Surface Transportation of the Committee on Commerce, Science and Transportation be authorized to meet during the session of the Senate on Monday, October 21, to conduct an oversight hearing on the Household Goods Transportation Act of 1980, and the Bus Regulatory Reform Act of 1982.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PUBLIC LANDS, RESERVED WATER AND RESOURCE CONSERVATION

Mr. WEICKER. Mr. President, I ask unanimous consent that the Subcommittee on Public Lands, Reserved Water and Resource Conservation of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Monday, October 21, to hold a hearing on S. 1558, to settle certain claims affecting the Pyramid Lake Paiute Indian Tribe of Nevada, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

WORLD FOOD DAY—1985

● Mr. HELMS. Mr. President, each year, World Food Day is designated as a day for all to reflect upon the hunger which afflicts so many millions of people—especially children—throughout the world. This year, however, it is especially important to look at the causes of world hunger and the various solutions which are being proposed for this tragic problem.

Much has happened since World Food Day in 1984. Americans became aware of the dimensions of the famine affecting much of Africa, and responded in a most generous fashion. At the same time, our farmers continued to produce record surpluses. In Congress, the process of reauthorizing our food assistance programs produced a number of new and innovative proposals.

It tugs at the heartstrings of all compassionate people to see such widespread hunger in Africa at a time when our own farmers are producing massive surpluses of almost every crop.

Mr. President, according to recent estimates of the United Nation's Food and Agriculture Organization, more than 150 million out of Africa's 450 million people are affected by famine. World Bank estimates indicate that as many as 100 million of those affected are severely hungry and malnourished.

In most of the 24 African countries primarily affected by famine, the average per capita calorie intake is below what is considered by the FAO to be a minimum nutritional level. It has been estimated that, at the beginning of 1985, more than 20 million Africans were at immediate risk of death from starvation.

So, Mr. President, the need for America to use its resources to help relieve this famine to the extent we can has been on my mind—especially since our able colleague from Missouri [Mr. DANFORTH] showed me the pictures he took during his trip to Africa.

All Americans can be proud of the unprecedented campaign our country has undertaken to provide emergency food aid to the people of Africa in their time of need. Through various private and Government programs, the United States has provided almost as much aid to sub-Saharan Africa as have all other countries combined. However, we should do more. We must do more.

In some circles, particularly in the major media, it remains fashionable to run down America whenever possible. However, I believe that our response to the African crisis says a lot about our country, and the values for which our people stand.

However, I am certain that my colleagues will agree that the true test of our compassion lies not merely in the amount of emergency aid we give to Africa, but also in our ability to assist developing nations in solving the long-range problems which have limited their agricultural development.

In order to solve these problems, it will be necessary for us to share with African nations the miracle of the free enterprise system, and its principles of competition, productive efficiencies, and personal reward—and responsibility.

The common perception is that famine is caused by drought. To a significant extent, the famine currently engulfing sub-Saharan Africa can be attributed to the fact that the region has experienced as much as 4 years of unusually dry weather.

It is also important to note that agriculture in much of Africa is highly dependent on rainfall. Since irrigation is not widely practiced, inadequate or delayed rains make crop failure much more likely. In addition, when rainfall is insufficient over successive years, as it has been in a number of famine affected countries, surplus stocks are drawn down.

However, a general lack of rainfall cannot be held to be the sole cause of the current famine. According to U.S. Climatologist C.W. Thornthwaite, quoted in a recent Earthscan publication, average rainfall for Sokoto—in northern Nigeria, bordering on the Sahel region—actually exceeds average rainfall for London, England, by about 4 inches a year.

In addition, weather patterns in the Sahel region were analyzed by the U.N. World Meteorological Organization following the last drought period of 1968–73. In his report to the Organization, E.G. Davy concluded that "no serious analysis of the available data is known to show a falling trend of rainfall in the (Sahel) zone over the period for which records are available."

While the current food shortage in Africa can be attributed in some degree to rain shortfalls, according to the Congressional Research Service, there tends to be general agreement that "Africa's food problems appear to be long run in nature." In the same vein, it has been suggested by the World Bank that in most of Africa, the potential for increasing agricultural output exists, and that most African farmers are producing below their potential.

A number of factors have been cited as bringing about the long-term problems with African agriculture, including political instability, population growth, and inadequate infrastructure. However, a recent study by the Congressional Research Service indicated that "the most widely stated reason for the poor food production performance in sub-Saharan African countries is that governments have followed policies that create disincentives for farmers to produce and market more food * * *."

The countries now affected by the famine have, at some time over the past decade, had national policies that worked to deter agricultural production. Specific national policies aimed at providing cheap food for consumers, promoting export crops, overvaluing currency, and perpetuating or extending government control over the farm economy have had the effect of substantially reducing per capita agricultural production.

These policies have been used because of the low priority that African nations have assigned to agriculture and food production. This bias can be traced to a desire among the leaders of new nations to pursue mixed economies with a heavy emphasis on foreign aid, industrial development, and education and health services. To the new leadership, agriculture was a "backward" sector whose development could be passed over and whose wealth and resources could be taxed to promote the more glamorous and modern urban and industrial sectors.

Agriculture's size and nature has made it a practical and easy target for taxing policies. In most African countries, agriculture is the largest economic activity, and in a number of these countries, such as Tanzania and Chad, it provides more than half of the gross national product. The peasants who provide the bulk of the agricultural production, furthermore, live out in the hinterlands where distance deprives them of a voice in a political process dominated by civil servants, police, army, and urban dwellers.

Perhaps the most prevalent of the "antiagriculture" policies are the so-called cheap food policies. Under these policies, domestic food prices are kept low; sometimes through subsidies, but often through low prices set by the Government at the farm level.

Of the 20 most famine prone countries studied by the Congressional Research Service, almost all have at one time or another, had cheap food policies. In a number of countries, policies are still in effect, and all but 3 of the 20 nations studied maintain government controls on producers' prices—the most common mechanism through which cheap food policies have been carried out.

As a result of these policies, incentives for African farmers to go through the back breaking work of raising food have been simply destroyed.

Reports indicate that farmers in many parts of Africa have returned to producing only for their own family's needs. Other farmers have chosen to take the risk of either trading on the

black market, or smuggling their products to neighboring countries where the government controlled prices may be higher. And according to a recent article in the Los Angeles Times, these policies have worked to drive a great number of farmers totally out of business.

The reaction of the African farmer to state control of agriculture should come as no surprise. Without the benefit of growth-oriented policies which permit individual farmes to produce and keep the fruits of their labors, and provide them with the incentives that accompany free markets, the investment of time and resources necessary to feed the continent's population will never be made.

Mr. President, the free enterprise system is a pervasive opportunity system which rewards hard work with individual gain—and does so in such a way that the benefits become widely shared. It is time to share this system with Africa to the extent we can, so as to draw upon and reward the best talents among its enormously talented peoples.

Fortunately, a number of African countries are actively seeking to reintroduce elements of the free enterprise system into their economies. To the extent we can, we should encouraged and assist such conversions to market economies.

As part of the 1985 farm bill, the Senate Agriculture Committee agreed to a number of provisions which are designed to target some of our food assistance for this purpose.

FOOD FOR PROGRESS

Although African countries may want to alter their food policies, bringing about such changes will not be easy. Sudden policy shifts could bring about social, political, and economic threats to sitting governments. One of the key features of the food assistance provisions of the committee bill aims to put our surpluses to work easing this transition.

Specifically, this proposal is called food for progress. It embodies a concept developed for President Reagan by the United States Ambassador to Madagascar, Robert Keating. It authorizes the President to make multiyear commitments of food assistance to countries wishing to implement growth-oriented agricultural policies.

The food to be used for this program would be taken from stocks already sitting in Government warehouses and would be in addition to other U.S. assistance going to participating countries. Assistance under this proposal would be limited to a total of 500,000 metric tons a year. Participating nations could use this grant as a buffer to allow prices received by farmers to rise without abruptly increasing food costs for urban populations accustomed to cheap food policies.

My colleagues may find it interesting to know that this particular program has strong support among our own agricultural community. This indicates to me that American agriculture knows that countries need to develop in order to become paying customers of our farm products and recognized that the free enterprise system is the only ticket to real development.

I ask unanimous consent that a letter I received from nine major farm organizations in support of the Food-for-Progress Program be printed in the RECORD at this point:

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

APRIL 12, 1985.

Hon. JESSE HELMS,
Chairman, Committee on Agriculture, Nutrition and Forestry, U.S. Senate, Washington, DC.

DEAR SENATOR HELMS: We the undersigned representatives of U.S. farm and commodity organizations wish to register our enthusiastic support for the "Food for Progress" legislation which is included in S. 616, your proposed Agriculture, Food and Trade Conservation Act of 1985.

In the face of continuing hunger, many African countries will now admit that their national food policies have been counterproductive. "Food for Progress" is an innovative flexible problem which makes use of multi-year commitments of U.S. food aid to enable those countries to bridge the gap between failed agricultural policy and one which provides their farmers with an incentive to food growth and expansion.

We are pleased to note that "Food for Progress" donations made from ample U.S. government stocks would be authorized under section 416 of the Agricultural Act of 1949, and would be in addition to those made under the more intricate, less flexible PL-480 program. We are especially pleased that the "Food for Progress" program would be managed at the White House, thus giving the program the priority attention which it deserves.

Well aware of the growing magnitude of U.S. government-owned food stocks, we applaud your initiative toward using these otherwise unutilized resources to help promote favorable agricultural policy change in the many developing countries of the world.

The Rice Millers' Association, the American Soybean Association, Dairymen, Inc., the Fertilizer Institute, National Corn Growers' Association, National Cotton Council, Millers' National Federation, the National Grange, National Associates of Wheat Growers, U.S. Wheat Associates

PUBLIC LAW 480—TITLE I—PRIVATE ENTERPRISE DEVELOPMENT PROGRAM

Title I of Public Law 480 has played a vital role in the stimulation of U.S. agricultural trade. These provisions provide for concessional sales of agricultural commodities to friendly countries. Agreements made under this title provide for credit repayable in dollars over a maximum 20-year repayment period or credit repayable in convertible local currency over a maximum 40-year repayment period.

Under current credit terms, it is often a very long time before the United States receives repayment for commodities that are consumed today. Due to the long repayment period, and low interest rates, only an estimated 15 percent of the value of these commodities is returned to our taxpayers. In light of this, the committee sought out better ways to make use of the debts owed for the commodities sold under title I.

In trying to develop a better way, the committee considered a recommendation of the President's taskforce on international private enterprise development, better known as the Andreas Commission.

The Commission's recommendation calls for authorizing the repayment of title I obligations in local currencies and seeks to use these currencies to promote agricultural development in recipient countries and to develop overseas markets for our farmers. This concept has been incorporated into the committee bill.

Specifically, the proposal in the bill calls for a new private enterprise development program to be operated under title I of Public Law 480. Under this program agreements for sales for local currencies convertible to dollars would be made in much the same fashion as they are now.

However, this new program would relieve the recipient government from bureaucratic, public sector oriented self-help requirements currently entailed in title I agreements. Instead, the purchasing country will be asked to pay for our commodities in local currencies upon delivery.

The Secretary would then be authorized to loan these currencies to financial intermediaries in the countries that had purchased the commodities. The currencies would be used to fund loans for private enterprise investment, giving strong preference to agriculture and agriculturally related investment. The use of local currencies in this manner will help provide capital to those involved in agriculture, especially the smaller farmers who are so important to development.

None of these loan funds may be used to finance state-owned entities or ventures, or to produce commodities or products that would compete with U.S. commodities or products. Private enterprise entities receiving loans under this provision must be owned solely by citizens of the recipient country, with the exception that the entity may have as much as 25-percent ownership by U.S. citizens.

The committee bill requires that this Private Enterprise Development Program utilize at least 25 percent of the aggregate value of title I sales, or 500,000 metric tons—whichever is greater—but not more than 50 percent of such sales.

This proposal parallels closely the recommendations of both the Andreas Commission and the National Commission on Agricultural Trade and Export Policy. It will effectively put our resources to work not only developing markets for our farmers but promoting the kind of private enterprise necessary for developing countries to grow into vibrant economies. It is a more prudent way to utilize our agricultural abundance, and as such constitutes a significant reform of U.S. foreign assistance programs.

Mr. President, it is indeed fortunate that versions of these two programs are also included in the House farm bill. It appears likely, therefore, that by the next World Food Day, our foreign food assistance programs will have a new thrust, recognizing that the key to development—and ending hunger in the world—lies in the free enterprise system and not in central governments.

REMARKS OF LEO L. BALDUCCI, PROGRAM COORDINATOR, U.S. SENATE PAGE SCHOOL

● Mr. CHILES. Mr. President, I submit for the RECORD a thoughtful address by Leo L. Balducci, the program coordinator of the Senate Page School, at the kickoff dinner for Senate Page School Evaluation for Reaccreditation.

The address follows:

REMARKS OF LEO L. BALDUCCI, PROGRAM COORDINATOR, U.S. SENATE PAGE SCHOOL

The U.S. Senate Page School exists to serve the educational and experienced needs of the young men and women who come to Washington, D.C. to serve as pages for the U.S. Senate. Since the pages hold their appointments for periods ranging from one month to one year, it is necessary for the school to provide a smooth transition from the home school to Senate Page School (SPS) and then—when the page's appointment ends—from SPS back to the home school. At the same time SPS has the mission of acquainting the pages—while they are in Washington, D.C.—with some insight into the operations of the U.S. Senate and with experiencing resources of the Washington, D.C. area.

Carrying out our double mission is not always easy. The constraints upon SPS are greater than those encountered by the home schools of the students. Because of these constraints, the staff of SPS must be flexible in approach. For example, the U.S. Senate often convenes early and adjourns late. In recent weeks we have seen the Senate convene as early as 8:00 A.M., and we have seen the Senate adjourn as late as 3:30 A.M. When either an early convening or a late adjourning occurs, we at the school must adjust our schedule accordingly. Normally our class periods last forty-five minutes each, however, we are prepared—due to an early time of convening of the Senate—to offer class periods of anywhere from thirty minutes to thirty-eight minutes. We do not allow any class period to run for less than thirty minutes. If necessary, we will omit a class and have a rotating schedule. There are times when we as a staff must be willing to hold school on a Saturday to better serve our students.

The students come from varying backgrounds and educational systems in all parts of the country. To counter such differences, we must individualize instruction as much as we can and we must assess a student's abilities and learning style so as to gear instructional methods to the needs of the particular student. Fortunately, we have a small student population, allowing us a class size ranging from one to nine. As a result, an instructor is able to offer a variety of classroom approaches, ranging from whole class instruction to self-paced to individualized instruction.

We must be aware of the students' limit of available time for study purposes because of work demands and be willing to change or modify—at a moment's notice—our lesson plans and our homework assignments. We know, too, that a youth of approximately sixteen years of age is not accustomed to attending school for three and one-half hours and then working for anywhere from seven to twelve hours per day. Thus, we must be willing to occasionally overlook a closing of an eye, a nod or a yawn. In short, we must be flexible in our handling of our students and their school work load—flexible, but not wishy-washy.

We desire for our students to return home not quite the same people they were when they came to Washington, D.C. The work experience and the living conditions automatically contribute to that change. We at SPS feel that we too must play a part. We cannot operate as a unit isolated from the work the pages do in the U.S. Capitol for the Senate. Nor can we operate as a unit isolated from life in Washington, D.C. in general. We want our pages to return home with background knowledge of U.S. Senate operations and with experiences in and around the Washington, D.C. area. Thus, we offer our Washington Seminar program.

We know that our students—many of them, at least—will participate in extra-curricular activities if they are given the opportunity. Time is so very limited for our students that we cannot offer the realm of activities they undoubtedly find at their home schools. Thus, at the moment we are limited to having a Student Council, a school newspaper, and for the first time this year, our own school yearbook. In addition, we do have an induction ceremony for the National Honor Society in the Spring of the year. Should students want other extracurricular activities, they need only convey their wishes to have the feasibility of those activities studied.

We enroll two types of students. One is the page who has an appointment for one or two months. Thus far this year we have had thirteen students. These pages are in our supervised study program. Enrolling them in our regular classes would certainly simplify our work: However, our classes might not be precisely the same as those offered by the students' home schools or might not be at precisely the same point as the home school classes. Since our objective is to minimize difficulties for the students when they return home, we have the home schools send assignments and tests to the students or to us. We provide time and space for the students to study, we allow these pages to sit in on our classes (if doing so would be helpful), we provide tutorial assistance to the students if they need it, we monitor any tests the home school sends, we contact the home schools should any problems arise for the student, and, of course, we do whatever prodding is needed to make sure the students do their work.

The other students for whom we are responsible are those pages who take formal classes at SPS—a total of seventeen at present. One important rule we follow is that we do not program the students to fit our class structure. Instead, we wait until the students arrive, find out what classes they need and want, and then set up our program and schedule. At the start of each semester's classes, we provide each student—for each class—a course sheet which gives the class's description, objectives, content, and assessment methods. That way the student can be sure that the class he will be taking is acceptable for credit from his home school. Should a student need a course which we do not or cannot offer, we attempt to obtain outside tutorial assistance or to set up an independent course guided by our classroom instructor. Pre-tests and post-tests are given in a number of our classes to determine at what point the students are both when they enter SPS and when they leave it. We attempt to give the students skills which will be of use to them when they return to their home schools for the remainder of the junior year or for the senior year. In the English and social studies classes we put heavy emphasis on vocabulary and on composition skills, especially those involving analysis and synthesis. In the science and mathematics classes we try to probe the "why" as well as the "how." In addition, we realize that the junior year is the most important in terms of getting started on the long road to college admissions. As a result, we do make available courses in preparing for college admissions testing. We invite an occasional college admissions representative to speak with the students and inform them as to what things they need to know about getting into college. We assist the students in applying for college admissions tests and make sure they get to the place where the tests are given. This Saturday, October 19, we will administer the PSAT at SPS.

Our Washington Seminar Program brings to the school speakers who help the students understand Senate procedures and speakers who acquaint the students with aspects of the history and resources of the Capitol Hill community. Too, it provides the pages with field trips to important sites in and around the nation's Capitol. Unfortunately, the extent of our program is often limited when the Senate is in session. When the Senate is in recess for an extended period of time, we are able to lengthen our class periods and to provide more Washington Seminar programs. Programs during the 1984-1985 school year included trips to Mount Vernon, Williamsburg, Jamestown, Pennsylvania Dutch Country, Annapolis, and New York City. Speakers ranged from the Senate Sergeant-at-Arms to the President of the U.S. Capitol Historical Society. A complete list of such programs for last year is included in the reports issued each semester by SPS to the U.S. Senate and to the D.C. Public School System.

We are most grateful to both the U.S. Senate and to the D.C. School System for the tremendous support and encouragement given us in our efforts. Under the name of Capitol Page School we have been affiliated with Congress and the D.C. Schools since 1946 and with the U.S. Senate and the D.C. Public School since 1983 under the name of the U.S. Senate Page School. The relationship among the Senate, SPS, and the D.C. School System has been a good one—one

that we hope will continue for many years to come. We welcome the the Middle States evaluating team for the next three days and hope they will be pleased with our efforts at SPS. We feel we have a highly qualified and a most caring faculty as well as an extremely delightful group of pages this year. We appreciate the time and interest shown by those Senate and D.C. Schools personnel who honored us by their attendance today. We hope they have gotten more insight into the operations of the school from my remarks, and we extend to them an invitation to visit the school to see it in operation and perhaps even to speak with the students at any time they wish.●

PERFORMING ARTS LABOR RELATIONS AMENDMENTS ACT

● Mr. HEINZ. Mr. President, I rise today as a cosponsor of S. 670, a bill to provide protection under the National Labor Relations Act for musicians, actors, and other employees in the performing arts. For many years, these employees have worked without coverage under the Federal statute that enables other groups of workers to bargain collectively for wages, benefits, and other conditions of employment.

I believe the protections that would be given to musicians and other performing artists under S. 670 are particularly important given the nature of their industry. Musicians often must travel from one location to another in order to play a series of short engagements. As such, they have been classified as independent contractors by the National Labor Relations Board and are not eligible to bargain collectively for the terms of their employment. Moreover, because of the temporary nature of their employment, musicians are unable to enforce those contracts they do establish.

Under this bill, musicians and other performing artists would be considered as employees under labor law, and would be able to enter into binding agreements with their employers and promoters to receive reasonable and competitive wages and benefits. As an example, if a group of musicians from Pittsburgh, PA, went to Erie, PA, or to Harrisburg for a weeklong engagement, they would not need to be concerned about their contract being abrogated after they finished the job and moved on to another city.

Mr. President, I want to emphasize that this bill will in no way undermine the competition that exists in the performing arts industry, nor will it change the status of musicians as independent contractors under tax law and thus increase the tax burden on their employers. The bill simply allows this group of employees to collectively negotiate the terms of their employment—a right accorded to other groups of employees, and a protection that in this case is long overdue.

I urge my colleagues to support this legislation.●

ADVANCE NOTIFICATION OF PROPOSED ARMS SALES

● Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Committee on Foreign Relations.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that such a notification has been received.

Interested Senators may inquire as to the details of this advance notification at the office of the Committee on Foreign Relations, room SD 423.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, October 17, 1985.

In reply refer to: I-03483/85ct.

Dr. M. GRAEME BANNERMAN,
Deputy Staff Director, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR DR. BANNERMAN: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Middle Eastern country tentatively estimated to cost $50 million or more.

Sincerely,

PHILIP C. GAST,
Lieutenant General, USAF,
Director.

[Transmittal No. 86-AG]

ADVANCE NOTIFICATION OF POSSIBLE SECTION 36(b) STATEMENTS FOREIGN MILITARY SALES

a. Prospective Purchaser: [Deleted]

b. Description and Quantity of Articles or Services under Consideration for Purchase: [Deleted]

c. Estimated Value(s) of this Case: [Deleted]

d. Description of Total Program of which this Case is a Part: [Deleted]

e. Estimated Value of Total Program of which this Case is a Part: [Deleted]

f. (U) Prior Related Cases, if any: None.

g. Military Department: [Deleted]

h. Estimated Date Letter of Offer/Acceptance (LOA) Ready for Formal Notification to Congress: [Deleted]

i. Date Advance Notification Delivered to Congress: [Deleted]

POLICY JUSTIFICATION

[Deleted.]
[Deleted.]
[Deleted.]
[Deleted.]
[Deleted.]

(U) The prime contractor will be the General Dynamics Corporation of Warren, Michigan.

[Deleted.]

(U) There will be no adverse impact on U.S. defense readiness as result of this sale.●

NOT JUST CRYING WOLF

● Mr. JOHNSTON. Mr. President, we often hear of and debate the relative financial health of the various industries of our States and of our Nation. As a representative of a State rich in hydrocarbons, I am frequently involved in matters concerning the oil and gas industry. Many in the Congress seem to feel that the oil and gas industry has a bottomless pocket to which we can repeatedly turn in order to raise revenues or artificially hold down prices and subsidize consumers.

Many members of that industry express dismay and frustration when their interests are subjugated to those of others. Too often their financial woes and pleas for relief fall on deaf ears. Too many in the Congress fail to understand the state of depression in which that industry now finds itself.

Mr. President, I wish to insert into the RECORD today an example of the fact that in not every instance are members of the oil and gas industry "crying wolf" as some would claim. As you can see from this succinct statement, many in the industry are closing down for the reasons stated therein. I hope my colleagues will note this and will recall it the next time they want to solve a problem at the expense of the oil and gas industry.

I ask that the attached letter appear in the RECORD.

The letter follows:

JOHN L. COPELAND,
Shreveport, LA, August 23, 1985.

Mr. Nelson D. Abell.
Mr. Carl W. Bates.
Dr. Richard J. Blanchard.
Mr. A. David Evans.
Dr. James W. Geisler.
Mr. Quintin T. Hardtner III.
Mrs. Elizabeth K. Hicks.
Mr. Roy W. James, Jr.
Dr. William C. Kalmbach, Jr.
Mr. Tex R. Kilpatrick.
Mr. Henry Moore III.
Mr. R.L. Telford.
Mr. Frank B. Treat, Jr.
Mr. Claude O. West.
Mr. Charles Cody White, Jr.

DEAR PARTICIPANTS: For numerous reasons, including the so-called gas bubble, the uncertainty of OPEC's policies, the price of both oil and gas, the lack of decent gas markets, windfall profits (excise) tax cost and administration, over-regulation (both state and federal), and questions concerning proposed tax legislation (both state and federal), we do not feel that investment in the

energy industry is viable for the non-industry individual at this time. Accordingly, we will not renew our exploration and development program which expires on August 31, 1985.

My thanks to each of you for your cooperation, confidence and trust.

Sincerely yours,

JOHN L. COPELAND.●

TVA NEEDS AN INDEPENDENT INSPECTOR GENERAL

● Mr. HUMPHREY. Mr. President, last Friday the Board of Directors of the Tennessee Valley Authority voted to create a new position within the agency titled an inspector general. The inspector general would be appointed by the Board and would report directly to the Board and to the Congress.

This decision raises a number of important issues that I would call to the attention of my colleagues, particularly those who do not represent one of the seven Tennessee Valley States. As chairman of the Subcommittee on Regional and Community Development, which has jurisdiction and oversight responsibilities for TVA, I have been following events at the agency closely, and with very considerable concern. TVA, which is wholly owned by the Federal Government, and wholly supported by the ratepayers it serves, is the Nation's largest electric utility. Serving parts of seven States, TVA employs 33,000 people and serves well over 2.5 million customers.

TVA is, without question, one of the most unique Federal agencies in existence today. Its enabling legislation, the Tennessee Valley Authority Act of 1933, endowed this agency with the considerable authorities of Government, but also with the flexibility of a private corporation. The purpose was to let a struggling and deeply depressed valley out of its condition and put it more closely on par with the rest of the Nation. The law placed the authority for fulfilling that mission to a three man board of directors, each of whom would serve terms of 9 years.

Though the original TVA Act did not necessarily contemplate an electric utility, early board members steered the agency in that direction. Over the years, TVA constructed and successfully operated a large network of hydroelectric dams and coal burning facilities. Then, in the early 1970's, TVA made a fateful decision to embark on building the free world's largest nuclear power system. Using what were faulty assumptions about the demand for electricity, the TVA board decided to build 17 nuclear reactors.

Today, that lofty dream stands in shambles. Of the original 17 reactors, construction of 8 has been cancelled. All five of TVA's available nuclear reactors have been shut down for several weeks, and it is unclear when they will be brought back up. Work at four other plants under construction has been slowed. Confidence in the agency has been shaken by employee allegations of construction irregularities. The agency has received sharp criticism from the Nuclear Regulatory Commission [NRC]. And, the agency announced recently that it will have to increase its electric rates 6.9 percent, in part to cover costs stemming from problems in the nuclear program.

Amid the nuclear power program mess, there was a renewed interest in the proposal to install an inspector general at the TVA. I say renewed because in 1981, amid sharp outcries among TVA ratepayers over enormous electric rate increases, legislation was introduced that would have created an inspector general position at TVA, much like similar posts at other Federal agencies. TVA resisted strongly, and instead, agreed to create an office of audit and evaluation. At a July 15, 1985, hearing before the Regional and Community Development Subcommittee, Charles H. Dean, Chairman of TVA's Board of Directors stated that because the office of audit and evaluation was absolutely and totally independent, there was no need for an inspector general. Mr. Dean stated, "we have created such a good set of checks and balances within the agency, including the use of outside auditors, there has been very little mention of inspectors generals in recent years * * *." Richard Freeman, a member of the TVA Board stated, "we have, I think, as fine a record—in terms of the kinds of things that the inspector general is supposed to be worring about, we have a very fine record. It works quite well."

What has caused such a turn-around in opinion in 3 months about the need for an inspector general within TVA is not clear—it should be noted that Director Richard Freeman abstained from this vote. I would say that any movement in this direction on the part of the board is certainly encouraging. However, it should be made absolutely clear that the proposal the Board of Directors has approved is nothing more than a warmed-over office of audit and evaluation. There appears to be no difference, particularly in light of the testimony received before my subcommittee in July, between a board appointed inspector general and the present office of audit and evaluation. This is flimsy window dressing for fundamental and far reaching problems.

To their credit, Members in both Houses from the TVA region have introduced legislation that would create a statutory inspector general at the Tennessee Valley Authority. I believe that it is only under this structure that auditors would have truly independent authority, and thus would ensure confidentiality for individuals who came forward, and aggressive investigations of allegations. Also, it is only through this independent structure that solid analysis can be offered which will help the board in making sound prospective policy decisions.

Mr. President, while I would support an inspector general at TVA created through statute, I believe this can only be a first step. More needs to be done. It is my belief that TVA got into its present mess because of fundamental problems with the way the agency is structured. I want to share those thoughts with my colleagues in a statement I will place in the RECORD tomorrow.●

WEEKLY BUDGET SCOREKEEPING REPORT

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate the budget scorekeeping report for the week of October 14, 1985, prepared by the Congressional Budget Office in response to section 5 of the first budget resolution for fiscal year 1986. This report also serves as the scorekeeping report for the purposes of section 311 of the Congressional Budget Act.

The report follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, October 21, 1985.

Hon. PETE V. DOMENICI,
Chairman, Committee on the Budget,
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The attached report shows the effect of Congressional action on the budget for fiscal year 1986. The estimated totals of budget authority, outlays, and revenues are compared to the appropriate or recommended levels contained in the most recent resolution, S. Con. Res. 32. This report meets the requirements for Senate scorekeeping of Section 5 of S. Con. Res. 32 and is current through October 11, 1985. The report is submitted under Section 308(b) and in aid of Section 311(b) of the Congressional Budget Act.

Since my last report the Congress has cleared for the President's signature the Energy and Water Appropriations Bill for 1986, H.R. 2959, and amendments affecting the Special Defense Acquisition Fund, S. 1726, changing budget authority and outlay estimates.

With best wishes,
Sincerely,

RUDOLPH G. PENNER.

CBO WEEKLY SCOREKEEPING REPORT FOR THE U.S. SENATE, 99TH CONGRESS, 1ST SESSION AS OF OCTOBER 18, 1985

FISCAL YEAR 1986

[In billions of dollars]

	Budget authority	Outlays	Revenues	Debt subject to limit
Current level [1]	1,067.4	980.3	793.0	1,823.8
Budget resolution, Senate Concurrent Resolution 32	1,069.7	967.6	795.7	[2] 2,078.7
Current level is:				
Over resolution by		12.7		
Under resolution by	2.3		2.7	255.0

[1] The current level represents the estimated revenue and direct spending effects (budget authority and outlays) of all legislation that Congress has enacted in this or previous sessions or sent to the President for his approval.

In addition, estimates are included of the direct spending effects for all entitlement or other programs requiring annual appropriations under current law even though the appropriations have not been made. The current level excludes the revenue and direct spending effects of legislation that is in earlier stages of completion, such as reported from a Senate Committee or passed by the Senate. Thus, savings from reconciliation action assumed in Senate Concurrent Resolution 32 will not be included until Congress sends the legislation to the President for his approval. The current level of debt subject to limit reflects the latest U.S. Treasury information on public debt transactions.

[2] The current statutory debt limit is $1,823.8 billion.

FISCAL YEAR 1986 SUPPORTING DETAILS FOR CBO WEEKLY SCOREKEEPING REPORT, U.S. SENATE, 99TH CONGRESS, 1ST SESSION AS OF OCTOBER 18, 1985

[In millions of dollars]

	Budget authority	Outlays	Revenues
I. Enacted in previous sessions:			
Revenues			792,800
Permanent appropriations and trust funds.	717,652	631,009	
Other appropriations		185,348	
Offsetting receipts	−162,006	−162,006	
Total enacted in previous sessions.	555,645	654,351	792,800
II. Enacted this session:			
Famine Relief and Recovery in Africa (Public Law 99–10).		421	
Federal Supplemental Compensation Phaseout (Public Law 99–15).			10
Appropriations for the MX missile (Public Law 99–18).		368	
Contemporaneous recordkeeping repeal bill (Public Law 99–44).			13
United States-Israel Free Trade Act (Public Law 99–47).			−8

Salaries of judges	3	1	
Payment to civil service retirement [1].	(214)	(214)	
National wildlife refuge fund.	(2)	(2)	
General revenue sharing [1].	(1,142)	(1,142)	
Total entitlements	2,663	2,284	
Total current level as of October 18, 1985.	1,067,417	980,306	792,995
1986 budget resolution (S. Con. Res. 32).	1,069,700	967,600	795,700
Amount remaining:			
Over budget resolution		12,706	
Under budget resolution.	2,283		2,705

[1] Interfund transactions do not add to budget totals.

[2] Less than $500 thousand.

Note: Numbers may not add due to rounding.●

IRVING R. KAUFMAN, A DISTINGUISHED JURIST

● Mr. MOYNIHAN. Mr. President, the Federal bench in New York State counts many distinguished jurists among its members. Irving R. Kaufman of the Second Circuit of the U.S. Court of Appeals is one such judge.

Judge Kaufman was born and educated in New York City, and has been a Federal judge now for 35 years. In addition to his heavy caseload at the court of appeals, Judge Kaufman heads the President's Commission on Organized Crime. A recent article in the New York Law Journal describes the judge's important work with that commission, and I ask that it be printed in the RECORD.

The article follows:

[From the New York Law Journal, Oct. 11, 1985]

KAUFMAN STAYS IN FAST LANE AS JUDGE, CRIME PROBER, WRITER

(By Nelson Seitel)

After thirty-five years on the Federal bench, Judge Irving R. Kaufman continues to function in and out of court at a swift pace. In addition to a full load as a Judge of the Second U.S. Circuit Court of Appeals, he has since July, 1983 been chairman of the President's Commission on Organized Crime. While the dimensions of that assignment and his court work might tax the energy of many persons, Judge Kaufman also fits in time to write articles for legal journals and newspapers.

In establishing the Commission on Organized Crime, President Reagan charged it with responsibility for defining the nature of organized crime, the sources and amounts of its income; for evaluating federal laws pertinent to organized crime; and to make recommendations for administrative and legislative improvements for coping with organized crime problems.

CANCER ON NATION

The extent of the Commission's mission was delineated by Judge Kaufman in accepting his appointment as chairman. "Organized crime has spread its tentacles throughout our nation," he said. "It is parasitic and cancerous. We are all aware of the massive influx of narcotics into this country and of the staggering economic toll of this and other illegal activities. One estimate places the value of drug traffic at $79 billion a year. This is more than the total profits of the country's 500 largest corporations.

"American citizens are victimized daily by the traditional staples of organized crime: loansharking and racketeering, gambling and prostitution, kickbacks for legal contracts, invasion of pension funds of hard-working people, and, in its most violent form, contracts for murder. Prison gangs grow in number and violence.

"We are confronted with a hydraheaded monster which takes on new shapes as we try to combat it. As criminal cartels become increasingly sophisticated, so the threat to our citizens assumes more dangerous form."

SEVEN HEARINGS HELD

The Commission has held seven public hearings so far, three in New York City, two in Washington, and one each in Miami and Chicago. At the first hearing in Washington, the principal witnesses were then Attorney General William French Smith, William H. Webster, Director of the Federal Bureau of Investigation, and Francis Mullen Jr., Administrator of the Drug Enforcement Administration.

In the first of its New York hearings, the Commission explored the problems of financial laundering schemes of organized crime. One DEA undercover agent testified how one man laundered more than $150 million in behalf of narcotics traffickers. In the second New York hearing, the Commission exposed the organization of organized crime groups rooted in Asia, the first major exposure of the Japanese Yakuza groups, the Chinese Triad and Tong societies, and Vietnamese criminal groups. The third New York hearing focused on the involvement of organized crime in gambling and its extensive operations of money-laundering through legal gambling establishments.

The Chicago hearing revealed the extent to which organized crime plays a dominating role in victimizing union members by

labor racketeering. The hearing in Miami was concerned with heroin trafficking and shed light on the roles of Mexicans, Nigerians and Pakistanis in those operations.

WORK REVIEWED

In reviewing some of the work of the Commission, Judge Kaufman said: "If there is one common theme that emerged from our work so far, it is that money is the lifeblood of organized crime. As we discovered in our report on money laundering, criminal syndicates use their income to obtain influence and control over businesses and political institutions."

Last March, the Commission organized and conducted a symposium in New York on lawyer ethics in representing defendants in organized-crime cases, a subject that offends and concerns Judge Kaufman.

Reflecting on the symposium, Judge Kaufman said: "We heard about a lawyer who represented key Cosa Nostra members and admitted his office routinely was used to conduct illicit business because it was less likely to be bugged. We were told of a lawyer who not only knew his clients were suborning perjury but actively assisted them."

SELF-REGULATION URGED

A report prepared by the Commission on lawyer ethics in connection with the symposium concluded: "We believe the legal profession cannot and should not be allowed to ignore its responsibility to safeguard the legal process from the unsavory and unethical actions of a small group of attorneys who assist organized crime in its criminal and financial affairs. Indeed, because of its privilege of self-regulation the profession has a particular duty to police itself. The first step is for the profession to recognize the existence of these lawyers and examine the threat they pose to public confidence in the legal profession and legal process."

Judge Kaufman has firm views about the impact of organized crime and expresses them freely:

Labor racketeering: "The extent and duration of organized-crime involvement in union and management racketeering has disturbing implications for our economy and the integrity of the trade union movement. The costs of racketeering—measured in terms of corruption of the free market and the imposition of higher prices—are borne by every citizen of this country. Indeed, it would not be an exaggeration to state that a percentage of the cost of every commodity or service is diverted by racketeers. In perhaps no other area of endeavor has organized crime been so intractable and posed so great a threat to a fundamental aspect of our economic and political fabric."

Money-laundering: "The recommendations in the Commission's report represents a multifaceted response to the problems of money-laundering. Foremost among our proposals is the enactment of a new statute—the Financial Institutions Protection Act—that would prevent banks and other financial institutions from being used unwittingly as conduits for the transfer of illegally-acquired funds. In addition, the Commission's proposed legislation would for the first time make the activity of laundering a criminal offense, enabling law enforcement authorities to confront this problem directly. Although the statutory recommendations included in our report are vitally important, in isolation they are an inadequate solution to the problems engendered by laundering schemes.

"Accordingly, our recommendations include voluntary remedial measures that can be adopted by financial institutions, as well as administrative safeguards to be implemented by the Secretary of the Treasury. I believe the Commission's three-pronged strategy to confront money-laundering will provide law enforcement officials and financial institutions with the tools necessary to detect and prevent laundering schemes.

Organized crime generally: "As the revelations from the Commission's hearings make clear, organized crime today is a more pernicious and sophisticated force than ever before. Traditional criminal groups have entered into new areas of activity, and new organizations have become active in a wide variety of endeavors. The Commission's recommendations are designed to do no less than render organized crime unprofitable. I am confident that by attacking the lifeblood of organized crime, we may finally have dealt it a death blow."

CONTACTS MADE ABROAD

With organized crime expanding beyond national boundaries, Judge Kaufman has been coping with its international character. In July, he visited with law enforcement officers in France and England to discuss the extent of organized crime's influence in western Europe. In Paris, he met with a number of ranking members of the French National Police, Interpol, and the FBI to discuss the recent influx of narcotics into the United States through organized-crime channels. He presented the Commission's report on money-laundering to French authorities, who were said to have acknowledged that laundering was an area to which they had not devoted sufficient attention.

In London, Judge Kaufman met with several department heads of Scotland Yard, as well as FBI agents there, to discuss the large illegal narcotics markets that exist in Great Britain. Like the French, the British authorities asserted the Commission's report would assist them.

The Commission is expected to soon issue an interim report on labor racketeering, which will discuss the history and current status of organized-crime involvement in the labor movement. The report will recommend a series of new legislative and law enforcement strategies to combat organized crime's infiltration of labor unions. The Commission will also follow up on its earlier work on lawyers who assist the operations of organized crime. The March symposium on this subject elicited great interest and debate within the legal profession and has been cited by a number of courts confronted with allegations that lawyers have facilitated the operations of organized crime.

The final report of the Commission will be presented to President Reagan on April 1, 1986, and the Commission plans to hold a number of public hearings in the near future relating to the final report.●

S. 1739, THE HOME AUDIO RECORDING ACT

● Mr. D'AMATO. Mr. President, I was pleased recently to join as an original cosponsor of S. 1739, the Home Audio Recording Act. This bill holds particular significance for New York, the music capital of our Nation. The creative people who work in the music industry enrich our Nation culturally and financially, yet they themselves usually profit very little, if at all. Only 1,000 of the 25,000 members of ASCAP [the American Society of Composers, Authors, and Publishers], for example, earn over $10,000 per year from performances of their music.

At the outset, let us be very clear about what this bill is not and does not do. It does not apply to video cassette recorders, and it is not a precursor of smiliar legislation on videotaping. It does not apply to playback-only machines, such as the Walkman and automobile cassette players.

The supporters of this bill offer it in the spirit of equity. We believe that those who do good work are entitled to be compensated for it in a fair manner. Those who enrich our lives with their music should be rewarded, not impoverished, by those who benefit from their work. Yet we see every day how the development of sophisticated audiotape cassette recorders is making it quite a simple thing to deprive composers of the rewards and compensation to which they are entitled.

The most basic recorders make it possible to tape a composer's music from a record without providing the composer with any compensation. As Senator MATHIAS points out in his statement introducing this bill, the new dual-port audio recorders make it possible to duplicate prerecorded cassettes without paying compensation to the composer. One Japanese electronics company has even announced that it will introduce a triple-port cassette recorder that can simultaneously make two unauthorized copies of prerecorded cassettes.

These developments are depriving musicians, composers, and producers of an estimated $1.5 billion in income. In testimony before the Senate Judiciary Committee, Dr. Alan Greenspan estimated that more than two-fifths of all home taping is done in place of the purchase of prerecorded records or tape. This means there is less money available to develop new creative talent, and less money to support and encourage risky, and often unprofitable, ventures to record classical music, jazz, folk, and gospel.

To correct this injustice, and to give musicians what is rightfully theirs, S. 1739 requires a royalty payment of 5 percent on the wholesale price of audio (not video) recording equipment and 1 cent per minute for blank tapes. Dual-port recorders would be subject to a special royalty charge of 25 percent of the wholesale price to reflect the fact that they are specifically designed for duplication of prerecorded tapes. These royalties will be pooled and distributed to copyright owners.

Mr. President, I urge my colleagues to study, and support, this bill. It is a well-researched and well-crafted attempt to encourage those who compose and perform music, while keeping the costs to consumers as low as possible.●

IOWA CITY DECLARES ITSELF A NUCLEAR-FREE ZONE

● Mr. HARKIN. Mr. President, Congress spends a considerable amount of time debating the defense policy of our Nation and the steps we need to take to put a halt to the nuclear arms race. I am proud to announce that the people of Iowa City, IA, are taking concrete steps to do something about it.

On the night of Tuesday, September 24, 1985, the city council of Iowa City approved by a 5-to-1 vote an ordinance which declares its community a nuclear-free zone. Iowa City, a community of more than 50,000 residents and home to the State's largest university, is the first city in Iowa to declare itself nuclear free, and the 102d such city in the United States.

Currently, there are more than 10 million people in the United States living in nuclear-weapons-free zones. It is my hope that the passage of this ordinance in Iowa City will serve as a catalyst for other communities across Iowa and the Midwest to take similiar action.

I commend the city council of Iowa City and the citizens of that community for their concern and commitment on this vital issue. By thinking globally and acting locally, they are doing what they can to end the arms race. They realize they have nothing to lose by trying to make the world a more peaceful place, and everything to lose if we fail.

I ask that the text of the ordinance be printed in the RECORD.

The ordinance follows:

THE NUCLEAR WEAPONS FREE IOWA CITY ORDINANCE

SECTION 1. NAME. This ordinance shall be known as "The Nuclear Weapons Free Iowa City Ordinance."

SEC. 2. PURPOSE. The purpose of this ordinance is to establish Iowa City as a nuclear weapons free zone in which work on nuclear weapons is prohibited.

The people of Iowa City find that the presence of nuclear weapons facilities within Iowa City is in direct conflict with the maintenance of the community's public health, safety, morals, economic well-being, and general welfare.

SEC. 3. PROHIBITION OF NUCLEAR WEAPONS WORKS. No person shall knowingly engage in work, within Iowa City, the purpose of which is the development, production, deployment, launching, maintenance or storage of nuclear weapons or components of nuclear weapons.

SEC. 4. DEFINITIONS. "Person" means a natural person, as well as a corporation, institution or other entity.

"Nuclear Weapon" is any device, the purpose of which is used as a weapon, a weapon prototype or a weapon test device, the intended detonation of which results from the energy released by fission and/or fission reactions involving atomic nuclei. For the purposes of this Ordinance, "nuclear weapon" includes the weapon's guidance, transportation, propulsion, triggering, and detonation systems.

"Component of a nuclear weapon" is any device, radioactive or non-radioactive, designed to be installed in and contribute to the operation of a nuclear weapon.

SEC. 5. NOTIFICATION. Upon adoption of this ordinance, the City Council of Iowa City shall officially notify Iowa City's Congressional Representatives and Senators, the President of the United States and the recognized leaders of the Soviet Union, Great Britain, France, the People's Republic of China, India and any further nuclear weapons states of the contents of this initiative.

In addition, the City Council of Iowa City shall instruct the appropriate city officials to post signs on major entrances to Iowa City stating "Nuclear Weapons Free Zone" in a manner that conforms with standards set forth in the Federal Highway Administration's Manual on Uniform Traffic Control Devices for States and Highways.

SEC. 6. ENFORCEMENT. Each violation of this Ordinance shall be punishable by up to 30 days imprisonment and a $500 fine. Each day of violation shall be deemed a separate violation.

Residence of Iowa City shall also have the right to enforce this Ordinance by appropriate private civil actions for declaratory or injunctive relief. Reasonable attorney fees shall be awarded to a prevailing plaintiff in such litigation.

SEC. 7. SEVERABILITY CLAUSE. If any section, sub-section, paragraph, sentence or word of this Act shall be held to be invalid, either on its face or as applied, the invalidity of such provision shall not affect the other sections, subsections, paragraphs, sentences or words of this ordinance, and the applications thereof; and to that end the sections, subsections, paragraphs, sentences and words of this Ordinance shall be deemed to be servable.●

ORDERS FOR TUESDAY

RECESS UNTIL 9:15 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 9:15 a.m. on Tuesday, October 22.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. Following the recognition of the two leaders under the standing order, I ask unanimous consent that the following Senators be recognized for not to exceed 15 minutes each: Senators MCCLURE, WILSON, THURMOND, HECHT, and PROXMIRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. DOLE. Following the special orders just identified, Mr. President, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond the hour of 11 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. It was my hope earlier that we could turn to consideration of H.R. 2965, State, Justice, and Commerce appropriations bill. I am advised we cannot do this until tomorrow afternoon, which probably means we cannot do it tomorrow at all, because we want to get back to the reconciliation bill.

RECESS TOMORROW FROM 12 NOON TO 2 P.M.

Mr. DOLE. I ask unanimous consent that at 12 noon, the Senate stand in recess until the hour of 2 p.m. for the weekly party caucuses.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE TOMORROW

Mr. DOLE. Mr. President, at 2 p.m., as previously indicated, it is the intention of the majority leader to complete action on H.R. 3424, the Labor-HHS appropriations bill. The Proxmire amendment is the only amendment in order. He has indicated that he needs about 15 minutes. I guess there are two Proxmire amendments in order, but I understand he will only offer one.

It is my hope that between 2 o'clock and 3 o'clock, we can dispose of that proposal.

Tomorrow at 11 o'clock I may move the consideration of the extension of the 1971 International Wheat Agreement.

But hopefully, if we do that, we will have the vote following the vote on Labor-HHS final passage. Therefore, it is obvious we will have a number of rollcall votes tomorrow, and I think both Senators DOMENICI and CHILES want us to move to the consideration of the reconciliation bill. I can advise the Senate we will do that following the last rollcall vote either on Labor-HHS or on the so-called wheat amendment, if a rollcall is requested.

RECESS UNTIL 9:15 A.M. TOMORROW

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move we stand in recess until 9:15 a.m. on Tuesday, October 22.

The motion was agreed to; and, at 6:40 p.m., the Senate recessed until Tuesday, October 22, 1985, at 9:15 a.m.

NOMINATIONS

Executive nominations received by the Senate October 21, 1985:

EXECUTIVE OFFICE OF THE PRESIDENT

Charles Roger Carlisle, of Vermont, for the rank of Ambassador during his tenure of service as U.S. Negotiator on Textile Matters.

DEPARTMENT OF THE TREASURY

Robert Logan Clarke, of Texas, to be Comptroller of the Currency for a term of 5 years, vice C.T. Conover, resigned.

DEPARTMENT OF THE INTERIOR

Gerald Ralph Riso, of New York, to be an Assistant Secretary of the Interior, vice J. Robinson West, resigned.

FEDERAL LABOR RELATIONS AUTHORITY

Jerry Lee Calhoun, of Washington, to be a member of the Federal Labor Relations Authority for the remainder of the term expiring July 29, 1987, vice Barbara Jean Mahone, resigned.

William J. McGinnis, Jr., of New Jersey, to be a member of the Federal Labor Relations Authority for a term of 5 years expiring July 1, 1989, vice Ronald W. Haughton, term expired, to which position he was appointed during the last recess of the Senate from October 12, 1984, until January 3, 1985.

IN THE COAST GUARD

The following officers of the U.S. Coast Guard for promotion to the grade of commodore:

Capt. Richard I. Rybacki.
Capt. Martin H. Daniell, Jr.
Capt. Robert T. Nelson.
Capt. Marshall E. Gilbert.
Capt. Joseph E. Vorback.

IN THE NAVY

The following-named officer, under the provisions of title 10, United States Code, section 5141, to be Chief of Naval Personnel and to be assigned to a position of importance and resonsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Rear Adm. Dudley L. Carlson, xxx-xx-xxx-..., 1110, U.S. Navy.

IN THE NAVY

The following-named U.S. Naval Reserve officer, to be appointed permanent commander in the line of the U.S. Navy, pursuant to title 10, United States Code, section 531:

Cooper, Arthur Thomas

The following-named U.S. Naval Reserve officers, to be appointed permanent lieutenant commander in the line of the U.S. Navy, pursuant to title 10, United States Code, section 531:

Badick, Joseph Robert
Bogert, Edmund Archib
Carnahan, William Gra
Collins, Joe Milton

EXTENSIONS OF REMARKS

NEW YORK RIGHT TO LIFE COMMITTEE

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. SMITH of New Jersey. Mr. Speaker, on October 19, 1985 our colleague JIM SENSENBRENNER delivered a very incisive speech before the New York State Right to Life Committee's convention. During the last several years, JIM SENSENBRENNER has been a courageous leader in protecting the sanctity of human life. I strongly recommend JIM'S observations for my colleagues' consideration.

REMARKS BY CONGRESSMAN F. JAMES SENSENBRENNER, JR. TO THE NEW YORK RIGHT TO LIFE COMMITTEE, ROCHESTER, N.Y.

Ladies and Gentlemen, I was in Bulgaria last December. We were investigating the attempted assassination of the Pope. As we flew back into New York, we passed over the Statue of Liberty. I remembered the torch had been extinguished for repairs. I felt a certain amount of sadness, that, although it was temporary, the lamp of liberty—the symbol of freedom—had been extinguished.

There is a grand campaign to relight the lamp—to refurbish the Statue. But as we think of relighting the lamp, let us think also of the message which has been dimmed. For it is not only liberty which has been dimmed, and it is not only liberty that we worship. It is also life and the pursuit of happiness made possible by liberty. They are inseparable.

But many in our society seem to think we can have liberty and happiness without life. You have asked me to speak on "Where Do We Go From Here?" As I look at the faces of the people in this room, I can see your ancestors, those people who came across a violent sea to find this life, this liberty, as part of their elusive dream. Did those people who boarded vessels called "coffin ships" come to breathe freedom for themselves? No; they came so that their children might breathe the air of freedom. When they fled a famine in Ireland, religious persecution in Poland, the brutal monarchies in Germany, and the instability and economic serfdom in Italy, they came here.

But their sacrifices were worth it because they were fleeing to something. They were fleeing to realize their dreams—their dreams of life and liberty.

In the past, each generation has been called upon to brave evil in our country. We were called upon to defend liberty in Gettysburg; to fight in the trenches of the War to End All Wars; to fight in Anzio, Guadalcanal, Normandy, Korea, and in the rice paddies of Vietnam. Each generation has been called upon to protect life and liberty in this country and each generation has proudly met this challenge.

Again, we are faced with a great challenge: To keep inseparable the truth that without life there is no liberty, and without liberty there is no pursuit of happiness. In the spirit of rekindling the light of liberty let us face the challenge before us in the pro-life movement. Before we examine the future of the pro-life movement, it would be in order to discuss the challenges it has faced in the past and how the current battles are being fought.

Unarguably, the low point in the pro-life movement was the 1973 case of *Roe* v. *Wade*. In this case, the U.S. Supreme Court found that a right to abortion exists within the four corners of the Constitution. *Roe* v. *Wade* has been described by U.S. Supreme Court Justice Sandra Day O'Connor as "on a collision course with itself." *Roe* v. *Wade* represents the worst of the worst of Western jurisprudence. *Roe* v. *Wade* has licensed the indiscriminate killing of millions of preborn babies in this country. It has provided the anchor for the pro-abortion forces in their attempts to further cement and expand the so-called right to abortion.

In both Federal and State forums, these attempts, some of which have been successful, have been characterized in the form of proposed regulations, judicial edicts, or statutes. Examples include statutes requiring that public funds be used for abortions, Equal Rights Amendments, unisex insurance statutes, and the Federal regulations that implement Title IX of the Education Amendments of 1972.

As the Ranking Minority Member of the House Judiciary Subcommittee on Civil and Constitutional Rights, what is most disturbing is that the right to abortion is being characterized in the context of sex discrimination. In other words, if you are opposed to abortion, you are guilty of sex discrimination. It is the tail that wags the dog in many civil rights issues that come before Congress. Attempts by Congress or the other branches of the Federal Government to fight discrimination based on race, color, creed, and national origin are thwarted because almost all the major civil rights organizations have equated abortion with sex discrimination. The societal right to privacy as expressed in abortions is seen as paramount to the right to life.

For the most part, major civil rights organizations have allowed themselves to be used by the pro-abortionists to further an agenda which, in my opinion, is separate and distinct from the civil rights agenda. In the area of sex discrimination, women's groups have allowed abortion rights to stymie further progress in enacting laws and policies meant to eradicate discriminatory practices which exist against women today.

Perhaps the most blatant example of this was the Equal Rights Amendment. The original Equal Rights Amendment failed to be ratified by the States after an unprecedented three-year extension because of deficiencies, the biggest deficiency being its effects on abortion rights. In the 98th Congress, the Civil and Constitutional Rights Subcommittee heard testimony from dozens of witnesses pleading for Congress to send to the States an Equal Rights Amendment. Not once did a pro-ERA witness bring up the issue of abortion, and when asked, in almost every instance, pro-ERA witnesses denied any link between the ERA and abortion. It would not, we were told, overturn the *Harris* v. *McRae* case, in which the Supreme Court, by a razor-thin margin of 5-4, upheld the Hyde Amendment prohibiting Federal funds from being used for abortions. For the record, a judge in Pennsylvania later ruled that the Pennsylvania ERA, which is almost identical to the proposed Federal ERA, overturned a State statute that prohibited medicaid funds from being used for abortion. However, because of a fear that an abortion-neutral amendment that I proposed to the ERA would pass, the ERA was considered under a procedure allowing no amendments. It failed to pass by a six-vote margin, with both Democrats and Republicans standing firm in their support of the right to life.

Also in the 98th Congress, legislators were told about the need for unisex insurance, a concept that prohibits sex from being a criterion for insurance rates. However, when it was shown that health insurance plans under a unisex insurance statute would have to provide abortion coverage, a hue and cry was raised. The bill never reached the floor after amendments were adopted in Committee to make the unisex law abortion-neutral. Why? Because it lost the support of the pro-abortion forces who control both the women's movement and the civil rights movement.

Just as tragic is the current civil rights fight in Congress over H.R. 700, the Civil Rights Restoration Act of 1985. Congress has been told that such legislation is necessary because of a narrowly crafted Supreme Court opinion in *Grove City College* v. *Bell, Secretary of Education*.

In hearing after hearing, witnesses before the Subcommittee on Civil and Constitutional Rights were told that Congress must enact legislation to overturn the Grove City decision. At issue, we were told, was the government's power to adequately enforce the civil rights statutes that combat race, sex, handicap and age discrimination. However, our Subcommittee also heard testimony that H.R. 700: (1) would expand abortion rights, forcing religious institution, i.e., colleges, universities and hospitals, to provide abortion or abortion-related services in their health plans; (2) would render inoperative State laws that prevent public funds from being used for abortions; and (3) would require non-religious institutions to provide abortions or abortion-related services.

At issue is an inconsistent Federal policy. On the one hand, the Hyde Amendment prevents Federal funds from being used for abortions. However, under current Title IX regulations, which are expanded by H.R. 700, an education institution which receives Federal aid must use its own funds to provide abortion or abortion-related services in its health plans or facilities.

Thus, Notre Dame or Georgetown University both could be required to pay for abortions or abortion-related services out of their own funds.

Congressman Tauke and I drafted amendments to correct this major flaw.

Because the Tauke-Sensenbrenner abortion neutralization amendment, which has

---

the strong support of the National Right to Life Committee and the U.S. Catholic Conference of Bishops, will receive a majority of the votes in the House of Representatives, the civil rights organizations predictably have prevented the bill from being scheduled for a vote. Again, the expansion of abortion rights has stopped dead in its tracks legislation which we in Congress were told was urgently needed to insure that federal dollars do not support discrimination.

Thus, it would seem that forcing Catholic institutions to provide abortion services is more important than insuring that race discrimination does not exist with the help of Federal dollars. Handicapped discrimination against infants who may need life-saving operations is placed on a lower level than Catholic institutions providing abortion services.

Discrimination against the aged or handicapped is secondary in status to abortion, as is discrimination in education programs and activities under Title IX.

The leadership in our country is in a sorry state when over 170 civil rights organizations let abortion wag the whole civil rights agenda. This can and must be changed.

The lofty principles upon which our country was founded and upon which the civil rights movement is premised compel the rejection of the anti-life, anti-child, anti-human view of life and to oppose the deadly technological and rationalization of the destruction of human life.

The ultimate moral test of the individual and of society rests upon how those who are in the dawn of life, those who are in the twilight of life, and those in between who are burdened by ignorance, discrimination, mental or physical handicaps, are treated. The adoption of a philosophy that eschews the most basic of rights—the right of life—must be fought with every fiber of our being, for it threatens the fabric of our great nation.

Ladies and Gentlemen, Where Do We Go From Here? What shall we do to change the path we are following? I suggest that we stand back and take a good look at our nation's history and see how we've responded in similar situations in order to find out where we should go from here.

In 1857, nine Justices sat on the Supreme Court and decided the Dred Scott case. In essence, the argument was presented that those first few words of the Constitution . . . "We the People" . . . did not include "We the Black People" of our nation. In one judicial instant, the Supreme Court decided that blacks were not people, and in another instant, good people everywhere rose up in protest. Our nation was split in two over this crucial issue and the civil war began. After years of our nation's blood being spilled on both sides, there finally came a time for healing; and three Amendments to the Constitution were added. These amendments rejected every letter and word of the Dred Scott decision. It was an absolute response to our pre-Civil War Supreme Court's outrageous belief that, legally, blacks were not persons. Who today would doubt the validity of the Bill of Rights and the absurdity of the Dred Scott decision? Today, men and women alike, conservatives and liberals, Democrats and Republicans, all believe in the fundamental truths espoused in the 13th, 14th, and 15th Amendments.

In 1973, nine other Justices sitting in the chambers of the Supreme Court, were faced with a similar question of whether or not unborn children deserve the protections of, and inclusion in, the words . . . "We the People." Once again, the Court concluded with an absurdity: that unborn children (a class of people) would be defined as non-persons, unworthy of the protection of the Constitution. Our Supreme Court paid attention to legal arguments but ignored a fundamental truth: that all human life—whether hidden in the womb or hidden in different colors of skin—deserves the protection of . . . "We the People".

History has noted our response to the Dred Scott decision: the Civil War. Today, a new war rages. Like our Civil War, this battle has started not from the clatter of bayonets or the sound of gunfire, but rather from the clap of a judge's wooden gavel. And once again, the people of this great nation have run to either side, no longer divided by North and South, but now divided by the moral borders of right and wrong. We are here today to contemplate victory; to create a strategy for success; to bring a plan into reality which will make our people's future protected. We should embrace a doctrine of civil rights which has as its starting point (rather than as an afterthought) the sanctity of life in the womb. We must protect our people before they are born, and from that point onwards. No matter what their color, race, sex, or religious creed, our doctrine today cries out: protect . . . "We the People!"

Many of us here today are the children and grandchildren of immigrants to this great nation. I could walk through this hall tonight and hear tremendous stories—each of them authentic and unique—about your grandparents' and great-grandparents' sacrifices and struggles for survival when they arrived here. And why did they make this sacrifice? They would tell you that it wasn't for them alone: it was for you, for their children, and their children's children. I place before you a somber question: Would they have been so willing and eager to flee their homelands and make such a sacrifice if they knew that the sacrifice they endured for their children was all for naught? That their hopes and dreams they carried for themselves, their children and future generations were not protected by . . . "We the People"? These immigrants loved our country because its government was premised on the belief that life and liberty were to be cherished and respected above all else. What man or woman would have loved this nation from afar—as these immigrants did—if they knew that today this nation gives legal sanctity and protection to 1.5 million abortions every year? As a Representative of these United States, I represent all the people, including the children and grandchildren of those legendary people who built this nation: your ancestors. And for all those ancestors, I cry out: Stop this war! Bring swift victory to our children's lives and futures now!

Our great nation shall not remain a great nation; our beautiful country shall not remain a beautiful country; our hopes for our children's future shall be darkened, unless we come here today and pledge a new beginning, a new and final battle, a fortified effort to cleanse our nation's spirit and to renew and sanctify the belief of our forefathers in life and liberty above all else.

Gather together in small groups of two and three, and meet with other groups of two and three—numbers talk and are heard with other groups of two and three—numbers talk and are heard from great distances. Think about our present legal system which allows the lives of 1.5 million innocent citizens to be extinguished, and how sharply this legal system contrasts with what our forefathers envisioned for themselves and for future generations of citizens of this country. Ask yourself: Is this *my* legal system? Does it really represent what *I* believe? Is it really protecting the light of liberty for the citizens of this nation, or is it a legal system which condones the protection of selected individuals, like the legal system which said that blacks are not persons?

Eternal vigilance is the price of freedom—freedom for ourselves, our children, our children's children, and future generations. Each of us can exercise vigilance in guarding our freedoms. You can begin by looking at your elected officials and asking yourself: Does he or she share your belief that the sanctity and protection of the womb is the first and foremost civil right? If not, let your voice be heard in the next election and cast out those who are misguided and thus misguide our nation into condoning policies that selectively deny the constitutional rights of life and liberty to untold millions of innocent citizens. Support those officials and candidates who support life! Sanctify the halls of your State's legislature as well as the Rotunda of our Nation's capitol. Help amend our laws and policies so that each unborn child once again will have the fundamental and inalienable rights guaranteed in our Constitution * * *.

Make sure your elected officials know exactly where you stand on each and every issue. Make your presence known through both the ballot box and the mail box.

So, as we repair the Grand Dame of New York Harbor, let us also repair our society's treatment of its unborn citizens. It is only then that the dreams and ideals of our forefathers will be realized and insured for future generations. It is only then that all of our Yet-unborn citizens will enjoy the priceless right to life as expressed in the phrase . . . "We the People."

THE TESTIMONY OF THE MAYOR OF THE CITY OF CHICAGO ON THE PROPOSED IMMIGRATION REFORM AND CONTROL ACT OF 1985

HON. CHARLES A. HAYES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. HAYES. Mr. Speaker, former congressional Representative and now mayor of the city of Chicago, Harold Washington, recently submitted testimony before a joint hearing of the Subcommittee on Immigration and Refugee Policies of the U.S. Senate Judiciary Committee and the Subcommittee on Immigration, Refugees and International Law of the House of Representatives Judiciary Committee. As mayor of one of our Nation's largest cities, the problem of immigration is one that the city administration faces daily. I found his testimony insightful, enlightening, and incredibly practical. I would like to enter his statement into the official RECORD, so that my colleagues could benefit from his experiences.

TESTIMONY OF HAROLD WASHINGTON, MAYOR, CITY OF CHICAGO, ON THE PROPOSED IMMIGRATION REFORM AND CONTROL ACT OF 1985

Chairman Frank and Members of the Committee: I am Harold Washington, Mayor of the City of Chicago. I served in the House of Representatives and am a former member of its Judiciary Committee. During my term as a Congressman from Illinois I worked extensively on immigration reform legislation. I appreciate your courtesy in requesting my appearance here today. It is an honor to be part of such a distinguished panel in helping to fashion needed immigration reforms. My experience as a Congressman and as the Mayor for this country's third largest city have led me to a deep understanding of the issues surrounding immigration and the need for serious and just reform of our current policies.

Chicago is a city with a long history of contributions from immigrants. Founded by a Haitian, Chicago has since welcomed new arrivals from all parts of the world. We continue today to welcome others to our great city, they are among the greatest of our resources.

Because we are a rich ethnic mosaic, it is natural for me to be here today to speak on the proposed immigration reform legislation. The concerns of our communities vary, and sometimes even contradict one another. But on the issue we are addressing today, that of the potential for discrimination in this legislation, I can say that we are united in our opposition.

As a former member of this House, and of the Judiciary Committee, I am not unaware of the complexity of this issue, nor the many potential pitfalls involved in drafting such legislation. But as you face the potential for passing such landmark provisions as contained in this bill, you must carefully consider the basic issues involved. The rights of individuals to work and freely associate with others have always been paramount. To deny someone these rights is a grave mistake if based solely on their language, color or alienage.

Great steps have been taken to examine our current immigration dilemma and to develop potential solutions. Since 1981, several attempts have been made to modify and refine various provisions of immigration reform bills. Some of these have been unsuccessful; others, such as the current provision of S. 1200 for employer sanctions and triggered legalization, have not been adequately resolved.

The twin issues of sanctions and legalization have been tied together since the initial attempts to draft immigration reform. It may be a political fact that one will not occur without the other. Before that is accepted, or acted upon, however, a review of the discriminatory potential of each of its provisions is necessary.

EMPLOYER SANCTIONS

At the root of this legislation is the proposal for sanctioning employers who hire the undocumented. How will employers know who is undocumented? How many Americans can prove their citizenship when asked? Only a U.S. passport alone can establish citizenship. And we know that few have passports, much less carry them day to day.

What then will employers do? I suspect that as a shorthand for a fair identification process, employers will turn away those who appear "foreign", whether by name, race, or accent. This is discrimination. And U.S. citizens and legal residents will be affected along with the undocumented.

Even before any bill has been adopted, discriminatory effects are being felt in Chicago. The staff for the Employment and Training office for the City began to receive calls from employers, assuming the law to be already in effect, requesting a halt to the referral of all Hispanics to them for employment. This should shed some light on the effects of the Simpson bill.

If significant steps are not taken to address the potential discrimination caused by this legislation, we can expect wholesale discrimination to be all but institutionalized. The effects will be felt not only in the Hispanic communities, but in the Asian as well. Racism is a reality that affects us all. Passing legislation which further institutionalizes discrimination is a step we dare not to take. Denying any person the right to earn a living, to make a contribution to our society based upon their national origin would deny civil rights and the progress we have made.

The Chicago District Office of the Immigration and Naturalization Service is currently conducting a program called "Operation Cooperation." This program involves the voluntary participation of employers in a verification of status for new hirees. Companies participating call the INS to verify the status of some persons applying for employment. This program does not attempt to verify the status of all applicants but rather for those with "questionable status". The result has been that agencies serving Hispanic communities in Chicago, such as Travelers and Immigrants Aid, report a marked increase in complaints from those who were turned away. They were not turned away because they were undocumented, but rather because they had insufficient proof that they were entitled to seek employment. Many have become U.S. citizens by naturalization, as well as by birth.

Earlier this year, in an attempt to detain allegedly undocumented workers who were operating taxi cabs Chicago, agents from the INS began to stop and question persons entering a city office building, contrary to the landmark decision which requires such steps to be based on "specific, articulable facts". Far from being random in their efforts, agents were detaining all persons who appeared to be "foreign". Among those who were stopped and questioned were several Hispanic city employees who were U.S. citizens. Such inexcusable actions led me to issuance of Executive Order 85-1. This action was necessary "In order to assure that all residents of the City of Chicago, regardless of nationality or citizenship, shall have equal access to municipal benefits, opportunities and service". In Chicago, we are already experiencing the ripple effects of this pending legislation, (i.e., increased discrimination). Ironically, we are here to discuss whether or not this legislation will lead to that which is already occurring. While I and others struggle towards fairness for all, legislation is today being considered which would institutionalize a second class of resident in this country.

As I previously mentioned, measures which legitimize discrimination, such as the employer sanctions in this legislation, create additional and unnecessary obstacles for persons entitled to work in this country. While the unemployment rate continues to be unacceptable, and the poor struggle to survive, this debate focuses on efforts to erect even greater barriers for those seeking to better their lot, while stripping them of their ability to fight for their rights. Without the establishment of a secure national identification system, which poses a series of civil rights issues in and of itself, U.S. citizens will have significant difficulty in establishing their rights to seek employment. For the poor, this means that they face the quagmire of large bureaucracies and the high cost of such documents as a U.S. passport, in order to prove that they have the right to work.

The persons who drafted this proposed legislation were apparently cognizant of the potential for discrimination which would result from its passage. This demonstrated in part by the plethora of studies and reports called for in its text.

While we hear flowery arguments about the issues from the proponents of employer sanctions; even the provision's strongest supporter, Senator Simpson, has seen the wisdom of supporting a sunset provision which could eliminate sanctions from the bill.

A bill must not be enacted that contains such doomed provisions as the current plans for employer sanctions, when its only legacy will be that of further institutionalizing discrimination. Sanctions will not prevent the hiring and continued exploitation of undocumented workers, as evidenced by the study conducted by GAO in 1981. Sanctions will lead to new ways on the part of employers to avoid detection by INS officials and others, and the benefits outweigh the risks. Should an employer be caught employing undocumented workers, the fines imposed on them will simply be taken from the workers themselves in the form of wages never to be paid.

LEGALIZATION

The potential for an "amnesty" program has been historically offered as a trade off for employer sanctions. What we have is no longer a true amnesty program, with increasingly restrictive requirements for legalization. The current plan has been called "triggered legalization" which will occur at some, as yet, unforeseen time when INS can effectively prevent unlawful border crossings, and employer sanctions have demonstrated their ability to prevent employment of undocumented workers. Neither of these two conditions are likely to be met, whether they are totally desirable is yet to be determined. But, if sanctions don't work, there will be no legislation; if they do, there will be no one to legalize.

As others before me have detailed, the legalization proposal of this legislative initiative is very different from previous programs. While they were seriously flawed, they at least approximated an effort to provide relief to persons who had spent significant portions of their lives contributing to our society, while living in constant fear of deportation and subject to exploitation. Just as the fictional image of "amnesty" has been shattered, so this bill betrays any hope for a just and adequate legalization program.

The enforcement provisions of this legislation have been finely honed. While the legalization provisions have all but disappeared from view, this legislation represents great efforts to achieve control, none to achieve reform. The price tag for control is unacceptably high. The poor, the immigrants, the Asian and the Hispanic, the Black and the White will all pay the price. The price is high, it is the legitimized subjugation of those who are "different", the perpetuation of a second class based on color, language, appearance and alienage. As a country which established itself as a coun-

try of immigrants; which has throughout history, grown from the contributions of those who dared to start anew; which has a motto "send us your tired, your poor, your huddled masses yearning to breathe free"; we are approaching a time in history when we will sever our life line; the immigration of those who want to improve their lot in life and to make a contribution to our society.

CONCLUSION

I support the concept of immigration reform. The need for reform has too long been ignored. But as I have also stated, such reform must be fair and must not fail to ensure the rights of all individuals.

I am opposed to employer sanctions because studies have shown that they won't be effective, will increase discrimination and will be unduly burdensome for employers and employees alike. If sanctions are, however, inevitable, steps to reduce the potential for discrimination such as the Frank amendment and the Hart/Levin amendment, defeated on the Senate floor prior to the passage of S. 1200; must be taken to protect the rights of U.S. citizens and others who have a right to seek employment in this country. An adequate verification system must be in place prior to the use of employer sanctions, and it must be a system that does not infringe on the rights of any individuals.

1. Employer sanctions should be targeted. Universal documentation checks and the imposition of fines should be imposed only after an employer is found to be hiring undocumented workers. Requiring more would be overbroad and too extensive.

2. Protective measures need to be passed that protect persons who apply for employment in writing as well as in person. Many applicants will never even get through the door because employers identify "foreign" sounding names on applications.

3. The eligibility requirements for legislation should be as inclusive as possible. Included must be a realistic date of coverage such as January 1, 1983, and the requirements for "continuous residency" must be relaxed to take into account the realistic situations of undocumented persons in the United States. Without true legalization, immigration reform is unbalanced and harsh.

4. The sunset amendment to S. 1200, offered by Senator Kennedy, is a fine beginning at limiting the negative impact of employer sanctions. I urge you, however, to move even further towards true sunset language for employer sanctions. Even assuming the usefulness of sanctions, they are, at best, an experiment. A sunset provision acknowledges this, and requires a thoughtful assessment after implementation.

5. Supply the resources needed to adequately enforce existing labor laws.

While the United States Senate was debating the discriminatory nature of this legislative initiative on the floor September 13, 1985, Senator Simpson stated: "If we are going to do civil rights legislation, let us do it, but let us not do it on an immigration reform bill . . ." It is true that not all civil rights issues can or should be addressed in an immigration reform package, but we cannot ignore these issues either. One of the goals of the Civil Rights Act was to make it illegal to refuse employment based upon an applicant's race, religion or national origin. Senator Simpson further stated, in that same floor debate, "We are talking about the thing called discrimination based on alienage, which is puzzling to scholars, and so, in a sense, vague that some of the great civil libertarians of both Houses of Congress have not even dealt with it for 20 years." I submit to you today, that as you consider legislation which would now make it illegal to hire someone, and open wide the door for alienage discrimination, it is time to take up this "puzzling" and "vague" matter and justly resolve it, prior to passage of this bill.

Thank you for your kind attention.

GRAMM-RUDMAN AMENDMENT

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. OBEY. Mr. Speaker, I want to draw my colleagues attention to testimony which was presented last Friday, October 11, before the Joint Economic Committee, concerning the Gramm-Rudman balance-the-budget amendment.

Prof. Herbert Stein, former Chairman, Council of Economic Advisers, during the Nixon administration; Prof. Walter W. Heller, former Chairman, Council of Economic Advisers, Kennedy and Johnson administrations; and Prof. Alan Blinder of Princeton University all expressed serious reservations about the Gramm-Rudman process.

Over the next few weeks, a conference committee will be trying to create a workable and realistic procedure for reducing the country's deficits. It is apparent from the testimony presented today, however, that the Gramm-Rudman proposal does not provide such a process.

STATEMENT OF HERBERT STEIN

The bill under consideration aimed at achieving a balanced budget in five years, contains the germ of one very good idea—the idea of a five year budget plan. But the idea is not developed, and unless developed further could be either ineffective or harmful.

To have an agreed-upon plan for the size of the deficit in the next five years would be helpful in government and private decision-making. But there is no reason to think that this plan should balance the budget at the end of five years or at any other time. The government should make a deliberate decision about the size of the budget deficit it wants. To do that it must consider the steps that would be necessary, on the revenue and expenditure side of the budget, to achieve the deficit goal. There are worse things than budget deficits, and we should make sure that in forcing the budget into balance we are not forcing even more important things, like the national defense, out of balance.

A rational five-year deficit reduction plan would require Congressional and Administration agreement on a five-year plan for revenues, defense expenditures, entitlement programs, interest, and all other programs, which should add up to the target deficit path. If this is not done either of two results will follow. All revenue and expenditure programs will be forced into uncertainty and instability by the effort to squeeze them within the limits of the deficit targets. Alternatively, and more likely, the system will be overridden because both the President and the Congress agree that there are many things more important to them than balancing the budget.

My main concern is with the possible effect of this legislation on the defense program. I fear that if the defense program is squeezed between arbitrary limits on revenues and arbitrary limits on borrowing the nation's real security needs will suffer. Estimates now available show that the effect of the legislation would be to cut defense substantially below recently-agreed levels, which have already been cut below Administration estimates of need.

The country is not facing a budget-deficit crisis. The Congressional Budget Resolution adopted in August laid down a path leading to quite low and sustainable deficits. If Congress, backed by the Presidential veto power, would conform to that resolution we would be in good fiscal shape. If they cannot do that, the proposed legislation is unlikely to force them to balance the budget.

I would call attention to what seem to me two technical problems with the proposed legislation. As I understand it, if Congressional action leaves the projected deficit for the next fiscal year above the target, the President is to cut all non-exempted expenditures equally across the board. I assume that means that each expenditure is to be cut by an equal percentage. But it is not clear whether each of the hundreds of line-items in the budget is to be cut by an equal percentage, or each of the seventy sub-functions, or each of the 18 functions, or each of the Departments and agencies. At one extreme we have a practical impossibility; at the other, large discretion in the President, which I don't mind but others do.

Moreover, it is not clear to me what the equal cuts are to be from. The most plausible interpretation is that the cuts are to be from the outlays implied by the appropriations that Congress has adopted. If that is the case, supporters of each program will have a strong incentive to make sure that their appropriation exceeds their real goal by a large enough percentage to make sure that after the cut their real goal is still achieved. But if the sum of everyone's real goal exceeds the amount that is compatible with the budget target—which is the source of our present problems—there is no limit to this process short of infinite appropriations.

STATEMENT BY WALTER W. HELLER

Mr. Chairman and Members of the Committee: I appreciate this opportunity to present my views to the Joint Economic Committee on the Gramm-Rudman-Hollings bill which is designed to bring our dangerous federal deficits under control.

Clearly, Congress wants to tame the deficit in the worst way—and the Senate bill comes close to doing just that. As it stands, it is an economically disruptive, socially unfair, technically deficient, and politically timid formula for deficit cutting.

Politically timid? The truly tough ingredients of a balanced attack on the deficit—tax increases and social security curbs—are held harmless under the misshapen structure of the Senate bill. And if I read it correctly, combat readiness will take a solid hit while the weapons systems that sometimes serve as a defense pork barrel will probably go unscathed. What about vital social programs for citizens with the least political clout? It's "hit 'em again, harder." And finally, while Gramm-Rudman barks loudly at our damaging deficits, it won't really bite until

the Congress is safely past the 1986 election. So much for the politics of the matter.

Now, what about the economics of it? Like any mandated and rigid formula, it would undermine, perhaps even pervert, the role of the Federal budget as an economic balance wheel in the economy.

Rigid reductions of the deficit through thick and thin—through recovery and recession—could wreak havoc on the economy. Granted, the Senate bill has a weak-kneed provision to give the President an extra thirty days to decide where to cut the budget or to call for suspending the amendment if the CBO (Congressional Budget Office) and OMB (Office of Management and Budget) predict a decline in real GNP for two successive quarters. There are three fatal flaws in this formula.

First, economic forecasting, and particularly government economic forecasting, has had a poor record in predicting recessions-to-come, and indeed, has at times failed to "foresee" a recession that was already underway. (And by the way, forcing the CBO and OMB to come up with a single set of economic and budget projections—or splitting the difference between the two if they can't agree—looks like a sure-fire way to politicize the economic projection process.)

Second, as the economy moves from recession to recovery, it can produce increases in GNP even while operating far below par. Suppose a recession reduced GNP in 1987, but modest recovery raised GNP in 1988. The Gramm-Rudman process would require that the budget deficit be only $108 billion in fiscal 1988 even if the $144 billion target for fiscal 1987 were suspended because of a projected drop in GNP. It would be damaging enough to have to put in a $36 billion or $72 billion deficit cut in 1988, but the cut would in fact have to be much greater. Looking at the CBO numbers (published in August) for a scenario of a recession in 1987, with an average recovery performance in 1988, one finds that they project a $270 billion deficit in 1988. Imagine the economic setback it would cause to slash spending and the deficit by $160 billion by 1988 to try to reach the $108 billion deficit level fixed by the Gramm-Rudman formula.

I say "try" because the facts are that it couldn't be done. If the national economy starts to slide, joblessness rises, income and profits fall, and the federal budget automatically goes into deficit as revenues shrink and spending rises. Try to balance it by boosting taxes or forcing cuts in spending, and the net result will inevitably be to draw that much more purchasing power out of an already soft and sluggish economy. This would send the economy into a deeper tailspin, thereby throwing more people out of work, further cutting tax revenues, and boosting unemployment compensation, food stamps, and similar entitlement expenditures, thus throwing the budget even more out of whack. A dog chasing its own tail comes to mind.

Third, consider the situation where there is no actual drop in GNP but a continuing "growth recession", namely, where the growth rate falls below the level required to maintain or reduce the unemployment rate. More specifically, suppose you had two years of very slow growth. Let's say that GNP growth for two years would fall two percent short of the growth rate needed to reach the projected high-employment level of about $5 trillion a year. That's a GNP shortfall of about $300 billion (two percent in year 1 and four percent in year 2). About 20 percent of that shortfall will be reflected in lower government revenues, producing a $60 billion added deficit. Yet, the Gramm-Rudman formula would rigidly require that this $60 billion be made up in addition to the $72 billion cut under their formula. Again, that would simply kick the economy in the groin and bring on an actual recession.

The technical problems of the Senate bill (unless it is modified after I write this on October 10) are legion, especially with respect to the definition of "controllables" and "uncontrollables." Let me cite a couple of examples.

Spending out of prior year's contracts is considered uncontrollable and would therefore escape the budget axe. Note what that would do in the defense area: almost 100 percent of procurement, largely weapons systems, is under prior-year contracts, hence "uncontrollable." In sharp contrast, one finds that 55 percent of research and development is under current contracts and hence "controllable;" 85 percent of maintenance and operating expenditure is current: and well over 90 percent of personnel expenditures are current. So the military share of the budget cuts would be heavily concentrated on military readiness expenditures.

Now, suppose that even the defense expenditures under past contracts were defined as "controllable." Then, to bear their across-the-board percentage share of the burden, practically all current expenditure on past contracts would have to be wiped out. Rigid formulas are obviously the enemy of rationality.

In the civilian budget, one finds that items like national parks would be hit very heavily because very little of their expenditure is under prior contracts. On the other hand, hospital construction, under long term contracts, would hardly be hit at all. Or to take another example, 80 percent of Peace Corps expenditures would be labeled "controllable," but only 33 percent of Export-Import bank expenditures would be subject to the budget knife. Enough said. Capricious cuts would be the name of the game.

These examples relate directly to another critical issue, namely, that of the distribution of the cuts among entitlements, non-entitlement social programs, and the military. With interest on the public debt, social security, and prior-year contracts (covering the bulk of military expenditures) all off limits, one-third of the budget would have to take the brunt of the supposedly "across-the-board" cuts. That is, the "controllables" would be less than $300 billion out of a roughly $950 billion budget. Two-thirds of that is defense, much of it off-limits because it is under prior-year contracts. The remainder, under $100 billion, would be the focus of the hardest hits. After taking care of non-social-security indexing adjustments, the rest of the impact would have to be borne by social programs. The cuts could be savage, whether administered by the President or by Congress.

I have long believed—and publicly documented and defended the position—that the Congress has been the more responsible end of Pennsylvania Avenue in coping with and cutting the deficit. That judgment is fully confirmed by the in-depth studies of Norman Ornstein, Resident Scholar of the American Enterprise Institute. A few excerpts from his chapter on "The Politics of the Deficit" (in AEI's Contemporary Economic Problems, 1985) will make my point:

In 1982: "It was Congress, in an approximation of congressional government, that defied conventional wisdom in an election year by slowing defense and raising taxes to reduce the deficit."

"In 1983, Congress initiated an energy tax increase. In 1984 the Republican Senate once again moved into a policy vacuum, proposing a 'down payment' on the deficit, including another significant tax increase, which the President once again belatedly endorsed."

"Through the broad sweep of American history, Congress has struggled to restrain the growth of federal spending and to limit deficits and the public debt through direct action and through periodic adjustments of its own structures to minimize the deleterious effects of political pressures."

Even the Gramm-Rudman initiative, flawed as it is, came from the Congress and gained the President's support only after a period of White House hemming and hawing.

And contrary to the view of the cynics who airily dismiss the budget-and-deficit-cutting exercises now going on in the appropriations committees, those committees are conscientiously going through a painful process to carry out the sizable deficit cuts in the Congressional Budget Resolution of last August. Even if one lets the air out of some of the inflated estimates of deficit-cutting in that effort, it appears that meaningful deficit reductions will emerge from this process.

I understand the frustration of a Congress, not normally meant to be an instrument of national leadership, being constantly forced to take the lead in budget-and-deficit cutting to fill the policy vacuum left by the President. And all the while, the Congress is being berated and ridiculed by a popular President who turns reality upside down and pretty much persuades the public that Congress is the culprit, that Congress is responsible for his $200 billion deficits and $2 trillion debt.

Under these trying circumstances, and given the dangers of our obscene federal deficits, it is not surprising that the Congress is drawn off course by the siren song of Gramm-Rudman. But instead of joining a pell-mell rush to fasten on yourselves a budgetary straight-jacket and a lock-step deficit-cutting schedule, at the same time slicing off big chunks of your fiscal power and handing them to the President, let me urge you to stop, look, and listen. The Congress should demand time to develop a fair and workable schedule for cutting the deficit without disrupting the economy and gutting social programs and then go to the American people with that plan to subdue the deficit.

Is the Gramm-Rudman formula so flawed as to be beyond redemption? Can one develop a viable substitute that will hold policymakers' feet to the fire and yet avoid the straight-jacket and cop-out features of the Senate bill? I have my doubts. But if the legislative juggernaut is relentlessly rolling to passage, what do you do to make the cure better than the disease?

The obvious answer is to change the Gramm-Rudman prescription so as to maintain the central principle of progressive reduction of the deficit but remove the dangerous side effects of that prescription. How? Perhaps start with the Democratic alternative in the Senate and tighten it as follows:

Provide sensible safeguards on the economic front by changing the unworkable anti-recession provisions of the Senate Bill, relating them not to forecasts of two quar-

ters of real GNP decline but rather to some reasonable growth rate of GNP and, preferably, to the rate of unemployment.

Open the budget-reduction process clearly and candidly to revenue increases, perhaps even providing for triggered tax increases under specified conditions.

Remove the absolute prohibition of any modification of Social Security indexing.

Remove the formula rigidities that now focus the firepower of deficit cutting on the social programs that have already been hit so hard.

Finally, correct the technical anomalies in the Senate bill relating to the definition of "controllables" and "uncontrollables" that would have such a distorting effect on the allocation of cuts between military and civilian programs and within the defense budget itself.

In other words, change a rigid and Draconian formula into a flexible but still Spartan one. It's a tall order. But I sincerely hope that we have not passed the point of no return to rationality in coping with our monstrous budget deficit.

TESTIMONY OF ALAN S. BLINDER

Mr. Chairman, members of the committee, I want to thank you for the opportunity to appear here today to give you my views on the Gramm-Rudman proposal to mandate a balanced budget by 1991.

This amendment has taken many of us by surprise, and I have hurriedly written down a few reasons why I think it is ill-conceived and inadvisable. But I want to preface these remarks by making it clear that I do agree that congressional action is needed to reduce the budget deficit. What the country does not need, however, is a panicky reaction that might have unintended and even unforeseen consequences.

I have five basic points to make. First, the goal of a zero budget deficit by FY1991 (or any year) makes no particular sense. Second, the legislation courts disaster should the economy slip into recession sometime in the next five years—which is a very likely event. Third, the feature of the bill that mechanically achieves the deficit targets without touching taxes is, in my view, a mistake. Fourth, the bill would produce budget cuts that are arbitrary, capricious, inequitable, and to some extent unpredictable. And, finally, this proposal has been put together in such haste that no one is quite sure what it means in detail. Congress should rush through such a major piece of legislation without dotting i's . . . .

1. THE GOAL OF BUDGET BALANCE

I have never been able to figure out who decided that zero is the ideal number for the budget deficit, measured in the particular way that we measure it. But I disagree with him.

It is well known by now, I think, that the budget deficit depends on the state of the economy. A budget that is balanced, say, at 6% unemployment will have a deficit when unemployment is above 6% (as it is now). It makes no sense to shoot to a zero deficit regardless of the state of the economy.

In terms of their basic macroeconomic effects, there is no important difference between federal government spending and state and local government spending, nor between federal taxes and state and local taxes. This becomes all the more clear when we remember that federal grants-in-aid to states and localities have been running at in excess of $90 billion lately. If these grants ceased, and state and local governments changed neither their spending nor their taxes, the federal deficit would fall by $90 billion, the state-local deficit would rise by $90 billion, and nothing would happen to the economy. So, even if we have a fixation on a balanced government budget, it should be on balance in the combined budget of all levels of government. In recent years, states and localities have been running a surplus of $30–$50 billion. So simply arithmetic suggests a target federal deficit of about $30–$50 billion on this ground alone.

There is a well-known problem in measuring the budget deficit caused by the fact that the federal government does not adhere to the inflation accounting procedures recommended for corporations by the FASB. In particular, part of what we count as interest payments in the government budget merely compensates bondholders for their loss of purchasing power to inflation, and is best thought of as early repayment of principal. This is no trivial matter. It will amount to an overstatement of the federal budget deficit of something like $60 billion in FY 1986. Why give such exalted status to a number produced by faulty accounting procedures?

Everything grows in a growing economy. Mortgage debt grows, consumer credit grows, corporate borrowing grows. We do not find any of this alarming. Why should government debt be different? If we really have a need for a fixed numerical budget norm, I'd say that the real national debt per capita, or perhaps the ratio of the national debt to GNP, should not be allowed to grow. If population grows at 1% per year and inflation is 4% per year, then a constant per capita real debt translates to a current deficit in the neighborhood of $75 billion. A constant debt-to-GNP ratio is consistent with a budget deficit today in excess of $100 billion.

All of this adds up to the conclusion that, while the current budget deficit is probably too high, a zero deficit is probably too low—especially when you factor in the pain and suffering necessary to get from here to there. If we must inscribe some budget norm in law, we might as well make it a sensible one—such as a zero structural deficit, adjusted for inflation accounting.

2. WHAT IF THERE IS A RECESSION?

Even the sponsors of this legislation recognize that balancing the budget to the face of a recession is a bad idea. A recession makes tax revenues go down and expenditures go up, thereby raising the deficit. Actions that would reduce the deficit—such as tax increases or cuts in spending—can only make the recession worse.

There is, of course, an escape clause in Gramm-Rudman that would give the president and Congress a few more days (i) to propose and enact an alternative budget that exceeded the deficit limits—If the OMB and CBO predict a recession in the coming fiscal year. We cannot, of course, be sure that this would be done. Recessions are rarely forecast in advance by government agencies, and Congress and the president do not always act with blazing speed.

But even if all goes well, the escape clause is not enough. Suppose we are coming out of a recession at budget time. The deficit will surely be well above the Gramm-Rudman targets. The consensus forecast may be for positive growth, perhaps even strong growth—if fiscal and monetary policy are unchanged. Since the escape clause would not be triggered, the Gramm-Rudman provisions would require massive reductions in spending, reductions which might well doom the recovery and create a really deep recession.

The potential magnitudes involved are quite impressive. The CBO's current "low growth" scenario envisions a recession in 1987 and growth in 1988, leading to a fiscal 1988 deficit of $272 billion. That number is $164 billion more than Gramm-Rudman would allow. I can hardly imagine, and hope I never witness, the kind of distress that would be caused by budget cuts of that magnitude just after a recession trough.

A similar, though less dramatic, problem would arise in nonrecession years in which the economy was expected to be weak. Honest forecasts from OMB and CBO would presumably show larger deficits than Gramm-Rudman allows. The escape clause would be inoperative, and large spending cuts would therefore be triggered, possibly creating a recession where none would have occurred otherwise.

At the very least, if you must enact a mechanical rule like Gramm-Rudman, the escape hatch for a weak economy should be based on something like the unemployment rate, or the level of GNP relative to trend, not just on the projected growth rate. Otherwise we will be courting economic disaster.

3. WHY IGNORE THE TAX SIDE?

In deciding how to reduce the deficit, it may be useful to recall how we got into this mess in the first place. During calendar year 1981, the federal deficit was 2.2% of GNP. During the first half of this year, it was 4.9% of GNP. The rise in the deficit was therefore 2.7% of GNP, which breaks down roughly as follows:

Drop in tax receipts: 1.5% of GNP; Rise in outlays: 1.2% of GNP, of which— interest: 0.9% of GNP; defense: 1.0% of GNP; all other: −0.7% of GNP.

In other words, the tax cuts and the higher interest payments on the larger national debt account for almost the entire rise in the deficit relative to GNP. We paid for most of the defense buildup by reducing civilian expenditures.

If cutting taxes excessively caused the deficit, why should we resist raising taxes as a way to reduce the deficit? That is a good question for Congress to ponder. But it is particularly germane to the Gramm-Rudman procedures for mechanically closing the deficit, for they net only the spending side, and only part of that, while exempting taxes entirely. Wouldn't it be better to use automatic increases in tax rates to close at least part of the deficit? And why should we trim explicit expenditures while leaving untouched all the tax expenditures—which are so large and growing so rapidly? This last question is an appropriate one to ask at a time when Congress is considering comprehensive tax reform that would strike at some of these tax expenditures—expenditures which, by the way, benefit mainly the rich.

It would be a shame if one side-effect of Gramm-Rudman was to rule out future tax increases as a way to reduce the deficit. But that might very well happen.

A. ITEMS TARGETTED FOR SPENDING CUTS

There is an almost humorous whimsicality in the list of items that would be cut if mandatory reductions under Gramm-Rudman were triggered. The bill singles out cost of living adjustments, except for social security, as the first target. But if the necessary budget cuts are at all sizable, only a trivial percentage could come from these COLAs because they are so small. Nonetheless, four years without a COLA would be a severe

blow to a poor person relying on Supplemental Security Income (SSI). Even at 4% inflation, four years without an increase translates to a 17% cut in real benefits. That is enough to hurt.

Realistically, however, nearly, all the spending reductions would have to come out of the portion of the budget considered "controllable"—a portion I understand to be roughly 25–30% of the total budget. That, of course, would include all new programs. It would also include rather arbitrary portions of existing programs.

The military budget is a case in point. Most procurement is committed in prior years, and hence "uncontrollable" and beyond the reach of Gramm-Rudman. But most expenditures for operation and maintenance, and almost all personnel expenses, are classified as "controllable." After a few years of heavy Gramm-Rudman cuts, would we have a great arsenal of unmaintained weapons and too few soldiers to man them? Does this make any sense?

Other anomalies are easy to find by flipping through the budget. For example, the budgets for the Peace Corps and our contribution to the Asian Development Bank are on the same page in the CBO budget for FY86, under the International Affairs function. They also happen to be approximately equal. Yet 84% of the Peace Corps budget is classified as "new outlays." and hence subject to proportional reduction under Gramm-Rudman (if I understand the bill correctly), while only 4% of the contribution to the Asian Development Bank is so classified. I have no particular view on the relative merits of spending on the Peace Corps versus spending on the development bank, but I wonder about the logic of cutting the former 21 times as much as the latter.

Problems like this are inevitable, I think, with any mechanical formula—especially one that relies so heavily on arbitrary decisions at OMB about what is "controllable" and what is not. I always thought that was why we gave detailed budgeting authority to congressional committees—to humans with judgement—rather than to computers. Gramm-Rudman, it seems to me, would give an impressive amount of power to the OMB officials who decide what is controllable and what is not. Why?

5. HASTE MAKES WASTE

Members of Congress should understand, as I think they do, that the Gramm-Rudman proposal is a very major change in the way the budget is put together—more sweeping, I would say, than the Budget Act of 1974. A major change like this should be thoroughly judged on its merits, and all its ramifications thought through. As I have just indicated, I think the merits are few and the demerits many. But others will hold different opinions.

What I cannot understand is the stampede to get this bill passed in a matter of days, before the loose-ends are tied up. No national cataclysm will occur if the deficit remains at current levels for another month or two. And, under the most likely economic forecast, Gramm-Rudman will not have much effect on the deficit for the next two fiscal years, anyway. Senator Dole was quoted—I hope misquoted—the other day as saying, "The longer something hangs around here, the staler it gets . . . People start reading it." As a citizen, I can tell you I prefer stale legislation any day, or at least bills that are read before they are passed.

The continued discussions in the press and in Congress these last few days suggest that no one really knows what Gramm-Rudman would mean in fine detail. For example, Food Stamps have a COLA, but the program is not considered "uncontrollable" by OMB. So under which provision of Gramm-Rudman would Food Stamps be cut? Both? Neither? Another example is the Earned Income Tax Credit (ETC), which is a tax provision that is counted as an expenditure. Taxes and tax expenditures are exempt from Gramm-Rudman. Would the ELTC be cut? There are many other questions like these, others pertaining to the incentives the bill sets up for Congress and the administration to play games, and many procedural issues that I can hardly begin to fathom, much less explain.

In time, these ambiguities and technical flaws could be straightened out. But that's my point—in time. Rushing this thing through will create a host of problems, some big and some small that we cannot foresee and do not need.

And, finally, I think both constitutional scholars and psychoanalysis of Congress will find in Gramm-Rudman a curious act of self-emasculation by Congress. While no one can really be sure, it seems likely that passage of the bill would transfer much of Congress's authority over the budget to the president. I don't understand the congressional urge to give away so much of its power. But I think the urge should be resisted.

UNDERSTANDING OUR LIMITS

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. GARCIA. Mr. Speaker, James Reston had a very thoughtful article in yesterday's New York Times on how we conduct our foreign affairs. I think his insights on this subject will provide useful food for thought for all of us. I am, therefore, submitting for the RECORD his article.

[From the New York Times, Oct. 20, 1985]

WHO'S IN CHARGE?

(By James Reston)

WASHINGTON.—Like the managers of the baseball World Series in Missouri, the managers of world diplomacy here in Washington concentrate on one game at a time.

They deal with immediate things as fire departments and police departments do, not with the causes or the prevention of fire and crime, but, as best they can, with their extinction and punishment.

Thus, if terror is one day's foreign policy problem, Washington approves Israel's bombing raid on the P.L.O. headquarters in Tunisia, or sends U.S. military planes over the Mediterranean to intercept an Egyptian plane carrying the Palestinian thugs who hijacked an Italian ship and killed an American citizen.

This type of response is standard operating procedure for a police or fire department, and is popular at home. But not in Egypt, which is vital to the Administration's larger objective of peace in the Middle East, or with the Italian Government that took chances to support U.S. Nuclear defense against Moscow's threat to the security of Europe.

The State Department is now trying to deal with the consequences. It has sent Deputy Secretary of State John C. Whitehead to Cairo and Rome to ease the tensions that have resulted from these military actions.

At the same time, the President has sent his personal friend, Senator Paul Laxalt, to Manila to try to put out a smoldering fire in that country. The result in both cases has been to minimize the influence and authority of U.S. ambassadors in Manila, Cairo and Rome.

Nobody will blame the President for trying to put out the fire, and many even admire him for the military skill that brought about the arrest of the hijackers of the Italian ship. But the larger problem remains.

For years, long before President Reagan, U.S. Governments have been minimizing the causes of foreign policy crises, dealing with military insurrection in Latin America, in the Philippines and the Middle East, trying to deal with every crisis whenever or wherever it breaks out.

You can admire this attempt, but not the judgment that Washington can intervene in every conflict in every quarter of the world—in short, that America can be not only the fireman but the policeman of the world.

We have known here in Washington for a long time that the Palestinians had a valid grievance in the Middle East, that the Marcos regime in the Philippines, a apartheid in South Africa and hunger in Central America and particularly in Mexico were the causes of rebellion and a threat to order and even to the vital interests of the United States. But we went along until these human disasters broke out into violence.

This is not hard to understand. Even if you don't deal with the causes of the fire, you have to try to put it out.

But it is increasingly clear that there is a limit to what the United States can do to deal with human tragedy all over the world. The U.S. needs a philosophy and a sense of priority about what it can reasonably do in its own interests and in the present crisis of world political, economic and military affairs. And on this point, there is confusion here in Washington within the Reagan Administration and also in the Congress.

It might be useful to listen to the advice of George Kennan, probably our most thoughtful and experienced foreign policy philosopher, at least on Soviet affairs.

Now in his 80's, Mr. Kennan, as a duty and maybe, as he said, "in one last breath," wrote about his long experience in U.S.-Soviet affairs:

We should approach the problems of foreign policy with a relative humility, bearing in mind that our resources are finite and that we are faced with certain urgent and difficult but limited tasks, the successful accomplishment of which is essential to world security and to our own; that we must concentrate on the performance of these tasks if we are to have any chance of completing them; that we cannot, for this reason, afford to dissipate our attention, our energies and our resources on those dreams of world betterment, that pursuit of global involvement and authority and that moralistic posturing which are so congenial to the American political temperament and to the rhetoric of our public life."

This may be, as Mr. Kennan would concede, a voice from the past. But he insisted that we should be thinking about the causes of human conflict and not about the militaristic ways of dealing with the consequences.

NATIONAL TUMOR REGISTRAR RECOGNITION DAY

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Ms. KAPTUR. Mr. Speaker, today, I am introducing a measure to designate June 1, 1986, as "National Tumor Registrar Recognition Day."

We all know that cancer is one of this Nation's leading causes of death. Tumor registrars provide invaluable services in our efforts to combat this dreadful disease.

These health professionals are responsible for preparing and maintaining complete and accurate records on all cancer patients diagnosed and treated at a health care institution. The materials gathered by Tumor Registrars include surgery and pathology reports, laboratory analyses, and notes on cancer treatments. Compilation of this information facilitates research and analysis of data in specific cases and enables the Tumor Registrars to prepare statistical materials, develop educational programs, and initiate community cancer awareness programs.

Tumor Registrars play an important role in our battle against cancer and deserve the recognition of the American people. I hope you will join me in supporting this resolution, the text of which follows:

H.J. RES. 422

Whereas tumor registrars have faithfully served both their patients and the medical communities without national recognition;

Whereas tumor registrars provide a vital and much needed service in the treatment of cancer victims;

Whereas the primary responsibility of a tumor registrar is to assure that complete and accurate records are maintained for all cancer patients diagnosed or treated within an institution;

Whereas the documentation maintained by a tumor registrar, known as an abstract, must include information and reports of surgery, pathology, laboratory, radiography, as well as written documentation of cancer directed treatment;

Whereas this documentation, stored at a Tumor Registry, enables tumor registrars to research and analyze data, identify specific cases, provide followup information, calculate vital statistics, develop criteria and procedures, develop educational programs, implement community cancer awareness programs, and coordinate all cancer activities in a given institution; and

Whereas tumor registrars are recognized as health related professionals in the medical communities: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That June 1, 1986, is designated as "National Tumor Registrar Recognition Day". The President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.

WORLD FOOD DAY

HON. SALA BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 16, 1985

Mrs. BURTON of California. Mr. Speaker, I rise today to join my colleagues on the Select Committee on Hunger and throughout the Congress to commemorate World Food Day.

I think we can all remember this year as one in which the awareness of the world has been focused on the enormity of world famine year. We cannot escape the fact that for people around the world, hunger is a constant companion. Each day, sources tell us, 30,000 to 40,000 persons die as a result of hunger.

In this land of plenty, there is also a severe problem. A nonprofit charitable institution in my district, San Francisco, has recently released a study showing that at least 1 million people in American cities are depending on free meals for their day-to-day survival. The profile of that person who depends on charity for food has changed dramatically. That person is no longer a white, elderly male. Today's composite profile includes people of all ages, all races, men, women, and children.

Mr. Speaker, 48 percent were not even in existence 3 years ago. In San Francisco alone, 9,000 people depend on the meals served by charitable groups. In many cities which have been hard hit by economic downturns, that number is even larger.

Let us pledge on this day to redouble our commitment to end world hunger.

STATEMENT BY HELSINKI COMMISSIONER DANTE FASCELL ON BUDAPEST CULTURAL FORUM

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. FASCELL. Mr. Speaker, I am happy to be able to join my esteemed colleagues on the Helsinki Commission in commenting on the Budapest Cultural Forum. That forum, which began 2 days ago on October 15, is part of the process of increasing security and cooperation in Europe that began 10 years ago in Helsinki. This forum is an important part of the continuing East-West dialog, and is the first such meeting to take place in a Warsaw Pact country. Beginning as it does 1 month before President Reagan and Soviet leader Gorbachev meet in Geneva, it is also an excellent indicator of the Soviet mood and their willingness to engage in a real dialog in Geneva.

When the Hungarian Government requested that this meeting be held in Budapest, they gave assurances to all Helsinki signatory states that they would abide by the precedents established at other CSCE meetings and provide an open atmosphere for private citizens from CSCE countries in which to conduct their activities. They have failed to live up to those commitments. I note with regret that the Hungarians on Tuesday banned activities planned by private Helsinki monitoring groups that have representatives at the forum in Budapest.

The U.S. delegation, headed by Ambassador Walter Stoessel, former Ambassador to Moscow and Deputy Secretary of State, has protested this action to the Hungarian Government. This protest read, in part, that the ban was "a violation of Hungary's commitment to allow the full range of activities for nongovernmental organizations, and that it has harmed the spirit of the Budapest cultural forum." The Hungarians replied that such private groups will be permitted no activities during the conference, despite repeated assurances to the contrary during the past 2 years.

It was in the spirit of cultural cooperation that the International Helsinki Federation for Human Rights planned a 3-day cultural symposium to coincide with the opening of the Budapest forum. That meeting was to focus on such issues as cultural freedom, writers, and their integrity, and the future of European culture. Such noted cultural figures as American writer Susan Sontag, Israeli novelist Amos Oz, and German poet Hans Magnus Enzensberger were to participate. The federation, which represents Helsinki Watch Committees in Europe and North America, has representatives in Budapest from the United States, Canada, France, Austria, the Netherlands, Norway, Sweden, and Switzerland. Despite the ban on their activities, the International Helsinki Federation vowed to conduct their meetings in private apartments. The group pledged to continue a free intellectual exchange during the forum.

This is precisely the issue at stake in Budapest. By permitting the Hungarian Government to ban the private activities of human rights groups, we acquiesce in the view that the state has the right to interfere with a dialog on cultural cooperation. It must be made clear to the Hungarians that we view the role of culture in the enhancement of peace, cooperation, and security as the unhindered interaction of people, and that no genuine mutual understanding can come about from governmentally imposed restrictions on cultural expression. This is why the United States has no Ministry or Department of Culture. This is why the private, cultural figures on our delegation will be able to speak their own minds freely. This is why we must send an unmistakable message to the Budapest Cultural Forum. If the Hungarian organizers and their allies are unprepared to discuss the issues of freedom of individual creativity, then we should not permit them to narrow the field of discussion to official cultural protocols.

LEON KLINGHOFFER—SYMBOL OF A NATION

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. KEMP. Mr. Speaker, today a family grieves at a private funeral, and an entire Nation joins them. Leon Klinghoffer will be buried in New York, where he was born and raised, and where he raised his family. Mr. Klinghoffer was a courageous individual. He was also a symbol of all the immigrant families who contributed so much to make this country great. As President Reagan pointed out in his address to the National Italian-American Foundation on Saturday night, we're all hyphenated Americans. There are very few Americans who can go back two or three generations and not find an ancestor born in another country.

Each shipload of immigrants came to our shores with their hopes and their dreams, the Klinghoffer family among them, each individual making his or her own unique contribution. They brought the best of their heritage with them. It is this vast melting pot, melded in the giant shadow of the Statue of Liberty, which has made the United States the strong union it is today.

Leon Klinghoffer was not a victim of circumstance, but a man of pride who would not submit to his captors. He was proud to serve his country during World War II, and his courage did not waiver when he faced a different kind of enemy in a different kind of war.

I think this sentiment was best expressed by L.A. Jolidon and Keith Greenberg in the cover story which appeared in the October 18 edition of USA Today. I would like to share that with you.

The article follows:

KLINGHOFFER SYMBOLIZED USA IDEAL

(By L.A. Jolidon and Keith Greenberg)

NEW YORK.—The killing of Leon Klinghoffer has made him a symbol of our time—an elderly vacationer in a wheelchair, crippled in limb and speech, executed by terrorists, pitched into the sea.

As his grieving daughters stood silently before a Holocaust shrine near the United Nations Thursday, a friend announced the establishment of a memorial fund to fight international terrorism.

"If we don't speak out," said publisher Milton Gralla, "we're inviting the world to do this again and again."

Since Klinghoffer, 69, came from New York's Lower East Side—where millions of the persecuted and the impoverished scratched a foothold in the shadow of the Statue of Liberty—he also stood for a living dream many shared.

The details of his life emergining this week paint a portrait of the immigrant family's search for success—a classic story with roots in the early years of this century.

Members of Klinghoffer's generation "are the kind of people who made it from nothing—gritty and gutsy people," said Irving M. Levine, national affairs director of the American Jewish Committee.

His parents joined shiploads of Jews from Eastern and Southern Europe who made the tough streets of the Lower East Side their home. And in the nation's turn-of-the-century cities, the humblest of refugees from many older societies acted out the same story by the millions.

Klinghoffer's instincts for family and home were true to tradition. When he died, his home was only a few blocks from the neighborhood where he was born, worked, worshipped and raised his family.

He was born Sept. 24, 1916. The Lower East Side teemed with Jewish and Italian peddlers and ragged children selling fruit and newspapers. The sea that had brought the refugees to a brave new shore carrried a bracing smell.

On New York's pianos was a tune composed by a Russian-born Jewish immigrant—Irving Berlin.

Klinghoffer's parents—Pinchas and Lena—emigrated from Austria. They started a hardware store and raised five children—Leon, Albert, Ruth, Selma and Dorothy. As they grew, their community—once the largest assemblage of Jews since ancient Israel—dispersed.

At a pace that would later astound scholars and sociologists, Jewish immigrants who arrived with little more than a bundle of belongings and the desire to make a better life excelled at realizing their dream.

Peddlers became merchants. Children of clerks became teachers, physicians, dentists, lawyers. The offspring of men and women who spoke only Yiddish, a Jewish dialect, wrote contracts and books, deciphered figures and formulas.

Some gained fame or undreamed-of fortune. But, as Stephen Birmingham wrote in "The Rest of Us,' The Rise of America's Eastern European Jews, "Most had no such ambitions, opportunities, talents, or temptations to conquer. Most made a living, paid their taxes, died, and were buried to the words of the Kaddish," the Jewish mourner's prayer.

Klinghoffer's father was buried at age 29. Leon and his brother, Albert, helped their mother run the hardware store. "They did so well they had to open a larger store" nearby, said Maurice Blond, a childhood friend.

Blond, now an insurance broker, remembers: "You'd go home from school at 3. Your mom would give you a roll and butter, then you'd run to the settlement house and play."

But after his father's death, Klinghoffer "felt responsible for his mother and didn't play much with the other boys in the street."

Klinghoffer graduated from Seward Park High School in 1933. That year, battling a Depressed psychology, President Franklin Roosevelt said in his first inaugural address "we have nothing to fear but fear itself." Fiorello La Guardia was elected mayor of New York.

Leon and Albert Klinghoffer, building on their father's business, worked on inventions and started a company to manufacture home appliances, including an invention of their own: a cooking appliance called a roto-broiler.

By the 1940's, Hitler's Germany was marching. The Holocaust had begun. Klinghoffer left his business and family to serve in the Army Air Corps.

At war's end, when he returned to New York to pick up his life, some soldiers from the USA joined a battle in the Mideast. Jack Klein—born in New York the same year as Klinghoffer—was killed setting a mine field for Jewish partisans. In 1948 Israel won independence.

He had always worked long hours, but Klinghoffer wanted a family, too. A cousin introduced him to a woman from nearby East Orange, N.J.—Marilyn Windwehr. She lived across the Hudson River, so his relatives knew Klinghoffer—a dedicated New Yorker—was serious.

On Sept. 18, 1949, Marilyn and Leon were married, They honeymooned in Bermuda. Arthur Miller's Death of a Salesman opened that fall on Broadway.

In business, Klinghoffer "really followed the pattern" of many men of his generation and origin, said Levine. "Either immigrants or sons and daughters of immigrants, they were self-made men who ended up with enterprises."

Inventing an appliance in the rear of the family store, he said, "sounds like a very American story." And in giving their two daughters the education they never had, the Klinghoffers touched another common chord: Lisa, 34, is an artist; Ilsa, 28 a hospital administrator.

Through it all, men like Klinghoffer kept a street-tough edge. "They had to be tough," said Levine. "You scratched out a living. They became refined through life." Blond recalls a wartime incident when Klinghoffer was stationed in San Antonio: "A guy six-foot-five called him a Jew bastard. He battled the guy. The guy broke his jaw and Leon became deaf in one ear."

Blond thinks "the fact that he was so tough led to his death." The U.S. ambassador to Italy said Klinghoffer bit the hand of one terrorist.

"I'm sure he mouthed off when he heard those punks attacking Jews and America," said Blond. "Leon was the kind of guy who would never beg for his life. He would not take gaff."

In the 1970s, Klinghoffer suffered two strokes. But with his wife's help he continued to oversee his factory and ease into retirement. His wife continued to work at Gralla's publishing house.

Even then, he chose to remain close to his roots. He and Marilyn rented a summer home on the Jersey shore, where their circle of friends vacationed.

With them on the Mediterranean cruise where he met his death were friends they had known since childhood. He and Marilyn intended to visit one of Blond's daughters who lives in Israel.

Friends say he never forgot his origins. Among his charities: the settlement houses of his youth, now frequented by the new immigrant waves from Latin America and Asia.

KEEPING UP ON EL SALVADOR

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. GARCIA. Mr. Speaker, yesterday's New York Times had an article on the present situation in El Salvador. President Duarte is under siege from all fronts. While he is in need of our support, it is, nonetheless, important that we understand fully the problems that are confronting him. I am, therefore, submitting for the RECORD yesterday's article on El Salvador.

[From the New York Times, Oct. 20, 1985]

HOW REBELS CAN KEEP EL SALVADOR ON EDGE

(By James LeMoyne)

SAN EL SALVADOR.—Along with the personal anguish, the six weeks since the kidnapping of his eldest daughter has been a severe political test for Salvador's President, José Napoleón Duarte. Inez Guadalupe Duarte Durán was abducted last month, almost certainly by leftist rebels of the Farabundo Marti National Liberation Front. New strains have now appeared in Mr. Duarte's relations with the army and his opponents on the right. The shift in rebel tactics exemplified by the kidnapping appears to have pushed the haggard-looking President virtually out of public view. It may even influence his management of the civil war now stretching into its seventh year.

Since the guerrillas decided to halt conventional military attacks, bowing to the growing effectiveness of the United States-trained Government forces, the rebels have also kidnapped 23 mayors, stepped up sabotage and shot civilians as they sought to impose a nationwide freeze on transportation. When the President sent members of his family abroad, fearing for their safety, the rebels jeered that "when the toad removes his little toads, he is saying that he no longer believes he can stay in the country.".

Only a year ago, Mr. Duarte was offering negotiations to end the war. Then, as Government military forces began to gain the upper hand, the guerrillas created "a new reality," a senior Salvadoran official said. In addition to the kidnappings, the rebels have burned municipal offices and warned Mr. Duarte and his Christian Democratic Party that they are military targets. "He who lives by the sword dies by the sword," the rebel radio, Venceremos, said last week.

The guerrillas have also upped the ante for Americans. They killed four marines in June and attacked an army base two weeks ago in hopes of killing American advisers. Three rebels were arrested as they prepared to attack American military pilots in a luxury hotel in the capital, Western diplomats said. Another suspected rebel was found working in the American Embassy.

The shift to harsher tactics reflects significantly changed rebel thinking. The guerrillas appear to have given up hope of finding in the Salvadoran middle class and Western democracies allies who could form the sort of broad alliance that brought the Sandinistas to power in Nicaragua in 1979. Their strategy now is to survive as a force able to keep the Government off balance. The guerrillas can no longer overrun towns and army bases, but they seem capable of keeping the country destabilized. Some Americans contend that the rebels are desperate. Their fortunes have indeed diminished, but their actions seem to reflect determination as much as desperation.

Shootings, the mining of highways, the kidnapping of officials and burning of municipal offices will not win broad popular support. But the rebels can still count on committed backers, and their strategy has cast a dark shadow over official and public expectations. The guerrillas say they intend to wear the Government down, challenging Mr. Duarte's authority by attacking him and his family. In addition, the President said last week that he believes the guerrillas are trying to force him into a confrontation with "political and military sectors." Rightists can be expected to criticize him once the kidnapping is over. There are also signs that some army officers resent his willingness to release 25 important rebel prisoners in exchange for his daughter. "The army is backing him," a Salvadoran officer said, "but there is a cost. I think he has been weakened."

LONGER, ANGRIER WAR

Sixty senior army officers have met three times since the kidnapping, including a six-hour debate last week on whether to make a deal with the rebels. In the end, officers said, the army gave Mr. Duarte its backing to exchange rebel prisoners, with a strong recommendation for including the kidnapped mayors in the deal.

Whatever the outcome, the rebels will have other tensions to exploit. They have also called for the return of guerrillas who "disappeared" four and five years ago. This raises the sensitive issue of army involvement in the killing of thousands of suspected leftists before 1983 and calls attention to Mr. Duarte's unfulfilled promise to punish past abuses.

The kidnapping is likely to heighten polarization and make it less likely that exiled members of the democratic left can be persuaded to return home. It may also reduce the Government's willingness to negotiate concessions to end the war. An army officer said some commanders were already complaining that human rights concerns are tying the army's hands.

The likelihood of a longer, angrier war challenges the Reagan Administration's contention that El Salvador is on the road to becoming a functioning democracy. Whatever stability has been achieved appears to be fragile. The economy is ravaged and stagnant. Unemployment and underemployment is about 50 percent.

Mr. Duarte has gained popularity in the past from land reform measures, the holding of three elections and the initiation of peace talks. But few openings for new crowd-pleasing measures seem available. Instead, he faces a more bitter war that has touched him personally.

THE FOSTER GRANDPARENT PROGRAM

HON. THOMAS E. PETRI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. PETRI. Mr. Speaker, the Foster Grandparent Progam which celebrates its 20th anniversary today, is an example of a Federal program that works magnificently.

It brings together men and women, aged 60 and older, who share their experience, wisdon, and love with children who have been shortchanged in life. Many of these youngsters come from broken homes; they may be mentally and emotionally disadvantaged; or, perhaps they've had a run-in with the law and now are in prisons or juvenile detention centers.

In Wisconsin, for example, there are more than 460 Foster Grandparents, many of whom have been especially successful in melding remarkable, long-term relationships with today's youth. Some of these volunteers are older Native Americans, who pass their culture and language to the young people in their tribes. Other Foster Grandparents work with the handicapped, slow learners, or juvenile offenders.

Mary Moore, a 14-year veteran of the Foster Grandparent Program, has been chosen to represent the State of Wisconsin at the 20th anniversary celebration in Washington. Mrs. Moore, who serves at the St. Aemilian Child Care Center in Milwaukee, works with troubled youngsters from 7 to 11 years old.

After her husband died, Mrs. Moore's life came to a standstill. She says:

My husband was a dentist and I worked as his assistant for many years. After his death, I was at a total loss for something meaningful to occupy my time. I found it with the Foster Grandparent Program.

Many of the kids Mrs. Moore works with at St. Aemilian's come from broken homes. She says:

They come here at a disadvantage. That means that their manners may not be exactly up to snuff and they may need some correction at times. But this has never been a problem. They all respect me, each and every one of them, and that's what counts. Around here I'm known simply as "Grandma."

Helping troubled youngsters get a head-start on life may be the most important service anyone could render. Mrs. Moore and the 19,000 other Foster Grandparents around the country are doing exactly that.

Their contribution to our country's welfare, and to our youth must continue for many years to come.

INAMORI PRIZE TO UNIVERSITY OF FLORIDA PROFESSOR

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. FUQUA. Mr. Speaker, I am very pleased to have this opportunity to share with you some exciting news from the University of Florida. Professor Rudolf Kalman, who is a graduate research professor in the departments of electrical engineering, mathematics, and industrial and systems engineering, will be awarded the Inamori Prize in Advanced Technology.

This prize, which will be awarded for the first time this year, is for $200,000. It is one of the prizes established by the Inamori Foundation of Kyoto, and the ceremony will be held November 10 in Japan.

Professor Kalman, in addition to numerous other accomplishments, is the creator of the so-called Kalman filter. This mathematical device is invaluable in extracting a weak signal from a noisy ambience. The Kalman filter is said to have made space flight and space exploration possible since the signals to and from space vehicles are processed by this method. It is now recognized that this powerful tool is not only useful in satellite navigation and ballistic missile trajectory analysis, but also in grain classification, geophysical exploration, power system control, demography, and even economics.

The University of Florida has been a major recipient of Federal funding for

many years, and the University of Florida College of Engineering has consistently ranked in the very top echelons. Such recognition comes from the continued emphasis on excellence and the recruiting of a cadre of eminent scholars.

Professor Kalman's work has been particularly noteworthy and this is now attested to by his being made the recipient of the 1985 Inamori Prize. Professor Kalman and the University of Florida deserve hearty congratulations for this signal honor well deserved.

THE AGONY OF THE CHURCH IN CHILE

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. YATRON. Mr. Speaker, I want to take this opportunity to discuss the tragic human rights situation in Chile. As the chairman of the Subcommittee on Human Rights and International Organizations, I have conducted hearings on Chile and have actively worked to reduce human rights abuses committed by the Pinochet regime.

Unfortunately, the situation in Chile does not seem to be improving, and a strong argument can be made that it is worsening. The administration must take a more aggressive stand to improve the human rights condition in Chile.

I would like to submit to the attention of all House Members, an article written by our former colleague, Father Robert F. Drinan, entitled, "The Agony of the Church in Chile," which appeared in the October 12 issue of the America magazine. The article details not only the continuing human rights offenses of the Pinochet regime, but also of the heroic efforts of the Catholic Church to comfort victims and press for change.

Father Drinan is to be commended for his important contribution to the debate on U.S. policy toward Chile.

The article appears as follows:

THE AGONY OF THE CHURCH IN CHILE

(By Robert F. Drinan)

The agonies of the church during the 12 years of General Augusto Pinochet's dictatorship became vivid to me during my stay in Chile from August 16-26, 1985, as a member of a delegation from the International League for Human Rights. At every level within the church there is a sense that the chasm between the Government and the church is growing wider and that the church, because of its efforts to restore democracy, is looked upon almost as the enemy of the state.

The heroism of the church since the coup on September 11, 1973, that replaced President Salvador Allende with General Pinochet might well become one of the great stories of modern church history. The 25 Catholic bishops of Chile at first almost welcomed Pinochet because of the economic chaos and ideological polarization that occurred during the Allende regime. But after the first year or two of the Pinochet presidency, the church and most of Chile's 11.8 million citizens realized that something dreadful had occurred in a nation with a long and proud tradition of democratic rule. Up to 10,000 people were killed or fled from the country, the congress was closed, political parties were suppressed and labor unions were curbed.

My associates and I, in our visits with the highest officials and others from every sector of society in Chile, could find little if any support for General Pinochet. Everyone wants to revive the activities and the voices of the political parties. But the fear and intimidation are so pervasive that it is not clear whether any significant action toward democracy will be occurring in the near future. Hundreds of persons, pursuant to Article 24 of Pinochet's Constitution, are "relegated" each year to remote places for periods of several months. The documented use of torture is absolutely incredible. I visited 42 political prisoners in Valparaiso and heard stories of cruelty and sadism that would be astonishing in any civilized nation.

Early in the Pinochet dictatorship the Catholic Church began to react to the horrors that each day became more visible and more undeniable. Cardinal Paul Silva Henriquez, Archbishop of Santiago during the democratic governments of Eduardo Frei and Allende, established the Vicariate of Solidarity, a group that now has 12 full-time lawyers and more than 50 volunteers all over the country to defend those who each day are exiled, tortured, harassed or arrested. A luncheon with the top officials of the Vicariate revealed the amazing range of services that this organization offers to citizens who are chargrined and humiliated that their nation should have been taken over by a military dictatorship. The prestige that the Vicariate brings to the church is profound and will be long-lasting. The church moved aggressively to protest abuses of power in a situation where lawyers, judges, social workers and educators could have, by almost everyone's expectation, done more.

Another agency cocreated by the Catholic Church is the Chilean Human Rights Commission. This vital organization operating in every community of a far-flung nation has brought an awareness of human rights to a level that most human-rights specialists in the world say is unprecedented. A medical doctor, the chairman of the Human Rights Commission in the far northern city of Arica, reported that he had been jailed for 60 days, his car had been wrecked by a bomb and his coworkers had been threatened and harassed. But the work of recording and protesting the incidents of torture and intimidation goes on. The publications of the Chilean Human Rights Commission along with those of its affiliates are factual and impressive. They are documenting a dark night in the history of Chile.

One of the principal reasons for the highly professional nature of the work of the Chilean Human Rights Commission is the dedication of its vice-chairman, Máximo Pacheco, a lawyer, former dean of the law school of the University of Chile, Minister of Education and Ambassador to the Soviet Union in regimes prior to the Pinochet dictatorship. Dr. Pacheco, a devout Catholic, worked closely with the now retired Archbishop of Santiago, Cardinal Silva Henríquez, in the formation of both the Vicariate of Solidarity and the Chilean Human Rights Commission. Hosting a dinner for the delegates from the International League for Human Rights, the Cardinal stated that the persecution of the church in Chile was just as bad as the persecution of the church in the early centuries of the Roman Empire. When that statement was reported during an interview that the delegation had with the Minister of Interior, Ricardo García Rodriguez, a practicing Catholic, he expressed astonishment and insisted that the Pinochet Government would, at the mere suggestion of the Cardinal, correct any situation in which any "persecution" of the church was involved.

In a certain sense the Minister of Interior is right. There is in Chile no frontal attack on the Catholic Church or its institutions. The church has 1,800 priests, about 50 percent non-Chilean. Some 5,500 nuns conduct schools attended by about one-third of all the children of Chile. Even Mensaje, the Jesuit monthly, has with some difficulties been allowed to publish, even though until recently all journals of opinion were banned. But the Government has been suing Mensaje over an article written by a Jesuit that is unfavorable to the Government. The suit has been twice dismissed by the courts, but the Government is appealing.

In a broader sense, however, the Government is carrying on a war against the church. The Government repeatedly states that the Vicariate and the Human Rights Commission have been infiltrated by the Communists and that they are doing the work of the Marxists. The Government regularly asserts that the social agencies of the church are fulfilling a political role contrary to what it insists the Catholic Church should be doing. Again, there is truth to the charge since the church-related agencies do support the demands of the left for a return to democracy, the restoration of the congress, the revival of human rights—all of which appear to the Government as a militantly anti-Pinochet position.

But there is little likelihood that the church can or will back away from its opposition to much of what the Government is doing. The Government admits that, prior to the coup in 1973, the labor unions enrolled over 50 percent of the workers; now the figure is 8 percent. Everyone is concerned about Chile's foriegn debt which was $4 billion in 1973 but today is $22 billion. Unemployment stands at 30 percent, but in the shantytowns around Santiago it reaches 60 percent. All of those phenomena are painful to a church that repeatedly in the pastorals of its bishops has proclaimed its preferential option for the poor.

What the Government does not realize is that even if democracy in Chile had not been suspended by the demise of President Allende and the rise of General Pinochet, the church would still contain strong elements that would be opposed to a Government that allows, for example, 800,000 citizens to live in indescribably bad conditions outside of Santiago. The Pinochet reign of terror has accelerated the church's movement to try to change the social order. An example of the radicalization of persons within the church is José Aldunate, S.J., a professor of moral theology and a former provincial superior of the Jesuits in Chile. He recently accompanied the relatives of the disappeared and the deceased in a demonstration in Santiago. He was proud to be arrested and briefly detained.

The heroism of the church in Chile can never be forgotten by anyone who witnessed it. I was deeply moved when I concelebrated Mass in the evening in a desperately poor place with a priest who left a distinguished career as a professor to work for the poor. In a long dialogue during the liturgy with

his 100 congregants, they talked about their hopes of changing the oppressive circumstances surrounding them and also about the beatuy of accepting suffering.

Other heroes do extraordinary work in counseling the hundreds of people who have been tortured and who may well be tortured again. How can such persons be taught to overcome the effects of a traumatic experience and at the same time remain committed to the moral positions that prompted the Government to torture them? Heroic work is also visible in the care that is extended to the thousands of families once exiled from Chile, some of whom are not able to return. There is also extensive care offered to the countless families that have been devastated when relatives have been harassed, exiled, detained as prisoners or otherwise denied their human rights. All of these people state repeatedly that only pressure from abroad—especially from the United States—can mitigate the harshness that the Pinochet regime extends to every opponent of its policies.

A vivid example of the effect of such pressure occurred when I was in Chile. Pedro Castillo, a physician and the president of the Committee against Torture, was seized and sent into internal exile to a remote fishing village 800 miles south of Santiago. Protest by Amnesty International, the U.S. State Department and my delegation caused the Government to release him. It is impossible to imagine the sufferings of Dr. Castillo's wife, also a distinguished medical doctor, and his five daughters, unless one sees it firsthand Dr. Castillo touched a sensitive nerve ending in Government circles by his insistent pleas that no medical doctor in Chile should be permitted to be present at torture sessions in order to advise the Government on how far it could go without endangering the life of the victim.

New heroes are coming forward among the young. There appears to be a concerted effort by the Government to discourage and disband all youth activities related to the church. I visited with former political prisoners, many of whom were picked up for church-related activities that the Government said, of course, were "subversive." The torture of these young people is particularly shocking. I saw young men and women with a cross cut into their cheeks and forehead. Clearly this development has inhibited young people from having anything to do with the church.

One of the most baffling phenomena in Chile is the total unpredictability of the political future of that country. In 1980 the Pinochet regime manipulated a plebiscite that provides for an election to be held in 1989. But all political parties are suspended, so no group can present a platform or a candidate. Thus the question is: Could General Pinochet, now 69, subvert the system to get himself elected in 1989 and stay on for several more years? That scenario is not impossible, especially since he has no place to go. If he ceases being president and remains in Chile, he will almost certainly be tried for crimes against the people, just as the highest generals and admirals of Argentina have been tried by the Alfonsin Government for their crimes from 1976 to 1983. If General Pinochet flees to another country he can be extradited to Chile. His only escape would be Paraguay, where reportedly he has bought property.

Almost every discussion about the future of Chile begins and ends with an evaluation of the presence and power of the Communist Party. In the years before the coup in 1973, the Communist Party regularly appeared on the ballot and received between 10 and 15 percent of the vote. Recently the Communists have publicly advocated a violent overthrow of the Government. The Pinochet regine uses this recent change in the Communist position as proof of its determination to undermine law and order in Chile. At the same time, there are constant and widespread eruptions of violence. The Government blames these on the Communists. The Communists blame them on the civilian police or their paramilitary associates. Incredible as it sounds, no one is really sure who orchestrates the continual series of bombings and killings. As it turns out, the Communists gain credibility by attributing the violence to the Government, but the Government deepens the almost hysterical anti-Communist feeling by claiming that there would be domestic peace if the Communists could be eliminated.

Church leaders are caught in the backlash of this impasse. Should the church urge Catholic groups not to ally with Communist forces? Should the church give some kind of support to the Government's crusade to wipe out the Communists? The bishops seem to be divided on these thorny questions. No one is anxious to advance the cause of the Communists, but no one wants to strengthen the hand of Pinochet.

One initiative of the church that seems to have the approval of all opposition parties is the convening by Cardinal Juan Francisco Fresno, Archbishop of Santiago, of the leading representatives of the moderate opposition in Chile to discuss practical steps that might bring peace to the country. (For more on this, see "Chile: Opposition Strengthens" Am. 9/28.)

The Catholics of Chile are embarrassed that the Holy Father has deliberately decided not to visit their country—presumably because of its record on human rights. Some appear to be using the possibility of his coming as an incentive for the Government to improve.

Catholics in Chile are also aware that the Reagan Administration has voted for loans to Chile by the World Bank on 14 occasions and against loans on only one occasion. The enormous influence of the United States on Chile is recognized everywhere in a nation where the vast majority feel that the U.S. Government directly or indirectly facilitated the coup of Pinochet. One top leader of the opposition said, almost casually, that if President Reagan wanted to, he could restore democracy to Chile within six months. The problem is, of course, that President Reagan, like General Pinochet, thinks that the Soviets have made Latin America a testing ground for the East-West struggle.

The Catholic Church has been on a collision course with the Pinochet Government almost from the beginning. In a long interview, the Archbishop of Concepcion, Jose Santos, concluded a history of church-state relations since the coup by conceding that "a chasm continues to grow" and that a long series of events has brought about about a "deterioration of relations between the Government and the church." The bishops realize that their phones are sometimes tapped, informants infiltrate church activities and the civilian police work together with the military to create a police state.

No one knows how Chile's nightmare will end. But everyone knows that the 10 million Catholics who live in one of the oldest democracies in Latin America are applying the moral and spiritual teachings of their church in order to restore freedom and human dignity to Chile. They agree with their fellow Catholic, the Argentinian Nobel Peace laureate, Adolfo P. Esquivel, who, though banned from entering Chile since 1981, stated recently that "Latin America is on its feet; its liberation may be delayed but nothing can stop it—ever."

NATO AND THE SUMMIT

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. GARCIA. Mr. Speaker, this week the President will be meeting in New York with our allies to discuss his upcoming summit with Mikhail Gorbachev.

As a member of the House delegation to the North Atlantic Assembly, I cannot stress enough the importance of discussing our policies with our allies. Certainly NATO for all the criticism leveled at it over the years, coupled with recent rumors of its demise, has remained the backbone of our policy with our allies. And dialog the kind of dialog I have come to admire in the North Atlantic Assembly—is what keeps our relationship with Japan and the nations of the Atlantic alliance going.

I am submitting an article for the RECORD from the New York Times on European anticipation of the Reagan-Gorbachev summit, and the desire of NATO nations to be kept informed of our plans.

[From The New York Times, Oct. 20, 1985]

EUROPEANS ARE EAGERLY FILLING IN THEIR PROXIES FOR GENEVA

(By James M. Markham)

BRUSSELS.—An unusual meeting in New York this week will provide an opportunity for the United States and its principal allies to display unity before President Reagan's encounter with Mikhail S. Gorbachev in Geneva next month. Yet, though Mr. Reagan is likely to hear in New York some advice on countering the Soviet leader's public diplomacy and on regaining the initiative in the contest for Western European opinion, strains in the alliance are apparent.

The guest list for Thursday's session at the Waldorf Astoria Hotel is incomplete and even uncertain. The idea was to have a political meeting of the seven leading industrial democracies—the United States, West Germany, Japan, Britain, France, Italy and Canada—which gather each year to discuss mainly economic problems. But President Francois Mitterrand of France, who doubts the utility of such gatherings, is staying home to demonstrate his independence from Washington. And if Bettino Craxi of Italy shows up, it will be as the somewhat embittered caretaker Prime Minister of a coalition Government that collapsed last week in the fallout from the Achille Lauro hijacking.

The West European allies know that the Administration's approach to the Geneva summit is still being debated, and in one conspicuous recent instance they have sought to intervene and strengthen the hand of Secretary of State George P. Shultz against hard-liners in the Pentagon and the National Security Council. Through private channels, both Bonn and London voiced strong dismay over remarks by Robert C.

McFarlane, the national security adviser, suggesting that the Administration might be sacrificing the 1972 antiballistic missile treaty with the Soviet Union to the imperatives of its space weapons program. The loose McFarlane interpretation of the treaty would permit the development, though not the deployment, of the anti-missile defenses the accord was meant to curb. Yesterday in Pravda, Marshal Sergei F. Akhromeyev, the chief of the Soviet General Staff, called such an interpretation "a deliberate deceit."

THE ONLY REAL ACCORD

In Western Europe, the ABM treaty is seen as a safeguard against a destabilizing defensive arms race that could tempt one superpower or the other to launch a first-strike offense. Up to now, stability has rested on the notion of deterrence, each side knowing that if it attacked it would be destroyed in return. "For us," said a senior French official in Paris, "it is the only real disarmament accord since the war. We are very attached to it." This attachment is hardly sentimental, since both France and Britain know that a Soviet anti-missile system would destroy the credibility of their small nuclear arsenals.

Chancellor Helmut Kohl of West Germany and Prime Minister Margaret Thatcher of Britain have linked tentative support for American space weapons research to strict compliance with the ABM treaty. So in Brussels last week, NATO foreign ministers were relieved to hear Mr. Shultz say that President Reagan had decided to keep his "Star Wars" research program within "a relatively narrow interpretation" of the ABM treaty by which both sides agreed "not to develop, test or deploy ABM systems." The current state of research on the Strategic Defense Initiative does not demand a more permissive interpretation now, but the McFarlane trial balloon reminded the West Europeans, and Mr. Gorbachev, that a future rethinking of the treaty was possible.

Since the Soviet Union put forward last month a proposal for a 50 percent cut in strategic weapons in exchange for a renunciation of Star Wars, several West European governments have grown uneasy watching President Reagan issue justifications of his space defense effort. In New York, Mr. Kohl and Mrs. Thatcher will probably suggest that he embrace what is positive in the Gorbachev proposal—the principle of deep cuts in strategic systems—but reiterate how America envisions such reductions. "I think there's a strong British interest in that the United States be seen to be creative, energetic, imaginative and positive—all these good words one hears," said an adviser to Mrs. Thatcher in London. "But we know that devising a detailed proposal is not the work of five minutes or even five months."

There is little expectation among West European arms experts that Mr. Reagan and Mr. Gorbachev are going to cut a deal on nuclear weapons in Geneva. Rather, hopes focus on an improvement in the mood of Soviet-American relations that would make an arms accord possible later. "But Mr. Reagan's weekly radio address yesterday made such improvement highly uncertain. The President indicated he would go beyond arms control to discuss "the real sources of tension." He identified them as Moscow's world conduct and its "treatment of its own citizens," in addition to the Soviet arms buildup.

According to one of his close aides, Chancellor Kohl will urge the President to try to institutionalize Soviet-American summits to give some stability to East-West ties.

For the West Europeans, the worst possibility would be that the Geneva summit would fail and the Russians would convincingly pin the blame on President Reagan's insistence on his space-based defense program. Approaching Geneva with large hopes but small expectations, the NATO allies wince when they contemplate domestic political landscapes in which superpower arms control seems to have reached a dead end. Such fears will probably not be made public in New York, however. Instead, the public is likely to hear the kind of language used by Mrs. Thatcher at the Conservative Party conference in Blackpool. "He has our full support and good wishes as he goes to Geneva," she said of President Reagan. "The West could not have a braver champion."

STUDENTS AGAINST MULTIPLE SCLEROSIS

HON. JOSEPH D. EARLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. EARLY. Mr. Speaker, I wish to acknowledge that public-spirited voluntarism and charitable giving on American college and university campuses is expanding to include more people than have been seen in a decade.

One of the latest, most extensive nationwide efforts is Students Against Multiple Sclerosis, a new college program designed to increase the public's awareness of multiple sclerosis and to establish long-term fundraising support for the National Multiple Sclerosis Society to find the cause, prevention, and a cure for this disease. Health-conscious young adults are at the front of the fight against this disease which strikes young people in the prime of their lives.

The program will take place on 150 of the top universities in 50 States in the 1985–86 academic year. Student leaders will attend a leadership training conference in September in Miami. Upon their return to school, they will conduct a multiple sclerosis education and awareness campaign, followed by an intercollegiate "Rock Alike" rock star look-alike competition and fundraising drive in February. Students will use dollars to vote for their favorite rock star look-alikes. The university that raises the most money for multiple sclerosis will be the site of a concert broadcast over MTV: Music Television.

Students Against Multiple Sclerosis offers students the chance to integrate textbook knowledge with business experience and unify their campuses in an enjoyable and educational intercollegiate competition.

Young adults in every State are assuming leadership and civic responsibilities, and ultimately preparing themselves for future career positions. Just as important, the money they raise will be used to support research programs into a disease which, each week, strikes some 200 new people between the ages of 18 to 40.

Multiple sclerosis is a disease of the central nervous system (the brain, spinal cord, and optic nerves). It generally follows an exacerbating and remitting course, and is often progressively disabling.

Multiple sclerosis is characterized by inflammation and disintegration of the myelin sheath, an insulating covering that wraps itself around the nerve fibers in the central nervous system. Later, scars form in the damaged places and nerve impulses traveling to and from the brain may be distorted, misdirected, or lost entirely.

No two cases of multiple sclerosis are quite the same. Symptoms depend on the site and extent of damage to the myelin; they range from incoordination; loss of balance; pins-and-needles sensations and exhaustion to impairment of vision, hearing or speech; bladder and bowel problems; partial or complete paralysis. The cause of multiple sclerosis is, as yet, unknown. Recently, several treatments were announced which seem to alter the course of the disease, and some symptoms can be alleviated by good medical management.

The National Multiple Sclerosis Society, through its network of approximately 125 chapters and branches located in every State in the United States, provides support programs and medical equipment loans to those with multiple sclerosis.

The society is a 400,000-member voluntary health agency in the United States supporting programs in national and international research to find the cause, prevention, and cure for multiple sclerosis, and more effective treatments for those who already have the disease. Since its inception in 1946, the U.S. National Multiple Sclerosis Society has allocated more than $90.2 million to research and training. The International Federation of Multiple Sclerosis Societies, formed in 1965, is an association of 30 nations dedicated to helping the millions who have multiple sclerosis worldwide.

Again, I would like to commend the many students and the institutions of higher education for upholding and expanding the American tradition of voluntarism and charitable support with their participation in the "Rock Alike" contest. Other generations have found the cure for common infections and diseases that plagued mankind. This generation of college students could be crucial in finding a cure for multiple sclerosis.

BINARY NERVE GAS WEAPONS, PROLIFERATION, AND THE SUMMIT

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. FASCELL. Mr. Speaker, I have been encouraged to read reports that our Government is showing interest in the proposal by Soviet leader Mikhail Gorbachev to reach agreement on the nonproliferation of chemical weapons. It is my view that chem-

ical weapons and nuclear weapons should both be high-priority agenda items at the upcoming summit meeting between Mr. Gorbachev and President Reagan. Certainly our country and the Soviet Union could take the most important first step in stopping the proliferation of chemical weapons by agreeing at the summit to ban all future production of new chemical weapons.

I am very supportive of all efforts made by the U.S. Government to limit and stop the proliferation of chemical weapons. One of the main reasons why I have opposed and continue to oppose the Defense Department's request for new binary nerve gas weapons is my concern that proliferation is one of the most significant downfalls of the binary chemical weapons program.

Binary nerve gas weapons increase the risk of chemical weapons proliferation and the risk of their use by terrorists. This has been one of the main reasons why Congress has turned down the Reagan administration's request to produce this new generation of lethal chemical weapons in each of the past 3 years. A decision now to modernize our chemical arsenal with this new generation of binary nerve gas weapons would undermine many of the military, technical, political, psychological, and moral constraints which have inhibited proliferation.

In 1984, I requested a Congressional Research Service [CRS] study which exposed the adverse proliferation implications of producing binary chemical weapons. The CRS study also underlined the urgency of pursuing a comprehensive and verifiable world ban on new chemical weapon production. The study led me to conclude that the United States should be working hard to secure such a ban rather than breaking our own moratorium on production and launching a new generation of chemical weapons.

The CRS study identifies a number of technical features about binary weapons that would increase the likelihood of chemical weapons proliferation in other countries. These technical features include: First, binary chemical weapons are technically easier to produce than current unitary chemical weapons; second, the production of binary weapons require lower investments of capital, skilled labor, and expertise than current unitary chemical weapons; third, the raw materials needed to produce binary weapons are commercially available throughout the world.

Finally, as to the potential use of chemical weapons by terrorists, the CRS study observes that this frightening possibility would be encouraged by a U.S. decision to produce binary weapons. The report stated that, "A move by the United States or any other state to produce, stockpile, and deploy binary nerve gas weapons * * * would probably reduce the political and motivational factors inhibiting a terrorist decision to seek such weapons * * *. In a world in which unitary or binary chemical weapons become integral components of states' military programs, the risks of chemical terrorism could be expected to increase."

The risks of chemical weapons proliferation are too great and the national security, political, military, and technical reasons are too compelling to proceed with the funding of the proposed binary nerve gas weapons program. If Congress appropriates money for the binary program at this time, it would certainly send the wrong signal at the wrong time, not only to the Soviet Union but to other countries around the world. There may be an opportunity at the summit to agree to a ban on new chemical weapons and to set in motion a nonproliferation agreement. This opportunity should be seized.

PORTUGUESE CONSUL ARISTIDES DE SOUSA MENDEZ: REMEMBERING THE COURAGE OF THOSE WHO HELPED JEWISH REFUGEES FLEE THE HOLOCAUST

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. STARK. Mr. Speaker, in July 1940, Dr. Aristides de Sousa Mendez, while the Portuguese Consul to Bordeaux, France, issued over 10,000 visas to Jewish refugees in direct disobedience to his government's instructions. He had been instructed by his Foreign Secretary to deny visas to Jewish refugees of any nationality. He obeyed his conscience, putting God before man. Few of the thousands of Jewish refugees he saved ever knew of the suffering endured by the diplomat and his family.

Dr. de Sousa Mendez was recalled to Lisbon, fired, and disciplined. This punitive response subjected Dr. de Sousa Mendez and his family to incredible hardships. They were disgraced and ostracized. They lived out the remaining war years in a cruel form of poverty. Those old enough to leave went to the African colonies to find work. After the war most of the children emigrated to the United States or Canada.

Mr. John Abranches, a resident of Dublin, CA, and one of my constituents, was the youngest of the 14 children of Dr. de Sousa Mendez. He, along with his brothers and sisters have worked for many years to honor their father for his courageous actions. This is an appropriate time to recall Dr. de Sousa Mendez' courage for he knew full well that the consequences would be extreme.

Although Dr. de Sousa Mendez was posthumously reinstated, with the rank of ambassador, after the fall of the Salazar regime, no reparations were ever made to the family. Dr. de Sousa Mendez was never given the rightful, honorable place in history he deserves.

In a speech given before the national assembly, in 1945, de Sousa Mendez, in defending his actions, argued that to have obeyed the orders of his Foreign Secretary would have been contrary to several articles of the Portuguese Constitution.

Refusing to grant visas to people already persecuted by the Nazis in the countries from which they fled constituted "* * * odious religious presecution." To Dr. de Sousa Mendez, the granting of visas to the Jewish refugees was a matter of the right to asylum which "* * * any civilized country has always recognized and respected in occasion of war or public calamity."

It is most appropriate that we honor Dr. Aristides de Sousa Mendez as we commenorate the Holocaust. We need to remember and reverse those who took courageous steps to protect the Jews fleeing such unparalleled horror as that which occurred during World War II to insure that such horrors will never be repeated by any regime, "ism," or government. We need to be reminded today why we need to listen to the cries of the oppressed and persecuted, of those who flee to the United States for refuge.

We can learn from the actions of Dr. de Sousa Mendez that governmental policies are not always morally correct. And, when faced with such dilemmas, individuals must respond to the dictates of their conscience. Blind obedience or silence has proven to be disasterous. Only by action can we prevent future holocausts.

So that we may not forget, I would like to include in the RECORD at this point portions of an article from the Daily News of Lisbon, Portugal, dated May 5, 1985, entitled "Jewish Refugees Changed Portugal." Also, I would like to include the petition of Consul de Sousa Mendez to his government in justification of his courageous actions.

Mr. Speaker, never again.

[From the Daily News, Lisbon, Portugal,

JEWISH REFUGEES CHANGED PORTUGAL

[By Antonio Valdemdri]

It is noteworthy, for instance, that various Portugese consuls were punished with disciplinary processes and were removed from office for having issued visas and passports to the Jews. Such happened to Count Magno, Consul in Milan, and above all, to Aristides de Sousa Mendes, Consul in Bordeaux. The case of Sousa Mendes (who was reclassified posthumously in the diplomatic service after April 25)[1] is the most symptomatic. He was fired for having issued, free of charge, ten thousand visas to the Jews—thus saving them from the horrendous concentration camps and the subsequent extermination which awaited them.

In the "White Book" of the Department of State (Foreign Office) compiled by General Santos Costa, and published in 1971, there is a telegram from Salazar to the Portuguese Embassy in London which indicates preemptorily that the visas granted in Bordeaux were in violation of express instructions from the Department of State, and "by a consul which I have already removed from office". (Vol. VII, Page 183). In this same book, there is included a cable from the Portuguese ambassador in London, Monteiro dated July 26, 1940, to Salazar, in which, concerning a request for visas, he clarified that the beneficiaries of the visas were Polish—at the same time indicating that they were of "pure race". (Page 166)

[1] Salazar came to power May 26, 1927. Dictatorship overthrown April 25, 1974.

Teotonio Pereira, then Portuguese ambassador to Spain, according to this same source of information, in two letters to Salazar (July 14 & 20, 1940) and again in a memorandum, refers to Sousa Mendes. He referred to the attitude assumed by Sousa Mendes and to the fact that he had called him to San Sebastian to make him see that he had disobeyed when issuing free visas to those who applied for them—including the 10,000 Jews. (Vol. VII, Pages 141 & 893)

The humanitarian conduct of Sousa Mendes undoubtedly presented exceptional characteristics, pointed out after April 25 by diplomat Funo Bessa Lopes, in the reinstatement given to him over his refusal to become an accomplice in the Nazi war crimes. Other diplomats, even though in a smaller way, acted in a similar fashion. Clemente Leão, who is 83 years of age today, and resides in Lisbon, has reported to us, some days ago, the self-sacrifice of the Vice Consul in Paris, Carvalho da Silva, who in addition to other Portuguese Jews, took him out of the concentration camp at Drancy, and accompanied them by train to Irun, on their way to Portugal to see to it that no ill would come to them.

A PROTEST—A CLAIM

The facts related in this protest are urgently explained and were presented to the National Assembly in Lisbon, on December 10, 1945, thereby becoming an official and public document.

MR. PRESIDENT OF THE NATIONAL ASSEMBLY: Aristides de Sousa Mendes, former Portuguese consul in Bordeaux, exercising his right to protest, guaranteed under No. 18 of Article 8 of the Constitution, appeals to the Assembly the decision of the Minister for Foreign Affairs to relieve him of his functions for having granted, against current instructions, visas to thousands of foreigners who sought shelter from the threat of the German Army, which was at that time in the process of occupying Southwest France, inasmuch as the National Assembly is charged with the enforcement of the laws of the Nation (Article 91, No. 2) on the following grounds:

"The Foreign Minister sent him instructions on the granting of visas, which in the first line, absolutely prohibited the issuance of such visas to Jews, without regard for their nationality.

Involved were thousands of persons of the Jewish faith, from all the countries already invaded, and who had already been persecuted in Germany and in other countries which were forced to adhere to the German forces. The claimant estimated that he ought not to obey such prohibitive instruction inasmuch as he considered it unconstitutional in virtue of Article 8, No. 3 of the Constitution which guaranteed liberty and the inviolability of individual religious beliefs. This clause would not permit the persecution of anyone for these reasons. Furthermore, no one is to answer to such inquiries or be persecuted on account of them. To obey the instruction to deny visas to Jews, it would become a necessity to infringe upon the relative clause of the Constitution, to be able to grant or deny a visa in agreement with the relative instruction.

Consequently, the claimant, not obeying the orders in question, was only resisting, under the terms of Article B, line 18, an order which manifestly infringed upon the individual guarantees, which had not then been suspended at that time (Article 8, No. 19).

And one may not claim that inviolability of belief is not a right of foreigners because they are not residing in Portugal, the only instance in which they might claim the same rights as the Portuguese nations (Article 7). The case in point does not involve a right of a foreigner, but the duty of Portuguese officials who may not, either in Portugal or in its consulates (also Portuguese territory) make such inquiries to any individual without infringing upon the Constitution in order to deny any of their services. This in effect would be tantamount to odious religious persecution. For, ultimately it was a matter of right to asylum which any civilized country has always recognized and respected in occasion of war or public calamity.

The claimant entreats the Assembly in its high responsibility of enforcing the Constitution, to reverse the punishment imposed upon him for his disobedience of the instructions mentioned. the responsibility for the issuance of the mentioned orders to be exacted and those officials are to account for having infringed upon the Constitution and the established rights (Article 115, No. 2). The Claimant further entreats the Assembly to grant material and moral reparations for the damages caused by the disciplinary action instituted by the Minister for Foreign Affairs (Article 18).

The claimant cannot bear the evident and absured injustice he suffered and solicits that it be brought to a swift end, inasmuch as the Administration has been lauded in Portugal and abroad for an act which, manifested, the governments opposed, and for which the credit is due to the country and people whose alturistic and humanitarian sentiments were praised, and justly so, for an incident created by the disobedience of the claimant.

In short, the attitude of the Portuguese government was unconstitutional, anti-neutral, and contrary to all humane sentiments—and consequently undeniably against the Portuguese Nation."—Aristides de Sousa Mendes.

TWENTY YEARS OF CARING

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. DOWNEY of New York. Mr. Speaker, I'd like to share with you and my colleagues information about an important contribution that our senior citizens throughout this country are making every day.

It is fitting that we salute the Foster Grandparents Program on its 20th anniversary. The Foster Grandparent Program embodies the finest traditions of this country. Our senior citizens use their time and energy to pass on their knowledge and know-how to the next generation of Americans. And we, the people of the United States, are the beneficiaries. The children who take part in this program grow up with a sense of community involvement and respect for what has gone before them. That in itself is an immeasurable contribution.

Last Friday two of my constituents—Mrs. Rose Rizzo and Ms. Theresa Zoine—were honored at the White House and here on Capitol Hill for their years of work. New York State could not have had two finer representatives of selfless devotion to public service than these two women. They were joined by many other foster grandparents from throughout the United States.

In Suffolk County alone there are 85 foster grandparents serving 240 children every day. The efforts of these senior citizens are too numerous to mention, but here is some of what they do:

They assist children in their academic work.

They teach children proper manners and acceptable codes of social behavior.

And, most importantly, they are a friend, a good friend, to youngsters.

Theresa Zoine, Rose Rizzo, and the other 83 foster grandparents serving the children of Suffolk County are examples of the type of commitment this country needs. I know I speak for the rest of my colleagues when I praise the Foster Grandparent Program of New York State and the entire country.

BROWARD COUNTY FIGHTS SUBSTANCE ABUSE

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. SMITH of Florida. Mr. Speaker, on October 23, interested citizens from Broward and Palm Beach Counties will meet for the third annual SAAY/SADD [Substance Abuse and Use/Students Against Driving Drunk] conference. This conference is being held to create a local model substance abuse program, to establish active SADD chapters in every high school in the bicounty area, and to create active community task forces to work with the local SADD chapter.

I am a member of the Select Committee on Narcotics Abuse and Control and two other committees that deal with the entire range of drug problems. I, therefore, am well acquainted with the importance of effective substance abuse education and prevention programs as one part of a multifaceted approach to the entire drug abuse problem. Seeing such an effort in south Florida is especially gratifying to me. For too many years, this region has been in the forefront of the drug trafficking problem. The SAAY/SADD conference will, I hope, also put us in the vanguard of continued efforts to combat the effects of these drugs.

I want to take this opportunity to commend the School Board of Broward County for its sponsorship of SAAY/SADD and its determined efforts to educate the students of the county about the dangers of substance abuse.

The school board, and especially its chairperson, Mrs. Toni Siskin, and Superintendent William J. Leary have joined forces to promote positive approaches for the prevention of substance abuse. They have developed a commitment and instituted a policy to achieve a balanced community approach to the problem by seeking to create conditions that would promote the

well-being of our young people personally and collectively.

The school board has helped to create a model prevention program that could be used in other parts of the country. Indeed, the Broward County efforts are recognized as being one of the largest and most comprehensive school-based prevention programs in the Nation.

In Broward County, drug education now is part of the curriculum from kindergarten through high school. Peer counseling programs have been established in all high schools. Conveniently located counseling centers offer free, nonstigmatic services for all family members. There are free parent education programs in 14 convenient locations throughout the county.

I also want to commend Mr. Robert N. Holsaple who is the supervisor of prevention programs for his work in this area. Through his efforts, the school board has published a "Drug Handbook for Parents" that is the best I ever have seen. This publication tells parents among other things what are the signs of drug abuse, how to help their children avoid drugs, and where to go for help.

If every school district were to establish a program comparable to this one, then maybe we will be able to defeat the twin scourges of drug and alcohol abuse.

I wish SAAY/SADD every success and urge the Broward School Board and the other conference participants to keep up the good work.

TRIBUTE TO MAESTRO ROSTROPOVICH

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. KEMP. Mr. Speaker, I congratulate Maestro Rostropovich on induction into the Russian-American Hall of Fame. Our country has benefited greatly from the influence of many of Russian heritage in every walk of life and at every level of society.

There is something about an emigre's love of Russia that is far deeper than any regime can destroy. What you recognize immediately about Slava is his artistic greatness as a Russian, both as conductor and as cellist. There is a spark of the soul of Russia in Slava's work that is unmistakable.

One cannot talk about Mstislav Rostropovich without mentioning the relationship between Rostropovich and composer Dmitri Shostakovich, a relationship which spans three generations and three continents. Slava studied under Shostakovich, and they remained friends until the composer's death. That friendship is maintained between Rostropovich and the son and grandson of Shostakovich, both of whom have also emigrated and have appeared with our own National Symphony.

The love and respect that Slava bears for his mentor comes through clearly when he conducts Shostakovich. When you hear him conduct the Seventh Symphony, dedicated to the people of Leningrad, or the Fourth Symphony or the opera, "Lady Macbeth of Mzensk," both of which were condemned and censored by the Marxist regime, you feel the truly great spirit of the Russian people through the music.

Rostropovich has brought more to this country than just great music. He is an inspiration to us all. Slava represents the best of humanity and the arts, what can be achieved when one transcends politics and looks to the greater good of humanity.

For example, the incident which ultimately caused Slava and his wife, noted singer Galina Vishnevskaya, to leave the Soviet Union was Slava's support of his friend, the controversial Alexander Solzhenitsyn. To Slava, the humanitarian and noted conductor, it was natural to turn over his dacha to a friend when that friend had no home. In fact, it was at the Rostropovich dacha that Solzhenitsyn wrote most of his works during his tenure there from 1969 to 1973.

It was because of his championing of Solzhenitsyn that Slava began to experience the harassment which is the indication that the Soviet Government is displeased with one of its citizens who has dared to take an unpopular position. Severe restrictions were placed on Rostropovich and Vishnevskaya. Great artists need two things in order to thrive; freedom to create and spiritual sustenance. When these were withheld by the Soviet Government, Slava and Galina knew they would have to leave in order to survive as artists. In December 1974 they left, as a result of Senator KENNEDY's personal request to Brezhnev.

On March 1975, Rostropovich made his conducting debut with the National Symphony. Three weeks later he was appointed music director, an appointment which has brought much joy to all concerned for the past 9 years. Rostropovich has brought this orchestra the international recognition it deserves, and what could be more American than having a Russian emigre as conductor of the National Symphony in our Nation's capital?

The National Symphony just returned from an enormously successful tour of Europe. The itinerary included Yugoslavia and represented the first time Rostropovich had visited a socialist republic since he left the Soviet Union in 1974. His welcome was unprecedented. Concerts were sold out in record time. This was partly in recognition of the quality of the orchestra, but also a great tribute to a revered conductor and noted humanitarian.

I would like to share a treasured anecdote about tonight's honoree. When Slava was at a reception following the concert in Lubyana, with the U.S. Ambassador present, he talked about the difference between working in the United States and working in the Soviet Union. He said "In Russia, Stalin tried to teach music to Prokofiev and Shostakovich. In the United States, President Reagan doesn't try to teach me music. He runs the country and lets me worry about the music."

To that I say to Maestro Rostropovich "I hope you will continue to let President Reagan run the country and please, Slava, keep on worrying about the music."

NO CHANGE IN APARTHEID

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 21, 1985

Mr. GARCIA. Mr. Speaker, Columnist Anthony Lewis has written another insightful column on South Africa. He points out that despite all rhetorical flourishes, there is no change in apartheid. In fact, the South African Government has been largely successful in alienating even the most moderate forces in South Africa.

Mr. Lewis suggests that Western governments, banks, companies, and universities have a responsibility to make the South African Government understand that they will suffer the consequences if they don't change. I agree.

I submit Mr. Lewis article for my colleagues' perusal.

[From the New York Times Oct. 21, 1985]

ENDING AN ILLUSION

(By Anthony Lewis)

BOSTON.—The South African Government has performed a useful service that should be acknowledged. Over these last days weeks it has finally disposed of the illusion that it is ready for serious change—political change—in the apartheid system.

President Botha and his officials have sent the message with uncommon clarity. Their recent actions have had the character of not only rejection but provocation.

Consider, for example, the decision to execute a poet and supporter of the outlawed African National Congress, Benjamin Moloise. It was more than two years since Mr. Moloise was sentenced to death for allegedly participating in the murder of a policeman. The Government granted a stay in August; it appeared to be responding to new evidence and to worldwide appeals for clemency. Then, suddenly, it proceeded with the execution.

The night before the hanging, soldiers surrounded the home of the poet's mother in Soweto, where she was holding a vigil, and fired tear gas into it. The next morning officials would not let her see her son before he died.

Mrs. Moloise is an elderly nonpolitical woman who said she once "felt sympathy" for those in power. But now she said. "This Government is cruel. It is really, really cruel."

Or think about events last week in the Cape Town suburb of Athlone. It is an area of middle-class coloreds, people of rising expectations whom the Government has been trying to woo. But last week the police ran a provocative operation in Athlone that ended with their killing three students, aged 12, 16 and 20. Two days later they fired shotguns into an Athlone crowd; a British journalist there was hit by 50 birdshot pellets.

The police refused to return the bodies of the three students unless their parents signed statements admitting that they had

been involved in stoning incidents. Two of the dead were Moslems, and the delay in burial was acutely offensive to their faith.

"Now there is a bond of radicalism in Thornton Road that is not going to go away," a Baptist minister, Graham Cyster, said. Thornton Road is the genteel area where the shooting took place.

Those are two examples among many of official action that seems designed to outrage the most moderate opinion among the non-white majority. And it had exactly that effect. The hanging of Benjamin Moloise set off rioting by blacks in downtown Johannesburg—people who are ordinarily to be found shopping in the downtown department stores.

The Government also made clearer than ever last week that it does not want its white people to build any bridges to the leaders of the majority. It withdrew the passports of eight white students at Stellenbosch, the most respected Afrikaans-language university, because they were going to Zambia to talk with leaders of the African National Congress.

"The proposed talks will serve no purpose whatsoever," Stoffel Botha, the Minister of Home Affairs said.

Only the willfully blind could fail to perceive the policy behind such measures. President Botha and his Government have decided that it is no use trying to mollify discontent at home and criticsm abroad with more talk of "reform." Instead they are going back to the historic strategy: beating the blacks into submission.

There is a perfect piece of symbolism in one tactic being used by the police all over the country. They are using sjamboks, the big rawhide whip used traditionally to punish blacks—literally to beat them into submission.

But of course the police are using not just whips but guns. Since the Government imposed a state of emergency on July 21, three months ago today, more than three people have been killed every day on average—most of them black and most of them shot by the police. In the last year of protest nearly 800 people have died.

Will the policy work? In South African terms it might. The Government has the guns. It crushed black protests in 1960 and 1976, One explanation of its deliberately provocative tactics now is that it hopes to bring this yearlong crisis to a head by arousing more protest and then crushing it ruthlessly.

But there is an external risk. Stripping away the illusion of "reform," as Mr. Botha is now doing, may make foreigners, especially Americans, confront the hard reality of South Africa. It may make governments and others understand that they have to be serious if they want to see change in South Africa.

The point is simple. P.W. Botha does not even contemplate the possibility of political change in South Africa. Western governments and banks and companies and universities will have to play their part if he is to understand the terrible consequences of his policy for all South Africans.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, October 22, 1985, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

OCTOBER 23

9:00 a.m.
Commerce, Science, and Transportation
To hold hearings on the nominations of Michael A. McManus, Jr., of New York, and Neal B. Freeman, of Virginia, each to be a Member of the Board of Directors of the Communications Satellite Corporation (Comsat).
SR-253

9:30 a.m.
Banking, Housing, and Urban Affairs
International Finance and Monetary Policy Subcommittee
To hold oversight hearings on exchange rate misalignment.
SD-538

Environment and Public Works
Nuclear Regulation Subcommittee
To continue hearings on S. 445 and S. 1225, bills to revise certain provisions of the Atomic Energy Act of 1954 regarding liability for nuclear incidents.
SD-406

Governmental Affairs
To hold hearings on the nominations of William R. Barton, of Virginia, to be Inspector General, General Services Administration, Julius W. Becton, Jr., of Virginia, to be Director, Federal Emergency Management Agency, and James P. McNeill, of Maryland, to be an Associate Director, Federal Emergency Management Agency.
SD-342

Judiciary
Patents, Copyrights and Trademarks Subcommittee
To hold hearings on S. 1543, Process Patent Amendment of 1985.
SD-628

Select on Intelligence
To resume closed hearings on the development of a national intelligence strategy (Phase II).
SH-219

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Foreign Relations
To hold hearings to review the international debt and finance policies.
SD-419

Judiciary
To hold hearings on the nomination of Charles J. Cooper, of Virginia, to be an Assistant Attorney General (Office of Legal Counsel), Department of Justice.
SD-226

Select on Indian Affairs
To hold hearings on S. 1684, to declare that the United States holds certain Chilocco Indian School lands in trust for the Kaw, Otoe-Missouri, Ponca, and Tonkawa Indian Tribes of Oklahoma, S. 1724, to authorize the Cherokee Nation of Oklahoma to design and construct hydroelectric power facilities at W.D. Mayo Lock and Dam, and S. 1728, to authorize the Cherokee Nation of Oklahoma to lease certain lands held in trust for up to ninety-nine years.
SD-562

11:00 a.m.
Foreign Relations
Business meeting, to consider pending calendar business.
SD-419

2:00 p.m.
Conferees
On H.R. 3036, appropriating funds for fiscal year 1986 for the Department of the Treasury, U.S. Postal Service, Executive Office of the President, and certain independent agencies.
H-164, Capitol

OCTOBER 24

9:00 a.m.
Armed Services
Sea Power and Force Projection Subcommittee
To hold hearings on S. 535, the National Shipbuilding Industrial Base Act of 1985.
SR-232A

9:30 a.m.
Foreign Relations
African Affairs Subcommittee
To hold hearings on the African debt crisis.
S-116, Capitol

Labor and Human Resources
To resume hearings on the nomination of Ford B. Ford, of Virginia, to be a Member of the Federal Mine Safety and Health Review Commission.
SR-428A

Special on Aging
To resume hearings to review the impact of Medicare's prospective payment system on the quality of care received by Medicare beneficiaries.
SD-628

10:00 a.m.
Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To resume oversight hearings on ground-water level, use, quality and flow in the United States.
SD-406

Governmental Affairs
Permanent Subcommittee on Investigations
To hold hearings on the role of the entertainment industry in deglamorizing drug use.
SD-342

Judiciary
Business meeting, to consider pending calendar business.
SD-226

Labor and Human Resources
To hold hearings on the nominations of Sidney Lovett, of Connecticut, Richard J. Neuhaus, of New York, W. Bruce Weinrod, of the District of Columbia, John N. Moore, of Virginia, Dennis L. Bark, of California, Evron M. Kirkpatrick, of Maryland, and W. Scott Thompson, of New Hampshire, each to be a Member of the Board of Directors of the United States Institute of Peace.
SD-430

Conferees
On H.J. Res. 372, increasing the statutory limit on the public debt.
SD-215

11:00 a.m.
Appropriations
Military Construction Subcommittee
Closed business meeting, to mark up H.R. 3327, appropriating funds for fiscal year 1986 for military construction programs of the Department of Defense.
SD-116

12:00 a.m.
Judiciary
To hold closed hearings on the nomination of Stanley Sporkin, of Maryland, to be U.S. District Judge for the District of Columbia.
SD-226

2:00 p.m.
Commerce, Science, and Transportation
To hold hearings on the nomination of Carol G. Dawson, of Virginia, to be a Commissioner of the Consumer Product Safety Commission
SR-253

4:00 p.m.
Select on Intelligence
Closed briefing on worldwide intelligence matters.
SH-219

4:30 p.m.
Select on Intelligence
Closed briefing on intelligence matters.
SH-219

OCTOBER 25

9:30 a.m.
Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To hold hearings on the impact of lead phasedown on farm vehicles and heavy duty engines.
SD-406

OCTOBER 28

9:30 a.m.
Finance
Health Subcommittee
To hold hearings on S. 1551, to provide for administrative appeals and judicial review under Part B of Medicare, and to review the beneficiary and provider appeals provisions under Part A and B of the Medicare program.
SD-215

OCTOBER 29

9:30 a.m.
Commerce, Science, and Transportation
To hold oversight hearings on the implementation of the Motor Carrier Safety Act (P.L. 98-554).
SR-253

Labor and Human Resources
Handicapped Subcommittee
To hold hearings on the Tenth Anniversary of the Education for All Handicapped Children Act (P.L. 94-142).
SD-430

Rules and Administration
Business meeting, to consider S. 581, to authorize construction of facilities for the Whipple Observatory in Arizona and to authorize repair and replacement of facilities at the Tropical Research Institute in Panama, S. 582, to authorize funds for museum programs of the Smithsonian Institution, S. 583, to authorize funds for construction of additional facilities for the Cooper-Hewitt Museum in New York, S. Res. 28, S. Res. 29, and S. Res. 81, measures to set forth regulations to implement television and radio coverage of Senate Chamber proceedings, and administrative business.
SR-301

10:00 a.m.
Armed Services
Defense Acquisition Policy Subcommittee
To resume oversight hearings to review the status and impact of certain legislative provisions to reform the defense acquisition process.
SD-628

Energy and Natural Resources
Public Lands, Reserved Water and Resource Conservation Subcommittee
To hold hearings on S. 1107, to authorize the Society of the Third Infantry Division to erect a memorial in the District of Columbia or its environs, S. 1223, to authorize the erection of a memorial on Federal land in the District of Columbia or its environs to honor members of the Armed Forces of the United States who served in the Korean War, S. 1379, to authorize the erection of a monument given to the American people as a gift of the Kingdom of Morocco, on public grounds in the District of Columbia, S.J. Res. 143, to authorize the Black Revolutionary War Patriots Foundation to establish a memorial in the District of Columbia at an appropriate site in Constitution Gardens, and S.J. Res. 184, to authorize the Korean War Memorial, Inc. to erect a memorial in the District of Columbia or its environs.
SD-366

Governmental Affairs
Permanent Subcommittee on Investigations
To hold hearings on the Federal enforcement of the Bank Secrecy Act (title 31 of the U.S. Code).
SD-342

Judiciary
To hold hearings on S. 1335, Money Laundering and Related Crimes Act of 1985.
SD-226

Judiciary
Constitution Subcommittee
To resume hearings on S. 1580, to revise federally mandated attorneys' fees applicable to civil, criminal, and administrative proceedings involving the United States and civil proceedings involving State and local governments.
SD-226

OCTOBER 30

9:30 a.m.
Labor and Human Resources
To resume hearings to examine certain barriers to health care.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Labor and Human Resources
Children, Family, Drugs, and Alcoholism Subcommittee
To hold hearings on the effects of domestic violence.
SD-628

OCTOBER 31

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on S. 240, to start daylight savings time on the first Sunday of March, and S. 1433, to start daylight savings time on the first Sunday of April and to end it on the first Sunday of November.
SR-253

Labor and Human Resources
Employment and Productivity Subcommittee
To resume hearings on the impact of trade on employment and productivity.
SD-430

10:00 a.m.
Small Business
To hold oversight hearings on activities of the Small Business Administration's Office of Veterans Affairs
SR-428A

2:00 p.m.
Joint Library
To hold a general business meeting.
H-328, Capitol

4:00 p.m.
Select on Intelligence
Closed briefing on U.S. intelligence monitoring capabilities.
SH-219

NOVEMBER 1

9:30 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold oversight hearings on the implementation of the Staggers Rail Act (P.L. 96-448).
SR-253

NOVEMBER 4

9:30 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To resume oversight hearings on the implementation of the Staggers Rail Act (P.L. 96-448).
SR-253

NOVEMBER 5

9:30 a.m.
Rules and Administration
To hold hearings on proposed legislation to provide for public financing of Senate general election campaigns.
SR-301

NOVEMBER 6

9:30 a.m.
Commerce, Science, and Transportation
Communications Subcommittee
Science, Technology, and Space Subcommittee
To hold joint hearings on the space world administrative radio (WARC).
SR-253

10:00 a.m.
Judiciary
Administrative Practice and Procedure Subcommittee
Courts Subcommittee
To hold joint hearings on farm bankruptcy.
SD-628

NOVEMBER 7

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on insurance and space commercialization.
SR-253

NOVEMBER 8

9:15 a.m.
Finance
Health Subcommittee
To hold hearings on a Department of Health and Human Services report on proposed reform of the Federal hospital insurance program (Medicare Part A) method of paying for capital costs.
SD-215

9:30 a.m.
Energy and Natural Resources
Natural Resources Development and Production Subcommittee
To hold hearings on S. 570, S. 372, S. 946, and S. 913, bills to improve the administration of the Federal coal leasing program, and other coal related issues.
SD-366

NOVEMBER 12

9:30 a.m.
Governmental Affairs
Permanent Subcommittee on Investigations
To resume hearings in espionage activities in the United States.
SD-342

Labor and Human Resources
Employment and Productivity Subcommittee
To resume hearings on the impact of trade on employment and productivity.
SD-562

NOVEMBER 13

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold oversight hearings on LANDSAT commercialization.
SR-253

Labor and Human Resources
To hold hearings on nutrition and fitness in public health.
SD-430

NOVEMBER 14

9:30 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
SR-253

Governmental Affairs
Permanent Subcommittee on Investigations
To resume hearings on espionage activities in the United States.
SD-342

10:00 a.m.
Energy and Natural Resources
To hold oversight hearings on the President's July 8, 1985 National Defense Stockpile "modernization" proposal and its potential impact on the domestic mining industry.
SD-366

Governmental Affairs
Intergovernmental Relations Subcommittee
To hold oversight hearings on regulatory activities of the Office of Management and Budget.
SD-562

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
Business meeting, to mark up proposed legislation authorizing funds for programs of the Higher Education Act.
SD-430

NOVEMBER 15

10:00 a.m.
Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To resume oversight hearings on ground-water level and use and on ground-water quality and flow in the United States.
SD-406

NOVEMBER 18

9:15 a.m.
Finance
Health Subcommittee
To hold hearings on the Federal supplementary medical insurance program (Medicare Part B) payments for physician services, focusing on efforts by the Department of Health and Human Services and others to assess the current payment mechanism and develop reform options.
SD-215

NOVEMBER 19

10:00 a.m.
Commerce, Science, and Transportation
Business, Trade, and Tourism Subcommittee
To hold hearings on the promotion of domestic tourism.
SR-253

Office of Technology Assessment
The Board, to meet to discuss pending business.
EF-100, Capitol

DECEMBER 10

10:00 a.m.
Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To hold oversight hearings on environmental effects of global atmospheric warmings.
SD-406

CANCELLATIONS

OCTOBER 22

10:00 a.m.
Judiciary
Security and Terrorism Subcommittee
To hold hearings on terrorism in South Africa as it affects the security of the United States.
SD-G50

OCTOBER 24

9:30 a.m.
Veterans' Affairs
Business meeting, to mark up proposed legislation to provide a cost-of-living increase for fiscal year 1986 in the rates of veterans disability compensation and dependency and indemnity compensation for surviving spouses and children.
SR-418

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on proposed legislation authorizing funds for programs of the Higher Education Act.
SD-430

HOUSE OF REPRESENTATIVES—*Tuesday, October 22,1985*

The House met at 12 o'clock noon.

Rabbi Simcha Freedman, Adath Yeshurun Synagogue, Miami, FL, offered the following prayer:

Dear G-d, in Pirke Avot, Ethics of the Fathers, we learn that the world endures due to three principles: truth, justice, and peace.

The Declaration of Independence states that "We hold these truths to be self evident, that all men are created equal; that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty and the pursuit of happiness."

Dear G-d, while the distinguished Members of this House of Representatives, upon whom we ask Thy blessings, while they defend and support those self-evident truths, there are yet those individuals and even nations who do not.

Some would deny the principle of life by savagely killing innocent people, others would defy the principle of liberty, thus creating refuseniks and prisoners of conscience.

Adlai Stevenson once said, "Man cannot reduce the truth to ashes, he may murder his fellow man with a shot in the back, but he does not murder justice * * *."

Dear G-d, we have faith that truth, justice, and peace shall yet prevail despite the fulminations of those who so viciously attempt to prevent it.

We believe the dream is real and that it will come to fruition due to those brave peoples who fight against tyranny and terrorism. They are the last best hope of mankind.

G-d, bless America. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3038. An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 3038) "An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. GARN, Mr. WEICKER, Mr. LAXALT, Mr. D'AMATO, Mr. ABDNOR, Mr. DOMENICI, Mr. HATFIELD, Mr. LEAHY, Mr. STENNIS, Mr. PROXMIRE, Mr. JOHNSTON, and Mr. LAUTENBERG to be the conferees on the part of the Senate.

RABBI SIMCHA FREEDMAN

(Mr. LEHMAN of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEHMAN of Florida. Mr. Speaker, I would like to extend a warm welcome to Rabbi Simcha Freedman and to thank him for officiating in the opening prayer today in the U.S. House of Representatives.

My good friend of many years, Rabbi Freedman is the spiritual leader of Temple Adath Yeshurun of the city of North Miami Beach. His involvement in the community has over the years cast him as a true leader on behalf of human rights and other humanitarian concerns. His activism on Soviet Jewry is especially notable. Through his efforts, the street address of Temple Adath Yeshurun was changed to be known as Shcharansky Boulevard to symbolize the continued incarceration of Anatoly Shcharansky by the Soviet Union, and the utter abuse of his human rights.

Rabbi Freedman's congregation is testimony to the pivotal role he has played in building Temple Adath Yeshurun as one of the most dynamic congregations in Miami. Its beautiful day care center, public events, and other services enable its large community to enjoy a full spectrum of activities.

Once again, on behalf of my colleagues, I welcome Rabbi Simcha Freedman and thank him for honoring us this morning.

HUMAN RIGHTS ABUSES WARRANT SUSPENSION OF ROMANIA'S MFN

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Jersey. Mr. Speaker, on behalf of Mr. HALL of Ohio, Mr. WOLF, and myself, I am today introducing legislation to suspend most-favored-nation [MFN] status to Romania for 6 months on account of egregious human rights violations in that country.

Romania, Mr. Speaker, has enjoyed MFN since 1975. Annual trade between our two countries amounts to approximately $1 billion and the Romanians export more than they import by a ratio of more than 4 to 1.

In exchange for these considerable enhancements to the Romanian economy, the United States hopes the Ceausescu regime will act more independently of the Soviet Union in foreign policy matters, while adhering to international human rights standards at home.

While it is clear that the Romanians have demonstrated at best some willingness and ability to digress from hardline Soviet policy—Romania sent a team to the Olympics in Los Angeles—their record on human rights is shameful.

Four months ago, Mr. HALL, Mr. WOLF, and I went on a factfinding mission to Romania sponsored by Christian Response International. We met with high Government leaders including Foreign Minister Stefan Andrei and religious leaders in an attempt to better understand the reality of what is occurring there. We came away deeply concerned over the human rights situation, especially the systematic persecution of Christians, the bulldozing of churches and other repressive actions by the Government.

On the one hand, we note with joy that since our return, Father Gheorghe Calciu, the Orthodox priest who spent more than 20 years in prison for his faith in Christ, has been permitted to emigrate to the United States. On the other hand, rather than moving toward an easing up on rights violations, Romania is cracking down.

It is sad but true that the Romanian Government tolerates no domestic criticism, no opposition, no dissent from its policies. There are massive controls of all forms of the media, freedom of speech, and movement within and without the country. Furthermore, citizens are prohibited the right to assemble unless specific permission is granted by the Government. Of course, that permission is only se-

cured when the Government has insured that the activity will serve the interests of the Communist Party. Christians are singled out for arrest and imprisonment. Groups like Amnesty International have raised concerns over beatings and psychiatric abuse against prisoners of conscience.

Mr. Speaker, I regret that this action is necessary—but it is. The leaders in Bucharest must come to recognize that the United States is only insisting that Romania keep its word as a signatory to the Helsinki Accords. Respect for human rights isn't optional; it is fundamental, and is the only legitimate basis for genuine bilateral relations.

ALEX ODEH, AN ARAB-AMERICAN VOICE OF MODERATION

(Mr. DYMALLY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DYMALLY. Mr. Speaker, almost unnoted by the Nation's press, a terrorist bombing killed a good and gentle college professor on October 11, 1985. It happened not on the high seas, but in Santa Ana, CA.

Now Alex Odeh's 2-year-old daughter, Suzanne, will never know her father as do her 5- and 7-year-old sisters, Samia and Helena.

His three daughters will never know, as I know, the great decency and the exemplary humaneness of their e witnessing that violence breeds violence." He condemned terrorism in all its forms; instead, he advocated peaceful dialog. Alex was a Catholic. However, when a memorial service was requested for Alex, at the University of San Francisco, a Catholic university, the president denied the request.

To no avail, I urged a change of mind. Why the refusal? Fear. Fear of reprisal. Extremists silenced a voice of moderation. To our shame, they also intimidated the leader of an institution symbolic of fairness and compassion. Has terrorism won? It cannot be allowed to be so.

The whole Nation must mourn equally and fearlessly the killings of Alex Odeh and Leon Kinghoffer. If we do not, then we should begin to mourn for ourselves, because we will have become the victims of terrorism.

INDIAN ECONOMIC DEVELOPMENT ACT OF 1985

(Mr. McCAIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCAIN. Mr. Speaker, one of the great tragedies in America today is the conditions that exist on our Indian reservations: unemployment, poverty, and despair throughout many of our reservations in America.

Mr. Speaker, today I am introducing the Indian Economic Development Act of 1985, which I believe can bring new hope and prosperity to all native Americans.

Poverty is a way of life on many reservations. Drug and alcohol abuse is rampant. Limited education portends a life of functional illiteracy and unemployability for many Indian people. Passage of this legislation offers a different choice—a path toward hope rather than despair. It will encourage Indian tribes to work with the business community to create jobs, provide employment training, and initiate long-term economic development. The Indian Economic Development Act would provide for the designation of certain tribal lands as enterprise zones, thus encouraging economic self-sufficiency and reducing Indian dependency on Federal assistance.

One of the biggest problems faced by reservations is the reluctance of businesses to invest. This legislation would serve as a catalyst—spurring investment, creating jobs, and fostering entrepreneurship.

The Indian Economic Development Act offers the Nation's tribes the opportunity to join forces with the private sector to build a better life. I urge my colleagues to support this important legislation.

S. 49 WOULD BENEFIT ASSASSINS, NOT SPORTSMEN

(Mr. LEVINE of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVINE of California. Mr. Speaker, easy access to guns has left a trail of tragedy and violence through our Nation's recent history. President Kennedy, Robert Kennedy, President Ford, and President Reagan have all suffered from the assassin's touch. And daily we hear of new tragedies affecting our neighborhoods and our communities.

Legislation which will enable the Lee Harvey Oswalds, Sirhan Sirhans, John Hinckleys, and street-corner muggers alike to easily obtain untraceable firearms is now pending in committee. Efforts are being made to bring it directly to the floor for a vote.

Every major law enforcement group in the country opposes this legislation.

S. 49 is being sold as a "sportsman's bill," but in hearings, a far different picture would emerge. S. 49 would allow the interstate sale of handguns for the first time since 1968, prohibit surprise inspection visits to handgun dealers, and permit dealers to sell guns from their personal and private collections. These provisions are not provisions for sportsmen but are provisions for criminals.

I urge my colleagues to oppose all efforts to bring S. 49 to the floor without adequate hearings.

HOUSING ACT OF 1985, A HALLOWEEN TRICK, NOT A TREAT

(Mr. GROTBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GROTBERG. Mr. Speaker, H.R. 1, the Housing Act of 1985 included in title II of the Omnibus Budget Reconciliation Act is the only major authorization bill included by a major committee in the reconciliation process.

I find it only fitting that the House is considering this important legislation on the advent of Halloween. If H.R. 1 prevails and gets passed under the cloak of the reconciliation bill, the American taxpayers will be getting the "trick" while the 30 majority members of the Housing Banking Committee will be getting the "treat." The "trick" will be that major housing legislation would pass the House by the say of only 30 House Members. This would be the biggest "trick" played on our democratic process that I have seen in a long time. The "treat" will go to the 30 majority members of the House Banking Committee who had the only say in modifying H.R. 1 for reconciliation purposes.

I ask my colleagues—something must be wrong with H.R. 1 if the majority members of the Banking Committee view the reconciliation process as their best and only hope for congressional passage of the Housing Act this year. This alone should be a signal for the 405 Members of the Congress to question what is contained in the housing bill.

If the provisions contained in H.R. 1 are so contentious that they must be hidden in an omnibus reconciliation bill what will this do to assure a timely conference between the House and Senate?

Mr. Speaker, in keeping with the spirit of deficit reduction—let's not have any "tricks or treats" this year.

□ 1215

THE GREAT AMERICAN SPIRIT OF PATRIOTISM

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, several events of the past few weeks have rekindled that great American spirit of patriotism—none more so than the

51-059 O-86-38 (Pt. 20)

recent awards to American Nobel laureates. One of the most inspiring individuals in this esteemed group is Prof. Franco Modigliani of MIT, winner of the Nobel Prize for economics. His pioneering work in the area of savings comes at a most opportune time for the Nation—a period where Americans are saving less, borrowing more, and staring at a $2 trillion national debt. Professor Modigliani's work should serve as a clarion call to all Americans, especially those of us shaping economic policy.

It is in this spirit that I will soon be introducing legislation which enlists U.S. savings bonds in the battle to reverse this dangerous trend and literally "buy back America." The legislation will declare 1986 as "Save for the U.S.A." year, calling on the President to elevate to national prominence a major national savings bond drive that can help increase savings and reduce our Federal deficit, and wean ourselves off our growing unwise dependence on foreign credit. I hope my colleagues will join in this most valuable savings and investment endeavor for our country's future.

ECONOMIC SANCTIONS AGAINST ANGOLA

(Mr. McCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCOLLUM. Mr. Speaker, according to Amnesty International, the Communist regime in Angola is brutal and routinely violates human rights. It has been engaged for more than 10 years in a civil war with the anti-Marxist forces of Jonas Savimbi. There are more than 30,000 Cuban troops in Angola supporting the Communists and there are also 1,500 Soviets and 2,500 East Germans. The Soviet Union has supplied the Angolan Government with sophisticated aircraft, tanks, and other weapons.

Incredibly, the United States has been financing the Angolan Government through United States investment there, Export-Import Bank loans and by more than $1 billion of imports each year including the purchase of more than 80 percent of oil produced in Angola. This is immoral and indefensible.

I am introducing legislation today that bans future U.S. business investment in Angola, prohibits loans to Angola, and requires the President to embargo all trade with Angola unless certain conditions are met. Among those conditions are significant efforts to improve human rights, free elections, and the withdrawal of all Cuban, Soviet, and other foreign Communist troops.

I urge my colleagues to join me in support of this legislation. We must stop this outrage.

THE RECONCILIATION ACT

(Mr. SHARP asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHARP. Mr. Speaker, tomorrow the House is scheduled to consider the Reconciliation Act, which is supposed to be our chief effort in this Congress to cut Federal spending and thereby cut the Federal deficit. We all know that among the serious provisions to do that in that bill are some provisions that are, in fact, going to be very costly to the U.S. Government and to the U.S. taxpayer. One of those is the outrageous giveaway of future revenues earned on the Outer Continental Shelf that will be given to several States. This provision was not envisioned in the budget resolution. It will make it very hard in the future for us to carry out our responsibilities in reducing future deficits, and I am sorry to say the House Rules Committee refused by a vote of 7 to 6 to let the entire House vote on this serious matter.

Tomorrow, as the House considers the rule on reconciliation, I hope Members will recognize that voting "yes" will prove costly to balancing the budget in the future.

OPPOSE DISCHARGE PETITION ON FIREARMS OWNERS PROTECTION ACT

(Mr. SEIBERLING asked and was given permission to address the House for 1 minute.)

Mr. SEIBERLING. Mr. Speaker, rarely a day goes by when the news does not recite incidents of violent crime. Americans everywhere live with the fear that they could be the next victim of some life-threatening criminal act.

If there is one proposal that Congress could adopt that would do more to curb street crime than any other, it would be strong handgun control legislation. Until handguns are outlawed, every outlaw can get a handgun. Unfortunately, S. 49, the Senate-passed Firearms Owners Protection Act, would take us in the opposite direction—backward in the fight against violent crime.

The Nation's major law enforcement organizations have pointed out that S. 49 would significantly undermine law enforcement; yet S. 49 was never even considered at the committee level in the other body.

Now an attempt is being made in the House to bypass the committee process here and bring S. 49 to the floor by means of a discharge petition, even though the House Judiciary Committee has already announced that it will begin comprehensive hearings next week.

One citizen who has been invited to testify at those hearings is Sarah Brady, wife of Presidential Press Secretary Jim Brady. In a letter to Members of Congress urging them to let the Judiciary Committee hearings take place, Mrs. Brady writes:

> Now I must ask you to allow all our voices to be heard on this issue. I have so much to say—please listen.

Out of respect for Sarah and Jim Brady and the hundreds of thousands of other Americans who have been threatened, maimed, or killed by handguns, I urge Members not to sign the discharge petition on S. 49.

YOUTH EMPLOYMENT OPPORTUNITY WAGE ACT OF 1985

(Mr. MONSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONSON. Mr. Speaker, earlier this year, President Reagan sent a message to the Congress urging the enactment of the Youth Employment Opportunity Wage Act of 1985. I share his sentiments that one of the Nation's longstanding problems is providing adequate employment opportunities for our young people. Even in our times of economic prosperity, unemployment among our youth remains a problem. Through this legislation, we can make it possible for employers to expand job opportunities for young people during the summer months.

Aside from the fact that it is a sound proposal, crafted to create 400,000 summer youth jobs across the country at no additional cost to taxpayers, this bill represents a principle I find critical to the character development of our young people. That is the basic good that comes from learning responsibility and learning to adapt to a variety of people and situations. Positive experiences in the workplace can help teach important values—values which are central to success later in life. It teaches an ethic that is basic to the American society. Our young people need an opportunity to be part of that American ethic. I urge my colleagues to examine this legislation carefully and to enact it speedily.

LEON KLINGHOFFER

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, Leon Klinghoffer represented what is best in America. He was a courageous and determined man who fought injustice all his life. During the Second World War, he served his country in the Army Air Corps. After the war, he realized a dream of millions of Americans—starting with little more than their own ingenuity and determination, he and his brother built a compa-

ny to manufacture a product which they themselves had invented. As a philanthropist, he then shared his good fortune generously with others.

In recent years, partly paralyzed by a stroke, he refused to accept the limitations of his disability. He set for himself the goal of escorting his daughter Ilsa at her wedding 2 months hence, and had he lived he would not have rested until he had achieved that goal.

When he was attacked by the *Achille Lauro* terrorists, Leon Klinghoffer, disabled as he was, resisted courageously.

Mr. Speaker, it is altogether fitting that we honor this brave American. Together with Senator ALPHONSE D'AMATO of New York, I am, therefore, introducing legislation to confer the Congressional Gold Medal of Achievement on Leon Klinghoffer posthumously. I invite all Members of the House to join me as cosponsors.

A NEW SYSTEM FOR FILING TAX RETURNS

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker and Members of the House, Halloween this year began on April 15, when we began hearing horror stories from our taxpayers on the treatment they have been receiving from the various IRS offices throughout the country, reports of missed and misfiled returns, refunds delayed, threats of liens and legal action on the part of the IRS, all kinds of horror stories. Not all of them can be blamed on the computer gremlins or ghosts that the IRS talks about. Part of it has to do with the fact that 100 million returns have to be filed every year by April 15.

I have proposed today to the Ways and Means Committee that we eliminate the filing date of April 15 and spread out the filing dates across the year through a system of staggered returns, to become compiled on the basis of the taxpayer's birth date. It is worth considering. It can end that crush on April 15 and take us a long way toward simplifying the system of tax filing that we now have.

I urge the Members of the House to ask their individual members on the Ways and Means Committee to foster this plan. It is about time we tried to do something.

TIME ZONE ISSUE

(Mr. McCLOSKEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCLOSKEY. Mr. Speaker, as we begin consideration of the Daylight Saving Extension Act, I would like to bring to your attention a dilemma regarding time that my constituents of the Eighth Congressional District of Indiana are now facing due to the Federal bureaucracy. Back in June, the Department of Transportation published a notice of proposed rulemaking regarding a change in the time zone boundary for southwestern Indiana.

Public hearings were conducted in July throughout the affected area and public comments were solicited until August 20. It has now been 2½ months since the close of the comment period and no decision has been issued by DOT. Furthermore, DOT has refused to say when a decision will be forthcoming. My constituents are wondering how to resolve their paramount concern of scheduling. Businesses, airlines, school districts, farmers, and citizens alike are anxiously waiting for a resolution of this issue.

DOT officials have demonstrated their indifference and disregard for the Hoosiers of southwestern Indiana. The excessive delay in the decisionmaking process has disrupted the schedules of the five counties and is intolerable. The DOT's lack of action reflects on all of the Federal Government and is simply inexcusable.

A TIME FOR ACTION

(Mr. DANNEMEYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANNEMEYER. Mr. Speaker, history books record that the "Reign of Terror" took place in France following the overthrow of the monarchy, when Louis XVI and Marie Antoinette had to eat crow instead of cake.

What we are finding, however, is that we are in the midst of another reign of terror: repeated violence directed against American citizens and property by international terrorists.

As a nation and as civilized human beings, we are morally outraged at the perpetration of these cruel and vicious crimes. We are also angry and frustrated because there seems to be no way to either prevent them from happening or apprehend those responsible.

As a result, there was some cause for national rejoicing when the four hijackers of the *Achille Lauro* were captured and turned over to Italian authorities to stand trial. It is not revenge that we seek, but justice.

Too often, we find ourselves impotent in the face of terrorist attacks. We can cheer when an occasional hijacker is captured, but far too many of these criminal acts go unanswered. We need to take action similar to that which President Carter took during the black days of the Iranian hostage crisis: freeze the assets of those responsible for the crimes.

I will be taking a special order tonight to address the matter of how to deal with terrorist organizations, and I will be introducing a resolution toward this end. It's time we took action.

DISCHARGE PETITION FILED ON FIREARM OWNERS' PROTECTION ACT

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, September 10, 1979, during the 96th Congress, I first introduced the Firearm Owners' Protection Act—181 of my colleagues joined me as cosponsors.

In each succeeding Congress I have introduced the legislation with as many as 180 cosponsors. But during this time in the House there has never been a committee hearing on the legislation despite my repeated requests.

In the meantime in each Congress the senior Senator from Idaho has introduced the legislation in the other body. On July 9 of this year the other body passed their version of the legislation by a 70-to-15 vote. The next day the chairman of the House Judiciary Committee was quoted as saying the bill was "dead on arrival."

The only recourse left to us is the filing of a discharge petition to enable the Firearm Owners' Protection Act to be brought to the House.

I have today filed a petition to discharge House Resolution 290 enabling the legislation to be brought to the floor for consideration by my colleagues. I ask you to join me in signing the Discharge Petition No. 4.

This evening I am taking a special order to discuss this issue and I invite you to join me in that discussion.

THE PUBLIC RELATIONS TIRADES OF DANIEL ORTEGA

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, the Nicaraguan dictator, Daniel Ortega, is now claiming that his order to suspend all remaining civil liberties in his country was due to the "genocide" being practiced by the United States against his nation, can you believe that?

This is the same man who, dressed in a military uniform, appeared before the United Nations last year and declared the United States was planning an imminent invasion of Nicaragua.

While Mr. Ortega seems to make headlines with these pronouncements, he has never made much sense. And I hope the foreign leaders at the United Nations and we here in Congress recognize this man and his statements for what they truly represent. Daniel

Ortega is a Marxist revolutionary who came to power behind the barrel of a gun, reinforced his position by winning his office in a sham election, and last week enhanced it even more by suspending what was left of his people's civil rights. He is beholden to Moscow and Cuba. And we all remember his comments and recent trip to the Soviet Union requesting $200 million in arms immediately after a $14 million economic Contra aid package failed by a vote here in Congress.

I'd suggest that the news media and the Congress listen more to what the administration has to say about this man and his Marxist government; than to the ridiculous assertions and public relations tirades of Daniel Ortega.

THE U.S. GOVERNMENT IS BREAKING THE LAW

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, the U.S. Government is breaking the law. The Department of Commerce, which makes purchases for the national defense stockpile, has been purchasing illegally dumped titanium. A titanium manufacturer in my district, the RMI Co., recently won an antidumping suit before the International Trade Commission against the Japanese.

Based on this decision, the Commerce Department imposed antidumping duties. Therefore, under current U.S. trade law, it is clear that these titanium purchases made by our own Commerce Department are undercutting U.S. industries, and I might add, illegally.

Yet, this administration persists in its previous practice of purchasing this illegally dumped titanium. It is crazy, Mr. Speaker, that the Federal Government is literally helping foreign countries put American industries out of business by purchasing illegally dumped goods. It is a shame that even our own Government is wrecking American industry. Why need we fear foreign competition when America's own Government is wrecking our own industry?

I believe something should be done and the President should react to this purchasing of illegally dumped titanium.

THE YOUTH EMPLOYMENT OPPORTUNITY WAGE ACT OF 1985

(Mr. NIELSON of Utah asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NIELSON of Utah. Mr. Speaker, I rise in support of H.R. 1811, the Youth Employment Opportunity Wage Act of 1985, and ask that immediate action be taken on this legislation.

H.R. 1811 would permit employers to pay young people under 20 years of age, from May 1 through September 30, a wage of no less than either 75 percent of the otherwise applicable minimum wage or $2.50 per hour, whichever is less. This bill provides protections so that adult workers or previously hired youth will not be adversely affected by the proposal. It also prohibits employers from substituting youth for current employees. Employers who discharge, transfer, or demote workers for the purpose of employing eligible youth are subject to various legal remedies and sanctions, including a $10,000 fine, 6 months in prison, and payment of back wages.

The summer youth employment opportunity offers the promise of employment to potentially hundreds of thousands of young people currently denied the chance to gain experience, self confidence, effective work habits, and income for one's labor and I rise in support of H.R. 1811 and ask, again, that immediate action be taken on this legislation.

ELDERLY AND MEDICARE COST INCREASES

(Mr. BONER of Tennessee asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONER of Tennessee. Mr. Speaker, I stood on the floor of this House on May 1 to express my opposition to any further Medicare cutbacks and a Social Security cost-of-living allowance freeze. These increases, as my colleagues know, are the result of the 1981 Omnibus Budget Reconciliation Act, a bill I voted against.

Since my speech in May, we have been successful in defeating many of the administration's proposals. As a result, the elderly are going to get a cost-of-living allowance, and their monthly Medicare premiums will not increase. Nonetheless, I am very concerned that beginning in 1986 they are now going to have to pay $492 for their first day's stay in the hospital. That is an increase of $92 from the 1985 rate.

Out-of-pocket health care costs for the elderly have risen at the rate of 11.4 percent per year since 1980. With only an average 3.5-percent Social Security cost-of-living allowance the elderly are out 8 percent annually. Being sick enough to have to be hospitalized is traumatic enough for an older person, but having to struggle and worry about how to finance that first day in the hospital is a double burden. Mr. Speaker, it is time that we here in Congress act to relieve the elderly of some of these burdens.

AMERICAN HOSTAGE CRISIS IN 595TH DAY

(Mr. O'BRIEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'BRIEN. Mr. Speaker, today is the 595th day Americans have been held hostage in Lebanon.

William Buckley, a U.S. Foreign Service officer, was kidnaped in Beirut on March 16, 1984, 595 days ago today.

Today marks the 288th day Father Lawrence Jenco has been held hostage.

Terry Anderson, the Beirut bureau chief for the Associated Press, was taken hostage in Lebanon 220 days ago.

David Jacobsen, director of the American University hospital in Beirut, was kidnaped 146 days ago.

The dean of the American University agriculture school, Thomas Sutherland, was taken hostage 135 days ago.

Today also marks the 324th day since the disappearance of Peter Kilburn, the American University librarian.

Mr. Speaker, the American hostage crisis is now in its 595th day. It started long before the hijacking of the Italian cruise ship and the mid-air capture of the hijackers. It won't end until all the Americans held hostage in Lebanon are back home safe and sound.

Please God, let them go free—and soon.

PETITION TO DISCHARGE COMMITTEE ON THE JUDICIARY FROM CONSIDERATION OF S. 49 AND H.R. 945

(Mr. HUGHES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUGHES. Mr. Speaker, I urge my colleagues not to sign a discharge petition on S. 49. Such a petition is not appropriate. This legislation is not being bottled up or held hostage.

The Subcommittee on Crime, which I chair, will be holding hearings on this and related bills next Monday, in New York City.

After we complete our hearings, I expect to report consensus legislation—that accommodates the concerns of hunters and sportsmen as well as our police and other concerned citizens, and which does not weaken our Nation's fight against violent crime.

Don't short circuit the legislative process on these important issues. Discharge will prevent careful examination of the consequences of S. 49. It prevents any amendment. Surely the supporters of S. 49 are not afraid of a fair examination of the bill in hearings.

There are problems with S. 49, which was not subject to hearings in

the other body, and which was not referred to or considered by committee. Just one example is that S. 49 would undercut the 5-year mandatory prison term that we enacted last year to punish those who carry or use a firearm in the commission of a crime of violence. If the discharge petition prevails, we could not correct that serious mistake.

The Nation's police officers are opposed to this legislation. They, who face armed criminals on the streets and highways every day, believe that S. 49, as it is now written, would make it easier for criminals to get firearms.

Before you sign onto this petition, make sure you listen to the facts. Check with the chiefs of police and sheriffs and police officers in your district.

You will find it is not prudent to sign the discharge petition on S. 49.

□ 1240

HOUSING AND COMMUNITY DEVELOPMENT PROGRAMS SHOULD RECEIVE SEPARATE CONSIDERATION

(Mr. ROTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROTH. Mr. Speaker, today I would like to address an issue that is of great importance to all of us. Many times we in this House pass legislation that we regret later on, and I think one of the reasons for that is that we have not adequately reflected on the legislation or because we have not adequately studied it.

Tomorrow we walk into such a bear trap. Tomorrow the House will take up the Budget Reconciliation Act, and my colleagues should know that this particular act will contain the 1985 housing legislation, H.R. 1. H.R. 1 is always the legislative flagship of the Democratic Party; and it is going to be passed under a false flag.

H.R. 1 must be debated on its merits. H.R. 1 involves not millions of dollars but billions of dollars. There is no way we can vote on this legislation without adequate debate and say that we are concerned about the deficit and concerned about balancing the budget. This bill has 227 pages of substantive legislative language affecting housing and community development programs, and it should not be subject to one up or down, vote.

Mr. Speaker, I invite the Members to review this legislation. To look at the Latta amendment, and to reflect on the Latta amendment which is going to strike the nongermane legislative language, the new programs, and the add-ons from the reconciliation bill. There is no way we can pass this legislation with a good conscience unless we give it appropriate and due consideration. We are not going to do that if we pass it as part of the Reconciliation Act.

KAISA RANDPERE, PERHAPS THE WORLD'S YOUNGEST POLITICAL PRISONER

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, let me introduce Kaisa Randpere. As you can see from this picture, she is adorable. She is 2 years old. She is Estonian, and she is not allowed to leave the Soviet Union to rejoin her parents who left the Soviet Union for freedom in the West.

I met her father, Valdo Randpere, going into Russia recently. I met him in Sweden, and he asked me and he asked my colleagues in Congress to help to free this young girl, this 2-year-old, who may well be the world's youngest political prisoner.

Mr. Speaker, the gentleman from Massachusetts, Mr. BRIAN DONNELLY, and I, cochairpersons of the Ad Hoc Committee on the Baltic States and the Ukraine, will be circulating a letter of support for easing Kaisa's plight. We hope the Members will sign it. The Helsinki accords which the Soviet Union has signed allow for family reunification as an important part. And regarding the upcoming summit, is not the adherence to past agreements necessary to make new agreements credible?

POLICE SEEK SUPPORT IN OPPOSING DISCHARGE PETITION ON GUN DECONTROL

(Mr. TORRICELLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TORRICELLI. Mr. Speaker, today as Members of the House enter the Chamber they will be greeted by policemen, policemen from around the United States. They will be pleading with the Members of this body to pause before signing a discharge petition to bring gun decontrol to the floor of this House.

This discharge petition is an attempt to avoid scrutiny, and we should understand their strategy. Their strategy is that if you knew that it allowed the private sale of firearms, you would not vote for the legislation. If you knew that it restricted the inspections and that it weakened jail sentences for violators, you would not support the legislation. The fact is that if you sign this discharge petition and bring it to the floor of this House, you never will know what is in the legislation.

I ask the Members today to support the police—in fact, every police organization in this country. Let our committee process work. Let this legislation be subjected to full scrutiny.

Many Members of this institution have come to this floor, to this pulpit, many times to speak in support of law enforcement, and they have come here to speak against crime. If you believe those words and you stand for law enforcement in America, join us in our efforts. Pledge yourselves not to sign this discharge petition and let the Judiciary Committee give this legislation full scrutiny.

COLORADO SKI COUNTRY

(Mr. STRANG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STRANG. Mr. Speaker, along the Continental Divide of Colorado, modern-day pioneers have forged new settlements out of a magical alpine landscape.

After World War II, a few tiny ski resorts and fading mining towns blossomed into a fabulous new industry that today is the biggest single business on Colorado's western slope.

Over the past 30 years the number of skiers in Colorado has increased dramatically. Last year Colorado Ski Country U.S.A., the industry's promotional arm, counted 9 million skier days at the State's 32 areas.

Mr. Speaker, there is a simple reason, a reason that even beckons to some of us inside the beltway on a crisp morning. Fleeting white frosts that touch Washington first visit the Rockies in early autumn, then cover them with a deep mantle of light power snow that glistens on our alpine runs into May.

We like to keep our Colorado memories alive in my office, Mr. Speaker—1331 Longworth serves as Colorado's ski information center for the Congress, and we invite anyone to stop by or call our office for daily ski reports.

The Third District of Colorado also extends a warm invitation to see for yourself.

□ 1250

TROUBLE IN THE PHILIPPINES

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, today the distinguished gentleman from the other body will confer with his friend, the President, on the results of his trip to the Philippines. The President would be wise to heed his friend and listen to the message that America faces nothing but trouble in the Philippines in the future.

Can the Philippines become another Iran or Nicaragua? Unfortunately, yes, it can. In both those cases, a despot

became increasingly isolated from the people of his country and an authoritarian movement sprung up like the grass and took over that country. That is happening now in the Philippines.

President Marcos has lost his support, not only of the poor peasants in the outer islands, but of the business community and the upper class. Many of these Filipinos want to reject both Marcos and communism. But the administration has persisted in the view that the only opposition to Marcos right now is the Communist insurgency. It is the duty of this Government, it is our obligation, as well as in our interest, to reach out to those Filipinos who reject both Marcos and communism, to foster a middle way.

An amendment which passed the foreign aid bill allows our Government to send economic aid, not through the Marcos government, where much of it will be funneled to the wrong uses, but rather through third parties, through the Catholic Church and private voluntary organizations. Not only will the aid be used better that way, but it will sent a clear message to the Philippine people that the United States does not endorse Marcos, but seeks a true democratic middle way.

DESIGNATING 1986 AS "THE YEAR OF THE FLAG"

(Mr. COBEY asked and was given permission to address the House for 1 minute.)

Mr. COBEY. Mr. Speaker, America has much to commemorate in 1986. The refurbished Statue of Liberty will be dedicated, and we mark the 200th anniversary of the call for a constitutional convention. But our greatest symbol, the flag, has gone unnoticed—until now.

I come before the House to focus attention on a bipartisan effort conceived by Dr. Elinor Massoglia of North Carolina Central University, to designate 1986 as "The Year of the Flag."

By designating 1986 as "The Year of the Flag," Congressman EDOLPHUS TOWNS and I seek to heighten awareness and interest in the relationship of the flag to our American heritage.

The flag is a living symbol of America's ideals, traditions, and unity. The flag stands for the values and purity of self-sacrifice that made this Nation great.

I urge all the distinguished Members of this body to join us in cosponsoring a resolution to make 1986 "The Year of the Flag."

SUSPENDING MOST-FAVORED-NATION STATUS FOR ROMANIA

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLF. Mr. Speaker, today Congressman SMITH from New Jersey and Congressman TONY HALL from Ohio and myself introduced legislation which would suspend for 6 months the most-favored-nation status agreement with the country of Romania.

The reason we have done that, the three of us have visited Romania. We talked to so many people who have told us of the persecution there. The Romanian Government has bulldozed churches. They have beaten people. They have had Father Calciu in prison for 21 years and did so many horrible things to him. They put individuals in body presses, in torture machines, in black boxes, and many other things.

We in this Congress, I think appropriately so, took action on the question of South Africa. I now appeal to my colleagues that here we have an opportunity to take action with regard to Romania. We give them most-favored-nation status. Let us suspend it unless they act in a positive way.

This is a very moderate approach. Some want to cut if off permanently. We are saying let us cut it off for 6 months.

I would ask that when given the opportunity to cosponsor this legislation, please do.

The people of Romania told us that by the very nature of the fact that we have introduced this and are working to pass it, it offers hope and I think if we do this and pass this that we can bring the Romanian Government to loosen up a little bit and allow these people to worship in freedom and not be persecuted for their beliefs; so I hope you will take this opportunity to cosponsor the legislation.

BUDGET RECONCILIATION BILL IS A HOLLOW BOOK

(Mr. WORTLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WORTLEY. Mr. Speaker, tomorrow we will take up a reconciliation bill aimed at reducing the deficit. Members may be a bit surprised when they take a look at this bill. For many, it may resemble one of those thick books which can be bought at a novelty gift store—we've all seen them—these books are hollowed out in the middle so their owner can stash anything he likes inside the book from a flask to a derringer while he goes about looking studious and well read.

This budget reconciliation bill tomorrow is a bit like those books. For inside this massive bill in the void is stored the entire contents of H.R. 1, the Federal housing authorization bill, which was marked up by the Banking Committee last July. However, the version included is not the same bill we marked up and reported. It contains substantially different spending levels than the ones we approved during a lengthy, 8-day markup process.

Mr. Speaker, there is a very real possibility that this housing title could severely delay an agreement with the other body on budget reconciliation, and reduction of the deficit would be further waylayed.

Mr. Speaker, it is the current enormous deficit that continues to put pressure on interest rates and props up the overvalued dollar, killing U.S. farmers, exporters, and manufacturers.

We need to get on with the people's business of reducing that deficit first and foremost, and inclusion of the housing bill in reconciliation can only stall further the desperately needed action to reduce spending. I urge my colleagues to join me in supporting the Latta amendment tomorrow, providing for regular order consideration of the housing bill.

AMERICAN CHILDREN IN POVERTY

(Mr. DELLUMS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DELLUMS. Mr. Speaker, last evening along with millions of other Americans I watched the evening network news. I was specifically tuned to the ABC Network news that devoted a portion of its program to the issue of poverty among children in America, all ages, all colors, from all geographic locations in this country.

A number of children were interviewed about their desire to have a decent place to live and food to eat. One vignette sticks out in my mind, an interview that I probably will never forget. A young boy when asked how he felt about the poverty stricken conditions within which he lived, his response was, "Sometimes I feel like killing myself."

When I consider that we have an incredible responsibility here to go beyond being auctioneers and budget reducers, but to address the human misery of our people, Mr. Speaker, I believe that a society that destroys its children is a society on its way to dying.

We have a moral and political and ethical responsibility to eradicate poverty in this society.

I challenge this body, Mr. Speaker, I challenge the Republican Party to come up with their answer to how we solve poverty in America.

I challenge my party, the Democrats, to come up with an answer as to how we solve poverty in this country. Let us come together on the floor of this House and create some bipartisan effort to eradicate the great tragedy of

poverty among all of us, particularly the children of America.

LEGISLATION TO MANDATE DOGS AT MAJOR AIRPORTS TO SNIFF OUT EXPLOSIVE DEVICES

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. Mr. Speaker, last week after the terrorist hijacking of the *Achille Lauro,* two terrorists from Iraq were arrested in Italy at the Rome Airport. They were carrying 17 pounds of explosives in the false bottom of a suitcase. They said these explosives were not to be used on Italians, but were for killing Americans and Israelis.

I have been told that with these explosives and a small detonating cap, these men could have gone through a metal detector at most airports with no problem. The metal detector would not pick up plastic explosives or a watch-like detonating cap and they could have blown up an aircraft in flight.

Mr. Speaker, today I am introducing a bill which would mandate dogs at major airports to sniff out these explosive devices that cannot be detected by metal detectors.

Mr. Speaker, we are sitting on a time bomb and unless we pass legislation like the bill I am sponsoring, an air terrorist attack will take place.

Mr. Speaker, I hope and pray all of my colleagues will support this very important piece of legislation.

SIGN DISCHARGE PETITION ON S. 49, RIGHT TO OWN FIREARMS

(Mr. MARLENEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARLENEE. Mr. Speaker, I might say that yes, I am going to sign the discharge petition on S. 49, because I am tired of the trampling of the rights of sportsmen.

Yes; I am going to sign the discharge petition, because I am tired of the lockup of any reflective and considered action by the chairman of the committee, who said, "This legislation is dead on arrival."

Yes; I am going to sign the discharge petition as a protest against the dictatorship of committee leadership, which will launch the first hearing in New York City, which already has very strict gun laws and is most willing to prosecute anyone who defends himself.

Yes; I am going to sign the discharge petition, because I support law-abiding citizens who know how to defend themselves. I support sportsmen and I support law-abiding gun owners and law-abiding gun dealers.

Sign the discharge petition.

SOCIAL IMPERIALISTS WANT US TO ABANDON RIGHT TO BEAR ARMS

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, we have heard from a number of the social imperialists in this body on the House floor today who have told us that they want to abandon one more individual right of the American people, namely, the right to bear arms.

We have moved through a course over the past several years of attempting to take away from law-abiding sportsmen their ability to own firearms. Now we have an opportunity maybe to correct some of the abuses of the past that have been given to us by the Senate in the form of S. 49.

□ 1305

And what did we hear from the House Committee on the Judiciary that has the authority to take up that bill? The chairman of that committee declared that legislation dead on arrival in his committee. We know that when that committee declares something dead on arrival, from past experience, they mean it.

So, therefore, the only way we can help law-abiding sportsmen regain their right to bear arms in a responsible way is to sign the discharge petition and to get that bill out onto the floor for consideration. Otherwise, it is not going to get considered. It is going to be dead on arrival in this House. It is going to be dead on arrival permanently in terms of this Congress. That is wrong. We want consideration of the bill. The way to get consideration of the bill is to sign the discharge petition.

NATIONAL TOPSOIL PRESERVATION ACT OF 1985

The SPEAKER pro tempore (Mr. MONTGOMERY). Pursuant to the provisions of clause 5 of rule I, the unfinished business is the question of suspending the rules and passing the bill, H.R. 463, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona [Mr. UDALL] that the House suspend the rules and pass the bill, H.R. 463, as amended, on which further proceedings were postponed on Monday and on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 225, nays 185, not voting 24, as follows:

[Roll No. 364]

□ 1315

The Clerk announced the following pair:

On this vote:

Mr. YOUNG of Missouri, Mr. MICA for with Mr. FRANKLIN against.

Mrs. HOLT, Mr. TAUZIN, and Mr. VALENTINE changed their votes from "yea" to "nay."

Mr. GUNDERSON changed his vote from "nay" to "yea."

So (two-thirds not having voted in favor thereof) the motion was rejected.

The result of the vote was announced as above recorded.

DAYLIGHT SAVING EXTENSION ACT OF 1985

The SPEAKER pro tempore. Pursuant to House Resolution 288 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 2095.

□ 1326

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2095) to provide for daylight saving time on an expanded basis, and for other purposes, with Mr. VOLKMER in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Massachusetts [Mr. MARKEY] will be recognized for 30 minutes and the gentleman from California [Mr. MOORHEAD] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Massachusetts [Mr. MARKEY].

Mr. MARKEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 2095, the Daylight Saving Extension Act of 1985. I am proud to be cosponsoring this legislation with my good friend and ranking minority member of the Subcommittee on Energy Conservation and Power, which I chair, the gentleman from California [Mr. MOORHEAD]. The bill would move the starting date for daylight saving time to the 1st Sunday in April from its current starting date of the last Sunday in April. The bill would also add a week to daylight saving time to the 1st Sunday of November, so that Halloween will be included in daylight saving time, and trick-or-treating will be a little safer for children.

This is not the first time the House has considered daylight saving time legislation, but I hope this will be the last time. The difference this time is that we have finally worked out a compromise with the former critics of this bill. Previous bills would have started daylight saving time on the 1st Sunday in March. While I personally favored this earlier date, many Members criticized the bill because they contended it would have brought about cold and dark mornings.

So we sat down with many of the Members who had fought against this bill in the past—people such as the gentleman from Utah [Mr. NIELSON], the gentleman from Indiana [Mr. COATS], and the gentleman from Iowa [Mr. TAUKE]. We examined sunrise and temperature information and decided that the 1st Sunday in April would be a fair compromise. Sunrises get very early in April. Even after you add an hour for daylight saving time, the sunrise is still early. In fact, sunrises in April, under daylight saving time, would be earlier than sunrises in December, January, and February—the 3 coldest months of the year. The point is simply this: The bill will not cause dark and cold mornings that would be unsafe or uncomfortable for children, farmers, or others who work in the morning. The mornings will be far brighter and far warmer than any of the preceeding winter months. In short, it is a fair compromise.

Having said enough about what the bill won't do—and by that, I mean it will not cause cold or dark mornings—let me describe the bill's benefits.

Talk about daylight saving time often brings a smile, or even a smirk, but the benefits of more daylight are serious and tangible. Indeed, every President has endorsed extending daylight saving time into March and April since a test of extended daylight saving time occurred in 1974 and 1975.

Daylight saving time is an energy saver. According to a Department of Transportation study, daylight saving time could save 100,000 barrels per day of oil equivalent during March and April.

Daylight saving time is a crime stopper. Studies of crime statistics in the District of Columbia showed that violent crimes were down by more than 10 percent in March and April during the 1974–75 daylight saving experiment compared to years under standard time.

Daylight saving time saves lives. A Department of Transportation study of the daylight saving time experiment showed a 0.7-percent reduction in traffic fatalities due to daylight saving time in March and April. This translates into saving 22 lives in April and preventing 1,600 injuries. The extension of daylight saving time to cover Halloween is endorsed by the National Safety Council as a child safety measure.

Daylight saving time is popular. In a poll conducted earlier this year by the Chamber of Commerce magazine, Nation's Business, readers were asked if they would prefer that daylight saving time begin on the 3d Sunday in March. The readers preferred extending daylight saving time by a 68.9-percent to 29.5-percent margin.

Daylight saving time is the blessing of sight for the over 400,000 Americans suffering from retinitis pigmentosa, known as night blindness. In moving testimony before our subcommittee, a young adult, who suffers from night blindness, described the hardship of living in a world that closes in mid-afternoon when the Sun sets. The extra hour of sight that daylight saving time would bring is just enough time to do the shopping or drive home from school or the office.

Daylight saving time helps business. This year a coalition of businesses with over $135 billion in annual sales has joined the battle for expanded daylight saving time. The businesses include convenience stores, like 7-

Eleven, sporting goods manufacturers, the barbecue industry, the Foodservice and Lodging Institute with members like McDonald's, the nurserymen's industry, and others. This coalition, which reads like a Who's Who of summertime fun, has performed studies which show that sales could increase by up to 10 percent with more daylight saving time—that's $13 billion a year, and that's jobs across America.

So let me review the facts for everyone. Here is a simple bill, with no costs to the Treasury, that will save energy, reduce crime, save lives on the highway, provide sight to the handicapped, bring a boost to hundreds of thousands of small businessmen, and is supported by the public by over 2 to 1. On top of that we have developed a compromise with the bill's former opponents to avoid any of the claimed hardships of the past bills.

And one final thing—we have added an extra week at the end of daylight saving time to the 1st Sunday in November—a Halloween treat for children that has been endorsed by the National Safety Council and local PTA groups across the country as a boost for child safety.

So I urge my colleagues to cast their vote for this bill and once and for all settle this matter by bringing a little sunshine to everyone's life.

□ 1330

Mr. Chairman, I reserve the balance of my time.

Mr. MOORHEAD. Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Mr. Chairman, as the first Member of the House to introduce legislation extending daylight saving time this year, I rise in strong support of H.R. 2095, and want to thank my good friends, Mr. MARKEY and Mr. MOORHEAD, for bringing this bill to the floor today. I worked closely with Mr. MARKEY and Mr. MOORHEAD on my bill—even testified before their subcommittee on it—and appreciated their speedy consideration of this measure.

Mr. Chairman, this bill—of which I am an original sponsor—would begin daylight saving time—or, d.s.t.—on the first Sunday in April and end it on the first Sunday in November. Under present law, d.s.t. begins on the last Sunday in April and ends on the last Sunday in October. H.R. 2095, then, is a 5-week extension, and one that I strongly support.

The best thing about extension of d.s.t. is that it is an easy, painless, and inexpensive way to save oil, reduce crime, and reduce traffic fatalities. In addition, by extending d.s.t. 1 week into November, we will insure that children are not "trick or treating" in the dark on Halloween.

Back in 1974, when the Nation was on year-round d.s.t., the Department of Transportation estimated that the United States saved 500,000 barrels of oil per day during d.s.t. In the cities studied, violent crime was 13 percent lower. There were 200 fewer traffic fatalities. Individuals with some visual impairments had an extra hour of daylight.

Mr. Chairman, H.R. 2095 is a compromise. My bill, H.R. 1935, extended d.s.t. for 9 weeks—but to accommodate those Members who represent western parts of time zones, the committee agreed to go with a 5-week extension. This is a compromise which I endorse wholeheartedly.

This bill—and let me stress this—will not cause later sunrises than we have now in the fall. There may be attempts today to argue that beginning d.s.t. in early April will cause children to walk to school in the dark. That is a misleading argument. If H.R. 2095 were enacted, sunrises in early April would be earlier—earlier—than in September, when we already have daylight saving time.

So, that is a poor argument. I went over to the Library of Congress and looked at the sunrises in some cities and compared them. In Philadelphia, sunrise would be at 6:38 a.m. in April if our bill were enacted—18 minutes earlier than sunrise on September 30 under current law. In Omaha, sunrise is 23 minutes earlier in April—12 minutes in Los Angeles.

Now, Mr. Chairman, I want to close by giving a message to the other body: I urge them to pass this bill quickly. In every Congress for 6 years, my good friend, the former Senator Paul Tsongas, introduced this bill. Once, the other body even passed it, and I would like to urge them to repeat their past heroic performance by presenting a dramatic reading to the Senate:

"Let there be light," saith we to thee.
"Passeth this bill and extend D.S.T.
Yea, though thee driveth home in the April of Darkness
Thee should have no fear
For the House always acteth responsibly.
Sendeth H.R. 2095 to the White House
For when thee walketh beside green pastures in April,
It shall be in the light."

Support this bill. Let there be light.

Mr. MARKEY. Mr. Chairman, I yield such time as he may consume to the gentleman from South Dakota [Mr. DASCHLE].

Mr. DASCHLE. Mr. Chairman, the proposal to extend daylight saving time is a perennial issue and one that I have actively fought since early 1983. At that time I sent a report about the possible extension of daylight saving time to the 140 weekly newspapers in South Dakota. The response was overwhelming. For months my office received a barrage of cards, letters, and calls from schoolchildren, farm wives, grandparents and everyone in between.

This has always been an issue of deep concern to the citizens of South Dakota. Many of them expressed a genuine fear of the negative effects an extension would have on young schoolchildren and farmers.

Every time I am home in the late winter months and have to be at an early morning breakfast, I realize how important the extra hour of daylight in the morning is to the safety of young schoolchildren walking to school or waiting along unlit country roads for schoolbuses. Driving along those roads before the Sun has risen would make both rural and urban Members realize the importance of sunlight where street lights cannot be installed.

If daylight saving time was extended, these small children would be forced to walk to school or wait for buses in the bitter cold mornings before the Sun is even up. Although it has often been debated, common sense tells us that this extension would jeopardize their safety as they trek along the icy country roads.

Another group of individuals adversely affected by an alteration in daylight saving time includes our Nation's farmers. In the face of the worst economic conditions since the depression, many farmers are forced to hold down second jobs in town for their continued survival. If they were deprived of an extra hour of daylight in the morning, the completion of chores would either have to be done in darkness or squeezed into an hour's less time. For those men and women producing our food supply, this isn't fair.

Time and time again, I hear many South Dakotans ask why we don't just get rid of daylight saving time altogether. But for the most part, most of the citizens of my State are willing to accept a fair split of 6 months on, 6 months off.

It's fair for both sides and should be kept that way.

Mr. MARKEY. Mr. Chairman, I yield 1 minute to the gentleman from Washington [Mr. SWIFT].

Mr. SWIFT. Mr. Chairman, I rise in support of this bill, I think we have to look at the bill from a national perspective, and I think there are real national benefits.

The committee has cited studies on energy conservation, traffic safety and crime reduction that all support more daylight saving time. I don't know whether the studies are 100 percent valid, but even if they were only half-true, it would be reason enough to support this bill.

For example, one study found that crimes were reduced by 10 percent in Washington, DC, when we had daylight saving time in April. Suppose it were only 5 percent. Wouldn't it still be worth it?

Another study showed traffic accidents were down by about 1 percent during extended daylight saving time. Suppose it were one-half percent. Wouldn't it still be worth it?

I think it makes good sense, and I support the bill.

Mr. MOORHEAD. Mr. Chairman, I yield 3 minutes to the gentleman from Kentucky [Mr. ROGERS].

Mr. ROGERS. Mr. Chairman, I rise in strong opposition to the Daylight Savings Time Extension Act of 1985.

This is now the third time that supporters of this seriously flawed legisation have tried to get it passed by Congress. They failed in 1981. They failed again in 1983. And I'm sure they'll fail again this year. Because no matter how much they tinker with it, the fact remains that there are very serious problems with this legislation.

First, as has been stressed repeatedly, there is the hardship it would cause for our farmers. Many of them would like to see daylight savings time cutback; the last thing many of them want is an extension.

While you city dwellers are sleeping away the early morning hours, these farmers are up doing the chores which will eventually supply the food for your breakfast table. And if you cut back on their morning daylight, you'll be forcing many of them to do their chores in the cold dark. This is a particular problem on farms where a family member goes to work in a factory.

Second, there are serious concerns about our children's safety. Even under this compromise bill, our children will be forced to walk to the school bus in the dark. And in the country, this means they'll be walking right in the street, since we don't have sidewalks. As any parent knows, this is dangerous.

As the 1976 National Bureau of Standards report on the daylight savings time experiment concluded, "There was a statistically significant increase of school-age fatalities in the morning during the 4-month period, January to April 1974, as compared to the same period of nondaylight savings time in 1973."

While most of these increased fatalities occurred during January and February, and not during April, as is at issue in the bill before us today—the fact is clear. Darkness in the early morning hours increases risks for our schoolchildren.

Mr. Chairman, we spend hours debating child welfare in Congress. We discuss child restraints in cars. And we spare no effort when it comes to child nutrition. But when it comes to deciding between that extra hour of daylight for golf, or tennis, or jogging, and our rural children's safety, we can't quite decide which is more important. Mr. Chairman, this bill offers scant benefits for so seriously jeopardizing our children.

Because let us be frank, while the authors of this bill stress potential energy savings, that will not be a major benefit of this legislation. The Bureau of Standards concluded about the 1974-75 experiment in year-round daylight savings that "the available data do not lead to any conclusions as to the possible energy savings * * *." As the hearing record indicates, the supporters of this legislation are interested in more daylight for urban recreation.

Mr. Chairman, if this body is determined to pass some kind of Urban Improvement Act of 1985, there are less costly ways to do it. We could put in lighting on our softball fields. But to ask our farmers and our children across the country to pay the cost in disrupted lives is unwise. I urge the defeat of this legislation.

Mr. MOORHEAD. Mr. Chairman, I yield 2 minutes to the gentleman from Florida [Mr. BILIRAKIS].

Mr. BILIRAKIS. Mr. Chairman, daylight saving time usually brings a smile to most Members' faces, particularly with all the very pressing issues that we all agree need to be addressed this session.

But, amusement aside, there are few other bills that come before us where we can improve the welfare of so many people so easily.

Extending daylight saving time for a reasonable period will save millions of dollars in energy costs, reduce traffic fatalities, provide greater safety for children on Halloween, improve the mobility for Americans suffering from night blindness, and promote over $1 billion in economic growth every year. And, amazingly, all this can be done without additional taxpayer expense or more Government regulation.

I understand that there are some Members who have problems with extending daylight saving time. I think the Chairman and ranking minority member of the Energy Conservation and Power Subcommittee have done an excellent job in crafting a compromise that accommodates those concerns and preserves the benefits to be achieved by extending daylight saving time. I support the compromise and this legislation. I urge my colleagues to vote yes on H.R. 2095 without amendments.

Mr. MARKEY. Mr. Chairman, I yield 2 minutes to the gentleman from Texas [Mr. BRYANT].

Mr. BRYANT. I thank the gentleman for yielding.

Mr. Chairman, I rise in full support of the bill and congratulate the chairman of the Subcommittee on Energy Conservation and Power and the ranking minority member for having worked on a carefully considered bipartisan compromise which includes former opponents of this concept.

I think there are just three important points which need to be made. First, with regard to our population and convenience and the convenience that they enjoy on a daily basis in their ability to shop, do their chores, and do the things that people do in their leisure time, it is very clear that this bill is a great benefit to them.

Second, with regard to the energy conservation, the point was just made by the previous speaker, in April alone we will save 100,000 barrels a day in oil equivalent with regard to energy, about 3 million barrels, based on the passage of one piece of legislation.

Third, with regard to schoolchildren, an admirable concern, but the facts are irrefutable, and I think they are going to be presented to us a little later in the debate, but the fact is, it is going to be light in the morning during the month of April when these children are getting on the schoolbuses, it will not be dark. It is important to keep that in mind.

Once again, I congratulate the chairman and the ranking minority member for working out a carefully considered compromise bill that now includes many of the former opponents of this legislation, and I urge the Members to vote for it.

Mr. MOORHEAD. Mr. Chairman, I yield 3 minutes to the gentleman from Kansas [Mr. ROBERTS].

Mr. ROBERTS. Mr. Chairman, I rise in opposition to H.R. 2095, the Daylight Saving Extension of 1985. Actually, if we are to apply a truth-in-labeling tag on this legislation, not to mention a little common sense, it should be called precisely what it is—the "Revised Urban Convenience Act of 1985."

Now, I know this bill is not a repeat of the 1974 year-round daylight saving time experiment under which most of us from rural and western areas floundered around in darkness in the morning and learned the true meaning of living in the land of the "Midnight Sun." Thank goodness for that. I know too, that this bill is not the bill we defeated 2 years ago that would have extended daylight saving time to 8 months and 1 week. This is being billed as a reasonable compromise and provides for only 1 month's extension. It is apparently being offered up under that old expression that if a lot will not do a lot of good, then maybe a little will do some good.

Mr. Chairman, the objections I raised 2 years ago are still valid. School children, despite what my colleagues say, will have to get up, meet the school bus or walk to school in the dark for a longer period than necessary—at least in April. Now, I know the sunrise under daylight saving time in April is earlier than it is in winter months. The logic of that apparently is—why do I have to get up or open my place of business or farm in the dark? Because it was dark in the winter and you got used to it, that's why.

Mr. Chairman, what this bill really boils down to is that rural citizens will be put to some disadvantage in order that urban citizens can enjoy an extra hour of light in the evening. That is it. Oh, I know that my colleagues will say otherwise—they have been saying that in every Congress since this business became an issue. Allegedly this bill is

going to save 100,000 barrels of oil a day, reduce traffic fatalities, increase our economy some $4 billion and reduce violent crime. The only thing it will not do is stop tooth decay or guarantee the Boston Red Sox a pennant.

Come on now—in previous debates, we have shown that energy studies do not take into account the extra energy costs involved in that additional hour of darkness throughout farm country, what happens on the road wherever you drive in darkness in the morning or the costs to small businesses in terms of economic loss. Now this bill may—just may reduce violent crime. I guess muggers and such are not early risers in Boston and New York. But you know where that study really came from? Right here in the District of Columbia, and I submit this town has special problems in that regard.

I might add my hometown is Dodge City and despite our past reputation, violent crime is not a problem that I feel will be addressed by 1 more hour of daylight on Front Street.

The advantages of an extension espoused by the bill's sponsors simply do not hold in rural America. There will be no energy savings, no increase in safety or commercial activity, and no decrease in crime rates. Instead, there will be increased inconvenience.

But I suspect the letters I receive will not even repeat the arguments I have summarized here today. I suspect they will instead ask, what on Earth are we doing fiddling around with the time of the day via the legislative process when we have far more serious matters before us? I call to the attention of my colleagues the advice I received the last time you folks were about the business of legislating time. One nice lady suggested that as long as we were going to change the time, why not increase the temperature 10 to 20 degrees in the winter and, of course, do the same thing to cool things down in the summer.

Mr. Chairman, I simply ask that this body not make a bad situation worse for rural America. If it was wrong to make a wholesale change in daylight saving time, it doesn't make much sense to fiddle around with it just a little bit. I don't know what it is that my colleagues want to do during that extra hour of daylight during the month of April but my suggestion is that it would be a lot easier on us in farm country if you would just get up an hour earlier. Let's defeat this bill and get on to serious business.

Mr. MARKEY. Mr. Chairman, I reserve the balance of my time.

Mr. MOORHEAD. Mr. Chairman, I yield 2 minutes to the gentleman from South Carolina [Mr. HARTNETT].

Mr. HARTNETT. Mr. Chairman, I appreciate the gentleman from California giving me this time.

Tongue-in-cheek, we talked about this bill a year or so ago, but I really think there are some significant points that ought to be made. One is, I got up this morning to leave Charleston, SC, kind of early; it was extremely dark in my home because of daylight savings time, and I had to cut on all of my lights, thereby burning more energy.

If it is going to be longer daylight savings, then people are going to have to drive to their favorite recreations, thereby burning some of those hundreds of thousands of gallons' worth of oil that we are going to save in the way of additional fuel expended in our automobiles.

I think the biggest concern that Congress should have is for our agricultural community.

Last week or so, we passed a farm bill spending billions and billions of the taxpayers' dollars to aid the farmer, to aid our agricultural community, and here today we are preparing to extend daylight saving time even further, which to my way of thinking is not going to help the agricultural community, the farmer who has been said by many before me is working long before many of us even turn over and drink our first glass of orange juice.

You know, we have a history in this country of the farmers rising to do their daily chores by the old crow of the rooster; you know, the rooster gets up and crows and gets the old farmer and his family going, to get the agricultural part of our society moving, which feeds America and feeds the world.

The question I want to ask you gentlemen, tongue-in-cheek, is: If you pass this legislation, who is going to wake up the rooster that is going to wake up the farmer to tell him it is time to get up and toil in his field?

Mr. BURTON of Indiana. Mr. Chairman, will the gentleman yield?

Mr. HARTNETT. I yield to my colleague.

Mr. BURTON of Indiana. I thank the gentleman for yielding.

I just want to make an observation, Mr. Chairman, that the gentleman is really a man of exceptionally high caliber, because I know he likes to play golf. To take the position he has in view of the fact that he likes to play golf, I think, is exemplary.

Mr. HARTNETT. I reclaim my time to say this to my colleague. When I play golf, I do not play often, but I get in a lot more golf than the gentleman does. I hit the ball about 130 times, where you only hit it about 60 or 70. So I get more golf in with each round than you do.

Mr. MOORHEAD. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania [Mr. GOODLING].

Mr. GOODLING. Mr. Chairman, I do not have much time at this time, but later on in the amending process I will have some time.

You can write "Dear Colleagues" that are cute and wise and smart as you want to write them, as cleverly as you want to write them, indicating when the Sun rises or when the Sun sets in somebody else's district. But unless you have been there, unless you have had the responsibility of putting those youngsters along highways in rural and semirural areas, you just do not understand the situation.

I thought perhaps that since I had been away from the superintendency for 11 years, perhaps I do not remember just how the situation was.

So I used Friday morning, Saturday morning, Sunday morning, and Monday morning to drive those bus routes at 6:30 to 7:30 in the morning when all those children are out there, the secondary children particularly.

Let me tell you, at 6:30 in the morning it is as dark as dark can possibly be; at 7 o'clock it is also the same way. It is beginning to break by 7:15. We also have at this particular time of the year and early in April the time when fog rolls into our area. We have the same time, when the greatest nightmare that a superintendent has takes place, that is, lying awake at night determining what is going to happen to that temperature at daylight. Is it just going to drop enough so that, as a matter of fact, those slippery roads are not only wet but, as a matter of fact, they are covered with ice? Let me tell you, unless you have been there, unless you have been to a funeral of someone who was killed because of the transportation you were responsible for, you do not really understand what it is you are doing at this particular time. And I think you had better forget the almanacs, and you had better forget the so-called statistics, and you had better forget about when the Sun rises and Sun sets and actually find out just exactly what is happening with children along highways with no sidewalks in early April, in November, in late October. It is a serious problem, one we should not be playing with. We should be doing things that are in the best interests of this country.

I, too, could play golf in the evening; I, too, could mow the lawn. That is what we are really talking about. Let us stop this nonsense about saying we are talking about energy and talking about saving lives; we are talking about adult convenience. Adult Convenience Act might be a good title for this bill.

Think seriously about the young people whose lives you are truly jeopardizing, from someone who has been there and truly knows.

□ 1355

Mr. MARKEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I respect the gentleman from Pennsylvania and I respect his sense that you have to go to Pennsylania or to his district in order to understand this issue.

So what I tried to do was just do a little research on the issue of how school transportation, how this issue would be handled in the gentleman's district, but using that as a microcosm for the whole country so that we can understand what our bill does and why it is not the radical bill that endangers children that the gentleman would have people on this floor believe it to be.

Let us go to York, PA, and use York, PA, as an example of how this bill affects children in this country.

The gentleman mentioned that 11 years ago he was in fact the superintendent of schools. Well, 11 years ago was the energy crisis. And in 1974 we passed a law in this country that had daylight saving time go around the year, December, January, February, November, March. In fact, that was a terrible mistake. It was wrong to have daylight saving time in January. it was wrong to have it in December. And the gentleman is right, some of the sunrises during that time were 8 o'clock in the morning, quarter of 8 in the morning, quarter past 8 in the morning. We are not advocating that. That would be wrong. We are advocating that we go all the way back to the month of April, April 1.

There is an interesting thing about April 1 if you pick that as a date upon which you want to begin daylight saving time. April 1 will have under daylight saving time a sunrise that begins at 6:48 in the morning at York, PA. Do you know the nearest date to that on the calendar for the school year of children in York, PA? September 16, 6:49 in the morning, daylight begins.

Now, if you want to tell me that on September 16 in your district, with daylight beginning at 6:49, you have got a problem in your district, then you should do something about it, because there are 22 weeks in your school year that are more dangerous than April 1 that begins at 6:48. December 31 in your district is 7:28. December 16 it is at 7:22.

Mr. GOODLING. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from Pennsylvania.

Mr. GOODLING. I would be very happy to do something about it. I would love to have the gentleman introduce legislation where it might be safe to have daylight saving time, and that would be from Memorial Day to Labor Day. And then you would be doing something worthwhile for this country and particularly for schoolchildren.

Mr. MARKEY. The question that we are facing here is whether or not the children in your district are unsafe right now. If the children in your district are unsafe right now, then you ought to change the time that school starts. You ought to say right now that for 22 weeks, up to April 1, that the schoolday starts at a dangerous time, and you ought to tell the people in your district, you ought to tell the police, the parents, and the teachers, because if that is the condition, then you have a crisis in your district.

But I am trying to tell you right now that as of April 1 there were 161 days that those kids were getting up that were more dangerous than April 1. We are not picking the middle of the winter here. We are picking the end of the winter. We are picking a date that is the equivalent of September 16, 1 week after Labor Day, in your district. We have no intention of endangering the children in your district or any other district in this country. This is a compromise. It has been worked out very carefully, with no intention of making anyone have to suffer late mornings when children are out in the dark standing on the sidewalk.

Those are the facts. It is not anything that is any more or less than just the facts. We do not have to go to York, PA; you do not have to come to Boston, MA; we do not have to go to the gentleman's district in Utah. We just have to know what time the Sun rises all across the country.

On April 8, 6:36 in the morning the Sun comes up; on April 15, 6:26 in the morning; on April 22, 6:16 in the morning. By April 29, it is 6:06 in the morning when the Sun is rising. It is almost the end of the year, the school year. The real danger for these kids is in the heart of the winter: November, December, January, February, March. Those are the days when if there is a problem in your district something should be done right now. Those kids should not be allowed to be out on the street.

My contention is this: In fact, there is a process in place in your district, in my district, and in every other district throughout this country, to ensure the school safety of kids in the morning. That is why there is no crisis. But in the late evening, and right around suppertime, kids are out all by themselves, they are wandering around the streets. They do not have traffic guides, they do not have policemen, they do not have school buses—in the dusk, when drivers are coming home drunk. They are not drunk at 7 o'clock in the morning. They are drunk coming home from work. That is when the danger is to these children. We are trying to give them the sunshine at a time when they need it. But we are not making them get up at an unusually or unreasonably dangerous hour; 6:48 in the morning is the same as September 16 in York, PA, and the same equivalent situation exists in every single district across this country.

I just hope that the gentleman can understand that I believe that he is looking back through, in a rear-view mirror, to 1974, when he might have been school superintendent. But, remember, during 1974 we had yearround daylight saving time, and that was a mistake. It is wrong, and I recognize it, and all of the proponents recognize it. We are giving you back those 5 dangerous months, November, December, January, February, March, but we are saying, however, that once you reach April, you are in the equivalent situation as you are in September, and we can in fact say, with all confidence, that the children of this country are safe, whether they be in York, PA, in my district, or any part of the country. There is no intention to make this the adult entertainment act of 1985. It, rather is something that gives the proper distribution of sunshine so that not only adults but children can enjoy it after school and in the early evening hours, as every other person in this country has the right to enjoy it.

Those are the facts. It is no more, no less than that. Any other construction of what this bill is is merely an attempt to raise up issues that were probably raised in 1974 against another bill, or perhaps even against the bill that was brought up to this floor 2 years ago, but does not properly reflect the compromise which has been worked out between myself and other Members on the majority side with the gentleman from Utah, the gentleman from Indiana, and others, who opposed the bill in 1983, as an attempt to in fact come to some kind of reconciliation, some kind of splitting of the differences that recognized the facts of when the Sun does rise in this country.

Mr. SHAW. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from Florida.

Mr. SHAW. Mr. Chairman, I think the gentleman is making an excellent point. In certain areas of the country where they would not fit into the whole situation of daylight saving, they should make some changes locally. I think it is quite obvious that the majority of the country, certainly my area in Florida, would greatly benefit from the gentleman's bill, and I compliment him for his statement.

Mr. MARKEY. I thank the gentleman.

Mr. Chairman, I reserve the balance of my time.

Mr. MOORHEAD. Mr. Chairman, I yield 3 minutes to the gentleman from Utah [Mr. NIELSON].

Mr. NIELSON of Utah. Mr. Chairman, I want to commend the chairman and ranking minority member of the

Energy Conservation and Power Subcommittee for drafting a compromise that achieves most of the benefits to be achieved from extending daylight saving time—yet is sensitive to the concerns of those areas of the country where the weather is still harsh and unpredictable in March.

My personal preference is for daylight saving time to run from Memorial Day to Labor Day. I recognize, however, that this is not feasible and that there are Members who would like daylight saving time to run almost year round. The compromise today, as all compromises, does not satisfy everyone. But I can live with daylight saving time for the month of April, and I intend to support this compromise.

In committee I offered the same amendment that my friend and colleague from Pennsylvania, Mr. GOODLING, may be offering today. I understand his concerns, and I share them.

The legislation before us today is very different from the legislation that we considered last Congress. Last Congress, the legislation would have started daylight saving time on the 1st Sunday of March, and would have extended daylight saving time to 8 months. This was unacceptable, and unnecessary. For many areas of the country, daylight saving time for the month of March would create unsafe conditions for schoolchildren, and difficulties for farmers performing early morning chores. I also believed that it was unnecessary—for almost all of the benefits to be achieved by extending daylight saving time would accrue in April and not March.

The legislation before us today accommodates these concerns. H.R. 2095, as originally introduced, would have started daylight saving time in mid-March. In committee, I offered the amendment so that daylight saving time would start at the beginning of April.

With this change I can support H.R. 2095. Sunrise on the first Sunday in April under daylight saving time will be earlier than any sunrises from November through February under standard time. Morning in April, even with daylight saving time, would be brighter and warmer than in any other winter month. Yet, most of the benefits to result from extending daylight saving time will still be achieved, even though the extension will be limited to April.

The legislation is strongly supported by the administration and by a broad coalition of businesses. The daylight saving time coalition representing 8,300 companies, estimates that the potential economic growth from this bill could be over $1 billion annually. These economic benefits, together with fuel savings, enhanced safety for automobile drivers, and reduced crime—are compelling reasons for extending daylight savings for a reasonable time. The extension provided for in this legislation is reasonable and I urge my colleagues to support H.R. 2095.

Mr. MOORHEAD. Mr. Chairman, I yield 2 minutes to the gentleman from Colorado [Mr. SCHAEFER].

Mr. SCHAEFER. Mr. Chairman, the bill we are considering today is somewhat unusual in that it would provide many benefits to the American public with no increase in Government bureaucracy and no additional expenditures by the Federal Government. I have reviewed this matter and the extension of daylight saving time will not only promote energy conservation but will provide a great boon to our Nation's economy.

By extending daylight saving time, the opportunities for tourism and prime time shopping will increase and could result in an increase of up to $1 billion in economic growth every year.

But perhaps the most persuasive argument for the bill is that it will enhance safety. It will reduce traffic fatalities, reduce violent crime, and provide more daylight for children trick or treating on Halloween. Further, it will provide greater mobility for the almost half a million Americans suffering from night blindness.

One of the important compromises made by our committee was changing the starting date for daylight saving time from the third Sunday in March to the first Sunday in April. This will greatly benefit those parts of the country, like my home State of Colorado, where winter is harsh and unpredictable in the early spring. With the compromises made in our committee, there seems to be no question that this bill should be supported overwhelmingly by the House.

Mr. MOORHEAD. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I am pleased to join with my colleague from Massachusetts, ED MARKEY, chairman of the Energy and Commerce Subcommittee on energy conservation and power, in urging you to enact H.R. 2095, the "Daylight Saving Extension Act of 1985." This is a fair, balanced and truly bipartisan bill.

Section 3 of the bill amends the Uniform Time Act of 1966 by advancing the starting date for daylight saving time from the last Sunday in April to the first Sunday of April. It also extends the closing date from the last Sunday in October to the first Sunday in November.

Section 4 provides for the continuation of State exemptions and partial exemptions for States in more than one time zone.

Section 4 provides the Federal Communications Commission with the authority to grant variances with respect to the hours of operation of daytime AM radio stations and their operating power levels. This section carefully protects State exemptions and directs the FCC to take necessary steps to protect daytime AM radio stations affected by the sunrise. I expect the FCC to fully exercise its authority under section 4 to ensure the smoothest possible operation of daylight AM radio stations.

Mr. Chairman, I have for several years introduced and supported legislation that expands daylight saving time. There are excellent reasons for such an extension.

By conserving daylight hours, we will achieve electricity savings that are the equivalent of 100,000 barrels of oil for each day daylight saving time is extended. I find this energy conservation measure particularly appealing because—unlike other energy measures—this bill requires no new Government bureaucracies, no intensive and burdensome apparatus, and little, if any, expenditures of taxpayers' funds.

Further, the benefits from this legislation will transcend energy conservation. The probable benefits are likely to include: as many as 200 fewer traffic fatalities per year; a reduction in violent crime; increased daylight time, tourism, and prime-time shopping; economic growth that could amount to over $1 billion per year; and, as has been emphasized by the retinitis pigmentosa foundation, extra evening sunlight and mobility for the over 400,000 Americans suffering from night blindness.

□ 1410

Mr. THOMAS of California. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman.

Mr. THOMAS of California. I thank the gentleman for yielding to me.

Mr. Chairman, I want to commend the gentleman from California and the gentleman from Massachusetts on the well thought out plan that we have before us. I think it is entirely possible that a 12-month daylight savings plan could pass. I think it is in recognition of the changing makeup of society.

What the gentleman has done in this plan is provided the needed flexibility for those areas that feel they need, at some portion of the year, to have a regular time. I just want to commend the gentleman for the time and effort that he has put in on this project.

It is eminently reasonable and appealing to those of us who represent both rural and suburban areas because we feel the tug within our districts, and what you have provided for here is an opportunity to, in discussing it with those people, show how at the local option basis, and even at the State option if necessary, that everyone is provided for.

What we have here, is that although there may be individuals who feel that they must rise in opposition to this plan, this plan, when looked at in terms of benefiting the greatest number with flexibility for those who feel that they need to be different, is a plan that I think the House will pass overwhelmingly.

Again, I want to commend the gentleman from California and the gentleman from Massachusetts and the subcommittee for offering us something that is rational and reasonable.

Mr. MOORHEAD. I thank the gentleman.

Mr. Chairman, we have carefully looked into the matter of children waiting for school buses in the morning under an expanded daylight saving period. Studies conducted by the Department of Transportation and National Safety Council indicate that school age children are not subject to greater involvement in accidents. Since the amount of daylight hours in March or April are essentially the same as the daylight hours during September and October, there is no reason to believe that the extension of daylight saving time under this legislation, as originally introduced, would have any adverse consequences.

While I continue to believe that H.R. 2095, as introduced, would have been favored by a large majority of the House, it was clear that some Members continued to have concerns about extending daylight saving time into the month of March when, in some regions of the country, the weather is still harsh and unpredictable.

To accommodate the concerns and to build a broad consensus in support of this legislation, H.R. 2095 was amended so that daylight saving time would start the first Sunday in April rather than the third Sunday in March. This reflects an excellent compromise. Sunrise on the first Sunday in April with daylight saving time would be earlier than sunrises throughout the entire winter under standard time. Morning conditions in April, even with daylight saving time, would be both brighter and warmer than in any winter month.

As amended, H.R. 2095 would increase daylight saving time to a little over 7 months. All of the benefits outlined above would be achieved and the interests of the regions most concerned with such an extension are addressed.

Mr. Chairman, the evidence clearly shows that the American public is behind an expansion of daylight saving time. The extension of daylight saving will help our Nation to save energy at no cost to the taxpayer. The administration strongly supports this bill. I urge my colleagues to join with Chairman MARKEY and myself, and act favorably on this legislation.

Mr. Chairman, I yield back the balance of my time.

Mr. LAGOMARSINO. Mr. Chairman, I urge all of my colleagues to support the 4-week extension of daylight saving time provided for in H.R. 2095. This proposal has had widespread support for several years. I believe the action taken by the Energy and Commerce Committee to begin daylight saving time on the first weekend in April should convince even those who are wavering on this issue to support this reasonable extension.

I believe the issues of energy conservation, fewer traffic accidents, more daylight hours for recreation, a reduction in violent crime, and help to those who suffer from night blindness are all good reasons to support this bill. As the Los Angeles Times noted in an editorial on September 2, the potential nationwide benefits of 30 or more hours of evening daylight far outweigh the potential disadvantages of 30 or more hours of morning darkness. I have had positive response to this idea from my constituents and I hope that this time around we can all support this worthy idea.

Mr. DORGAN of North Dakota. Mr. Chairman, I rise in opposition to the bill H.R. 2095, the Daylight Saving Extension Act of 1985. In particular, I oppose the plan to start daylight saving earlier in the year than under the present system.

Beginning daylight saving time on the first Sunday of April instead of the last Sunday in April simply means that more farmers will have to do morning chores in dark, cold weather. It means that more rural school children will have to have to walk to bus stops in the dark during a month in which snow storms and blizzards are not uncommon in North Dakota.

As a result, we put school kids at greater risk to traffic accidents and make work more difficult in the Farm Belt. Farmers and rural people understand sacrifice and would probably accept these hindrances if change really produced all the benefits claimed by the proponents of expanded daylight saving.

But the facts don't support the latter case. The definitive 1976 National Bureau of Standards study on the matter threw cold water on the notion that expanding daylight saving would save energy, would not endanger schoolchildren, and would not adversely affect some regions more than others. The study simply could not confirm alleged benefits and did show that certain rural areas—especially in the western parts of time zones where 65 percent of the population resides—would face much later sunrises than under the current system.

In basic terms, supporters of this bill uphold the benefits for some regions of the Nation at the expense of hardships for other areas—especially farming and rural communities in the Northern States. They overlook the fact that the last freeze in most North Dakota towns occurs in mid-May. When you add darkness to cold and severe weather, you make a prescription for traffic dangers and work hardships.

In conclusion, I understand the desire of some to expand daylight saving time in the interest of reduced energy usage and greater convenience for urban areas. I only wish these goals could be reached without hurting the farmers and rural communities in my State. Consequently, I oppose the revision of daylight saving and express my support for continuing the current plan.

Mr. MARKEY. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time has expired.

The Clerk will designate section 1.

Mr. MARKEY. Mr. Chairman, I ask unanimous consent that the bill be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The text of the bill is as follows:

H.R. 2095

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1 SHORT TITLE.

This Act may be cited as the "Daylight Saving Extension Act of 1985".

SEC. 2 CONGRESSIONAL FINDINGS.

The Congress finds—

(1) that various studies of governmental and non-governmental agencies indicate that daylight saving time over an expanded period would produce a significant energy savings in electrical power consumption;

(2) that daylight saving time may yield energy savings in other areas besides electrical power consumption;

(3) that daylight saving time over an expanded period could serve as an incentive for further energy conservation by individuals, companies, and the various governmental entities at all levels of government, and that such energy conservation efforts could lead to greatly expanded energy savings; and

(4) that the use of daylight saving time over an expanded period could have other beneficial effects on the public interest, including the reduction of crime, improved traffic safety, more daylight outdoor playtime for the children and youth of our Nation, greater utilization of parks and recreation areas, expanded economic opportunity through extension of daylight hours to peak shopping hours and through extension of domestic office hours to periods of greater overlap with the European Economic Community.

SEC. 3. DAYLIGHT SAVING EXTENDED TO START IN MARCH AND END IN NOVEMBER.

Section 3(a) of the Uniform Time Act of 1966 (15 U.S.C. 260a(a)) is amended—

(1) by striking out "last Sunday of April" and inserting in lieu thereof "third Sunday of March"; and

(2) by striking out "last Sunday of October" and inserting in lieu thereof "first Sunday of November".

SEC. 4. EFFECT ON EXISTING STATE ELECTIONS.

Any law in effect on the date of the enactment of this Act—

(1) adopted pursuant to section 3(a)(2) of the Uniform Time Act of 1966 by a State with parts thereof in more than one time zone, or

(2) adopted pursuant to section 3(a)(1) of such Act by a State that lies entirely within one time zone, shall be held and considered to remain in effect as the exercise by that State of the exemption permitted by such Act unless that State, by law, provides that such exemption shall not apply.

SEC. 5. ADJUSTMENT OF OPERATING HOURS OF DAYTIME BROADCASTERS.

(a) ADJUSTMENT OF OPERATING PERIOD.—Notwithstanding any other law or any regulation issued under any such law, the Federal Communicatons Commission shall, consistent with any existing treaty or other agreement, make such adjustment by general rules, or by interim action pending such general rules, with respect to hours of operation of daytime standard amplitude modulation broadcast stations, as may be consistent with the public interest, including the public's interest in receiving interference-free service.

(b) VARIANCE FOR POWER AND OTHER OPERATING CHARACTERISTICS.—Such general rules, or interim action, may include variances with respect to operating power and other technical operating characteristics.

(c) SUBSEQUENT CHANGES.— Subsequent to the adoption of such general rules, they may be varied with respect to particular stations and areas because of the exigencies in each case.

SEC. 6. EFFECTIVE DATE.

This Act shall take effect 60 days after the date of the enactment of this Act, except that if such effective date occurs in any calendar year after March 1, this Act shall take effect on the first day of the following calendar year.

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Page 3, strike out section 3 and insert in lieu thereof the following:

SEC. 3. DAYLIGHT SAVING EXTENDED.

Section 3(a) of the Uniform Time Act of 1966 (15 U.S.C. 260a(a)) is amended—

(1) by striking out "last Sunday of April" and inserting in lieu thereof "first Sunday of April"; and

(2) by striking out "last Sunday of October" and inserting in lieu thereof "first Sunday of November".

Mr. MARKEY. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, again, this is a compromise amendment. It has already been described in general debate on the floor. The amendment offered by the gentleman from Utah moved the starting date for daylight saving time to the first Sunday in April from the proposed date of the third Sunday in March. The amendment is a fair compromise. I support it.

Mr. MOORHEAD. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in strong support of the committee amendment. Naturally, we would rather have a longer period of time for daylight savings, but there were some legitimate objections that were raised by people in some of the northern regions and some of the farm areas. To meet those objections we reduced the period so that daylight saving time would start the first Sunday in April.

I think that their objections have been taken care of. There are still, of course, a few people who object to the bill, but the vast majority of people in this House and throughout the country support daylight saving time during this extended period. The objections of the few have been taken care of.

Mr. GOODLING. Mr. Chairman, I rise in opposition to the committee amendment.

Mr. Chairman, we just saw an interesting exhibit down here. I am not quite sure what it was set out to prove. I believe it was set out to prove that as a matter of fact there is more light in early April in the morning than there is in September and October. Well, I do not propose to argue against that.

I am asking, should we do something to make things more wrong than they presently are or should we be going the other way? Of course it is darker in the morning in October. It is wrong for daylight saving in October when you think in terms of child abuse, and that is what we ought to call it.

I found it humorous that someone was discussing what local districts should do in relationship to taking care of these problems in October and April, et cetera. That is very humorous. It is very obvious that no one knows very much about how you get 5,000 or 10,000 students on buses and haul them for a half hour, 40 minutes, 45 minutes, an hour, in many rural districts, and, at the same time, meet the State standards in relationship to the number of hours that students must be in school.

It is not an easy thing, but I am here to tell you that I only lost one child during my tenure as a superintendent of schools because of transportation. But it is something I will never forget. I have asked myself over and over, many times: What could I have done differently, as a matter of fact, to make sure that that child was not lost.

Keep in mind that the very time you are talking about, as I mentioned before, is a time when we have the fog periods in the Northeast, in the Midwest, and part of the South.

□ 1420

It is also the time when as a matter of fact we have a temperature problem. Of course we had serious difficulties in November, December, January, and February. Not very many superintendents in that area, in the Northeast, the Midwest, and parts of the South do very much sleeping during those months, but at least at that time you pretty well know that you are going to have to delay school the next morning or you are going to have to cancel school that day in order to protect those lives.

I hear colleagues of mine around here smile and laugh whenever they hear somebody say, "Oh, gee, they closed the school again," or they delayed it another hour or two. You would not smile or laugh if you had to make those decisions. Those are very difficult decisions to make. They are not your children. Although I must admit that one time I was called as a superintendent to the emergency room, and it was my child also. Fortunately none of those children in a bus accident were permanently injured.

Let us keep in mind those children. You are putting them along a highway at a time when you have all of the traffic going to work. You are putting them along a highway because there are no sidewalks. You are putting them on a bus where in many instances the driver is not a totally experienced bus driver. You are putting them in a bus driver's charge who not only has the responsibility to somehow or other get those buses down trails that were built for horse and buggy, but at the same time be the disciplinarian on that bus, and that is pretty difficult to do and still concentrate on what you are doing.

I do not doubt that it is not a good idea to have daylight saving time in October and in late September. I know it is the wrong time. But by doing what we are doing today we are not correcting that ill, we are just adding to it, because we are adding another week in November, we are adding 3 more weeks in April, 4 more weeks of critical time.

And so I would hope that my colleagues would think strictly not about how convenient it may be. Do not fall too hard for what the savings are, but think primarily in terms of what will happen if we continue expanding the time that we are going to expose these youngsters. We do not want to expose them now, but we do not have a choice. Let us not make something that is already wrong even worse. Let us try to work the other way and see whether we cannot correct the wrongs that are there now.

Mr. SWIFT. Mr. Chairman, I rise in support of the committee amendment.

Mr. Chairman, the chairman of the subcommittee dealt with the issues raised by the gentleman who has just spoken so well. I would like to yield to the subcommittee chairman so that he may again go over the information because it seems clear that the gentleman who was in the well was absolutely sincere in his concerns, but the concerns do not relate very effectively to the specific times that the Sun rises in his district and across the country. The chairman of the subcommittee made that point, I think, very clear, and I think it would be extremely useful—if the chairman would not mind—if he would make that point again.

Mr. MARKEY. Mr. Chairman, I thank the gentleman very much for yielding to me. I would like to move down to the well to once again make that point.

Our concern, Mr. Chairman, is that in fact the time for starting schools is within the exclusive jurisdiction of the school committees, the school departments, the school superintendents, the parents, and the citizens of the various counties and cities and towns across this country.

If there is a problem and it exists in the gentleman's district, I want to make this point once again very, very clear. The problem exists for 22 out of the 40 weeks of the year that the schoolchildren are in school in York, PA, and in every other school district across this country. We have picked April 1 to begin daylight saving time. That is approximately halfway through the school year; 161 days have already gone by that the kids have been in school. Those 161 days and days during which the children are in more danger than they are on April 1.

The Sun rises on April 1 at 6:48 in the morning in York, PA. That means that for 161 days, going all the way back to September 16, when the Sun rises at 6:49 in the morning, the children are in more danger than they are on that date. Now, if there is a problem, not just in York, PA, but in Malden, MA, or Dover, DE, or San Diego, CA, then those local school committees ought to change the dates that the school starts, or they ought to put more police on the streets or more school traffic control people out there. But my sense is that most school districts in this country know what to do to protect their children, and they do it. And they do it for 161 days up to April 1. As a result, for the gentleman to come to the floor and say that, all of a sudden on April 1, these children are placed in extraordinarily dangerous circumstances, that belies the fact that for the preceding 161 days there has been a process put in place to protect them.

We have worked out this compromise very carefully. We have not done it with the intention of in fact putting these children in jeopardy but, rather, of protecting them. That is why we have excluded March, excluded February, and excluded November. We are not going back to 1974. That is what the gentleman keeps alluding to, and we are not debating that. We are debating now the lessons learned since then.

We are trying to put it in a time that makes more sense. At 6:58 in the morning, 99.9 percent of the kids in this country are just about leaving their house and the Sun has just come up. That gives them the protection which they need, along with the rest of the infrastructure that the local community is able to provide.

Mr. GOODLING. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I am glad to yield to the gentleman from Pennsylvania.

Mr. GOODLING. Mr. Chairman, I have never mentioned 1974. I was running for Congress in 1974 day and night, and I have never mentioned the year 1974. The gentleman keeps saying I am alluding to something in 1974.

Mr. MARKEY. Eleven years. The gentleman mentioned 11 years.

Mr. GOODLING. I am not alluding to anything in 1974.

Mr. MARKEY. You did mention 11 years ago. You mentioned 11 years ago when you were school superintendent, and 11 from 85 is 74.

Mr. GOODLING. But I am not mentioning 1974. I was a superintendent for 7 years and a vice principal for 12 years.

Mr. MARKEY. No, I said the gentleman alluded to it. I said you alluded to it, and 11 from 85 is 74.

Mr. GOODLING. No; I ran for Congress in 1974.

Mr. MARKEY. But 11 from 85 is an allusion. I did not say you specifically mentioned it. I said you alluded to it, and that is in fact what that subtraction gives us.

That is in fact what we are talking about here. We are talking about 1985, not 1974. We are giving children at 6:48 in the morning the sunshine they need to go to school safely.

I think the facts ought to speak for themselves, and the kind of red herring and innuendoes that have characterized this debate over the past couple of years ought to end so that we can deal with the facts as they are presented by the almanac.

The CHAIRMAN. The time of the gentleman from Washington [Mr. SWIFT] has expired.

(By unanimous consent, Mr. SWIFT was allowed to proceed for 1 additional minute.)

Mr. SWIFT. Mr. Chairman, if I understand the gentleman correctly, to the extent that the gentleman from Pennsylvania says there are problems, they already exist, and the proposal of the subcommittee is not creating any new problems. Presumably if problems exist and they are severe, they should be taken care of at the local level. We, in any event with this bill, are not creating any new problems for any school district.

Mr. MARKEY. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I am happy to yield to the gentleman from Massachusetts.

Mr. MARKEY. Mr. Chairman, if the problems are not solved by April 1, they will never be solved, because by April 1, almost every one of these problems has already been solved by the fact that the Sun is already rising at 6:48 in the morning. Nature has already solved almost every one of the problems to which the gentleman has alluded. If, in fact, there is a problem, it exists in his district and every other district in November, December, January, and February. That is the heart of the winter.

That is when the decisions have to be made at the local level as to when school is going to start, what kind of police protection you want, how many school-crossing guards you want, and all the rest of the attendant questions. But by April 1, the 161st day, these children are dealing with this problem. With 6:48 as the sunrise time, I do not understand what the concern is that could be any worse than it would be the day before and the preceding 161 days.

The CHAIRMAN. The time of the gentleman from Washington [Mr. SWIFT] has expired.

The question is on the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. Are there any further amendments?

□ 1430

Mr. GOODLING. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I just want to again review the situation as I see it.

When someone talks about when the Sun rises or the Sun sets, I am not so sure that there is very much significance to that in any kind of argument in relationship to daylight saving time. For instance, the last four mornings, did anyone see any sunrises in this area? I did not.

As I indicated before, we are talking about critical times in April. We are talking about critical times in November, because they are times when, as a matter of fact, cloudiness is the name of the day, the name of the game. We are talking about temperature changes that cause all sorts of problems. And so we do not really have any good almanac to look at.

Then I would like to refer to what has been mentioned so many times as I mentioned before when we talk about local districts should take care of these issues.

Local districts have to make a lot of decisions in November, December, January, and February, and they do. But again there are rules and regulations and requirements in relationship to how many hours youngsters must go to school. You can only shift 5,000 or 10,000 students around so many times in so many different directions and get the number of hours in that you must get in.

I hear about crossing guards. Where are these crossing guards? Nobody seems to want to talk about rural America. You are talking about people

walking along highways or paths that are used as highways. You are talking about children going to school in the darkness in the middle of a rush hour, because we put them on buses at 6:30 in the morning. We have to do that in order to get them all there on time.

So I would hope that my colleagues would think very seriously about the fact that we have a real problem in November, December, January, February, and March, but nobody is bringing any solution before us to that problem. What is being brought before us is something to add to that problem, because now we would add 1 more week of problems in November and 3 more weeks of problems in April.

Let us think about solutions to those problems, not let us think about ways to compound the problems that we already have.

So again I would ask my colleagues, we have more important things to do I am sure than play around with daylight saving time, but if we are going to, let us think primarily about children, children particularly in rural areas, that must be on that highway at 6:30 or 6:45 in the morning. And if we think about children, then it seems to me we will not ask to exacerbate the problems, but we will come up with some legislation that in fact will help us to correct them.

As one of my colleagues said, "Memorial Day to Labor Day, you could solve a lot of problems there." We should not even be in October, as far as daylight saving time is concerned.

It is a problem. We are just creating more problems and we are putting children on the line. No matter how many charts you put up there, if you are there in person and if you have that responsibility, you understand what those problems are.

Mr. Chairman, I yield back the balance of my time.

Mr. MARKEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, in summary, this is a compromise. It is not the bill that came to the floor in 1983 or 1981. It has not even a faint resemblance to the year-round daylight saving time that was in place during the 1974–75 energy crisis. We have struck a balance with the opponents of the 1983 proposal, so that we take April, add it on to the daylight saving time, have the latest sunrise be 6:48 in the morning; 6:48 for a sunrise gives every school system in this country plenty of time to get their kids to school very safely. We are not adding any extra danger to the local school jurisdictions. At the same time we are not removing from the local school jurisdictions their ability to modify by 10 or 15 minutes their ability to be able to start school a little bit later if they should so choose. That is strictly a local decision.

But for the most part, for 95 percent of the people in this country, this is something that they can live with—6:48 in the morning is a reasonable time to have the Sun come up and also be able to get their kids to school.

That is what we really are trying to do here. We also extend daylight saving time to the end of October, an extra few days, so that the kids can trick or treat on that Halloween night with the extra daylight rather than having it on that day be in the morning instead.

In both instances the safety of children has been the primary interest of those who are participating in the compromise. We have no intention of just taking this to pass a bill that allows softball leagues and others to be able to benefit from it. Far from that is in fact true. We have struck a balance. We have got a compromise. It is bipartisan in nature. It reflects the disparate interests of the entire country.

I think that in fact if anyone looks at this bill objectively, they can only come to a conclusion that finally and permanently, we have found a solution that all parts of this country can live with.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Are there further amendments to the bill? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. MURTHA] having assumed the chair, Mr. VOLKMER, Chairman of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2095) to provide for daylight saving time on an expanded basis, and for other purposes, pursuant to House Resolution 288, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. GOODLING. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 240, nays 157, not voting 37, as follows:

□ 1445

The Clerk announced the following pairs:

On this vote:

Mr. Lowery of California for, with Mr. Skeen against.

Messrs. RICHARDSON, DARDEN, LEACH of Iowa, and NATCHER changed their votes from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1455

GENERAL LEAVE

Mr. MARKEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

"A TIME OF REMEMBRANCE" FOR VICTIMS OF TERRORISM THROUGHOUT THE WORLD

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 104), to proclaim October 23, 1985, as "A Time of Remembrance" for all victims of terrorism throughout the world, and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I yield to the gentleman from New York, [Mr. GARCIA].

Mr. GARCIA. Mr. Speaker, I would just like to take a second.

This committee passes and brings out many resolutions to the floor. But I think of all of the resolutions we have passed in the 99th Congress, the resolution dealing with terrorism is a very appropriate one for the period in which we live.

I would just like to read, Mr. Speaker, a short paragraph from the resolution itself. It says, "Be proclaimed as 'A Time of Remembrance,' to urge all Americans to take time to reflect on the sacrifices that have been made in the pursuit of peace and freedom, and to promote active participation by the American people through the wearing of a purple ribbon, a symbol of patriotism, dignity, loyalty, and martyrdom."

Mr. Speaker, just yesterday, the Senator from the State of New York, and a colleague of ours, the gentleman from New York [TED WEISS], sent out a "Dear Colleague" letter to all Members on both sides of the aisle in this House, as well as the other body. It dealt with a resolution on the assassination and slaying of Mr. Klinghoffer. Mr. Klinghoffer, as you know, was the person who was assassinated by the terrorists on board the Italian ship in the Mediterranean.

I would just like my colleagues to know that I hope we all take the opportunity to read that "Dear Colleague" letter. I would hope that we would all sign on it and I would hope that it would be possible that we will have unanimous consent in this body to deal with that resolution as well as in the other body, because I think Mr. Klinghoffer really stands as a symbol of a person who was not afraid to stand up, even though he was handicapped and in a wheelchair.

I think the name Klinghoffer will live for a long, long time in all of our hearts and our memories.

So with that, Mr. Speaker, I thank my colleague from Utah [Mr. HANSEN] for allowing me these few minutes to speak on behalf of this resolution.

Mr. WEISS. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from New York.

Mr. WEISS. Mr. Speaker, I thank my distinguished colleague for yielding to me. I want to express my appreciation to my friend from New York [Mr. GARCIA] for both the expeditious manner in which he and his subcommittee handled this particular resolution, which is authored by our friend, the gentleman from Florida [Mr. MICA] and also for his words of support for the resolution that was introduced in the other body and here by myself and the junior Senator from New York, Mr. D'AMATO.

There may have been some confusion in how the stories were carried as to what the medal is being spoken about. It is not the Congressional Medal of Honor. As my colleagues know, that is a battlefield honor reserved for members of the U.S. Armed Forces who demonstrate very special acts of courage and bravery.

The medal we are talking about is the Congressional Gold Medal of Achievement. It has been given in the past to civilians whose life work or whose specific actions in fact merited special note by the American people and by this Congress.

I do appreciate my colleague from New York [Mr. GARCIA] urging unanimous support for that resolution. I hope that my colleagues will, in fact, join and become cosponsors.

Mr. Klinghoffer, indeed, was a brave and courageous human being, who although may have been paralyzed, that is half of his body was paralyzed, fought courageously against the men who ultimately murdered him so viciously.

I thank my colleague for yielding.

Mr. HANSEN. Mr. Speaker, I would like to associate myself with the comments of both gentlemen from New York. And I would like to add to it, if I may, in America today, as we read the paper and we look at TV, we see this constant outcry of terrorism cropping its ugly head up from various places around the world. It seems like every week or two there is another incident coming about.

I personally feel that government can no longer tolerate this. The time has come when people of good faith,

and people with humanistic types of thinking will not tolerate this type of activity being conducted.

I must say that in my humble opinion, terrorists are the ultimate cowards of the world, that they prey on children, and the weak and the maimed, like Mr. Klinghoffer and others who cannot really protect themselves. I think this is one of the most outstanding instances of man's inhumanity to man, that is someone who becomes involved in a terroristic thing.

I compliment the President of the United States for the action he recently took. I compliment the people of Italy and of Egypt who assisted in that. I would hope in this body, in these Chambers where laws are passed and principles and policies are made, that we have courage enough to stand up against terrorism in any form. I compliment the people of the world today who have courage enough to stand up against it.

Mr. LOWRY of Washington. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from Washington.

Mr. LOWRY of Washington. I thank my friend for yielding. I want to compliment him for the comment he just made in complimenting in addition to the President, our friends in Egypt and in Italy for the actions they took.

I have been concerned that over the last few days, some of our very valuable allies, and especially a man I have great respect for, the President of Egypt, Mr. Mubarak, who I had a chance to meet with 1½ years ago, that perhaps there have been some comments made that were not really accurate and not really in the right feeling that we should have toward valuable allies like the President of Egypt. I would like to compliment the gentleman on his comment, and would also like to stand in compliment of the actions taken on this resolution and I stand in strong support of it.

□ 1510

Mr. HANSEN. I thank the gentleman.

I would like to say, I am sure we have some differences of opinion the way that possibly was handled, but hopefully we would work together for the betterment of handling the situation; and those minor differences can be resolved amicably among the nations.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 104

Whereas the problem of terrorism has become an international concern that knows no boundaries—religious, racial, political, or national;

Whereas thousands of men, women, and children have died at the hands of terrorists in nations around the world, and today terrorism continues to claim the lives of many peaceloving individuals;

Whereas October 23, 1983, is the date on which the largest number of Americans were killed in a single act of terrorism—the bombing of the United States compound in Beirut, Lebanon, in which two hundred and forty-one United States servicemen lost their lives;

Whereas many of these victims died defending ideals of peace and freedom; and

Whereas it is appropriate to honor all victims of terrorism, and in America to console the families of victims, and to cherish the freedom that their sacrifices make possible for all Americans: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 23, 1985, be proclaimed as "A Time of Remembrance", to urge all Americans to take time to reflect on the sacrifices that have been made in the pursuit of peace and freedom, and to promote active participation by the American People through the wearing of a purple ribbon, a symbol of patriotism, dignity, loyalty, and martyrdom. The President is authorized and requested to issue a proclamation calling upon the departments and agencies of the United States and interested organizations, groups, and individuals to fly United States flags at half staff throughout the world in the hope that the desire for peace and freedom take firm root in every person and every nation.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on Senate Joint Resolution 104, the Senate joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

A SHAMELESS EXPOSURE

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DORNAN of California. Mr. Speaker, this morning "The Phil Donahue Show" on network television, and carried across the country in syndication reaching millions of people, hosted the Communist President of Nicaragua, Daniel Ortega.

Now, you and I both know, Mr. Speaker, that Phil Donahue, Irish last name notwithstanding, is the No. 1 anti-Catholic bigot in the United States as far as widespread negative impact on our beloved church is concerned. Phil Donahue is to Catholicism what Lewis Farrakhan is to Judaism. If this Donahue were to attack Jews or blacks or any other ethnic or racial group the way he attacks the Catholic Church I love, he would be kicked off the air by any of the networks. But, Mr. Speaker, remember what Arthur Schlesinger has said for decades. Anti-Catholicism is the anti-Semitism of the psuedo-intellectual left.

So it was a peculiar thing to see Donahue, given his hatred of Catholicism, pressing Ortega about his persecution of a man I have called the most courageous clergyman in this hemisphere, Bishop Miguel Obando y Bravo. Donahue, of course, pressed the case weakly about Ortega trying to crush religion. He mostly verbally dusted off Ortega's shoes. Donahue did bring up the testimony of Alvaro Jose Baldizon, a man who defected from the highest levels of Tomas Borge's Ministry of the Interior. Baldizon has told ghastly stories of Communist murder and torture by the Sandinistas inside Nicaragua.

Baldizon, unfortunately, has met with only eight or nine Congressmen. He told me there are 10 times as many political prisoners as under the hated dictator Samoza. He said there is wholesale capital punishment, and that he couldn't take the unrelenting murder and torture.

This scene was bizarre, of Ortega reaching out to the American people on "The Donahue Show" and challenging our President to come down to Managua and speak to the Nicaraguan people on television as Ortega was doing, through a simultaneous translator.

Well, Mr. Ortega, I accept that offer as a supporter of the President's policies. I hope other Members will. I would like to go down to Managua and plead again for the brother and the wife of Mr. Baldizon. They have been imprisoned and abused because Baldizon, obviously, speaks the truth.

When Donahue brought up Baldizon's wife and imprisoned brother, Ortega looked as if he had been hit in the forehead with a ball peen hammer. Mrs. Ortega, who speaks perfect English, and the translator were also stunned and fished for an answer. Ortega said that if Baldizon's brother is in jail, it is because of offenses that the brother committed. Ortega, of course, denied that he holds 10,000 political prisoners. The show was, all in all, Mr. Speaker, an inadvertent unmasking of a Communist dictator on a man's program who gags on the word "Communist." Phil Donahue is not alone in his aversion to using the proper description of a Communist as a Communist. We have more than a few members in this chamber with the same hangup.

By the way, I wonder, Mr. Speaker, if Donahue, a Notre Dame alumnus, has publicly condemned the kidnaping of President Duarte's daughter in El Salvador. Mr. Duarte is a fellow Notre Dame alumnus.

Mr. Speaker, I include for the RECORD a rather surprising newspaper column of today, October 22, by Mary McGrory. See for yourself, she is beginning to see the light, flickering though her insight may be:

ORTEGA'S SELF-INFLICTED WOUNDS

(By Mary McGrory)

If ever they give an Oscar for bad timing, there will be no need to ask for the envelope. President Daniel Ortega of Nicaragua will be the winner, going away.

He laid heavy claim to the title last April, when, within days of a hard-won House of Representatives vote against aid to the contras, he took wing for Moscow, occasioning anguished cries of "betrayal" from those who had nervously taken up for him, and "I-told-you-so" from those who all along said he is an agent of the Kremlin.

But he cinched the cup last week, when on the eve of a visit to the United Nations, he announced a state of emergency in Nicaragua, setting off a new frenzy of handwringing and self-righteousness.

It can be argued, although few have, that Ortega, being the elected head of a sovereign nation, however, impoverished and down at the heels it may be, can do as he pleases in what he sees as his country's interest. Despite President Reagan's overheated representations to the contrary, we do not own Nicaragua, and its Marxist leanings are really none of our business, since Nicaragua's ability to "export revolution" is a fiction invented by those who want Ortega to say "uncle."

And it is further arguable that the reasons given by Ortega, which are vague and flimsy, are totally related to his principal problem, which is a U.S.-backed revolution against his shaky regime.

But what the move shows most is that Ortega has not lost his compulsion to play into Reagan's hands. Countless congressional delegations have gone to Managua to plead with him to employ a slightly less leaden touch and to give them a break in their efforts to defend his right not to be overthrown. They are sadly concluding that he has developed a taste for spitting in Uncle Sam's eye.

Quite apart from the fact that Ortega has come to the U.N. as a culprit instead of as a figure of some sympathy, he chose a moment when things were going rather well for Nicaragua in public opinion, mostly because world attention has been elsewhere.

The Nicaraguan ambassador, Carlos Tunnermann, recently noted that not a single country has joined in the trade embargo imposed by the United States—not even El Salvador, which alone voiced support for the idea. In the World Court, where Nicaragua has lodged a complaint against the U.S. for the mining of its harbors, the U.S. has looked petty for its denial of court jurisdiction over "a political matter."

The verdict, which is expected to go Nicaragua's way, is pending, but Ortega has taken pains to see that the victory will be muddied.

None of the individuals or groups who stick up for the Sandinistas, or at least their right to exist, can justify the crackdown. Rev. Joseph Eldredge of the Washington Office on Latin America calls it "perplexing and discouraging."

Paul Reichler, the Washington attorney who is presenting Nicaragua's case in the World Court, says the timing is "not the best."

The State Department doubtless knew that Ortega was in the way of being warmly received in some quarters in the U.S. That is almost surely why it withheld a visa permitting him to travel outside New York until late last Friday—when it was too late for him to accept speaking invitations from some half-dozen American cities, including Seattle, St. Louis and San Francisco.

The Socialist Mayor of Burlington, Vt., Bernard Sanders, went to Nicaragua last July and asked Ortega to come to a Vermont town meeting. Sanders thought it was "important for Ortega to communicate directly with the American people." He thinks the Ortega crackdown is "obviously not good."

"Still," he says, "I think it's kind of ironic that we're so upset, when the president has been telling us for two years that this is a totalitarian, terrorist government where people had no civil rights anyway."

Mayor Don Fraser (D) of Minneapolis, who deplores U.S. policy in Nicaragua, wrote a letter to Ortega seconding an invitation from a church group, thinks Ortega "may have given up on the U.S." Fraser is more interested in the fact that the letter he sent to Ortega through the Nicaraguan Embassy seems to have been intercepted by the government.

Supposedly, there has been a lull in the fighting between the Sandinistas and the contras, who are once again receiving U.S. funding. Ortega, it is said, wanted to clear the decks before a last, conclusive assault, and he wished to curb his most obdurate and powerful local dissenter, Cardinal Miguel Obando y Bravo, who is leading an antidraft campaign.

Whoever he was aiming at, Ortega, once again, seems to have shot himself.

YOUTH EMPLOYMENT OPPORTUNITY WAGE ACT

(Mr. STENHOLM asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. STENHOLM. Mr. Speaker, I rise in support of H.R. 1811, the Youth Employment Opportunity Wage Act, and urge my colleagues to give this bill the hearing it deserves and to enact it into law.

I can understand the qualms some Members have had in the past about the general approach of a youth opportunity wage. I was proud to join my friend, the gentleman from Mississippi [Mr. LOTT] as an original cosponsor of H.R. 1811 because this legislation answers the questions and reasonable criticisms that had been raised about previous proposals.

This bill will create new jobs for young people aged 16 to 19, not steal jobs from current employees. In the relatively rare situations when an employer might be tempted to substitute at the lower wage, he or she would be sufficiently discouraged by the strong sanctions in the bill, including stiff fines and prison terms.

Second, the fact that the opportunity wage would apply only from May through September would further act to make these new jobs suitable for young people.

This bill will also allow us to better harness the most powerful engine for job-creation in our economy: Small business. Nearly 600,000 new businesses start up each year. Yet most small businesses do not reach their breakeven point for several years. This fact, coupled with less access to expensive tax advice, means that the economic sector that creates the most jobs has less opportunity to use the targeted jobs tax credit. The youth opportunity wage would help make up the difference, by providing small businesses with an incentive to create additional entry-level jobs for youth.

The additional advantages of the opportunity wage are obvious. The young person gains skills and experience, an employment history, and the invaluable assets of increased self-reliance and self-esteem.

I urge all my colleagues to join with us, with the Boys Clubs of America, the National Conference of Black Mayors, the Fraternal Order of Police, and others, in supporting legislation that is both compassionate and economical.

I would also like to insert in the RECORD a partial list of organizations supporting the opportunity wage.

Associations which support the youth employment opportunity wage bill:

American Association of Nurserymen, Inc.
American Farm Bureau.
American Furniture Manufacturers Association.
American G.I. Forum.
American Textile Manufacturers Institute, Incorporated.
Associated Builders and Contractors.
Boys Clubs of America.
Business Round Table.
The National Coalition of Hispanic Mental Health and Human Services Organizations.
Food Service and Lodging Institute.
Fraternal Order of Police.
National Alliance of Business.
National Association for Equal Opportunity in Higher Education.
National Association of Cuban-American Women and Men.
National Association of Manufacturers.
National Association of Minority Contractors.
National Association of Truck Stop Operators.
National Association of Wholesale Distributors.
National Club Association.
National Conference of Black Mayors.
National Federation of Independent Business.
National Restaurant Association.
National Small Business Association.
Organization of Chinese American Women.
Printing Industries of America.

Retail Bakers Association.
Recreational Vehicle Dealers Association.
SER-Jobs for Progress, Inc.
U.S. Chamber of Commerce.

LEGISLATION INTRODUCED TO LIMIT THE NUMBER OF SOVIET CITIZENS WORKING AT THE UNITED NATIONS

(Mr. SWINDALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks, and include extraneous matter.)

Mr. SWINDALL. Mr. Speaker, today I am introducing legislation which will substantially limit the number of Soviet citizens serving at the Soviet mission to the United Nations. Specifically, this legislation would reduce the number of Soviet citizens serving at the mission to the equivalent of the number of United States citizens serving at the U.S. mission.

Today there are approximately 295 Soviet citizens serving at the United Nations. The United States has only 130. It is obvious that if the Soviets have roughly double the number of Soviet citizens serving at the mission, there must be another purpose. Clearly, the purpose is more than diplomatic. Recent stories regarding the Soviet espionage efforts in this country ought to alert all of us that these individuals are serving not the United Nations but rather the Soviet Union, and their espionage efforts.

I urge all of my colleagues to take this opportunity, the 40th anniversary of the United Nations, to seriously reevaluate both the purpose of the United Nations and the number of Soviets serving at the United Nations and take this opportunity to reduce the number of Soviets at the United Nations to the equivalent of the United States. Certainly our national security demands nothing short of that.

I urge all of my colleagues that are concerned about our national security to join me in this effort.

Mr. Speaker, the reason for this bill, as was the driving force behind previous amendments introduced by Senators COHEN and LEAHY, is simply to reduce the significant threat that the Soviet and Eastern bloc spies have on our national security by reducing the number of Soviet officials sheltered by the United Nations. Serious harm is being done every day to United States national security by allowing the United Nations to be a "Spy Sanctuary." The concept is very elementary, the less spies you have, the less intelligence activities there are.

From recent spy cases, we have learned of the magnitude of this Soviet presence in our country. These recent cases have unfortunately involved the U.S. military, defense contractors, and also our own intelligence agencies.

The FBI has estimated between one-third and 40 percent of this "staff" are professional intelligence officers. The remainder are presumed to be affiliated with the KGB, GRU—the Soviet military intelligence organization, or East bloc intelligence services. These agents engage in a variety of activities, including collecting information, searching for and recruiting Americans willing to reveal sensitive information.

With the upcoming 40th anniversary of the United Nations next week, it seems only appropriate to give this international forum a birthday present of lasting value, a better reputation and purpose. In addition, it's time for Congress to assess the problems that this institution presents to our Nation.

Over the last several years the United Nations has become an international institution which has strayed from its original intentions and purpose. Anyone who is seriously concerned about both our national security and the United Nations itself should be very concerned with the number of Soviet and Eastern bloc spies currently operating out of the Soviet mission to the United Nations in New York.

With this in mind, I am introducing legislation that will reduce the excessive size of the Soviet mission to the United Nations in New York. My bill will establish a policy requiring numerically equivalent U.N. delegations from both the United States and the Union of Soviet Socialist Republics. Specifically, this bill would require the Soviet mission to the United Nations, currently about 300 officials, be reduced to equivalence with that of the United States, about 130 personnel.

This bill is a logical successor to the Leahy-Cohen amendment limiting the number of officials allowed to work in the Soviet's U.S. Embassy and Consulate which was recently signed into law by the President. In addition, this bill is the companion bill to S. 1773, already introduced by Senators LEAHY and COHEN. This concept was also endorsed by the President in his June 21, 1985, national radio broadcast.

Clearly, this bill could greatly reduce Soviet intelligence operations in our country and at the same time help the United Nations shake its reputation of being a sanctuary for spies. What better time than at the 40th birthday of the United Nations to deliver a message that the United States is serious about the United Nations getting back on track as an international forum which helps solve world problems instead of contributing to them.

The text of my bill and a recent report by former Ambassador Lichenstein follow:

H.R. 3600

A bill to limit the number of Soviet nationals serving at the Soviet mission to the United Nations, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a)(1) the number of nationals of the Soviet Union admitted to the United States to serve as members of the Soviet mission at the United Nations headquarters shall not exceed the number of United States nationals who serve as members of the United States mission at the United Nations headquarters, unless—

(A) the excess number of nationals of the Soviet Union serving as members of the Soviet mission at the United Nations headquarters is the result of the routine replacement of personnel and is not more than 10 percent of the number of United States nationals who serve as members of the United States mission at the United Nations headquarters; or

(B) the President determines that the admission to the United States of additional Soviet nationals to serve as members of the Soviet mission at the United Nations headquarters would be in the interests of the United States.

(2) Beginning six months after the date of enactment of this Act, and every six months thereafter, the Secretary of State shall prepare and transmit to the Committee on Foreign Relations and the Select Committee on Intelligence of the Senate and to the Committee on Foreign Affairs and the Permanent Select Committee on Intelligence of the House of Representatives a report setting forth the number of Soviet nationals admitted during the preceding six-month period to the United States pursuant to a determination of the President under paragraph (1)(B) and their duties with the Soviet mission at the United Nations headquarters.

(3) Nothing in this subsection may be construed as including any dependent or spouse who is not a member of a mission at the United Nations headquarters in the calculation of the number of members of a mission at the United Nations headquarters.

(b) The Secretary of State and the Attorney General should, not later than six months after the date of enactment of this Act, prepare and transmit to the Committee on Foreign Relations and the Select Committee on Intelligence of the Senate and to the Committee on Foreign Affairs and the Permanent Select Committee on Intelligence of the House of Representatives a report setting forth a plan for ensuring that the number of Soviet nationals described in subsection (a)(1) does not exceed the limitation described in that subsection.

(c) For purposes of this Act—

(1) the terms "members of the Soviet mission" and "members of the United States mission" are used within the meaning of the term "members of the mission", as defined by Article 1(b) of the Vienna Convention on Diplomatic Relations, done April 18, 1961; and

(2) the term "mission at the United Nations headquarters" means a mission to the United Nations in New York City and includes missions in New York City to specialized agencies of the United Nations, as defined in Article 57 of the Charter of the United Nations.

[From Backgrounder, the Heritage Foundation, Sept. 9, 1985]

SOVIET ESPIONAGE: USING THE U.N. AGAINST THE UNITED STATES

(By Charles M. Lichenstein, Senior Fellow)

INTRODUCTION

With mounting concern, the West is discovering an escalating threat to its security posed by Soviet espionage. The U.S. government is prosecuting the Walker family on charges of giving military secrets to Moscow, while the West German government reels from revelations that some of its top security officials secretly have been working for East Germany. Ripples of this

West German spy scandal already have reached Britain and Switzerland.

Dwarfing these as spy threats is a Kremlin-directed espionage center thriving inside the United States. At risk are, among other things, the secrets of U.S. weapons, strategic military planning, high technology, advanced manufacturing processes, industrial innovations, and biotech and biogenetic research breakthroughs. Espionage against these targets weakens not only U.S. military defenses, but undermines U.S. worldwide economic competitiveness.

What makes the U.S. particularly vulnerable to this espionage are the convenient cover and access enjoyed by the spies. They are diplomates and bureaucrats with a status even more privileged than diplomats. Not only do they operate out of Soviet bloc and Soviet client-state embassies to the U.S., but more important—and much more valuable to the Kremlin—they use as a base the diplomatic missions, agencies and secretariats affiliated with the United Nations, in the heart of Manhattan.

Their numbers run into the hundreds. At least one in three of all Soviet, East bloc and client-state diplomats posted to the United States engages in espionage. This is the confident consensus of U.S. intelligence experts. The term, espionage, covers a multitude of abuses of diplomatic privilege: information collection (by open and covert means, including electronic intercepts), acquisition of military and industrial technology (some of it purchased off-the-shelf, some of it stolen), recruitment and supervision of agents (some but by no means all of whom are U.S. nationals), and an array of "active measures" that involve, among others, propaganda, spreading "disinformation" and using front groups.

The estimate of one in three, in fact, appears quite conservative. It is based, The Heritage Foundation has learned from official U.S. sources, on the actual record of confirmed case histories. It probably would be much more accurate to conclude that one in two Soviet bloc and client-state diplomats is involved in espionage, warn Soviet and East bloc defectors, many of whom were KGB (Soviet State Security), GRU (Soviet Military Intelligence) or East bloc counterparts. This is confirmed by Arkady Shevchenko, former U.N. Under-Secretary General for Political and Security Council Affairs, one of the highest ranking Soviet officials ever to defect to the West. Shevchenko writes in Breaking With Moscow (published this year) that, of 28 Soviet bloc "international civil servants" in his especially sensitive unit in the U.N. Secretariat, at least 21 spent some or all of their duty hours on intelligence assignments, in New York and elsewhere, under KGB control.

These numbers constitute a formidable challenge to U.S. counterintelligence forces. The danger to U.S. national security is beyond question.

THE UNIQUE VALUE OF THE U.N.

There are two distinct parts to the diplomat-espionage problem. The first is inherent in the normal, reciprocal exchange of diplomats capital-to-capital (such as between Washington and Moscow) or major city-to-major city (such as between the consulates in Leningrad and San Francisco). The Soviets post several hundred diplomats to Washington; the U.S. posts a similar number to Moscow; each group is a mix, as both sides know perfectly well, of diplomats and intelligence agents. Even on this regular diplomatic level, however, the Soviets enjoy the advantage of supplementing their own staffs with East Germans, Bulgarians, Cubans, Afghans, and other Soviet bloc and client-state diplomats. Against key targets, they operate as a single, unified hierarchy, with the Soviet KGB at the top. By contrast, the U.S. maintains only loose, informal ties with the intelligence services of its Western allies, Israel, and a few other countries.

To make matters worse, the U.S. suffers from self-inflicted wounds in this diplomatic tradeoff. The total American diplomat and non-diplomat complement in Moscow is substantially smaller than the Soviet Mission in Washington: 202 vs. 495 (with 79 more Soviets currently en route). The Soviets, moreover, hire almost no local, American employees for the non-professional positions at their Washington embassy, but bring to the U.S. Soviet citizens to serve as embassy caretakers, mechanics, drivers and the like. The U.S., distressingly, uses mostly Soviet nationals for these jobs in Moscow. The result: 224 Soviet citizens, under the direct control of their government, now work inside the U.S. Embassy in Moscow. It is no wonder that the KGB was able to dust U.S. Enbassy telephones, chairs, auto seats and other objects with carcinogenic nitrophenylpentadienal powder to track the movements of U.S. diplomats in Moscow.

The second part of the diplomat-espionage problem is even more serious. It is the unique circumstance of the U.S. serving as host country to United Nations headquarters in New York City. Here, of course, there is no tradeoff or reciprocity. All the risk is borne by the U.S., for the U.S.S.R. hosts no United Nations—or other truly international—body. For the Soviet bloc and its clients, "diplomatic" presence at and because of the U.N. is pure espionage gravy.

At the U.N., there are official missions of the Soviet Union, its satellites and clients (plus the observer missions of such non-U.N. members as North Korea, the Palestine Liberation Organization and the South West Africa People's Organization). Alongside the official U.N. missions is the U.N. itself—the huge Secretariat, plus headquarters of the U.N. Development Program (UNDP) and UNICEF (the U.N. Children's Fund). Employment totals more than 15,000, of whom 371 are from the Soviet Union, plus another 225 from the East bloc and the client states. As with Soviet bloc diplomatic personnel, these U.N. employees are a mix of genuine benign bureaucrats and intelligence agents.

Taken together, these components define the parameters of the problem posed by the U.N. as a "sanctuary for spies" in the U.S. It is a problem that the U.S. imposes on itself, for no one forces it to play host to the United Nations.

THE NUMBERS

To present the situation in the most cautious way, the number of Soviet-related diplomat-spies is calculated to underestimate the magnitude of the problem. As such, Albania, the People's Republic of China and Democratic Kampuchea (Cambodia) are not counted. Albania maintains nearly complete isolation from the Soviets and the Soviet world generally; China cannot be considered part of any Soviet-led bloc (although its U.N. Mission and Secretariat personnel in New York may pose a security threat of another kind); and Democratic Kampuchea is still represented at the U.N. by a coalition of opposition forces, partly anti-Communist and wholly anti-Soviet. Iran also is excluded, even though its ties to the international terrorist network pose a clear security threat to the U.S.

Adding together all Soviet bloc and client-state nationals who are on the staffs of their countries' missions to the U.N. or who work for the U.N., the total comes to 1,204 potential agents of espionage in the U.S. because of the U.N.

SOVIET AND BLOC NATIONALS IN NEW YORK

	Dips	Support staff	U.N. Sec't.	UNDP	UNICEF
Afghanistan	4	6	16	5	1
Bulgaria[1 2]	11	12	14	...	...
Cuba	35	21	26	1	2
Czechoslovakia[1 2]	12	9	17	...	...
German Dem. Republic[1 2]	13	13	13	...	...
Hungary[1 2]	11	9	15	...	...
Libya [1]	10	16	9	0	0
Mongolia	5	1	0	0	0
Nicaragua[1 2]	17	0	6	...	...
North Korea	0	20	0	0	0
PLO	0	7	25	0	0
Poland[1 2]	10	9	40	...	...
Romania[1 2]	7	5	10	...	...
USSR	117	178	331	1	1
(Byelorussia)	9	5	11	0	0
(Ukraine)	10	8	27	0	0
Vietnam	15	11	15	1	1
Totals	286	330	575	8	5
Grand total			1,204	...	...

[1] No breakdown by agency is available for these countries. The total also has been adjusted for a few U.N. employees located other than in NYC.
[2] Libyan nationals in New York uniquely, are restricted to the five boroughs of the city.

Sources: all data from lists maintained by the U.S. Mission to the U.N. Diplomatic and support lists as of June 30, 1985; U.N. data as of mid- to late-1984.

Still the total is too low. Most of these "diplomats" and "international civil servants" are accompanied by spouses and/or adult dependents. On the basis of confirmed case histories, U.S. intelligence experts believe that they too undertake espionage assignments of various kinds. Supporting this assessment are defector reports. Assuming conservatively only one spouse or adult dependent for each mission official or U.N. employee, the total doubles to some 2,408 potential security threats to the U.S.

Using the one-in-three estimate, the number of actual agents that can be used by Moscow totals about 800. Using the one-in-two ratio urged by Soviet defectors, the number of actual agents is about 1,200. Even those diplomats and U.N. bureaucrats who engage in no espionage cause problems for the U.S., for the very fact that they are on tap complicates the U.S. counterintelligence challenge greatly.

WHAT CAN BE DONE?

All of the experts consulted, from federal, state and local law enforcement agencies, agree that effective countermeasures against the enormous threat posed by 800 to 1,200 espionage operatives must proceed along two parallel and complementary tracks: (1) every reasonable means must be used to limit the numbers of potential Soviet-related espionage agents in the U.S. and to limit their freedom of operation; (2) U.S. counterintelligence resources must be enhanced substantially.

LIMITING SOVIET U.N.-RELATED ESPIONAGE

For almost 40 years, the U.S. Government has had all the authority it needs to crack down on the U.N.-related Soviet threat to national security. P.L. 357, enacted in 1947, clarified the Headquarters Agreement of November 21, 1947, which governs the U.S.-U.N. host country relationship. In section 6, this law states that "nothing in the Agreement shall be construed as in any way diminishing, abridging or weakening the right of the United States to safeguard its own security" and in particular "completely to

control the entrance of aliens into any territory of the United States other than the (U.N.) headquarters district and its immediate vicinity."

Under this authority, the U.S. restricts the freedom of movement of Soviet and some bloc diplomats at U.N. missions to an area of 25 miles from the U.N.'s New York headquarters. To do the work that legitimately brings them to the U.S., this is all the freedom they need. In 1982, in the Foreign Missions Act, Congress set up administrative machinery within the State Department in an effort to make these travel restrictions tighter.

Although the 1947 Act makes absolutely no distinction between diplomats and any other class of "aliens" no restrictions ever have been imposed on U.N. bureaucrats. As a result, in this year's State Department Authorization Act, Congress made its intent clear beyond any doubt or administrative fudging. The Roth-Hyde Amendment, named for its principal co-sponsors, Senator William V. Roth, Jr. (R-Delaware) and Representative Henry J. Hyde (R-Illinois), extends to all foreign nationals at the U.N. the restrictions that now or may in the future apply to their countries' U.N. missions. There is to be no more free ride for those "international civil servants" who are known to report routinely to their U.N. missions, to receive orders from their governments, and even to kick back part of their U.N. paychecks.

The mandate of Congress is unequivocal. Effective follow-up action by the State Department and the U.S. Mission to the U.N.—even by the U.N. itself—is now called for, in the following directions:

(1) *The Roth-Hyde Amendment went into effect last week; it should be vigorously enforced.*—There is no law or international convention, nor any U.S. host country obligation, that allows U.S. "guests" to break American laws or threaten U.S. national security. The most effective enforcement of the Amendment would be to require prior notification by the U.N. Secretary General of all official U.N. travel (which would alert U.S. counterintelligence agencies to potential security threats and enable them to deny permission in some cases). Further, U.N. employees who are citizens of countries under restriction should be required to request permission for "private" travel. Such unofficial travel should almost always be denied.
